UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934**

FOR THE QUARTERLY PERIOD ENDED JUNE 30, 2016

or

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934**

Commission File Number: 1-35327

GENIE ENERGY LTD.

(Exact Name of Registrant as Specified in its Charter)

| | |
|---|--|
| Delaware (State or other jurisdiction of | 45-2069276 (I.R.S. Employer |
| incorporation or organization) | Identification Number) |

| | |
|--|-----------------------------------|
| 520 Broad Street, Newark, New Jersey (Address of principal executive offices) | 07102 (Zip Code) |
|--|-----------------------------------|

(973) 438-3500

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

| | |
|-------------------------|---|
| Large accelerated filer | Accelerated filer |
| Non-accelerated filer | (Do not check if a smaller reporting company) Smaller reporting company |

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act.): Yes No

As of August 2, 2016, the registrant had the following shares outstanding:

Class A common stock, \$.01 par value: 1,574,326 shares outstanding

Class B common stock, \$.01 par value: 23,072,641 shares outstanding (excluding 201,017 treasury shares)

GENIE ENERGY LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1—Basis of Presentation

The accompanying unaudited consolidated financial statements of Genie Energy Ltd. and its subsidiaries (the “Company” or “Genie”) have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and six months ended June 30, 2016 are not necessarily indicative of the results that may be expected for the year ending December 31, 2016. The balance sheet at December 31, 2015 has been derived from the Company’s audited financial statements at that date but does not include all of the information and footnotes required by U.S. GAAP for complete financial statements. For further information, please refer to the consolidated financial statements and footnotes thereto included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2015, as filed with the U.S. Securities and Exchange Commission (the “SEC”).

The Company owns 99.3% of its subsidiary, Genie Energy International Corporation (“GEIC”), which owns 100% of Genie Retail Energy (“GRE”) and 92% of Genie Oil and Gas, Inc. (“GOGAS”). The Company’s principal businesses consist of the following:

Genie Retail Energy owns retail energy providers (“REPs”), including IDT Energy, Inc. (“IDT Energy”) and Residents Energy, Inc. (“Residents Energy”), and energy brokerage and marketing services. Its REP businesses resell electricity and natural gas to residential and small business customers primarily in the Eastern United States; and

Genie Oil and Gas is an oil and gas exploration company that consists of:

an 86.2% interest in Afek Oil and Gas, Ltd. (“Afek”), which operates an exploration project in the Golan Heights in Northern Israel, and

other projects including (1) an 88.3% interest in Genie Mongolia, Inc. (“Genie Mongolia”), an oil shale exploration project in Central Mongolia, which is inactive, (2) a 98.3% interest in American Shale Oil Corporation (“AMSO”), which operates American Shale Oil, L.L.C. (“AMSO, LLC”), an oil shale development project in Colorado that is being

decommissioned, and (3) an 86.1% interest in Israel Energy Initiatives, Ltd. (“IEI”), an oil shale development project in Israel, which is inactive.

GRE has outstanding deferred stock units granted to directors and employees that represent an interest of 2.6% of the equity of GRE.

On March 23, 2016, Total S.A. (“Total”) gave AMSO its notice of withdrawal from AMSO, LLC (see Note 5). The withdrawal was effective on April 30, 2016.

On February 1, 2016, Israel’s Northern District Planning and Building Committee approved a two-year permit extension for Afek to continue to conduct its up to ten-well oil and gas exploration program. This extension is expected to cover the remainder of Afek’s ongoing exploration program in the area covered by its exploration license. In April 2016, Afek received an extension of its license from the Israeli Ministry of Energy and Water through April 9, 2017. Afek is conducting its oil and gas exploration program pursuant to that license.

Reclassification

In the consolidated statement of operations, \$0.6 million and \$1.3 million previously included in “Financing fees” in the three and six months ended June 30, 2015, respectively, were reclassified to “Cost of revenues” to conform to the current year’s presentation.

Seasonality and Weather

The weather and the seasons, among other things, affect GRE's revenues. Weather conditions have a significant impact on the demand for natural gas used for heating and electricity used for heating and cooling. Typically, colder winters increase demand for natural gas and electricity, and hotter summers increase demand for electricity. Milder winters and/or summers have the opposite effect. Natural gas revenues typically increase in the first quarter due to increased heating demands and electricity revenues typically increase in the third quarter due to increased air conditioning use. Approximately 64% and 59% of GRE's natural gas revenues for the relevant years were generated in the first quarter of 2015 and 2014, respectively, when demand for heating was highest. Although the demand for electricity is not as seasonal as natural gas (due, in part, to usage of electricity for both heating and cooling), approximately 30% and 20% of GRE's electricity revenues for the relevant years were generated in the third quarter of 2015 and 2014, respectively. Because of dramatic increases in wholesale electricity prices in January and February 2014, the retail electricity prices that the GRE-owned REPs and many other variable rate electricity suppliers charged to their customers also increased sharply. As a result, approximately 45% of GRE's electricity revenues in 2014 were generated in the first quarter of 2014. GRE's revenues and operating income are subject to material seasonal variations, and the interim financial results are not necessarily indicative of the estimated financial results for the full year.

Note 2—Fair Value Measurements

The following table presents the balance of assets and liabilities measured at fair value on a recurring basis:

| | Level 1 (1) | | Level 2 (2) | | Level 3 (3) | | Total |
|----------------------|-----------------------|----------|--------------------|---|--------------------|---|--------------|
| | (in thousands) | | | | | | |
| June 30, 2016 | | | | | | | |
| Assets: | | | | | | | |
| Derivative contracts | \$766 | \$ 2,329 | \$ | — | \$ | — | \$3,095 |
| Liabilities: | | | | | | | |
| Derivative contracts | \$254 | \$ 831 | \$ | — | \$ | — | \$1,085 |
| December 31, 2015 | | | | | | | |
| Assets: | | | | | | | |
| Derivative contracts | \$373 | \$ 1,308 | \$ | — | \$ | — | \$1,681 |
| Liabilities: | | | | | | | |
| Derivative contracts | \$609 | \$ 1,583 | \$ | — | \$ | — | \$2,192 |

(1) – quoted prices in active markets for identical assets or liabilities

(2) – observable inputs other than quoted prices in active markets for identical assets and liabilities

(3) – no observable pricing inputs in the market

The Company's derivative contracts consist of natural gas and electricity put and call options and swaps. The underlying asset in the Company's put and call options is a forward contract. The Company's swaps are agreements whereby a floating (or market or spot) price is exchanged for a fixed price over a specified period. The Company's derivatives were classified as Level 1, Level 2 or Level 3. The Level 1 derivatives were valued using quoted prices in active markets for identical contracts. The Level 2 derivatives were valued using observable inputs based on quoted market prices in active markets for similar contracts.

Fair Value of Other Financial Instruments

The estimated fair value of the Company's other financial instruments was determined using available market information or other appropriate valuation methodologies. However, considerable judgment is required in interpreting this data to develop estimates of fair value. Consequently, the estimates are not necessarily indicative of the amounts that could be realized or would be paid in a current market exchange.

Restricted cash—short-term and long-term, certificates of deposit, prepaid expenses, other current assets, advances from customers, due to IDT Corporation and other current liabilities. At June 30, 2016 and December 31, 2015, the carrying amounts of these assets and liabilities approximated fair value because of the short period to maturity. The fair value estimate for restricted cash—short-term and long-term was classified as Level 1 and certificates of deposit, prepaid expenses, other current assets, advances from customers, due to IDT Corporation and other current liabilities were classified as Level 2 of the fair value hierarchy.

Other assets, revolving credit loan payable, and other liabilities. At June 30, 2016 and December 31, 2015, other assets included an aggregate of \$1.5 million in notes receivable. The carrying amounts of the notes receivable, revolving credit loan payable and other liabilities approximated fair value. The fair values were estimated based on the Company's assumptions, and were classified as Level 3 of the fair value hierarchy.

Note 3—Derivative Instruments

The primary risk managed by the Company using derivative instruments is commodity price risk, which is accounted for in accordance with Accounting Standards Codification 815—Derivatives and Hedging. Natural gas and electricity put and call options and swaps are entered into as hedges against unfavorable fluctuations in market prices of natural gas and electricity. The Company does not apply hedge accounting to these options or swaps, therefore the changes in fair value are recorded in earnings. By using derivative instruments to mitigate exposures to changes in commodity prices, the Company exposes itself to credit risk and market risk. Credit risk is the failure of the counterparty to perform under the terms of the derivative contract. When the fair value of a derivative contract is positive, the counterparty owes the Company, which creates credit risk. The Company minimizes the credit or repayment risk in derivative instruments by entering into transactions with high-quality counterparties. At June 30, 2016 and December 31, 2015, GRE's swaps and options were traded on the New York Mercantile Exchange.

The summarized volume of GRE's outstanding contracts and options at June 30, 2016 was as follows (MWh – Megawatt hour and Dth – Decatherm):

| Commodity | Settlement Dates | Volume |
|-------------|------------------|---------------|
| Electricity | July 2016 | 112,000 MWh |
| Electricity | August 2016 | 331,200 MWh |
| Electricity | September 2016 | 42,000 MWh |
| Electricity | December 2016 | 53,760 MWh |
| Electricity | January 2017 | 336,000 MWh |
| Electricity | February 2017 | 320,000 MWh |
| Natural gas | August 2016 | 1,164,250 Dth |
| Natural gas | September 2016 | 75,000 Dth |
| Natural gas | October 2016 | 600,000 Dth |
| Natural gas | February 2017 | 600,000 Dth |
| Natural gas | March 2017 | 800,000 Dth |
| Natural gas | April 2017 | 300,000 Dth |
| Natural gas | February 2018 | 70,000 Dth |

The fair value of outstanding derivative instruments recorded as assets in the accompanying consolidated balance sheets were as follows:

| Asset Derivatives | Balance Sheet Location | June 30, December 31, | |
|-------------------|------------------------|-----------------------|------|
| | | 2016 | 2015 |
| (in thousands) | | | |

Derivatives not designated or not qualifying as hedging instruments:

Edgar Filing: Genie Energy Ltd. - Form 10-Q

Energy contracts and options Other current assets \$3,095 \$ 1,681

The fair value of outstanding derivative instruments recorded as liabilities in the accompanying consolidated balance sheets were as follows:

| Liability Derivatives | Balance Sheet Location | June 30, 2016 | December 31, 2015 |
|--|--------------------------|----------------|-------------------|
| | | (in thousands) | |
| Derivatives not designated or not qualifying as hedging instruments: | | | |
| Energy contracts and options | Energy hedging contracts | \$ 1,085 | \$ 2,192 |

The effects of derivative instruments on the consolidated statements of operations were as follows:

| Derivatives not designated or not qualifying as hedging instruments | Location of Gain (Loss) | Amount of Gain (Loss) Recognized on Derivatives | | | |
|---|-------------------------|---|---------|-------------------------|-----------|
| | | Three Months Ended | | Six Months Ended | |
| | | June 30, | | June 30, | |
| | | 2016 | 2015 | 2016 | 2015 |
| | | (in thousands) | | | |
| Energy contracts and options | Cost of revenues | \$441 | \$(131) | \$802 | \$(1,088) |

Note 4—Afek Oil and Gas Exploration Activities

The Company accounts for Afek's oil and gas activities under the successful efforts method of accounting. Under this method, the costs of drilling exploratory wells and exploratory-type stratigraphic test wells are capitalized, pending determination of whether the well has found proved reserves. Other exploration costs are charged to expense as incurred. Unproved properties are assessed for impairment, and if considered impaired, are charged to expense when such impairment is deemed to have occurred. At June 30, 2016 and December 31, 2015, the Company had capitalized exploration costs of \$40.0 million and \$26.9 million, respectively. At June 30, 2016, \$11.3 million of the capitalized exploration costs had been capitalized for a period greater than one year. The Company is in the process of determining if proved reserves have been found. If no proved reserves are found, the related capitalized exploration costs will be charged to expense. In the three months ended June 30, 2016 and 2015, the Company recognized exploration expense of \$1.4 million and \$1.3 million, respectively, and in the six months ended June 30, 2016 and 2015, the Company recognized exploration expense of \$3.1 million and \$2.9 million, respectively.

In 2016, Afek completed well-flow test operations at its Devorah 1 (Ness 2) well, its second well-flow test site. The data obtained from the well-flow tests, in conjunction with the results from the five exploratory wells that have been drilled, their log results and core samples, are being evaluated by Afek's scientific team and independent experts. Their analysis is intended to assess potential techniques to extract oil and gas samples from preserved core samples and to construct an initial reservoir model. The analysis may continue for the remainder of the calendar year. The findings will be used to determine the next steps in the exploratory program.

As part of its analysis, Afek is working to better understand the geology in the lightly explored Northern region of its license area. Afek is now reprocessing the limited seismic data that was run in this region many years ago to incorporate the results to date from its exploratory program. Once the data has been fully reinterpreted, Afek may conduct additional work in this region. Potential next steps could include additional 2-D seismic lines and/or drilling a new exploratory well.

Afek assesses the economic and operational viability of its project on an ongoing basis, and to date believes that sufficient progress is being made. The assessment requires significant estimates and assumptions by management. Should our estimates or assumptions regarding the recoverability of the capitalized exploration costs prove to be incorrect, we may be required to record impairments of such costs in future periods and such impairments could be material.

