FORWARD-LOOKING STATEMENTS

This annual report on Form 40-F contains forward-looking statements, including, without limitation, those regarding expectations for market growth and developments; expectations for growth and profitability; and statements preceded by believes, expects, anticipates, foresees, or similar expressions, are forward-looking statements. Since these statements are based on current plans, estimates and projections, they involve risks and uncertainties, which may cause actual results to materially differ from those expressed in such forward-looking statements. These risks and uncertainties include, but are not limited to: (1) operating factors such as continued success of manufacturing activities and the achievement of efficiencies therein, continued success of product development, acceptance of new products or services by targeted customers, success of the existing and future collaboration arrangements, changes in business strategy or development plans or targets; (2) industry conditions, such as strength of product demand, intensity of competition, prevailing and future global market prices for products and the pricing pressures thereto, financial condition of the customers and competitors, the potential introduction of competing products and technologies by competitors; and (3) general economic conditions such as rates of economic growth in the Company's principal geographic markets or fluctuations in exchange and interest rates.

Figures prior to 2002 have been restated to account for the adoption of the amended Canadian Institute of Chartered Accountants recommendations regarding foreign currency translation.

DISCLOSURE CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

In accordance with the rules of the Securities and Exchange Commission, Domtar maintains a system of disclosure controls and procedures that is designed to ensure that information required to be disclosed by Domtar is accumulated and communicated to management, including the Chief Executive Officer and the Chief Financial Officer, in a timely manner. Under the supervision and with the participation of its management, including its Chief Executive Officer and Chief Financial Officer, Domtar has evaluated the effectiveness of the design and operation of these disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, Domtar's Chief Executive Officer and Chief Financial Officer concluded that Domtar's system of disclosure controls and procedures is effective.

Change in Internal Controls over Financial Reporting

Domtar maintains a system of internal controls over financial reporting. There were no changes in Domtar's internal controls that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, Domtar's internal control over financial reporting.

38 Management's Discussion and Analysis

MD&A

Montreal, Quebec

March 1, 2004

Management's Discussion and Analysis (MD&A) relates to the financial condition and results of Domtar's operations. Throughout this MD&A, unless otherwise specified, Domtar, we, us and our refer to Domtar Inc., its subsidiaries, as well as its joint ventures, and the Corporation refers to Domtar Inc. and its subsidiaries. Domtar's common shares are listed on the Toronto and New York stock exchanges. Except where otherwise indicated, all financial information reflected herein is determined on the basis of Canadian generally accepted accounting principles (Canadian GAAP). This MD&A should be read in conjunction with Domtar's consolidated financial statements and notes thereto.

In accordance with industry practice, in this MD&A, the term ton or the symbol ST refers to a short ton, an imperial unit of measurement equal to 0.9072 metric tons, and the term tonne or the symbol MT refers to a metric ton. In this MD&A, unless otherwise indicated, all dollar amounts are expressed in Canadian dollars, as are the term dollars and the symbols \$ and CAN\$. The term U.S. dollars and the symbol US\$ refer to United States dollars.

Forward-Looking Statements

This MD&A contains statements that are forward-looking in nature. Statements preceded by the words believe, expect, anticipate, aim, target, plan, intend, continue, estimate, may, will, should and similar are forward-looking statements. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by management, are inherently subject to known and unknown risks and uncertainties such as, but not limited to, general economic and business conditions, product selling prices, raw material and operating costs, changes in foreign currency exchange rates, our ability to integrate acquired businesses into our existing operations, and other factors referenced herein and in Domtar's continuous disclosure filings. Therefore, Domtar's actual results may be materially different from those expressed or implied by such forward-looking statements.

2003 Overview

In 2003, we had to cope with difficult market conditions, in particular the rapid 12% decline in the year-over-year average value of the U.S. dollar when compared to the Canadian dollar, which decreased our net sales, given that most of our products are priced directly or indirectly in U.S. dollars. In fact, within the year 2003, the spot rate declined 22% from January 1, 2003 to December 31, 2003. At the same time, we also had to face a decline in demand for some of our products as well as a soft pricing environment, particularly for copy and offset papers. These difficult market conditions also led us to record an impairment loss on the book value of property, plant and equipment at our Lebel-sur-Quevillon pulp mill and to shut down one of the two paper machines at our Vancouver mill. We are, however, pleased with the performance of our four U.S. mills acquired in 2001. They have enhanced our ability to service customers and mitigated the effect of currency fluctuations by improving our geographical balance and increasing our operational flexibility.

While we experienced a difficult year in 2003, we are determined to improve our profitability. In order to do so, we have announced plans to strengthen our profitability improvement programs by further increasing the competitiveness of our Canadian mills as well as our operational flexibility. These plans are expected to entail a thorough review of our Canadian pulp and paper operations to enable them to remain profitable when the Canadian dollar is valued at 75 cents to the U.S. dollar and prices are at cycle-low levels.

Table of Contents

Our Business

Domtar's reporting segments correspond to the following business activities: Papers, Paper Merchants, Wood and Packaging.

Papers

We are the third largest integrated manufacturer and marketer of uncoated freesheet paper in North America. We operate six pulp and paper facilities in Canada and five in the United States, with an annual paper production capacity of approximately 2.7 million tons of paper, complemented by strategically located warehouses and sales offices. Over 50% of our paper production capacity is located in the United States and approximately 90% of our paper sales are made to customers in the United States. Uncoated and coated freesheet papers, our principal products, are used for business, commercial printing and publication, and technical and specialty applications. The chart below illustrates our principal paper products and our annual paper production capacity.

We sell paper primarily through a large network of owned and independent merchants that distribute our paper products from over 350 locations throughout North America. We also sell our products to a variety of customers, including business offices, office equipment manufacturers, retail outlets, commercial printers, publishers and converters. In addition, we sell pulp in excess of our own internal requirements. We also purchase pulp to optimize paper production and freight costs. At December 31, 2003, our net market pulp position (shipments less purchases) was approximately 640,000 tons.

Table of Contents

40 Management's Discussion and Analysis

Our Papers business is our most important segment, representing 58% of our consolidated net sales in 2003, or 64% when including sales of Domtar paper through our own Paper Merchants business.

Paper Merchants

Our Paper Merchants business comprises the purchasing, warehousing, sale and distribution of various products made by us and by other manufacturers. These products include business and printing papers, graphic arts supplies and certain industrial products. Our Canadian paper merchants operate a total of eight branches in eastern Canada (three by Buntin Reid in Ontario, two by JBR/La Maison du Papier in Quebec and three by The Paper House in the Atlantic Provinces), while our U.S. paper merchant (RIS Paper) services a large customer base from 20 locations in the Northeast, Midwest and Mid-Atlantic regions of the United States. Our Paper Merchants business represented 23% of our consolidated net sales in 2003, or 17% when excluding sales of Domtar paper.

Wood

Our Wood business comprises the manufacturing and marketing of lumber and wood-based value-added products, as well as the management of forest resources. We operate 11 sawmills, one planer mill and one remanufacturing facility, with an annual capacity of 1.2 billion board feet of lumber. We also have investments in three businesses that produce wood products. We seek to optimize 22 million acres of forestland for which we are responsible in Canada and the United States through efficient management and the application of certified sustainable forest management practices such that a continuous supply of wood is available for future needs. Our Wood business represented 7% of our consolidated net sales in 2003.

Packaging

Our Packaging business comprises our 50% ownership interest in Norampac Inc. (Norampac), a joint venture between Domtar Inc. and Cascades Inc. The Board of Directors of Norampac is composed of four representatives each from Domtar Inc. and Cascades Inc. The Chairman of the Board is a Domtar Inc. representative, while the President and CEO is a Cascades Inc. representative. Norampac's debt is non-recourse to Domtar Inc. As required by Canadian GAAP, we account for our 50% interest in Norampac using the proportionate consolidation method.

Norampac's network of 24 corrugated packaging plants, strategically located across Canada and the United States, provides full-service packaging solutions and produces a broad range of products. These facilities are fully integrated on a direct or indirect basis with Norampac's eight containerboard mills (located in Ontario, Quebec, British Columbia, New York State and northern France) for a combined annual capacity of more than 1.6 million tons. Our Packaging business represented 12% of our consolidated net sales in 2003.

Business Strategy

Our overall strategic objective is to be a world leader in the paper industry, particularly in the fine paper segment. We have developed our business strategies around three pillars: meeting and anticipating the ever-changing needs of *customers*, providing our *shareholders* with attractive returns, and fostering a dynamic and creative environment for our *employees* in which shared human values and personal commitment prevail.

Our business strategies are to continue to:

meet the needs of our customers in order to enhance customer loyalty;

improve the productivity of our mills and the quality of our products and services;

broaden our distribution capabilities;

grow through acquisitions and alliances within our area of expertise;

maintain strict financial discipline;

support the personal growth and participation of employees; and

maintain our good citizenship.

Through these strategies, we aim to be one of the most attractive investments in the North American basic materials sectors by providing superior returns to our shareholders.

¹ EBITDA (earnings before interest (financing expenses), taxes and amortization) is a non-GAAP measure and is determined by adding back amortization expense, including portions related to unusual items (impairment losses and write-downs), to the operating profit. Operating profit is also a non-GAAP measure that is calculated within the body of our financial statements. We focus on EBITDA and operating profit as these measures enable us to compare our results between periods without regard to debt service or income taxes (for operating profit) and without regard to

amortization (for EBITDA). As such, we feel it would be useful for investors and other users to be aware of these measures so they can better assess our performance. Our EBITDA and operating profit measures have no standardized meaning prescribed by GAAP and are not necessarily comparable to similar measures presented by other companies and therefore should not be considered in isolation.

2 See Unusual items affecting results and non-GAAP measures .

3 See return on average shareholders equity (ROE) discussion and ROE Reconciliation table.

4 Selling price index is derived from transaction prices for the majority of our products, weighted for production capacity, in relation to trend pricing. Trend pricing is based on a consensus of analysts of normalized pricing as at November 30, 2003. See Sensitivity Analysis .

Table of Contents**42 Management's Discussion and Analysis****Unusual items affecting results and non-GAAP measures**

Our operating results include unusual items affecting the comparability of our results. To measure our performance and that of our business segments from period to period without variations caused by special or unusual items, we focus on EBITDA excluding unusual items, operating profit excluding unusual items, net earnings excluding unusual items, net earnings per share excluding unusual items, and other such measures excluding unusual items. Unusual items are defined as items such as charges for: impairment of assets, facility or machine closures, changes in income tax legislation, debt restructuring, and other significant items of an unusual or non-recurring nature.

EBITDA excluding unusual items, operating profit excluding unusual items, net earnings excluding unusual items, net earnings per share excluding unusual items and other such measures excluding unusual items are non-GAAP measures. We believe that it is useful for investors and other users to be aware of the unusual factors that adversely or positively affected our GAAP results, and that these non-GAAP measures provide investors and other users with a measure of performance to compare our results between periods without regard to these unusual items. These measures have no standardized meaning prescribed by GAAP and are not necessarily comparable to similar measures presented by other companies and therefore should not be considered in isolation.

The following table reconciles our net earnings (loss) and net earnings (loss) per share, determined in accordance with GAAP, to our net earnings excluding unusual items and net earnings per share excluding unusual items, and reconciles our EBITDA and operating profit (loss) to our EBITDA excluding unusual items and operating profit excluding unusual items:

Unusual items	2003				2002			2001		
	EBITDA	Operating profit (loss)	Net earnings (loss)	Net earnings (loss) per share	EBITDA	Operating profit	Net earnings	Net earnings	Net earnings

Excluding unusual items	519	135	5	0.02	845	447	183	0.80	101	0.52

1 Except for EBITDA and operating profit (loss) which are non-GAAP measures. See note 1, page 41.

- (i) In the fourth quarter of 2003, we conducted an impairment study of the long-lived assets at our Lebel-sur-Quevillon pulp mill as a result of past operating losses at this facility and our assessment of the impact of a weaker U.S. dollar and market trends on this facility. Following this study, we recorded an impairment loss of \$201 million (\$135 million net of income taxes or \$0.59 per common share) on the net book value of property, plant and equipment of this mill.
- (ii) In the fourth quarter of 2003, income tax expense was increased by \$31 million (\$0.14 per common share) as a result of an increase in statutory enacted future income tax rates and a corresponding revaluation of future income tax assets and liabilities.

Table of ContentsDomtar Inc. 2003 Annual Report **43**

In 2001, our results included an income tax benefit of \$39 million (\$0.20 per common share) pertaining to a reduction in enacted income tax rates and a corresponding revaluation of future income tax assets.

- (iii) In the first quarter of 2002, we recorded a \$45 million (\$30 million net of income taxes or \$0.13 per common share) charge reflecting a \$14 million write-down of property, plant and equipment pertaining to the closure of our St. Catharines paper mill, and a \$31 million provision for other commitments and contingencies related to the closure. Furthermore, the fourth quarter 2002 results included a charge of \$18 million (\$12 million net of income taxes or \$0.05 per common share) reflecting a \$13 million write-down of property, plant and equipment pertaining to the closure of our Daveluyville and Sault Ste. Marie wood products facilities, and a \$5 million provision for other commitments and contingencies related to these closures. However, our third quarter 2003 results included a \$5 million (\$3 million net of income taxes or \$0.01 per common share) reversal of certain costs pertaining to the closure of our St. Catharines paper mill, largely as a result of changes to the initial approach to dismantling the mill.

In the fourth quarter of 2003, we decided to permanently shut down one of the two paper machines at our Vancouver mill. The decision to close the paper machine resulted in a charge of \$29 million (\$19 million net of income taxes or \$0.08 per common share), including \$23 million pertaining to the write-down to the estimated net realizable value of property, plant and equipment, a provision of \$5 million for severance and related costs (for 85 employees) that were contractual obligations at the time of the decision and a \$1 million charge related to the write-off of certain inventory items and spare parts to their net recoverable amounts. The closure will also require further costs in 2004 and 2005, which will be recognized as incurred, related to equipment removal estimated at \$2 million net of salvage proceeds and other employee related costs estimated at \$1 million for an additional \$3 million (\$2 million net of income taxes or \$0.01 per common share). The total of the 2003 to 2005 costs is estimated to be \$32 million (\$21 million net of income taxes or \$0.09 per common share). As at December 31, 2003, the balance of the provision was \$5 million.

- (iv) In the fourth quarter of 2003, we wrote off \$7 million (\$5 million net of income taxes or \$0.02 per common share) of deferred financing costs. These deferred financing costs were initially capitalized in connection to upfront fees and costs related to our bank term loan. With the partial repayment of this bank term loan following a US\$350 million senior debt offering under a shelf registration statement in November 2003, the related deferred financing fees and costs were written off in proportion to the repayment. In the second quarter of 2003, an additional \$10 million (\$7 million net of income taxes or \$0.03 per common share) charge was recorded following the refinancing of substantially all of Norampac's credit facilities and long-term debt.
- (v) In the fourth quarter of 2003, our results included a \$2 million (\$1 million net of income taxes or \$0.01 per common share) charge relating to the write-off of costs incurred with respect to a potential joint venture transaction with Tembec Inc. that was not completed.
-

Table of Contents**44 Management's Discussion and Analysis****Net sales of \$4.8 billion**

Net sales in 2003 totaled \$4,777 million, down \$713 million or 13% from net sales of \$5,490 million in 2002. This decrease was mainly attributable to the effect of a 12% rapid decline in the year-over-year average value of the U.S. dollar when compared to the Canadian dollar (approximate \$490 million impact, net of the effect of our hedging program) on both our domestic and export sales, and to lower shipments for all of our principal products, except corrugated containers, caused primarily by weak demand (approximate \$150 million impact). In addition, the results for 2002 were impacted by the reversal of a \$28 million provision, of which \$8 million was recorded in the first quarter of 2002 and \$20 million was recorded in the second half of 2001 for countervailing and antidumping duties pertaining to the Canada-U.S. softwood lumber dispute. Overall, our U.S. dollar denominated transaction prices for 2003 remained low at 92% of trend¹ prices, unchanged in comparison to 2002. Within Canada, however, the decline of the U.S. dollar negatively impacted our Canadian dollar denominated prices, which are derived from U.S. dollar denominated prices.

Operating loss of \$92 million

Cost of sales decreased by \$374 million or 9% in 2003 compared to 2002. This decrease was mainly due to the impact of a weaker U.S. dollar on our U.S. dollar denominated operating expenses, lower shipments and the impact of our quality and profitability improvement programs. These factors were partially offset by higher energy costs, as well as by the inclusion of fewer investment tax credits related to research and development expenses of current and prior years in 2003 (\$10 million) compared to 2002 (\$16 million).

Sales, general and administrative (SG&A) expenses decreased by \$11 million or 3% (or \$13 million or 4% when excluding unusual items of \$2 million pertaining to the write-off of transaction costs) in 2003 compared to 2002. This mainly reflected the impact of a weaker U.S. dollar on our U.S. dollar denominated costs and the inclusion of a \$6 million mark-to-market gain on certain foreign exchange contracts not considered as hedges for accounting purposes. Lower employee profit-sharing expenses in 2003 compared to 2002 and other cost reduction initiatives also contributed to the decrease in SG&A. These factors were partially offset by an increase in stock-based compensation and pension expenses.

Operating loss was \$92 million in 2003 compared to an operating profit of \$384 million in 2002. When excluding unusual items, operating profit amounted to \$135 million in 2003, down \$312 million or 70% from an operating profit excluding unusual items of \$447 million in 2002. This decrease was largely due to the \$222 million impact of the weaker U.S. dollar on both domestic and export sales net of U.S. dollar costs and net of the effect of our hedging program, lower shipments for all our principal products except corrugated containers, higher energy costs, and higher countervailing and antidumping duties on our softwood lumber exports to the U.S. However, the positive impact of our quality and profitability improvement programs, when excluding the impact of lower shipments, allowed us to more than offset the impact of inflation on salaries and benefits.

¹Based on a consensus of analysts of normalized pricing as at November 30, 2003. See Sensitivity Analysis .

Table of ContentsDomtar Inc. 2003 Annual Report **45****Variance analysis 2003 vs 2002**

(In millions of Canadian dollars)

2002 operating profit excluding unusual items	447
Selling prices, net of purchased fiber costs	29
Impact of weaker U.S. dollar (net of hedging)*	(222)
Quality and profitability improvement programs (Q&P):	
Shipments	(63)
Mix and cost reductions (net of inflation)	12
	<hr/>
Total Q&P	(51)
Net impact of softwood lumber duties	(34)
Energy costs	(34)
	<hr/>
2003 operating profit excluding unusual items	135

*Includes the effect of the weakening U.S. dollar on our Canadian dollar denominated prices, given that these are derived from U.S. dollar denominated prices.

As a result of the above-mentioned factors, EBITDA for 2003 amounted to \$516 million (or \$519 million when excluding unusual items) compared to \$809 million (or \$845 million when excluding unusual items) in 2002.

Quality and profitability improvement programs

In 2002, we launched a quality and profitability improvement program aimed at achieving \$100 million of savings by the end of 2003 through higher efficiencies, an improved customer base and product offerings, and reduced operating costs. Unfortunately, the success of this program in 2003 was hampered by difficult market conditions, including a significant drop in shipments (\$63 million) caused by weak economic conditions, our decision to adjust production to customer needs and end the practice of selling papers that did not meet our quality standards (seconds), and the impact of labor disruptions and the August 2003 power outage. Nonetheless, the cost reduction initiatives undertaken have allowed us to more than offset the impact of inflation on salaries and benefits.

In January 2004, we announced plans to strengthen our quality and profitability improvement programs in order to increase our competitiveness and counteract the impact of difficult market conditions. More specifically, we will:

- undertake a full review and rationalization of our Canadian pulp and paper operations to ensure that they are profitable when the Canadian dollar is valued at 75 cents to the U.S. dollar and prices are at cycle-low levels;

- accelerate our efforts to ensure that multiple facilities can manufacture our most in-demand products;

continue the implementation of new business processes and an integrated enterprise resource planning (ERP) system designed to optimize production capacity and improve our just-intime customer delivery service; and

outsource the logistics of our pulp and paper product delivery.

We expect these measures to increase our operational flexibility and enhance the competitiveness of our Canadian mills. We further anticipate that they will mitigate the impact of rising costs, particularly in the areas of energy and fiber, the latter having also been affected by the Canada-U.S. softwood lumber dispute.

Net loss of \$190 million

Net loss for 2003 amounted to \$190 million (\$0.84 per common share) compared to net earnings of \$141 million (or \$0.62 per common share) in 2002. When excluding unusual items, net earnings

Table of Contents**46 Management's Discussion and Analysis**

totaled \$5 million (\$0.02 per common share) in 2003, down \$178 million from net earnings when excluding unusual items of \$183 million (\$0.80 per common share) in 2002. This year-over-year deterioration in net earnings was attributable to the factors mentioned above, partially offset by a decrease in financing expenses due to lower interest rates, the positive impact of a weaker U.S. dollar on our U.S. interest expense and lower debt levels, and lower income taxes.

ROE¹ of negative 8%

One of the measures we use to assess shareholders' return is ROE. Our objective is to achieve a 15% ROE under normal market conditions. In 2003, our ROE was negative 8% compared to a positive 6% in 2002. When excluding unusual items, ROE in 2003 was at break-even (see ROE Reconciliation table below) and at 7% in 2002. This decrease in ROE is explained by the above-mentioned factors.

Achieving a 15% ROE target remains a challenge, given current market conditions (weakness of the U.S. dollar, cycle-low prices for copy and offset papers, weak demand, and the ongoing Canada-U.S. softwood lumber dispute). We expect the rationalization programs we are initiating and the implementation of strategic tools such as new business processes and an ERP system to partially offset the impact of difficult market conditions and improve our return to shareholders.

Free cash flow²

Despite difficult market conditions, we generated free cash flow (cash flows from operating activities less net additions to property, plant and equipment) of \$123 million in 2003 compared to \$454 million in 2002. Free cash flow generated in 2003 was applied primarily to debt reduction and the payment of dividends.

