Notes to portfolio of investments

Aggregate cost for federal income tax purposes, which was the same for book purposes, was \$264,367,728; and net unrealized appreciation consisted of:

Gross unrealized appreciation \$ 19,006,800 (10,932,433)

Net unrealized appreciation \$ 8,074,367

- * Non-income producing security.
- Step bond [] Coupon rate increases in increments to maturity. Rate disclosed is as of July 31, 2008. Maturity date disclosed is the ultimate maturity date.
- (2) Security linked to closed end fund. The rate shown is the annualized yield at July 31, 2008.
- (3) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities are considered liquid, unless otherwise noted, and maybe resold in transactions exempt from registration, normally to qualified institutional buyers. At July 31, 2008, the value of these securities amounted to \$22,764,865 or 7.45% of net assets.
- (4) Security is illiquid. At July 31, 2008, the value of these securities amounted to \$17,310,811 or 5.66% of net assets.
- (5) Floating rate security [] The interest rate shown is the current rate as of July 31, 2008.
- (6) Bond interest is in default.
- (7) Reflects annualized yield at July 31, 2008 on zero coupon bonds.
- (8) Security represents an equity claim linked to Argentina gross domestic product.
- (9) The rate shown is the effective yield at the date of purchase.
- (10) The rate shown reflects the yield at July 31, 2008.
- The table below details the Fund in a security issued by a fund that is advised by the same advisor as the Fund. The advisor does not earn a management fee from UBS Supplementary Trust.

Security Description	Value 10/31/07	Purchases during the nine months ended 07/31/08	Sales during the nine months ended 07/31/08	Value 07/31/08	Income earned from affiliate for the nine months ended 07/31/08
UBS Supplementary Trust [] U.S. Cash Management Prime Fund	\$8,810,452	\$152,529,321	(\$160,130,328)	\$1,209,445	\$464,365

(12)The Fund calculates its net asset value based on the current market value, where available, for its portfolio securities. The Fund normally obtains market values for its securities from independent pricing sources and broker-dealers. Independent pricing sources may use reported last sale prices, current market quotations or valuations from computerized | matrix | systems that derive values based on comparable securities. A matrix system incorporates parameters such as security quality, maturity and coupon, and/or research and evaluations by its staff, including review of broker-dealer market price quotations, if available, in determining the valuation of the portfolio securities. Securities traded in the over-the-counter (☐OTC☐) market and listed on The NASDAQ Stock Market, Inc. ([NASDAQ]) normally are valued at the NASDAQ Official Closing Price. Other OTC securities are valued at the last bid price on the valuation date available prior to valuation. Securities which are listed on US and foreign stock exchanges normally are valued at the last sale price on the day the securities are valued or, lacking any sales on such day, at the last available bid price. In cases where securities are traded on more than one exchange, the securities are valued on the exchange designated as the primary market by UBS Global Asset Management (Americas) Inc., the investment advisor of the Fund. If a market value is not available from an independent pricing source for a particular security, that security is valued at fair value as determined in good faith by or under the direction of the Fund ☐s Board of Directors (the □Board□). Various factors may be reviewed in order to make a good faith determination of a security□s fair value. These factors include, but are not limited to, the type and cost of the security; contractual or legal

restrictions on resale of the security; relevant financial or business developments of the issuer; actively traded similar or related securities; conversion or exchange rights on the security; related corporate actions; and changes in overall market conditions. Foreign currency exchange rates are generally determined as of the close of the NYSE. Occasionally, events affecting the value of foreign investments occur between the time at which they are determined and the close of the NYSE, which will not be reflected in the computation of the Fund[]s net asset value. If events materially affecting the value of such securities occur during such time periods, the securities will be valued at their fair value as determined in good faith by or under the direction of the Board. The amortized cost method of valuation, which approximates market value, generally is used to value short-term debt instruments with sixty days or less remaining to maturity, unless the Board determines that this does not represent fair value. All investments quoted in foreign currencies will be valued daily in US dollars on the basis of the foreign currency exchange rates prevailing at the time such valuation is determined by the Fund[]s custodian.

1) Swap agreements

The Fund may engage in swap agreements, including but not limited to interest rate, currency, total return, and credit default swap agreements. The Fund expects to enter into these transactions to preserve a return or spread on a particular investment or portion of the portfolio's duration, to protect against any increase in the price of securities the Fund anticipates purchasing at a later date, or to gain exposure to certain markets in the most economical way possible.

The Fund may enter into interest rate swap agreements with another party to receive or pay interest (e.g., an exchange of fixed rate payments for floating rate payments) to protect iteself from interest rate fluctuations. This type of swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to a specified interest rate(s) for a specified amount. The payment flows are usually netted against each other, with the difference being paid by one party to the other.

