Enclosure: Press release **ANGLOGOLD ASHANTI REPORT FOR THE QUARTER AND SIX MONTHS ENDED JUNE 30, 2010 PREPARED IN ACCORDANCE WITH INTERNATIONAL FINANCIAL REPORTING STANDARDS**

Quarter 2 2010

Report

for the quarter and six months ended 30 June 2010

Group results for the quarter....

- Adjusted headline earnings more than doubled to \$129m, or 35 US cents per share arising from the higher production and gold price.
- Production of 1.126Moz at a total cash cost of \$617/oz; significant improvements on market guidance.
- Production gains 4% on higher volumes from South Africa and Americas regions.
- Hedge book declines by 330,000oz to 3.22Moz, now less than three quarters' production.
- Uranium production jumps 24% to 387,000lbs on improved recoveries.
- CC&V, Geita and South African operations continue strong turnaround success.
- Promising initial results received from exploration drilling on Baffin Island in Canada.
- Tropicana regional exploration yields significant results, feasibility study on track for completion in third quarter.
- Kibali and Mongbwalu project studies in the DRC, progressing to schedule.
- Interim dividend declared of 65 South African cents per share or 9 US cents per ADS.

Events post quarter-end...

- Tau Lekoa sale to Simmer & Jack Mines Limited concluded on 1 August 2010.
- Drilling set to restart on La Colosa in Colombia.
- AngloGold Ashanti assumes 51% of Gramalote project in Colombia.

Financial and Operating Report

OVERVIEW FOR THE QUARTER

OPERATING RESULTS FOR THE QUARTER

Production and total cash costs for the three months to 30 June were both better than the guidance set by the company. Production rose 4% to 1.126Moz from the previous quarter, while total cash costs were largely unchanged at \$617/oz. The improved performance was attributable to the recovery in production in South Africa and Iduapriem in Ghana, the continued turnaround at Cripple Creek & Victor in the US and Geita in Tanzania, as well as a strong operating performance from Cerro Vanguardia in Argentina.

Guidance for the second quarter was 1.079Moz at a total cash cost of \$650/oz and an exchange rate of R7.40/\$.

SAFETY

Tragically, eight fatal injuries were recorded during the quarter after five colleagues lost their lives at the South African operations, two in Tanzania and another in the Democratic Republic of the Congo. AngloGold Ashanti's senior management recommitted to the company's goal of achieving 'zero harm' across its operations, with the launch of its Safety Transformation Blueprint. This new strategy, to achieve the next quantum improvement in safety, will be incorporated into the Project ONE operating model. The downward trend observed in the Lost Time Injury Frequency Rate (LTIFR) during preceding years continued into the second quarter, improving by 12% to 6.17 per million hours worked. An analysis of injury reports show a proliferation of incidents between midnight and the end of the night shift, when the human body is most susceptible to fatigue. Work is currently underway to mitigate this risks in the workplace. Siguiiri, Yatela, Sadiola and Navachab remained free of lost time injuries during the period under review.

OPERATING REVIEW

The South African operations produced 447,000oz at a total cash cost of \$560/oz in the second quarter of 2010, compared with 384,000oz at a total cash cost of \$626/oz the previous quarter. Strong volume gains and grade improvement across each of the core operations contributed to the better performance as the new management team implemented its turnaround strategy. At the **Vaal River** operations, Great Nologwa showed a 17% improvement in production to 34,000oz and a drop in total cash costs to \$829/oz as the strategy of improving productivity rates to return the mine to profitability continued. Kopanang and Moab Khotsonq were both beneficiaries of higher grades mined and registered 11% production gains to 78,000oz at \$542/oz and 70,000oz at \$557/oz respectively. The surface operations also improved yields amid a rise in volumes treated, resulting in a 18% jump in output to 40,000oz and a 8% reduction in total cash costs to \$478/oz. Improved recoveries helped the company achieve a 24% rise in uranium production to 387,000lb. At the **West Wits** operations, higher yield and a better mine call factor at the flagship Mponeng operation led to an 18% increase in production to 136,000oz, while total cash costs improved by 7% to \$408/oz. The resumption of normal operations at TauTona, following the halt for an infrastructure inspection, led to a 41% rise in production to 62,000oz at a total cash cost of \$682/oz. Production at Savuka remained constrained at 2,000oz as rehabilitation work continued slower than anticipated. Options are continually being reviewed for this asset going forward.

