MAIN STREET CAPITAL CORPORATION
Notes to Consolidated Financial Statements
(Unaudited)

NOTE A ORGANIZATION AND BASIS OF PRESENTATION

1. Organization

Main Street Capital Corporation (MSCC) was formed on March 9, 2007 for the purpose of (i) acquiring 100% of the equity interests of Main Street Mezzanine Fund, LP (the Fund) and its general partner, Main Street Mezzanine Management, LLC (the General Partner), (ii) acquiring 100% of the equity interests of Main Street Capital Partners, LLC (the Investment Manager), (iii) raising capital in an initial public offering, which was completed in October 2007 (the IPO), and (iv) thereafter operating as an internally managed business development company (BDC) under the Investment Company Act of 1940, as amended (the 1940 Act). The transactions discussed above were consummated in October 2007 and are collectively termed the Formation Transactions. The term Main Street refers to the Fund and the General Partner prior to the IPO and to MSCC and its subsidiaries, including the Fund and the General Partner, subsequent to the IPO.

Immediately following the Formation Transactions, Main Street Equity Interests, Inc. (MSEI) was created as a wholly owned consolidated subsidiary of MSCC. MSEI has elected for tax purposes to be treated as a taxable entity and is taxed at normal corporate tax rates based on its taxable income.

2. Basis of Presentation

Main Street s financial statements are prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP). For the three and nine months ended September 30, 2008 and 2007, the consolidated financial statements of Main Street include the accounts of MSCC, the Fund, MSEI and the General Partner. The Investment Manager is accounted for as a portfolio investment (see Note D). The Formation Transactions involved an exchange of equity interests between companies under common control. In accordance with the guidance on exchanges of equity interests between entities under common control contained in Statement of Financial Accounting Standards (SFAS) No. 141, *Business Combinations* (SFAS 141), Main Street s results of operations for the three and nine months ended September 30, 2007 and cash flows for the nine months ended September 30, 2007 are presented as if the Formation Transactions had occurred as of January 1, 2007. Main Street s results of operations for the three and nine months ended September 30, 2008 and 2007, cash flows for the nine months ended September 30, 2008 and 2007 and financial positions as of September 30, 2008 and December 31, 2007 are presented on a consolidated basis. The effects of all intercompany transactions between Main Street and its subsidiaries have been eliminated in consolidation. As a result of adopting the provisions of SFAS No. 157, *Fair Value Measurements* (SFAS 157), in the first quarter of 2008, certain reclassifications have been made to prior period balances to conform with the current financial statement presentation.

The accompanying unaudited consolidated financial statements of Main Street are presented in conformity with U.S. GAAP for interim financial information and pursuant to the requirements for reporting on Form 10-Q and Article 10 of Regulation S-X. Accordingly, certain disclosures accompanying annual financial statements prepared in accordance with U.S. GAAP are omitted. In the opinion of management, the unaudited consolidated financial results included herein contain all adjustments, consisting solely of normal recurring accruals, considered necessary for the fair presentation of financial statements for the interim periods included herein. The results of operations for the three and nine months ended September 30, 2008 are not necessarily indicative of the operating results to be expected for the full year. Also, the unaudited financial statements and notes should be read in conjunction with the audited financial statements and notes thereto for the year ended December 31, 2007. Financial statements prepared on a U.S. GAAP basis require management to make estimates and assumptions that affect the amounts and disclosures reported in the financial statements and accompanying notes. Such estimates and assumptions could change in the future as more information becomes known, which could impact the amounts reported and disclosed herein.

Under the investment company rules and regulations pursuant to Article 6 of Regulation S-X and the Audit and Accounting Guide for Investment Companies issued by the American Institute of Certified Public Accountants (the AICPA Guide), Main Street is precluded from consolidating portfolio company investments, including those in which it has a controlling interest, unless the portfolio company is another investment company. An exception to this general

principle in the AICPA Guide occurs if Main Street owns a controlled operating company that provides all or substantially all of its services directly to Main Street or to an investment company of Main Street s. None of the investments made by Main Street qualify for this exception. Therefore, Main Street s portfolio investments are carried on the balance sheet at fair value, as discussed further in Note B, with any adjustments to fair value recognized as Net Change in Unrealized Appreciation (Depreciation) from Investments on the Statement of Operations until the investment is disposed of, resulting in any gain or loss on exit being recognized as a Net Realized Gain (Loss) from Investments.

Table of Contents***Portfolio Investment Classification***

Main Street classifies its portfolio investments in accordance with the requirements of the 1940 Act. Under the 1940 Act, Control Investments are defined as investments in which Main Street owns more than 25% of the voting securities or has rights to maintain greater than 50% of the board representation. Under the 1940 Act, Affiliate Investments are defined as investments in which Main Street owns between 5% and 25% of the voting securities. Under the 1940 Act, Non-Control/Non-Affiliate Investments are defined as investments that are neither Control investments nor Affiliate investments. The Investment in affiliated Investment Manager represents Main Street's investment in a wholly owned investment manager subsidiary that is accounted for as a portfolio investment of Main Street.

NOTE B SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**1. Valuation of Investments**

Main Street accounts for its portfolio investments at fair value. As a result, Main Street adopted the provisions of SFAS 157 in the first quarter of 2008. SFAS 157 defines fair value, establishes a framework for measuring fair value, establishes a fair value hierarchy based on the quality of inputs used to measure fair value and enhances disclosure requirements for fair value measurements. SFAS 157 requires Main Street to assume that the portfolio investment is to be sold in the principal market to market participants, or in the absence of a principal market, in the most advantageous market, which may be a hypothetical market. Market participants are defined as buyers and sellers in the principal or most advantageous market that are independent, knowledgeable, and willing and able to transact. Prior to the adoption of SFAS 157, Main Street reported unearned income as a single line item on the consolidated balance sheets and consolidated schedule of investments. Unearned income is no longer reported as a separate line and is now part of the investment portfolio cost and fair value on the consolidated balance sheets and the consolidated schedule of investments. This change in presentation had no impact on the overall net cost or fair value of Main Street's investment portfolio and had no impact on Main Street's financial position or results of operations.

Main Street's business plan calls for it to invest primarily in illiquid securities issued by private companies and/or thinly traded public companies. These investments may be subject to restrictions on resale and will generally have no established trading market. As a result, Main Street determines in good faith the fair value of its portfolio investments pursuant to a valuation policy in accordance with SFAS 157 and a valuation process approved by its Board of Directors and in accordance with the 1940 Act. Main Street reviews external events, including private mergers, sales and acquisitions involving comparable companies, and includes these events in the valuation process. Main Street's valuation policy is intended to provide a consistent basis for determining the fair value of the portfolio.

For valuation purposes, control investments are composed of equity and debt securities for which Main Street has a controlling interest or has the ability to nominate a majority of the portfolio company's board of directors. Market quotations are generally not readily available for Main Street's control investments. As a result, Main Street determines the fair value of control investments using a combination of market and income approaches. Under the market approach, Main Street will typically use the enterprise value methodology to determine the fair value of these investments. The enterprise value is the fair value at which an enterprise could be sold in a transaction between two willing parties, other than through a forced or liquidation sale. Typically, private companies are bought and sold based on multiples of earnings before interest, taxes, depreciation and amortization, or EBITDA, cash flows, net income, revenues, or in limited cases, book value. There is no single methodology for estimating enterprise value. For any one portfolio company, enterprise value is generally described as a range of values from which a single estimate of enterprise value is derived. In estimating the enterprise value of a portfolio company, Main Street analyzes various factors, including the portfolio company's historical and projected financial results. Main Street allocates the enterprise value to these investments in order of the legal priority of the investments. Main Street will also use the income approach to determine the fair value of these securities, based on projections of the discounted future free cash flows that the portfolio company or the debt security will likely generate. The valuation approaches for Main Street's control investments estimate the value of the investment if it were to sell, or exit, the investment, assuming the highest and best use of the investment by market participants. In addition, these valuation approaches consider the value associated with Main Street's ability to control the capital structure of the portfolio company, as well as the timing of a potential exit.

Table of Contents

For valuation purposes, non-control investments are composed of debt and equity securities for which Main Street does not have a controlling interest, or the ability to nominate a majority of the board of directors, and for which market quotations for Main Street's non-control investments are not readily available. For Main Street's non-control investments, Main Street uses the market approach to value its equity investments and the income approach to value its debt instruments. For non-control debt investments, Main Street determines the fair value primarily using a yield approach that analyzes the discounted cash flows of interest and principal for the debt security, as set forth in the associated loan agreements, as well as the financial position and credit risk of each of these portfolio investments. Main Street's estimate of the expected repayment date of a debt security is generally the legal maturity date of the instrument, as Main Street generally intends to hold its loans to maturity. The yield analysis considers changes in leverage levels, credit quality, portfolio company performance and other factors. Main Street will use the value determined by the yield analysis as the fair value for that security; however, because of Main Street's general intent to hold its loans to maturity, the fair value will not exceed the cost of the investment. A change in the assumptions that Main Street uses to estimate the fair value of its debt securities using the yield analysis could have a material impact on the determination of fair value. If there is deterioration in credit quality or a debt security is in workout status, Main Street may consider other factors in determining the fair value of a debt security, including the value attributable to the debt security from the enterprise value of the portfolio company or the proceeds that would be received in a liquidation analysis.

Due to the inherent uncertainty in the valuation process, Main Street's estimate of fair value may differ materially from the values that would have been used had a ready market for the securities existed. In addition, changes in the market environment, portfolio company performance and other events that may occur over the lives of the investments may cause the gains or losses ultimately realized on these investments to be different than the valuations currently assigned. Main Street determines the fair value of each individual investment and records changes in fair value as unrealized appreciation or depreciation.

Main Street uses a standard investment ranking system in connection with its investment oversight, portfolio management/analysis and investment valuation procedures. This system takes into account both quantitative and qualitative factors of the portfolio company and the investments held. Each quarter, Main Street estimates the fair value of each portfolio investment, and the Board of Directors of Main Street oversees, reviews and approves, in good faith, Main Street's fair value estimates consistent with the 1940 Act requirements.

Duff & Phelps, LLC, an independent valuation firm ("Duff & Phelps"), has provided third-party valuation consulting services to Main Street, which consisted of certain mutually agreed limited procedures that Main Street identified and requested Duff & Phelps to perform (hereinafter referred to as the "Procedures"). Main Street generally requests Duff & Phelps to perform the Procedures on each portfolio company at least once in every calendar year, and for new portfolio companies, at least once in the twelve-month period subsequent to the initial investment. In certain instances, Main Street may determine that it is not cost-effective, and as a result is not in its stockholders' best interest, to request Duff & Phelps to perform the Procedures on one or more portfolio companies. Such instances include, but are not limited to, situations where the fair value of Main Street's investment in the portfolio company is determined to be insignificant relative to the total investment portfolio. During 2007, Main Street asked Duff & Phelps to perform the Procedures, at each quarter end, by reviewing a select number of investments each quarter. Duff & Phelps reviewed a total of 24 portfolio companies during the 2007 fiscal year. At year end, the 24 companies represented approximately 77% of the total portfolio investments at fair value as of December 31, 2007. For the nine months ended September 30, 2008, the Procedures were performed on investments in 18 portfolio companies comprising approximately 47% of the total portfolio investments at fair value as of September 30, 2008, with the Procedures performed on investments in 5 portfolio companies for the quarter ended March 31, 2008, 8 portfolio companies for the quarter ended June 30, 2008, and 5 portfolio companies for the quarter ended September 30, 2008. Upon completion of the Procedures in each case, Duff & Phelps concluded that the fair value, as determined by Main Street, of those investments subjected to the Procedures did not appear to be unreasonable. The Board of Directors of Main Street is ultimately and solely responsible for overseeing, reviewing and approving, in good faith, Main Street's estimate of the fair value for the investments.

Main Street believes its investments as of September 30, 2008 and December 31, 2007 approximate fair value based on the market in which Main Street operates and other conditions in existence at those reporting periods.

2. Interest and Dividend Income

Interest and dividend income is recorded on the accrual basis to the extent amounts are expected to be collected. Dividend income is recorded as dividends are declared or at the point an obligation exists for the portfolio company to make a distribution. In accordance with Main Street's valuation policy, accrued interest and dividend income is evaluated periodically for collectibility. When a loan or debt security becomes 90 days or more past due, and if Main Street otherwise does not expect the debtor to be able to service all of its debt or other obligations, Main Street will generally place the loan or debt security on non-accrual status and cease recognizing interest income on that loan or debt security until the borrower has demonstrated the ability and intent to pay contractual amounts due. If a loan or debt security's status significantly improves regarding ability to service the debt or other obligations, or if a loan or debt security is fully impaired or written off, it will be removed from non-accrual status.