Credit default swap agreements involve commitments to make or receive payments in the event of a default or a credit event of a referenced security. As a buyer, the Fund would make periodic payments to the counterparty, and the Fund would receive payments only upon the occurrence of a credit event. If no credit event occurs, the Fund will lose its periodic stream of payments over the term of the contract. However, if a credit event does occur, the Fund typically would receive full notional value for a reference obligation that may have little or no value. As a seller, the Fund would receive periodic payments from the counterparty, and the Fund would make payments only upon the occurrence of a credit event. If no credit event occurs, the Fund will gain the periodic stream of payments it received over the term of the contract. However, if a credit event occurs, the Fund will pay full notional value for a reference obligation that may have little or no value. Credit default swaps may involve greater risks than if the Fund had invested in the reference obligation directly and are subject to general market risk, liquidity risk, counterparty risk and credit risk.

Total return swap agreements involve commitments to pay or receive interest in exchange for a market-linked return based on a notional amount. To the extent the total return of the security or index underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the Fund will receive a payment from or make a payment to the counterparty, respectively. Total return swaps are marked-to-market daily, and the change, if any, is recorded as unrealized appreciation or depreciation.

The use of swaps involves investment techniques and risks different from those associated with ordinary portfolio security transactions. If UBS Global Asset Management (Americas) Inc. is incorrect in its forecast of market values, interest rates and other applicable factors, the investment performance of the Fund will be less favorable than it would have been if this investment technique was never used. Swaps do not involve the delivery of securities and are subject to counterparty risk. If the other party to a swap defaults and fails to consummate the transaction, the Fund's risk of loss will consist of the net amount of interest or other payments that the Fund is contractually entitled to receive. Therefore, the Fund would consider the creditworthiness of the counterparty to a swap agreement in evaluating potential credit risk.

The Fund accrues for interim payments on swap agreements on a daily basis, with the net amount recorded within unrealized appreciation/depreciation of swap agreements on the Statement of assets and liabilities. Once interim payments are settled in cash, the net amount is recorded as realized gain/loss on swap agreements, in addition to realized gain/loss recorded upon the termination of swap agreements on the Statement of operations. Fluctuations in the value of swap agreements are recorded for financial statement purposes as unrealized appreciation or depreciation of swap agreements.

At July 31, 2008, the Fund had outstanding interest rate swap contracts with the following terms:

	National	Payments Termination made by		Payments received		
Counterparty	Notional amount	date	the Fund	by the Fund	Value	
JPMorgan Chase Bank	THB 170,000,000	07/22/13	(1)	5.9500% ⁽²⁾	\$ 146,603	

- Rate based on 6 month BIBOR. This is a forward starting trade and, as such, a floating rate has not yet been assigned as of July 31, 2008.
- (2) Payments received are based on the notional amount.

BIBOR Bangkok Interbank Offered Rate

At July 31, 2008, the Fund had outstanding total return swap contracts with the following terms:

	Notional amount		Termination	Payments made by the Fund		Payments received by the Fund Value		
Counterparty			date					Value
Credit Suisse International	ARS	12,225,000	12/19/11	\$	10,815,082(1)		(2)	\$ 9,916,502
(Upfront payments ma	de by t	he Fund of \$1	0,815,082)					

- (1) Payment made on 04/13/07 to fully fund swap, which reflects the cost basis of the contract.
- (2) Payment is equal to the total return on the Republic of Argentina 4.000% bond, due 12/17/11.

Currency type abbreviation:

ARS Argentine Peso

2) Securities lending

The Fund may lend securities up to 33¹/3% of its total assets to qualified broker-dealers or institutional investors. The loans are secured at all times by cash, cash equivalents or US government securities in an amount at least equal to the market value of the securities loaned, plus accrued interest and dividends, determined on a daily basis and adjusted accordingly. The Fund will regain ownership of loaned securities to exercise certain beneficial rights; however, the Fund may bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower fail financially. The Fund receives compensation for lending its securities from interest or dividends earned on the cash, cash equivalents or US government securities held as collateral, net of fee rebates paid to the borrower plus reasonable administrative and custody fees. UBS Financial Services Inc. and other affiliated broker-dealers have been approved as borrowers under the Fund's securities lending program. UBS Securities LLC is the lending agent. For the three months ended July 31, 2008, UBS Securities LLC did not earn any compensation as the Fund's lending agent. At July 31, 2008, there were no securities on loan and no related collateral outstanding.

For more information regarding the Fund□s other significant accounting policies, please refer to the Fund□s semi-annual report to shareholders dated April 30, 2008.

Item 2. Controls and Procedures.

- (a) The registrant s principal executive officer and principal financial officer have concluded that the registrant s disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended (Investment Company Act)) are effective based on their evaluation of these controls and procedures as of a date within 90 days of the filing date of this document.
- (b) The registrant s principal executive officer and principal financial officer are aware of no changes in the registrant s internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act) that occurred during the registrant s last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant s internal control over financial reporting.

Item 3. Exhibits.

(a) Certifications of principal executive officer and principal financial officer of registrant pursuant to Rule 30a-2(a) under the Investment Company Act is attached hereto as Exhibit EX-99.CERT.