Continental Africa's production declined marginally to 371,000oz at a total cash cost of \$702/oz, from 374,000oz at \$630/oz in the previous quarter. The principal reason for the drop was the lower production from Obuasi, where – as stated earlier this year – steps were taken to improve water treatment, resulting in a 21% decline in output to 77,000oz and a 28% rise in costs to \$717/oz. Iduapriem's production rebounded and costs improved after a shutdown for much of the preceding quarter for improvements to tailings storage. Grade declines impacted production at Yatela and Morila in Mali and Siguiiri in Guinea, though this was partly offset at the latter by higher volumes. The turnaround at Geita, in Tanzania, continued despite stoppages related to the collision of two mining trucks during the quarter, with a 7% gain in production to 90,000oz and total cash costs little changed at \$833/oz. *Australia's production declined to 87,000oz at \$1,063/oz, from 114,000oz at \$931/oz the previous quarter.* The decline in production from Sunrise Dam was in line with the plan. The total cash cost figure at the operation included \$326/oz non-cash charge for deferred stripping.

The Americas production increased to 221,000oz at a total cash cost of \$416/oz, from 207,000oz at \$416/oz the previous quarter. The chief contributor to improved production was Cripple Creek & Victor, where the strategy of stacking higher grade ore closer to the pad liner helped realise a 33% increase in output to 77,000oz, along with a 4% drop in total cash costs to \$465/oz. Higher by-product credits at Cerro Vanguardia, where silver production

rose 5%, helped the mine achieve a 12% drop in total cash costs to \$345/oz, the lowest in the group. Gold production at the mine rose 2% to 48,000oz. In Brazil, lower grades and the annual maintenance shutdown of the acid plant caused a 5% drop in production at AngloGold Ashanti Brasil Mineração to 78,000oz. The total cash cost

increase was well contained at 3% to \$381/oz, despite higher power and maintenance service expenses. Serra Grande's production slipped by 10% to 18,000oz due to lower grades.

FINANCIAL AND CORPORATE REVIEW

Adjusted headline earnings more than doubled to \$129m, or 35 US cents per share, from \$61m, or 17 US cents the previous quarter. This increase was due largely to the increased production and strong cost control, as well as an increase in the received price. An interim dividend of 65 South African cents per share has been declared, an 8% increase on last year's interim dividend.

The average gold price received during the quarter rose 8% to \$1,095/oz. This represents an 8.6% discount to the average spot price over the period of \$1,198/oz, within the guided range of 8% to 10%. The company's overall hedge commitments reduced by 330,000oz to 3.22Moz, which is less than three quarters' production at current rates.

The company continued to improve the strength of its balance sheet given the increase in operating cash flow and the two-part, \$2bn debt package finalised in May which comprised a renewed revolving credit facility of \$1bn as well as a \$300m 30-year bond and a \$700m 10-year bond. Net debt declined by 10% to \$834m, while the ratio of net debt to EBITDA (earnings before interest, tax and depreciation) was 0.5 times.

The company recorded a loss attributable to equity shareholders of \$187m compared with a profit of \$157m the previous quarter. The June quarter includes unrealised losses on non-hedge derivatives of \$380m pre-tax compared with a profit of \$82m pre-tax the previous quarter.

PROJECTS

AngloGold Ashanti incurred capital expenditure of \$226m during the quarter, of which \$64m was spent on growth projects. Of the growth-related capital, \$33m was spent in the Americas, \$20m in Continental Africa, \$9m in South Africa and \$3m in Australasia.

The feasibility study at the **Tropicana Gold Project**, 330km east-northeast of Kalgoorlie in Western Australia, is nearing completion. AngloGold Ashanti is the manager of the project and owns a 70% stake, while Independence Group NL owns the balance. Finalisation of capital and operating costs are in progress and development of the implementation schedule and construction contracting strategies are underway. The study is scheduled for completion by the fourth quarter, when the partners will make a development decision. In July, the Western Australia Environmental Protection Agency (EPA) released its report and recommendation on the project and it is anticipated that the State and Federal Ministers will announce their decision by year-end. Should the necessary regulatory and board approvals be obtained by year-end, construction will start in early 2011, with gold production to begin in the first half of 2013.

Scoping studies will be completed in the second half of the year at both Havana Deeps deposit and at the Boston Shaker discovery, about 500m northeast of Tropicana. Boston Shaker has now been defined over a 700m strike length and is open down dip. It is expected that this work will add to resources in the second half of 2010. (Refer exploration section of report for additional detail on drilling results for the Tropicana district).

