This document may contain forecasts that merely reflect the expectations of the Company's management. Such terms as anticipate, believe, expect, forecast, intend, plan, project, seek, should, along with similar or analogous terms are used to identify such forecasts. These predictions evidently involve risks and uncertainties, whether foreseen or not by the Company. Therefore, the future results of operations may differ from current expectations, and readers must not base their expectations exclusively on the information presented herein.

With this acquisition, Petrobras contributes the reorganization and consolidation of a sector fundamental to the growth of the Brazilian economy, thus creating attractive investment conditions. In line with its Strategic Plan, the Company has been investing on a selective basis in the Brazilian and Southern Cone petrochemical sectors in projects that create added value to the oil, natural gas and refinery product businesses, operating on an integrated basis. The acquisition of these assets will be instrumental in adding value to the portfolio of company stakes in the petrochemical industry in line with the contribution to the consolidation of the Southeast Petrochemical Pole.

The operation will be divided into three stages:

- 1) Acquisition of the shares of the direct and indirect controllers of SZPQ;
- 2) Public Tag Along Offer for the acquisition of the free float in common and preferred shares issued by SZPQ, under the conditions and terms pursuant to Article 254-A of Law 6,404/76 and CVM Instruction 361, Bovespa's Level 2 Listing Regulations and SZPQ Bylaws (Tag Along rights at the ratio of 100% and 80% of the unit price per common share for the common and preferred shares, the object of the offer, respectively);
- 3) Public Offer for the Cancellation of the Registration as a Publicly Held Company of SZPQ.

Acquisition of the shares of the indirect controllers of SZPQ: Petrobras shall acquire 97.3 million common shares at a price of up to R\$ 13.44 (thirteen Reais and forty-four centavos) per share and 75.2 million of preferred shares at the price of up to R\$ 10.76 (ten Reais, seventy-six centavos) per share, representing a corporate stake of 99.9% of the common shares and 58.2% of the preferred shares issued by SZPQ, and 76.1% of the total capital stock.

Public Tag Along Offer SZPQ: In the light of the direct and indirect sale of the control of the publicly listed corporation SZPQ, Petrobras, pursuant to the legal requirements applicable to the case in hand (Article 254-A of Law 6,404/76 and CVM Instruction 361, Bovespa's Level 2 Differentiated Corporate Governance Practices, to which SZPQ is a signatory and Article 39 of SZPQ's Bylaws), shall file with the CVM (Brazilian Securities and Exchange Commission) within the legally required period, the request for registration of a public offer to acquire the common and preferred shares held by the minority shareholders of SZPQ (POS Tag Along), at the price of R\$ 13.44 (thirteen Reais, forty-four centavos) and up to R\$ 10.76 (ten Reais, seventy-six centavos) per common and preferred share, respectively, to be paid at sight.

Public Offer for Cancellation of Registration of SZPQ: Within 30 days, Petrobras intends to file a request with the CVM for the registration of a public offer for the cancellation as a publicly held company of SZPQ, pursuant to Article 4, Paragraph 4 of Law 6,404/76 and CVM Instruction 361.