- 1 Return on average common shareholders' equity (ROE) is a non-GAAP measure and is calculated as net earnings, after dividend payments on preferred shares, to total average common shareholders' equity. The ratio excluding unusual items is calculated by removing unusual items incurred in the specific year from total average common shareholders' equity. We use this measure in assessing the returns we provide to our shareholders and, as such, feel it would be useful for investors and other users to be aware of this measure so they can better assess our performance. ROE has no standardized meaning prescribed by GAAP and is not necessarily comparable to similar measures presented by other companies and therefore should not be considered in isolation.
 - 2 Free cash flow is a non-GAAP measure that we define as the amount by which cash flows from operating activities, as determined in accordance with GAAP, exceeds net additions to property, plant and equipment, as determined in accordance with GAAP. We use free cash flow in evaluating our ability and that of our business segments to service our debt and, as such, feel it would be useful for investors and other users to be aware of this measure so they can better assess our performance. Our free cash flow measure has no standardized meaning prescribed by GAAP and is not necessarily comparable to similar measures presented by other companies and therefore should not be considered in isolation.

3 Selling price index is derived from transaction prices for the majority of our products, weighted for production capacity, in relation to trend pricing. Trend pricing is based on a consensus of analysts of normalized pricing as at November 30, 2003. See Sensitivity Analysis .

Sales and operating profit

Net sales in our Papers business amounted to \$2,791 million in 2003, a decrease of \$443 million or 14% in comparison to 2002. This decrease was primarily due to the unfavorable impact of a weaker U.S. dollar on both domestic and export sales and lower shipments for both paper and pulp. These factors were partially offset by overall higher selling prices, as decreases in the selling prices for copy, offset and uncoated paper products were more than offset by increases in the selling prices for coated and technical and specialty paper products, as well as for hardwood and softwood pulp.

Operating loss in our Papers business totaled \$90 million in 2003 (or an operating profit of \$135 million when excluding unusual items of \$225 million pertaining to an impairment charge and closure costs) compared to an operating profit of \$301 million in 2002 (or \$346 million when excluding unusual items of \$45 million pertaining to closure costs). This \$211 million decrease in operating profit when excluding unusual items

Table of Contents

48 Management's Discussion and Analysis

stems primarily from the negative impact of a weaker U.S. dollar, lower shipments for both paper and pulp, and higher energy and purchased fiber costs, partially offset by higher selling prices and the benefits stemming from our quality and profitability improvement programs.

Pricing environment

In our Papers business, our average transaction prices, denominated in U.S. dollars, increased in 2003 compared to 2002. Within Canada, however, the decline of the U.S. dollar negatively impacted our Canadian dollar denominated prices, which are derived from U.S. dollar denominated prices.

Our average transaction prices for 20 lb copy sheets (business papers) and 50 lb offset rolls (uncoated commercial printing & publication papers), which represented 43% of our paper sales in 2003, decreased by an average of US\$32/ton in 2003 compared to 2002. We have announced a US\$60/ton price increase for both copy papers and offset rolls, effective March 1, 2004.

Our Northern Bleached Softwood Kraft (NBSK) and our Northern Bleached Hardwood Kraft (NBHK) pulp transaction prices increased by US\$53/tonne and US\$44/tonne, respectively, in 2003 compared to 2002. We have announced a US\$20/tonne price increase for softwood pulp, effective February 1, 2004.

Operations

Our paper shipments to capacity ratio stood at 91% for 2003 compared to 95% in 2002. Our Papers business was impacted by weak economic conditions, our decision to curtail production to match customer demand and end the practice of selling seconds, and the impact of production disruptions caused by the mid-August 2003 power outage in the eastern United States and eastern Canada as well as labor issues.

In the third quarter of 2003, new six-year labor agreements were signed with PACE union members at our Port Huron, Port Edwards, and Nekoosa mills.

In November 2003, employees at our Vancouver paper mill went on strike after rejecting our offer for the renewal of their collective agreement. In January 2004, the strike was resolved and a new five-year labor agreement was signed with CEP union members. The mill resumed operations in early-February 2004.

Certain collective agreements for the Cornwall, Ottawa-Hull, Espanola, Lebel-sur-Quevillon and Wisconsin mills are due for renewal in 2004.

In January 2004, we proceeded with our plans to reorganize production activities at our Vancouver paper mill to better meet customer demands and increase the mill's profitability. Accordingly, we shut down one of the mill's two paper machines and restructured the activities of the other to optimize manufacturing of our Domtar Luna coated paper. This process resulted in the permanent curtailment of 45,000 tons of paper manufacturing capacity and the termination of 85 employees. These steps are expected to increase product quality and availability, expand our market share of coated papers, improve the mill's efficiency and better respond to Asian competition.

Paper Merchants

Selected information Years ended December 31	2003	2002
(In millions of Canadian dollars)		
Net sales	1,074	1,193
Operating profit	20	25

Sales and operating profit

Our Paper Merchants business generated net sales of \$1,074 million in 2003, a decrease of \$119 million or 10% in comparison to 2002. This decrease was due to the negative impact of a weaker U.S. dollar and a reduction in overall tons sold compared to the prior year.

Operating profit in 2003 totaled \$20 million (reflecting an operating margin of 1.9%) compared to \$25 million in 2002 (reflecting an operating margin of 2.1%). This decrease in operating profit and related margin was mainly attributable to a decrease in warehouse shipments, which generate higher gross profit than direct mill shipments, and to the negative impact of a weaker U.S. dollar.

Wood

Table of Contents

50 Management's Discussion and Analysis

Sales and operating profit

Our Wood business generated net sales of \$342 million in 2003, representing a \$120 million decrease compared to net sales of \$462 million in 2002. This decrease is mainly attributable to increased countervailing and antidumping duties on our softwood lumber exports to the U.S. (\$34 million impact), which reflect the reversal of a \$28 million provision for duties in the second quarter of 2002 (of which \$8 million was recorded in the first quarter of 2002 and \$20 million was recorded in the second half of 2001), and the negative impact of a weaker U.S. dollar on both domestic and export sales, as well as lower selling prices and lower shipments.

Cash deposits of \$45 million were made on our softwood lumber exports to the United States during the year ended December 31, 2003, compared to \$31 million in the corresponding period of 2002. Since May 22, 2002, cash deposits of \$76 million for countervailing and antidumping duties have been made and expensed by Domtar.

Operating loss in 2003 amounted to \$68 million (or \$66 million when excluding unusual items of \$2 million pertaining to the write-off of transaction costs) compared to an operating loss of \$16 million (or operating profit of \$2 million when excluding unusual items of \$18 million reflecting closure costs pertaining to our Daveluyville and Sault Ste. Marie facilities closures) in 2002. This \$68 million decline in operating profit when excluding unusual items is largely the result of an increase in countervailing and antidumping duties on our softwood lumber exports to the U.S. resulting from the reversal of a provision in 2002, the negative impact of a weaker U.S. dollar, lower lumber selling prices and lower shipments. These factors were partially offset by sustained efforts to improve efficiency and reduce costs during the year.

Pricing environment

Our transaction prices for Great Lakes 2x4 studs and random lengths decreased by US\$7/MFBM and increased by US\$7/MFBM, respectively, in 2003 compared to 2002. The decline of the U.S. dollar negatively impacted our Canadian dollar denominated prices in our domestic marketplace, given that these are derived from U.S. dollar denominated prices.

Operations

During the past two years, there have been a number of mill closures, both temporary and permanent.

In June 2002, a decision was taken to halt the Ste. Marie sawmill operations for an undetermined period of time due to the Canada-U.S. softwood lumber dispute. The Ste. Marie sawmill resumed full operations on May 20, 2003. In July 2002, the Grand-Remous sawmill ceased operations due to a dispute between the Barriere Lake First Nation and the governments of Quebec and Canada. The dispute was settled and the Grand-Remous sawmill resumed full operations on April 28, 2003.

The usual two-week holiday shutdowns at the Lebel-sur-Quevillon, Matagami and Malartic sawmills in 2002 were extended for an additional two weeks to avoid inventory buildups in a declining product price environment. These sawmills resumed operations on January 20, 2003. Our Ontario sawmills also took some market-related downtime in January 2003.

In March 2003, we sold the Sault Ste. Marie hardwood lumber facility, and in April 2003, we sold the Daveluyville remanufacturing facility, following an earlier decision in November 2002 to shut down these facilities because they were not cost competitive.

Table of ContentsDomtar Inc. 2003 Annual Report **51**

On June 23, 2003, we halted production at the White River sawmill for an expected six-month period due to difficult market conditions brought about by overcapacity within the North American market and the Canada-U.S. softwood lumber dispute. Following a continuous improvement workshop held with the employees to reduce costs, the sawmill resumed operations in mid-February 2004.

In June 2003, we announced an agreement-in-principle with Tembec Inc. for the creation of a joint venture that would merge certain of our respective lumber and timber operations. Following an extensive due diligence of the timber and lumber operations of both companies, we concluded in November 2003 that we could not ensure our shareholders that this transaction would create value from day one. Given our stated commitment in this regard, it was preferable not to proceed with this transaction.

In August 2003, we announced the permanent closure of our Sault Ste. Marie planer facility effective October 17, 2003 because it was not cost competitive.

On January 16, 2004, we announced the formation of a 50-50 joint venture with Gogama Forest Products Ltd., which will create a fully integrated sawmill, kiln and planer operation to produce approximately 60 Mmfbm of lumber in Northern Ontario. The transaction is expected to close in the first quarter of 2004.

Despite the challenging environment in our Wood business, we continued to pursue sawmill modernization projects aimed at improving profitability. In 2003, the Elk Lake, Val d'Or, Matagami, Timmins, White River, Chapleau, Malartic and Grand Remous sawmills achieved productivity improvement gains.

Packaging

Selected information Years ended December 31**2003 2002**

(In millions of Canadian dollars, unless otherwise noted)

Net sales	570	601
Operating profit	48	74

Benchmark nominal prices ² :		
Unbleached kraft linerboard, 42 lb East	(US\$/ton) 421	427
Selling price index ³ Packaging segment	92	90

¹ Represents 50% of Norampac's trade shipments.

² Source: Pulp & Paper Week. As such, these prices do not necessarily reflect our transaction prices.

³ Selling price index is derived from transaction prices for the majority of our products, weighted for production capacity, in relation to trend pricing. Trend pricing is based on a consensus of analysts of normalized pricing as at November 30, 2003. See Sensitivity Analysis.

Sales and operating profit

Our 50% share of Norampac's net sales amounted to \$570 million in 2003, a decrease of \$31 million or 5% over 2002. This decrease was mainly due to the negative impact of a weaker U.S. dollar, which resulted in lower average net selling prices for both containerboard and corrugated products, partially offset by an increase in shipments for corrugated containers attributable to recently acquired facilities.

Table of Contents

52 Management's Discussion and Analysis

Our 50% share of Norampac's operating profit amounted to \$48 million in 2003, a \$26 million or 35% decrease from the \$74 million operating profit reported in 2002. This decrease was explained by the same factors impacting net sales and by higher energy costs, partially offset by a decrease in purchased fiber costs.

Pricing environment

Norampac's average Canadian dollar net selling prices for containerboard products decreased by 9% in 2003 compared to 2002. This decrease is primarily due to the impact of the weaker U.S. dollar on Norampac's net selling prices. Norampac announced a US\$50/ton price increase for container-board effective February 23, 2004.

Norampac's average Canadian dollar net selling prices for corrugated boxes in 2003 decreased by 9% compared to 2002.

Operations

During 2003, Norampac's North American containerboard mill capacity utilization rate was approximately 90%, down from 91% in 2002. This reflects Norampac's commitment to adjust production to customers' needs. In addition, Norampac's North American integration level, the percentage of containerboard produced by Norampac that is consumed by its own box plants, increased to 60%, up from 59% in 2002.

Financing Expenses and Income Taxes

Financing expenses

In 2003, financing expenses amounted to \$169 million compared to \$192 million in 2002. When excluding unusual items pertaining to debt refinancing charges (\$17 million impact), financing expenses amounted to \$152 million in 2003, representing a \$40 million decrease compared to 2002. This decrease mainly reflects the impact of lower interest rates, a weaker U.S. dollar on our U.S. dollar interest expense, and lower debt levels.

Income taxes

Our income tax recovery for 2003 was \$67 million reflecting an effective income tax rate of 26%, compared to an income tax expense of \$56 million for 2002, reflecting an effective income tax rate of 28%. In 2003, an increase in statutory enacted future income tax rates and a corresponding revaluation of future income tax assets and liabilities resulted in an additional income tax expense of \$31 million. Excluding this item, income tax recovery in 2003 would have been \$98 million, reflecting an effective income tax rate of 38%. The variation in the effective tax rate in 2003 over 2002, excluding this item, results mainly from the mix and level of earnings between our different tax jurisdictions and differences in tax rates applicable to our foreign subsidiaries.

Balance Sheet

Our total consolidated assets were \$5,855 million as at December 31, 2003 compared to \$6,847 million as at December 31, 2002. Receivables amounted to \$197 million as at December 31, 2003, a decrease of \$107 million when compared to \$304 million as at December 31, 2002. This decrease reflects the effect of a weaker U.S. dollar on our U.S. dollar denominated retained interest in trade receivables sold through our securitization program and on our U.S. dollar denominated other receivables, as well as overall lower net sales. Total inventories as at December 31, 2003

were \$670 million, a decrease of \$66 million when compared to \$736 million as at December 31, 2002. This decrease reflects

Table of ContentsDomtar Inc. 2003 Annual Report **53**

market-related and other downtime taken in our Papers business in order to adjust our production to meet customers needs, temporary closures in our Wood business, the impact of a weaker U.S. dollar, and the impact of inventory reduction programs. Property, plant and equipment as at December 31, 2003 totaled \$4,540 million compared to \$5,387 million as at December 31, 2002. This \$847 million decrease was mainly due to the effect of a weaker U.S. dollar on our U.S. mill assets, an impairment charge recorded to write-down the book value of property, plant and equipment at our Lebel-sur-Quevillon pulp mill, and a lower level of capital expenditures compared to amortization expense during the year. Other assets stood at \$212 million as at December 31, 2003 compared to \$205 million as at December 31, 2002. This \$7 million increase was mainly due to an increase in the funding of our pension assets compared to pension expense, partially offset by an \$11 million reclassification of share purchase loans receivable to common shares.

Trade and other payables were \$653 million as at December 31, 2003 compared to \$749 million as at December 31, 2002, reflecting a decrease of \$96 million. This decrease was mainly due to lower employee profit-sharing accruals and the effect of a weaker U.S. dollar on our U.S. dollar denominated trade and other payables. Long-term debt (including the portion due within one year) as at December 31, 2003 decreased to \$2,059 million compared to \$2,514 million as at December 31, 2002, mainly reflecting a decrease in the Canadian value of our U.S. dollar denominated debt due to the impact of a declining U.S. dollar and debt repayments made throughout the year. Accumulated foreign currency translation adjustments were negative \$145 million as at December 31, 2003, a decrease of \$147 million from the balance as at December 31, 2002. This decrease mainly reflected the net impact of a weaker U.S. dollar on the net assets of our self-sustaining U.S. subsidiaries, or \$391 million, net of the impact of a weaker U.S. dollar on the long-term debt designated as a hedge of the above-mentioned net assets, or \$282 million, and its corresponding income tax effect of \$38 million. Had we not designated part of our long-term debt as a hedge of our net investment in self-sustaining foreign subsidiaries, the \$244 million unrealized foreign exchange gain net of income taxes currently recorded in the Accumulated foreign currency translation adjustments account would have increased our results of operations for the year ended December 31, 2003.

Liquidity and Capital Resources

Selected information Years ended December 31	2003	2002
(In millions of Canadian dollars, unless otherwise noted)		
Cash flows provided from operating activities before changes in working capital and other items	349	642
Changes in working capital and other items	(1)	35
	<hr/>	<hr/>

Net debt-to-total-capitalization ratio ¹ (%)	48	49
Net debt-to-total-capitalization ratio, excluding unusual items ¹ (%)	46	49

1 Net debt-to-total capitalization ratio is a non-GAAP measure and is calculated as long-term debt and bank indebtedness, net of cash and cash equivalents, to total capitalization. The ratio excluding unusual items is calculated by removing unusual items incurred in the specific year from total capitalization. We track this ratio on a regular basis in order to assess our debt position. We therefore feel it would be useful for investors and other users to be aware of this measure so they can better assess our performance. Net debt-to-total capitalization ratio has no standardized meaning prescribed by GAAP and is not necessarily comparable to similar measures presented by other companies and therefore should not be considered in isolation.

Table of Contents

54 Management's Discussion and Analysis

Our principal cash requirements are for working capital, capital expenditures, principal and interest payments on our debt and dividend payments. We expect to fund our liquidity needs primarily with internally generated funds from our operations and, to the extent necessary, through borrowings under our revolving credit facility. We also have the ability to fund liquidity requirements through the issuance of debt and/or equity. Our access to current and alternate sources of financing at competitive cost is dependent upon our credit ratings.

Operating activities

Cash flows provided from operating activities in 2003 amounted to \$348 million compared to \$677 million in 2002. This decrease is primarily due to a significant decrease in EBITDA, notably caused by lower net sales reflecting the negative impact of a weaker U.S. dollar, weak demand and higher duties on softwood lumber exports to the United States, as well as higher energy costs. Our operating cash flow requirements are primarily for salaries and benefits, the purchase of fiber, energy and raw materials, and other expenses such as property taxes.

Investing activities

Cash flows used for investing activities in 2003 totaled \$238 million compared to \$244 million in 2002. Investing activities in 2003 included \$11 million related to our portion of Norampac's business acquisitions, while this amount represented \$27 million in 2002.

Net additions to property, plant and equipment amounted to \$225 million in 2003 (or 59% of amortization) compared to \$223 million in 2002 (or 56% of amortization). The overall increase in net additions to property, plant and equipment in comparison to the previous year relates primarily to the implementation of an ERP system within our Papers business. We intend to limit our annual capital expenditures to well below 75% of amortization, or \$290 million in 2004, including approximately \$120 million for capital expenditures relating to the long-term sustainability of our equipment.

Free cash flow (cash flows from operating activities less net additions to property, plant and equipment) for 2003 amounted to \$123 million compared to \$454 million in 2002. This decrease in free cash flow on a year-over-year basis is attributable to reduced operating cash flow. Free cash flow generated in 2003 was applied primarily to debt reduction and the payment of dividends.

Financing activities

Cash flows used for financing activities totaled \$96 million in 2003 compared to \$431 million in 2002. The decrease in cash flows used for financing activities was due to lower net repayments of long-term debt in 2003 compared to 2002.

As at December 31, 2003, our net debt-to-total capitalization ratio stood at 48% (or 46% when excluding unusual items incurred in 2003) compared to 49% as at December 31, 2002. Net indebtedness, including \$180 million representing our 50% share of the net indebtedness of Norampac, was \$2,030 million as at December 31, 2003. This compares to \$2,496 million as at December 31, 2002, including \$191 million for our 50% share of the net indebtedness of Norampac. The \$466 million decrease in net indebtedness was largely due to the positive impact of a weaker U.S. dollar on our U.S. dollar denominated debt. We were able to achieve a net debt-to-total capitalization ratio of

Table of Contents

Domtar Inc. 2003 Annual Report 55

48% (or 46% when excluding unusual items incurred in 2003) compared to our stated objective of 45% absent the impact of any growth-related initiatives.

In November 2003, we filed a shelf registration statement providing for the issuance of up to US\$500 million of debt securities over the next two years. Pursuant to this, we completed shortly thereafter a public offering in the United States of US\$350 million (\$456 million) aggregate principal amount of 5.375% notes due 2013 at an issue price of US\$347 million (\$452 million), the proceeds of which were used to repay part of our bank term loan. Subsequently, the Corporation entered into interest rate swap contracts for a nominal value of \$452 million (US\$350 million) ending in December 2013. These swaps were designated as hedges of the fair value of the 5.375% notes. As at December 31, 2003, these interest rate swap contracts had a fair value under \$1 million.

As at December 31, 2003, the balance of the US\$1 billion bank term loan initially entered into to finance our 2001 acquisition was US\$76 million (\$99 million) compared to US\$480 million (\$758 million) as at December 31, 2002. This decrease was due to the application of the proceeds from the US\$350 million public debt offering and the free cash flow generated to the partial repayment of this loan. The term loan bears interest based on the U.S. dollar LIBOR rate or the U.S. prime rate, plus a margin that varies with Domtar's credit rating.

As at December 31, 2003, of the US\$500 million revolving credit facility, US\$23 million (\$30 million) was drawn, US\$8 million (\$10 million) of letters of credit were outstanding and US\$5 million (\$7 million) was drawn in the form of overdraft and included in Bank Indebtedness, resulting in US\$464 million (\$600 million) of availability under this facility. No provision was recorded relating to outstanding letters of credit. As at December 31, 2002, US\$5 million (\$8 million) was drawn in the form of overdraft and US\$6 million (\$9 million) of letters of credit were outstanding. Borrowings under this revolving credit facility bear interest at a rate based on the Canadian dollar bankers' acceptance or the U.S. dollar LIBOR rate or the prime rate, plus a margin that varies with Domtar's credit rating. This bank facility also requires commitment fees in accordance with standard banking practices.

Our borrowing agreements contain restrictive covenants. In particular, our unsecured bank credit facility contains covenants that require compliance with certain financial ratios on a quarterly basis. In addition, the indentures related to the 10% and 10.85% debentures limit the amount of dividends that we may pay, the amount of shares that we may repurchase for cancellation and the amount of new debt we may incur.

In 2003, common shares amounting to \$15 million, versus \$16 million for 2002, were issued pursuant to our stock option and share purchase plans. We did not purchase for cancellation any of our common shares in either of the years ended December 31, 2003 or December 31, 2002.

On May 1, 2003, we announced an increase of our annual common share dividend to 24 cents per share (or 6 cents per quarter) from 14 cents per share (or 3.5 cents per quarter). This increase is the first step towards our goal of paying a dividend of approximately 20% of normalized net earnings over a business cycle, provided we are able to maintain a strong balance sheet.

As at February 27, 2004, we had 229,233,581 common shares, 69,576 Series A Preferred Shares and 1,580,000 Series B Preferred Shares, which were issued and outstanding.

As at February 27, 2004, we had 6,017,254 common shares purchase options issued and outstanding under the Executive stock option and Share purchase plan.

Table of Contents

56 Management's Discussion and Analysis

Off Balance Sheet Arrangements

In the normal course of business, we finance certain of our activities off balance sheet through leases and securitizations.

Leases

On an ongoing basis, we enter into operating leases for property, plant and equipment. Minimum future rental payments under these operating leases, determined as at December 31, 2003, amounted to \$142 million, of which \$28 million related to our proportionate 50% share of Norampac.