Detailed engineering on the **Córrego do Sítio Project** in Brazil commenced immediately after the project was approved in May. Underground development by AngloGold Ashanti's in-house teams is progressing to schedule and environmental licenses have been obtained for the crushing plant, ore storage facility, the second portal and effluent treatment. The contract to refurbish and upgrade the São Bento plant is currently in AngloGold Ashanti's procurement process, while the contracts for the design and manufacture of the autoclaves have been awarded. Randgold Resources has announced their decision to accelerate the proposed start to the development of the **Kibali Project**, located in the northeast Democratic Republic of the Congo. Pre-construction preparations have run ahead of plan given positive interaction with local communities and rapid development of associated infrastructure, allowing the partners to bring the start of construction forward by six months to mid-2011. The project is on track to pour its first gold in January 2014. An updated feasibility study, which will optimise the mining plan and the size of the plant, is on track for completion by the end of this year. Randgold, the operator of Kibali, and AngloGold Ashanti each have an effective 45% stake in the project, while OKIMO holds the balance. (Refer exploration section for an update on exploration at **Mongwalu**).

EXPLORATION

Total exploration expenditure during the second quarter, inclusive of expenditure at equity accounted joint ventures, was \$72m (\$26m on brownfields, \$26m on greenfields and \$20m on pre-feasibility studies), compared

with \$48m the previous quarter (\$17m on brownfields, \$17m on greenfields and \$14m on pre-feasibility studies). The following are highlights from the company's greenfields exploration activities during the quarter. More detail on the brownfields programme can be seen at www.anglogoldashanti.com.

About 82,500m of greenfields exploration drilling was completed at priority sites and used to delineate new targets in Australia, Canada, Guinea and the Solomon Islands. This was more than double the amount drilled the previous quarter. Expenditure rose 53% to \$26m.

In **Australasia**, scoping level economic studies will be completed on the Boston Shaker and Havana Deeps resource additions during the second half of the year. Significant gold results at the Boston Shaker deposit, about 500m northeast of the Tropicana resource, included 32m @ 3.71g/t Au from 181m, 5m @ 3.5g/t Au from 61m and 9m @ 7.44g/t Au from 51m. The Havana Deeps prospect represents the potential higher-grade underground extension of the Havana open-pit ore body. Exploration of this zone will complement the Tropicana feasibility study. Havana deeps drilling results included 11m @ 3.77g/t Au from 477m, 14m @ 5.84g/t Au from 558m, 14m @ 4.75g/t Au from 663m and 14m @ 4.19g/t Au from 387m. Significant results were also returned from aircore drilling of several regional prospects including Black Dragon, 25km northwest of Tropicana, with gold results up to 8m @ 0.73g/t Au and from Voodoo Child, 50km north of Tropicana, including 12m @ 2.5g/t Au from 1m and 26m @ 0.68g/t Au from 11m.

In the **Americas**, where the company has more than 60,000km

2

of exploration tenements in some of the most prospective gold belts, early stage exploration took place in Colombia, Brazil, Argentina, the US and Canada. Diamond drilling at the Malrok prospect, on the Baffin Island Gold Project JV with Commander Resources in Canada, encountered thick intersections of altered and structurally complex iron formation units in a number of holes drilled down-plunge and down-dip from gold-bearing iron formation intercepts drilled in 2004. At least three separate iron formations, including one previously undiscovered – were intersected during a 3,300m drilling campaign. The gold-bearing iron formations at Malrok consist of iron-rich silicates with pyrrhotite, arsenopyrite and erratically distributed fine grains of free gold. Drilling also commenced 40km east of Malrok at the Kanosak prospect, a 300m-wide, 3.5km-long trend consisting of gold-bearing quartz veins and alteration open to extension. Channel sampling over the past two years have confirmed that gold values occur in quartz-arsenopyrite veins, the arsenopyrite bearing host sedimentary rocks and localised shear zones. Previously reported results included gold values of up to 9.32g/t Au over 5.87m and 91.06g/t Au over 1.6m.

Regional exploration work in Colombia was also undertaken during the period and included mapping and sampling in the La Colosa regional project area of approximately 600km

2

, the southern Cajamarca region and the La Llanada region.

In **Continental Africa**, AngloGold Ashanti, in partnership with OKIMO (13.78%), is scheduled to complete a feasibility study by the first quarter of next year on the 2.93Moz Mongbwalu project in the Democratic Republic of the Congo. A 20,000m combined drilling programme is currently underway over Mongbwalu-Adidi and a further 5,000m programme is planned for early phase drill-testing of regional targets in the third quarter. Other regional work is ongoing and 5,886km

2

of exploration licenses previously held by OKIMO, are being transferred to this joint venture. Additional exploration took place on blocks 2,3 and 4 in Guinea, as well as with joint venture partners in Gabon and Tanzania.

