**Information on the compensation of the Company's management required in section 13 of the reference form, as set forth in CVM Instruction nº 480, dated December 7, 2009**

**13. Compensation of the Company's Management**

**13.1 Detail the policy or compensation practice of the Board of Directors, Board of Statutory and Non-Statutory Officers, Fiscal Board, Statutory Committees and audit, risks, financial and compensation Committees, addressing the following aspects:**

**a. Purposes of the compensation policy**

Our Company's compensation policy aims at stimulating and promoting the alignment of the Company's goals and of its management and employees, motivating productivity and their efficiency and preserve the competitiveness in the market in which we are engaged.

The Company's compensation strategy emphasizes our intention of retaining talented and highly motivated collaborators and it aims at coupling their interests to the interests of our shareholders. Our compensation packages include competitive salaries and profit sharing plans.

We have a People Management and Corporate Governance Committee responsible for the coordination, implementation and periodical revision of the best corporate governance practices, monitoring and keeping our Board of Directors informed about what is recommended in the regulations and in the market related to such practices. In this regard, such Committee revises and recommends to our Board of Directors the compensation that should be paid to the employees, including salaries, bonus and stock options, in addition to analyzing the career and succession plans for the Company's management.

Our annual profit sharing plans are negotiated by the Company with a committee formed by our employees and approved by the employees' unions, benefiting both the unionized and non-unionized employees, and paid in April of each year. In the context of such plans, a portion of the amount that is subject to distribution is conditioned to the attainment of targets in the Company's results and another portion is conditioned to the fulfillment of operational targets that are established for each of our departments and individual targets.

Specifically in regard to the compensation of the Company's management, according to the Brazilian Corporation's Law, it is responsibility of the shareholders to establish on an annual basis, in a Shareholders' Meeting, the global or individual amount of the compensation of the members of the Board of Directors and of the Board of Officers. Our By-Laws establish that the Shareholders Meeting shall determine the annual global compensation of the Company's management and that the Board of Directors shall distribute the sums to its members and to the members of the Board of Officers.

**b. Composition of the compensation**

**(i) Components of the compensation and the purposes of each of them:**

**Board of Directors:** The compensation of the Board of Directors is fixed and paid monthly. There is no payment of variable compensation.

**Committees:** We have five non-statutory Management Committees, four of which operate permanently, that assist and support our Board of Directors. The members of the Committees are entitled to a fixed monthly compensation or based on participation in meetings, determined case by case. The members of the Board of Directors that comprise the Company's Committees are not entitled to any additional compensation.

**Fiscal Board:** The Company does not have a permanent Fiscal Board. The compensation policy of the members of the Fiscal Board, if and when installed, is established by the Shareholders Meeting, respecting the legal limits.

**Statutory Board of Officers:** The compensation policy of the Board of Officers comprises:

- Base monthly salary, comprised of thirteen monthly salaries per year;
- Benefits package that includes life insurance, meals, car and airline tickets in routes operated by the Company;
- Short-term variable compensation formed and paid annually by our Profit Sharing Plan, according to Law 10.101 of Dec. 19, 2000 ("PPR"). Our PPR defines potentials of multiples of the monthly salary attributed based on the individual results indicators of the Officers and the Company's global results. Our Board of Directors may, in exceptional and justified cases, deliberate to convert the amount to be paid under the PPR into an equivalent number of hypothetical shares, based on the value of the share at the date of calculation of the amount to be paid, being effectively paid the amount that is equivalent to the value of such stock at the date of liquidation of the PPR. This option enables to further the alignment between the interests of the Company and of the Officers;
- Long-term Incentive Plan annually offered through the Company's Stock Option Plan approved by the Special Shareholders Meeting (AGE) held on December 9, 2004, as amended ("Stock Option Plan"), which options are attributed according to the Company's global results, position level and evaluation of the individual's performance.

**Non-Statutory Board of Officers:** The policy of compensation of the Company's non-statutory officers comprises:

- Base monthly salary, comprised of thirteen monthly salaries per year;
- Benefits package that includes life insurance, meals voucher, and a travel benefit program adopted by the Company;
- Short-term variable compensation formed and paid annually through our PPR. Our PPR defines potentials of multiples of the monthly salary attributed based on the individual results indicators of the Officers and the Company's global results. Our Board of Directors may, in exceptional and justified cases, deliberate to convert the amount to be paid under the PPR into an equivalent number of hypothetical shares, based on the value of the share at the date of calculation of the amount to be paid, with the effective payment of the amount that is equivalent to the value of such stock at the date of liquidation of the PPR. This option enables to further the alignment between the interests of the Company and of the Officers;
- Long-term Incentive Plan offered through a Stock Option Plan, which options are attributed according to the Company's global results, position level and evaluation of the individual's performance.