Securitizations

We sell a portion of our Canadian and American receivables through securitization programs. We use securitization of our receivables as a source of financing by reducing our working capital requirements. This securitization consists of the sale of receivables on a limited recourse basis, or the sale of senior beneficial interest in them, to special purpose trusts managed by financial institutions for multiple sellers of receivables. The agreements normally allow the daily sale of new receivables to replace those that have been collected. They also limit the cash that can be received from the sale of the senior beneficial interest. The subordinate interest retained by us is included in Receivables and will be collected only after the senior beneficial interest has been settled.

As at December 31, 2003, the value of securitized receivables amounted to \$227 million compared to \$264 million as at December 31, 2002. We expect to continue to sell receivables on an ongoing basis, given the attractive discount rates. Should we decide to discontinue these programs, our working capital and our bank debt requirements would increase. Such sales of receivables are contingent upon the Corporation retaining specified credit ratings. The loss of such ratings would, absent appropriate waivers, increase our working capital and our bank debt requirements.

Guarantees

Pension plans

Domtar has indemnified and held harmless the trustees of Domtar pension funds, and the respective officers, directors, employees and agents of such trustees, from any and all costs and expenses arising out of the performance of their obligations under the relevant trust agreements, including in respect of their reliance on authorized instructions of Domtar or for failing to act in the absence of authorized instructions. These indemnifications survive the termination of such agreements. As at December 31, 2003, we had not recorded a liability associated with these indemnifications, as we do not expect to make any payments pertaining to these indemnifications.

E.B. Eddy acquisition

On July 31, 1998, we acquired all of the issued and outstanding shares of E.B. Eddy Limited and E.B. Eddy Paper, Inc. (E.B. Eddy), an integrated producer of specialty paper and wood products. The purchase agreement includes a purchase price adjustment whereby, in the event of the acquisition by a third party of more than 50% of the shares of the Corporation in specified circumstances, the Corporation may have to pay up to a maximum of \$120 million, an amount which is gradually declining over a 25-year period. As at December 31, 2003, the maximum amount of the purchase price adjustment was \$110 million. No provision was recorded related to this potential purchase price adjustment, as we do not expect to make any payments pertaining to this purchase price adjustment.

Sales of businesses and real estate

In the normal course of business, the Corporation offers indemnifications relating to the sale of its businesses and real estate. In general, these indemnifications may relate to claims from past business operations, to the failure to abide by covenants and to the breach of representations and warranties included in the sales agreements. Typically, such representations and warranties relate to litigations as well as taxation, environmental, product and employee matters. As the nature and scope of such indemnifications is contingent upon future events, none of which can be foreseen as at December 31, 2003, no provisions have been recorded in the

Table of Contents

Domtar Inc. 2003 Annual Report 57

financial statements. These indemnifications have not yielded significant expenses in the past.

Debt agreements

Certain debt agreements require the Corporation to indemnify the parties in the event of changes in elements such as withholding tax regulations. As the nature and scope of such indemnifications is contingent upon future events, none of which can be foreseen as at December 31, 2003, and the structure of such transactions make these events unlikely, no provisions have been recorded in the financial statements.

Leases

The Corporation has guaranteed to various lessors \$8 million of residual value of its assets under operating leases. If the fair value of the assets at the end of the lease terms is lower than the residual value guaranteed, the Corporation would be held liable for the shortfall. The Corporation's management does not believe that these are likely to be called upon and, as such, no provisions have been recorded in the financial statements with respect to these guarantees.

Contractual Obligations and Commercial Commitments

In the normal course of business, we enter into certain contractual obligations and commercial commitments. The following tables provide our obligations and commitments as at December 31, 2003:

Contractual obligations

Contract Type	2004	2005	2006	2007	2008	Thereafter	Total
(In millions of Canadian dollars)							
Debentures and notes			194			1,707	1,901
Other	5	8	116	1	12	16	158
Long-term debt	5	8	310	1	12	1,723	2,059
Operating leases	38	29	22	15	11	27	142
Total obligations	43	37	332	16	23	1,750	2,201

Commercial commitments

Commitment Type	2004	2005	2006	2007	2008	Thereafter	Total
------------------------	-------------	-------------	-------------	-------------	-------------	-------------------	--------------

(In millions of Canadian dollars)

Letters of credit	9	1					10
Other commercial commitments*	<u>87</u>	<u>52</u>	<u>47</u>	<u>31</u>	<u>11</u>	<u>44</u>	<u>272</u>
Total commitments	96	53	47	31	11	44	282

*Includes commitments to purchase roundwood, wood chips, gas, electricity, steam and certain chemicals. For 2004 and the foreseeable future, we expect cash flows from operations and from our various sources of financing to be sufficient to meet our contractual obligations and commercial commitments.

	US 0.627	0.644	0.640	0.637	0.637	0.662	0.715	0.725	0.760	0.714

Net sales and operating profit have experienced a steady decline since the beginning of 2003. This is mainly in line with the steady weakening of the U.S. dollar and lower shipments, as reflected by our shipments to capacity ratio for papers. In addition, lower selling prices in Canada have impacted our results, as they are derived from U.S. dollar denominated prices.

In light of such a weak U.S. dollar, we plan to undertake a complete review of our Canadian pulp and paper operations to ensure that they are profitable when the Canadian dollar is valued at 75 cents to the U.S. dollar and prices are at cycle-low levels. In addition, our quality and profitability improvement programs initiated in 2002 contributed to the positive results in that year, but were hampered by difficult market conditions in 2003. These programs, when excluding the impact of lower volumes, did enable us to more than offset the impact of inflation on salaries and benefits. We plan to strengthen these programs so as to reduce our costs further.

Typically, second and third quarters are seasonally stronger in terms of results, as demand normally picks up during the spring and summer months.

The decline in our fourth quarter 2003 results in comparison to the fourth quarter of 2002 was attributable to a significant weakening in the value of the U.S. dollar versus the Canadian dollar and overall lower selling prices for our products, as well as a drop in shipments. This decline in shipments was due to weak demand and was aggravated by temporary circumstances such as market-related downtime and labor disruptions.

Table of ContentsDomtar Inc. 2003 Annual Report **59**

2002 compared to 2001

Net sales in 2002 totaled \$5,490 million, up \$1,113 million or 25% from net sales of \$4,377 million in 2001. This increase was mainly due to the inclusion of net sales of the four U.S. integrated pulp and paper mills (the Acquired Mills) acquired on August 7, 2001 for the twelve months in 2002 compared to five months in 2001. The inclusion of our share of Norampac's 2002 acquisitions also contributed to the increase. Excluding the impact of these acquisitions, net sales would have decreased by \$22 million in 2002 over 2001, mainly due to lower product prices, partially offset by higher shipments in all of our businesses except for container-board and the positive impact of a stronger U.S. dollar. Our transaction prices for 2002 were at 92% of trend prices compared to 97% in 2001.

Cost of sales increased by \$807 million in 2002 or by 23% compared to 2001. This was mainly due to the inclusion of cost of sales of the Acquired Mills for twelve months in 2002 compared to five months in 2001, our share of Norampac's cost of sales related to recent acquisitions, and higher shipments in all of our businesses other than container-board. This increase was partially offset by lower purchased fiber and energy costs and a \$16 million investment tax credit for research and development expenditures in prior years.

SG&A expenses increased by \$68 million in 2002 or 27% compared to 2001. This increase was mainly due to the inclusion of SG&A expenses of the Acquired Mills and our share of Norampac's acquisitions, partially offset by the impact of our cost reduction initiatives. 2001 SG&A expenses had been reduced by \$14 million following the cashing in of certain insurance policies.

As a result of the above-mentioned factors, EBITDA for 2002 amounted to \$809 million (or \$845 million when excluding unusual items) compared to \$607 million in 2001 and operating profit amounted to \$384 million (or \$447 million when excluding unusual items) for 2002 compared to \$313 million in 2001.

Net earnings in 2002 amounted to \$141 million (\$0.62 per common share) compared to net earnings of \$140 million (\$0.72 per common share) in 2001. Excluding unusual items, net earnings in 2002 amounted to \$183 million (or \$0.80 per common share). The 2001 net earnings included an income tax benefit of \$39 million (\$0.20 per common share) related to a reduction in enacted income tax rates and a revaluation of future income tax assets (unusual item).

In 2002, we delivered a 6% ROE compared to 7% in 2001. Excluding unusual items, ROE in 2002 was 7% compared to 6% in 2001, despite a difficult economic environment as evidenced by the 5% decrease in our selling price index.

We generated free cash flow of \$454 million in 2002 compared to \$447 million in 2001. When excluding net additional cash proceeds received from the sales of receivables, free cash flow amounted to \$428 million in 2002 compared to \$269 million in 2001. Free cash flow generated in 2002 was applied primarily to debt reduction.

As at December 31, 2002, our net debt-to-total-capitalization ratio was 49%, a decrease of 6% over the 55% as at December 31, 2001. Net indebtedness, including \$191 million representing our 50% share of the net indebtedness of Norampac, was \$2,496 million at December 31, 2002. This compares to \$2,930 million at the end of 2001, including \$192 million for our 50% share of the net indebtedness of Norampac. The value of securitized receivables amounted to \$264 million as at December 31, 2002 compared to \$238 million as at December 31, 2001.

60 Management's Discussion and Analysis

Accounting Changes

Share purchase financing

On January 1, 2003, we adopted prospectively the new Canadian Institute of Chartered Accountants (CICA) Emerging Issues Committee Abstract 132 Share Purchase Financing concerning share purchase loans (the loans) receivable. Accordingly, loans as at January 1, 2003 amounting to \$11 million were reclassified from Other assets to Common shares and interest revenue was treated as a reduction of dividends. The common shares purchased with these loans are held in trust as security for the loans. The loans are interest bearing at the dividend rate and have defined repayment terms not exceeding 10 years. As at December 31, 2003, there were 922,994 common shares (December 31, 2002 1,000,333 common shares) held in trust with respect to employee loans of \$12 million (December 31, 2002 \$11 million). The market value as at December 31, 2003 of the shares held in trust was \$15 million or \$16.25 per share (December 31, 2002 \$16 million or \$15.70 per share). These common shares were not considered as being outstanding for the calculation of the basic earnings per share but were considered in the calculation of the diluted earnings per share. The adoption of this abstract had no significant impact on the diluted earnings per share for the year ended December 31, 2003.

Impairment of long-lived assets

On January 1, 2003, we early adopted the new CICA Handbook Section 3063 Impairment of Long-lived Assets recommendations. These recommendations provide accounting guidance for the recognition, measurement and disclosure of impairment of long-lived assets, including property, plant and equipment and intangible assets with finite useful lives. They require the recognition of an impairment loss for a long-lived asset when events or changes in circumstances cause its carrying value to exceed the total undiscounted future cash flows expected from its use and eventual disposition. The impairment loss is calculated by deducting the fair value of the asset from its carrying value. This change in accounting policy has been applied prospectively.

Based on past operating losses of certain Canadian operations and deteriorating market conditions, we conducted an impairment study of several of our Canadian-based long-lived assets in the fourth quarter of 2003. As a result, we recorded an impairment loss of \$201 million (\$135 million net of income taxes or \$0.59 per common share) pertaining to our Lebel-sur-Quevillon pulp mill.

Exit and disposal activities

Disposal of long-lived assets and discontinued operations

We prospectively adopted the revised CICA Handbook Section 3475 Disposal of Long-lived Assets and Discontinued Operations recommendations for disposal activities initiated on or after May 1, 2003, as required by the transitional provisions. These recommendations establish standards for the recognition, measurement, presentation and disclosure of disposals of long-lived assets as well as for the presentation and disclosure of discontinued operations. The adoption of these new recommendations had no significant impact on our December 31, 2003 consolidated financial statements.

Severance, termination benefits and costs associated with exit and disposal activities

We prospectively adopted the new CICA Emerging Issues Committee Abstract 134 Accounting for Severance and Termination Benefits and Abstract 135 Accounting for Costs Associated with Exit and Disposal Activities (Including Costs Incurred in a Restructuring) relating to exit or disposal activities initiated after March 31, 2003, as required by

their transitional provisions. These abstracts provide guidance on the timing of recognition and measurement of liabilities as well as disclosures for the various types of severance and termination benefits related to the termination of employees' services prior to normal retirement and costs associated with an exit or disposal activity. Under this new guidance, liabilities for these costs are to be recognized in the period when they are incurred and measured at their fair value. We applied the guidelines in these two abstracts for the closure costs related to the permanent shutdown of a paper machine at our Vancouver mill in December 2003.

Table of ContentsDomtar Inc. 2003 Annual Report **61**

Impact of Accounting Pronouncements not yet Implemented

GAAP and financial statement presentation

In July 2003, the CICA issued new Handbook Sections 1100 Generally Accepted Accounting Principles and 1400 General Standards of Financial Statement Presentation. Section 1100 describes what constitutes Canadian GAAP and its sources. It also provides guidance on sources to consult when selecting accounting policies and determining appropriate disclosures in the case where a matter is not dealt with explicitly in the primary sources of GAAP, thereby recodifying the Canadian GAAP hierarchy. Section 1400 provides general guidance on financial statement presentation and further clarifies what constitutes fair presentation in accordance with GAAP. These recommendations are effective for fiscal years beginning on or after October 1, 2003.

The Corporation records delivery costs, as well as countervailing and antidumping duties on exports of softwood lumber to the United States, as a reduction of gross sales to determine net sales in accordance with industry practice. For the year ended December 31, 2003, delivery costs amounted to \$345 million and softwood lumber duties amounted to \$45 million. Commencing in 2004, both delivery costs and softwood lumber duties will be recorded under cost of sales, as industry practices are no longer acceptable under the new GAAP hierarchy defined in Section 1100. The Corporation does not expect these recommendations to have any other significant impact on its consolidated financial statements upon adoption.

Hedging relationships

In November 2002 and June 2003, the CICA amended the accounting guideline relating to hedging relationships. This accounting guideline must be applied to hedging relationships in effect in fiscal years beginning on or after July 1, 2003. This accounting guideline addresses the identification, designation, documentation and effectiveness of the hedging relationships for the purpose of applying hedge accounting. In addition, it deals with the discontinuance of hedge accounting and establishes conditions for applying hedge accounting. Under this guideline, documentation of the information related to hedging relationships is required and the effectiveness of the hedges must be demonstrated and documented. Effective January 1, 2004, we have in place all necessary hedge documentation to be able to apply hedge accounting for interest rate swaps, forward foreign exchange contracts, foreign currency options, pulp swaps and energy swaps.

Table of Contents

62 Management's Discussion and Analysis

Asset retirement obligations

In March 2003, the CICA issued Handbook Section 3110 Asset Retirement Obligations which requires entities to record a liability at fair value when there is a legal obligation associated to the retirement of an asset in the period in which it is incurred. The associated costs are capitalized as part of the carrying value of the related asset and depreciated over its remaining useful life. The liability is accreted using a credit adjusted risk free interest rate. Section 3110 is analogous to U.S. GAAP SFAS 143 Accounting for Asset Retirement Obligations, which was adopted for U.S. GAAP purposes on January 1, 2003. Asset retirement obligations in connection with the adoption of SFAS 143 were primarily linked to landfill capping obligations, asbestos removal obligations on equipment and demolition of certain abandoned buildings. Taking into consideration the existing assets and liabilities for these items, the impact of the implementation of SFAS 143 was not considered significant at January 1, 2003. No asset retirement obligations were recorded for assets that have indeterminate settlement dates, such as asbestos removal relating to buildings. For such assets, a liability will be initially recognized in the period in which sufficient information exists to estimate a range of possible settlement dates. Section 3110 is applicable to fiscal years beginning on or after January 1, 2004 and must be applied retroactively with restatement of prior periods. As at December 31, 2003, the adoption of SFAS 143 has increased our loss by \$3 million, decreased our assets by \$8 million and decreased our liabilities by \$5 million.

Consolidation of variable interest entities

In June 2003, the CICA issued Accounting Guideline 15 (AcG-15) Consolidation of Variable Interest Entities. This guideline requires that an enterprise holding other than a voting interest in a variable interest entity (VIE) could, subject to certain conditions, be required to consolidate the VIE if it is considered its primary beneficiary whereby it would absorb the majority of the VIE's expected losses and/or receive the majority of its expected residual returns. AcG-15 applies to annual and interim periods beginning on or after November 1, 2004. We do not expect this guideline to have an impact on our financial statements.

Table of Contents**Critical Accounting Policies**

The preparation of financial statements in conformity with Canadian GAAP requires management to make estimates and assumptions that affect our results of operations and financial position. On an ongoing basis, management reviews its estimates, including those related to environmental matters, useful lives, impairment of long-lived assets and goodwill, pension and other employee future benefit plans, and income taxes based upon currently available information. Actual results could differ from those estimates.

The following critical accounting policies reflect matters that contain a significant level of management estimates about future events, reflect the most complex and subjective judgments, and are subject to a fair degree of measurement uncertainty.

Environmental matters

Environmental expenditures for effluent treatment, air emission, landfill operation and closure, asbestos containment and removal, bark pile management, and silviculture activities (together referred to as environmental matters) are expensed or capitalized depending upon their future economic benefit. In the normal course of business, we incur certain operating costs for environmental matters which are expensed as incurred. Expenditures for property, plant and equipment that prevent future environmental contamination are capitalized and amortized on a straight-line basis over a period of 10 to 30 years. Provisions for environmental matters are not discounted and are recorded when remediation efforts are likely and can be reasonably determined.

As at December 31, 2003, we had a provision of \$67 million for environmental matters. While we believe that we have determined the costs for environmental matters likely to be incurred, based on known information, our ongoing efforts to identify potential environmental concerns that may be associated with our former and present operations may lead to future environmental investigations. These efforts may result in the determination of additional environmental costs and liabilities, which cannot be reasonably estimated at this time.

In addition, the pulp and paper industry in the United States is subject to Cluster Rules that further regulate effluent and air emissions. We comply with all present regulations and we anticipate spending approximately \$44 million over the next three years to meet further Cluster Rules requirements.

As at December 31, 2003, anticipated payments in each of the next five years are as follows:

	2004	2005	2006	2007	2008	Thereafter	Total
(In millions of Canadian dollars)							
Environmental matters	20	13	3	3	4	24	67
Cluster Rules obligation	13	29	2				44
	<u>33</u>	<u>42</u>	<u>5</u>	<u>3</u>	<u>4</u>	<u>24</u>	<u>111</u>

In 2003, our operating expenses for environmental matters totaled \$70 million and we capitalized an additional \$7 million for environmental projects mainly related to the improvement of air emissions, effluent treatment as well as remedial actions taken to address environmental compliance. In 2004, we expect to capitalize approximately \$24 million for environmental projects, including Cluster Rules obligations.

Useful lives

Our property, plant and equipment are stated at cost less accumulated amortization, including asset impairment write-down. Interest costs are capitalized for capital projects in excess of \$10 million and that have a duration in excess of 1 year. For timber limits and timberlands, amortization is calculated using the unit of production method. For all other assets, amortization is calculated using the straight-line method over the estimated useful lives of the assets.

Table of Contents**64 Management's Discussion and Analysis**

On a regular basis, we review the estimated useful lives of our property, plant and equipment. Assessing the reasonableness of the estimated useful lives of property, plant and equipment requires judgment and is based on currently available information. Changes in circumstances, such as technological advances, changes to our business strategy, changes to our capital strategy or changes in regulation can result in the actual useful lives differing from our estimates. Revisions to the estimated useful lives of property, plant and equipment constitute a change in accounting estimate and are dealt with prospectively by amending amortization rates. A change in the remaining estimated useful life of a group of assets, or their estimated net salvage value, will affect the amortization rate used to amortize the group of assets and thus affect amortization expense as reported in our results of operations. A change of one year in the composite estimated useful life of our fixed asset base would impact annual depreciation expense by approximately \$20 million.

In 2003, we recorded a total amortization expense of \$384 million (or \$608 million when including unusual items pertaining to write-downs in the value of property, plant and equipment as a result of an impairment charge and closure costs) compared to \$398 million in 2002 (or \$425 million when including unusual items pertaining to closure costs). As at December 31, 2003, we had property, plant and equipment of \$6,887 million, net of accumulated amortization of \$2,347 million (\$7,719 million in 2002, net of accumulated amortization of \$2,332 million).

With the write-downs in the value of property, plant and equipment recorded in the fourth quarter of 2003, our future amortization expense is expected to be reduced by approximately \$20 million on an annual basis.

Impairment of long-lived assets

We review the carrying amount of long-lived assets when events or changes in circumstances indicate that the carrying value of the assets may not be recoverable through future operations. This is accomplished by determining whether projected undiscounted future cash flows from operations exceed the net carrying amount of the assets as of the assessment date. Impaired assets are recorded at fair value, determined principally by using discounted future cash flows expected from their use and eventual disposition. Estimates of future cash flows and fair value require judgment and may change.

During the fourth quarter of 2003, as a result of operating losses at our Lebel-sur-Quevillon pulp mill and our Wood Products Group, we conducted impairment tests of the long-lived assets of these business units. In addition, due to the decision to close one paper machine at our Vancouver paper mill and the potential impact that a weaker U.S. dollar may have on the results of operations of our Canadian pulp and paper mills, we also conducted impairment tests of the long-lived assets of our Vancouver paper mill and other Canadian pulp and paper mills. As a result of these tests, we recorded an impairment loss, in December 2003, of \$201 million (\$135 million net of income taxes or \$0.59 per common share) related to the impairment of our Lebel-sur-Quevillon pulp mill.

The impairment tests were conducted in accordance with the recommendations in Section 3063 of the CICA Handbook *Impairment of Long-Lived Assets*. These recommendations indicate that the carrying amount of a long-lived asset is not considered recoverable if the carrying amount exceeds the sum of the undiscounted future cash flows expected to result from its use and eventual disposition (also referred to as *Step I*). In the event that the carrying amount exceeds the sum of the undiscounted future cash flows, the recommendations require the asset to be written down to its fair value and a corresponding impairment loss be recorded in the results of operations for the period (also referred to as *Step II*). To determine the fair value of our Lebel-sur-Quevillon pulp mill, we used the present value of the estimated future cash flows of the mill.