Table of Contents

Main Street holds debt instruments in its portfolio that contain payment-in-kind (PIK) interest provisions. The PIK interest, computed at the contractual rate specified in each debt agreement, is added to the principal balance of the debt and is recorded as interest income. Thus, the actual collection of this interest may be deferred until the time of debt principal repayment.

As of September 30, 2008, Main Street had one investment on non-accrual status. This investment comprised approximately 0.7% of the total portfolio investments at fair value as of September 30, 2008 (excluding Main Street's investment in the Investment Manager). As of December 31, 2007, Main Street had one investment that was on non-accrual status. This investment comprised approximately 3.1% of the total portfolio investments at fair value as of December 31, 2007 (excluding Main Street's investment in the Investment Manager).

3. Fee Income Structuring and Advisory Services

Main Street may periodically provide services, including structuring and advisory services, to its portfolio companies. For services that are separately identifiable and evidence exists to substantiate fair value, income is recognized as earned, which is generally when the investment or other applicable transaction closes. Fees received in connection with debt financing transactions for services that do not meet these criteria are treated as debt origination fees and are accreted into interest income over the life of the financing.

4. Unearned Income Debt Origination Fees and Original Issue Discount

Main Street capitalizes upfront debt origination fees received in connection with financings and reflects such fees as unearned income netted against investments. Main Street will also capitalize and offset direct loan origination costs against the origination fees received. The unearned income from the fees, net of debt origination costs, is accreted into interest income based on the effective interest method over the life of the financing.

In connection with its debt investments, Main Street sometimes receives nominal cost warrants (nominal cost equity) that are valued as part of the negotiation process with the particular portfolio company. When Main Street receives nominal cost equity, Main Street allocates its cost basis in its investment between its debt securities and its nominal cost equity at the time of origination. Any resulting discount from recording the debt is reflected as unearned income, which is netted against the investment and accreted into interest income based on the effective interest method over the life of the debt.

5. Share-Based Compensation

Main Street accounts for its share-based compensation plan using the fair value method, as prescribed by SFAS No. 123R, *Share-Based Payment* (SFAS 123R). Accordingly, for restricted stock awards, Main Street measures the grant date fair value based upon the market price of its common stock on the date of the grant and amortizes that fair value as share-based compensation expense over the requisite service period or vesting term.

6. Income Taxes

Main Street has elected and intends to qualify for the tax treatment applicable to regulated investment companies (RIC) under Subchapter M of the Internal Revenue Code of 1986, as amended (the Code), and, among other things, intends to make the required distributions to its stockholders as specified therein. In order to qualify as a RIC, Main Street is required to timely distribute to its stockholders at least 90% of investment company taxable income, as defined by the Code, each year. Depending on the level of taxable income earned in a tax year, Main Street may choose to carry forward taxable income in excess of current year distributions into the next tax year and pay a 4% excise tax on such income. Any such carryover taxable income must be distributed through a dividend declared prior to filing the final tax return related to the year which generated such taxable income.

MSCC's wholly owned subsidiary, MSEI, is a taxable entity which holds certain portfolio investments of Main Street. MSEI is consolidated with Main Street for U.S. GAAP reporting purposes, and the portfolio investments held by MSEI are included in Main Street's consolidated financial statements. The purpose of MSEI is to permit Main Street to hold equity investments in portfolio companies which are pass through entities for tax purposes in order to comply with the source income requirements contained in the RIC tax requirements. MSEI is not consolidated with Main Street for income tax purposes and may generate income tax expense as a result of its ownership of certain portfolio investments. This income tax expense, if any, is reflected in Main Street's Consolidated Statement of Operations.

MSEI uses the liability method in accounting for income taxes. Deferred tax assets and liabilities are recorded for temporary differences between the tax basis of assets and liabilities and their reported amounts in the financial

statements, using statutory tax rates in effect for the year in which the temporary differences are expected to reverse. A valuation allowance is provided against deferred tax assets when it is more likely than not that some portion or all of the deferred tax asset will not be realized.

Table of Contents

Prior to the Formation Transactions, Main Street was taxed under the partnership provisions of the Code. Under these provisions of the Code, the General Partner and limited partners were responsible for reporting their share of the partnership's income or loss on their income tax returns.

Taxable income generally differs from net income for financial reporting purposes due to temporary and permanent differences in the recognition of income and expenses. Taxable income generally excludes net unrealized appreciation or depreciation, as investment gains or losses are not included in taxable income until they are realized.

7. Net Realized Gains or Losses from Investments and Net Change in Unrealized Appreciation or Depreciation from Investments

Realized gains or losses are measured by the difference between the net proceeds from the sale or redemption of an investment and the cost basis of the investment, without regard to unrealized appreciation or depreciation previously recognized, and includes investments written-off during the period net of recoveries. Net change in unrealized appreciation or depreciation from investments reflects the net change in the valuation of the investment portfolio pursuant to Main Street's valuation guidelines and the reclassification of any prior period unrealized appreciation or depreciation on exited investments.

8. Concentration of Credit Risks

Main Street places its cash in financial institutions, and, at times, such balances may be in excess of the federally insured limit.

9. Recently Issued Accounting Standards

In June 2008, the Financial Accounting Standards Board (FASB) issued EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities*. This FASB Staff Position (FSP) addresses whether instruments granted in share-based payment transactions are participating securities prior to vesting and, therefore, need to be included in the earnings allocation in computing earnings per share (EPS). This FSP will be effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those years. All prior-period EPS data presented will be adjusted retrospectively (including interim financial statements, summaries of earnings, and selected financial data) to conform to the provisions of this FSP. Early application is not permitted. Main Street is currently analyzing the effect, if any, this statement may have on its consolidated results of operations.

In October 2008, the FASB issued Staff Position No. 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset is Not Active* (FSP 157-3). FSP 157-3 provides an illustrative example of how to determine the fair value of a financial asset in an inactive market. The FSP does not change the fair value measurement principles set forth in SFAS 157. Since adopting SFAS 157 in January 2008, Main Street's practices for determining the fair value of its investment portfolio have been, and continue to be, consistent with the guidance provided in the example in FSP 157-3. Therefore, Main Street's adoption of FSP 157-3 did not affect its practices for determining the fair value of its investment portfolio and does not have a material effect on its financial position or results of operations.

NOTE C FAIR VALUE HIERARCHY AND PORTFOLIO INVESTMENTS

In connection with valuing portfolio investments, Main Street adopted the provisions of SFAS 157 in the first quarter of 2008. SFAS 157 defines fair value, establishes a framework for measuring fair value, establishes a fair value hierarchy based on the quality of inputs used to measure fair value, and enhances disclosure requirements for fair value measurements. Main Street accounts for its portfolio investments at fair value.

Fair Value Hierarchy

In accordance with SFAS 157, Main Street has categorized its portfolio investments, based on the priority of the inputs to the valuation technique, into a three-level fair value hierarchy. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical investments (Level 1) and the lowest priority to unobservable inputs (Level 3).

Table of Contents

Portfolio investments recorded on Main Street's balance sheet are categorized based on the inputs to the valuation techniques as follows:

Level 1 Investments whose values are based on unadjusted quoted prices for identical assets in an active market that Main Street has the ability to access (examples include investments in active exchange-traded equity securities and investments in most U.S. government and agency securities).

Level 2 Investments whose values are based on quoted prices in markets that are not active or model inputs that are observable either directly or indirectly for substantially the full term of the investment. Level 2 inputs include the following:

- Quoted prices for similar assets in active markets (for example, investments in restricted stock);

- Quoted prices for identical or similar assets in non-active markets (for example, investments in thinly traded public companies);

- Pricing models whose inputs are observable for substantially the full term of the investment (for example, market interest rate indices); and

- Pricing models whose inputs are derived principally from, or corroborated by, observable market data through correlation or other means for substantially the full term of the investment.

Level 3 Investments whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs reflect management's own assumptions about the assumptions a market participant would use in pricing the investment (for example, investments in illiquid securities issued by private companies).

As required by SFAS 157, when the inputs used to measure fair value fall within different levels of the hierarchy, the level within which the fair value measurement is categorized is based on the lowest level input that is significant to the fair value measurement in its entirety. For example, a Level 3 fair value measurement may include inputs that are observable (Levels 1 and 2) and unobservable (Level 3). Therefore, gains and losses for such investments categorized within the Level 3 table below may include changes in fair value that are attributable to both observable inputs (Levels 1 and 2) and unobservable inputs (Level 3).

Main Street conducts reviews of fair value hierarchy classifications on a quarterly basis. Changes in the observability of valuation inputs may result in a reclassification for certain investments. As of September 30, 2008, all of Main Street's investment portfolio consisted of investments in illiquid securities issued by private companies. The fair value determination for these investments primarily consisted of unobservable inputs. As a result, all of Main Street's portfolio investments were categorized as Level 3. The fair value determination of each portfolio investment required one or more of the following unobservable inputs:

- Financial information obtained from each portfolio company, including unaudited statements of operations and balance sheets for the most recent period available as compared to budgeted numbers;

- Current and projected financial condition of the portfolio company;

- Current and projected ability of the portfolio company to service its debt obligations;

- Type and amount of collateral, if any, underlying the investment;

- Current financial ratios (e.g., fixed charge coverage ratio, interest coverage ratio, net debt/EBITDA ratio) applicable to the investment;

- Current liquidity of the investment and related financial ratios (e.g., current ratio and quick ratio);

- Pending debt or capital restructuring of the portfolio company;

Projected operating results of the portfolio company;

Current information regarding any offers to purchase the investment;

Current ability of the portfolio company to raise any additional financing as needed;

Changes in the economic environment which may have a material impact on the operating results of the portfolio company;

Internal occurrences that may have an impact (both positive and negative) on the operating performance of the portfolio company;

Qualitative assessment of key management;

Contractual rights, obligations or restrictions associated with the investment; and

Other factors deemed relevant.

Table of Contents

The following table provides a summary of changes in fair value of Main Street's Level 3 investments for the nine months ended September 30, 2008:

Type of Investment	December 31, 2007	Accretion of Unearned Income	Redemptions/Repayments	New Investments	Net Changes from Unrealized to Realized	Net Unrealized Appreciation (Depreciation)	September 30, 2008
	Fair Value	Income					Fair Value
Debt	64,581,986	886,902	(10,866,032)	25,869,017	1,076,515	(3,254,407)	78,293,981
Equity	16,361,308		(357,500)	5,014,959	(3,077,500)	4,383,879	22,325,146
Warrant	7,082,120		(157,500)	1,821,402	(3,366,654)	358,440	5,737,808
Investment Manager	17,625,000					(704,306)	16,920,694
	105,650,414	886,902	(11,381,032)	32,705,378	(5,367,639)	783,606	123,277,629

Portfolio Investments

Main Street's portfolio investments principally consist of secured debt, equity warrants and direct equity investments in privately held companies. The debt investments are secured by either a first or second lien on the assets of the portfolio company, generally bear interest at fixed rates, and generally mature between five and seven years from original investment. Main Street also receives nominally priced equity warrants and makes direct equity investments, usually in connection with a debt investment in a portfolio company.

As discussed further in Note D, the Investment Manager is a wholly owned subsidiary of MSCC. However, the Investment Manager is accounted for as a portfolio investment of Main Street, since it conducts a significant portion of its investment management activities for entities other than MSCC or one of its subsidiaries. To allow for more relevant disclosure of Main Street's core investment portfolio, Main Street's investment in the Investment Manager has been excluded from the tables and amounts set forth in this Note C.

Investment income, consisting of interest, dividends and fees, can fluctuate dramatically upon repayment of a debt investment or sale of an equity interest. Revenue recognition in any given year could be highly concentrated among several portfolio companies. For the nine months ended September 30, 2008, Main Street recorded investment income from one portfolio company in excess of 10% of total investment income. The investment income from that portfolio company represented approximately 23% of the total investment income for the period, principally related to high levels of dividend income and transaction and structuring fees on the investment in such company. For the nine months ended September 30, 2007, Main Street did not record investment income from any portfolio company in excess of 10% of total investment income.