In the **Middle East & North Africa**, AngloGold Ashanti's exploration and related activities were conducted through the Strategic Alliance with Thani Investments LLC and included Phase 2 sampling and mapping in Egypt. At the Hodine concession, the Hutite orogenic gold prospect has been mapped and sampled in detail. Encouraging results were received and drilling is scheduled to commence in the third quarter. In Eritrea, where two exploration licences totalling 1,870km

2

were granted to the alliance, exploration will begin in the third quarter. Project generation has actively taken place elsewhere in the region, including Saudi Arabia.

OUTLOOK

AngloGold Ashanti's production and total cash cost guidance for the full year 2010 remains unchanged at 4.5Moz to 4.7Moz at a total cash cost of \$590/oz to \$615/oz. This assumes an average exchange rate of R7.70/\$ and an oil price of \$75/barrel.

Third quarter production is expected to be 1.150Moz at a total cash cost of \$645/oz, assuming an exchange rate of R7.55/\$. This reflects the impact of the winter power tariff and mid-year wage increases in South Africa.

Notes:

- All references to price received include realised non-hedge derivatives.
- All references to adjusted gross profit (loss) refers to gross profit (loss) adjusted for unrealised non-hedge derivatives and other commodity contracts and excludes hedge buy-back costs.
- In the case of joint venture and operations with non-controlling interests, all production and financial results are attributable to AngloGold Ashanti.
- Rounding of figures may result in computational discrepancies.

Review of the Gold Market

GOLD PRICE MOVEMENT AND INVESTMENT MARKETS

Gold price data

The gold price averaged \$1,198/oz during the quarter, 8% more than during the previous three-month period amid a continued backdrop of heightened sovereign-debt risk in Europe, with successive debt downgrades in Greece and Portugal. As this contagion spread across Mediterranean countries, the equity markets dropped and the euro traded sharply lower versus the dollar. Risk aversion in the broader market sent bullion to a record \$1,265/oz on 21 June and also to new highs in euro and Brazilian real, highlighting the metal's safe haven qualities across several regions.

Investment

While the rate of inflows into exchange traded funds moderated year-on-year, the 10 major ETFs still grew from 57Moz at the start of the quarter to a high of 65Moz. ETF gold holdings now represent almost 80% of annual gold production. Net long positions on the Comex peaked at 34Moz, a level last seen during the fourth quarter of 2009.

The sovereign debt crisis underpinned investment demand in the US. During the quarter, 191t were added to the GLD ETF and 13.4m contracts were added to COMEX, 15% more than the previous quarter. American Eagles registered sales of 12.5t during the quarter, up from 8.4t the previous period. Gold investment in the Middle East market did not experience a particularly notable second quarter on the back of a reasonable first quarter.

Medallion and bar sales rose strongly in India, with anecdotal evidence suggesting that, unlike the jewellery sector, investors showed robust demand even as the price rose. This was further evidenced in large-scale registrations for Jewellery Savings Schemes. Investment demand in China jumped by half year-on-year and accounted for as much as 40% of the total gold off-take of about 200t during the quarter. This was nearly equivalent to all of last year's investment-related purchases amid continued declines in the country's stock market and regulatory changes that have made property speculation more onerous.

Official sector

With three months remaining in the third Central Bank Sales Agreement, only 39t of the 400t quota have been sold, comprised of sales by the International Monetary Fund. The World Gold Council reports that official sector gold holdings increased by 272t in the first quarter of 2010, with 180t from a revision of Saudi Arabia's gold holdings and the balance of 92t, which has been accumulated by the official sector during the first quarter of the year.

Jewellery

In India the second quarter witnessed strong demand in the period leading up to the Akshaya Thritiya festival in mid-May. Across India the festivities started with the Baisakhi Vishu and the Bengali New Year festivities, which run from mid-April. Most jewellers reported higher Akshaya Thritiya sales in volume terms when compared to the same period last year. June is traditionally the annual off-peak season for the Indian market and this year is no different with demand slowing.

The increasing gold price took its toll on jewellery demand in India, with the average price 5% higher in rupee terms. Consumer sentiment remained sluggish during the off-peak season amid high price levels, relative volatility and the high rate of inflation. Demand is expected to recover during the festive season from August until November, which features Diwali-Dhanteras. Jewellery sales in China showed single-digit percentage increase during the quarter, which is traditionally a weak sales period in the country. China's consumers appeared to have adjusted to the new price floor around \$1,200/oz, but retailers and manufacturers remained more circumspect than during the first quarter. Consumers in the US, however, suffered 'sticker shock' at the higher prices and retailers continued to hold smaller inventories.

Hedge position

As at 30 June 2010, AngloGold Ashanti had the following total outstanding commitments against future production.