The results of the Step I test for our Wood Products Group, our Vancouver paper mill and our other Canadian pulp and paper mills concluded that it was not required to record an impairment loss for these business units. However, the sum of the undiscounted future cash flows for the Wood Products Group and the Vancouver paper mill exceeded by only 21% and 14%, respectively, the carrying amount of \$376 million and \$119 million, respectively, of the long-lived assets of these business units as at December 31, 2003. Given the sensitivity of certain key assumptions used in the Step I test, there is a measurement uncertainty for these two business units because it is reasonably possible that changes in future conditions in the

Table of ContentsDomtar Inc. 2003 Annual Report **65**

near term, as explained below, could require a material change in the recognized amount of the long-lived assets when we reperform the Step I test.

In the Step I test, estimates of future cash flows used to test the recoverability of a long-lived asset incorporated our internal 2004 budget adjusted for the following key assumptions: trend prices for the products sold by these business units, the long-term forecasted exchange rate for the U.S. dollar, the estimated remaining useful life of the long-lived assets and, for the Wood Products Group only, the effect of the ongoing softwood lumber dispute with the United States.

The trend prices were based on a consensus of analysts of normalized pricing over a business cycle for the pulp, paper and wood products at the mills subjected to the impairment test in Step I.

The forecasted Canadian-U.S. foreign exchange rate assumptions were based on management's best estimate as well as independent market information. The average rate over the last five years has been CAN\$1.00 = US\$0.68. Short-term economic forecasts estimate a rate of CAN\$1.00 = US\$0.71 to CAN\$1.00 = US\$0.83. We have used CAN\$1.00 = US\$0.75 in 2004 and CAN\$1.00 = US\$0.72 for the years thereafter.

The useful lives of the machinery and equipment was estimated to be between 10 and 12.5 years, excluding future capital expenditures that would increase their service potential.

Duties on softwood lumber were established using various probabilities that average to 15.5% in 2004 and 5% in each of the years thereafter.

In the Step II test, performed on our Lebel-sur-Quevillon pulp mill only, the assumptions used to determine the discounted future cash flows (fair value) of the business unit were the same as those used in the Step I tests, except that future cash flows used were on an after-tax basis and were discounted at our risk-adjusted weighted average cost of capital.

Although each of the key assumptions may have a significant impact on the impairment tests, management has determined that the greatest uncertainty in the near future, when we reperform the Step I tests, resides in the assumptions of foreign exchange rates and the resolution of the softwood lumber dispute with the United States. Had we failed the Step I test for our Wood Products Group and our Vancouver paper mill, based on management's best estimates, an additional impairment loss of between \$125 million and \$150 million, equal to the difference between the fair value of the long-lived assets of our Wood Products Group and our Vancouver paper mill and their respective carrying value, would have been recognized. We do not believe that this additional impairment loss would have had a material impact on our bank covenants.

Goodwill

Goodwill is not amortized and is subject to an annual impairment test, or more frequently if events or changes in circumstances indicate that it might be impaired. Testing for impairment is accomplished mainly by determining whether the fair value of a segment, based upon discounted future cash flows, exceeds the net carrying amount of that segment as of the assessment date. If the fair value is greater than the carrying amount, no impairment is necessary. In the event that the carrying amount exceeds the sum of the discounted future cash flows, a second test must be performed whereby the fair value of the segment's goodwill must be estimated to determine if it is less than its carrying amount. Fair value of goodwill is estimated in the same way as goodwill was determined at the date of acquisition in a business combination, that is, the excess of the fair value of the segment over the fair value of the

identifiable net assets of the segment. Estimates of future cash flows and fair value require judgment and may change.

Pension and other employee future benefit plans

Domtar contributes to several defined contribution, multi-employer and 401(k) plans. The pension expense under these plans is equal to Domtar's contribution and represented \$19 million in 2003 (\$20 million in 2002). Domtar also has several defined benefit pension plans covering substantially all employees, including one closed plan for certain non-unionized employees in Canada. Non-unionized employees in Canada joining Domtar after January 1, 2000 participate in defined contribution plans. The pension expense and the obligation related to the defined benefit plans are actuarially determined using management's most probable assumptions.

We account for pension and other employee future benefits in accordance with CICA recommendations. As such, assumptions are made regarding the valuation of benefit obligations and performance of plan assets. Deferred recognition of differences

Table of Contents

66 Management's Discussion and Analysis

between actual results and those assumed is a guiding principle of these recommendations. This approach allows for a gradual recognition of changes in benefit obligations and plan performance over the expected average remaining service life of the active employee group covered by the plans.

Pension and other employee future benefit assumptions include the discount rate, the expected long-term rate of return on plan assets, the rate of compensation increase, health care cost trend rates, mortality rates, employee early retirements and terminations or disabilities. Changes in these assumptions result in actuarial gains or losses which, in accordance with CICA recommendations, we have elected to amortize over the expected average remaining service life of the active employee group covered by the plans only to the extent that the unrecognized net actuarial gains and losses are in excess of 10% of the greater of the accrued benefit obligation and the market-related value of plan assets as at the beginning of the year. The future effect on our results of operations is dependent on economic conditions, employee demographics, mortality rates and investment performance.

We set our expected rate of return on plan assets annually to reflect the current view of long-term investment returns, including consideration of asset mix, equity risk premium, plan expenses and active investment management premium. A rate of return on plan assets of 7.7% was considered appropriate by our management and is supported by reports issued by third party advisors. Pension and other employee future benefit costs for 2004 will be based on this 7.7% expected rate of return on plan assets in order to reflect our current view of long-term investment returns.

We set our discount rate assumption annually to reflect the rates available on high-quality, fixed income debt instruments, with a duration that is expected to match the timing and amount of expected benefit payments. High-quality debt instruments are corporate bonds with a rating of AA or better. The discount rate, as at December 31, 2003, was estimated at 6.1%.

The rate of compensation increase is another significant assumption in the actuarial model for pension (set at 3.8%) and other employee future benefits (set at 3.5%) and is determined based upon our long-term plans for such increases.

For measurement purposes, a 7.8% weighted average annual rate of increase in the per capita cost of covered health care benefits was assumed for 2004, based on external data and our own historical trends for health care costs. The rate was assumed to decrease gradually to 4.1% for 2012 and remain at that level thereafter.

The following table provides a sensitivity analysis of the key weighted average economic assumptions used in measuring the accrued pension benefit obligation, the accrued other employee future benefit obligation and related net periodic benefit cost for 2003. The sensitivity analysis should be used with caution as it is hypothetical and changes in each key assumption may not be linear. The sensitivities in each key variable have been calculated independently of each other.

Impact of:				
1% increase	N/A	N/A	10	1
1% decrease	N/A	N/A	(8)	(1)

The assets of the pension plans are held by a number of independent trustees and are accounted for separately in the Domtar pension funds. Based on the fair value of the assets held at December 31, 2003 the plan assets are comprised of 3% in cash and short-term investments, 47% in bonds and 50% in Canadian, U.S. and foreign equities. The long-term asset allocation percentages are not expected to differ materially from the current composition.

The latest actuarial valuations were conducted as at December 31, 2002 for plans representing 25% of total plan asset fair value and as at December 31, 2001 for plans representing 63% of total plan asset fair value. These valuations indicated a funding deficiency. Our funding policy is to contribute annually the amount required to provide for benefits earned in the year and to fund past service obligations over periods not exceeding those permitted by the applicable regulatory authorities. Past service obligations primarily arise from improvements to plan benefits. We expect to contribute for a total amount of \$78 million in 2004, compared to \$73 million in 2003.

Income taxes

We use the asset and liability method of accounting for income taxes. Under this method, future tax assets and liabilities are determined according to differences between the carrying amounts and tax bases of the assets and liabilities. The change in the net future tax asset or liability is included in earnings and Accumulated foreign currency translation adjustments account in Shareholders' equity. Future tax assets and liabilities are measured using enacted or substantively enacted tax rates and laws expected to apply in the years in which assets and liabilities are expected to be recovered or settled. For these years, a projection of taxable income and an assumption of the ultimate recovery or settlement period for temporary differences are required. The projection of future taxable income is based on management's best estimate and may vary from actual taxable income.

On an annual basis, we assess the need to establish a valuation allowance for future tax assets and, if it is deemed more likely than not that our future tax assets will not be realized based on these taxable income projections, a valuation allowance is recorded. As at December 31, 2003, we expect that our future tax assets will not be fully recovered from future taxable income and therefore, we have set up a valuation allowance of \$1 million.

Table of Contents

68 Management's Discussion and Analysis

Our future tax assets are mainly composed of temporary differences related to accounting provisions for acquisitions, restructuring, environmental matters, as well as loss carryforwards. The majority of these accruals will be utilized or paid out over the next five years. Our future tax liabilities are mainly composed of temporary differences pertaining to plant, equipment and others. Estimating the ultimate settlement period, given the amortization rates in effect are based on information as it develops, requires judgment and our best estimates. The reversal of timing differences is expected at future substantially enacted tax rates which could change due to changes in income tax laws or the introduction of tax changes through the presentation of annual budgets by different governments. As a result, a change in the timing and the income tax rate at which the components will reverse could materially affect future tax expense as recorded in our results of operations. A one percentage point change in our reported effective income tax rate would have the effect of changing the income tax expense by approximately \$15 million.

In addition, Canadian, American and international tax rules and regulations are subject to interpretation and require judgment that may be challenged by taxation authorities. We believe that, to the best of our knowledge, we have adequately provided for our future tax consequences based upon current facts and circumstances and current tax law.

For the year ended December 31, 2003, we recorded a total net tax recovery of \$67 million (income tax expense of \$56 million in 2002) of which \$81 million was for future income tax recovery (expense of \$31 million in 2002). Our net future tax liability as at December 31, 2003 was \$502 million (\$549 million in 2002).

Risks and Uncertainties

Product prices

Our financial performance is sensitive to the selling prices of our products. The markets for most paper, pulp, lumber and packaging products are cyclical and are influenced by a variety of factors beyond our control. These factors include periods of excess product supply due to industry capacity additions, periods of decreased demand due to weak general economic activity in North America or international markets, inventory de-stocking by customers and fluctuations in currency exchange rates. During periods of low prices, we have experienced in the past, and could experience in the future, reduced revenues and margins resulting in substantial declines in profitability and occasional net losses. See Sensitivity Analysis .

Operational risks

The activities conducted by our businesses are subject to a number of operational risks including competition, performance of key suppliers and distributors, renewal of collective agreements, regulatory risks, successful integration of new acquisitions, retention of key personnel and reliability of information systems. In addition, operating costs for our businesses can be affected by changes in energy and other raw material prices as a result of changing economic or political conditions or due to particular supply and demand considerations.

The Corporation has commodity swap agreements to manage a portion of our price risk associated with sales of NBSK pulp. These agreements fix the sales price of NBSK pulp for 36,000 tonnes in 2004, 33,000 tonnes in 2005 and 6,000 tonnes in 2006. The fair value of these instruments, as at December 31, 2003 represented an unrealized loss of \$3 million (US\$2 million).

The Corporation also has energy commodity swap agreements to manage a portion of the price risk associated with purchases of bunker oil. These agreements fix the purchase price of bunker oil for a commitment of 360,000 barrels in 2004 and 180,000 barrels in 2005. The fair value of these instruments as at December 31, 2003 represented an

unrealized gain of \$2 million (US\$2 million).

Norampac also has commodity swap agreements to manage a portion of its price risk associated with sales of unbleached kraft linerboard and semi-chemical medium paper and purchases of old corrugated containers and electricity expiring in 2004 through 2007. The Corporation's proportionate share of these derivative agreements fixes the sales price for 82,500 tonnes of kraft linerboard and 8,500 tonnes of semi-chemical medium paper, and fixes the purchase price for 387,000 tonnes of old corrugated

Table of Contents

containers and 112,427 megawatts of electricity. The fair value of these instruments as at December 31, 2003 represented a net unrealized gain of \$4 million.

Foreign exchange

Our revenues for many of our products are affected by fluctuations in the exchange rate between the Canadian dollar and the U.S. dollar, as was the case in 2003. Any decrease in the value of the U.S. dollar relative to the Canadian dollar reduces our profitability. The prices for many of our products, including those we sell in Canada, are generally driven by U.S. prices of similar products. Our U.S. dollar sales, net of U.S. dollar purchases for our operating activities, represent approximately US\$1 billion annually. This amount is reduced by interest on our U.S. dollar denominated debt (approximately \$0.1 billion annually). Exchange rate fluctuations are beyond our control and the U.S. dollar may continue to depreciate against the Canadian dollar in the future, which would result in lower revenues and margins. The Corporation has currency options sold totaling US\$33 million maturing in 2004, which limit it from benefiting from a U.S. dollar trading above an average exchange rate of 1.60. In order to reduce the potential negative effect of a weakening U.S. dollar, we may hedge the value of a portion of our future U.S. dollar net cash inflows for periods of up to three years. The Corporation's hedging arrangements as at December 31, 2003 included currency options purchased totaling US\$250 million that give the Corporation the option to sell U.S. dollars at 1.34 in 2004. The fair value of these instruments as at December 31, 2003 represented a net unrealized gain of \$12 million (US\$9 million).

Environment

We are subject to American and Canadian environmental laws and regulations for effluent and air emissions, harvesting, silviculture activities, waste management and groundwater quality, among others. These laws and regulations require us to obtain and comply with the permit and authorization requirements of the appropriate governmental authorities. Regulatory authorities exercise considerable discretion for permit issuances and their timing. In addition, changes in environmental laws and regulations and/or their application may require us to make significant expenditures that could negatively impact our financial results and financial condition.

Failure to comply with the applicable environmental laws, regulations and permit requirements may result in fines, penalties or enforcement actions by the regulators, including regulatory or judicial orders enjoining or curtailing operations or requiring corrective measures, installation of environmental control equipment or remedial actions, any of which could entail significant expenditures and negatively impact our financial results and financial condition.

We continue to take remedial action under our Care and Control program at a number of former operating sites, especially in the wood preserving sector, due to possible soil, sediment or ground-water contamination. The investigation and remediation process is lengthy and subject to the uncertainties of changes in legal requirements, technological developments and the allocation of liability among potentially responsible parties.

Lumber export duties

Our Wood net sales represented 7% of our consolidated net sales in 2003 and we exported approximately 57% of our softwood lumber products to the United States.

The United States Department of Commerce announced that it had imposed cash deposit requirements on the Canadian softwood lumber industry with a final aggregate countervailing and antidumping rate of 27.22%, that is, 18.79% for countervailing and 8.43% for antidumping. Since May 22, 2002, based on a final decision by the United

States International Trade Commission (ITC), we have made the required cash deposits on our exports of softwood lumber to the United States. The Canadian government has challenged both the countervailing and antidumping rates with the World Trade Organization (WTO) and the North American Free Trade Agreement (NAFTA). We are currently experiencing, and may continue to experience, reduced revenues and margins in our Wood business as a result of countervailing and antidumping duty applications or any new arrangements between the United States and Canada.

Table of Contents**70 Management's Discussion and Analysis****Legal proceedings**

In the normal course of our operations, we become involved in various legal actions mostly related to contract disputes, patent infringement, environmental and product warranty claims, and labor issues. While the final outcome with respect to actions outstanding or pending as at December 31, 2003 cannot be predicted with certainty, it is our opinion that their resolution will not have a material adverse effect on our financial position, earnings or cash flows.

In April 2003, the Canadian Competition Bureau began an investigation of Canada's major distributors of carbonless paper and other fine paper products, including Domtar. Although the investigation is continuing, no new information has been presented that would allow us to predict the outcome of this investigation or the impact, if any, it may have on us.

Sensitivity Analysis

Our operating profit, net earnings and earnings per share can be impacted by the following sensitivities:

	Annual impact on^{1,2}		
	Operating profit	Net earnings	Earnings per share
(In millions of Canadian dollars, except per share amounts)			
Each US\$10/unit change in the selling price of the following products³:			
Papers

3 Selling price index is derived using transaction prices for the majority of our products, weighted for production capacity, in relation to trend pricing.

Outlook

We experienced a difficult year in 2003 and were impacted notably by a weaker U.S. dollar and lower demand, conditions that might continue to impact our results in the early part of 2004. While our current business environment is impacted by factors that are difficult to predict and beyond our control such as economic conditions, currency fluctuations, and high energy costs, we will maintain our efforts to reduce costs and improve efficiencies in pursuit of our goal of providing our shareholders with superior returns.

Accordingly, we will strengthen our profitability improvement programs. This is expected to entail a full review, by the end of the first quarter, of our Canadian pulp and paper operations to enable them to remain profitable when the Canadian dollar is valued at 75 cents to the U.S. dollar and prices are at cycle-low levels. In addition, we will accelerate efforts to manufacture our best-selling products at multiple facilities located in both Canada and the United States.

Internal Controls

As required by the Sarbanes-Oxley Act enacted by the U.S. Congress in July 2002 and the rules promulgated by the U.S. Securities and Exchange Commission (SEC) thereunder, we have filed with the SEC certificates relating to, among others, the accuracy of the financial information contained in Domtar's 2003 annual MD&A and annual financial statements and notes thereto, and the adequacy of our procedures and controls relating to disclosure and financial reporting.

Additional information, including our Annual Information Form, is available on SEDAR at www.sedar.com and EDGAR at www.sec.gov/edgar.shtml.

Table of Contents

72 Consolidated financial statements

Management's statement of responsibility

The consolidated financial statements contained in this Annual Report are the responsibility of management, and have been prepared in accordance with Canadian generally accepted accounting principles. Where necessary, management has made judgments and estimates of the outcome of events and transactions, with due consideration given to materiality. Management is also responsible for all other information in the Annual Report and for ensuring that this information is consistent, where appropriate, with the information and data included in the consolidated financial statements.

To discharge its responsibility, management maintains a system of internal controls to provide reasonable assurance as to the reliability of financial information and the safeguarding of assets.

The Corporation's external auditors are responsible for auditing the consolidated financial statements and giving an opinion thereon. In addition, the Corporation maintains a staff of internal auditors whose functions include reviewing internal controls and their application on an ongoing basis.

The Board of Directors carries out its responsibility relative to the consolidated financial statements principally through its Audit Committee, consisting solely of outside directors, which reviews the consolidated financial statements and reports thereon to the Board. The Committee meets periodically with the external auditors, internal auditors and management to review their respective activities and the discharge of each of their responsibilities. Both the external auditors and the internal auditors have free access to the Committee, with or without management, to discuss the scope of their audits, the adequacy of the system of internal controls and the adequacy of financial reporting.

Auditors' report

To the Shareholders of Domtar Inc.

We have audited the consolidated balance sheets of Domtar Inc. as at December 31, 2003 and 2002 and the consolidated statements of earnings, retained earnings and cash flows for each of the years in the three-year period ended December 31, 2003. These financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of Domtar Inc. as at December 31, 2003 and 2002 and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2003 in accordance with Canadian generally accepted accounting principles.

**COMMENTS BY AUDITORS FOR U.S. READERS
ON CANADA-U.S. REPORTING DIFFERENCES**

In the United States, reporting standards for auditors require the addition of an explanatory paragraph following the opinion paragraph when there is a change in accounting principles that has a material effect on the comparability of the Corporation's financial statements, such as the change implemented during the year 2003 with respect to impairment of long-lived assets described in Note 2 to the consolidated financial statements. Our report to the shareholders dated February 25, 2004 is expressed in accordance with Canadian reporting standards which do not require a reference to such a change in accounting principles in the auditors' report when the change is properly accounted for and adequately disclosed in the financial statements.

76 Notes to consolidated financial statements

Notes to consolidated
financial statements

December 31, 2003 (In millions of Canadian dollars, unless otherwise noted)

Note 1.

Summary of significant accounting policies

The consolidated financial statements are expressed in Canadian dollars and have been prepared in accordance with Canadian generally accepted accounting principles (Canadian GAAP). These financial statements differ in certain respects from those prepared in accordance with United States generally accepted accounting principles (U.S. GAAP), and are not intended to provide certain disclosures which would typically be found in financial statements prepared in accordance with U.S. GAAP. These differences are described in Note 25.

Basis of consolidation

The consolidated financial statements include the accounts of Domtar Inc. and its subsidiaries (the Corporation) as well as its joint ventures (collectively Domtar). Investments over which the Corporation exercises significant influence are accounted for using the equity method. The Corporation's interests in joint ventures are accounted for using the proportionate consolidation method.

Use of estimates

The consolidated financial statements have been prepared in conformity with Canadian GAAP, which require management to make estimates and assumptions that affect the reported amounts of revenues and expenses during the year, the reported amounts of assets and liabilities, and the disclosure of contingent assets and liabilities at the date of the financial statements. On an ongoing basis, management reviews its estimates, including those related to environmental matters, useful lives, impairment of long-lived assets and goodwill, pension and other employee future benefit plans, and income taxes, based on currently available information. Actual results could differ from those estimates.

Translation of foreign currencies

Self-sustaining foreign operations

For foreign subsidiaries that are considered financially and operationally self-sustaining, the current rate method of translation of foreign currencies has been used. Under this method, assets and liabilities are translated into Canadian dollars at the rate in effect at the balance sheet date and the revenues and expenses are translated at the average exchange rates during the year. All gains and losses arising from the translation of the financial statements of these foreign subsidiaries are included in the Accumulated foreign currency translation adjustments account under Shareholders' equity.

Foreign currency transactions and integrated foreign operations

For foreign currency transactions and foreign subsidiaries that are considered financially and operationally integrated, the temporal method of translation of foreign currencies has been used. Monetary items are translated at the rate in effect at the balance sheet date, non-monetary items are translated at their historical rate (as well as the related amortization) and the revenues and expenses are translated at

Table of Contents

Domtar Inc. 2003 Annual Report 77

the rate in effect at the transaction date or at the average exchange rates during the year as appropriate. Translation gains and losses, except those on long-term debt, are included in Selling, general and administrative expenses.

Foreign currency long-term debt

The Corporation's long-term debt designated as a hedge of the net investment in self-sustaining foreign subsidiaries, exchange gains and losses are included in the Accumulated foreign currency translation adjustments account in Shareholders' equity. The remaining long-term debt of the Corporation denominated in a foreign currency is designated as a hedge of future U.S. dollar revenue stream and any exchange gains and losses are deferred and recognized when the designated revenue is earned or it became probable that the forecasted transaction will not occur, as the hedge ceases to be effective.

Norampac Inc. and its subsidiaries (Norampac) (a 50-50 joint venture with Cascades Inc.) has also designated a portion of its U.S. dollar denominated long-term debt as a hedge of its net investment in self-sustaining foreign subsidiaries. For such debt designated as a hedge of the net investment in self-sustaining foreign subsidiaries, exchange gains and losses are included in the Accumulated foreign currency translation adjustments account in Shareholders' equity. For the remaining U.S. dollar denominated long-term debt the exchange gains and losses are included in Financing expenses.