As of September 30, 2008, Main Street had debt and equity investments in 29 portfolio companies with an aggregate fair value of \$106,356,934 and a weighted average effective yield on its debt investments of 13.7%. As of December 31, 2007, Main Street had debt and equity investments in 27 portfolio companies with an aggregate fair value of \$88,025,414 and a weighted average effective yield on its debt investments of 14.3%. The weighted average yields were computed using the effective interest rates for all debt investments at September 30, 2008 and December 31, 2007, including amortization of deferred debt origination fees and accretion of original issue discount but excluding debt on non-accrual status.

Table of Contents

Summaries of the composition of Main Street's investment portfolio at cost and fair value as a percentage of total portfolio investments are shown in the following table:

	September 30, 2008	December 31, 2007
Cost:		
First lien debt	83.5%	81.5%
Equity	11.2%	10.7%
Equity warrants	4.6%	1.7%
Second lien debt	0.7%	6.1%
	100.0%	100.0%
	September 30, 2008	December 31, 2007
Fair Value:		
First lien debt	73.0%	70.1%
Equity	16.4%	18.6%
Equity warrants	9.9%	8.0%
Second lien debt	0.7%	3.3%
	100.0%	100.0%

The following table shows the portfolio composition by geographic region of the United States at cost and fair value as a percentage of total portfolio investments. The geographic composition is determined by the location of the corporate headquarters of the portfolio company.

	September 30, 2008	December 31, 2007
Cost:		
Southwest	49.6%	31.9%
West	28.8%	37.1%
Southeast	9.4%	11.4%
Northeast	7.2%	13.8%
Midwest	5.0%	5.8%
	100.0%	100.0%
	September 30, 2008	December 31, 2007
Fair Value:		
Southwest	56.0%	41.2%
West	26.3%	32.9%
Northeast	7.6%	9.1%
Southeast	4.6%	10.3%
Midwest	5.5%	6.5%
	100.0%	100.0%

Table of Contents

Main Street's portfolio investments are generally in lower middle-market companies conducting business in a variety of industries. Set forth below are tables showing the composition of Main Street's portfolio by industry at cost and fair value as of September 30, 2008 and December 31, 2007:

Cost:	September 30, 2008	December 31, 2007
Industrial equipment	12.6%	6.6%
Precast concrete manufacturing	12.6%	0.0%
Custom wood products	9.5%	8.4%
Manufacturing	9.2%	12.0%
Agricultural services	8.5%	11.6%
Electronics manufacturing	7.8%	9.5%
Retail	6.9%	3.3%
Health care products	6.1%	4.2%
Mining and minerals	5.0%	9.1%
Transportation/Logistics	5.0%	6.7%
Metal fabrication	3.5%	4.6%
Health care services	2.9%	5.9%
Restaurant	2.7%	3.4%
Professional services	2.2%	3.3%
Equipment rental	2.2%	2.6%
Infrastructure products	1.8%	2.4%
Information services	0.9%	1.2%
Industrial services	0.5%	0.4%
Distribution	0.1%	2.2%
Consumer products	0.0%	2.6%
	100%	100%

Fair Value:	September 30, 2008	December 31, 2007
Precast concrete manufacturing	15.1%	0.0%
Industrial equipment	11.3%	6.0%
Electronics manufacturing	8.5%	9.6%
Agricultural services	8.2%	10.5%
Retail	7.6%	3.4%
Custom wood products	7.1%	7.5%
Health care products	6.2%	4.1%
Manufacturing	5.5%	9.5%
Transportation/Logistics	5.5%	6.6%
Health care services	4.8%	6.0%
Metal fabrication	4.4%	4.2%
Restaurant	3.7%	4.5%
Professional services	3.5%	4.1%
Industrial services	2.8%	2.9%
Equipment rental	2.1%	2.4%
Infrastructure products	1.5%	2.2%
Information services	1.0%	1.2%

Edgar Filing: Main Street Capital CORP - Form 10-Q

Mining and minerals	0.7%	12.9%
Distribution	0.5%	2.4%
	100%	100%

At September 30, 2008, Main Street had one investment that was greater than 10% of its total investment portfolio at fair value. That investment represented approximately 15.1% of the portfolio at fair value. At December 31, 2007, Main Street had one investment that was greater than 10% of its total investment portfolio at fair value. That investment represented approximately 10.5% of the portfolio at fair value.

Table of Contents**NOTE D WHOLLY OWNED INVESTMENT MANAGER**

As part of the Formation Transactions, the Investment Manager became a wholly owned subsidiary of MSCC. However, the Investment Manager is accounted for as a portfolio investment of Main Street, since the Investment Manager conducts a significant portion of its investment management activities for Main Street Capital II, LP (MSC II), a separate Small Business Investment Company (SBIC) fund, which is not part of MSCC or one of its subsidiaries. The investment in the Investment Manager is accounted for using fair value accounting, with the fair value determined by Main Street and approved, in good faith, by Main Street's Board of Directors, based on the same valuation methodologies applied to determine the original \$18 million valuation. The original valuation for the Investment Manager was based on the estimated present value of the net cash flows received for investment management services provided to MSC II, over the estimated dollar averaged life of the related management contract, and was also based on comparable public market transactions. Any change in fair value is recognized on Main Street's statement of operations as Unrealized appreciation (depreciation) in Investment in affiliated Investment Manager, with a corresponding increase (in the case of appreciation) or decrease (in the case of depreciation) to Investment in affiliated Investment Manager on Main Street's balance sheet. Main Street believes that the valuation for the Investment Manager will decrease over the life of the management contract with MSC II, absent obtaining additional recurring cash flows from performing investment management activities for other external investment entities.

The Investment Manager has elected, for tax purposes, to be treated as a taxable entity and is taxed at normal corporate tax rates based on its taxable income. The taxable income of the Investment Manager may differ from its book income due to temporary book and tax timing differences, as well as permanent differences. The Investment Manager provides for any current taxes payable and deferred tax items in its separate financial statements.

MSCC has a support services agreement with the Investment Manager. As a wholly owned subsidiary of MSCC, the Investment Manager manages the day-to-day operational and investment activities of Main Street. The Investment Manager pays normal operating and administrative expenses, except those specifically required to be borne by MSCC, which principally include direct costs that are specific to MSCC's status as a publicly traded entity. The expenses paid by the Investment Manager include the cost of salaries and related benefits, rent, equipment and other administrative costs required for Main Street's day-to-day operations.

Subsequent to the Formation Transactions and the IPO, the Investment Manager is reimbursed for its excess expenses associated with providing investment management and other services to MSCC and its subsidiaries, as well as MSC II. Each quarter, as part of the support services agreement, MSCC makes payments to cover all expenses incurred by the Investment Manager, less the recurring management fees that the Investment Manager receives from MSC II pursuant to a long-term investment advisory services agreement.

Summarized financial information for the Investment Manager is as follows:

	As of September 30, 2008	As of December 31, 2007
ASSETS		
Current assets*	\$ 366,721	\$ 129,675
Total assets	\$ 366,721	\$ 129,675
LIABILITIES		
Current liabilities**	\$ 511,294	\$ 274,247
Total liabilities	\$ 511,294	\$ 274,247

**Nine Months Ended
September 30, 2008**

Management fee income from MSC II	\$	2,493,900
Compensation and other administrative expenses (net of reimbursement by MSCC)		(2,493,900)
Net income	\$	

* Includes
\$235,182 as of
September 30,
2008 due from
MSCC.

** Includes
\$207,783 as of
December 31,
2007 due to
MSCC.

Prior to the Formation Transactions and the IPO, the Fund had a management agreement with the Investment Manager. The Investment Manager managed the day-to-day operational and investment activities of the Fund, paying similar types of operating expenses as noted in the support services agreement with MSCC. Management fees paid by the Fund to the Investment Manager for the three and nine months ended September 30, 2007 were \$499,979 and \$1,499,937, respectively. For the three and nine months ended September 30, 2008, the net excess expenses reimbursed by MSCC to the Investment Manager in connection with the support services agreement were \$275,039 and \$719,777, respectively.

Table of Contents**NOTE E SBIC DEBENTURES**

SBIC debentures payable at September 30, 2008 and December 31, 2007 were \$55 million. SBIC debentures provide for interest to be paid semi-annually, with principal due at the applicable 10-year maturity date. The weighted average interest rate as of September 30, 2008 and December 31, 2007 was 5.78%. The first principal maturity due under the existing SBIC debentures is in 2013. Main Street is subject to regular compliance examinations by the Small Business Administration. There have been no historical findings resulting from these examinations.

NOTE F REVOLVING LINE OF CREDIT

On December 31, 2007, Main Street entered into a Treasury Secured Revolving Credit Agreement (the Treasury Facility) among Main Street, Wachovia Bank, National Association, and Branch Banking and Trust Company (BB&T), as administrative agent for the lenders. Under the Treasury Facility, the lenders have agreed to extend revolving loans to Main Street in an amount not to exceed \$100 million. The purpose of the Treasury Facility is to provide flexibility in the sizing of portfolio investments and to facilitate the growth of Main Street's investment portfolio. The Treasury Facility has a two-year term and bears interest, at Main Street's option, either (i) at the LIBOR rate or (ii) at a published prime rate of interest, plus 25 basis points in either case. The applicable interest rates under the Treasury Facility would be increased by 15 basis points if usage under the Treasury Facility is in excess of 50% of the days within a given calendar quarter. The Treasury Facility also requires payment of 15 basis points per annum in unused commitment fees based on the average daily unused balances under the facility. The Treasury Facility is secured by certain securities accounts maintained by BB&T and is also guaranteed by the Investment Manager.

As of September 30, 2008 and December 31, 2007, Main Street had no outstanding borrowings under the Treasury Facility. For the nine months ended September 30, 2008, interest expense and unused commitment fees incurred under the Treasury Facility totaled \$3,819 and \$114,479, respectively.

During October 2008, Main Street unilaterally reduced the commitments under the Treasury Facility from \$100 million to \$50 million. The reduction in the size of the Treasury Facility will reduce the amount of unused commitment fees paid by Main Street.

NOTE G FINANCIAL HIGHLIGHTS

The financial highlights are prepared in accordance with the guidance for exchanges of equity interests between entities under common control contained in SFAS 141, with the 2007 ratios and per share amounts calculated as if the Formation Transactions and the IPO had occurred as of January 1, 2007.

Per Share Data:	Nine months	
	Ended September 30,	
	2008	2007
Net asset value at beginning of period	\$ 12.85	\$ 5.07
Net investment income (1)	\$ 0.85	\$ 0.46
Net realized gains (1) (2)	\$ 0.56	\$ 0.32
Net change in unrealized appreciation (depreciation) on investments (1) (2)	\$ (0.51)	\$ (0.10)
Income tax benefit (1)	\$ 0.26	\$
Net increase in net assets resulting from operations (1)	\$ 1.16	\$ 0.68
Net decrease in net assets from dividends paid to stockholders for the nine months ended September 30, 2008	\$ (1.05)	\$
Net decrease in net assets from dividends declared as of September 30, 2008 for the October 15, 2008 monthly dividend	\$ (0.13)	\$
Net decrease in net assets from distributions to partners, net of contributions (3)	\$	\$ (0.75)
Other (4)	\$ (0.34)	\$
Net asset value at September 30, 2008 and 2007	\$ 12.49	\$ 5.00

Edgar Filing: Main Street Capital CORP - Form 10-Q

Market value at September 30, 2008	\$ 11.55	N/A
Shares outstanding at September 30, 2008 and 2007	9,241,183	8,526,726

(1) Based on weighted average number of shares of common stock outstanding for the period.

(2) Net realized gains and net change in unrealized appreciation or depreciation can fluctuate significantly from period to period.

(3) Capital contributions totaled \$66,348.

(4) Represents the impact of the different share amounts used in calculating per share data as a result of calculating certain per share data based on the weighted average basic shares outstanding during the period and certain per share data based on the shares outstanding as of a period end or transaction date.