The total ounces committed on this date was 3.22Moz or 100t (as at 31 March 2010: 3.55Moz or 110t) and the total net delta

tonnage of the hedge on this date was 3.06Moz or 95t (at 31 March 2010: 3.35Moz or 104t).

The marked-to-market value of all hedge transactions making up the hedge positions in the table below was a negative \$2.41bn (negative R18.40bn) as at 30 June 2010 (at 31 March 2010; negative \$2.07bn – negative R15.09bn). The value was based on a gold price of \$1,240.6/oz, exchange rates of R7.63/\$ and A\$/0.8362 and the prevailing market interest

rates and volatilities at the time.

As at 10 August 2010, the marked-to-market value of the hedge book was a negative \$2.16bn (negative R15.61bn), based on a gold price of \$1,197.3/oz and exchange rates of R7.23/\$ and A\$/0.9132 and the prevailing market interest rates and volatilities at the time.

These marked-to-market valuations are in no way predictive of the future value of the hedge position nor of future impact

on the revenue of the company. The valuation represents the cost of buying all hedge contracts at the time of valuation,

at market prices and rates available at the time.

The following table indicates the group's **commodity hedge position** at 30 June 2010:

*

Represents a net long gold position and net short US Dollars and Rands resulting from both forward sales and purchases for the period.

*** The Delta of the hedge position indicated above is the equivalent gold position that would have the same marked-to-market sensitivity for a small*

change in the gold price. This is calculated using the Black-Scholes options formula with the ruling market prices, interest rates and volatilities as at 30 June 2010.

Fair value of derivative analysis by accounting designation at 30 June 2010:

Gross (loss) profit

AngloGold Ashanti implemented IFRS 8 “Operating Segments” with effect from 1 January 2009. AngloGold Ashanti’s operating segments are being reported based on the financial information provided to the Chief Executive Officer and the Executive Management team, collectively identified as the Chief Operating Decision Maker (“CODM”). As a result of changes in management structure and reporting from 1 January 2010, the CODM has changed its reportable segments. Individual members of the Executive Management team are responsible for geographic regions of the business. Comparative information has been presented on a consistent basis.

Navachab which was previously included in Southern Africa now forms part of Continental Africa and North and South America has been combined into Americas. Southern Africa has been renamed to South Africa.

Notes**for the quarter and six months ended 30 June 2010****1. Basis of preparation**

The financial statements in this quarterly report have been prepared in accordance with the historic cost convention except for certain financial instruments which are stated at fair value. The group's accounting policies used in the preparation of these financial statements are consistent with those used in the annual financial statements for the year ended 31 December 2009 and revised International Financial Reporting Standards (IFRS) which are effective 1 January 2010, where applicable. Effective 1 January 2010 the Chief Operating Decision Maker changed the reportable segments. Details are included in Segmental reporting.

The financial statements of AngloGold Ashanti Limited have been prepared in compliance with IAS34, JSE Listings Requirements and in the manner required by the South African Companies Act, 1973 for the preparation of financial information of the group for the quarter and six months ended 30 June 2010.

*Includes capital commitments relating to equity accounted joint ventures.***Liquidity and capital resources**

To service the above capital commitments and other operational requirements, the group is dependent on existing cash resources, cash generated from operations and borrowing facilities.

Cash generated from operations is subject to operational, market and other risks. Distributions from operations may be subject to foreign investment and exchange control laws and regulations and the quantity of foreign exchange available in offshore countries. In addition, distributions from joint ventures are subject to the relevant board approval.

The credit facilities and other financing arrangements contain financial covenants and other similar undertakings.

To the extent that external borrowings are required, the groups covenant performance indicates that existing financing facilities will be available to meet the above commitments.

Rounding of figures may result in computational discrepancies.

AngloGold Ashanti is subject to contingencies pursuant to environmental laws and regulations that may in future require the group to take corrective action as follows:

(1) Groundwater pollution – AngloGold Ashanti has identified groundwater contamination plumes at certain of its operations, which have occurred primarily as a result of seepage from mine residue stockpiles. Numerous scientific, technical and legal studies have been undertaken to assist in determining the magnitude of the contamination and to find sustainable remediation solutions. The group has instituted processes to reduce future potential seepage and it has been demonstrated that Monitored Natural Attenuation (MNA) by the existing environment will contribute to improvement in some instances. Furthermore, literature reviews, field trials and base line modelling techniques suggest, but are not yet proven, that the use of phyto-technologies can address the soil and groundwater contamination. Subject to the completion of trials and the technology being a proven remediation technique, no reliable estimate can be made for the obligation.