The fixed compensation of the Statutory and Non-Statutory Officers is based on the average market salary determined through an annual salary survey conducted by a specialized consultant, observing the progressive salary valuation in the cases of internal promotions.

The short and long-term variable compensation, respectively, the PPR and the Stock Option Plan, are aimed at encourage the management and employees to contribute substantially to the Company's success.

**(ii) Proportion of each element in the global compensation:**

The average proportion of each element of the compensation in 2010 are stated in the following chart, based on our current compensation policy.

<b>2010</b>	<b>Salary and Pro Labore</b>	<b>Benefits</b>	<b>Compensation based on participation in Committees</b>	<b>Short-term Variable Compensation (PPR)</b>	<b>Stock-Based Compensation</b>	<b>Total</b>
Board of Directors	100%					100%
Statutory Board of Officers	49%	3%		-	48%	100%
Non-Statutory Board of Officers	48.7%	0.3%		-	51%	100%
Fiscal Board						0%
Committees			100%			100%

**(iii) Criteria for calculating and adjusting each of the compensation elements:**

The compensation of the members of the Board of Directors and of the Statutory Board of Officers of the Company is proposed and annually reviewed and submitted to the Shareholders Meeting for approval.

In regard to the Statutory and Non-Statutory Board of Officers, the fixed monthly compensation is adjusted based on the collective labor agreement established in the Collective Bargaining Agreement executed with the Employees' Union and, occasionally, an increase may occur in the salary policy established by the Company, based on individual merits.

As concerns the short-term variable compensation (PPR) policy, the calculation of the compensation for 2010 was based in the Net Profit of the period. Company is evaluating the criteria and estimates that the calculation of the compensation for 2011 will be based in the same criteria.

In regard to the long-term compensation, the Stock Option Plan is administrated by the People Management and Corporate Governance Committee and by the Board of Directors, according to the Plan's guidelines.

The People Management and Corporate Governance Committee establishes on an annual basis the price for exercising the stock option that will be offered, adopting the calculation criteria set out in the Stock Option Plan, which is: **(a)** equal to the average price, weighted by volume, of the shares of the same class recorded in the last sixty (60) trading sessions prior to the Granting Date, which shall be adjusted pursuant to the IGP-M, a general price index published by the Fundação Getúlio Vargas, from the Granting Date until the date of effective payment; or **(b)** determined by the Board of Directors, with reference to the profitability outlooks of the Company, to the net asset value per share, or to the Market Value, with premium or discount being admitted due to market conditions. In regard to the stock options awarded in 2010, the criteria specified in "a" above was adopted.

In general lines, in order to ensure the best market practices we conduct annual salary surveys through specialized consulting firms aiming to maintain our compensation strategy aligned with the Company's goals and those of its employees and thereby preserve the Company's competitiveness.

As regards the labor benefits, we constantly review the market practices and periodically, as fit, we adjust them to align competitiveness.

**(iv) Reasons that support the compensation composition:**

Our compensation strategy is intended to form short, mid and long-term elements that ensure alignment with the Company's goals and those of its employees and management, keeping it competitive in the market, attractive for maintaining executives and remunerate the employees according to their job responsibilities. Accordingly, our compensation strategy is intended to position the fixed compensation of the Company's professionals at the market average and the differential corresponds to the short and long-term variable compensation, which depends on the Company's global performance and on the performance of the employees individually.

**c. Main performance indicators that are computed in the determination of each element of the compensation:**

In regard to the fixed portion of the compensation, salary surveys conducted by specialized consulting firms and indicators of the Company's performance and of the individual performance, bound to the level of responsibility of the job occupied by the individual are considered. Additionally, the professional qualification for the job is also considered.

In regard to the variable compensation, performance indicators such as evaluations of the individual's performance, attainment of corporate targets and the Company's global performance indicators are considered. In 2010 the global performance indicator that was considered to establish the Company's compensation was the Net Profit.

**d. Structure of the compensation to reflect the development of the performance indicators**

The short-term variable compensation is conditioned and calculated based on the Company's results in the period, i.e. achievement of the global target (financial metric) established for

the period. Accordingly, the global PPR is structured and affected by the achievement of the Company's global target.