Table of Contents

	Nine Months Ended September 30,	
	2008	2007
Net assets at end of period	\$ 115,417,819	\$ 42,658,191
Average net assets	101,037,698	42,315,855
Average outstanding debt	55,000,000	52,525,000
Ratio of total expenses, excluding interest expense, to average net assets (3)(4)	2.28%	5.67%
Ratio of total expenses to average net assets (3)(4)	4.99%	11.33%
Ratio of net investment income to average net assets (3)(4)	7.54%	9.18%
Total return based on change in net asset value(1)(2)(3)(4)	9.46%	13.45%
(1) Total return based on change in net asset value was calculated using the sum of ending net asset value plus distributions to stockholders and/or members and partners during the period less capital contributions during the period, divided by the beginning net asset value.		
(2) For the periods prior to the Formation Transactions, this ratio combines the total return for both the managing investors (the General Partner) and the non-managing investors		

(limited partners).

(3) Not annualized.

(4) 2007 amounts include professional costs related to the IPO.

NOTE H DIVIDEND, DISTRIBUTIONS AND TAXABLE INCOME

In September 2008, Main Street announced that it would begin making dividend payments on a monthly, as opposed to a quarterly, basis beginning in October 2008. Main Street's Board of Directors declared monthly dividends of \$0.125 per share for each of October, November and December 2008.

For the nine months ended September 30, 2008, Main Street's Board of Directors has declared dividends of approximately \$10.6 million or \$1.18 per share of common stock, with \$9.5 million or \$1.05 per share paid to stockholders for the period and \$1.1 million or \$0.125 per share declared as of September 30, 2008 for the October 2008 monthly dividend.

The determination of the tax attributes of Main Street's distributions is made annually, based upon its taxable income for the full year and distributions paid for the full year. Therefore, a determination made on an interim basis may not be representative of the actual tax attributes of distributions for a full year. Main Street's estimates for the tax attributes of its distributions year-to-date as of September 30, 2008 allocate a range of 55 - 65% of such distributions to ordinary income and short-term capital gains and 35 - 45% to long-term capital gains. There can be no assurance that these ranges are representative of the final tax attributes of Main Street's 2008 distributions to its stockholders. Ordinary dividend distributions from a RIC do not qualify for the 15% maximum tax rate on dividend income from domestic corporations and qualified foreign corporations, except to the extent that the RIC received the income in the form of qualifying dividends from domestic corporations and qualified foreign corporations (which Main Street did not receive during the year-to-date period of 2008).

Main Street has elected and intends to qualify as a RIC on its 2007 and 2008 tax returns. As a RIC, Main Street generally will not pay corporate-level federal income taxes on any net ordinary income or capital gains that Main Street distributes to its stockholders as dividends. Main Street must distribute at least 90% of its investment company taxable income to qualify for pass-through tax treatment and maintain its RIC status. Main Street has distributed and currently intends to distribute sufficient dividends to qualify as a RIC. As part of maintaining RIC status, taxable income (subject to a 4% excise tax) pertaining to a given fiscal year may be distributed up to 12 months subsequent to the end of that fiscal year, provided such dividends are declared prior to the filing of Main Street's federal income tax return.

Table of Contents

One of Main Street's wholly owned subsidiaries, MSEI, is a taxable entity which holds certain portfolio investments for Main Street. MSEI is consolidated with Main Street, and the portfolio investments held by MSEI are included in Main Street's consolidated financial statements. The purpose of MSEI is to permit Main Street to hold equity investments in portfolio companies which are pass through entities for tax purposes in order to comply with the source income requirements contained in the RIC tax provisions of the Code. MSEI is not consolidated with Main Street for income tax purposes and may generate income tax expense as a result of its ownership of various portfolio investments. This income tax expense, if any, is reflected in Main Street's Consolidated Statement of Operations. Listed below is a reconciliation of Net Increase in Net Assets Resulting from Operations to taxable income and to total distributions declared to common stockholders for the nine months ended September 30, 2008:

	Estimated
Net increase in net assets resulting from operations	\$ 10,364,435
Share-based compensation	315,726
Net change in unrealized depreciation on investments not taxable until realized	4,584,033
Income tax benefit	(2,297,265)
Pre-tax income of taxable subsidiary, MSEI, not consolidated for tax purposes	(1,140,575)
Book income and tax income differences, including debt origination and structuring fees and realized gains	1,398,661
Taxable income	13,225,015
Taxable income earned in prior year and carried forward for distribution in current year	1,481,131
Taxable income earned in current quarter and carried forward for distribution	(4,080,868)
Total distributions declared to common stockholders	\$ 10,625,278

Prior to the Formation Transactions, the Fund was taxed under the partnership provisions of the Code. Under these provisions of the Code, the General Partner and limited partners are responsible for reporting their share of the partnership's income or loss on their income tax returns. Listed below is a reconciliation of Net Increase in Members Equity and Partners' Capital Resulting from Operations to taxable income for the nine months ended September 30, 2007:

Net increase in members' equity and partners' capital resulting from operations	\$ 5,819,312
Net change in unrealized depreciation from investments	808,596
Accrual basis to cash basis adjustments:	
Deferred debt origination fees included in taxable income	327,308
Accretion of unearned fee income for book income	(619,510)
Net change in interest receivable	(68,941)
Net change in interest payable	593,628
Taxable income	\$ 6,860,393

NOTE I DIVIDEND REINVESTMENT PLAN

Main Street's DRIP provides for the reinvestment of dividends on behalf of its stockholders, unless a stockholder has elected to receive dividends in cash. As a result, if Main Street declares a cash dividend, the company's stockholders who have not opted out of the DRIP by the dividend record date will have their cash dividend automatically reinvested into additional shares of MSCC common stock. Main Street has the option to satisfy the share requirements of the DRIP through the issuance of shares of common stock or through open market purchases of common stock by the DRIP plan administrator. Newly issued shares will be valued based upon the final closing price of MSCC's common

stock on the valuation date determined by Main Street's Board of Directors. Shares purchased in the open market to satisfy the DRIP requirements will be valued based upon the average price of the applicable shares purchased by the DRIP plan administrator, before any associated brokerage or other costs.

Table of Contents

For the nine months ended September 30, 2008, \$3,728,375 of the total \$9,503,336 in dividends paid to stockholders represented DRIP participation and 256,641 shares of common stock were purchased in the open market to satisfy the DRIP participation requirements. Additionally, 15,820 shares valued at \$213,728 were issued to satisfy remaining DRIP obligations. During September 2008, Main Street funded \$500,000 to its dividend reinvestment plan administrator for the purchase of common stock in the open market to satisfy the DRIP participation requirements in connection with the October 2008 monthly dividend. For the year ended December 31, 2007, \$1,903,116 of the total \$2,912,820 in dividends paid to stockholders represented DRIP participation and 132,992 shares of common stock were issued to satisfy the DRIP participation requirements. The shares disclosed above relate only to Main Street's DRIP and exclude any activity related to broker-managed dividend reinvestment plans.

NOTE J SHARE-BASED COMPENSATION

Main Street accounts for its share-based compensation plan using the fair value method, as prescribed by SFAS 123R. Accordingly, for restricted stock awards, Main Street measured the grant date fair value based upon the market price of its common stock on the date of the grant and will amortize this fair value to share-based compensation expense over the requisite service period or vesting term.

On July 1, 2008, Main Street's Board of Directors approved the issuance of 245,645 shares of restricted stock to Main Street employees pursuant to the Main Street Capital Corporation 2008 Equity Incentive Plan. These shares will vest over a four-year period from the grant date and will be expensed over a four-year service period starting on the grant date.

On July 1, 2008, a total of 20,000 shares of restricted stock was issued to Main Street's independent directors pursuant to the Main Street Capital Corporation 2008 Non-Employee Director Restricted Stock Plan. One-half of those shares vested immediately on the grant date, and the remaining half will vest on the day immediately preceding the next annual meeting at which Main Street stockholders elect directors, provided that these independent directors have been in continuous service as members of the Board through such date. As a result, 50% of those shares were expensed during July 2008 with the remaining 50% to be expensed over a one-year service period starting on the grant date.

For the three months ended September 30, 2008, Main Street recognized total share-based compensation expense of \$315,726 related to the restricted stock issued to Main Street employees and Main Street's independent directors.

As of September 30, 2008, there was \$2,575,893 of total unrecognized compensation cost related to Main Street's non-vested restricted shares. This cost is expected to be recognized over a weighted-average period of approximately 3.7 years.

NOTE K EARNINGS PER SHARE

The following table summarizes our calculation of basic and diluted earnings per share for the three and nine months ended September 30, 2008 and 2007:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Numerator:				
Net increase in net assets resulting from operations	\$ 2,673,703	\$ 2,708,941	\$ 10,364,435	\$ 5,819,312
Denominator:				
Basic weighted-average shares outstanding	8,972,985	8,526,726	8,964,808	8,526,726
Dilutive effect of restricted stock on which forfeiture provisions have not lapsed	106		1,067	
Diluted average shares outstanding	8,973,091	8,526,726	8,965,875	8,526,726
Net increase in net assets resulting from operations per share:				

Edgar Filing: Main Street Capital CORP - Form 10-Q

Basic	\$	0.30	\$	0.32	\$	1.16	\$	0.68
Diluted	\$	0.30	\$	0.32	\$	1.16	\$	0.68

Table of Contents

We use the treasury stock method to calculate diluted earnings per share. We include performance-based restricted stock in our calculation of diluted earnings per share when we believe it is probable the performance criteria will be met and the forfeiture provisions have not lapsed.

NOTE L COMMITMENTS

At September 30, 2008, Main Street had one outstanding commitment to fund an unused revolving loan for up to \$300,000.

NOTE M SUPPLEMENTAL CASH FLOW DISCLOSURES

Listed below are supplemental cash flow disclosures for the nine months ended September 30, 2008 and 2007:

	September 30, 2008	September 30, 2007
Interest paid	\$ 3,267,981	\$ 2,852,002
Taxes paid	\$ 312,751	\$
Non-cash financing activities:		
Shares issued pursuant to the DRIP	\$ 213,728	\$

NOTE N RELATED PARTY TRANSACTIONS

Main Street co-invested with MSC II in several existing portfolio investments prior to the IPO, but did not co-invest with MSC II subsequent to the IPO and prior to June 2008. In June 2008, Main Street received exemptive relief from the SEC to allow Main Street to resume co-investing with MSC II in accordance with the terms of such exemptive relief. MSC II is managed by the Investment Manager, and the Investment Manager is wholly owned by MSCC. MSC II is an SBIC fund with similar investment objectives to Main Street and which began its investment operations in January 2006. The co-investments among Main Street and MSC II had all been made at the same time and on the same terms and conditions. The co-investments were also made in accordance with the Investment Manager's conflicts policy and in accordance with the applicable SBIC conflict of interest regulations.

As discussed further in Note D, Wholly Owned Investment Manager, Main Street paid certain management fees to the Investment Manager during the year ended December 31, 2007. Subsequent to the Formation Transactions, the Investment Manager is a wholly owned portfolio company of Main Street. At September 30, 2008, the Investment Manager had a receivable of \$235,182 due from MSCC, and at December 31, 2007, the Investment Manager had a payable of \$207,783 due to MSCC, both related to the funding of recurring administrative expenses required to support MSCC's business.

NOTE O SUBSEQUENT EVENTS

In October 2008, Main Street began paying dividends on a monthly basis. In September 2008, Main Street declared monthly dividends of \$0.125 per share for each of October, November and December 2008, which equates to a \$0.375 per share dividend for the fourth quarter of 2008. These monthly dividends are paid based upon the accumulated taxable income recognized by Main Street, including excess undistributed taxable income from 2007 that was carried forward for distribution during 2008. The accumulated taxable income principally consists of ordinary taxable income recognized during 2008, as well as realized capital gains generated in 2008. The monthly dividend for October was paid on October 15, 2008 to stockholders of record on September 18, 2008. The remaining fourth quarter dividends will be payable on November 14, 2008 and December 15, 2008 to stockholders of record on October 17, 2008 and November 19, 2008, respectively.

Table of Contents

During October 2008, Main Street completed three new portfolio investments. Main Street's new portfolio investments include a \$3.7 million investment in Ziegler's NYPD, LLC (NYPD) and a \$2.0 million investment in Schneider Sales Management, LLC (Schneider), both supporting management buyout transactions, and a \$1.8 million investment in California Healthcare Medical Billing, Inc. (CHMB) for growth financing purposes. Main Street's investment in NYPD consisted of a \$3.3 million first lien, secured debt investment and a \$0.4 million equity investment, representing approximately 29% of the fully diluted equity interests in NYPD. NYPD is a New York-themed pizzeria and Italian restaurant group operating in affluent suburban geographic areas. Main Street's investment in Schneider consists of a \$2.0 million first lien, secured debt investment with equity warrant participation representing approximately 12% of the fully diluted equity interests in Schneider. Schneider is a leading publisher of proprietary sales development materials and provider of sales-management consulting services for financial institutions. Main Street's investment in CHMB consists of a \$1.4 million first lien, secured debt investment with equity warrant participation, and a \$0.4 million equity investment. Through its equity warrant participation and direct equity investment, Main Street owns approximately 18% of the fully diluted equity interests in CHMB. Main Street has also provided CHMB with a \$0.6 million first lien, secured revolving loan to support CHMB's continuing growth. CHMB provides outsourced medical billing, revenue cycle management, and administrative healthcare support to physician practices, clinics and multi-specialty groups.