(2) Deep groundwater pollution – The company has identified a flooding and future pollution risk posed by deep groundwater in the Klerksdorp and Far West Rand gold fields. Various studies have been undertaken by AngloGold Ashanti since 1999. Due to the interconnected nature of mining operations, any proposed solution needs to be a combined one supported by all the mines located in these gold fields. As a result the Department of Mineral Resources and affected mining companies are now involved in the development of a “Regional Mine Closure Strategy”. In view of the limitation of current information for the accurate estimation of a liability, no reliable estimate can be made for the obligation.

(3) Sales tax on gold deliveries – Mineração Serra Grande S.A. (MSG), received two tax assessments from the State of Goiás related to payments of sales taxes on gold deliveries for export. AngloGold Ashanti Brasil Mineração Ltda. manages the operation and its attributable share of the first assessment is approximately \$49m. In November 2006 the administrative council’s second chamber ruled in favour of MSG and fully cancelled the tax liability related to the first period. The State of Goiás has appealed to the full board of the State of Goiás tax administrative council. The second assessment was issued by the State of Goiás in October 2006 on the same grounds as the first assessment, and the attributable share of the assessment is approximately \$30m. The company believes both assessments are in violation of federal legislation on sales taxes.

(4) Other tax disputes – MSG received a tax assessment in October 2003 from the State of Minas Gerais related to sales taxes on gold. The tax administrators rejected the company’s appeal against the assessment. The company is now appealing the dismissal of the case. The company’s attributable share of the assessment is approximately \$9m.

AngloGold subsidiaries in Brazil are involved in various disputes with tax authorities. These disputes involve federal tax assessments including income tax, royalties, social contributions and annual property tax. The amount involved is approximately \$21m.

(5) Indirect taxes – AngloGold Ashanti (Ghana) Limited received a tax assessment for \$10m during September 2009 following an audit by the tax authorities related to indirect taxes on various items. Management is of the opinion that the indirect taxes are not payable and the company has lodged an objection.

(6) Royalty – As a result of the sale of the interest in the Boddington Gold Mine joint venture during 2009, the group is entitled to receive a royalty on any gold recovered or produced by the Boddington Gold Mine, where the gold price is in excess of Boddington Gold Mine’s cash cost plus \$600/oz. The royalty commences on 1 July 2010 and is capped at a total amount of \$100m, R763m.

(7) Insurance claim – On 22 May 2009 an insurable event occurred at Savuka Gold Mine. The amounts due from the insurers are subject to a formula based on lost production, average gold price and average exchange rates subject to various excesses and the production and the preparation of supportable data. The insurable amount is not yet determinable, but management expects the amount to exceed \$40m, R305m, of which \$23m, R176m has been received during 2009 and 2010.

(8) Provision of surety – The company has provided sureties in favour of a lender on a gold loan facility with its affiliate

Oro Group (Pty) Limited and one of its subsidiaries to a maximum value of \$13m, R100m. The suretyship agreements have a termination notice period of 90 days.

15. Concentration of risk

There is a concentration of risk in respect of reimbursable value added tax and fuel duties from the Tanzanian government:

- Reimbursable value added tax due from the Tanzanian government amounts to \$47m at 30 June 2010 (31 March 2010: \$42m). The last audited value added tax return was for the period ended 28 February 2010 and at the reporting date the audited amount was \$36m. The outstanding amounts at Geita have been discounted to their present value at a rate of 7.82%.

- Reimbursable fuel duties from the Tanzanian government amounts to \$49m at 30 June 2010 (31 March 2010: \$49m). Fuel duty claims are required to be submitted after consumption of the related fuel and are subject to authorisation by the Customs and Excise authorities. Claims for refund of fuel duties amounting to \$43m have been lodged with the Customs and Excise authorities, whilst claims for refund of \$6m have not yet been lodged. The outstanding amounts have been discounted to their present value at a rate of 7.82%.

16. Subsequent events

Tau Lekoa – Finalisation of sale

The Department of Mineral Resources has transferred the mining rights for its Tau Lekoa Mine to Buffelsfontein Gold Mines Limited, a wholly-owned subsidiary of Simmer & Jack Mines Limited (Simmers). Full ownership of Tau Lekoa and the adjacent properties of Weltevreden, Jonkerskraal and Goedgenoeg will pass to Simmers on 1 August 2010.