Note 5—Investment in American Shale Oil, LLC

Through April 30, 2016, the Company accounted for its ownership interest in AMSO, LLC using the equity method since the Company had the ability to exercise significant influence over its operating and financial matters, although it did not control AMSO, LLC. AMSO, LLC was a variable interest entity, however, the Company determined that it was not the primary beneficiary, as the Company did not have the power to direct the activities of AMSO, LLC that most significantly impact AMSO, LLC's economic performance.

On February 23, 2016, Total notified the Company of its decision not to continue to fund AMSO, LLC. On March 23, 2016, Total gave AMSO its notice of withdrawal from AMSO, LLC. The withdrawal was effective on April 30, 2016. The Company is currently decommissioning the project. As of April 1, 2016, AMSO and Total agreed that Total would pay AMSO, LLC \$3.0 million as full payment of its share of all costs associated with the decommissioning, winding up and dissolution of AMSO, LLC. Total will not be refunded any amount if the decommissioning costs are less than \$3.0 million. Effective April 30, 2016, AMSO, LLC's assets, liabilities, results of operations and cash flows are included in the Company's consolidated financial statements.

The following table summarizes the change in the balance of the Company's investment in AMSO, LLC:

| | Six Months Ended June 30, 2016 2015 (in thousands) | |
|--|--|---------|
| Balance, beginning of period | \$(399) | \$(252) |
| Capital contributions | 63 | — |
| Equity in the net loss of AMSO, LLC | (222) | — |
| Elimination of the investment in AMSO, LLC | 558 | — |
| Balance, end of period | \$— | \$(252) |

At December 31, 2015, the liability for equity loss in AMSO, LLC was included in "Accrued expenses" in the consolidated balance sheet.

Summarized unaudited statements of operations of AMSO, LLC through the April 30, 2016 acquisition date are as follows:

| | Three Months Ended | | Six Months Ended | |
|-----------------------------------|-------------------------------|-----------|-----------------------------|-----------|
| | June 30, | | June 30, | |
| | 2016 | 2015 | 2016 | 2015 |
| | (in thousands) | | | |
| Operating expenses: | | | | |
| General and administrative | \$33 | \$98 | \$120 | \$217 |
| Research and development | 2,462 | 1,103 | 3,512 | 2,565 |
| Total operating expenses | 2,495 | 1,201 | 3,632 | 2,782 |
| Loss from operations and net loss | \$(2,495) | \$(1,201) | \$(3,632) | \$(2,782) |

Summarized unaudited balance sheet of AMSO, LLC at April 30, 2016 (in thousands) is as follows:

| | |
|---|---------|
| Assets | |
| Cash and cash equivalents | \$750 |
| Receivable from Total | 3,000 |
| Other current assets | 128 |
| Other assets | 860 |
| Total assets | \$4,738 |
| Liabilities and member's interest | |
| Current liabilities | \$518 |
| Asset retirement obligations | 2,535 |
| Other liabilities | 981 |
| Member's interest | 704 |
| Total liabilities and member's interest | \$4,738 |

The Company accounted for its acquisition on April 30, 2016 of Total's ownership interest in AMSO, LLC as a business combination. The Company estimated the fair value of AMSO, LLC to be nil, as it had ceased operations and its shutdown was in progress. The Company recognized a gain from the acquisition of Total's interest in AMSO, LLC because the Company acquired the net assets of AMSO, LLC while no consideration was transferred by the Company, due to the Company's assumption of the risk associated with the shutdown obligations. The gain also included the Company's gain on the remeasurement of AMSO's investment in AMSO, LLC at its acquisition date fair value. The aggregate gain recognized was \$1.3 million, which was included in "Gain on consolidation of AMSO, LLC" in the consolidated statements of operations.

Edgar Filing: Genie Energy Ltd. - Form 10-Q

Revenue, loss from operations and net loss of AMSO, LLC since the acquisition date included in the Company's consolidated statement of operations are as follows:

| | Three Months Ended | | Six Months Ended | |
|-----------------------------------|---------------------------|------|-------------------------|------|
| | June 30, | | June 30, | |
| | 2016 | 2015 | 2016 | 2015 |
| | (in thousands) | | | |
| Revenue | \$— | \$ — | \$— | \$ — |
| Loss from operations and net loss | \$(151) | \$ — | \$(151) | \$ — |

Revenue and net (loss) income of the Company as if the acquisition of AMSO, LLC occurred on January 1, 2015 is as follows:

| | Three Months Ended | | Six Months Ended | |
|-------------------|---------------------------|------------|-------------------------|------------|
| | June 30, | | June 30, | |
| | 2016 | 2015 | 2016 | 2015 |
| | (in thousands) | | | |
| Revenue | \$43,977 | \$39,527 | \$102,115 | \$113,956 |
| Net (loss) income | \$(538) | \$(5,927) | \$4,213 | \$(9,938) |

In April 2016, AMSO, LLC recorded a liability for the decommissioning of its project and the remediation of the leased area. The following table summarizes the change in the balance of the AMSO, LLC retirement obligations after the consolidation of AMSO, LLC:

| | |
|-----------------------------|----------|
| (in thousands) | |
| Liability at April 30, 2016 | \$ 2,535 |
| acquisition date | |
| Payments | (380) |
| Balance, June 30, 2016 | \$ 2,155 |

Note 6—Equity

Changes in the components of equity were as follows:

| | Six Months Ended June 30, 2016 | | |
|--|---------------------------------------|-----------------------------|------------|
| | Attributable to Genie | Noncontrolling Interests | Total |
| | (in thousands) | | |
| Balance, December 31, 2015 | \$ 123,377 | \$ (8,680) | \$ 114,697 |
| Dividends on preferred stock | (740) | — | (740) |
| Dividends declared on common stock (\$0.12 per share) | (2,957) | — | (2,957) |
| Restricted Class B common stock purchased from employees | (29) | — | (29) |
| Stock-based compensation | 2,337 | — | 2,337 |
| Comprehensive income: | | | |
| Net income | 9,938 | (2,163) | 7,775 |
| Foreign currency translation adjustments | 401 | 6 | 407 |
| Comprehensive income | 10,339 | (2,157) | 8,182 |
| Balance, June 30, 2016 | \$ 132,327 | \$ (10,837) | \$ 121,490 |

Dividend Payments

On May 16, 2016 and on February 16, 2016, the Company paid a quarterly Base Dividend of \$0.1594 per share on its Series 2012-A Preferred Stock (“Preferred Stock”) for the first quarter of 2016 and for the fourth quarter of 2015, respectively. The aggregate dividends paid on the Company’s Preferred Stock in each of the six months ended June 30, 2016 and 2015 was \$0.7 million. On July 20, 2016, the Company’s Board of Directors declared a quarterly Base

Dividend of \$0.1594 per share on the Preferred Stock for the second quarter of 2016. The dividend will be paid on or about August 15, 2016 to stockholders of record as of the close of business on August 5, 2016.

On May 20, 2016 and on February 12, 2016, the Company paid a quarterly dividend of \$0.06 per share on its Class A common stock and Class B common stock. On May 22, 2015 and March 31, 2015, the Company paid a quarterly dividend of \$0.06 per share on its Class A common stock and Class B common stock. The aggregate dividends paid on the Company's Class A common stock and Class B common stock in each of the six months ended June 30, 2016 and 2015 was \$3.0 million. In August 2016, the Company's Board of Directors declared a quarterly dividend of \$0.06 per share on its Class A common stock and Class B common stock for the second quarter of 2016. The dividend will be paid on or about August 26, 2016 to stockholders of record as of the close of business on August 17, 2016.

Stock Repurchase Program

On March 11, 2013, the Board of Directors of the Company approved a stock repurchase program for the repurchase of up to an aggregate of 7.0 million shares of the Company's Class B common stock. There were no repurchases under this program in the six months ended June 30, 2016 and 2015. At June 30, 2016, 6.9 million shares remained available for repurchase under the stock repurchase program.

Variable Interest Entity

Citizens Choice Energy, LLC (“CCE”), is a REP that resells electricity and natural gas to residential and small business customers in the State of New York. Since 2011, the Company provided CCE with substantially all of the cash required to fund its operations. The Company determined that it has the power to direct the activities of CCE that most significantly impact its economic performance and it has the obligation to absorb losses of CCE that could potentially be significant to CCE on a stand-alone basis. The Company therefore determined that it is the primary beneficiary of CCE, and as a result, the Company consolidates CCE within its GRE segment. The Company does not own any interest in CCE and thus the net income or loss incurred by CCE was attributed to noncontrolling interests in the accompanying consolidated statements of operations.

In October 2015, GRE paid \$0.2 million to the owner of the limited liability company interests in CCE, and loaned CCE \$0.5 million in exchange for an option to purchase 100% of the issued and outstanding limited liability company interests of CCE for one dollar plus the forgiveness of the \$0.5 million loan. The option expires on October 22, 2023.

Net (loss) income related to CCE and aggregate net funding (provided by) repaid to the Company by CCE in order to finance its operations were as follows:

| | Three Months Ended | | Six Months Ended | |
|--|---------------------------|-------|-------------------------|-------|
| | June 30, | | June 30, | |
| | 2016 | 2015 | 2016 | 2015 |
| | (in thousands) | | | |
| Net (loss) income | \$(1,155) | \$39 | \$(1,726) | \$64 |
| Aggregate funding (provided by) repaid to the Company, net | \$(627) | \$529 | \$(998) | \$842 |

Summarized combined balance sheet amounts related to CCE was as follows:

| | June 30, 2016 | December 31, 2015 |
|---------------------------|----------------|-------------------|
| | (in thousands) | |
| Assets | | |
| Cash and cash equivalents | \$13 | \$ 48 |
| Restricted cash | 4 | 25 |

Edgar Filing: Genie Energy Ltd. - Form 10-Q

| | | |
|--|---------|----------|
| Trade accounts receivable | 638 | 844 |
| Prepaid expenses | 408 | 479 |
| Other current assets | 23 | 51 |
| Other assets | 449 | 468 |
| Total assets | \$1,535 | \$ 1,915 |
| Liabilities and noncontrolling interests | | |
| Current liabilities | \$615 | \$ 267 |
| Due to IDT Energy | 1,425 | 427 |
| Noncontrolling interests | (505) | 1,221 |
| Total liabilities and noncontrolling interests | \$1,535 | \$ 1,915 |

The assets of CCE may only be used to settle obligations of CCE, and may not be used for other consolidated entities. The liabilities of CCE are non-recourse to the general credit of the Company's other consolidated entities.

Note 7—Earnings (Loss) Per Share

Basic earnings per share is computed by dividing net income or loss attributable to all classes of common stockholders of the Company by the weighted average number of shares of all classes of common stock outstanding during the applicable period. Diluted earnings per share is computed in the same manner as basic earnings per share, except that the number of shares is increased to include restricted stock still subject to risk of forfeiture and to assume exercise of potentially dilutive stock options using the treasury stock method, unless the effect of such increase is anti-dilutive.

The weighted-average number of shares used in the calculation of basic and diluted earnings (loss) per share attributable to the Company's common stockholders consists of the following:

| | Three Months Ended | | Six Months Ended | |
|--|-------------------------------|--------|-----------------------------|--------|
| | June 30, | | June 30, | |
| | 2016 | 2015 | 2016 | 2015 |
| | (in thousands) | | | |
| Basic weighted-average number of shares | 22,795 | 22,125 | 22,793 | 22,116 |
| Effect of dilutive securities: | | | | |
| Stock options | 17 | — | 29 | — |
| Non-vested restricted Class B common stock | 791 | — | 822 | — |
| Diluted weighted-average number of shares | 23,603 | 22,125 | 23,644 | 22,116 |

The following shares were excluded from the diluted loss per share computation because their inclusion would have been anti-dilutive:

| | Three Months Ended | Six Months Ended |
|--|-----------------------------------|---------------------------------|
| | June 30, 2015 | June 30, 2015 |
| | (in thousands) | |
| Stock options | —423 | —423 |
| Non-vested restricted Class B common stock | —2,452 | —2,452 |
| Shares excluded from the calculation of diluted earnings per share | —2,875 | —2,875 |

The diluted loss per share equals basic loss per share in the three and six months ended June 30, 2015 because the Company had a net loss and the impact of the assumed exercise of stock options and vesting of restricted stock would have been anti-dilutive.

An entity affiliated with Lord (Jacob) Rothschild has a one-time option, subject to certain conditions and exercisable between November 2017 and February 2018, to exchange its GOGAS shares for shares of the Company with equal fair value as determined by the parties. The number of shares issuable in such an exchange is not currently determinable. If this option is exercised, the shares issued by the Company may dilute the earnings per share in future periods.

An employee of the Company, pursuant to the terms of his employment agreement, has the option to exchange his equity interests in IEI, Afek, Genie Mongolia and any equity interest that he may acquire in other entities that the Company may create, for shares of the Company. In addition, employees and directors of the Company that were previously granted restricted stock of Afek and Genie Mongolia have the right to exchange the restricted stock, upon vesting of such shares, into shares of the Company's Class B common stock. GRE has the right, at its option, to satisfy its obligations to issue common stock of GRE upon the vesting of the deferred stock units it granted in July 2015 to officers and employees of the Company in shares of the Company's Class B common stock or cash. These exchanges and issuances, if elected, would be based on the relative fair value of the shares exchanged or to be issued. The number of shares of the Company's stock issuable in an exchange is not currently determinable. If shares of the Company's stock are issued upon such exchange, the Company's earnings per share may be diluted in future periods.