The long-term incentive plan, which consists in the Stock Option Plan, is bound to the valuation of the shares, the prospects of the Company's profitability, net equity per share value or the market value of the stock (defined as the closing price of the stock in the preceding floor trading session), possibly with a premium or discount based on the long-term market conditions.

In regard to the options granted in December 2010, the criteria that was adopted for the exercise price of the stock option is equal to the average price, weighted by volume, of the shares of the same class recorded in the last sixty (60) trading sessions prior to the Granting Date.

**e. How the compensation policy or practice is aligned to the Company's short, mid and long-term interests**

The Company intends to maintain the compensation of its employees competitive in relation to the market so that it can withhold and attract talents that contribute to attain its short, mid and long-term strategic targets.

Accordingly, our compensation strategy should reflect mechanisms that stimulate the professionals to remain at the Company in the mid and long-term.

Under this compensation strategy there is a balance between the short-term compensation (PPR) based on annual performance indicators and on the mid and long-term (Stock Option Plan) aligned with the Company's mid and long-term interests.

Accordingly, we stimulate the employees to meet and exceed the annual targets that are related to the PPR and adopt mid and long-term action that may generate value to the Company and that will be consequently reflected in the valuation of the Company's stock in the market, thus being linked to the Stock Option Plan.

**f. Existence of compensation borne by subsidiaries, directly or indirectly controlled or controlling companies**

The compensation of the Statutory Board of Officers and Non-Statutory Board of Officers comprises: fixed annual compensation, variable compensation and Stock-based compensation borne by the directly controlled operation company VRG Linhas Aéreas S.A.

**g. Existence of compensation or benefit bound to the occurrence of a specific corporate operation, e.g. transfer of the Company's stock control**

There is no compensation or benefits bound to the occurrence of any corporate operation involving the Company, such as transfer of stock control and/or adoption of strategic alliances.

In regard to the Stock Option Plan: in the event of occurring a merger, amalgamation, spin-off or restructuring of the Company in which the Company is not the surviving company, or sale of substantially all of the Company's assets, or in the event of transfer of stock control, the Plan will be canceled and any option granted by then shall be extinguished, unless provided otherwise in the reorganization decision documents.

**13.2 Compensation recognized in the results of the Company's fiscal year closed on December 31, 2010 and compensation established for the current fiscal year of the Company's Board of Directors, Statutory Board of Officers and Fiscal Board**

**13.4 In regard to the compensation plan based on stock held by the Board of Directors and by the Statutory Board of Officers, effective in the last fiscal year and established for the current fiscal year:**

**a. General clauses and conditions**

In the Special Shareholders Meeting (AGE) held on December 9, 2004 our shareholders approved the Stock Option Plan. This plan is administrated by our People Management and Corporate Governance Committee and by the Board of Directors and it establishes the general conditions for the grant of stock options of shares issued by our Company to selected individuals, at the Committee's discretion, that occupy the positions of CEO, vice-president, officer, advisors, general manager, regional manager, manager and other positions of the Company and its controlled companies, according to the Plan ("Participants"). The Plan is valid for ten years as of the date of its approval, expiring on December 8, 2014.

The grant of stock options to the Participants selected by the aforesaid Committee occurs on an annual basis. The grant criteria is disclosed in the second semester of each calendar year

and establishes the number of stock options that applies to each class, the exercise price, observing the provisions of the Plan and any additional restrictions other than those established in the Plan.

The People Management and Corporate Governance Committee holds broad powers to adopt the action that may be necessary and fit for administrating the Plan. The Committee's decisions are conclusive and bind the Company in regard to the matters that are related to the Plan, with the exception of certain matters that are subject to confirmation by the Board of Directors, such as: total number of stock options that may be awarded in each calendar year, the beneficiary participants of the stock options and the number of stock options that may be awarded to each participant in each calendar year.

According to the Plan, the People Management and Corporate Governance Committee may treat certain participants differently, in justified cases and subject to confirmation by the Board of Directors and provided that this does not affect the basic rules of the Plan. The Committee may also include new participants in plans that have already been approved and currently effective, awarding to them the stock options that it finds fit, respecting the maximum global number of stock options annually established by the Board of Director and the other clauses of the Plan.