AngloGold Ashanti entered into an agreement with Simmers in February 2009 for the sale of Tau Lekoa and the adjacent properties of Weltevreden, Jonkerskraal and Goedgenoeg for a total purchase consideration of:

- R600m (payable on completion of the transaction and adjusted as set out below); and

- a royalty determined at 3% of the net revenue (gross revenue less state royalties) generated by the Tau Lekoa mine and any operations developed at Weltevreden, Jonkerskraal and Goedgenoeg. The royalty will be payable quarterly, from 1 January 2010, until the total production from Tau Lekoa, Weltevreden, Jonkerskraal or Goedgenoeg upon which the royalty is paid is equal to 1.5Moz and provided that the average quarterly rand price of gold is equal to or exceeds R180,000/kg (in 1 January 2010 terms).

In terms of the agreement, Simmers will settle the R600m purchase consideration payable at completion as follows:

- R450m in cash; and

- the balance in cash or shares in Simmers. This remaining R150m is subject to an offset adjustment (up to a maximum of R150m) based on the free cash flow generated by Tau Lekoa between 1 January 2009 and 31 July 2010 and including an offset for the royalty payable from 1 January 2010 to 30 June 2010. This balancing amount will be determined based upon a final audit of the July 2010 production figures.

17. Borrowings

AngloGold Ashanti's borrowings are interest bearing.

18. Announcements

On 1 June 2010, AngloGold Ashanti announced that it was halting the supply of services, including water, compressed air, electricity and sewerage, to the mines in Orkney following the failure by the liquidators of Pamodzi Gold Orkney, to settle debts owed for services supplied to the operations over the past ten months. AngloGold Ashanti however would continue to supply potable water and electrical power to Pamodzi's mine residences for as long as these were occupied.

On 17 February 2009 AngloGold Ashanti announced the terms of the sale of its Tau Lekoa Mine to Simmer & Jack Mines Limited (Simmers). This sale was concluded effective 1 August 2010, following the transfer of the mining rights of the Tau Lekoa Mine and the adjacent properties of Weltevreden, Jonkerskraal and Goedgenoeg to

Buffelsfontein Gold Mines Limited, a wholly-owned subsidiary of Simmers on 20 July 2010. Refer Note 16.

19. Dividend

The directors declared Interim Dividend No. 108 of 65 (Interim Dividend No. 106: 60) South African cents per ordinary share for the six months ended 30 June 2010. In compliance with the requirements of Strate, given the company's primary listing on the JSE Limited, the salient dates for payment of the dividend are as follows:

To holders of ordinary shares and to holders of CHESS Depositary Interests (CDIs)

Each CDI represents one-fifth of an ordinary share.

2010

Currency conversion date for UK pounds, Australian dollars and Ghanaian cedis

Thursday, 26 August

Last date to trade ordinary shares cum dividend

Friday, 27 August

Last date to register transfers of certificated securities cum dividend

Friday, 27 August

Ordinary shares trade ex dividend

Monday, 30 August

Record date

Friday, 3 September

Payment date

Friday, 10 September

On the payment date, dividends due to holders of certificated securities on the South African share register will either be electronically transferred to shareholders' bank accounts or, in the absence of suitable mandates, dividend cheques will be posted to such shareholders.

Dividends in respect of dematerialised shareholdings will be credited to shareholders' accounts with the relevant CSDP or broker.

To comply with the further requirements of Strate, between Monday, 30 August 2010 and Friday, 3 September 2010, both days inclusive, no transfers between the South African, United Kingdom, Australian and Ghana share registers will be permitted and no ordinary shares pertaining to the South African share register may be dematerialised or rematerialised.

To holders of American Depositary Shares

Each American Depositary Share (ADS) represents one ordinary share.

2010

Ex dividend on New York Stock Exchange

Wednesday, 1 September

Record date

Friday, 3 September

Approximate date for currency conversion

Friday, 10 September

Approximate payment date of dividend

Monday, 20 September

Assuming an exchange rate of R7.2255/\$, the dividend payable per ADS is equivalent to 8.9959 US cents. This compares with the interim dividend of 7.6553 US cents per ADS paid on 8 September 2009. However the actual rate of payment will depend on the exchange rate on the date for currency conversion.

To holders of Ghanaian Depositary Shares (GhDSs)

100 GhDSs represent one ordinary share.

2010

Last date to trade and to register GhDSs cum dividend

Friday, 27 August

GhDSs trade ex dividend

Monday, 30 August

Record date

Friday, 3 September

Approximate payment date of dividend

Monday, 13 September

Assuming an exchange rate of R1/¢0.1970, the dividend payable per share is equivalent to 0.12805 cedis. This compares with the interim dividend of 0.10956 cedis per share paid on 31 August 2009. However, the actual rate of payment will depend on the exchange rate on the date for currency conversion. In Ghana, the authorities have determined that dividends payable to residents on the Ghana share register be subject to a final withholding tax at a rate of 8%.