Note 8—Related Party Transactions

On October 28, 2011, the Company was spun-off by IDT, its former parent company, (the “Spin-Off”). The Company entered into various agreements with IDT prior to the Spin-Off including an agreement for certain services to be performed by the Company and IDT. Following the Spin-Off, the charges for services provided by IDT are included in “Selling, general and administrative” expense in the consolidated statements of operations. Also, the Company provides specified administrative services to certain of IDT’s foreign subsidiaries. The charges for these services reduce the Company’s “Selling, general and administrative” expense.

| | Three Months Ended | | Six Months Ended | |
|--------------------------------|-----------------------------------|-------|-----------------------------|---------|
| | June 30, | | June 30, | |
| | 2016 | 2015 | 2016 | 2015 |
| | (in thousands) | | | |
| Amount IDT charged the Company | \$502 | \$486 | \$935 | \$1,106 |
| Amount the Company charged IDT | \$155 | \$121 | \$274 | \$260 |

Note 9—Business Segment Information

The Company owns 99.3% of its subsidiary, GEIC, which owns 100% of GRE and 92% of GOGAS. The Company has three reportable business segments: GRE, GOGAS and Afek. GRE owns REPs including IDT Energy and Residents Energy, and energy brokerage and marketing services. Its REP businesses resell electricity and natural gas to residential and small business customers primarily in the Eastern United States. GOGAS is an oil and gas exploration company. The GOGAS segment is comprised of oil shale projects including (1) an 88.3% interest in Genie Mongolia, an oil shale exploration project in Central Mongolia, which is inactive, (2) a 98.3% interest in AMSO, which operates AMSO, LLC, an oil shale development project in Colorado that is being decommissioned, and (3) an 86.1% interest in IEL, an oil shale development project in Israel, which is inactive. The Company has an 86.2% interest in Afek, which operates an oil and gas exploration project in the Golan Heights in Northern Israel. GRE has outstanding deferred stock units granted to officers and employees that represent an interest of 2.6% of the equity of GRE. Corporate costs include unallocated compensation, consulting fees, legal fees, business development expense and other corporate-related general and administrative expense. Corporate does not generate any revenues, nor does it incur any cost of revenues.

The Company's reportable segments are distinguished by types of service, customers and methods used to provide their services. The operating results of these business segments are regularly reviewed by the Company's chief operating decision maker.

The accounting policies of the segments are the same as the accounting policies of the Company as a whole. The Company evaluates the performance of its business segments based primarily on income (loss) from operations. There are no significant asymmetrical allocations to segments.

Operating results for the business segments of the Company were as follows:

| (in thousands) | GRE | Afek | GOGAS | Corporate | Total |
|-------------------------------------|-----------|---------|----------|-----------|-----------|
| Three Months Ended June 30, 2016 | | | | | |

Note 10—Commitments and Contingencies

Legal Proceedings

On March 13, 2014, named plaintiff, Anthony Ferrare, commenced a putative class-action lawsuit against IDT Energy, Inc. in the Court of Common Pleas of Philadelphia County, Pennsylvania. The complaint was served on IDT Energy on July 16, 2014. The named plaintiff filed the suit on behalf of himself and other former and current electric customers of IDT Energy in Pennsylvania with variable rate plans, whom he contends were injured as a result of IDT Energy's allegedly unlawful sales and marketing practices. On August 7, 2014, IDT Energy removed the case to the United States District Court for the Eastern District of Pennsylvania. On October 20, 2014, IDT Energy moved to stay or, alternatively, dismiss the complaint, as amended, by the named plaintiff. On November 10, 2014, the named plaintiff opposed IDT Energy's motion to dismiss and IDT Energy filed a reply memorandum of law in further support of its motion to dismiss. On June 10, 2015, the Court granted IDT Energy's motion to stay and denied its motion to dismiss without prejudice. The Company believes that the claims in this lawsuit are without merit and intends to vigorously defend the action.

On June 20, 2014, the Pennsylvania Attorney General's Office ("AG") and the Acting Consumer Advocate ("OCA") filed a Joint Complaint against IDT Energy, Inc. with the Pennsylvania Public Utility Commission ("PUC"). In the Joint Complaint, the AG and the OCA allege, among other things, various violations of Pennsylvania's Unfair Trade Practices and Consumer Protection Law, the Telemarketing Registration Act and the Pennsylvania PUC's regulations. IDT Energy reached an agreement in principle on a settlement with the AG and the OCA to terminate the litigation with no admission of liability or finding of wrongdoing by IDT Energy. On August 4, 2015, IDT Energy, the AG, and the OCA filed a Joint Petition to the Pennsylvania PUC seeking approval of the settlement terms. Under the settlement, IDT Energy will issue additional refunds to its Pennsylvania customers who had variable rates for electricity supply in January, February and March of 2014. IDT Energy will also implement certain modifications to its sales, marketing and customer service processes, along with additional compliance and reporting requirements. The settlement was approved by the Pennsylvania PUC on July 8, 2016, and in July 2016, the additional customer refunds agreed to in the settlement in the amount of \$2.4 million were issued.

On July 2, 2014, named plaintiff, Louis McLaughlin, filed a putative class-action lawsuit against IDT Energy, Inc. in the United States District Court for the Eastern District of New York, contending that he and other class members were injured as a result of IDT Energy's allegedly unlawful sales and marketing practices. The named plaintiff filed the suit on behalf of himself and two subclasses: all IDT Energy customers who were charged a variable rate for their energy from July 2, 2008, and all IDT Energy customers who participated in IDT Energy's rebate program from July 2, 2008. On December 19, 2014, IDT Energy filed a motion to dismiss the complaint. On December 9, 2015, the Court denied IDT Energy's motion to dismiss without prejudice so as to allow McLaughlin to file an amended complaint. On January 22, 2016, the named plaintiff filed an amended complaint on behalf of himself and all IDT Energy customers in New York State against IDT Energy, Inc., Genie Retail Energy, Genie Energy International Corporation, and Genie Energy Ltd. (collectively, "IDT Energy"). Subsequently, on February 22, 2016, IDT Energy moved to dismiss the amended complaint. The named plaintiff opposed that motion and the parties are currently awaiting a decision from the Court. In the meantime, the parties are engaged in limited discovery. The Company believes that the claims in the amended complaint are without merit and intends to vigorously defend the action.

On July 15, 2014, named plaintiff, Kimberly Aks, commenced a putative class-action lawsuit against IDT Energy, Inc. in New Jersey Superior Court, Essex County, contending that she and other class members were injured as a result of IDT Energy's alleged unlawful sales and marketing practices. The named plaintiff filed the suit on behalf of herself and all other New Jersey residents who were IDT Energy customers at any time between July 11, 2008 and the present. On November 6, 2014, the Court denied IDT Energy's motion to dismiss the complaint and the parties are currently engaged in discovery. On April 20, 2016, the named plaintiff filed an amended complaint on behalf of herself and all IDT Energy customers in New Jersey against IDT Energy, Inc., Genie Retail Energy, Genie Energy International Corporation and Genie Energy Ltd. On June 27, 2016, defendants Genie Retail Energy, Genie Energy International Corporation and Genie Energy Ltd. filed a motion to dismiss the amended complaint. The Company believes that the claims in the amended complaint are also without merit and intends to vigorously defend the action.

At June 30, 2016, the Company had an aggregate of \$2.6 million accrued for the complaints and lawsuits described above.

In addition to the above, the Company may from time to time be subject to legal proceedings that arise in the ordinary course of business. Although there can be no assurance in this regard, the Company does not expect any of those legal proceedings to have a material adverse effect on the Company's results of operations, cash flows or financial condition.

New York Public Service Commission Orders

On February 23, 2016, the New York Public Service Commission ("PSC") issued an order that sought to impose significant new restrictions on REPs operating in New York, including those owned by GRE. The restrictions described in the PSC's order, which were to become effective March 4, 2016, would require that all REPs' electricity and natural gas offerings to residential and small business customers include an annual guarantee of savings compared to the price charged by the relevant incumbent utility or, for electricity offerings, provide at least 30% of the supply from renewable sources. Customers not enrolled in a compliant program would be relinquished back to the local utility at the end of their contract period or, for variable price customers operating on month to month agreements, at the end of the current monthly billing cycle.

On March 4, 2016, a group of parties from the REP industry sought and won a temporary restraining order to stay implementation of the most restrictive portions of the PSC's order pending a court hearing on those parties' motion for a preliminary injunction. On July 25, 2016, the New York State Supreme Court, County of Albany, entered a decision and order granting the Petitioners' petition, vacated provisions 1 through 3 of the Reset Order, and remitted the matter to the PSC for further proceedings consistent with the court's order.

The Company is evaluating the potential impact of any new order from the PSC in response to the court's vacating of the PSC's order on its New York operations, while preparing to operate in compliance with any new requirements that may be imposed. Depending on the final language of any new order, as well as the Company's ability to modify its relationships with its New York customers, an order could have a substantial impact upon the operations of GRE-owned REPs in New York.

On July 14, 2016, the PSC issued an Order restricting REPs, including those owned by GRE, from servicing low income customers in New York, as that term is defined in the Order. The Company is evaluating the potential impact of that Order on its New York operations, while preparing to operate in compliance with any new requirements.

Purchase Commitments

The Company had purchase commitments of \$12.1 million at June 30, 2016. The purchase commitments outstanding at June 30, 2016 are expected to be paid as follows: \$11.1 million in the twelve months ending June 30, 2017 and \$1.0 million in the twelve months ending June 30, 2018.

Renewable Energy Credits

GRE must obtain a certain percentage or amount of its power supply from renewable energy sources in order to meet the requirements of renewable portfolio standards in the states in which it operates. This requirement may be met by obtaining renewable energy credits that provide evidence that electricity has been generated by a qualifying renewable facility or resource. At June 30, 2016, GRE had commitments to purchase renewable energy credits of \$43.1 million.

Tax Audits

The Company is subject to audits in various jurisdictions for various taxes. Amounts asserted by taxing authorities or the amount ultimately assessed against the Company could be greater than accrued amounts. Accordingly, additional provisions may be recorded in the future as revised estimates are made or underlying matters are settled or resolved. Imposition of assessments as a result of tax audits could have an adverse effect on the Company's results of operations, cash flows and financial condition.

Letters of Credit

At June 30, 2016, the Company had letters of credit outstanding totaling \$8.2 million primarily for the benefit of regional transmission organizations that coordinate the movement of wholesale electricity and for certain utility companies. The letters of credit outstanding at June 30, 2016 expire as follows: \$7.7 million in the twelve months ending June 30, 2017 and \$0.5 million in the twelve months ending June 30, 2018.

Performance Bonds

GRE has performance bonds issued through a third party for the benefit of various states in order to comply with the states' financial requirements for REPs. At June 30, 2016, GRE had aggregate performance bonds of \$12.9 million outstanding.

Other Contingencies

As of November 19, 2015, IDT Energy and certain of its affiliates entered into an Amended and Restated Preferred Supplier Agreement with BP Energy Company ("BP"). The agreement's termination date is November 30, 2019, except either party may terminate the agreement on November 30, 2018 by giving the other party notice by May 31, 2018. Under the agreement, IDT Energy purchases electricity and natural gas at market rate plus a fee. IDT Energy's obligations to BP are secured by a first security interest in deposits or receivables from utilities in connection with their purchase of IDT Energy's customer's receivables, and in any cash deposits or letters of credit posted in connection with any collateral accounts with BP. IDT Energy's ability to purchase electricity and natural gas under this agreement is subject to satisfaction of certain conditions including the maintenance of certain covenants. At June 30, 2016, the Company was in compliance with such covenants. At June 30, 2016, restricted cash—short-term of \$0.2 million and trade accounts receivable of \$26.0 million were pledged to BP as collateral for the payment of IDT Energy's trade accounts payable to BP of \$8.5 million at June 30, 2016.

Note 11—Revolving Lines of Credit

On December 17, 2015, GRE, IDT Energy and certain affiliates entered into a Credit Agreement with Maple Bank GmbH for a revolving loan facility. On December 17, 2015, GRE borrowed \$2.0 million under the facility. In February 2016, the German banking regulator, Bafin, closed Maple Bank GmbH due to impending financial over-indebtedness related to tax-evasion investigations. Therefore, the revolving line of credit is not available for future borrowings. The collateral for the revolving loan consists of the borrowers' receivables, the balances in certain bank accounts and certain commercial and intangible rights. Outstanding principal amount incurs interest at LIBOR plus 3.5% per annum. Interest is payable monthly and all outstanding principal and any accrued and unpaid interest is due on the maturity date of December 17, 2018.