In justified cases, the Committee may authorize the CEO and/or Vice-Presidents to be awarded stock options under the Plan, subject to confirmation by the Board of Directors, and also the clauses and conditions that the Committee should establish to replace wholly or partially the variable compensation under the Company's Profit Sharing Plan (PPR). If one or more Vice Presidents decide to be awarded stock options instead of the variable compensation under the PPR, the Board of Directors may, at its sole discretion: (a) decide that the stock option exercise price be less than the amount established in paragraph (iii) of the Disclosure and Contents of the Awarding Criteria of the Plan, or, alternatively (b) establish an exchange ratio between the PPR amounts and the number of stock options that the Participant will be awarded, supported by the Company's compensation policy, which might not correspond to the stock options value or of the shares involved in the stock options on the occasion of the award.

In the exercise of its powers, certain decisions of the Committee are subject to confirmation by the Board of Directors, to the limits established in the law, the applicable regulations, in the Plan and in the guidelines established by the Company's shareholders in a shareholders meeting. The vacancies are regulated by the Board of Directors, with consultation of the Shareholders Meeting whenever this is convenient.

**b. Main purposes of the Plan**

The Plan is intended, through the awarding of stock options of the Company's shares, to: (a) attract, motivate and retain qualified executives; (b) motivate management and employees to achieve results and (c) promote the Company's interests.

**c. How the plan contributes to such purposes**

The Plan consists in the awarding of stock options of the Company's shares, respecting the previously established rules of prices and periods. A vesting period is granted for exercising the stock option. If the Participants of the Plan leave the Company in the vesting period their rights are lost in regard to the stock options that were non-exercisable on the occasion of the termination. The Participants' gains under the Plan are conditioned directly to the valuation of the Company's stock after the options are awarded and to remaining in the position occupied.

**d. How the plan is included in the Company's compensation policy**

The Company's Stock Option Plan contributes substantially to the overall composition of the compensation of the Company's management and, accordingly, strongly binds individual performance to the Company's goals given that the management have an additional incentive to implement mid and long-term activities that generate added value to the Company and that will reflect in the valuation of the Company in the stock market, in addition to being a powerful means for attracting and retaining the Company's talents.

**e. How the plan aligns the interests of the management and of the Company in the short, mid and long-term**

The alignment occurs through the indicators of performance of the individuals and of the Company, which are defined when the stock options are awarded. The Stock Option Plans refers to a relevant incentive at the level of the individual and it is linked to the Company's performance and indicators at the mid and long-term. This also reflects in the valuation of the Company's stock aligned with the expectation of generating aggregated value to the shareholders.

**f./ g. Maximum number of shares covered and maximum number of stock options that may be granted**

The Company's Stock Option Plan determines that the stock options awarded may vest rights over a certain number of shares that does not exceed 5% (five percent) of the total number of the Company's shares. The stock options awarded under the Plan may vest rights only over the preferred shares issued by the Company.

In December 2010, 2,722,444 stock options were awarded to the Plan of 2011, at the weighted average exercise price of R\$28,83 per stock option. The 2,722,444 shares correspond when exercised to the equal number of shares.

**h. Conditions for buying the shares**

Participants in the Plan shall be the persons selected at the sole discretion of the Committee, provided that they have been exercising those duties which have made them eligible at the date on which the option is granted, in one of the following categories: CEO, Vice-President, Officer, Advisors, General Manager, Regional Manager, Manager and Others.

The participants shall respect the vesting period established in the Plan, during which they shall remain working for the Company.

**i. Criteria for establishing the purchase price or exercise**

As established in the Company's Stock Option Plan, the price for exercising the stock options awarded in each calendar year shall be: **(a)** equal to the average price, weighted by volume, of the shares of the same class recorded in the last sixty (60) trading sessions prior to the Granting Date, which shall be adjusted pursuant to the IGP-M, a general price index published by the Fundação Getúlio Vargas, from the Granting Date until the date of effective payment; or **(b)** determined by the Board of Directors, with reference to the profitability outlooks of the Company, to the net asset value per share, or to the Market Value (defined as the closing price of the stock in the preceding trading session), with premium or discount being admitted due to market conditions

**j. Criteria for determining the exercise price**

The period for exercising the stock options is based on the provisions of the Company's Stock Option Plan, being the current practice between three (3) to five (5) years, as follows:

(a) one-fifth (1/5) of the total number of stock options granted to a participant in a calendar year may be exercised on each anniversary of the grant of the stock options, hence on the fifth anniversary of the grant date of the stock options the total number of stock options that were granted to a participant in a calendar year may be exercised; or

(b) the stock options that were granted to a participant may be fully exercised after the third anniversary of the grant date, according to the following schedule:

(i) Up to 20% (twenty percent) of the total number of stock options awarded may be exercised as of the first anniversary of the grant date;

(ii) Additionally, up to 30% (thirty percent) as of the second anniversary of the grant date; and

(iii) The remaining 50% (fifty percent) may be exercised as of the third anniversary.