In addition, directors declared Dividend No. E8 of 32.5 South African cents per E ordinary share, payable to employees participating in the Bokamoso ESOP and Izingwe Holdings (Proprietary) Limited. These dividends will be paid on Friday, 10 September 2010.

From time to time AngloGold Ashanti may publicly disclose certain "Non-GAAP" financial measures in the course of its financial presentations, earnings releases, earnings conference calls and otherwise.

The group utilises certain Non-GAAP performance measures and ratios in managing its business and may provide users of this financial information with additional meaningful comparisons between current results and results in prior operating periods. Non-GAAP financial measures should be viewed in addition to, and not as an alternative for, the reported operating results or cash flow from operations or any other measure of performance prepared in accordance with IFRS. In addition, the presentation of these measures may not be comparable to similarly titled measures other companies use.

Headline earnings adjusted for unrealised non-hedge derivatives, other commodity contracts and fair value adjustments on convertible bonds

Quarter ended

Six months ended

Loss (gain) on non-hedge derivatives and other commodity contracts in the income statement comprise the change in fair value of all non-hedge derivatives and other commodity contracts as follows:

SA Rand million

The unrealised fair value change on the option component of the convertible bond;

Six months ended

US Dollar million

Quarter ended

In addition, during the June 2008 quarter the hedge book was reduced and non-hedge derivative contracts to the value of \$1,1bn was early settled. Following the sale of the investment in Nufcor International Ltd. (NIL) uranium contracts of 1m pounds were cancelled. In the September 2009 quarter the hedge book was further reduced and contracts to the value of \$797m were accelerated and settled. The impact on earnings after taxation was \$916m in 2008 and \$758m in 2009; The unrealised fair value change on the onerous uranium contracts; and Open positions: The change in fair value from the previous reporting date or date of recognition (if later) through to the current reporting date; and Adjusted headline earnings is intended to illustrate earnings after adjusting for: Settled positions: The change in fair value from the previous reporting date or date of recognition (if later) through to the date of settlement.

The unrealised fair value change in contracts that are still open at the reporting date, as well as, the unwinding of the historic marked-to-market value of the position settled in the period;

Investment in hedge restructure transaction: During the hedge restructure in December 2004 and March 2005 quarters, \$83m and \$69m in cash was injected respectively into the hedge

book in these quarters to increase the value of long-dated contracts. The entire investment in long-dated derivatives (certain of which have now matured), for the purposes of the adjustment to earnings, will only be taken into account when the realised portion of long-dated non-hedge derivatives are settled, and not when the short-term contracts were settled;

(1) Gold income received is gold income per income statement and (loss) gain on realised non-hedge derivatives (note 4).

Rounding of figures may result in computational discrepancies.

Certain statements made in this communication, including, without limitation, those concerning AngloGold Ashanti's strategy to reduce its gold hedging position including the extent and effects of the reduction, the economic outlook for the gold mining industry, expectations regarding gold prices, production, cash costs and other operating results, growth prospects and outlook of AngloGold Ashanti's operations, individually or in the aggregate, including the completion and commencement of commercial operations of certain of AngloGold Ashanti's exploration and production projects, the resumption of production at AngloGold Ashanti's mines in Ghana, the completion of announced mergers and acquisitions transactions, AngloGold Ashanti's liquidity and capital resources, and expenditure and the outcome and consequences of any litigation proceedings or environmental issues, contain certain forward-looking statements regarding AngloGold Ashanti's operations, economic performance and financial condition. Although AngloGold Ashanti believes that the expectations reflected in such forward-looking statements are reasonable, no assurance can be given that such expectations will prove to have been correct. Accordingly, results could differ materially from those set out in the forward-looking statements as a result of, among other factors, changes in economic and market conditions, success of business and operating initiatives, changes in the regulatory environment and other government actions including environmental approvals and actions, fluctuations in gold prices and exchange rates, and business and operational risk management. For a discussion of certain of these factors, refer to AngloGold Ashanti's annual report for the year ended 31 December 2009, which was distributed to shareholders on 30 March 2010. The company's annual report on Form 20-F, was filed with the Securities and Exchange Commission in the United States on 19 April 2010 and as amended on 18 May 2010. AngloGold Ashanti undertakes no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after today's date or to reflect the occurrence of unanticipated events. All subsequent written or oral forward-looking statements attributable to AngloGold Ashanti or any person acting on its behalf are qualified by the cautionary statements herein. AngloGold Ashanti posts information that is important to investors on the main page of its website at www.anglogoldashanti.com and under the "Investors" tab on the main page. This information is updated regularly. Investors should visit this website to obtain important information about AngloGold Ashanti.