As of April 23, 2012, the Company and IDT Energy entered into a Loan Agreement with JPMorgan Chase Bank for a revolving line of credit for up to a maximum principal amount of \$25.0 million. The proceeds from the line of credit may be used to provide working capital and for the issuance of letters of credit. The Company agreed to deposit cash in a money market account at JPMorgan Chase Bank as collateral for the line of credit equal to the greater of (a) \$10.0 million or (b) the sum of the amount of letters of credit outstanding plus the outstanding principal under the revolving note. The Company is not permitted to withdraw funds or exercise any authority over the required balance in the collateral account. The principal outstanding will bear interest at the lesser of (a) the LIBOR rate multiplied by the statutory reserve rate established by the Board of Governors of the Federal Reserve System plus 1.0% per annum, or (b) the maximum rate per annum permitted by whichever of applicable federal or Texas laws permit the higher interest rate. Interest is payable at least every three months and all outstanding principal and any accrued and unpaid interest is due on the maturity date of May 31, 2017. The Company pays a quarterly unused commitment fee of 0.08% per annum on the difference between \$25.0 million and the average daily outstanding principal balance of the note. In

addition, as of April 23, 2012, GEIC issued a Corporate Guaranty to JPMorgan Chase Bank whereby GEIC unconditionally guarantees the full payment of all indebtedness of the Company and IDT Energy under the Loan Agreement. At June 30, 2016 and December 31, 2015, there were no amounts borrowed under the line of credit, and cash collateral of \$10.0 million was included in “Restricted cash—short-term” in the consolidated balance sheet. In addition, at June 30, 2016 and December 31, 2015, letters of credit of \$8.2 million and \$7.7 million, respectively, were outstanding.

Note 12—Recently Issued Accounting Standards Not Yet Adopted

In May 2014, the Financial Accounting Standards Board (“FASB”) and the International Accounting Standards Board jointly issued a comprehensive new revenue recognition standard that will supersede most of the current revenue recognition guidance under U.S. GAAP and International Financial Reporting Standards (“IFRS”). The goals of the revenue recognition project were to clarify and converge the revenue recognition principles under U.S. GAAP and IFRS and to develop guidance that would streamline and enhance revenue recognition requirements. The Company will adopt this standard on January 1, 2018. Entities have the option of using either a full retrospective or modified retrospective approach for the adoption of the standard. The Company is evaluating the impact that the standard will have on its consolidated financial statements.

In July 2015, the FASB issued an Accounting Standards Update (“ASU”) that simplifies the subsequent measurement of inventory. The amendments in this ASU do not apply to inventory that is measured using last-in, first-out or the retail inventory method. The ASU changes the measurement of inventory to the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less reasonably predictable costs of completion, disposal and transportation. The Company measures GRE’s natural gas inventory at weighted average cost. The Company will adopt the amendments in this ASU on January 1, 2017. The Company is evaluating the impact that the ASU will have on its consolidated financial statements.

In January 2016, the FASB issued an ASU to provide more information about recognition, measurement, presentation and disclosure of financial instruments. The amendments in the ASU include, among other changes, the following: (1) equity investments (except those accounted for under the equity method or that result in consolidation) will be measured at fair value with changes in fair value recognized in net income, (2) a qualitative assessment each reporting period to identify impairment of equity investments without readily determinable fair values, (3) financial assets and financial liabilities will be presented separately by measurement category and form of financial asset on the balance sheet or the notes to the financial statements, and (4) an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale securities in combination with the entity’s other deferred tax assets. Entities will no longer be able to recognize unrealized holding gains and losses on equity securities classified as available-for-sale in other comprehensive income. In addition, a practicability exception will be available for equity investments that do not have readily determinable fair values and do not qualify for the net asset value practical expedient. These investments may be measured at cost, less any impairment, plus or minus changes resulting from observable price changes in orderly transactions for an identical or similar investment of the same issuer. Entities will have to reassess at each reporting period whether an investment qualifies for this practicability exception. The Company will adopt the amendments in this ASU on January 1, 2018. The Company is evaluating the impact that the ASU will have on its consolidated financial statements.

In February 2016, the FASB issued an ASU related to the accounting for leases. The new standard establishes a right-of-use (“ROU”) model that requires a lessee to record a ROU asset and a lease liability on the balance sheet for all leases with terms longer than 12 months. Leases will be classified as either finance or operating, with classification

affecting the pattern of expense recognition in the income statement. The Company will adopt the new standard on January 1, 2019. A modified retrospective transition approach is required for lessees for capital and operating leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements, with certain practical expedients available. The Company is evaluating the impact that the new standard will have on its consolidated financial statements.

In March 2016, the FASB issued an ASU to improve the accounting for employee share-based payments. The new standard simplifies several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The Company will adopt the new standard on January 1, 2017. The Company is evaluating the impact that the new standard will have on its consolidated financial statements.

In June 2016, the FASB issued an ASU that changes the impairment model for most financial assets and certain other instruments. For receivables, loans and other instruments, entities will be required to use a new forward-looking “expected loss” model that generally will result in the earlier recognition of allowance for losses. For available-for-sale debt securities with unrealized losses, entities will measure credit losses in a manner similar to current practice, except the losses will be recognized as allowances instead of reductions in the amortized cost of the securities. In addition, an entity will have to disclose significantly more information about allowances, credit quality indicators and past due securities. The new provisions will be applied as a cumulative-effect adjustment to retained earnings. The Company will adopt the new standard on January 1, 2020. The Company is evaluating the impact that the new standard will have on its consolidated financial statements.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following information should be read in conjunction with the accompanying consolidated financial statements and the associated notes thereto of this Quarterly Report, and the audited consolidated financial statements and the notes thereto and our Management’s Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K for the year ended December 31, 2015, as filed with the U.S. Securities and Exchange Commission (or SEC).

As used below, unless the context otherwise requires, the terms “the Company,” “Genie,” “we,” “us,” and “our” refer to Genie Energy Ltd., a Delaware corporation, and its subsidiaries, collectively.

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, including statements that contain the words “believes,” “anticipates,” “expects,” “plans,” “intends,” and similar words and phrases. These forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from the results projected in any forward-looking statement. In addition to the factors specifically noted in the forward-looking statements, other important factors, risks and uncertainties that could result in those differences include, but are not limited to, those discussed under Item 1A to Part I “Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2015 and in Item 1A to Part II “Risk Factors” in this Form 10-Q. The forward-looking statements are made as of the date of this report and we assume no obligation to update the forward-looking statements, or to update the reasons why actual results could differ from those projected in the forward-looking statements. Investors should consult all of the information set forth in this report and the other information set forth from time to time in our reports filed with the SEC pursuant to the Securities Act of 1933 and the Securities Exchange Act of 1934, including our Annual Report on Form 10-K for the year ended December 31, 2015.

Overview

We own 99.3% of our subsidiary, Genie Energy International Corporation, or GEIC, which owns 100% of Genie Retail Energy, or GRE, and 92% of Genie Oil and Gas, Inc., or GOGAS. Our principal businesses consist of the following:

Genie Retail Energy owns retail energy providers, or REPs, including IDT Energy, Inc., or IDT Energy, and Residents Energy, Inc., or Residents Energy, and energy brokerage and marketing services. Its REP businesses resell electricity and natural gas to residential and small business customers primarily in the Eastern United States; and

Genie Oil and Gas is an oil and gas exploration company that consists of:

an 86.2% interest in Afek Oil and Gas, Ltd., or Afek, which operates an exploration project in the Golan Heights in Northern Israel, and

other projects including (1) an 88.3% interest in Genie Mongolia, Inc., or Genie Mongolia, an oil shale exploration project in Central Mongolia, which is inactive, (2) a 98.3% interest in American Shale Oil Corporation, or AMSO, which operates American Shale Oil, L.L.C., or AMSO, LLC, an oil shale development project in Colorado that is being decommissioned, and (3) an 86.1% interest in Israel Energy Initiatives, Ltd., or IEL, an oil shale development project in Israel, which is inactive.

GRE has outstanding deferred stock units granted to officers and employees that represent an interest of 2.6% of the equity of GRE.

On March 23, 2016, Total S.A., or Total, gave AMSO its notice of withdrawal from AMSO, LLC. The withdrawal was effective on April 30, 2016.

As part of our ongoing business development efforts, we continuously seek out new opportunities, which may include complementary operations or businesses that reflect horizontal or vertical expansion from our current operations. Some of these potential opportunities are considered briefly and others are examined in further depth. In particular, we seek out acquisitions to expand the geographic scope and size of our REP businesses, and additional energy exploration projects to diversify our GOGAS unit's operations, among geographies, technologies and resources.

Genie Retail Energy

Seasonality and Weather

The weather and the seasons, among other things, affect GRE's revenues. Weather conditions have a significant impact on the demand for natural gas used for heating and electricity used for heating and cooling. Typically, colder winters increase demand for natural gas and electricity, and hotter summers increase demand for electricity. Milder winters and/or summers have the opposite effects. Natural gas revenues typically increase in the first quarter due to increased heating demands and electricity revenues typically increase in the third quarter due to increased air conditioning use. Approximately 64% and 59% of GRE's natural gas revenues for the relevant years were generated in the first quarter of 2015 and 2014, respectively, when demand for heating was highest. Although the demand for electricity is not as seasonal as natural gas (due, in part, to usage of electricity for both heating and cooling), approximately 30% and 20% of GRE's electricity revenues for the relevant years were generated in the third quarter of 2015 and 2014, respectively. Because of dramatic increases in wholesale electricity prices in January and February 2014, the retail electricity prices that the GRE-owned REPs and many other variable rate electricity suppliers charged to their customers also increased sharply. As a result, approximately 45% of GRE's electricity revenues in 2014 were generated in the first quarter of 2014. Our revenues and operating income are subject to material seasonal variations, and the interim financial results are not necessarily indicative of the estimated financial results for the full year.

Concentration of Customers and Associated Credit Risk

The GRE-owned REPs reduce their customer credit risk by participating in purchase of receivable, or POR, programs for a majority of their receivables. In addition to providing billing and collection services, utility companies purchase those REPs' receivables and assume all credit risk without recourse to those REPs. The GRE-owned REPs' primary credit risk is therefore nonpayment by the utility companies. Certain of the utility companies represent significant portions of our consolidated revenues and consolidated gross trade accounts receivable balance and such concentrations increase our risk associated with nonpayment by those utility companies.

The following table summarizes the percentage of consolidated revenues from customers by utility company that equal or exceed 10% of our consolidated revenues in the period (no other single utility company accounted for 10% or greater of our consolidated revenues in these periods):

**Six
Months
Ended**

| | June 30, | |
|-------------------|-----------------|-------------|
| | 2016 | 2015 |
| Con Edison | 20% | 21% |
| ComEd | 12% | na |
| National Grid USA | 10% | 13% |

na-less than 10% of consolidated revenue in the period

The following table summarizes the percentage of consolidated gross trade accounts receivable by utility company that equal or exceed 10% of consolidated gross trade accounts receivable at June 30, 2016 and December 31, 2015 (no other single utility company accounted for 10% or greater of our consolidated gross trade accounts receivable at June 30, 2016 or December 31, 2015):

| | June 30, 2016 | | December 31, 2015 | |
|------------|----------------------|--|--------------------------|--|
| Con Edison | 24% | | 25% | |

New York Public Service Commission Orders

On February 23, 2016, the New York Public Service Commission, or PSC, issued an order that sought to impose significant new restrictions on REPs operating in New York, including those owned by GRE. The restrictions described in the PSC's order, which were to become effective March 4, 2016, would require that all REPs' electricity and natural gas offerings to residential and small business customers include an annual guarantee of savings compared to the price charged by the relevant incumbent utility or, for electricity offerings, provide at least 30% of the supply from renewable sources. Customers not enrolled in a compliant program would be relinquished back to the local utility at the end of their contract period or, for variable price customers operating on month to month agreements, at the end of the current monthly billing cycle.

On March 4, 2016, a group of parties from the REP industry sought and won a temporary restraining order to stay implementation of the most restrictive portions of the PSC's order pending a court hearing on those parties' motion for a preliminary injunction. On July 25, 2016, the New York State Supreme Court, County of Albany, entered a decision and order granting the Petitioners' petition, vacated provisions 1 through 3 of the Reset Order, and remitted the matter to the PSC for further proceedings consistent with the court's order.

We are evaluating the potential impact of any new order from the PSC in response to the court's vacating of the PSC's order on our New York operations, while preparing to operate in compliance with any new requirements that may be imposed. Depending on the final language of any new order, as well as our ability to modify our relationships with our New York customers, an order could have a substantial impact upon the operations of GRE-owned REPs in New York.

On July 14, 2016, the PSC issued an Order restricting REPs, including those owned by GRE, from servicing low income customers in New York, as that term is defined in the Order. We are evaluating the potential impact of that Order on our New York operations, while preparing to operate in compliance with any new requirements.

Afek Oil and Gas, Ltd.

In April 2013, the Government of Israel finalized the award to Afek of an exclusive three year petroleum exploration license covering 396.5 square kilometers in the southern portion of the Golan Heights. On February 1, 2016, Israel's Northern District Planning and Building Committee approved a two-year permit extension for Afek to continue to conduct its up to ten-well oil and gas exploration program. This extension is expected to cover the remainder of Afek's ongoing exploration program in the area covered by its exploration license. In April 2016, Afek received an extension of its license from the Israeli Ministry of Energy and Water through April 9, 2017. Afek is conducting a multi-well oil and gas exploration program pursuant to that license.

In February 2015, Afek began drilling its first exploratory well in Northern Israel's Golan Heights. To date, Afek has completed drilling five wells. In 2016, Afek completed well-flow test operations at its Devorah 1 (Ness 2) well, its second well-flow test site. The data obtained from the well-flow tests, in conjunction with the results from the five exploratory wells, their log results and core samples, are being evaluated by Afek's scientific team and independent experts. Their analysis is intended to assess potential techniques to extract oil and gas samples from preserved core samples and to construct an initial reservoir model. The analysis may continue for the remainder of the calendar year. The findings will be used to determine the next steps in the exploratory program. The resources identified to date do not constitute proved, probable or possible reserves.

