The Third Quarterly Report for 2015

2.3

Review of operating results

In the first three quarters of 2015, global economic recovery remained slow. China's GDP grew by 6.9%. International crude oil prices fluctuated at low level and continued to drop in the third quarter. Domestic refined oil product prices were adjusted timely in line with international crude oil prices with 5 consecutive cuts followed by one increase in the third quarter. Domestic apparent consumption of refined oil products grew by 2.6% over the same period of last year, driven by substantial increase of gasoline and kerosene consumption while diesel consumption dropped. Domestic demand for chemicals maintained a steady growth with ethylene equivalent consumption up by 3.2% compared with the same period of last year.

The Company, focusing on growth quality and profitability, through intensified analysis and forecasting of macro-economy and market trends, actively responded to the fluctuation of international crude oil price, fully leveraged the advantages across its integrated value chain, kept cost and expenses under control, and realised stable operations. In accordance with the ASBE and IFRS, net profit attributable to equity shareholders of the Company was RMB 25.848 billion and RMB 27.030 billion respectively in the first three quarters.

Exploration and Production: The Company took effective measures to cope with low oil prices, including optimising the exploration and production plans, setting up flexible investment decision making mechanism and cutting high-cost crude oil production. In exploration, we attained new discoveries in marine facies gas fields in western Sichuan. In development, Fuling shale gas and Yuanba gas projects progressed steadily. In the first three quarters, oil and gas production of the Company reached 350.82 million barrels of oil equivalent, down by 1.8%, out of which crude oil output dropped 2.4%, over the same period last year. Impacted by the sustained low crude oil price, Exploration and Production Segment had an operating loss of RMB 3.444 billion.

Refining: The Company optimised the crude oil allocation and processing plans, adjusted product slate and utilisation rate, and increased the yield of high value-added products, such as high-spec gasoline. We brought our scale advantages into full play to control the unit cost. We actively promoted the quality upgrading of refined oil products and provided high standard fuels to the market. We took our specialised business advantages to improve our dedicated marketing network. In the first three quarters, refinery throughput and refined oil products production increased by 1.4% and 2.9% respectively, among which gasoline up by 7.1%, jet fuel up by 17.2% and diesel down by 3.9% over the same period last year. Benefited by product yield optimisation and the refined oil product pricing mechanism improvement, Refining Segment had an operating profit of RMB 14.905 billion, up by 34.3% over the same period last year.

Marketing and Distribution: In light of the changes in supply and demand, the Company optimised marketing structure to increase retail volume and single station throughput. We accelerated the development of non-fuel business and its interaction with fuel business, promoted business cooperations and achieved volume and profit growth. We accelerated our transformation from an oil products supplier to a comprehensive service provider by using our network and brand advantages, upgrading the value creation capabilities of marketing network. In the first three quarters, total sales volume of refined oil products was 141 million tonnes,

The Third Quarterly Report for 2015

up by 1.9% over the same period last year. Total domestic sales volume of refined oil products was 127 million tonnes, up by 0.8%, of which retail volume reached 88.19 million tonnes, up by 1.9% over the same period last year. Transaction of non-fuel business reached RMB 19.2 billion, up by 66.7% compared with the same period last year. The operating profit of Marketing and Distribution Segment was RMB 21.5 billion, down by 18.7% over the same period last year.

Chemicals: The Company further optimised feedstock and product mix to achieve more cost-cutting and better efficiency. We put our efforts in R&D, production and marketing of new products, strengthened the coordination between R&D, production and marketing and maintained production volume growth of high value-added products, achieving better economic performance. The synthetic resin for special compound rate reached 59%, up by 1% and the synthetic fiber differentiation rate reached 81.8%, up by 5.7% over the same period last year. In the first three quarters, ethylene production reached 8.273 million tonnes, up by 5.3% and chemical sales volume was 45.38 million tonnes, up by 2.1% over the same period last year. Benefited by the structural adjustment, declining feedstock price and the competitive naphtha-based chemical products, the operating profit of Chemicals Segment was RMB 15.008 billion, up by RMB 18.524 billion over the same period last year.