Revenue recognition

Domtar recognizes revenue when persuasive evidence of an arrangement exists, goods have been delivered, there are no uncertainties surrounding product acceptance, the related revenue is fixed or determinable and collection is considered reasonably assured. Domtar records delivery costs as a reduction of gross sales to determine net sales. For the year ended December 31, 2003, delivery costs amounted to \$345 million (2002 \$357 million; 2001 \$259 million).

Income taxes

Domtar uses the asset and liability method of accounting for income taxes. Under this method, future tax assets and liabilities are determined according to differences between the carrying amounts and tax bases of the assets and liabilities. The change in the net future tax asset or liability is included in earnings and in Accumulated foreign currency translation adjustments account in Shareholders' equity. Future tax assets and liabilities are measured using enacted or substantively enacted tax rates and laws expected to apply in the years in which the assets and liabilities are expected to be recovered or settled. Domtar does not provide for income taxes on undistributed earnings of foreign subsidiaries that are not expected to be repatriated in the foreseeable future.

Cash and cash equivalents

Cash and cash equivalents include cash and short-term investments with original maturities of less than three months and are presented at cost, which approximates market value.

Receivables

Receivables are recorded at cost net of a provision for doubtful accounts that is based on expected collectibility. Gains or losses on securitization of receivables are calculated as the difference between the carrying amount of the receivables sold and the sum of the cash proceeds on sale and the fair value of the retained subordinate interest in such receivables on the date of transfer. Fair value is determined on a discounted cash flow basis. Costs related to the sales of receivables are recognized in earnings in the period when the sale occurs.

Table of Contents

78 Notes to consolidated financial statements December 31, 2003 (In millions of Canadian dollars, unless otherwise noted)

Note 1. Summary of significant accounting policies (continued)

Inventories

Inventories of operating and maintenance supplies and raw materials are valued at the lower of average cost and replacement cost. Work in process and finished goods are valued at the lower of average cost and net realizable value, and include the cost of raw materials, direct labor and manufacturing overhead expenses.

Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated amortization including asset impairment write-down. Interest costs are capitalized for capital projects in excess of \$10 million and having a duration in excess of 1 year. For timber limits and timberlands, amortization is calculated using the unit of production method. For all other assets, amortization is calculated using the straight-line method over the estimated useful lives of the assets. Buildings are amortized over periods of 10 to 40 years and Machinery and equipment over periods of 3 to 20 years. The amortization expense is reported net of the amount of the amortization of deferred credits related to property, plant and equipment. No amortization is recorded on assets under construction.

Impairment of long-lived assets

Long-lived assets are reviewed for impairment upon the occurrence of events or changes in circumstances indicating that the carrying value of the assets may not be recoverable, as measured by comparing their net book value to the estimated future cash flows generated by their use. Impaired assets are recorded at fair value, determined principally using discounted future cash flows expected from their use and eventual disposition.

Goodwill

Goodwill is not amortized and is subject to an annual impairment test, or more frequently if events or changes in circumstances indicate that it might be impaired. Testing for impairment is accomplished mainly by determining whether the fair value of a segment, based upon discounted cash flows, exceeds the net carrying amount of that segment as of the assessment date. If the fair value is greater than the carrying amount, no impairment is necessary. In the event that the carrying amount exceeds the sum of the discounted cash flows, a second test must be performed whereby the fair value of the segment's goodwill must be estimated to determine if it is less than its carrying amount. Fair value of goodwill is estimated in the same way as goodwill was determined at the date of the acquisition in a business combination, that is, the excess of the fair value of the segment over the fair value of the identifiable net assets of the segment.

In 2003, goodwill decreased by \$2 million (2002 increased by \$17 million), which consist of a \$2 million increase (2002 \$17 million) related to business acquisitions completed by Norampac and a \$4 million decrease (2002 nil) related to foreign currency exchange rate changes.

Other assets

Other assets are recorded at cost. Expenses and discounts related to the issuance of long-term debt are deferred and amortized on a straight-line basis over the term of the related obligation.

Deferred credits

Deferred credits comprise the deferred gain on the contribution of net assets to Norampac, the deferred net gain on early settlement of interest swap contracts and grants and investment tax credits obtained upon the acquisition of property, plant and equipment. The deferred gain on the contribution of net assets to Norampac is amortized on a straight-line basis over 15 years. The net deferred gain on early settlement of interest rate swap contracts is amortized

as adjustments to Financing expenses over the initially designated periods of the respective interest payments. Investment tax credits are amortized on the same basis as the related property, plant and equipment.

Table of Contents

Domtar Inc. 2003 Annual Report 79

Environmental costs

Environmental expenditures for effluent treatment, air emission, landfill operation and closure, asbestos containment and removal, bark pile management, and silviculture activities (together referred to as environmental matters) are expensed or capitalized depending on their future economic benefit. In the normal course of business, Domtar incurs certain operating costs for environmental matters that are expensed as incurred. Expenditures for property, plant and equipment that prevent future environmental contamination are capitalized and amortized on a straight-line basis over 10 to 30 years. Provisions for environmental matters are not discounted and are recorded when remediation efforts are likely and can be reasonably determined.

Stock-based compensation and other stock-based payments

Domtar uses the fair value based approach of accounting for stock-based payments to non-employees and has chosen to record an expense for the stock options granted to its employees using the fair value method. Any consideration paid by plan participants on the exercise of share options or the purchase of shares is credited to stated capital together with any related stock-based compensation expense.

Stock-based compensation expense is recognized over the vesting period for the options, share purchase rights and bonus shares. For employee share purchase discounts, compensation expense is recognized when employees purchase shares. The contributed surplus component of the stock-based compensation is transferred to capital stock upon the issuance of common shares.

Deferred Share Units are amortized over their vesting periods and remeasured at each reporting period, until settlement, using the quoted market value. Deferred Share Units are accounted for in compensation expense and Other liabilities and deferred credits .

Derivative instruments

Derivative instruments are utilized by Domtar in the management of its foreign currency, price risk and interest rate exposures. Domtar uses hedging instruments to hedge changes in fair values or cash flows for items with identified exposures. Domtar also assesses, both at the hedge's inception and on an ongoing basis, the effectiveness of hedging instruments. Domtar uses hedge accounting to account for the derivative instruments formally designated as hedging instruments and the fair value method for derivative instruments not designated as hedging instruments.

Realized and unrealized gains or losses associated with hedging instruments for which the underlying hedged items are either sold, paid or terminated are recognized to earnings. Realized and unrealized gains or losses when hedging instruments have ended or cease to be effective prior to their maturity are deferred and recognized in earnings concurrently with the recognition of the item being hedged.

Domtar hedges its foreign exchange exposure on anticipated sales denominated in U.S. dollars through the use of options and forward contracts. Resulting gains and losses, including premiums on options, are recognized when the designated sale is recognized and are included in Net sales .

Domtar hedges its exposure to price risk associated with sales of Northern Bleached Softwood Kraft (NBSK) pulp, unbleached kraft linerboard, semi-chemical medium paper, purchases of bunker oil, old corrugated containers and electricity through the use of cash settled commodity swap contracts. Resulting gains and losses are recognized when realized and are included in Net sales or Cost of sales , with the related hedged item.

Domtar hedges its exposure to interest rates on its long-term debt through the use of interest rate swap contracts. Amounts accounted for under interest rate swap agreements are recognized as adjustments to Financing expenses .

Table of Contents

80 Notes to consolidated financial statements December 31, 2003 (In millions of Canadian dollars, unless otherwise noted)

Note 1. Summary of significant accounting policies (continued)

Pensions

Domtar accrues the cost of defined benefit plans as determined by independent actuaries. The net periodic benefit cost includes:

the cost of pension benefits provided in exchange for employees' services rendered during the year,

the interest cost of pension obligations,

the expected long-term return on pension fund assets based on a market-related value determined using a five-year moving average market value for equity securities and fair value for other asset classes,

gains or losses on settlements or curtailments,

the straight-line amortization of past service costs and plan amendments over the average remaining service period of the active employee group covered by the plans, and

the amortization of cumulative unrecognized net actuarial gains and losses in excess of 10% of the greater of the accrued benefit obligation or market-related value of plan assets at the beginning of year over the average remaining service period of the active employee group covered by the plans.

The pension plans obligations are determined in accordance with the projected benefit method prorated on services.

Other employee future benefit plans

Domtar accrues the cost of post-retirement benefits other than pensions as determined by independent actuaries. These benefits, which are funded by the Corporation as they become due, include life insurance programs and medical and dental benefits. Domtar amortizes the cumulative unrecognized net actuarial gains and losses in excess of 10% of the accrued benefit obligation at the beginning of the year over the average remaining service period of the active employee group covered by the plans.

Investment tax credits

Investment tax credits are recognized in earnings as a reduction of research and development expenses when Domtar has made the qualifying expenditures and has a reasonable assurance that the credits will be realized.

Disclosure of guarantees

A guarantee is a contract or an indemnification agreement that contingently requires Domtar to make payments to the other party of the contract or agreement, based on changes in an underlying that is related to an asset, a liability or an equity security of the other party or on a third party failure to perform under an obligating agreement. It could also be an indirect guarantee of the indebtedness of another party, even though the payment to the other party may not be based on changes in an underlying that is related to an asset, a liability or an equity security of the other party.

Note 2.

Accounting changes

2003

Share purchase financing

On January 1, 2003, Domtar adopted prospectively the new Canadian Institute of Chartered Accountants (CICA) Emerging Issues Committee Abstract 132 (EIC-132) Share Purchase Financing relating to share purchase loans (the loans) receivable. Accordingly, loans as at January 1, 2003 amounting to \$11 million were reclassified from Other assets to Common shares and interest revenue was treated as a reduction of dividends. The common shares purchased with these loans are held in trust as security for the loans.

Table of ContentsDomtar Inc. 2003 Annual Report **81**

The loans are interest bearing at the dividend rate and have defined repayment terms not exceeding 10 years. As at December 31, 2003, there were 922,994 common shares (December 31, 2002 1,000,333 common shares) held in trust with respect to employee loans of \$12 million (December 31, 2002 \$11 million). The market value, as at December 31, 2003, of the shares held in trust was \$15 million or \$16.25 per share (December 31, 2002 \$16 million or \$15.70 per share). These common shares were not considered as being outstanding for the calculation of the basic earnings per share but were considered in the calculation of the diluted earnings per share. The adoption of this Abstract has no significant impact on the diluted earnings per share for the year ended December 31, 2003.

Impairment of long-lived assets

On January 1, 2003, Domtar early adopted the new CICA Handbook Section 3063 *Impairment of Long-lived Assets* recommendations. These recommendations provide accounting guidance for the recognition, measurement and disclosure of impairment of long-lived assets, including property, plant and equipment and intangible assets with finite useful lives. They require the recognition of an impairment loss for a long-lived asset when events or changes in circumstances cause its carrying value to exceed the total undiscounted future cash flows expected from its use and eventual disposition. The impairment loss is calculated by deducting the fair value of the asset from its carrying value. This change in accounting policy has been applied prospectively.

Based on past operating losses of certain Canadian operations and deteriorating market conditions, Domtar conducted an impairment study of several of its Canadian-based long-lived assets in the fourth quarter of 2003. As a result, Domtar recorded an impairment loss of \$201 million (\$135 million net of income taxes or \$0.59 per common share) (see Note 3).

Exit and disposal activities*Disposal of long-lived assets and discontinued operations*

Domtar prospectively adopted the revised CICA Handbook Section 3475 *Disposal of Long-lived Assets and Discontinued Operations* recommendations for disposal activities initiated on or after May 1, 2003, as required by the transitional provisions. These recommendations establish standards for the recognition, measurement, presentation and disclosure of disposals of long-lived assets as well as for the presentation and disclosure of discontinued operations. The adoption of these new recommendations had no significant impact on the December 31, 2003 consolidated financial statements.

Severance, termination benefits and costs associated with exit and disposal activities

Domtar prospectively adopted the new CICA Emerging Issues Committee Abstract 134 (EIC-134) *Accounting for Severance and Termination Benefits* and Abstract 135 (EIC-135) *Accounting for Costs Associated with Exit and Disposal Activities (Including Costs Incurred in a Restructuring)* relating to exit or disposal activities initiated after March 31, 2003, as required by their transitional provisions. These abstracts provide guidance on the timing of recognition and measurement of liabilities as well as disclosures for the various types of severance and termination benefits related to the termination of employees' services prior to normal retirement and costs associated with an exit or disposal activity. Under this new guidance, liabilities for these costs are to be recognized in the period when they are incurred and measured at their fair value.

Domtar applied the guidelines in these two abstracts for the closure costs related to the Vancouver, British Columbia, paper machine permanent shutdown in December 2003 (see Note 6).

2002**Stock-based compensation and other stock-based payments**

On January 1, 2002, Domtar adopted the new CICA Handbook Section 3870 *Stock-based Compensation and Other*

Stock-based Payments recommendations. These recommendations require the use of a fair value based approach of accounting for stock-based payments to non-employees. The recommendations did not require the use of the fair value method when accounting for stock-based awards to employees,

Table of Contents

82 Notes to consolidated financial statements December 31, 2003 (In millions of Canadian dollars, unless otherwise noted)

Note 2. Accounting changes (continued)

except for stock-based compensation that meets specific criteria. However, Domtar has chosen to record an expense for the stock options granted to its employees using the fair value method.

In accordance with the transitional provisions of the new accounting recommendations, Domtar has adopted the new recommendations for awards granted after January 1, 2002. The effect of the adoption of the recommendations has been reflected as a charge of \$4 million (\$4 million net of income taxes or \$0.02 per common share) for the year ended December 31, 2002.

Goodwill and intangible assets

On January 1, 2002, Domtar adopted the new CICA Handbook Section 3062 Goodwill and Other Intangible Assets recommendations, which require intangible assets with an indefinite life and goodwill to no longer be amortized and be tested annually for impairment. Intangible assets with a finite life will continue to be amortized over their useful life.

In accordance with the transitional provisions of the new accounting recommendations, Domtar has performed the impairment test of its goodwill and has determined that no write-down for impairment was necessary. The Corporation has also reclassified to timber limits and timberland an amount of \$12 million recorded in goodwill in prior years. This amount, now presented under Property, plant and equipment, meets the criteria for reclassification from goodwill. For the year ended December 31, 2001, amortization expense for goodwill was \$4 million (\$4 million net of income taxes or \$0.02 per common share).

IMPACT OF ACCOUNTING PRONOUNCEMENTS NOT YET IMPLEMENTED

Generally Accepted Accounting Principles and financial statement presentation

In July 2003, the CICA issued new Handbook Sections 1100 Generally Accepted Accounting Principles and 1400 General Standards of Financial Statement Presentation. Section 1100 describes what constitutes Canadian Generally Accepted Accounting Principles and its sources and provides guidance on sources to consult when selecting accounting policies and determining appropriate disclosures when a matter is not dealt with explicitly in the primary sources of generally accepted accounting principles, thereby recodifying the Canadian GAAP hierarchy. Section 1400 provides general guidance on financial statement presentation and further clarifies what constitutes fair presentation in accordance with GAAP. These recommendations are effective for fiscal years beginning on or after October 1, 2003.

The Corporation records delivery costs as well as countervailing and antidumping duties on exports of softwood lumber to the United States as a reduction of gross sales to determine net sales in accordance with industry practice. For the year ended December 31, 2003, delivery costs amounted to \$345 million and countervailing and antidumping duties amounted to \$45 million. Commencing in 2004, these costs will be recorded under cost of sales, as industry practices are no longer acceptable under the new GAAP hierarchy defined in Section 1100.

The Corporation does not expect these recommendations to have any other significant impact on its consolidated financial statements upon adoption.

Hedging relationships

In November 2002 and June 2003, the CICA amended the accounting guideline relating to hedging relationships. This accounting guideline must be applied to hedging relationships in effect in fiscal years beginning on or after July 1, 2003. This accounting guideline addresses the identification, designation, documentation and effectiveness of the

hedging relationships for the purpose of applying hedge accounting. In addition, it deals with the discontinuance of hedge accounting and establishes conditions for applying hedge accounting. Under this guideline, documentation of the information related to hedging relationships is required and the effectiveness of the hedges must be demonstrated and documented. Effective January 1, 2004, Domtar has in place all necessary hedge documentation to apply hedge accounting for interest rate swaps, forward foreign exchange contracts, foreign currency options, pulp swaps and energy swaps.

Table of ContentsDomtar Inc. 2003 Annual Report **83****Asset retirement obligations**

In March 2003, the CICA issued Handbook Section 3110 *Asset Retirement Obligations*, which requires entities to record a liability at fair value when there is a legal obligation associated to the retirement of an asset in the period in which it is incurred. The associated costs are capitalized as part of the carrying value of the related asset and depreciated over its remaining useful life. The liability is accreted using a credit adjusted risk free interest rate. Section 3110 is analogous to U.S. GAAP SFAS 143 *Accounting for Asset Retirement Obligations*, which was adopted for U.S. GAAP purposes on January 1, 2003. Asset retirement obligations in connection with the adoption of SFAS 143 were primarily linked to landfill capping obligations, asbestos removal obligations on equipment and demolition of certain abandoned buildings. Taking into consideration the existing assets and liabilities for these items, the impact of the implementation of SFAS 143 was not considered significant at January 1, 2003. No asset retirement obligations were recorded for assets that have indeterminate settlement dates, such as asbestos removal relating to buildings. For such assets, a liability will be initially recognized in the period in which sufficient information exists to estimate a range of possible settlement dates. Section 3110 is applicable to fiscal years beginning on or after January 1, 2004 and must be applied retroactively with restatement of prior periods. As at December 31, 2003, the adoption of SFAS 143 has increased the loss by \$3 million, decreased assets by \$8 million and decreased liabilities by \$5 million.

Consolidation of variable interest entities

In June 2003, the CICA issued Accounting Guideline 15 (AcG-15) *Consolidation of Variable Interest Entities*. This guideline requires that an enterprise holding other than a voting interest in a variable interest entity (VIE) could, subject to certain conditions, be required to consolidate the VIE if it is considered its primary beneficiary whereby it would absorb the majority of the VIE's expected losses and/or receive the majority of its expected residual returns. AcG-15 applies to annual and interim periods beginning on or after November 1, 2004. Domtar does not expect this guideline to have an impact on its financial statements.

Note 3.**Measurement uncertainty****Impairment of long-lived assets**

Domtar reviews the carrying amount of long-lived assets when events or changes in circumstances indicate that the carrying value of the asset may not be recoverable through future operations. This is accomplished by determining whether projected undiscounted future cash flows from operations exceed the net carrying amount of the asset as of the assessment date. Estimates of future cash flows and fair values require judgment and may change.

During the fourth quarter of 2003, as a result of operating losses at the Lebel-sur-Quevillon pulp mill and the Wood Products Group, Domtar conducted impairment tests of the long-lived assets of these business units. In addition, due to the decision to close one paper machine at the Vancouver paper mill and the potential impact that a weaker U.S. dollar may have on the results of operations of Canadian pulp and paper mills, Domtar also conducted impairment tests of the long-lived assets of the Vancouver paper mill and other Canadian pulp and paper mills. As a result of these tests, Domtar recorded an impairment loss in December 2003 of \$201 million (\$135 million net of income taxes or \$0.59 per common share) related to the impairment of the Lebel-sur-Quevillon pulp mill.

The impairment tests were conducted in accordance with the recommendations in Section 3063 of the CICA Handbook *Impairment of Long-lived Assets*. These recommendations indicate that the carrying amount of a long-lived asset is not considered recoverable if the carrying amount exceeds the sum of the undiscounted future cash flows expected to result from its use and eventual disposition (also referred to as *step I*). In the event that the carrying amount exceeds the sum of the undiscounted future cash flows, the recommendations require the asset to be written down to its fair value and a corresponding impairment

Table of Contents

84 Notes to consolidated financial statements December 31, 2003 (In millions of Canadian dollars, unless otherwise noted)

Note 3. Measurement uncertainty (continued)

loss be recorded in the results of operations for the period (also referred to as step II). To determine the fair value of the Lebel-sur-Quevillon pulp mill, Domtar used the present value of the estimated future cash flows of the mill.

The results of the step I test for the Wood Products Group, the Vancouver paper mill and the other Canadian pulp and paper mills concluded that it was not required to record an impairment loss for these business units. However, the sum of the undiscounted future cash flows for the Wood Products Group and the Vancouver paper mill exceeded by only 21% and 14%, respectively, the carrying amount of \$376 million and \$119 million, respectively, of the long-lived assets of these business units as at December 31, 2003. Given the sensitivity of certain key assumptions used in the step I test, there is a measurement uncertainty for these two business units because it is reasonably possible that changes in future conditions in the near term, as explained below, could require a material change in the recognized amount of the long-lived assets when Domtar reperforms the step I test.

In the step I test, estimates of future cash flows used to test the recoverability of a long-lived asset incorporated the internal 2004 budget adjusted for the following key assumptions: trend prices for the products sold by these business units, the long-term forecasted exchange rate for the U.S. dollar, the estimated remaining useful life of the long-lived assets and, for the Wood Products Group only, the effect of the ongoing softwood lumber dispute with the United States.

The trend prices were based on a consensus of analysts of normalized pricing over a business cycle for the pulp, paper and wood products at the mills subjected to the step I test.

The forecasted Canadian-U.S. foreign exchange rate assumptions are based on management's best estimate as well as independent market information. The average rate over the last five years has been CAN\$1.00 = US\$0.68. Short-term economic forecasts estimate a rate of CAN\$1.00 = US\$0.71 to CAN\$1.00 = US\$0.83. Domtar used CAN\$1.00 = US\$0.75 in 2004 and CAN\$1.00 = US\$0.72 for the years thereafter.

The useful lives of the machinery and equipment were estimated to be between 10 and 12.5 years, excluding future capital expenditures that would increase their service potential.

Duties on softwood lumber were established using various probabilities that average to 15.5% in 2004 and 5% in each of the years thereafter.

In the step II test, performed on the Lebel-sur-Quevillon pulp mill only, the assumptions used to determine the discounted future cash flows (fair value) of the business unit were the same as those used in the step I test, except that cash flows used were on an after-tax basis and were discounted at the risk-adjusted weighted average cost of capital.

Note 4.