As part of its analysis, Afek is working to better understand the geology in the lightly explored Northern region of its license area. Afek is now reprocessing the limited seismic data that was run in this region many years ago to incorporate the results to date from its exploratory program. Once the data has been fully reinterpreted, Afek may conduct additional work in this region. Potential next steps could include additional 2-D seismic lines and/or drilling a new exploratory well.

Afek is seeking financing from a variety of sources to support further exploration activities, some of which could result in a process by which Afek would become an independent entity.

Afek assesses the economic and operational viability of its project on an ongoing basis, and to date believes that sufficient progress is being made. The assessment requires significant estimates and assumptions by management. Should our estimates or assumptions regarding the recoverability of the capitalized exploration costs prove to be incorrect, we may be required to record impairments of such costs in future periods and such impairments could be material.

Investment in American Shale Oil, LLC

AMSO, LLC holds a research, development and demonstration lease awarded by the U.S. Bureau of Land Management that covers an area of 160 acres in western Colorado. Through April 30, 2016, we accounted for our ownership interest in AMSO, LLC using the equity method since we had the ability to exercise significant influence over its operating and financial matters, although we did not control AMSO, LLC. AMSO, LLC was a variable interest entity, however, we determined that we were not the primary beneficiary.

On February 23, 2016, Total notified AMSO of its decision not to continue to fund AMSO, LLC. On March 23, 2016, Total gave AMSO its notice of withdrawal from AMSO, LLC. The withdrawal was effective on April 30, 2016. We are currently decommissioning the project. As of April 1, 2016, AMSO and Total agreed that Total would pay AMSO, LLC \$3.0 million as full payment of its share of all costs associated with the decommissioning, winding up and dissolution of AMSO, LLC. Total will not be refunded any amount if the decommissioning costs are less than \$3.0 million. Effective April 30, 2016, AMSO, LLC's assets, liabilities, results of operations and cash flows are included in our consolidated financial statements.

We accounted for our acquisition on April 30, 2016 of Total's ownership interest in AMSO, LLC as a business combination. We estimated the fair value of AMSO, LLC to be nil, as it had ceased operations and its shutdown was in progress. We recognized a gain from the acquisition of Total's interest in AMSO, LLC because we acquired the net assets of AMSO, LLC while no consideration was transferred by us, due to our assumption of the risk associated with the shutdown obligations. The gain also included our gain on the remeasurement of AMSO's investment in AMSO, LLC at its acquisition date fair value. The aggregate gain recognized was \$1.3 million, which was included in "Gain on consolidation of AMSO, LLC" in the consolidated statements of operations.

Critical Accounting Policies

Our consolidated financial statements and accompanying notes are prepared in accordance with accounting principles generally accepted in the United States of America, or U.S. GAAP. Our significant accounting policies are described in Note 1 to the consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2015. The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses as well as the disclosure of contingent assets and liabilities. Critical accounting policies are those that require application of management's most subjective or complex judgments, often as a result of matters that are inherently uncertain and may change in subsequent periods. Our critical accounting policies include those related to the allowance for doubtful accounts, goodwill, oil and gas accounting and income taxes. Management bases its estimates and judgments on historical experience and other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions. For additional discussion of our critical accounting policies, see our Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the year ended December 31, 2015.

Recently Issued Accounting Standards Not Yet Adopted

In May 2014, the Financial Accounting Standards Board, or FASB, and the International Accounting Standards Board jointly issued a comprehensive new revenue recognition standard that will supersede most of the current revenue recognition guidance under U.S. GAAP and International Financial Reporting Standards, or IFRS. The goals of the revenue recognition project were to clarify and converge the revenue recognition principles under U.S. GAAP and IFRS and to develop guidance that would streamline and enhance revenue recognition requirements. We will adopt this standard on January 1, 2018. Entities have the option of using either a full retrospective or modified retrospective approach for the adoption of the standard. We are evaluating the impact that the standard will have on our consolidated financial statements.

In July 2015, the FASB issued an Accounting Standards Update, or ASU, that simplifies the subsequent measurement of inventory. The amendments in this ASU do not apply to inventory that is measured using last-in, first-out or the retail inventory method. The ASU changes the measurement of inventory to the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less reasonably predictable costs of completion, disposal and transportation. We measure GRE's natural gas inventory at weighted average cost. We will adopt the amendments in this ASU on January 1, 2017. We are evaluating the impact that the ASU will have on our consolidated financial statements.

In January 2016, the FASB issued an ASU to provide more information about recognition, measurement, presentation and disclosure of financial instruments. The amendments in the ASU include, among other changes, the following: (1)

equity investments (except those accounted for under the equity method or that result in consolidation) will be measured at fair value with changes in fair value recognized in net income, (2) a qualitative assessment each reporting period to identify impairment of equity investments without readily determinable fair values, (3) financial assets and financial liabilities will be presented separately by measurement category and form of financial asset on the balance sheet or the notes to the financial statements, and (4) an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale securities in combination with the entity's other deferred tax assets. Entities will no longer be able to recognize unrealized holding gains and losses on equity securities classified as available-for-sale in other comprehensive income. In addition, a practicability exception will be available for equity investments that do not have readily determinable fair values and do not qualify for the net asset value practical expedient. These investments may be measured at cost, less any impairment, plus or minus changes resulting from observable price changes in orderly transactions for an identical or similar investment of the same issuer. Entities will have to reassess at each reporting period whether an investment qualifies for this practicability exception. We will adopt the amendments in this ASU on January 1, 2018. We are evaluating the impact that the ASU will have on our consolidated financial statements.

In February 2016, the FASB issued an ASU related to the accounting for leases. The new standard establishes a right-of-use ("ROU") model that requires a lessee to record a ROU asset and a lease liability on the balance sheet for all leases with terms longer than 12 months. Leases will be classified as either finance or operating, with classification affecting the pattern of expense recognition in the income statement. We will adopt the new standard on January 1, 2019. A modified retrospective transition approach is required for lessees for capital and operating leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements, with certain practical expedients available. We are evaluating the impact that the new standard will have on our consolidated financial statements.

In March 2016, the FASB issued an ASU to improve the accounting for employee share-based payments. The new standard simplifies several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. We will adopt the new standard on January 1, 2017. We are evaluating the impact that the new standard will have on our consolidated financial statements.

In June 2016, the FASB issued an ASU that changes the impairment model for most financial assets and certain other instruments. For receivables, loans and other instruments, entities will be required to use a new forward-looking “expected loss” model that generally will result in the earlier recognition of allowance for losses. For available-for-sale debt securities with unrealized losses, entities will measure credit losses in a manner similar to current practice, except the losses will be recognized as allowances instead of reductions in the amortized cost of the securities. In addition, an entity will have to disclose significantly more information about allowances, credit quality indicators and past due securities. The new provisions will be applied as a cumulative-effect adjustment to retained earnings. We will adopt the new standard on January 1, 2020. We are evaluating the impact that the new standard will have on our consolidated financial statements.

Results of Operations

We evaluate the performance of our operating business segments based primarily on income (loss) from operations. Accordingly, the income and expense line items below income (loss) from operations are only included in our discussion of the consolidated results of operations.

Three and Six Months Ended June 30, 2016 Compared to Three and Six Months Ended June 30, 2015

Genie Retail Energy Segment

In our results of operations, \$0.6 million and \$1.3 million previously included in “Financing fees” in the three and six months ended June 30, 2015, respectively, were reclassified to “Cost of revenues” to conform to the current year’s presentation.

| | Three months ended June 30, | | Change | | Six months ended June 30, | | Change | |

nm—not meaningful

Revenues. GRE's electricity revenue increased in the three and six months ended June 30, 2016 compared to the same periods in 2015 because of an increase in electricity consumption, which increased 5.4% and 3.9% in the three and six months ended June 30, 2016, respectively, compared to the same periods in 2015. The increase in electricity consumption was primarily the result of increases in meters served, which increased 11.5% and 11.1% in the three and six months ended June 30, 2016, respectively, compared to the same periods in 2015. The increase in GRE's electricity revenue in the three months ended June 30, 2016 compared to the same period in 2015 was also due to an increase in the average rate charged to customers for electricity, which increased 5.9% in the three months ended June 30, 2016 compared to the same period in 2015, although average consumption per meter decreased 5.5% in the three months ended June 30, 2016 compared to the same period in 2015. The increase in GRE's electricity revenue in the six months ended June 30, 2016 compared to the same period in 2015 was partially offset by a decrease in the average rate charged to customers for electricity, which decreased 2.6% in the six months ended June 30, 2016 compared to the same period in 2015. In addition, average consumption per meter decreased 6.4% in the six months ended June 30, 2016 compared to the same period in 2015.

GRE's natural gas revenue increased in the three months ended June 30, 2016 compared to the same period in 2015 because of an increase in natural gas consumption, which increased 17.6% in the three months ended June 30, 2016 compared to the same period in 2015. The increase in natural gas consumption was caused by the 17.9% increase in average consumption per meter in the three months ended June 30, 2016 compared to the same period in 2015. The increase in GRE's natural gas revenue was partially offset by decreases in the average rate charged to customers for natural gas and meters served, which decreased 1.9% and 0.2%, respectively, in the three months ended June 30, 2016 compared to the same period in 2015.

GRE's natural gas revenue decreased in the six months ended June 30, 2016 compared to the same period in 2015 because of decreases in both the average rate charged to customers and natural gas consumption. The average rate charged to customers for natural gas decreased 25.4% in the six months ended June 30, 2016 compared to the same period in 2015. This decrease was mostly due to a 33.3% decrease in the underlying commodity cost in the six months ended June 30, 2016 compared to the same period in 2015. Natural gas consumption decreased 17.7% in the six months ended June 30, 2016 compared to the same period in 2015. The decrease in natural gas consumption was partially the result of a decrease in meters served, which decreased 0.7% in the six months ended June 30, 2016 compared to the same period in 2015, and the 17.1% decrease in average consumption per meter in the six months ended June 30, 2016 compared to the same period in 2015.

The customer base for the GRE-owned REPs as measured by meters served consisted of the following:

| | June 30, 2016 | March 31, 2016 | December 31, 2015 | September 30, 2015 | June 30, 2015 |
|---------------------------|---------------------|----------------------|----------------------|-----------------------|---------------------|
| | (in thousands) | | | | |
| Meters at end of quarter: | | | | | |
| Electricity customers | 268 | 267 | 264 | 261 | 250 |
| Natural gas customers | 122 | 126 | 128 | 127 | 127 |
| Total meters | 390 | 393 | 392 | 388 | 377 |

Gross meter acquisitions in the three months ended June 30, 2016 and 2015 were 58,000 and 79,000, respectively. Gross meter acquisitions in the six months ended June 30, 2016 and 2015 were 123,000 and 131,000, respectively. In 2016 and 2015, the GRE-owned REPs had success in selling “IDT Energy® SmartBudget” and other offerings with fixed rate characteristics. Net meters served decreased by 3,000 or 0.9% in the three months ended June 30, 2016 compared to an increase of 19,000 or 5.3% in the three months ended June 30, 2015, and decreased by 2,000 or 0.7% in the six months ended June 30, 2016 compared to an increase of 14,000 or 4.0% in the six months ended June 30, 2015 mostly due to the decrease in gross meter acquisitions. Average monthly churn decreased from 6.3% in the three months ended June 30, 2015 to 6.2% in the three months ended June 30, 2016, and increased from 6.1% in the six months ended June 30, 2015 to 6.3% in the six months ended June 30, 2016. Average monthly churn in 2016 was generally consistent with the prior three calendar quarters reflecting the successful introduction of the pricing plans with fixed rate characteristics, whereas average monthly churn in the six months ended June 30, 2015 was relatively low primarily due to the low average monthly churn in the three months ended March 31, 2015.

GRE-owned REPs recently began operations in one utility territory in Ohio, and have applications pending to enter into additional utility service areas, primarily electric and dual meter territories, in various locations in the states where we currently operate and in other jurisdictions. We continue to evaluate additional, deregulation-driven opportunities in order to expand our business geographically.

The average rates of annualized energy consumption, as measured by residential customer equivalents, or RCEs, are presented in the chart below. An RCE represents a natural gas customer with annual consumption of 100 mmbtu or an electricity customer with annual consumption of 10 MWh. Because different customers have different rates of energy consumption, RCEs are an industry standard metric for evaluating the consumption profile of a given retail customer base.

| June 30, | March 31, | December 31, 2015 | June 30, |
|-------------|--------------|----------------------|-------------|
|-------------|--------------|----------------------|-------------|

| | 2016 | | | September 30, 2015 | |
|-------------------------|----------------|-------------|-------------|---------------------------|-------------|
| | 2016 | 2016 | 2016 | 2015 | 2015 |
| | (in thousands) | | | | |
| RCEs at end of quarter: | | | | | |
| Electricity customers | 172 | 175 | 178 | 178 | 168 |
| Natural gas customers | 67 | 72 | 81 | 82 | 83 |
| Total RCEs | 239 | 247 | 259 | 260 | 251 |

The increase in electricity customers' RCEs at June 30, 2016 compared to June 30, 2015 primarily reflects the increase in electricity meters served. The decrease in natural gas customers' RCEs at June 30, 2016 compared to June 30, 2015 was primarily due to changing weather patterns and the decline in natural gas meters served.