In October 2008, Main Street completed the full exit of its portfolio investment in Transportation General, Inc (TGI) as part of a leveraged recapitalization through a major international bank. As part of the TGI recapitalization transaction, Main Street received full repayment on its remaining debt investment and sold its equity warrant position to TGI for approximately \$0.6 million in cash proceeds. In addition, Main Street received structuring and advisory fees of approximately \$0.6 million related to the recapitalization transaction. Main Street realized a cash internal rate of return over the life of its investment in TGI equal to approximately 23%.

During October 2008, Main Street closed a \$30 million, three-year investment credit facility (the Investment Facility) that will be used to provide additional liquidity in support of future investment and operational activities. The Investment Facility allows for an increase in the total size of the facility up to \$75 million, subject to certain conditions, and has a maturity date of October 24, 2011. Borrowings under the Investment Facility bear interest, subject to Main Street's election, on a per annum basis equal to (i) the applicable LIBOR rate plus 2.75% or (ii) the applicable base rate plus 0.75%. Main Street will pay unused commitment fees of 0.375% per annum on the average unused lender commitments under the Investment Facility. BB&T and Compass Bank are the lenders under the Investment Facility. Main Street has no borrowings currently outstanding under the Investment Facility.

Due to the maturation of Main Street's investment portfolio and the additional flexibility provided by the Investment Facility, Main Street unilaterally reduced the Treasury Facility from \$100 million to \$50 million during October 2008. The reduction in the size of the Treasury Facility will reduce the amount of unused commitment fees paid by Main Street. Main Street has no borrowings currently outstanding under the Treasury Facility.

Table of Contents**Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The information in this section contains forward-looking statements that involve risks and uncertainties. Please see Risk Factors and Special Note Regarding Forward-Looking Statements in our Annual Report on Form 10-K for the year ended December 31, 2007, filed with the SEC on March 21, 2008, for a discussion of the uncertainties, risks and assumptions associated with these statements. You should read the following discussion in conjunction with the financial statements and related notes and other financial information included in the Annual Report on Form 10-K for the year ended December 31, 2007.

ORGANIZATION

Main Street Capital Corporation (MSCC) was formed on March 9, 2007 for the purpose of (i) acquiring 100% of the equity interests of Main Street Mezzanine Fund, LP (the Fund) and its general partner, Main Street Mezzanine Management, LLC (the General Partner), (ii) acquiring 100% of the equity interests of Main Street Capital Partners, LLC (the Investment Manager), (iii) raising capital in an initial public offering, which was completed in October 2007 (the IPO), and (iv) thereafter operating as an internally managed business development company (BDC) under the Investment Company Act of 1940, as amended (the 1940 Act). The transactions discussed above were consummated in October 2007 and are collectively termed the Formation Transactions. Immediately following the Formation Transactions, Main Street Equity Interests, Inc. (MSEI) was created as a wholly owned consolidated subsidiary of MSCC. MSEI has elected for tax purposes to be treated as a taxable entity and is taxed at normal corporate tax rates based on its taxable income. Unless otherwise noted or the context otherwise indicates, the terms we, us, our and Main Street refer to the Fund and the General Partner prior to the IPO and to MSCC and its subsidiaries, including the Fund and the General Partner, subsequent to the IPO.

OVERVIEW

We are a principal investment firm focused on providing customized debt and equity financing to lower middle-market companies, which we define as companies with annual revenues between \$10.0 and \$100.0 million that operate in diverse industries. We invest primarily in secured debt instruments, equity investments, warrants and other securities of lower middle-market companies based in the United States. Our principal investment objective is to maximize our portfolio's total return by generating current income from our debt investments and capital appreciation from our equity-related investments. Our investments generally range in size from \$2.0 million to \$15.0 million.

We seek to fill the current financing gap for lower middle-market businesses, which, historically, have had limited access to financing from commercial banks and other traditional sources. Given the current credit environment, we believe the limited access to financing for lower middle market companies is even more pronounced. The underserved nature of the lower middle market creates the opportunity for us to meet the financing needs of lower middle-market companies while also negotiating favorable transaction terms and equity participations. Our ability to invest across a company's capital structure, from senior secured loans to equity securities, allows us to offer portfolio companies a comprehensive suite of financing solutions, or one stop financing. Providing customized, one stop financing solutions has also become even more relevant to our portfolio companies in the current credit environment. We generally seek to partner directly with entrepreneurs, management teams and business owners in making our investments. Main Street believes that its core investment strategy has a lower correlation to the broader debt and equity markets.

We expect to grow our dividends and our portfolio of investments on a steady, manageable basis. The dividends declared for the fourth quarter of 2008 represent a 13.6% increase from the dividends paid for the same period of the prior year. Including the dividends declared for the fourth quarter of 2008, Main Street will have paid dividends of \$1.425 per share during 2008. We also expect that we will cover our annual dividends through net realized income, which includes net investment income and net realized gains. Net realized income reflects both the current income and capital appreciation components of our investment strategy. We anticipate that our net investment income will continue to grow as we deploy our existing lower yield cash and cash equivalents into higher yielding portfolio investments. However, Main Street intends to be very selective in its near term portfolio growth due to the uncertainties in the current economic environment.

At September 30, 2008, Main Street has \$46.8 million in cash and cash equivalents. During October 2008, Main Street closed a \$30 million multi-year investment line of credit. Due to its existing and available cash and other resources,

Main Street expects to have sufficient cash resources to support its investment and operational activities for the remainder of 2008 and throughout all of 2009. However, this projection will be impacted by, among other things, the pace of investment originations and investment redemptions, the level of cash flow from operations and cash flow from realized gains, and the level of dividends paid in cash.

Table of Contents**CRITICAL ACCOUNTING POLICIES*****Basis of Presentation***

The financial statements are prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP). For the three and nine months ended September 30, 2008 and 2007, the consolidated financial statements of Main Street include the accounts of MSCC, the Fund, MSEI and the General Partner. The Investment Manager is accounted for as a portfolio investment. The Formation Transactions involved an exchange of equity interests between companies under common control. In accordance with the guidance on exchanges of equity interests between entities under common control contained in Statement of Financial Accounting Standards (SFAS) No. 141, *Business Combinations* (SFAS 141), Main Street's results of operations for the three and nine months ended September 30, 2007 and cash flows for the nine months ended September 30, 2007 are presented as if the Formation Transactions had occurred as of January 1, 2007. Main Street's results of operations for the three and nine months ended September 30, 2008 and 2007, cash flows for the nine months ended September 30, 2008 and 2007 and financial positions as of September 30, 2008 and December 31, 2007 are presented on a consolidated basis. The effects of all intercompany transactions between Main Street and its subsidiaries have been eliminated in consolidation. As a result of adopting the provisions of SFAS No. 157, *Fair Value Measurements* (SFAS 157), in the first quarter of 2008, certain reclassifications have been made to prior period balances to conform with the current financial statement presentation. The accompanying unaudited consolidated financial statements of Main Street are presented in conformity with U.S. GAAP for interim financial information and pursuant to the requirements for reporting on Form 10-Q and Article 10 of Regulation S-X. Accordingly, certain disclosures accompanying annual financial statements prepared in accordance with U.S. GAAP are omitted. In the opinion of our management, the unaudited consolidated financial results included herein contain all adjustments, consisting solely of normal recurring accruals considered necessary for the fair presentation of financial statements for the interim periods included herein. The results of operations for the three and nine months ended September 30, 2008 are not necessarily indicative of the operating results to be expected for the full year. Also, the unaudited financial statements and notes should be read in conjunction with our audited financial statements and notes thereto for the year ended December 31, 2007. Financial statements prepared on a U.S. GAAP basis require management to make estimates and assumptions that affect the amounts and disclosures reported in the financial statements and accompanying notes. Such estimates and assumptions could change in the future as more information becomes known, which could impact the amounts reported and disclosed herein.

Under the investment company rules and regulations pursuant to Article 6 of Regulation S-X and the Audit and Accounting Guide for Investment Companies issued by the American Institute of Certified Public Accountants (the AICPA Guide), we are precluded from consolidating portfolio company investments, including those in which we have a controlling interest, unless the portfolio company is another investment company. An exception to this general principle in the AICPA Guide occurs if we own a controlled operating company that provides all or substantially all of its services directly to us, or to an investment company of ours. None of the investments made by us qualify for this exception. Therefore, our portfolio investments are carried on the balance sheet at fair value, as discussed further in Note B to our consolidated financial statements, with any adjustments to fair value recognized as Net Change in Unrealized Appreciation (Depreciation) from Investments on our Statement of Operations until the investment is disposed of, resulting in any gain or loss on exit being recognized as a Net Realized Gain (Loss) from Investments.

Investment Valuation

The most significant estimate inherent in the preparation of our financial statements is the valuation of our portfolio investments and the related amounts of unrealized appreciation and depreciation. As of September 30, 2008 and December 31, 2007, approximately 72% and 60%, respectively, of our total assets represented investments in portfolio companies valued at fair value (including the investment in the Investment Manager). We are required to report our investments at fair value. We adopted the provisions of SFAS 157 in the first quarter of 2008. SFAS 157 defines fair value, establishes a framework for measuring fair value, establishes a fair value hierarchy based on the quality of inputs used to measure fair value, and enhances disclosure requirements for fair value measurements.

Our business plan calls for us to invest primarily in illiquid securities issued by private companies and/or thinly traded public companies. These investments may be subject to restrictions on resale and will generally have no established trading market. As a result, we determine in good faith the fair value of our portfolio investments pursuant to a

valuation policy in accordance with SFAS 157 and a valuation process approved by our Board of Directors and in accordance with the 1940 Act. We review external events, including private mergers, sales and acquisitions involving comparable companies, and include these events in the valuation process. Our valuation policy is intended to provide a consistent basis for determining the fair value of the portfolio.

Table of Contents

For valuation purposes, control investments are composed of equity and debt securities for which we have a controlling interest or have the ability to nominate a majority of the portfolio company's board of directors. Market quotations are generally not readily available for our control investments. As a result, we determine the fair value of these investments using a combination of market and income approaches. Under the market approach, we will typically use the enterprise value methodology to determine the fair value of these investments. The enterprise value is the fair value at which an enterprise could be sold in a transaction between two willing parties, other than through a forced or liquidation sale. Typically, private companies are bought and sold based on multiples of earnings before interest, taxes, depreciation and amortization, or EBITDA, cash flows, net income, revenues, or in limited cases, book value. There is no single methodology for estimating enterprise value. For any one portfolio company, enterprise value is generally described as a range of values from which a single estimate of enterprise value is derived. In estimating the enterprise value of a portfolio company, we analyze various factors, including the portfolio company's historical and projected financial results. We allocate the enterprise value to these investments in order of the legal priority of the investments. We will also use the income approach to determine the fair value of these securities, based on projections of the discounted future free cash flows that the portfolio company or the debt security will likely generate. The valuation approaches for our control investments estimate the value of the investment if we were to sell, or exit, the investment, assuming the highest and best use of the investment by market participants. In addition, these valuation approaches consider the value associated with our ability to control the capital structure of the portfolio company, as well as the timing of a potential exit.

For valuation purposes, non-control investments are composed of debt and equity securities for which we do not have a controlling interest, or the ability to nominate a majority of the board of directors. Market quotations for our non-control investments are not readily available. For our non-control investments, we use the market approach to value our equity investments and the income approach to value our debt instruments. For non-control debt investments, we determine the fair value primarily using a yield approach that analyzes the discounted cash flows of interest and principal for the debt security, as set forth in the associated loan agreements, as well as the financial position and credit risk of each of these portfolio investments. Our estimate of the expected repayment date of a debt security is generally the legal maturity date of the instrument, as we generally intend to hold our loans to maturity. The yield analysis considers changes in leverage levels, credit quality, portfolio company performance and other factors. We will use the value determined by the yield analysis as the fair value for that security; however, because of our general intent to hold our loans to maturity, the fair value will not exceed the cost of the investment. A change in the assumptions that we use to estimate the fair value of our debt securities using the yield analysis could have a material impact on the determination of fair value. If there is deterioration in credit quality or a debt security is in workout status, we may consider other factors in determining the fair value of a debt security, including the value attributable to the debt security from the enterprise value of the portfolio company or the proceeds that would be received in a liquidation analysis.