The stock options that may be exercised according to the Plan may be exercised by the participant up to the tenth (10<sup>th</sup>) anniversary of the corresponding Grant Date.

In regard to the stock options granted to the Plan of 2011, the criteria set out in paragraph “b” above applies.

**k. Liquidation**

The share price shall be paid by the holders of the stock option, either in cash or, exceptionally, in other forms as defined by the Committee, provided that the minimum realization stipulated by the law is respected.

**l. Restrictions to the transfer of the shares**

The shares arising from the stock option exercise may not be sold to third parties until they are fully settled and paid-up.

**m. Criteria and events that, upon their occurrence, lead to the suspension, change or extinction of the plan**

The Plan became effective upon its approval by the Company’s Shareholders Special Meeting (AGE) and shall remain effective for ten (10) years. It may, however, be terminated, at any time, by decision of a Special Shareholders' Meeting, or as a result of Restructuring of the Company (as described below), Winding Up and Liquidation of the Company or cancellation of its registration as a publicly-held company.

Termination by Lapse of Time: Termination of the effective term of the Plan by lapse of the time established for same shall affect neither the validity of the options previously granted and still in force nor the limitations on negotiability of the shares and/or the preemptive rights.

Termination by Shareholders' Decision. The termination of the effective term of the Plan by decision of the Company's shareholders shall affect neither the validity of the options previously granted and still in force nor the limitations on negotiability of the shares and/or the preemptive right provided for herein.

Termination Caused by the Restructuring of the Company. At the time of the Restructuring of the Company, the Plan shall terminate and any option granted up to then shall become extinct unless provided otherwise in the reorganization resolution documents.

Restructuring of the Company. Restructuring of the Company means the merger, amalgamation, spin-off or corporate restructuring of the Company, in which the Company is not the surviving entity, or the sale of substantially all of the Company's assets, or the transfer of the Company's control.

Termination by the Winding Up, Liquidation or Cancellation of its Registration as a Publicly-Held Company. In the cases of cancellation of registration as a publicly-held company, winding up or liquidation of the Company, the Plan and the options granted thereunder shall become automatically extinct.

**n. Effects of the management member's leaving the Company over such individual's rights under the stock-based compensation plan**

The provisions of the Plan do not vest rights to the beneficiaries warranting continued employment or as a service supplier of the Company or of its subsidiaries or interferes in any way in the Company's or its subsidiaries' right, subject to the law and to the provisions of the employment agreement or services agreement, as the case may be, to terminate at any time its labor relationship held with the Participant. Furthermore, the provisions of the Plan do not vest on any stock option holder any right to continued employment up to the end of the individual's term of office as a Director or management member and it does not affect in any way the Company's or its controlled companies' right to dismiss such individual, nor does it warrant a right to be reelected to the position.

In case of Termination by the Company, by its controlled companies or by the Participant, for any reason, except with due cause, all options that have been granted to the participant, and which are not yet exercisable, shall become automatically extinct for all legal purposes, regardless of any termination notice or severance pay. Nevertheless, the option holder shall have the right to exercise the options already exercisable on the date of termination for a non-renewable period of ninety (90) days, counted from the date of termination and upon payment in cash. In addition, if the shares subscribed or acquired as a result of the Plan are not entirely paid-up or settled, the participant shall have ninety (90) days, counted from the termination to make the full payment thereof, otherwise the number of shares held by the participant shall be reduced pro rata the amount effectively settled or paid-up.

In case of Termination of the Company's or its subsidiaries' option holders for due cause, all options that were granted to them and which were not yet exercisable, shall become automatically extinct for all legal purposes, regardless of any termination notice or severance pay. Nevertheless, the option holder shall have the right to exercise, on the date of Termination and upon payment in cash, the options already exercisable on that date.

**13.5 Number of shares or capital quotas directly or indirectly held in Brazil or abroad – and other securities that may be converted into shares or capital quotas, issued by the Company, its direct or indirect controlling companies, controlled or commonly controlled companies – by members of the Board of Directors, Statutory Board of Officers or by the Fiscal Board, classified by body, at the closing date of the last Company fiscal year.**