Other revenue in the three and six months ended June 30, 2016 and 2015 includes revenue earned by Diversegy, LLC, or Diversegy, and IDT Energy Network, or IDTEN (formerly Epiq Energy, LLC), both of which were acquired in December 2013. Diversegy and IDTEN earn commissions, entry fees and other fees from their retail energy advisory and brokerage business and network marketing business, respectively.

Cost of Revenues and Gross Margin Percentage. GRE's cost of revenues and gross margin percentage were as follows:

| | Three months ended | | | | Six months ended | | | |
|------------------------|--------------------|--------|---------------|--------|------------------|--------|---------------|---------|
| | June 30, 2016 | | June 30, 2015 | | June 30, 2016 | | June 30, 2015 | |
| | \$ | % | \$ | % | \$ | % | \$ | % |
| Cost of revenues: | | | | | | | | |
| Electricity | \$22.5 | \$22.8 | \$(0.3) | (1.4)% | \$45.2 | \$60.0 | \$(14.8) | (24.5)% |
| Natural gas | 2.5 | 3.0 | (0.5) | (14.2) | 12.9 | 23.4 | (10.5) | (45.0) |
| Other | 0.2 | 0.3 | (0.1) | (57.4) | 0.3 | 0.7 | (0.4) | (54.5) |
| Total cost of revenues | \$25.2 | \$26.1 | \$(0.9) | (3.6)% | \$58.4 | \$84.1 | \$(25.7) | (30.5)% |

| | Three months ended | | | Six months ended | | |
|-------------------------------|--------------------|---------------|--------|------------------|---------------|--------|
| | June 30, 2016 | June 30, 2015 | Change | June 30, 2016 | June 30, 2015 | Change |
| Gross margin percentage: | | | | | | |
| Electricity | 40.4% | 32.6% | 7.8% | 44.9% | 26.1% | 18.8% |
| Natural gas | 55.9 | 40.8 | 15.1 | 32.8 | 24.9 | 7.9 |
| Other | 68.5 | 51.4 | 17.1 | 60.9 | 55.2 | 5.7 |
| Total gross margin percentage | 42.8% | 34.0% | 8.8% | 42.8% | 26.2% | 16.6% |

Cost of revenue for electricity decreased in the three and six months ended June 30, 2016 compared to the same periods in 2015 primarily because of the 6.4% and 27.4% decreases in the average unit cost of electricity in the three and six months ended June 30, 2016, respectively, compared to the same periods in 2015, partially offset by the 5.4% and 3.9% increases in electricity consumption in the three and six months ended June 30, 2016, respectively, compared to the same periods in 2015. Gross margin on electricity sales increased in the three and six months ended June 30, 2016 compared to the same periods in 2015 because of the declines in cost of revenues for electricity and in the average unit cost of electricity.

Cost of revenue for natural gas decreased in the three months ended June 30, 2016 compared to the same period in 2015 primarily because the average unit cost of natural gas decreased 27.0% in the three months ended June 30, 2016 compared to the same period in 2015, partially offset by the 17.6% increase in natural gas consumption in the three months ended June 30, 2016 compared to the same period in 2015. Cost of revenue for natural gas decreased in the six months ended June 30, 2016 compared to the same period in 2015 because the average unit cost of natural gas decreased 33.3% in the six months ended June 30, 2016 compared to the same period in 2015, and natural gas consumption decreased 17.7% in the six months ended June 30, 2016 compared to the same period in 2015. Gross margin on natural gas sales increased in the three and six months ended June 30, 2016 compared to the same periods in 2015 because the average rate charged to customers decreased less than the average unit cost of natural gas.

Other cost of revenues primarily includes commission expense incurred by Diversegy and IDTEN.

Selling, General and Administrative. The decrease in selling, general and administrative expenses in the three and six months ended June 30, 2016 compared to the same periods in 2015 was primarily due to a decrease in regulatory and legal costs, partially offset by increases in customer acquisition costs and payroll and related expense. In the three and six months ended June 30, 2015, we accrued \$1.5 million and \$2.7 million, respectively, for regulatory and legal matters, including outside counsel fees related to certain complaints and lawsuits described in Note 10 to the Consolidated Financial Statements included in Item 1 to Part I of this Quarterly Report. As a percentage of GRE's total revenues, selling, general and administrative expense decreased from 35.2% in the three months ended June 30, 2015 to 29.4% in the three months ended June 30, 2016, and increased from 24.2% in the six months ended June 30, 2015 to 25.8% in the six months ended June 30, 2016.

Afek Segment

Afek does not currently generate any revenues, nor does it incur any cost of revenues.

| | Three months ended | | | | Six months ended | | | |
|-------------------------------------|---------------------------|-------|---------------|--------|-------------------------|-------|---------------|-------|
| | June 30, | | Change | | June 30, | | Change | |
| | 2016 | 2015 | \$ | % | 2016 | 2015 | \$ | % |
| | (in millions) | | | | | | | |
| General and administrative expenses | \$0.4 | \$0.1 | \$0.3 | 195.8% | \$0.5 | \$0.3 | \$0.2 | 67.8% |
| Exploration | 1.4 | 1.3 | 0.1 | 10.9 | 3.1 | 2.9 | 0.2 | 9.0 |
| Loss from operations | \$1.8 | \$1.4 | \$0.4 | 26.9 % | \$3.6 | \$3.2 | \$0.4 | 12.7% |

General and Administrative. General and administrative expense increased in the three and six months ended June 30, 2016 compared to the same periods in 2015 primarily because of increases in payroll and related expense.

Exploration. In February 2015, Afek began drilling its first exploratory well in Northern Israel's Golan Heights. To date, Afek has completed drilling five wells. In 2016, Afek completed well-flow test operations at its Devorah 1 (Ness 2) well, its second well-flow test site. The data obtained from the well-flow tests, in conjunction with the results from the five exploratory wells, their log results and core samples, are being evaluated by Afek's scientific team and independent experts. The analysis may continue for the remainder of the calendar year. As part of its analysis, Afek is working to better understand the geology in the lightly explored Northern region of its license area. Potential next steps could include additional 2-D seismic lines and/or drilling a new exploratory well.

Afek assesses the economic and operational viability of its project on an ongoing basis, and to date believes that sufficient progress is being made. The assessment requires significant estimates and assumptions by management. Should our estimates or assumptions regarding the recoverability of the capitalized exploration costs prove to be incorrect, we may be required to record impairments of such costs in future periods and such impairments could be material.

Genie Oil and Gas Segment

Genie Oil and Gas does not currently generate any revenues, nor does it incur any cost of revenues. On March 23, 2016, Total gave AMSO its notice of withdrawal from AMSO, LLC. The withdrawal was effective on April 30, 2016. As a result of Total's withdrawal, beginning on April 30, 2016, AMSO, LLC's assets, liabilities, results of operations and cash flows are included in our consolidated financial statements.

| | Three months ended | | | | Six months ended | | | |
|-------------------------------------|--------------------|----------|----------|---------|------------------|----------|--------|--------|
| | June 30, | | Change | | June 30, | | Change | |
| | 2016 | 2015 | \$ | % | 2016 | 2015 | \$ | % |
| | (in millions) | | | | | | | |
| General and administrative expenses | \$ (0.4) | \$ (0.2) | \$ (0.2) | (43.9)% | \$ (0.5) | \$ (0.5) | \$ — | 5.9 % |
| Research and development | (0.1) | (0.6) | 0.5 | 85.0 | (0.2) | (1.2) | 1.0 | 82.5 |
| Gain on consolidation of AMSO, LLC | 1.3 | — | 1.3 | nm | 1.3 | — | 1.3 | nm |

| Income (loss) from operations | \$0.8 | \$ (0.8) | \$ 1.6 | 206.1% | \$0.4 | \$ (1.7) | \$ 2.1 | 121.8% |

nm—not meaningful

General and Administrative. General and administrative expense increased in the three months ended June 30, 2016 compared to the same period in 2015 primarily due to the consolidation of AMSO, LLC's general and administrative expense of \$0.1 million in the three months ended June 30, 2016. General and administrative expense was substantially unchanged in the six months ended June 30, 2016 compared to the same period in 2015 due to a decrease in stock-based compensation expense that was mostly offset by the consolidation of AMSO, LLC's general and administrative expense of \$0.1 million in the six months ended June 30, 2016. We expect in future periods that AMSO, LLC will incur additional costs, such as severance, that could not be accrued at June 30, 2016.

Research and Development. Research and development expense consist of the following:

| | Three months ended June 30, 2016 | | Six months ended June 30, 2015 | |
|---|--|-------|---|-------|
| | 2016 | 2015 | 2016 | 2015 |
| | (in millions) | | | |
| AMSO, LLC | \$0.1 | \$— | \$0.1 | \$— |
| Genie Mongolia | — | 0.5 | 0.1 | 1.0 |
| IEI | — | 0.1 | — | 0.1 |
| Other | — | — | — | 0.1 |
| Total research and development expenses | \$0.1 | \$0.6 | \$0.2 | \$1.2 |

Genie Mongolia's research and development expense in the three and six months ended June 30, 2016 and 2015 related to the joint geological survey agreement with the Republic of Mongolia, which was executed in April 2013, to explore certain of that country's oil shale deposits. In late 2015, we scaled back operations in Mongolia, and in 2016 we suspended our operations.

IEI had an exclusive Shale Oil Exploration and Production License awarded in July 2008 by the Government of Israel. The license was extended until July 2015 when it expired. IEI is evaluating whether and how to exploit the abundant oil shale resource in Israel. Operations at IEI are currently suspended.

Gain on consolidation of AMSO, LLC. On February 23, 2016, Total notified AMSO of its decision not to continue to fund AMSO, LLC. On March 23, 2016, Total gave AMSO its notice of withdrawal from AMSO, LLC. The withdrawal was effective on April 30, 2016. We are currently decommissioning the project. As of April 1, 2016, AMSO and Total agreed that Total would pay AMSO, LLC \$3.0 million as full payment of its share of all costs associated with the decommissioning, winding up and dissolution of AMSO, LLC. Total will not be refunded any amount if the decommissioning costs are less than \$3.0 million. We accounted for our acquisition on April 30, 2016 of Total's ownership interest in AMSO, LLC as a business combination. We estimated the fair value of AMSO, LLC to be nil, as it had ceased operations and its shutdown was in progress. We recognized a gain from the acquisition of Total's interest in AMSO, LLC because we acquired the net assets of AMSO, LLC while no consideration was transferred by us, due to our assumption of the risk associated with the shutdown obligations. The gain also included our gain on the remeasurement of AMSO's investment in AMSO, LLC at its acquisition date fair value. The aggregate gain recognized was \$1.3 million.

Equity in the Net Loss of AMSO, LLC. In part because of AMSO's decisions not to fund all of its share of AMSO, LLC's expenditures in 2014 and 2015, AMSO, LLC allocated its net loss mostly to Total in the three and six months ended June 30, 2016 (until April 30, 2016, the effective date of Total's withdrawal from AMSO, LLC) and entirely to Total in the three and six months ended June 30, 2015. Equity in the net loss of AMSO, LLC was nil in the three months ended June 30, 2016 and 2015, and \$0.2 million and nil in the six months ended June 30, 2016 and 2015, respectively. As a result of Total's withdrawal, beginning on April 30, 2016, AMSO, LLC's results of operations are included in our consolidated financial statements.

Corporate

Corporate does not generate any revenues, nor does it incur any cost of revenues. Corporate costs include unallocated compensation, consulting fees, legal fees, business development expense and other corporate-related general and administrative expense.

| Three months ended | | Change | | Six months ended | | Change | |
|---------------------------|------|---------------|---|-------------------------|------|---------------|---|
| June 30, | | | | June 30, | | | |
| 2016 | 2015 | \$ | % | 2016 | 2015 | \$ | % |
| (in millions) | | | | | | | |

| | | | | | | | |
|--|-------|-------|-------|------|-------|-------|-----------|
| General and administrative expenses and loss from operations | \$2.3 | \$2.2 | \$0.1 | 4.6% | \$4.7 | \$4.7 | \$—(0.3)% |
|--|-------|-------|-------|------|-------|-------|-----------|

The increase in general and administrative expense in the three months ended June 30, 2016 as compared to the same period in 2015 was due primarily to increases in payroll and related expense and professional and consulting fees, partially offset by a decrease in stock-based compensation expense. Corporate general and administrative expense was basically unchanged in the six months ended June 30, 2016 and 2015 because a decrease in stock-based compensation expense was offset by an increase in payroll and related expense. As a percentage of our consolidated revenues, Corporate general and administrative expense decreased from 5.5% in the three months ended June 30, 2015 to 5.2% in the three months ended June 30, 2016, and increased from 4.1% in the six months ended June 30, 2015 to 4.6% in the six months ended June 30, 2016 primarily because of the change in revenues.