Due to the inherent uncertainty in the valuation process, our estimate of fair value may differ materially from the values that would have been used had a ready market for the securities existed. In addition, changes in the market environment, portfolio company performance and other events that may occur over the lives of the investments may cause the gains or losses ultimately realized on these investments to be different than the valuations currently assigned. We determine the fair value of each individual investment and record changes in fair value as unrealized appreciation or depreciation.

Revenue Recognition***Interest and Dividend Income***

We record interest and dividend income on the accrual basis to the extent amounts are expected to be collected. Dividend income is recorded as dividends are declared or at the point an obligation exists for the portfolio company to make a distribution. In accordance with our valuation policy, we evaluate accrued interest and dividend income periodically for collectibility. When a loan or debt security becomes 90 days or more past due, and if we otherwise do not expect the debtor to be able to service all of its debt or other obligations, we will generally place the loan or debt security on non-accrual status and cease recognizing interest income on that loan or debt security until the borrower has demonstrated the ability and intent to pay contractual amounts due. If a loan or debt security's status significantly

improves regarding ability to service the debt or other obligations, or if a loan or debt security is fully impaired or written off, we will remove it from non-accrual status.

Table of Contents*Fee Income*

We may periodically provide services, including structuring and advisory services, to our portfolio companies. For services that are separately identifiable and evidence exists to substantiate fair value, income is recognized as earned, which is generally when the investment or other applicable transaction closes. Fees received in connection with debt financing transactions for services that do not meet these criteria are treated as debt origination fees, net of direct loan origination costs, and are amortized, based on the effective interest method, as additional interest income over the life of the related debt investment.

Payment-in-Kind (PIK) Interest

While not significant to our total debt investment portfolio, we currently hold several loans in our portfolio that contain PIK interest provisions. The PIK interest, computed at the contractual rate specified in each loan agreement, is added to the principal balance of the loan and recorded as interest income. To maintain regulated investment company (RIC) tax treatment (as discussed below), this non-cash source of income will need to be paid out to stockholders in the form of distributions, even though we may not have collected the cash. We will stop accruing PIK interest and write off any accrued and uncollected interest when it is determined that PIK interest is no longer collectible.

Share-Based Compensation

We account for our share-based compensation plan using the fair value method, as prescribed by SFAS No. 123R, *Share-Based Payment*. Accordingly, for restricted stock awards, we measured the grant date fair value based upon the market price of our common stock on the date of the grant and will amortize this fair value to share-based compensation expense over the requisite service period or vesting term.

Income Taxes

We have elected and intend to qualify for the tax treatment applicable to a RIC under Subchapter M of the Internal Revenue Code of 1986, as amended (the Code), and, among other things, intend to make the required distributions to our stockholders as specified therein. As a RIC, we generally will not pay corporate-level federal income taxes on any net ordinary income or capital gains that we distribute to our stockholders as dividends. Depending on the level of taxable income earned in a tax year, we may choose to carry forward taxable income in excess of current year distributions into the next tax year and pay a 4% excise tax on such income. Any such carryover taxable income must be distributed through a dividend declared prior to filing the final tax return related to the year which generated such taxable income.

MSCC's wholly owned subsidiary, MSEI, is a taxable entity which holds certain of our portfolio investments. MSEI is consolidated with Main Street for U.S. GAAP reporting purposes, and the portfolio investments held by MSEI are included in our consolidated financial statements. The purpose of MSEI is to permit us to hold equity investments in portfolio companies which are pass through entities for tax purposes in order to comply with the source income requirements contained in the RIC tax requirements. MSEI is not consolidated with Main Street for income tax purposes and may generate income tax expense as a result of MSEI's ownership of certain portfolio investments. This income tax expense, if any, is reflected in our consolidated statement of operations.

MSEI uses the liability method in accounting for income taxes. Deferred tax assets and liabilities are recorded for temporary differences between the tax basis of assets and liabilities and their reported amounts in the financial statements, using statutory tax rates in effect for the year in which the temporary differences are expected to reverse. A valuation allowance is provided against deferred tax assets when it is more likely than not that some portion or all of the deferred tax asset will not be realized.

PORTFOLIO COMPOSITION

Portfolio investments principally consist of secured debt, equity warrants and direct equity investments in privately held companies. The debt investments are secured by either a first or second lien on the assets of the portfolio company, generally bear interest at fixed rates, and generally mature between five and seven years from the original investment. We also receive nominally priced equity warrants and make direct equity investments, usually in connection with a debt investment in a portfolio company.

The Investment Manager is a wholly owned subsidiary of MSCC. However, the Investment Manager is accounted for as a portfolio investment of Main Street, since it conducts a significant portion of its investment management activities outside of MSCC and its subsidiaries. To allow for more relevant disclosure of our core investment

portfolio, our investment in the Investment Manager has been excluded from the tables and amounts set forth below.

Table of Contents

Summaries of the composition of our investment portfolio at cost and fair value as a percentage of total portfolio investments are shown in the following table:

	September 30, 2008	December 31, 2007
Cost:		
First lien debt	83.5%	81.5%
Equity	11.2%	10.7%
Equity warrants	4.6%	1.7%
Second lien debt	0.7%	6.1%
	100.0%	100.0%
	September 30, 2008	December 31, 2007
Fair Value:		
First lien debt	73.0%	70.1%
Equity	16.4%	18.6%
Equity warrants	9.9%	8.0%
Second lien debt	0.7%	3.3%
	100.0%	100.0%

The following table shows the portfolio composition by geographic region of the United States at cost and fair value as a percentage of total portfolio investments. The geographic composition is determined by the location of the corporate headquarters of the portfolio company:

	September 30, 2008	December 31, 2007
Cost:		
Southwest	49.6%	31.9%
West	28.8%	37.1%
Southeast	9.4%	11.4%
Northeast	7.2%	13.8%
Midwest	5.0%	5.8%
	100.0%	100.0%
	September 30, 2008	December 31, 2007
Fair Value:		
Southwest	56.0%	41.2%
West	26.3%	32.9%
Northeast	7.6%	9.1%
Southeast	4.6%	10.3%
Midwest	5.5%	6.5%
	100.0%	100.0%

Table of Contents

Main Street's portfolio investments are generally in lower middle-market companies conducting business in a variety of industries. Set forth below are tables showing the composition of Main Street's portfolio by industry at cost and fair value as of September 30, 2008 and December 31, 2007:

Cost:	September 30, 2008	December 31, 2007
Industrial equipment	12.6%	6.6%
Precast concrete manufacturing	12.6%	0.0%
Custom wood products	9.5%	8.4%
Manufacturing	9.2%	12.0%
Agricultural services	8.5%	11.6%
Electronics manufacturing	7.8%	9.5%
Retail	6.9%	3.3%
Health care products	6.1%	4.2%
Mining and minerals	5.0%	9.1%
Transportation/Logistics	5.0%	6.7%
Metal fabrication	3.5%	4.6%
Health care services	2.9%	5.9%
Restaurant	2.7%	3.4%
Professional services	2.2%	3.3%
Equipment rental	2.2%	2.6%
Infrastructure products	1.8%	2.4%
Information services	0.9%	1.2%
Industrial services	0.5%	0.4%
Distribution	0.1%	2.2%
Consumer products	0.0%	2.6%
	100%	100%

Fair Value:	September 30, 2008	December 31, 2007

	100%	100%

Our portfolio investments carry a number of risks including, but not limited to: (1) investing in lower middle-market companies which have a limited operating history and financial resources; (2) holding investments that are not publicly traded and which may be subject to legal and other restrictions on resale; and (3) other risks common to investing in below investment grade debt and equity investments in private, smaller companies.

Table of Contents**PORTFOLIO ASSET QUALITY**

We utilize an internally developed investment rating system for our entire portfolio of investments. Investment Rating 1 represents a portfolio company that is performing in a manner which significantly exceeds our original expectations and projections. Investment Rating 2 represents a portfolio company that, in general, is performing above our original expectations. Investment Rating 3 represents a portfolio company that is generally performing in accordance with our original expectations. Investment Rating 4 represents a portfolio company that is underperforming our original expectations. Investments with such a rating require increased Main Street monitoring and scrutiny. Investment Rating 5 represents a portfolio company that is significantly underperforming. Investments with such a rating require heightened levels of Main Street monitoring and scrutiny and involve the recognition of unrealized depreciation on such investment.

The following table shows the distribution of our investments on our 1 to 5 investment rating scale at fair value as of September 30, 2008 and December 31, 2007 (excluding Main Street's investment in the Investment Manager):

Investment Rating	September 30, 2008		December 31, 2007	
	Investments at Fair Value	Percentage of Total Portfolio (Unaudited)	Investments at Fair Value	Percentage of Total Portfolio
	<i>(dollars in thousands)</i>			
1	\$ 32,380	30.4%	\$ 24,619	28.0%
2	28,329	26.6%	35,068	39.8%
3	41,278	38.9%	24,034	27.3%
4	3,620	3.4%		0.0%
5	750	0.7%	4,304	4.9%
Totals	\$ 106,357	100.0%	\$ 88,025	100.0%

Based upon our investment rating system, the weighted average rating of our portfolio as of September 30, 2008 and December 31, 2007 was approximately 2.2. As of September 30, 2008 and December 31, 2007, we had one debt investment in each period representing 0.7% and 3.1%, respectively, of total portfolio fair value (excluding Main Street's investment in the Investment Manager) which was on non-accrual status.

In the event that the United States economy stays in a prolonged period of weakness, it is possible that the financial results of small- to mid-sized companies, like those in which we invest, could experience deterioration, which could ultimately lead to difficulty in meeting debt service requirements and an increase in defaults. In addition, the end markets for certain of our portfolio companies' products and services have experienced, and continue to experience, negative economic trends. While we are not seeing signs of an overall, broad deterioration in our portfolio company results at this time, we can provide no assurance that the performance of certain of our portfolio companies will not be negatively impacted by these economic or other conditions which could have a negative impact on our future results.

Discussion and Analysis of Results of Operations**Comparison of three months ended September 30, 2008 and September 30, 2007**

	For the Three Months Ended September 30,		Net Change	
	2008	2007	Amount	%
	<i>(Unaudited)</i>			
	<i>(dollars in millions)</i>

Table of Contents

	Three Months Ended September 30,		Net Change	
	2008	2007	Amount	%
Reconciliation of distributable net investment income				
Net investment income	\$ 2,529,950	\$ 1,745,144	\$ 784,806	45%
Share-based compensation	315,726		315,726	NA
Distributable net investment income (a)	\$ 2,845,676	\$ 1,745,144	\$ 1,100,532	63%

(a) Distributable net investment income is net investment income as determined in accordance with U.S. generally accepted accounting principles, or GAAP, excluding the impact of share-based compensation expense which is non-cash in nature. Main Street believes presenting distributable net investment income and related per share measures are useful and appropriate supplemental disclosures for analyzing its financial performance since share-based compensation does not require

settlement in cash. However, distributable net investment income is a non-GAAP measure and should not be considered as a replacement to net investment income and other earnings measures presented in accordance with GAAP. Instead distributable net investment income should be reviewed only in connection with such GAAP measures in analyzing Main Street's financial performance. A reconciliation of net investment income in accordance with GAAP to distributable net investment income is presented in the table above.

Investment Income

For the three months ended September 30, 2008, total investment income was \$4.5 million, a \$1.4 million, or 43%, increase over the \$3.1 million of total investment income for the three months ended September 30, 2007. The increase was attributable to a \$1.4 million increase in interest, fee and dividend income from investments which was primarily due to (i) higher average levels of outstanding debt investments, which was principally due to the closing of five new debt investments since September 30, 2007, partially offset by debt repayments received during the same period, (ii) significantly higher levels of cash dividend income from portfolio equity investments, and (iii) higher levels of fee income. For the three months ended September 30, 2008, Main Street received approximately \$1.0 million in cash dividend payments from portfolio company equity investments which increased its total investment income for the period. These dividend payments were paid to Main Street based upon the accumulated earnings and available cash of certain portfolio companies during the third quarter of 2008. Future dividend payments may vary significantly from the amounts received in the third quarter of 2008 due to changes in portfolio company accumulated earnings and available cash.