United States dollar amounts

The consolidated financial statements are expressed in Canadian dollars and, solely for the convenience of the reader, the 2003 financial statements and the tables of certain related notes have been translated into U.S. dollars at the year-end rate of CAN\$1.00 = US\$0.7738. This translation should not be construed as an application of the recommendations relating to the accounting for foreign currency translation, but rather as supplemental information for the reader.

Note 5.

Business acquisitions

2003

In 2003, Norampac acquired businesses for a cash consideration of \$21 million (US\$14 million) and a transfer of assets of \$12 million (US\$8 million) (the Corporation's proportionate share being \$11 million (US\$7 million) and \$6 million (US\$4 million), respectively).

2002

In 2002, Norampac acquired businesses for a cash consideration of \$54 million and a transfer of assets of \$14 million (the Corporation's proportionate share being \$27 million and \$7 million, respectively).

2001

Four U.S. mills and related assets from Georgia-Pacific

On August 7, 2001, Domtar acquired from Georgia-Pacific Corporation four integrated pulp and paper mills and related assets located in Ashdown, Arkansas, Nekoosa and Port Edwards, Wisconsin and Woodland, Maine, for a consideration in cash of \$2,531 million (US\$1,650 million) and \$38 million of transaction related costs. The acquisition has been accounted for using the purchase method whereby the purchase price was allocated to the assets acquired and liabilities assumed based on their estimated fair value as of the acquisition date. The results of operations of these acquired mills were included in the consolidated financial statements from the date of acquisition. Details of the acquisition at the effective date are as follows:

	\$
Net assets acquired at assigned values:	
Current assets	388
Current liabilities	(144)
	<hr/>
Operating working capital	244
Property, plant and equipment	2,442
Other assets	8
Other liabilities	(125)
	<hr/>
	2,569
	<hr/>
Consideration:	
Cash, including transaction related costs	2,569
	<hr/>

Table of Contents

86 Notes to consolidated financial statements December 31, 2003 (In millions of Canadian dollars, unless otherwise noted)

Note 5. Business acquisitions (continued)

The allocation of the purchase price was completed in 2002 and the assigned values were modified to reflect the final plan for the integration and restructuring of assets acquired.

Assuming an effective date of January 1, 2001 for the acquisition of the four integrated pulp and paper mills and related assets, and considering the financing of the acquisition by the issuance of the term loan and the 7.875% notes mentioned in Note 15 and the common share issuance done in October 2001 mentioned in Note 18, the unaudited pro forma consolidated financial information would have been as follows for the year ended December 31:

	2001
	\$
	Unaudited
Net sales	5,451
Net earnings	151
Net earnings per common share	
Basic	0.66
Diluted	0.66

Other acquisitions

In 2001, Norampac acquired businesses for a cash consideration of \$93 million (the Corporation's proportionate share being \$46.5 million).

Note 6.

Closure costs

In 2003, Domtar's management decided to permanently shut down one paper machine at its Vancouver, British Columbia paper mill. The decision to close the paper machine resulted in a charge of \$29 million (\$19 million net of income taxes or \$0.08 per common share) in December 2003, including \$23 million related to the write-down to the estimated net realizable value of property, plant and equipment, a provision of \$5 million for severance and related costs (for 85 employees), which were contractual obligations as at the time of the decision, and \$1 million related to the write-off of certain inventory items and spare parts to their net recoverable amounts. The closure will also require further costs in 2004 and 2005, which will be recognized as incurred, related to equipment removal estimated at \$2 million net of salvage proceeds and other employee related costs estimated at \$1 million for an additional \$3 million (\$2 million net of income taxes or \$0.01 per common share). The total of the 2003 to 2005 costs is estimated to be \$32 million (\$21 million net of income taxes or \$0.09 per common share). As at December 31, 2003, the balance of the provision was \$5 million.

In 2002, Domtar announced plans to permanently shut down, in September 2002, its St. Catharines, Ontario, paper mill and in January 2003 its wood products remanufacturing facility in Daveluyville, Quebec and its hardwood lumber

operations in Sault Ste. Marie, Ontario. The shutdown of these mills resulted in a charge of \$63 million (\$42 million net of income taxes or \$0.18 per common share), including \$27 million related to the write-down to the estimated net realizable value of property, plant and equipment and \$36 million primarily for severance costs, demolition costs, site remediation and other commitments and contingencies related to these closures. As at December 31, 2003, the provision was drawn down to \$8 million (2002 \$26 million).

Table of ContentsDomtar Inc. 2003 Annual Report **87**

In 2002, Domtar shut down a paper machine at its Nekoosa paper mill, which was acquired in the third quarter of 2001, as a result of a study that was part of the original acquisition plan. In accordance with CICA recommendations, charges related to the closure of this paper machine amounting to \$10 million (US\$6 million) have been accounted for under the purchase price allocation of the assets acquired and liabilities assumed as of the acquisition date, and thus did not affect the results for the year ended December 31, 2002.

The following table provides a reconciliation of all closure cost provisions for the year ended December 31, 2003:

	Vancouver	Wood	St. Catharines	Total
	\$	\$	\$	\$

Note 9.

Earnings (loss) per share

The basic net earnings (loss) per share is computed by dividing the net earnings (loss) applicable to common shares by the weighted average number of common shares outstanding during the year.

The diluted net earnings (loss) per share is computed by dividing the net earnings (loss) applicable to common shares by the weighted average number of common shares outstanding during the year, plus the effects of dilutive

common share equivalents such as options and share purchase loans. The diluted net earnings (loss) per share is calculated using the treasury method, as if all common share equivalents had been exercised at the beginning of the year, or the date of the issuance, as the case may be, and that the funds obtained thereby were used to purchase common shares of Domtar at the average trading price of the common shares during the period. Stock options to purchase common shares are not included in the computation of diluted net earnings (loss) per share in periods when net losses are recorded given that they are anti-dilutive.

Note 10.

Receivables

Receivables securitization

Domtar uses securitization of its receivables as a source of financing by reducing its working capital requirements. Domtar's securitizations consist of the sale of receivables on a limited recourse basis, or the sale of senior beneficial interest in them, to special purpose trusts managed by financial institutions for multiple sellers of receivables. The agreements normally allow the daily sale of new receivables to replace those that have been collected. They also limit the cash that can be received from the sale of the senior beneficial interest. The subordinate interest retained by Domtar is included in Receivables and will be collected only after the senior beneficial interest has been settled. The book value of the retained subordinated interests approximates fair value.

Domtar retains responsibility for servicing the receivables sold but does not record a servicing asset or liability as the fees received by Domtar for this service approximate the fair value of the services rendered.

In 2003, a net charge of \$12 million (2002 \$14 million; 2001 \$4 million) resulted from the programs described below and was included in Financing expenses .

Table of ContentsDomtar Inc. 2003 Annual Report **91**

U.S. accounts receivable program

In January 2002, Domtar entered into an agreement, which expires in January 2005, for the securitization of U.S. receivables for a maximum cash consideration of \$194 million (US\$150 million).

At December 31, the following balances were outstanding under this program:

	2003		2002	
	\$	US\$	\$	US\$
Receivables sold	261	202	376	238
Senior beneficial interest held by third parties	(174)	(135)	(198)	(125)
Subordinate interest retained by Domtar	87	67	178	113

The net cash inflow from the sale of senior beneficial interests in the U.S. receivables was \$13 million (US\$10 million) (2002 \$8 million (US\$5 million); 2001 \$190 million (US\$120 million)) and was included in the Consolidated Statement of Cash Flows as a source of cash from receivables.

Canadian accounts receivable program

In December 2000, Domtar entered into an agreement, which expires in December 2004, for the securitization of Canadian receivables for a maximum cash consideration of \$75 million.

At December 31, the following balances were outstanding under this program:

	2003	2002
	\$	\$
Receivables sold	72	88
Senior beneficial interest held by third parties	(53)	(66)
Subordinate interest retained by Domtar	19	22

The net cash outflow from the sale of senior beneficial interests in the Canadian receivables was \$13 million (2002 cash inflow of \$18 million; 2001 cash outflow of \$12 million) and was included in the Consolidated Statement of Cash Flows as a source or use of cash from receivables.

Allowance for doubtful accounts

Receivables include an allowance for doubtful accounts of \$18 million (2002 \$24 million).

The Corporation

Unsecured debentures and notes

The 10% and 10.85% debentures each have purchase fund requirements, whereby the Corporation has undertaken to make all reasonable efforts to purchase quarterly, for cancellation, a portion of the aggregate principal amount of the debentures at prices not exceeding par.

Table of ContentsDomtar Inc. 2003 Annual Report **95**

On November 18, 2003, the Corporation issued \$456 million (US\$350 million) 5.375% notes due in 2013 at an issue price of \$452 million (US\$347 million). The Corporation used the proceeds from this issuance to reduce the unsecured term loan. Subsequently in November 2003, the Corporation concluded interest rate swaps, described in Note 19, as hedges of the fair value of the 5.375% notes payable.

In November 2002, the Corporation terminated prior to maturity its interest rate swaps entered into in 2001. As described in Note 19, these swaps had been designated as a hedge of a portion of the interest on the 7.875% notes payable.

On September 1, 2001, the Corporation redeemed \$49 million 10.35% debentures at a redemption price of 101.2% of the principal amount.

On October 16, 2001, the Corporation issued \$937 million (US\$600 million) 7.875% notes due in 2011 at an issue price of \$925 million (US\$592 million).

Bank facility

The Corporation has a bank facility comprised of a US\$76 million unsecured term loan and a US\$500 million unsecured revolving credit facility that expires in 2006.

The unsecured term loan bears interest based on the U.S. dollar LIBOR rate or U.S. prime rate, plus a margin that varies with Domtar's credit rating. Repayment of 17% (2002 - 23%) of the balance currently outstanding through April 30, 2006 is required prior to its maturity in August 2006. In 2003, the Corporation repaid \$534 million (US\$404 million) (2002 - \$392 million (US\$250 million)) of this term loan.

Borrowings under the revolving credit facility bear interest at a rate based on Canadian dollar bankers' acceptance or U.S. dollar LIBOR rate or prime rate, plus a margin that varies with Domtar's credit rating. The revolving credit facility also requires commitment fees in accordance with standard banking practices.

As at December 31, 2003, \$37 million (2002 - \$8 million) of borrowings under the unsecured revolving credit facility were outstanding, of which \$7 million (2002 - \$8 million) were in the form of overdraft and included in Bank indebtedness, and \$30 million (2002 - nil) were included in Long-term debt. In addition, as at December 31, 2003, the Corporation had outstanding letters of credit pursuant to this bank credit for an amount of \$10 million (2002 - \$9 million). No provision was recorded related to outstanding letters of credits.

In 2003, the interest rates on outstanding borrowings under the bank facilities ranged from 2.31% to 4.80% (2002 from 2.63% to 5.50%).

The Corporation's borrowing agreements contain restrictive covenants. In particular, the Corporation's bank facility contains covenants that require compliance with certain financial ratios on a quarterly basis. Also, the indentures related to the 10% and 10.85% debentures limit the amount of dividends that the Corporation may pay, the amount of shares that it may repurchase for cancellation and the amount of new debt it may incur.

On August 7, 2001, the Corporation borrowed \$1,380 million under two 12-month bridge loans (\$460 million under an equity bridge loan and US\$600 million under a bond bridge loan) and \$1,534 million (US\$1,000 million) under a five-year term loan facility denominated in U.S. dollars. In addition, this bank facility included a US\$500 million unsecured revolving credit facility expiring in 2006. These transactions were entered into in conjunction with the initial financing of the acquisition of the four integrated pulp and paper mills described in Note 5.

In October 2001, the Corporation used the proceeds from the issuance of common shares described in Note 18 and from the issuance of the 7.875% notes described above to repay the balances of the bridge loans and to reduce the term loan.

Certain debt agreements require the Corporation to indemnify the parties in the event of changes in elements such as withholding tax regulations. As the nature and scope of such indemnifications is contingent on future events, none of which can be foreseen as at December 31, 2003, and the structure of such transactions makes these events unlikely, no provisions have been recorded in the financial statements.

Note 15. Long-term debt (continued)

Norampac

On May 28, 2003, Norampac completed a series of financial transactions to substantially refinance all of its existing credit facilities, except those of its joint venture. The following amounts represent the Corporation's proportionate share.

Norampac entered into a new five-year secured revolving credit facility of \$175 million. The new facility replaced a secured reducing revolving credit facility of \$39 million and a \$75 million secured revolving credit facility. The new revolving credit facility is secured by all the inventories and receivables of Norampac Inc. and its North American subsidiaries and by property, plant and equipment at two of its containerboard mills and three of its converting facilities. As at December 31, 2003, the Corporation's proportionate share of assets secured under the new revolving credit facility relating to receivables, inventories and property, plant and equipment amounted to \$89 million, \$65 million and \$218 million, respectively. Borrowings under this credit facility bear interest at floating rates plus a borrowing margin based on Norampac's credit rating.

In addition, Norampac issued new unsecured Senior notes for an aggregate amount of \$173 million (US\$125 million). The notes bear a 6.75% coupon and will mature in 2013. The aggregate proceeds of these two transactions were used to repay the existing credit facilities for an amount of approximately \$34 million at the time of the refinancing and to redeem both the \$104 million (US\$75 million) 9.5% notes and the \$50 million 9.375% notes due in 2008.

As at December 31, 2003, \$11 million (2002 \$19 million, under the old facilities) of borrowings under the new secured revolving credit facility were outstanding. In addition, as at December 31, 2003, Norampac had outstanding letters of credit pursuant to this bank credit for an amount of \$4 million (2002 \$4 million). No provision was recorded related to outstanding letters of credits.

As at December 31, 2003, the interest rates on outstanding borrowings under the reducing revolving credit facility and the revolving credit facility were nil (2002 3.75%) and between 3.06% and 4.05% (2002 3.46% and 4.25%), respectively.

Table of Contents

Domtar Inc. 2003 Annual Report 97

Note 17.

Commitments and contingencies

Environment

Domtar is subject to environmental laws and regulations enacted by federal, provincial, state and local authorities.

In 2003, Domtar's operating expenditures for environmental matters, as described in Note 1, amounted to \$70 million (2002 \$82 million; 2001 \$67 million).

Domtar made capital expenditures for environmental matters of \$7 million in 2003 (2002 \$20 million; 2001 \$21 million) for the improvement of air emissions, effluent treatment and remedial actions to address environmental compliance. At this time, Domtar cannot reasonably estimate the additional capital expenditures that may be required. However, management expects any additional required expenditure would not have a material adverse effect on Domtar's financial position, earnings or cash flows.

Domtar continues to take remedial action under its Care and Control Program at a number of former operating sites, especially in the wood preserving sector, due to possible soil, sediment or groundwater contamination. The investigation and remediation process is lengthy and subject to the uncertainties of changes in legal requirements, technological developments and the allocation of liability among potentially responsible parties.

While Domtar believes that it has determined the costs for environmental matters likely to be incurred based on known information, Domtar's ongoing efforts to identify potential environmental concerns that may be associated with its properties may lead to future environmental investigations. These efforts may result in the determination of additional environmental costs and liabilities which cannot be reasonably estimated at this time.

As at December 31, 2003, Domtar had a provision of \$67 million (2002 \$75 million) for environmental matters. Additional costs, not known or identifiable, could be incurred for remediation efforts. Based on policies and procedures in place to monitor environmental exposure, management believes that such additional remediation costs would not have a material adverse effect on Domtar's financial position, earnings or cash flows.

In addition, the pulp and paper industry in the United States is subject to Cluster Rules that further regulate effluent and air emissions. Domtar complies with all present regulations and anticipates spending approximately \$44 million over the next three years to meet further Cluster Rules requirements.

As at December 31, 2003, anticipated payments in each of the next five years were as follows:

	2004	2005	2006	2007	2008	Thereafter	Total
	\$	\$	\$	\$	\$	\$	\$
Environmental provision	20	13	3	3	4	24	67
Cluster Rules obligation	13	29	2				44

Contingencies

In the normal course of operations, Domtar becomes involved in various legal actions mostly related to contract disputes, patent infringement, environmental and product warranty claims, and labor issues. While the final outcome with respect to actions outstanding or pending as at December 31, 2003 cannot be predicted with certainty, it is management's opinion that their resolution will not have a material adverse effect on Domtar's financial position, earnings or cash flows.

In April 2003, the Canadian Competition Bureau began an investigation of Canada's major distributors of carbonless paper and other fine paper products, including Domtar. Although the investigation is continuing, no new information has been presented that would allow Domtar to predict the outcome of this investigation or any impact it may have on Domtar.

Table of Contents

98 Notes to consolidated financial statements December 31, 2003 (In millions of Canadian dollars, unless otherwise noted)

Note 17. Commitments and contingencies (continued)

E.B. Eddy acquisition

On July 31, 1998, Domtar acquired all of the issued and outstanding shares of E.B. Eddy Limited and E.B. Eddy Paper, Inc. (E.B. Eddy), an integrated producer of specialty paper and wood products. The purchase agreement includes a purchase price adjustment whereby, in the event of the acquisition by a third party of more than 50% of the shares of the Corporation in specified circumstances, the Corporation may have had to pay up to a maximum of \$120 million, an amount which is gradually declining over a 25-year period. As at December 31, 2003, the maximum amount of the purchase price adjustment was \$110 million. No provision was recorded for this potential purchase price adjustment.

Lease and other commercial commitments

The Corporation has entered into operating leases for property, plant and equipment. The Corporation also has commitments to purchase property, plant and equipment, roundwood, wood chips, gas, electricity and certain chemicals. Minimum future payments under these operating leases and other commercial commitments, determined as at December 31, 2003, were as follows:

	2004	2005	2006	2007	2008	Thereafter	Total
	\$	\$	\$	\$	\$	\$	\$
Operating leases	32	24	18	12	8	20	114
Other commercial commitments	61	38	36	24	10	28	197

Total operating lease expense amounted to \$38 million in 2003 (2002 \$45 million; 2001 \$32 million).

Norampac has entered into operating leases for property, plant and equipment. Norampac also has commitments to purchase property, plant and equipment, gas, electricity and steam. The Corporation's proportionate share of Norampac's minimum future payments under these operating leases and other commercial commitments, determined as at December 31, 2003, were as follows:

	2004	2005	2006	2007	2008	Thereafter	Total
	\$	\$	\$	\$	\$	\$	\$
Operating leases	6	5	4	3	3	7	28
Other commercial commitments	26	14	11	7	1	16	75

The Corporation's proportionate share of Norampac's total operating leases expense amounted to \$8 million in 2003 (2002 \$8 million; 2001 \$6 million).

Guarantees

Indemnifications

In the normal course of business, the Corporation offers indemnifications relating to sale of its businesses and real estate. In general, these indemnifications may relate to claims from past business operations, the failure to abide by covenants and the breach of representations and warranties included in the sales agreements. Typically, such representations and warranties relate to litigations as well as taxation, environmental, product and employee matters. As the nature and scope of such indemnifications is contingent on future events, none of which could be foreseen at December 31, 2003, no provisions have been recorded in the financial statements. These indemnifications have not yielded significant expenses in the past.

Table of ContentsDomtar Inc. 2003 Annual Report **99***Leases*

The Corporation has guaranteed to various lessors \$8 million of residual value of its assets under operating leases. If the fair value of the assets at the end of the lease terms are lower than the residual values guaranteed, the Corporation would be held liable for the shortfall. The Corporation's management does not believe these are likely to be called upon and, as such, no provisions have been recorded in the financial statements with respect to these guarantees. Note 18.

Stated capital

Preferred shares

The outstanding preferred shares at December 31 were as follows:

	2003		2002		2002
	US\$ (Note 4)	Number of shares	\$	Number of shares	\$
Preferred shares					
Series A	1	69,576	2	69,576	2
Series B	31	1,590,000	40	1,710,000	42
	<u>32</u>		<u>42</u>		<u>44</u>

The authorized preferred shares consist of preferred shares issuable in an unlimited number of series, ranking equal with respect to the payment of dividends and the distribution of assets.

The Series A Preferred shares are non-voting and redeemable at the Corporation's option at \$25.00 per share since April 1, 1994. These shares carry a cumulative cash dividend per share of \$2.25 per annum.

The Series B Preferred shares are non-voting and redeemable at the Corporation's option at \$25.00 per share. These shares carry a cumulative cash dividend equivalent to 72% of the bank prime rate.

The Corporation has undertaken to make all reasonable efforts to purchase quarterly, for cancellation, 1% of the number of Series A and Series B Preferred shares outstanding on April 2, 1992 at prices not exceeding \$25.00 per share. In connection therewith, preferred shares purchased for cancellation were as follows:

	2003		2002		2001

Common shares

The Corporation is authorized to issue an unlimited number of common shares. The changes in the number of outstanding common shares and their aggregate stated value from January 1, 2001 to December 31, 2003 were as follows:

	2003		2002		2001		
	US\$ (Note 4)	Number of shares	\$	Number of shares	\$	Number of shares	\$
Balance at beginning of year	1,356	227,680,352	1,752	226,202,379	1,731	180,394,416	1,224

Shares purchased for cancellation						(283,400)	(2)
Balance before share purchase financing agreements	1,368	228,860,806	1,768	227,680,352	1,752	226,202,379	1,731
Share purchase financing agreements	(9)	(922,994)	(12)				
Balance at end of year	1,359	227,937,812	1,756	227,680,352	1,752	226,202,379	1,731
Book value per common share at end of year	7.23		9.34		11.02		10.51

On October 5, 2001, the Corporation issued 40,209,790 common shares at \$11.44 per share for a total gross consideration of \$460 million or \$444 million net of underwriting discount, other offering expenses, and related income taxes of \$7 million. On October 25, 2001, the Corporation issued an additional 5,000,000 common shares, in conjunction with the exercise of the over-allotment option granted by the Corporation to the underwriters, for gross

proceeds of \$57 million or \$55 million net of underwriting discount and related income taxes of \$1 million.

In 2003 and 2002, the Corporation did not purchase for cancellation any of its common shares. In 2001, 283,400 shares were purchased for cancellation under a Normal Course Issuer Bid at an average price per share of \$12.22. The excess of the purchase price over the average stated capital of the shares has been charged to retained earnings.

Book value per common share is the sum of the stated value of common shares, contributed surplus, retained earnings and accumulated foreign currency translation adjustments divided by the number of common shares outstanding at year-end.