Consolidated

Selling, General and Administrative. On October 28, 2011, we were spun-off by IDT Corporation, or IDT, our former parent company (the Spin-Off). Pursuant to an agreement between us and IDT, IDT charges us for services it provides to us, and we charge IDT for services that we provide to certain of IDT's subsidiaries. The amounts that IDT charged us, net of the amounts that we charged IDT, were \$0.3 million and \$0.4 million in the three months ended June 30, 2016 and 2015, respectively, and \$0.7 million and \$0.8 million in the six months ended June 30, 2016 and 2015, respectively, which were included in consolidated selling, general and administrative expense.

Stock-based compensation expense included in consolidated selling, general and administrative expense was \$1.1 million and \$1.6 million in the three months ended June 30, 2016 and 2015, respectively, and \$2.3 million and \$2.8 million in the six months ended June 30, 2016 and 2015, respectively. At June 30, 2016, aggregate unrecognized compensation cost related to non-vested stock-based compensation was \$9.8 million. The unrecognized compensation cost is recognized over the expected service period.

The following is a discussion of our consolidated income and expense line items below income (loss) from operations:

| | Three months ended June 30, | | Change | | Six months ended June 30, | | Change | |
|---|------------------------------------|---------|---------------|---------|----------------------------------|---------|---------------|---------|
| | 2016 | 2015 | \$ | % | 2016 | 2015 | \$ | % |
| | (in millions) | | | | | | | |
| Income (loss) from operations | \$2.6 | \$(4.9) | \$7.5 | 153.7 % | \$9.4 | \$(7.3) | \$16.7 | 228.7 % |
| Interest income | 0.1 | 0.1 | — | 2.0 | 0.2 | 0.2 | — | 7.5 |
| Other expense, net | — | (0.1) | 0.1 | 81.4 | (0.2) | (0.1) | (0.1) | (20.9) |
| (Provision for) benefit from income taxes | (0.6) | 0.2 | (0.8) | (391.2) | (1.7) | 0.1 | (1.8) | nm |
| Net income (loss) | 2.1 | (4.7) | 6.8 | 144.6 | 7.7 | (7.1) | 14.8 | 208.7 |
| Net loss attributable to noncontrolling interests | 1.4 | 0.2 | 1.2 | 489.5 | 2.2 | 0.6 | 1.6 | 223.8 |
| Net income (loss) attributable to Genie | \$3.5 | \$(4.5) | \$8.0 | 176.7 % | \$9.9 | \$(6.5) | \$16.4 | 252.7 % |

nm—not meaningful

Other Expense, net. Other expense, net, consisted primarily of foreign currency translation losses in the three and six months ended June 30, 2016 and 2015.

(Provision for) Benefit from Income Taxes. The change in the (provision for) benefit from income taxes in the three and six months ended June 30, 2016 compared to the same periods in 2015 was primarily due to the change in income tax expense in GRE. GRE's income before income taxes and provision for income taxes increased in the three and six months ended June 30, 2016 compared to the similar periods in 2015. GRE includes IDT Energy, certain limited liability companies and our consolidated variable interest entity. For purposes of computing Federal income taxes, we consolidate the GOGAS and Afek entities so that the losses from those businesses offset the taxable income from GRE and reduce the consolidated tax provision. State and local taxes however, have no offset and thus were higher for the three and six months ended June 30, 2016 compared to the similar periods in 2015 due to the increased income before taxes. IDT Energy and the limited liability companies are included in our consolidated return. Citizen's Choice Energy, LLC, or CCE, is our consolidated variable interest entity, which files a separate tax return since we do not have any ownership interest in this variable interest entity. The following table summarizes GRE's aggregate income before income taxes and provision for income taxes:

| Three months | Six months ended |
|--------------|------------------|

Net Loss Attributable to Noncontrolling Interests. The change in the net loss attributable to noncontrolling interests in the three and six months ended June 30, 2016 compared to the similar periods in 2015 was primarily due to increases in the net loss of CCE. CCE is a variable interest entity that is consolidated within our GRE segment. We do not have any ownership interest in CCE, therefore, 100% of the net income or loss incurred by CCE has been attributed to noncontrolling interests. CCE's net loss in the three months ended June 30, 2016 was \$1.2 million compared to net income of \$32,000 in the three months ended June 30, 2015, and CCE's net loss in the six months ended June 30, 2016 was \$1.7 million compared to \$73,000 in the six months ended June 30, 2015. The changes were primarily due to decreases in gross profit and increases in management fees.

Liquidity and Capital Resources

General

Historically, we have satisfied our cash requirements primarily through a combination of our existing cash and cash equivalents, GRE's cash flow from operating activities, and sales of equity interests in GOGAS and certain of its subsidiaries. We currently expect that our operations in the next twelve months and the \$47.8 million balance of cash, cash equivalents, and certificates of deposit that we held at June 30, 2016 will be sufficient to meet our currently anticipated cash requirements for at least the twelve months ending June 30, 2017, including Afek's anticipated substantial expenditures in the twelve months ending June 30, 2017.

Afek is seeking financing from a variety of sources to support further exploration activities, some of which could result in a process by which Afek would become an independent entity.

At June 30, 2016, we had working capital (current assets less current liabilities) of \$70.0 million.

| | Six months ended June 30, 2016 2015 | |
|--|--|----------|
| | (in millions) | |
| Cash flows provided by (used in): | | |
| Operating activities | \$13.3 | \$(3.5) |
| Investing activities | (9.2) | (11.2) |
| Financing activities | (3.9) | (1.3) |
| Effect of exchange rate changes on cash and cash equivalents | (0.1) | 0.1 |
| Increase (decrease) in cash and cash equivalents | \$0.1 | \$(15.9) |

Operating Activities

Cash provided by operating activities was \$13.3 million in the six months ended June 30, 2016 and cash used in operating activities was \$3.5 million in the six months ended June 30, 2015. Our cash flow from operations varies significantly from quarter to quarter and from year to year, depending on our operating results and the timing of operating cash receipts and payments, specifically trade accounts receivable and trade accounts payable, including payments relating to our exploration and research and development activities.

CCE is a consolidated variable interest entity. We determined that since the acquisition of the interest in CCE, we had the power to direct the activities of CCE that most significantly impact its economic performance, and we have the obligation to absorb losses of CCE that could potentially be significant to CCE on a stand-alone basis. We therefore determined that we are the primary beneficiary of CCE, and as a result, we consolidate CCE within our GRE segment. We provided CCE with all of the cash required to fund its operations. In the six months ended June 30, 2016, we provided CCE with net funding of \$1.0 million to finance its operations. In the six months ended June 30, 2015, CCE repaid to us \$0.8 million.

As of November 19, 2015, IDT Energy and certain of its affiliates entered into an Amended and Restated Preferred Supplier Agreement with BP Energy Company, or BP. The agreement's termination date is November 30, 2019, except either party may terminate the agreement on November 30, 2018 by giving the other party notice by May 31,

2018. IDT Energy's obligations to BP are secured by a first security interest in deposits or receivables from utilities in connection with their purchase of IDT Energy's customer's receivables, and in any cash deposits or letters of credit posted in connection with any collateral accounts with BP. IDT Energy's ability to purchase electricity and natural gas under this agreement is subject to satisfaction of certain conditions including the maintenance of certain covenants. At June 30, 2016, we were in compliance with such covenants. At June 30, 2016, restricted cash—short-term of \$0.2 million and trade accounts receivable of \$26.0 million were pledged to BP as collateral for the payment of IDT Energy's trade accounts payable to BP of \$8.5 million at June 30, 2016.

At June 30, 2016, we had an aggregate of \$2.6 million accrued for certain complaints and lawsuits described in Note 10 to the Consolidated Financial Statements included in Item 1 to Part I of this Quarterly Report. In July 2016, in accordance with a settlement approved by the Pennsylvania Public Utility Commission, IDT Energy issued an aggregate of \$2.4 million in additional refunds to its Pennsylvania customers in January, February and March of 2014 who had variable rates for electricity supply.

We are subject to audits in various jurisdictions for various taxes. Amounts asserted by taxing authorities or the amount ultimately assessed against us could be greater than accrued amounts. Accordingly, additional provisions may be recorded in the future as revised estimates are made or underlying matters are settled or resolved. Imposition of assessments as a result of tax audits could have an adverse effect on our results of operations, cash flows and financial condition.

On February 23, 2016, the New York PSC issued an order that sought to impose significant new restrictions on REPs operating in New York, including those owned by GRE. The restrictions described in the PSC's order, which were to become effective March 4, 2016, would require that all REPs' electricity and natural gas offerings to residential and small business customers include an annual guarantee of savings compared to the price charged by the relevant incumbent utility or, for electricity offerings, provide at least 30% of the supply from renewable sources. Customers not enrolled in a compliant program would be relinquished back to the local utility at the end of their contract period or, for variable price customers operating on month to month agreements, at the end of the current monthly billing cycle.

On March 4, 2016, a group of parties from the REP industry sought and won a temporary restraining order to stay implementation of the most restrictive portions of the PSC's order pending a court hearing on those parties' motion for a preliminary injunction. On July 25, 2016, the New York State Supreme Court, County of Albany, entered a decision and order granting the Petitioners' petition, vacated provisions 1 through 3 of the Reset Order, and remitted the matter to the PSC for further proceedings consistent with the court's order.

We are evaluating the potential impact of any new order from the PSC in response to the court's vacating of the PSC's order on our New York operations, while preparing to operate in compliance with any new requirements that may be imposed. Depending on the final language of any new order, as well as our ability to modify our relationships with our New York customers, an order could have a substantial impact upon the operations of GRE-owned REPs in New York.

On July 14, 2016, the PSC issued an Order restricting REPs, including those owned by GRE, from servicing low income customers in New York, as that term is defined in the Order. We are evaluating the potential impact of that Order on our New York operations, while preparing to operate in compliance with any new requirements.

Investing Activities

Our capital expenditures were \$0.1 million in the six months ended June 30, 2016 compared to \$0.3 million in the six months ended June 30, 2015.

In the six months ended June 30, 2016 and 2015, we used cash of \$12.8 million and \$10.9 million, respectively, for investments in Afek's unproved oil and gas property in the Golan Heights in Northern Israel. We had purchase commitments of \$12.1 million at June 30, 2016 that included commitments for capital expenditures and exploration costs. We currently anticipate that our total expenditures for Afek's exploration costs and other capital expenditures in the twelve months ending June 30, 2017 will be between \$5 million and \$8 million.

On February 23, 2016, Total notified AMSO of its decision not to continue to fund AMSO, LLC. On March 23, 2016, Total gave AMSO its notice of withdrawal from AMSO, LLC. The withdrawal was effective on April 30, 2016. We are currently decommissioning the project. As of April 1, 2016, AMSO and Total agreed that Total would pay AMSO, LLC \$3.0 million as full payment of its share of all costs associated with the decommissioning, winding up and dissolution of AMSO, LLC. Total will not be refunded any amount if the decommissioning costs are less than \$3.0 million. Effective April 30, 2016, AMSO, LLC's assets, liabilities, results of operations and cash flows are included in our consolidated financial statements. We accounted for our acquisition on April 30, 2016 of Total's ownership interest in AMSO, LLC as a business combination. We estimated the fair value of AMSO, LLC to be nil, as it had ceased

operations and its shutdown was in progress. We recognized a gain from the acquisition of Total's interest in AMSO, LLC because we acquired the net assets of AMSO, LLC while no consideration was transferred by us, due to our assumption of the risk associated with the shutdown obligations. The gain also included our gain on the remeasurement of AMSO's investment in AMSO, LLC at its acquisition date fair value. The aggregate gain recognized was \$1.3 million, which was included in "Gain on consolidation of AMSO, LLC" in the consolidated statements of operations.

In the six months ended June 30, 2016 and 2015, cash used for capital contributions to AMSO, LLC was \$0.1 million and nil, respectively.

Financing Activities

In each of the six months ended June 30, 2016 and 2015, we paid aggregate Base Dividends of \$0.3188 per share on our Series 2012-A Preferred Stock, or Preferred Stock. The aggregate amount paid in each of the six months ended June 30, 2016 and 2015 was \$0.7 million. On July 20, 2016, our Board of Directors declared a quarterly Base Dividend of \$0.1594 per share on our Preferred Stock for the second quarter of 2016. The dividend will be paid on or about August 15, 2016 to stockholders of record as of the close of business on August 5, 2016.

In each of the six months ended June 30, 2016 and 2015, we paid aggregate dividends of \$0.12 per share on our Class A common stock and Class B common stock. The aggregate amount paid in each of the six months ended June 30, 2016 and 2015 was \$3.0 million. In August 2016, our Board of Directors declared a quarterly dividend of \$0.06 per share on our Class A common stock and Class B common stock for the second quarter of 2016. The dividend will be paid on or about August 26, 2016 to stockholders of record as of the close of business on August 17, 2016.

In December 2013, IDT Energy acquired 100% of the outstanding membership interests of Diversegy and IDTEN. In each of the six months ended June 30, 2016 and 2015, we paid \$0.2 million related to these acquisitions. At June 30, 2016, the remaining estimated contingent payments were \$0.2 million.

We received proceeds from the exercise of our stock options of nil and \$0.1 million in the six months ended June 30, 2016 and 2015, respectively.