Expenses

For the three months ended September 30, 2008, total expenses increased by approximately \$0.6 million, or 39%, to approximately \$1.9 million from \$1.3 million for the three months ended September 30, 2007. The increase in total expenses was primarily attributable to a \$0.3 million increase in non-cash, share-based compensation expense related to our restricted stock plan and an increase in other general and administrative expenses of \$0.8 million primarily attributable to an increase in personnel and administrative costs associated with being a public company. However, Main Street incurred no management fee expenses due to its internally managed structure after the IPO during the three months ended September 30, 2008 compared to \$0.5 million in the corresponding period in 2007 as a result of its acquisition of the Investment Manager in October 2007 in connection with the Formation Transactions.

Distributable Net Investment Income

Distributable net investment income for the three months ended September 30, 2008 was \$2.8 million, or a 63% increase, compared to distributable net investment income of \$1.7 million during the three months ended September 30, 2007. The increase in distributable net investment income was attributable to the increase in total investment income partially offset by the increase in total expenses as discussed above.

Net Investment Income

Net investment income for the three months ended September 30, 2008 was \$2.6 million, or a 45% increase, compared to net investment income of \$1.8 million during the three months ended September 30, 2007. The increase in net investment income was attributable to the increase in total investment income partially offset by the increase in total expenses as discussed above.

Table of Contents*Net Realized Income*

For the three months ended September 30, 2008, the net realized gains from investments was \$4.3 million, representing a \$2.2 million increase over the net realized gains of \$2.1 million during the three months ended September 30, 2007. The net realized gains during the three months ended September 30, 2008 principally related to the realized gains or losses recognized on debt and equity investments in two portfolio companies, compared to the lower realized gain on two equity warrant investments during the three months ended September 30, 2007.

The higher net realized gains in the three months ended September 30, 2008 and the higher net investment income during that period resulted in a \$3.0 million, or 76%, increase, in the net realized income for the three months ended September 30, 2008 compared with the corresponding period in 2007.

Net Increase in Net Assets from Operations

During the three months ended September 30, 2008, we recorded a net change in unrealized depreciation in the amount of \$4.1 million, or a \$2.9 million decrease, compared to the \$1.2 million in net change in unrealized depreciation for the three months ended September 30, 2007. The net change in unrealized depreciation for the three months ended September 30, 2008 included (i) unrealized appreciation on eight investments in portfolio companies totaling \$2.8 million offset by \$2.2 million in unrealized depreciation recognized on six portfolio investments, (ii) the reclassification of \$4.5 million of previously recognized unrealized gains or losses into realized gains or losses principally related to two exited investments and (iii) unrealized depreciation of \$0.2 million related to the Investment Manager.

As a result of these events, our net increase in net assets resulting from operations during the three months ended September 30, 2008 was \$2.7 million compared to a net increase in net assets resulting from operations of \$2.7 million during the three months ended September 30, 2007.

Comparison of nine months ended September 30, 2008 and September 30, 2007

	For the Nine Months Ended September 30,		Net Change	
	2008	2007	Amount	%
	(Unaudited)			
	(dollars in millions)			
Total Investment Income	\$ 12.7	\$ 8.7	\$ 4.0	46%
Total Expenses	(5.1)	(4.8)	(0.3)	(5)
Net Investment Income	7.6	3.9	3.7	96
Net Realized Gains from Investments	5.0	2.7	2.3	83
Net Realized Income	12.6	6.6	6.0	91
Net Change in Unrealized Appreciation (Depreciation) from Investments	(4.6)	(0.8)	(3.8)	NA
Income tax benefit	2.4		2.4	NA
Net Increase in Net Assets Resulting from Operations	\$ 10.4	\$ 5.8	\$ 4.6	78%

Table of Contents

	Nine Months Ended September 30,		Net Change	
	2008	2007	Amount	%
Reconciliation of distributable net investment income				
Net investment income	\$ 7,620,586	\$ 3,886,220	\$ 3,734,366	96%
Share-based compensation	315,726		315,726	NA
Distributable net investment income (a)	\$ 7,936,312	\$ 3,886,220	\$ 4,050,092	104%

(a) Distributable net investment income is net investment income as determined in accordance with U.S. generally accepted accounting principles, or GAAP, excluding the impact of share-based compensation expense which is non-cash in nature. Main Street believes presenting distributable net investment income and related per share measures are useful and appropriate supplemental disclosures for analyzing its financial performance since share-based compensation does not require

settlement in cash. However, distributable net investment income is a non-GAAP measure and should not be considered as a replacement to net investment income and other earnings measures presented in accordance with GAAP. Instead distributable net investment income should be reviewed only in connection with such GAAP measures in analyzing Main Street's financial performance. A reconciliation of net investment income in accordance with GAAP to distributable net investment income is presented in the table above.

Investment Income

For the nine months ended September 30, 2008, total investment income was \$12.7 million, a \$4.0 million, or 46%, increase over the \$8.7 million of total investment income for the nine months ended September 30, 2007. The increase was attributable to a \$3.7 million increase in interest, fee and dividend income from investments and a \$0.3 million increase in interest income from idle funds, which was principally earned on the remaining proceeds from our IPO. The increase in interest, fee and dividend income was primarily attributable to (i) higher average levels of outstanding debt investments, which was principally due to the closing of five new debt investments since September 30, 2007, partially offset by debt repayments received during the same period, (ii) significantly higher levels of cash dividend income from portfolio equity investments, and (iii) higher levels of fee income. For the nine months ended September 30, 2008, Main Street received approximately \$2.3 million in cash dividend payments from portfolio company equity investments. These dividend payments were paid to Main Street based upon the accumulated earnings and available cash of certain portfolio companies for the nine months ended September 30, 2008. Future dividend payments may vary significantly due to changes in portfolio company accumulated earnings and available cash.

Expenses

For the nine months ended September 30, 2008, total expenses increased by approximately \$0.3 million, or 5%, to approximately \$5.1 million from \$4.8 million for the nine months ended September 30, 2007. The increase in total expenses was primarily attributable to a \$2.0 million increase in general and administrative expenses, mostly attributable to an increase in personnel and administrative costs associated with being a public company, partially offset by \$0.7 million of professional costs related to the IPO incurred during the comparable period of 2007. In addition, total expenses increased \$0.3 million due to non-cash, share-based compensation expense and \$0.2 million due to interest expense as a result of an additional \$9.9 million of SBIC Debentures borrowed during 2007. However, Main Street incurred no management fee expenses due to its internally managed structure after the IPO during the nine months ended September 30, 2008 compared to \$1.5 million in the corresponding period in 2007 as a result of its acquisition of the Investment Manager in October 2007 in connection with the Formation Transactions.

Distributable Net Investment Income

Distributable net investment income for the nine months ended September 30, 2008 was \$7.9 million, or a 104% increase, compared to distributable net investment income of \$3.9 million during the nine months ended September 30, 2007. The increase in distributable net investment income was attributable to the increase in total investment income partially offset by the increase in total expenses discussed above.

Table of Contents*Net Investment Income*

Net investment income for the nine months ended September 30, 2008 was \$7.6 million, or a 96% increase, compared to net investment income of \$3.9 million during the nine months ended September 30, 2007. The increase in net investment income was attributable to the increase in total investment income partially offset by the increase in total expenses discussed above.

Net Realized Income

For the nine months ended September 30, 2008, the net realized gains from investments was \$5.0 million, representing a \$2.3 million, or an 83% increase over the net realized gains of \$2.7 million during the nine months ended September 30, 2007. The net realized gains during the nine months ended September 30, 2008 principally related to the realized gains or losses recognized on debt and equity investments in four portfolio companies, compared to lower net realized gains or losses recognized on equity investments in five portfolio companies during the nine months ended September 30, 2007.

The higher net realized gains in the nine months ended September 30, 2008 and the higher net investment income during that period resulted in a \$6.0 million, or 91%, increase in the net realized income for the nine months ended September 30, 2008 compared with the corresponding period in 2007.

Net Increase in Net Assets from Operations

During the nine months ended September 30, 2008, we recorded a net change in unrealized depreciation in the amount of \$4.6 million, or a \$3.8 million increase, compared to the \$0.8 million in net change in unrealized depreciation for the nine months ended September 30, 2007. The net change in unrealized depreciation for the nine months ended September 30, 2008 included (i) unrealized appreciation on eleven investments in portfolio companies totaling \$8.0 million offset by \$7.9 million in unrealized depreciation recognized on eight portfolio investments, (ii) unrealized appreciation on debt investments totaling \$1.0 million as a result of adopting SFAS 157, (iii) the reclassification of \$5.0 million of previously recognized unrealized gains or losses into realized gains or losses on four exited investments, and (iv) unrealized depreciation of \$0.7 million related to the Investment Manager.

During the nine months ended September 30, 2008, we recognized a cumulative income tax benefit of \$2.4 million primarily consisting of non-cash deferred tax benefits related to net unrealized losses from certain portfolio investments transferred into MSEI, our wholly owned taxable subsidiary. We do not anticipate incurring this level of deferred tax benefit in future periods.

As a result of these events, our net increase in net assets resulting from operations during the nine months ended September 30, 2008 was \$10.4 million, or a 78% increase compared to a net increase in net assets resulting from operations of \$5.8 million during the nine months ended September 30, 2007.

Liquidity and Capital Resources*Cash Flows*

For the nine months ended September 30, 2008, we experienced a net increase in cash and cash equivalents in the amount of \$5.0 million. During that period, we generated \$7.1 million of cash from our operating activities, primarily from net investment income partially offset by the semi-annual interest payments on our SBIC debentures. We also generated \$7.7 million in net cash from investing activities, principally including proceeds from the maturity of a \$24.1 million investment in idle funds investments, \$10.7 million in cash proceeds from repayment of debt investments and \$7.4 million of cash proceeds from the redemption and sale of equity investments, partially offset by the funding of new investments and several smaller follow-on investments for a total of \$34.5 million. For the nine months ended September 30, 2008, we used \$9.8 million in cash for financing activities, which principally consisted of cash dividends to stockholders.

For the nine months ended September 30, 2007, we experienced a net decrease in cash and cash equivalents in the amount of \$4.2 million. During that period, we generated \$3.0 million of cash from our operating activities, primarily from net investment income, partially offset by the semi-annual interest payments on our SBIC debentures. During the nine months ended September 30, 2007, we used \$9.6 million in cash for investing activities. During this period, net cash used for investing activities principally included the funding of new investments and several smaller follow-on investments for a total of \$19.8 million of invested capital, partially offset by \$6.2 million in cash proceeds from repayment of debt investments and \$4.0 million of cash proceeds from the redemption and sale of two equity

investments. For the nine months ended September 30, 2007, we generated \$2.4 million in cash from financing activities, which principally consisted of the net proceeds from \$9.9 million in additional SBIC debenture borrowings, partially offset by \$6.5 million of cash distributions to partners and \$1.0 million for payment of costs related to the initial public offering and SBIC debenture fees.

Table of Contents*Capital Resources*

As of September 30, 2008, we had \$46.8 million in cash and cash equivalents, and our net assets totaled \$115.4 million. During October of 2008, we closed a \$30 million, three-year investment credit facility (the Investment Facility) that will be used to provide additional liquidity in support of future investment and operational activities. We have no borrowings currently outstanding under the Investment Facility. Due to our existing cash and cash equivalents and the additional borrowing capacity under the Investment Facility, we project that we will have sufficient liquidity to fund our investment and operational activities for the remainder of 2008 and throughout all of calendar year 2009.

We intend to generate additional cash from future offerings of securities, future borrowings, repayments or sales of investments, and cash flow from operations, including income earned from investments in our portfolio companies and, to a lesser extent, from the temporary investments of cash in U.S. government securities and other high-quality debt investments that mature in one year or less. Our primary uses of funds will be investments in portfolio companies, operating expenses and cash distributions to holders of our common stock.