As at December 31, 2003, the Corporation had a receivable from its employees of \$12 million (2002 - \$11 million) related to share purchase loans granted to them under this plan. These shares are held in trust as security for the loans that are interest bearing at the dividend rate and with defined repayment terms not exceeding 10 years. At the end of the year, there were 922,994 shares (2002 - 1,000,333 shares) held in trust in respect to employee loans for which the market value was \$16.25 (2002 - \$15.70) per share. These loans were included in Other Assets until December 31, 2002, and were included as a reduction of Common Shares thereafter.

Table of ContentsDomtar Inc. 2003 Annual Report **101****Warrants**

On December 23, 2002, in order to facilitate the orderly distribution of the common shares held by one of its major shareholders, the Société générale de financement du Québec (SGF), through one of its indirect wholly owned subsidiaries Dofor Inc. (Dofor), the Corporation issued 18,170,249 units comprised of one warrant and one common share held by Dofor. Each whole warrant entitled the holder to purchase one common share at a price of \$17.55 at any time on or prior to December 23, 2003, after which date the warrant became null and void as none were exercised on or prior to December 23, 2003.

The warrants have not been included in the computation of diluted earnings per share.

Executive stock option and share purchase plan

Under the Executive Stock Option and Share Purchase Plan (the Plan), options and rights may be granted to selected eligible employees. Options are granted at a price equal to the market value on the day immediately preceding the date the options were granted and generally expire 10 years after the date of the grant. Normally, one quarter of the options may be exercised at each anniversary date of the grant. Rights permit eligible employees to purchase shares at 90% of the quoted market value on the day immediately preceding the date the rights were granted, and provide for a one-for-four bonus share to be issued on the third anniversary date of the grant of the rights.

During the first quarter of 2003, a new performance option program was approved, and 1,243,850 stock options were granted to members of the senior management team. Pursuant to this grant, the newly granted stock options will vest in four increments of 25% on each anniversary date of the grant, provided the performance of Domtar's common share price is equal to or exceeds the average performance of an index composed of the S&P 500 Materials (U.S.) index (50%) and the S&P/TSX Materials (Canada) index (50%). On each anniversary date of the grant, the average closing price of Domtar's common shares, during the 20 consecutive trading days on the Toronto Stock Exchange immediately preceding each anniversary date of the grant, will be used to measure the performance of Domtar's common share price and will be compared to the average performance of the index during the same reference period. The relevant annual portion will only vest on a given anniversary date if the performance of Domtar's common share price equals or exceeds the average index during the relevant reference period. Should this not be the case, the annual portion will not vest but may vest on any following anniversary date if the foregoing test, applied on a cumulative basis, is satisfied on a subsequent anniversary date over the vesting period of four years. Any annual portion, which has not vested on or before the end of the vesting period of the option will automatically lapse on the expiry date. The new performance options have a term of 10 years and will expire in February 2013.

During the second quarter of 2001, all of the 900,000 performance options granted in March 1997 became void as a result of not meeting the specified conditions to exercise the options based on the market value of the Corporation's common shares. A performance option program was then approved, and 1,050,000 stock options were granted to members of the senior management team. Pursuant to this grant, and except in certain specified circumstances, there is no pro rata or early vesting prior to January 1, 2004, at which time the options become fully vested if the holder of the options is an employee of Domtar at that time. After vesting, the options may not be exercised unless both of the following two conditions have been met: 1) at any time between January 1, 2001 and December 31, 2003, the weighted average trading price of the Corporation's common shares during 20 consecutive trading days on the Toronto Stock Exchange has reached or exceeded: \$16.70, \$18.51 or \$20.32, whereupon 25%, 50% or 100%, respectively, of the options granted become exercisable; and 2) the appreciation in the market value of the Corporation's common shares between January 1, 2001 and the exercise date is equal to or exceeds the increase in the Standard & Poor's U.S. Paper & Forest Products index during the same period. As at December 31, 2003, only 25% of the options are exercisable and the remaining will be cancelled given the non-respect of both conditions mentioned above.

The fair value of options granted during the years ended December 31, 2003, 2002 and 2001 was estimated using the Black-Scholes option-pricing model with the following weighted average assumptions:

	<u>5,688,264</u>	<u>6.7</u>	<u>14.22</u>	<u>1,988,289</u>	<u>12.98</u>

During the year, 320,350 shares (2002 358,472; 2001 294,120) were issued pursuant to the exercise of rights and 41,169 bonus shares (2002 40,878; 2001 22,682) were issued. The total expense recognized in Domtar's results of operations related to these rights and bonus shares amounted to \$2 million in 2003 (2002 \$1 million). As at December 31, 2003, 211,786 bonus shares could be issued over the next three years.

As at December 31, 2003, 16,000,000 common shares (2002 11,300,000; 2001 10,000,000) were authorized for issuance under the Plan. Since its inception, 5,018,695 shares have been issued under this plan.

During the year, under the Executive stock option and share purchase plan and the Employee share purchase plans, as described below, \$3 million (2002 \$3 million) was included in Contributed surplus in conjunction with the recognition of stock-based compensation expense.

Table of ContentsDomtar Inc. 2003 Annual Report **103**

Deferred Share Units Plan

Outside directors

Under the Deferred Share Units Plan for outside directors, deferred share units (DSU) equivalent in value to a common share may be granted to eligible directors. In addition, directors may elect to receive their annual retainer and attendance fees in DSU. A participant shall receive, not later than the 31st of January following the end of the year during which the participant ceases to be a member of the Board of Directors, a lump sum payment in cash equal to the number of DSU recorded in the participant's account on the termination date multiplied by the termination value of the common shares or, if the participant so elects, a number of common shares to be purchased on the open market equal to the number of DSU then recorded in the participant's account less, in either case, any applicable withholding tax. A participant account shall be credited with dividend equivalents in the form of additional DSU when normal cash dividends are paid on common shares. Upon payment in full of the DSU, they shall be cancelled. The total expense recognized in Domtar's results of operations amounted to \$0.6 million in 2003 (2002 \$0.2 million; 2001 \$2 million). Since the inception of the plan, 169,878 DSU have been authorized and issued.

Executives

Under the Deferred Share Units Plan for executives, DSU may be granted to eligible executives. A participant shall receive, no later than the 31st of January following the end of the year during which occurred the participant's date of retirement, death, determination of long-term disability or termination of employment at the end of a continuous period that started on or after January 1, 1999 and represents at least seven years of tenure as a member of the Management Committee, a lump sum payment in cash equal to the number of DSU recorded in the participant's account on one of these dates multiplied by the redemption value of the common shares or, if the participant so elects, a number of common shares to be purchased on the open market equal to the number of DSU then recorded in the participant's account less, in either case, any applicable withholding tax. A participant account shall be credited with dividend equivalents in the form of additional DSU when normal cash dividends are paid on common shares. Upon payment in full of the DSU, they shall be cancelled. The total expense recognized in Domtar's results of operation amounted to \$0.4 million in 2003 (2002 \$1 million; 2001 nil), representing 86,846 units authorized and issued since the inception of the plan.

Employee Share Purchase Plans

Under the Employee Share Purchase Plans, all employees are eligible to purchase common shares at a price of 90% of the quoted market value. Common shares are purchased under the plans on monthly investment dates. Shares purchased under the Canadian plan are subject to a mandatory twelve-month holding period. Employees who hold the shares for 18 months following the date of acquisition (U.S. plan) or who hold the shares purchased in any calendar year until June 30 of the following year (Canadian plan) are entitled to receive additional common shares equivalent to 10% of the cost of such shares. As at December 31, 2003, 5,050,000 common shares (2002 5,050,000; 2001 3,350,000) were authorized for issuance under the plans. During the year, 470,653 common shares (2002 463,796; 2001 337,002) were issued under the plans at an average price of \$15.32 (2002 \$16.49; 2001 \$12.66) per share. Since their inception, 4,062,515 shares have been issued under these plans.

104 Notes to consolidated financial statements December 31, 2003 (In millions of Canadian dollars, unless otherwise noted)

Note 19.
Financial instruments

Fair value of financial instruments	2003		2003		2002	
	Fair value	Carrying amount	Fair value	Carrying amount	Fair value	Carrying amount
	US\$ (Note 4)	US\$ (Note 4)	\$	\$	\$	\$
Long-term debt	1,798	1,593	2,324	2,059	2,815	2,514

The fair value of the long-term debt, including the portion due within one year, is principally based on quoted market prices.

Due to their short-term maturity, the carrying amounts of cash and cash equivalents, receivables, bank indebtedness, trade and other payables and income and other taxes approximate their fair values.

Interest rate risk

Domtar's exposure to interest rate risk is as follows:

Cash and cash equivalents	Floating rate and non-interest bearing
Receivables	Non-interest bearing
Bank indebtedness	Floating rate and non-interest bearing
Trade and other payables	Non-interest bearing
Income and other taxes	Non-interest bearing
Bank credit facility	Floating rate

The following represents Domtar's carrying amount of long-term debt by date of repayment, based on maturity date or management's expectation to repurchase long-term debt when debentures have purchase fund requirements. Management's expectation reflects prevailing market conditions.

Long-term debt		
Maturing in 1 year or less:	1	Fixed interest rate
Maturing in 1 year or less:	4	Variable interest rate
Maturing in 2 to 5 years:	199	Fixed interest rate
Maturing in 2 to 5 years:	132	Variable interest rate
Maturing in 6 to 10 years:	1,477	Fixed interest rate
Maturing in 11 or more years:	246	Fixed interest rate

During 2003, the Corporation entered into interest rate swap contracts for a nominal value of \$452 million (US\$350 million) ending in December 2013. These swaps were designated as hedges of the fair value of the 5.375% notes. These interest rate swap contracts are comprised of two components. Under the terms of the first component of these swaps, the Corporation would receive, on a semi-annual basis, a fixed interest rate of 4.65% and pay, on a semi-annual basis, a floating variable interest rate based on the U.S. dollar LIBOR three-month rate until December 2013. In parallel with these agreements, the Corporation fixed the floating rate at 1.58% for the first year. The later does not qualify for hedge accounts and therefore this component is marked to market. As at December 31, 2003, these interest rate swap contracts had a fair value under \$1 million.

Table of ContentsDomtar Inc. 2003 Annual Report **105**

In 2001, the Corporation had entered into interest rate swap contracts for a nominal value of \$956 million (US\$600 million) ending in October 2006. These swaps were designated as hedges of a portion of the interest on the 7.875% notes payable until the swaps' maturity. These interest rate swap contracts were comprised of two components. Under the terms of the first component of these swaps, the Corporation would receive, on a semi-annual basis, an average fixed interest rate of 4.45% on \$956 million (US\$600 million) until October 2006 and under the terms of the second component, the Corporation paid 2.48% on \$478 million (US\$300 million) until October 2002 and 3.16% on \$478 million (US\$300 million) until October 2003. The interest paid on the two parts after these initial dates until October 2006 was calculated based on the LIBOR three-month rate. As at December 31, 2001, these interest rate swap contracts had a negative fair value of \$19 million (US\$12 million), the second component having a negligible fair value. In November 2002, the Corporation terminated, prior to maturity, these interest rate swap contracts for net cash proceeds of \$40 million (US\$26 million) recorded under Other liabilities and deferred credits. The first component generated a gain of \$51 million (US\$33 million) and the second component generated a loss of \$11 million (US\$7 million). The amounts were deferred and are recognized against financing expenses over the period of the interest rate payments ending in October 2006 and October 2003, respectively, initially hedged by these interest rate swap contracts. The net recognized amounts will be \$13 million, \$13 million and \$10 million in 2004, 2005 and 2006, respectively. In 2003, a net amount of \$4 million was recognized against financing expenses.

Norampac has interest rate swap contracts having nominal values of \$2 million (US\$2 million) (2002 - \$3 million (US\$2 million)) and \$2 million (US\$1 million) (2002 - \$2 million (US\$1 million)), respectively, according to the Corporation's proportionate share. Under the terms of these swaps, maturing in December 2008 and October 2012, respectively, Norampac will, on a monthly basis, receive interest calculated on the LIBOR one-month rate plus 1.5% and pay an average fixed rate of 7.25% and 9.47%, respectively. Norampac is holding these derivative financial instruments for speculative purposes and accordingly the derivatives are recorded at their fair value. As at December 31, 2003 and 2002, these swaps had a negative fair value of \$1 million (US\$1 million).

Credit risk

Domtar is exposed to credit risk on the accounts receivable from its customers. In order to reduce this risk, Domtar reviews new customers' credit histories before granting credit and conducts regular reviews of existing customers' credit performance. As at December 31, 2003, one of Domtar's paper segment customers located in the United States represented 6% (\$24 million) (2002 - 11% (\$60 million)) of the receivables prior to the effect of the receivables securitization.

Domtar is also exposed to credit risk in the event of non-performance by counterparties to its financial instruments. Domtar minimizes this exposure by entering into contracts with counterparties that are believed to be of high credit quality. Collateral or other security to support financial instruments subject to credit risk is usually not obtained. The credit standing of counterparties is regularly monitored.

Foreign currency risk

In order to reduce the potential negative effects of a fluctuating Canadian dollar, Domtar has entered into various arrangements to stabilize anticipated future net cash inflows denominated in U.S. dollars. The following table provides the detail of the arrangements used as hedging instruments.

Table of Contents

106 Notes to consolidated financial statements December 31, 2003 (In millions of Canadian dollars, unless otherwise noted)

Note 19. Financial instruments (continued)

	2003	2002	2003	2002
	Average exchange rate		Contractual amounts (In millions of U.S. dollars)	
	CAN\$/US\$			
Forward foreign exchange contracts				
0 to 12 months	1.44	1.50	12	132
Currency options purchased				
0 to 12 months	1.34	1.43	250	144
Currency options sold				
0 to 12 months		1.51		144

Forward foreign exchange contracts are contracts whereby Domtar has the obligation to sell U.S. dollars at a specific rate.

Currency options purchased are contracts whereby Domtar has the right, but not the obligation, to sell U.S. dollars at the strike rate if the U.S. dollar trades below that rate. Currency options sold are contracts whereby Domtar has the obligation to sell U.S. dollars at the strike rate if the U.S. dollar trades above that rate.

In addition to the above arrangements and as a result of the early settlement of certain currency options, the Corporation was left with freestanding written call options requiring the Corporation to sell US\$33 million at 1.60 if rates exceed 1.60 in 2004. These freestanding written call options do not qualify for hedge accounting and accordingly any fluctuations of their fair value are recorded to earnings. The impact has been reflected as a gain of \$6 million for the year ended December 31, 2003 (2002 loss of \$2 million), which was included in Selling, general and administrative. As at December 31, 2003, the fair value of the freestanding written call options was nil (2002 negative fair value of \$6 million).

The fair value of derivative financial instruments generally reflects the estimated amounts that Domtar would receive or pay to settle the contracts at December 31, 2003 and 2002. As at these dates, the spot exchange rates were \$1.29 and \$1.58, respectively, and the fair value of the above derivative financial instruments used as hedging items was as follows:

2003	2003	2002
------	------	------

	US\$ (Note 4)	\$	\$
Unrealized gain (loss) on forward foreign exchange contracts	2	2	(11)
Unrealized gain (loss) on currency options	9	12	(12)

Price risk

During 2003, the Corporation entered into a cash settled commodity swap agreement to manage price risk associated with sales of NBSK pulp covering a period starting May 2003 and ending April 2006. The agreement fixes the sale price of NBSK pulp for 1,500 tonnes per month for 36 months. This agreement is in addition to the 2002 contract having the same terms and conditions and expiring in October 2005. The fair value of these instruments as at December 31, 2003 represented an unrealized loss of \$3 million (2002 unrealized gain of \$1 million).

In 2003, the Corporation also entered into a cash settled commodity swap agreement to manage price risk associated with purchases of bunker oil covering a period starting January 2004 and ending December 2005. The agreement fixes the purchase price of bunker oil for 30,000 barrels per month for the first 12 months and for 15,000 barrels per month for the last 12 months. The fair value of these instruments as at December 31, 2003 represented an unrealized gain of \$2 million.

Table of Contents

Domtar Inc. 2003 Annual Report 107

Norampac entered into cash settled commodity swap agreements to manage price risk associated with sales of unbleached kraft linerboard and semi-chemical medium paper and purchases of old corrugated containers and electricity. As at December 31, 2003, Norampac had entered into contracts expiring in 2004 through 2007. According to the Corporation's proportionate share, these derivative agreements fix the sale price for 82,500 tonnes (2002 98,600 tonnes) of unbleached kraft linerboard and 8,500 tonnes of semi-chemical medium paper (2002 14,500 tonnes), and fix the purchase price for 387,000 tonnes (2002 439,850 tonnes) of old corrugated containers and 112,427 megawatts of electricity (2002 161,630 megawatts). The fair value of these instruments as at December 31, 2003 represented a net unrealized gain of \$4 million (2002 net unrealized loss of \$1 million).

Note 22.

Pension plans

Defined contribution plans

Domtar contributes to several defined contribution, multi-employer and 401(k) plans. The pension expense under these plans is equal to Domtar's contribution. The 2003 pension expense was \$19 million (2002 \$20 million; 2001 \$11 million).

Defined benefit plans

Domtar has several defined benefit pension plans covering substantially all employees, including one closed plan for certain non-unionized employees in Canada. Non-unionized employees in Canada joining Domtar after January 1, 2000 participate in defined contribution plans. The defined benefit plans are generally contributory in Canada and non-contributory in the United States. The pension expense and the obligation related to the defined benefit plans are actuarially determined using management's most probable assumptions.

Table of ContentsDomtar Inc. 2003 Annual Report **109**

In 2002, as a result of the closure of its St. Catharines, Ontario paper mill, Domtar recognized a curtailment loss of \$1 million and a settlement loss of \$1 million.

Domtar's funding policy is to contribute annually the amount required to provide for benefits earned in the year and to fund past service obligations over periods not exceeding those permitted by the applicable regulatory authorities. Past service obligations primarily arise from improvements to plan benefits. The latest actuarial valuations were conducted as at December 31, 2002 for plans representing approximately 25% and as at December 31, 2001 for plans representing approximately 63% of the total plans asset fair value. These valuations indicated a funding deficiency. Domtar expects to contribute for a total amount of \$78 million in 2004 compared to \$73 million in 2003.

Change in accrued benefit obligation

The following table represents the change in the accrued benefit obligation as determined by independent actuaries.

	2003	2003	2002
	US\$ (Note 4)	\$	\$
Accrued benefit obligation at beginning of year	864	1,117	1,049

Table of Contents

110 Notes to consolidated financial statements December 31, 2003 (In millions of Canadian dollars, unless otherwise noted)

Note 22. Pension plans (continued)

Description of funded assets

The assets of the pension plans are held by a number of independent trustees and are accounted for separately in the Domtar pension funds. Based on the fair value of the assets held at December 31, 2003, the plan assets are comprised of 3% in cash and short-term investments, 47% in bonds and 50% in Canadian, U.S. and foreign equities.

Domtar has indemnified and held harmless the trustees of Domtar pension funds, and the respective officers, directors, employees and agents of such trustees, from any and all costs and expenses arising out of the performance of their obligations under the relevant trust agreements, including in respect of their reliance on authorized instructions of Domtar or for failing to act in the absence of authorized instructions. These indemnifications survive the termination of such agreements. As at December 31, 2003, Domtar has not recorded a liability associated with these indemnifications, as Domtar does not expect to make any payments pertaining to these indemnifications.

Reconciliation of funded status to amounts recognized in Consolidated Balance Sheets

The following table presents the difference between the fair value of the defined benefit pension assets and the actuarially determined accrued benefit obligation as at December 31, 2003 and 2002. This difference is also referred to as either the deficit or surplus, as the case may be, or the funded status of the plans.

The table further reconciles the amount of the surplus or deficit (funded status) to the net amount recognized in the Consolidated Balance Sheets. This difference between the funded status and the net amount recognized in the Consolidated Balance Sheets, in accordance with Canadian GAAP, represents the portion of the surplus or deficit not yet recognized for accounting purposes. Deferred recognition is a guiding principle of these recommendations. This approach allows for a gradual recognition of changes in accrued benefit obligations and plan performance over the expected average remaining service life of the employee group covered by the plans.

	2003	2003	2002
	US\$	\$	\$
	(Note 4)

Table of Contents

Domtar Inc. 2003 Annual Report 111

Weighted-average assumptions	2003	2002	2001
Discount rate	6.1%	6.5%	6.7%
Expected return on plan assets	7.7%	8.2%	8.2%
Rate of compensation increase	3.8%	3.9%	3.9%

Effective January 1, 2004, Domtar will use 7.7% as the expected return on plan assets, which reflects the current view of long-term investment returns.

As at December 31, 2003, the accrued benefit obligation and the fair value of defined benefit plan assets for the pension plans with an accrued benefit obligation in excess of fair value plan assets were \$1,107 million and \$900 million (2002 \$1,000 million and \$787 million), respectively.

Note 23.

Other employee future benefit plans

The post-retirement and post-employment plans are unfunded. Only certain long-term disability plans, which were settled in 2001, were funded.

	\$	\$	\$
Discount rate	6.1%	6.6%	6.7%
Rate of compensation increase	3.5%	4.2%	3.7%

For measurement purposes, 7.8% weighted-average annual rate of increase in the per capita cost of covered health care benefits was assumed for 2004. The rate was assumed to decrease gradually to 4.1% for 2012 and remain at that level thereafter. An increase or decrease of 1% of this rate would have the following impact:

	Increase of 1%		Decrease of 1%	
	US\$ (Note 4)	\$	US\$ (Note 4)	\$
Impact on net periodic benefit cost	1	1	(1)	(1)
Impact on accrued benefit obligation	8	10	(6)	(8)

Table of Contents

Domtar Inc. 2003 Annual Report **113**

Note 24.

Segmented disclosures

Domtar operates in the four reportable segments described below. Each reportable segment offers different products and services and requires different technology and marketing strategies. The following summary briefly describes the operations included in each of Domtar's reportable segments:

Papers represents the aggregation of the manufacturing and distribution of business, commercial printing and publication, and technical and specialty papers, as well as pulp.

Paper Merchants involves the purchasing, warehousing, sale and distribution of various products made by Domtar and by other manufacturers. These products include business and printing papers, graphic arts supplies and certain industrial products.

Wood comprises the manufacturing and marketing of lumber and wood-based value-added products and the management of forest resources.

Packaging comprises the Corporation's 50% ownership interest in Norampac, a company that manufactures and distributes containerboard and corrugated products.