In June 2011, GOGAS issued a stock option to Michael Steinhardt, the Chairman of the Board of IEI, at an exercise price of \$5.0 million. The expiration date was April 9, 2015. The expiration date was extended for one month, and on May 9, 2015, the option was exercised. Mr. Steinhardt and an affiliate received interests of approximately 1.5% in each of Afek, Genie Mongolia and IEI. In addition, Mr. Steinhardt and the affiliate received an approximately 1.7% interest in AMSO. The exercise price of \$5.0 million was paid \$2.5 million in cash and \$2.5 million in promissory notes. In November 2015, we received cash of \$0.8 million to repay one-third of the principal amount of the promissory notes. At June 30, 2016 and December 31, 2015, the notes receivable of \$1.7 million were included in "Receivables for issuance of equity" in the consolidated balance sheet.

In the six months ended June 30, 2016, we paid \$29,000 to repurchase 3,096 shares of our Class B common stock. In the six months ended June 30, 2015, we paid \$22,000 to repurchase 3,740 shares of our Class B common stock. These shares were tendered by our employees to satisfy tax withholding obligations in connection with the lapsing of restrictions on awards of restricted stock. Such shares were repurchased by us based on their fair market value on the trading day immediately prior to the vesting date.

On March 11, 2013, our Board of Directors approved a stock repurchase program for the repurchase of up to an aggregate of 7.0 million shares of our Class B common stock. There were no repurchases under the program in the six months ended June 30, 2016 and 2015. At June 30, 2016, 6.9 million shares remained available for repurchase under the stock repurchase program.

On December 17, 2015, GRE, IDT Energy and certain affiliates entered into a Credit Agreement with Maple Bank GmbH for a revolving loan facility. On December 17, 2015, GRE borrowed \$2.0 million under the facility. In February 2016, the German banking regulator, Bafin, closed Maple Bank GmbH due to impending financial over-indebtedness related to tax-evasion investigations. Therefore, the revolving line of credit is not available for future borrowings. The collateral for the revolving loan consists of the borrowers' receivables, the balances in certain bank accounts and certain commercial and intangible rights. Outstanding principal amount incurs interest at LIBOR plus 3.5% per annum. Interest is payable monthly and all outstanding principal and any accrued and unpaid interest is due on the maturity date of December 17, 2018.

As of April 23, 2012, we and IDT Energy entered into a Loan Agreement with JPMorgan Chase Bank for a revolving line of credit for up to a maximum principal amount of \$25.0 million. The proceeds from the line of credit may be used to provide working capital and for the issuance of letters of credit. We agreed to deposit cash in a money market account at JPMorgan Chase Bank as collateral for the line of credit equal to the greater of (a) \$10.0 million or (b) the sum of the amount of letters of credit outstanding plus the outstanding principal under the revolving note. We are not permitted to withdraw funds or exercise any authority over the required balance in the collateral account. The principal outstanding will bear interest at the lesser of (a) the LIBOR rate multiplied by the statutory reserve rate established by the Board of Governors of the Federal Reserve System plus 1.0% per annum, or (b) the maximum rate per annum permitted by whichever of applicable federal or Texas laws permit the higher interest rate. Interest is payable at least every three months and all outstanding principal and any accrued and unpaid interest is due on the

maturity date of May 31, 2017. We pay a quarterly unused commitment fee of 0.08% per annum on the difference between \$25.0 million and the average daily outstanding principal balance of the note. In addition, as of April 23, 2012, GEIC issued a Corporate Guaranty to JPMorgan Chase Bank whereby GEIC unconditionally guarantees the full payment of all indebtedness of ours and IDT Energy under the Loan Agreement. At June 30, 2016, there were no amounts borrowed under the line of credit, and cash collateral of \$10.0 million was included in “Restricted cash—short-term” in the consolidated balance sheet. In addition, at June 30, 2016, letters of credit of \$8.2 million were outstanding.

Changes in Trade Accounts Receivable and Inventory

Gross trade accounts receivable increased to \$30.0 million at June 30, 2016 from \$27.4 million at December 31, 2015 reflecting the increase in our revenues in the six months ended June 30, 2016 compared to the six months ended December 31, 2015. Our revenues increased primarily due to seasonal cold weather that impacted the demand for natural gas for heat.

Inventory of natural gas decreased to \$0.7 million at June 30, 2016 from \$1.6 million at December 31, 2015 due to a 51% decrease in quantity and a 12% decrease in the average unit cost at June 30, 2016 compared to December 31, 2015. Inventory at June 30, 2016 and December 31, 2015 also included \$6.6 million and \$9.9 million, respectively, in renewable energy credits.

Contractual Obligations and Other Commercial Commitments

The following tables quantify our future contractual obligations and other commercial commitments at June 30, 2016:

Contractual Obligations**Payments Due by Period**

| (in millions) | Total | Less than 1 year | 1—3 years | 4—5 years | After 5 years |
|--|---------------|-------------------------------------|---------------|---------------|------------------------------|
| Purchase obligations | \$12.1 | \$11.1 | \$1.0 | \$— | \$ — |
| Renewable energy credit purchase obligations | 43.1 | 4.7 | 21.7 | 16.7 | — |
| Revolving credit loan payable (1) | 2.0 | — | 2.0 | — | — |
| Operating leases | 0.3 | 0.2 | 0.1 | — | — |
| Other liabilities (2) | 0.3 | 0.3 | — | — | — |
| TOTAL CONTRACTUAL OBLIGATIONS (3) | \$57.8 | \$16.3 | \$24.8 | \$16.7 | \$ — |

(1) The revolving credit loan payable may need to be repaid prior to its scheduled due date as a result of the closure of the lending bank.

(2) The above table does not include estimated contingent payments of \$0.2 million in connection with the acquisition of Diversegy and IDTEN due to the uncertainty of the amount and/or timing of any such payments.

(3) The above table does not include our unrecognized income tax benefits for uncertain tax positions at June 30, 2016 of \$0.7 million due to the uncertainty of the amount and/or timing of any such payments. Uncertain tax positions taken or expected to be taken on an income tax return may result in additional payments to tax authorities. We are not currently able to reasonably estimate the timing of any potential future payments. If a tax authority agrees with the tax position taken or expected to be taken or the applicable statute of limitations expires, then additional payments will not be necessary.

Other Commercial Commitments

Payments Due by Period

| (in millions) | Total | Less than 1 year | 1—3 years | 4—5 years | After 5 years | |
|-------------------------------|--------|-------------------------------------|--------------|--------------|------------------------------|---|
| Standby letters of credit (1) | \$ 8.2 | \$ 7.7 | \$ 0.5 | \$ | —\$ | — |

(1) The above table does not include an aggregate of \$12.9 million in performance bonds at June 30, 2016 due to the uncertainty of the amount and/or timing of any payments.

Off-Balance Sheet Arrangements

We do not have any “off-balance sheet arrangements,” as defined in relevant SEC regulations that are reasonably likely to have a current or future effect on our financial condition, results of operations, liquidity, capital expenditures or capital resources, other than the following.

GRE has performance bonds issued through a third party for the benefit of various states in order to comply with the states’ financial requirements for retail energy providers. At June 30, 2016, GRE had aggregate performance bonds of \$12.9 million outstanding.

In connection with our Spin-Off, we and IDT entered into various agreements prior to the Spin-Off including a Separation and Distribution Agreement to effect the separation and provide a framework for our relationship with IDT after the Spin-Off, and a Tax Separation Agreement, which sets forth the responsibilities of us and IDT with respect to, among other things, liabilities for federal, state, local and foreign taxes for periods before and including the Spin-Off, the preparation and filing of tax returns for such periods and disputes with taxing authorities regarding taxes for such periods. Pursuant to Separation and Distribution Agreement, among other things, we indemnify IDT and IDT indemnifies us for losses related to the failure of the other to pay, perform or otherwise discharge, any of the liabilities and obligations set forth in the agreement. Pursuant to the Tax Separation Agreement, among other things, IDT indemnifies us from all liability for taxes of IDT with respect to any taxable period, and we indemnify IDT from all liability for taxes of ours with respect to any taxable period, including, without limitation, the ongoing tax audits related to our business.

Item 3. Quantitative and Qualitative Disclosures About Market Risks

Our primary market risk exposure is the price applicable to our natural gas and electricity purchases and sales. The sales price of our natural gas and electricity is primarily driven by the prevailing market price. Hypothetically, if our gross profit per unit in the six months ended June 30, 2016 had remained the same as in the six months ended June 30, 2015, our gross profit from electricity sales would have decreased by \$14.8 million in the six months ended June 30, 2016 and our gross profit from natural gas sales would have increased by \$0.1 million in that same period.

The energy markets have historically been very volatile, and we can reasonably expect that electricity and natural gas prices will be subject to fluctuations in the future. In an effort to reduce the effects of the volatility of the price of electricity and natural gas on our operations, we have adopted a policy of hedging electricity and natural gas prices from time to time, at relatively lower volumes, primarily through the use of put and call options and swaps. While the use of these hedging arrangements limits the downside risk of adverse price movements, it also limits future gains from favorable movements. We do not apply hedge accounting to these options or swaps, therefore the mark-to-market change in fair value is recognized in cost of revenue in our consolidated statements of operations.

The summarized volume of GRE's outstanding contracts and options at June 30, 2016 was as follows (MWh – Megawatt hour and Dth – Decatherm):

| Commodity | Settlement Dates | Volume |
|------------------|-------------------------|---------------|
| Electricity | July 2016 | 112,000 MWh |
| Electricity | August 2016 | 331,200 MWh |
| Electricity | September 2016 | 42,000 MWh |
| Electricity | December 2016 | 53,760 MWh |
| Electricity | January 2017 | 336,000 MWh |
| Electricity | February 2017 | 320,000 MWh |
| Natural gas | August 2016 | 1,164,250 Dth |
| Natural gas | September 2016 | 75,000 Dth |
| Natural gas | October 2016 | 600,000 Dth |
| Natural gas | February 2017 | 600,000 Dth |
| Natural gas | March 2017 | 800,000 Dth |
| Natural gas | April 2017 | 300,000 Dth |
| Natural gas | February 2018 | 70,000 Dth |

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures. Our Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended), as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of June 30, 2016.

Changes in Internal Control over Financial Reporting. There were no changes in our internal control over financial reporting during the quarter ended June 30, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Legal proceedings in which we are involved are more fully described in Note 10 to the Consolidated Financial Statements included in Item 1 to Part I of this Quarterly Report on Form 10-Q.

Item 1A. Risk Factors

There are no material changes from the risk factors previously disclosed in Item 1A to Part I of our Annual Report on Form 10-K for the year ended December 31, 2015, except for the following:

We could be harmed by network disruptions, security breaches, or other significant disruptions or failures of our IT infrastructure and related systems.

To be successful, we need to continue to have available a high capacity, reliable and secure network. We face the risk, as does any company, of a security breach, whether through cyber-attack, malware, computer viruses, sabotage, or other significant disruption of our IT infrastructure and related systems. We face a risk of a security breach or disruption from unauthorized access to our proprietary or classified information on our systems. Certain of our personnel operate in jurisdictions that could be a target for cyber-attacks. Further, there are political issues related to certain of our activities that could make us a more likely target of hackers related to certain causes. The secure maintenance and transmission of our information is a critical element of our operations. Our information technology and other systems that maintain and transmit our information, or those of service providers or business partners, may be compromised by a malicious third party penetration of our network security, or that of a third party service provider or business partner, or impacted by advertent or inadvertent actions or inactions by our employees, or those of a third party service provider or business partner. As a result, our information may be lost, disclosed, accessed or taken without our consent. In the first quarter of 2016, certain of our internet-based systems were subject to concentrated denial of service attacks. We do not believe that any key data of ours or our customers was compromised or that the attacks had any material impact on us.

Our approach is to minimize the amount of information that is stored or available on web-based systems, and to provide that any such information that needs to be on servers that support our internet-based operations, is on such systems for as brief a period as practicable.

Although we continuously make significant efforts to maintain the security and integrity of these types of information and systems, there can be no assurance that our security efforts and measures will be effective or that attempted security breaches or disruptions would not be successful or damaging, especially in light of the growing sophistication of cyber-attacks and intrusions. We may be unable to anticipate all potential types of attacks or intrusions or to implement adequate security barriers or other preventative measures.

Network disruptions, security breaches and other significant failures of the above-described systems could (i) disrupt the proper functioning of these networks and systems, and therefore, our operations; (ii) result in the unauthorized access to, and destruction, loss, theft, misappropriation or release of our proprietary, confidential, sensitive or otherwise valuable information, including trade secrets, which others could use to compete against us or for disruptive, destructive or otherwise harmful purposes and outcomes; (iii) require significant management attention or financial resources to remedy the damages that result or to change our systems; or (iv) result in a loss of business, damage our reputation or expose us to litigation. Any or all of which could have a negative impact on our results of operations, financial condition and cash flows.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table provides information with respect to purchases by us of our shares during the second quarter of 2016:

| | Total Number of Shares Purchased | Average Price per Share | Total Number of Shares Purchased as part of Publicly Announced Plans or Programs | Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs (1) |
|------------------|---|--|---|---|
| April 1–30, 2016 | — | \$ | — | 6,896,669 |
| May 1–31, 2016 | — | \$ | — | 6,896,669 |
| June 1–30, 2016 | — | \$ | — | 6,896,669 |
| Total | — | \$ | — | |

(1) Under our existing stock repurchase program, approved by our Board of Directors on March 11, 2013, we were authorized to repurchase up to an aggregate of 7 million shares of our Class B common stock.

Item 3. Defaults upon Senior Securities
