Transax International Limited

Date: July 21, 2004 By: /s/ Stephen Walters

Stephen Walters
President & CEO

Exhibit 99.1 Press Release of the Registrant

Transax Provides Business Update

IRVINE, Calif. July 21st, 2004 - Transax International Limited ("Transax") (OTC Bulletin Board: TNSX; Frankfurt/Berlin: TX6) provides the following business update in relation to the company's recent depreciation in stock price. In spite of the recent depressed share price, Transax's efforts to reach significant milestones continues uninterrupted.

Stephen Walters, Chief Executive Officer of Transax commented: "The fundamentals of Transax business are solid. In the first half of 2004, we increased our monthly transaction volumes and revenues by 150%. The company is now in the process of commencing a major roll out with the largest health insurer in Brazil. Our rates of transaction volumes and revenues are expected to increase further during the second half of 2004."

Walters continued: "Current annualized revenues of about USD 1 million are expected to increase significantly in the second half of 2004 as roll out proceeds on all three contracts. The Brazilian operations of Transax, which now support 40 staff, are expected to break even by the end of the third quarter 2004, and the company projects to reach profitability shortly thereafter."

Transax is emerging as a leader of "real time" healthcare related electronic authorization and adjudication transactions

as indicated by recently signed agreements. The company is in discussions with a number of groups for potential partnerships for the US market and is in negotiations regarding an entry for a license of its product with a major financial institution in Europe. Furthermore, additional MOU's regarding new business initiatives with current clients are expected to be announced shortly. These initiatives will add significantly to Transax's revenue stream during 2005.

Shareholders are advised that no current projects have been delayed due to financial reasons. While the decline in share price affects the ability to raise equity funding, management of the company is confident in its belief that the share price will recover as the market recognizes the company's achievements as revenues continue to flow. It is also management's opinion that the terms and conditions for shorter and long term financing will greatly improve sooner than expected as the company reaches its break-even point in the second half of 2004.

About Transax International Limited: Transax is a premier international provider of information network solutions for healthcare providers and health insurance companies, enabling the "real-time" automation of routine patient eligibility verifications, authorization, claims processing and payment functions that are currently performed manually. The technology has been proven to significantly decrease health insurance claim expenditure and provides additional operational efficiencies for the health insurer. Transax "MedLink" solution has been specifically designed for the healthcare and health insurance industry to allow insurance companies, Health Maintenance Organizations, and other industry concerns to connect to healthcare providers and electronically undertake eligibility, authorization and processing of health claims in "real-time". MedLink has been developed as a "Total Connectivity" solution where Transax is able to provide an insurer with the ability to cost effectively process all of the transactions generated in "real time" regardless of location or method of generation. Presently operational in Brazil, Transax currently undertakes approximately 250,000 transactions per month, has contracts in place for in excess of 2,500,000 transactions per month, and other potential contracts in various stages of negotiation.