The accounting policies of the reportable segments are the same as described in Note 1. Domtar evaluates performance based on operating profit, which represents sales, reflecting transfer prices between segments at fair value, less allocable expenses before financing expenses and income taxes. Segment assets are those directly used in segment operations.

	<u>3,572</u>	<u>4,617</u>	<u>5,466</u>	<u>5,674</u>

(a) The net sales and operating profit for the year ended December 31, 2002 reflect a net effect of a \$20 million provision reversal for countervailing and antidumping duties on exports of softwood lumber to the United States (\$20 million recorded in the second half of 2001, \$8 million recorded in the first quarter of 2002 and a reversal of \$28 million in the second quarter of 2002).

(b) The operating loss for the year ended December 31, 2003 reflects a \$29 million charge, including \$23 million related to the write-down to the estimated net realizable value of property, plant and equipment, a provision of \$5 million for severance and related costs and \$1 million related to the write-off of certain inventory items and spare parts to their net recoverable amounts related to the paper machine shutdown at the Vancouver, British Columbia paper mill.

(c) The operating loss for the year ended December 31, 2003 reflects a \$201 million impairment loss related to the Lebel-sur-Quevillon, Quebec pulp mill.

(d) The operating profit for the year ended December 31, 2002 reflects a \$45 million charge, including \$14 million related to the write-down to the estimated net realizable value of property, plant and equipment, relating to the permanent shutdown of the St. Catharines, Ontario paper mill. The operating loss for the year ended December 31, 2003 includes a reduction in the closure cost provision in the amount of \$5 million largely as a result of changes to the initial approach to dismantling the mill.

(e) The operating loss for the year ended December 31, 2002 reflects a \$18 million charge, including \$13 million related to the write-down to the estimated net realizable value of property, plant and equipment, relating to the shutdown of the Sault Ste. Marie, Ontario hardwood lumber operations and Daveluyville, Quebec wood products remanufacturing facility.

(f)

The operating loss for the year ended December 31, 2003 includes the recognition of \$10 million (2002 \$16 million) for investment tax credits related to research and development expenses of current and prior years, reflected as a reduction of the cost of sales.

(g) The operating profit for the year ended December 31, 2001 includes \$14 million primarily related to the cashing in of certain insurance policies.

(h) Sales are attributed to countries based on the location of the external customers.

(i) In 2003, export sales from Canada were \$1,417 million (2002 \$1,592 million; 2001 \$1,635 million).

Note 25.

Reconciliation of Canadian and United States
Generally Accepted Accounting Principles

The Consolidated earnings and Consolidated balance sheets have been prepared in accordance with Canadian GAAP, which differ in some respects from U.S. GAAP. The following are the significant differences in accounting principles as they pertain to the Consolidated earnings and the Consolidated balance sheets.

(a) Net earnings adjustments

The following table provides a reconciliation of the net earnings (loss) under Canadian GAAP to U.S. GAAP.

	2003	2003	2002	2001
	US\$ (Note 4)	\$	\$	\$
Net earnings (loss) in accordance with Canadian GAAP	(147)	(190)	141	140
<i>Adjustments with respect to the following items:</i>				
Pension plans cost ⁽¹⁾	(4)	(5)	(8)	(2)
Other employee future benefit plans cost ⁽²⁾				1
Revenue stream hedge ⁽³⁾	32	42	2	
Foreign currency hedging contracts ⁽⁴⁾	32	41	68	(51)

Table of Contents

Domtar Inc. 2003 Annual Report 119

(c) Differences between Canadian GAAP and U.S. GAAP***(1) Pension plans cost***

On January 1, 2000, Domtar adopted the Canadian accounting recommendations for employee future benefit costs. The recommendations essentially harmonize Canadian GAAP with U.S. GAAP and were applied retroactively without restating prior years. Differences between Canadian and U.S. GAAP remain with respect to the amortization of actuarial gains and losses and past service costs arising prior to January 1, 2000. Differences also arise from the fact that the straight-line method is used to amortize actuarial gains and losses for U.S. GAAP purposes while the corridor method is used for Canadian GAAP purposes.

Furthermore, under U.S. GAAP, an additional minimum pension liability is recorded for plans where the accumulated benefit obligation exceeds the fair value of plan assets. For these plans, an intangible asset is recorded up to the extent of unrecognized past service costs. The balance is recorded in *Other comprehensive income*, net of applicable income taxes. The concept of additional minimum liability does not exist under Canadian GAAP.

(2) Other employee future benefit plans cost

On January 1, 2000, Domtar adopted the Canadian accounting recommendations for employee future benefit costs. The recommendations essentially harmonize Canadian GAAP with U.S. GAAP and were applied retroactively without restating prior years. Differences between Canadian and U.S. GAAP remain with respect to the amortization of actuarial gains and losses arising prior to January 1, 2000.

(3) Revenue stream hedge

In connection with the adoption of the Canadian accounting recommendations relating to the accounting for foreign currency translation, in 2002 the Corporation elected to designate certain U.S. dollar denominated debt as a hedge of its U.S. dollar revenue stream. The exchange gain deferred under Canadian GAAP is recorded to earnings under U.S. GAAP, as such designation is not possible under U.S. GAAP.

(4) Currency hedging contracts

Under Canadian GAAP, unrealized gains and losses on currency hedging contracts are included in earnings when the revenue is recognized. With the adoption of SFAS 133 and 138 mentioned under (d)(i) below, Domtar has elected not to designate the contracts as hedging instruments for U.S. GAAP reporting purposes. Accordingly, these contracts are marked to market and resulting unrealized gains and losses are recorded to earnings. Prior to January 1, 2001, under U.S. GAAP, these contracts did not qualify as hedging instruments and accordingly were marked to market, and the resulting unrealized gains and losses were recorded to earnings. Under Canadian GAAP, gains and losses related to these contracts are included in *Net sales*.

(5) Commodity hedging contracts

Under Canadian GAAP, gains and losses on commodity hedging contracts are included in earnings when the designated transaction is recognized. With the adoption of SFAS 133 and 138 mentioned under (d)(i) below, Domtar has elected to not designate these contracts as hedging instruments for U.S. GAAP reporting purposes. Accordingly, these contracts are marked to market and the resulting unrealized gains and losses are recorded to earnings. Under Canadian GAAP, gains and losses related to these contracts are included in *Net sales* or *Costs of sales* as appropriate.

(6) Interest rate swap contracts

Under Canadian GAAP, unrealized gains and losses on interest rate swap contracts designated as hedges are not recognized in the financial statements. Under U.S. GAAP, certain interest rate swap contracts cannot be designated as a hedge and are marked to market. Therefore, any fluctuations of the fair value are recorded to earnings. Accordingly, the \$19 million (US\$12 million) unrealized loss as at December 31, 2001, was recorded to earnings with the offsetting

amount being recorded under Other liabilities and deferred credits .

In November 2002, the Corporation terminated prior to maturity its interest rate swap contracts for net cash proceeds of \$40 million (US\$26 million). Under Canadian GAAP, the net gain is deferred and recognized as a deduction of Financing expenses over the period of the interest rate payments initially

Table of Contents

120 Notes to consolidated financial statements December 31, 2003 (In millions of Canadian dollars, unless otherwise noted)

Note 25. Reconciliation of Canadian and United States Generally Accepted Accounting Principles (continued)

designated as being hedged by these swaps. Furthermore, the Corporation had an unamortized deferred credit of \$3 million related to interest received under these contracts during the year. Under U.S. GAAP, there is no deferred amount as the fluctuations in the swaps market value and interest payments are recognized in earnings as they arise.

For the year ended December 31, 2003, the amortization of the net deferred gain and related interest was \$7 million under Canadian GAAP and nil under U.S. GAAP.

(7) Joint ventures

Interest in joint ventures is accounted for using the proportionate consolidation method for Canadian GAAP and using the equity method under U.S. GAAP. This difference does not affect Net earnings or Shareholders equity .

Furthermore, under Canadian GAAP, a portion of the gain on the contribution to Norampac is deferred and amortized. Under U.S. GAAP, this gain was fully recognized in earnings upon the formation of Norampac.

(8) Acquisition of E.B. Eddy

The E.B. Eddy acquisition has been accounted for under Canadian GAAP which at the time differed from U.S. GAAP in the accounting for income taxes, pension benefits cost and accounting for business integration provisions.

(9) Formation of Norampac

On January 1, 2000, Domtar adopted the Canadian accounting recommendations for income taxes. These recommendations essentially harmonize Canadian and U.S. GAAP and were applied retroactively without restating prior years. Accordingly, certain property, plant and equipment acquired at the formation of Norampac remained recorded at a lower value under Canadian GAAP.

(10) Gain (loss) from discontinued operations

On January 1, 2002, Domtar adopted SFAS 144 Accounting for the Impairment or Disposal of Long-Lived Assets for reporting purposes under U.S. GAAP. SFAS 144 establishes an accounting model to be used for long-lived assets to be disposed of by sale and broadens the presentation of discontinued operations to include more disposal transaction. Pursuant to SFAS 144, Domtar's closure in September 2002 of its St. Catharines paper mill and in January 2003 of its wood products remanufacturing facility in Daveluyville and its hardwood lumber operations in Sault Ste. Marie qualify as discontinued operations. As indicated in Note 2, Domtar prospectively adopted the revised Canadian accounting recommendations for disposal of long-lived assets and discontinued operations applicable to disposal activities initiated on or after May 1, 2003. The recommendations harmonize Canadian GAAP with U.S. GAAP.

(11) Net sales

Net sales of 2003 included deductions amounting to \$45 million (2002 \$31 million and a reversal of a \$20 million provision recorded in 2001) for countervailing and antidumping duties on exports of softwood lumber to United States. Net sales also included delivery costs as described in Note 1. Both the countervailing and antidumping duties as well as delivery costs have been reclassified in Cost of sales under U.S. GAAP.

(12) Investment tax credits

Under U.S. GAAP, the income tax expense has been reduced by \$10 million (2002 \$16 million) for investment tax credits related to research and development expenses, which had been recognized as a reduction of cost of sales under Canadian GAAP.

(13) Long-term debt discount

Under Canadian GAAP, long-term debt discount is presented in Other assets as a deferred charge. U.S. GAAP requires that long-term debt discount be reported as a direct reduction of the long-term debt.

Table of ContentsDomtar Inc. 2003 Annual Report **121***(14) Share purchase loans receivable*

Under U.S. GAAP, share purchase loans receivable are presented as deductions from Common shares unless there is substantial evidence that the borrower, not the enterprise, is at risk for any decline in the price of the shares and there is reasonable assurance that the enterprise will collect the full amount of the loan in cash. Domtar does not meet the criteria because these receivables are guaranteed by the shares issued. As indicated in Note 2, on January 1, 2003, Domtar prospectively adopted the Canadian accounting recommendations for share purchase financing. The recommendations harmonize Canadian GAAP with U.S. GAAP.

(15) Asset retirement obligations

Under U.S. GAAP, a liability must be recorded when there is a legal obligation associated to the retirement of an asset. Similar accounting recommendations in Canada are effective beginning January 1, 2004.

*(d) Supplementary disclosures****i) Accounting changes****Guarantees*

Effective January 1, 2003, Domtar adopted FIN 45 Guarantors Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others. FIN 45 requires that a guarantor disclose and recognize in its financial statements its obligation relating to guarantees that it has issued. Liability recognition is required at the inception of the guarantee, whether or not payment is probable, for certain guarantees issued or modified after December 31, 2002. Similar accounting recommendations in Canada require disclosure of guarantees but do not require liability recognition.

Asset retirement obligations

Effective January 1, 2003, Domtar adopted SFAS 143 Accounting for Asset Retirement Obligations for U.S. GAAP purposes only. SFAS 143 requires entities to record a liability at fair value when there is a legal obligation associated to the retirement of an asset in the period in which it is incurred. The associated costs are capitalized as part of the carrying value of the related asset and depreciated over its remaining useful life. The liability is accreted each year using a credit-adjusted risk-free rate. Similar accounting recommendations in Canada are effective beginning January 1, 2004.

Asset retirement obligations in connection with the adoption of SFAS 143 primarily relate to landfill capping obligations, asbestos removal obligations on equipment and demolition of certain abandoned buildings. The impact of the implementation of SFAS 143 was not considered significant at January 1, 2003. If SFAS 143 had been in effect for the year ended December 31, 2002 or 2001, the impact would not have been significant.

No asset retirement obligations were recorded for assets that have indeterminate settlement dates, such as asbestos removal relating to buildings. For such assets, a liability will be initially recognized in the period in which sufficient information exists to estimate possible settlement dates.

Stock-based compensation and other stock-based payments

On January 1, 2002, and concurrently with the adoption of Section 3870 Stock-based Compensation and Other Stock-based Payments for Canadian GAAP purposes, Domtar adopted the fair value method defined in SFAS 123 Accounting for Stock-Based Compensation to measure its stock-based compensation and other stock-based payments (Note 2). SFAS 123 indicates that the fair value method is the preferable method of accounting and requires that the fair value method be adopted prospectively.

Prior to January 1, 2002, Domtar had elected to measure stock-based compensation and other stock-based payments using the intrinsic value base method of accounting. In this instance, however, under SFAS 123, Domtar is required to make pro forma disclosures of net earnings, basic earnings per share and diluted earnings per share using the fair value method of accounting for stock-based compensation and other stock-based payments granted prior to January 1, 2002.

Table of Contents

122 Notes to consolidated financial statements December 31, 2003 (In millions of Canadian dollars, unless otherwise noted)

Note 25. Reconciliation of Canadian and United States Generally Accepted Accounting Principles (continued)

Accordingly, Domtar's net earnings (loss), basic earnings (loss) per share and diluted earnings (loss) per share for the year ended December 31, 2003 would have been reduced, on a pro forma basis, by \$2 million, \$0.01 per common share and \$0.01 per common share, respectively (2002 \$3 million, \$0.01 per common share and \$0.01 per common share, respectively; 2001 \$3 million, \$0.02 per common share and \$0.02 per common share, respectively) for stock-based compensation and other stock-based payments granted prior to January 1, 2002.

Goodwill and intangible assets

On January 1, 2002 and concurrently with the adoption of Section 3062 Goodwill and Intangible Assets for Canadian GAAP purposes, Domtar adopted SFAS 142 Goodwill and Other Intangible Assets (Note 2). SFAS 142 requires that goodwill be tested for impairment and prohibits the amortization of goodwill. Under U.S. GAAP as at December 31, 2002, Domtar had goodwill of \$102 million arising from the acquisition of E.B. Eddy (see (c) (8) above) in addition to the goodwill under Canadian GAAP. Amortization thereof amounted to \$6 million during 2001. Pursuant to SFAS 142, Domtar tested its goodwill for impairment and determined that no write-down for impairment was necessary.

Derivative instruments and hedging activities

Effective January 1, 2001, Domtar adopted SFAS 133 Accounting for Derivative Instruments and Hedging Activities and SFAS 138 Accounting for Certain Derivative Instruments and Certain Hedging Activities. These recommendations require all derivative financial instruments to be recorded on the balance sheet at their fair value. Changes in fair value of derivatives that are not hedges are recognized in the earnings as they arise. If the derivative is a hedge, depending on the nature of the hedge, a change in the fair value of the derivative is either offset in income against the change in the fair value of the hedged asset, liability or firm commitment or is recognized in Other comprehensive income until the hedged item is recognized in earnings. In adopting these recommendations, Domtar incurred a transition adjustment of \$1 million resulting from the net unrealized loss on commodity hedging contracts. As these contracts constituted cash flow hedges, this transitional adjustment had been recorded in Other comprehensive income in 2001 and has been transferred to earnings in 2002 as the contracts matured.

In 2003, Domtar adopted SFAS 149 Amendment of Statement 133 on Derivative Instruments and Hedging Activities. SFAS 149 amends and clarifies the financial accounting and reporting for derivative instruments, including certain derivative instruments embedded in other contracts and for hedging activities under SFAS 133. SFAS 149 effective for derivative transactions and hedging relationships entered into or modified after June 30, 2003, had no impact on Domtar's financial position as at December 31, 2003.

Costs associated with exit or disposal activities

On January 1, 2003, Domtar adopted SFAS 146 Accounting for Costs Associated with Exit or Disposal Activities which requires that a liability for a cost associated with an exit or disposal activity be recognized and measured initially at fair value only when a liability is incurred. Similar accounting recommendations under Canadian GAAP have been adopted for exit or disposal activities initiated after March 1, 2003 (Note 2).

Pensions and other postretirement benefits

In 2003, Domtar adopted revised SFAS 132 Employers Disclosures about Pensions and Other Postretirement Benefits. The revised SFAS 132 retains and revises the disclosure requirements contained in the original SFAS 132. It also requires additional disclosures about the assets, obligations, cash flows, and net periodic benefit cost of defined benefit pension plans and other postretirement benefit plans. SFAS 132 will be fully adopted for fiscal years ending after June 15, 2004, as required by the transitional provisions.

Table of ContentsDomtar Inc. 2003 Annual Report **123****ii) Defined benefit pension plans**

The projected benefit obligation, accumulated benefit obligation and fair value of plan assets for the pension plans with accumulated benefit obligations in excess of plan assets were \$1,107 million, \$998 million and \$890 million, respectively, as at December 31, 2003 and \$997 million, \$904 million and \$785 million, respectively, as at December 31, 2002.

iii) Inventories

Inventories under U.S. GAAP are comprised of the following:

	2003	2003	2002
	US\$ (Note 4)	\$	\$
Work in process and finished goods	265	342	386
Raw materials	92	119	129

v) Impact of accounting pronouncements not yet implemented

Variable interest entities

In January 2003, the FASB issued interpretation FIN 46 Consolidation of Variable Interest Entities, which requires that an enterprise holding a variable interest in a Variable Interest Entity (VIE) could, subject to certain conditions, be required to consolidate the VIE if the enterprise is to absorb a majority of the VIE's expected losses and/or receive a majority of its expected residual returns. This interpretation is effective for newly created or acquired VIEs after January 31, 2003. For VIEs existing prior to this date, the provisions of the interpretation are effective for reporting periods beginning after December 15, 2003.

Table of Contents

124 Notes to consolidated financial statements December 31, 2003 (In millions of Canadian dollars, unless otherwise noted)

Note 25. Reconciliation of Canadian and United States Generally Accepted Accounting Principles (continued)
In December 2003, the FASB issued FIN 46R, which modifies the scope exceptions provided in FIN 46. Entities would be required to replace FIN 46 provisions with FIN 46R provisions to all newly created post-January 31, 2003 entities as of the end of the first period ending after March 15, 2004. Domtar does not expect the recommendation to have an initial impact on its financial statements upon adoption.

Comparative figures

To conform with the basis of presentation adopted in the current year, certain figures previously reported have been reclassified.

Supplementary information (Unaudited)

Economic Value Added (EVA®)

In addition to using return on equity as an important financial metric, Domtar also uses EVA® to ensure that its decision-making processes are aligned with the objective of increasing shareholder value. EVA® is used at Domtar to measure performance and evaluate investment decisions.

EVA® is positive when a company's net after-tax operating profit exceeds a capital charge representing the return expected by the providers of the company's capital. Domtar reviews its cost of capital periodically, based on changes in financial markets.

Domtar's EVA® for 2003 deteriorated to negative \$351 million primarily due to the decline in the average value of the US dollar when compared to the Canadian dollar, lower shipments, higher duties on softwood lumber exports to the U.S. and higher energy costs.

In 2004, Domtar will strengthen its quality and profitability improvement programs in order to increase its competitiveness and counteract the impact of difficult market conditions. Domtar remains committed to creating long-term shareholder value and will continue to exercise financial discipline, especially with respect to capital management.

EVA® is a registered trademark of Stern Stewart & Co.

Salaries, wages and benefits ⁽⁵⁾	935	1,056	821

(2) The 1997 results include the after-tax impact of the gain on contribution to Norampac of \$0.11 per share. The 1996 and 1994 results include the after-tax impact of unusual items of \$(0.17) and \$0.11 per share, respectively.

(3) The 1997 figures exclude a non-recurring \$17 million after-tax gain realized on the contribution of Domtar's packaging net assets to Norampac.

The 1996 figures exclude non-recurring items related to the divestitures of the Gypsum and Decorative Panels divisions, a charge related to the refinancing program completed during the year and a charge principally related to asset write-downs. Ratio of net earnings, after dividend payments on preferred shares, to total average common shareholders' equity.

(4) Ratio of long-term debt and bank indebtedness, net of cash, short-term investments and short-term deposits held in trust to total capitalization.

AUDIT COMMITTEE

The Audit Committee is composed entirely of directors who are independent, as such term is defined in the listing standards of the New York Stock Exchange. All members of the Audit Committee are financially literate and there are two audit committee financial experts. In considering criteria for the determination of financial literacy, the Board considers the ability to read and understand a set of financial statements that present a breadth and level of complexity of accounting issues that are generally comparable to the breadth and complexity of the issues that can reasonably be expected to be raised by Domtar's financial statements. In determining who the audit committee financial experts are, the Board and the Audit Committee have considered the attributes described by the U.S. *Securities and Exchange Commission*. The audit committee financial experts are Messrs. Louis P. Gignac and Claude R. Lamoureux. The other members of the Audit Committee are Jacques Laurent and Louiselle Paquin.

The duties of the Audit Committee are set out in the Audit Committee Charter, which may be consulted on our Internet site at www.domtar.com/corporate_section/.

CODE OF ETHICS

Since 2000, the Corporation has had in place a Code of Ethics that applies to all its employees, including the principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions. The Code of Ethics may be consulted on our Internet site at www.domtar.com/corporate_section/.

AUDIT AND NON-AUDIT SERVICES PRE-APPROVAL POLICY

The Audit Committee of the Board of Directors of the Corporation adopted in April 2003 the Audit and Non-Audit Services Pre-Approval Policy that may be found on our web site at www.domtar.com/corporate_section/.

The Audit Committee regularly reviews and determines whether specific projects or expenditures with the Company's independent auditors, PricewaterhouseCoopers LLP and their affiliates, potentially affect their independence. The Audit Committee's policy is to pre-approve all audit and permissible non-audit services provided by PricewaterhouseCoopers LLP. Pre-approval is generally provided by the Audit Committee for up to one year, is detailed as to the particular service or category of services to be rendered, and is generally subject to a specific budget. The Audit Committee may also pre-approve additional services or specific engagements on a case-by-case basis. Management is required to provide quarterly updates to the Audit Committee regarding the extent of any services provided in accordance with this pre-approval, as well as the cumulative fees for all non-audit services incurred to date.