In order to satisfy the Code requirements applicable to a RIC, we intend to distribute to our stockholders substantially all of our taxable income, but we may also elect to periodically spillover certain excess undistributed taxable income from one tax year into the next tax year. In addition, as a BDC, we generally are required to meet a coverage ratio of total assets to total senior securities, which include all of our borrowings and any preferred stock we may issue in the future, of at least 200.0%. This requirement limits the amount that we may borrow. In January 2008, we received exemptive relief from the SEC that permits us to exclude SBA-guaranteed debt issued by the Fund from our asset coverage ratio, which, in turn, enables us to fund more investments with debt capital.

We anticipate that we will continue to fund our investment activities through existing cash and cash equivalents and a combination of future debt and additional equity capital. Due to our status as a licensed SBIC, we have the ability to issue debentures guaranteed by the Small Business Administration (the SBA) at favorable interest rates. Under the regulations applicable to SBICs, an SBIC can have outstanding debentures guaranteed by the SBA generally in an amount up to twice its regulatory capital, which generally equates to the amount of its equity capital. The maximum statutory limit on the dollar amount of outstanding debentures guaranteed by the SBA issued by a single SBIC or group of SBICs under common control as of September 30, 2008, was \$130.6 million (which amount is subject to increase on an annual basis based on cost-of-living index increases).

Because of our investment team's affiliations with Main Street Capital II, LP (MSC II) a separate SBIC which commenced investment operations in January 2006, we and MSC II may be deemed to be a group of SBICs under common control. Thus, the dollar amount of SBA-guaranteed debentures that can be issued collectively by us and by MSC II may be limited to \$130.6 million, absent relief from the SBA. Currently, we do not intend to borrow SBA-guaranteed indebtedness in excess of the \$55.0 million we currently have outstanding, based on our existing equity capital.

Debentures guaranteed by the SBA have fixed interest rates that approximate prevailing 10-year Treasury Note rates plus a spread and have a maturity of ten years with interest payable semi-annually. The principal amount of the debentures is not required to be paid before maturity but may be pre-paid at any time. Debentures issued prior to September 2006 were subject to pre-payment penalties during their first five years. Those pre-payment penalties no longer apply to debentures issued after September 1, 2006. On September 30, 2008, we had \$55 million of outstanding indebtedness guaranteed by the SBA, which carried an average fixed interest rate of approximately 5.8%. The first maturity related to the SBIC debentures does not occur until 2013.

On December 31, 2007, we entered into a Treasury Secured Revolving Credit Agreement (the Treasury Facility) among us, Wachovia Bank, National Association, and Branch Banking and Trust Company (BB&T), as administrative agent for the lenders. Under the Treasury Facility, the lenders have agreed to extend revolving loans to us in an amount not to exceed \$100 million. The purpose of the Treasury Facility is to provide us flexibility in the sizing of portfolio investments and to facilitate the growth of our investment portfolio. The Treasury Facility has a two-year term and bears interest, at our option, either (i) at the LIBOR rate or (ii) at a published prime rate of interest, plus 25 basis points in either case. The applicable interest rates under the Treasury Facility would be increased by 15 basis points if usage under the Treasury Facility is in excess of 50% of the days within a given calendar quarter. The Treasury Facility also requires payment of 15 basis points per annum in unused commitment fees based on the

average daily unused balances under the facility. The Treasury Facility is secured by certain securities accounts maintained by BB&T and is also guaranteed by the Investment Manager. As of September 30, 2008 and December 31, 2007, we had no outstanding borrowings under the Treasury Facility. For the nine months ended September 30, 2008, interest expense and unused commitment fees incurred under the Treasury Facility totaled \$3,819 and \$114,479, respectively.

Table of Contents*Current Market Conditions*

During the quarter ended September 30, 2008, the state of the economy in the U.S. and abroad continued to deteriorate to what many believe is a recession, which could be long-term. Banks and others in the financial services industry have continued to report significant write-downs in the fair value of their assets, which has led to the failure of a number of banks and investment companies, a number of distressed mergers and acquisitions, the government take-over of the nation's two largest government-sponsored mortgage companies, and the passage of the \$700 billion Emergency Economic Stabilization Act of 2008 in early October 2008. In addition, the stock market has declined significantly, with both the S&P 500 and the NASDAQ Global Select Market (on which Main Street trades), declining by over 30% between June 30, 2008 and October 24, 2008. These events have significantly constrained the availability of debt and equity capital for the market as a whole, and the financial services sector in particular. Further, these and other events have also led to rising unemployment, deteriorating consumer confidence and a general reduction in spending by both consumers and businesses.

Although we have been able to access the capital markets in the past to finance our investment activities and have recently closed on a \$30 million investment credit facility, discussed further in *Recent Developments*, the current turmoil in the debt markets and uncertainty in the equity capital markets provides no assurance that debt or equity capital will be available to us in the future on favorable terms, or at all.

In the event that the United States economy stays in a protracted period of weakness, it is possible that the results of some of the lower middle-market companies like those in which we invest, could experience deterioration, which could ultimately lead to difficulty in meeting debt service requirements and an increase in defaults. In addition, the end markets for certain of our portfolio companies' products and services have experienced, and continue to experience, negative economic trends. While we are not seeing signs of an overall, broad deterioration in our portfolio company results at this time, we can provide no assurance that the performance of certain of our portfolio companies will not be negatively impacted by economic or other conditions which could have a negative impact on our future results.

Recently Issued Accounting Standards

In June 2008, the Financial Accounting Standards Board (FASB) issued EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities*. This FASB Staff Position (FSP) addresses whether instruments granted in share-based payment transactions are participating securities prior to vesting and, therefore, need to be included in the earnings allocation in computing earnings per share (EPS). This FSP will be effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those years. All prior-period EPS data presented will be adjusted retrospectively (including interim financial statements, summaries of earnings, and selected financial data) to conform to the provisions of this FSP. Early application is not permitted. We are currently analyzing the effect, if any, this statement may have on our consolidated results of operations.

In October 2008, the FASB issued Staff Position No. 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset is Not Active* (FSP 157-3). FSP 157-3 provides an illustrative example of how to determine the fair value of a financial asset in an inactive market. The FSP does not change the fair value measurement principles set forth in SFAS 157. Since adopting SFAS 157 in January 2008, our practices for determining the fair value of our investment portfolio have been, and continue to be, consistent with the guidance provided in the example in FSP 157-3. Therefore, our adoption of FSP 157-3 did not affect our practices for determining the fair value of our investment portfolio and does not have a material effect on our financial position or results of operations.

Inflation

Inflation has not had a significant effect on our results of operations in any of the reporting periods presented in this report. However, our portfolio companies have and may continue to experience the impacts of inflation on their operating results, including periodic escalations in their costs for raw materials and required energy consumption.

Table of Contents**Off-Balance Sheet Arrangements**

We may be a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financial needs of our portfolio companies. These instruments include commitments to extend credit and involve, to varying degrees, elements of credit risk in excess of the amount recognized in the balance sheet. At September 30, 2008, we had one outstanding commitment to fund an unused revolving loan for up to \$300,000.

Contractual Obligations

As of September 30, 2008, our future fixed commitments for cash payments on contractual obligations for each of the next five years and thereafter are as follows:

	Total	2009	2010	2011	2012	2013	2014 and thereafter
				(Unaudited)			
				<i>(dollars in thousands)</i>			
SBIC debentures payable	\$ 55,000	\$	\$	\$	\$	\$ 4,000	\$ 51,000
Interest due on SBIC debentures	21,495	3,179	3,179	3,179	3,188	3,179	5,591
Total	\$ 76,495	\$ 3,179	\$ 3,179	\$ 3,179	\$ 3,188	\$ 7,179	\$ 56,591

MSCC is obligated to make payments under a support services agreement with the Investment Manager. Subsequent to the completion of the Formation Transactions and the IPO, the Investment Manager is reimbursed for its excess expenses associated with providing investment management and other services to MSCC and its subsidiaries, as well as MSC II. Each quarter, as part of the support services agreement, MSCC makes payments to cover all expenses incurred by the Investment Manager, less the recurring management fees that the Investment Manager receives from MSC II pursuant to a long-term investment advisory services agreement.

Related Party Transactions

We co-invested with MSC II in several existing portfolio investments prior to the IPO, but did not co-invest with MSC II subsequent to the IPO and prior to June 2008. In June 2008, we received exemptive relief from the SEC to allow us to resume co-investing with MSC II in accordance with the terms of such exemptive relief. MSC II is managed by the Investment Manager, and the Investment Manager is wholly owned by MSCC. MSC II is an SBIC fund with similar investment objectives to Main Street and which began its investment operations in January 2006. The co-investments among Main Street and MSC II had all been made at the same time and on the same terms and conditions. The co-investments were also made in accordance with the Investment Manager's conflicts policy and in accordance with the applicable SBIC conflict of interest regulations.

As discussed further in Note D to the accompanying consolidated financials statements, Main Street paid certain management fees to the Investment Manager during the year ended December 31, 2007. Subsequent to the Formation Transactions, the Investment Manager is a wholly owned, portfolio company of Main Street. At September 30, 2008 and December 31, 2007, the Investment Manager had a receivable of \$235,182 and a payable of \$207,783, respectively, with MSCC, both related to the funding of recurring administrative expenses required to support MSCC's business.

Recent Developments

In October 2008, we began paying dividends on a monthly basis. In September 2008, we declared monthly dividends of \$0.125 per share for each of October, November and December 2008, which equates to a \$0.375 per share dividend for the fourth quarter of 2008. These monthly dividends are paid based upon the accumulated taxable income recognized by Main Street, including excess undistributed taxable income from 2007 that was carried forward for distribution during 2008. The accumulated taxable income principally consists of ordinary taxable income recognized during 2008, as well as realized capital gains generated in 2008. The monthly dividend for October was paid on October 15, 2008 to stockholders of record on September 18, 2008. The remaining fourth quarter dividends will be payable on November 14 and December 15, 2008 to stockholders of record on October 17 and November 19, 2008,

respectively.

Table of Contents

During October 2008, we completed three new portfolio investments. Our new portfolio investments include a \$3.7 million investment in Ziegler's NYPD, LLC (NYPD) and a \$2.0 million investment in Schneider Sales Management, LLC (Schneider), both supporting management buyout transactions, and a \$1.8 million investment in California Healthcare Medical Billing, Inc. (CHMB) for growth financing purposes. Our investment in NYPD consisted of a \$3.3 million first lien, secured debt investment and a \$0.4 million equity investment, representing approximately 29% of the fully diluted equity interests in NYPD. NYPD is a New York-themed pizzeria and Italian restaurant group operating in affluent suburban geographic areas. NYPD has built a strong position in the higher end of the casual dining segment and its management team has extensive experience in the restaurant and hospitality industries. Our investment in Schneider consists of a \$2.0 million first lien, secured debt investment with equity warrant participation representing approximately 12% of the fully diluted equity interests in Schneider. Schneider is a leading publisher of proprietary sales development materials and provider of sales-management consulting services for financial institutions. Schneider's products and services enable its clients to achieve higher levels of profitability, customer satisfaction, and sales via proven methodologies developed over its 25-year history in serving financial institutions. Our investment in CHMB consists of a \$1.4 million first lien, secured debt investment with equity warrant participation, and a \$0.4 million equity investment. Through our equity warrant participation and direct equity investment, we own approximately 18% of the fully diluted equity interests in CHMB. We have also provided CHMB with a \$0.6 million first lien, secured revolving loan to support CHMB's continuing growth. CHMB provides outsourced medical billing, revenue cycle management, and administrative healthcare support to physician practices, clinics and multi-specialty groups. Through its superior customer service and leading technology platform, CHMB helps physicians improve their revenue cycle, reduce administrative errors, and offer their patients an improved quality of care.

In October 2008, we completed the full exit of our portfolio investment in Transportation General, Inc (TGI) as part of a leveraged recapitalization through a major international bank. As part of the TGI recapitalization transaction, we received full repayment on our remaining debt investment and sold our equity warrant position to TGI for approximately \$0.6 million in cash proceeds. In addition, we received structuring and advisory fees of approximately \$0.6 million related to the recapitalization transaction. We realized a cash internal rate of return over the life of our investment in TGI equal to approximately 23%.

During October 2008, we closed a \$30 million, three-year investment credit facility (the Investment Facility) that will be used to provide additional liquidity in support of future investment and operational activities. The Investment Facility allows for an increase in the total size of the facility up to \$75 million, subject to certain conditions, and has a maturity date of October 24, 2011. Borrowings under the Investment Facility bear interest, subject to our election, on a per annum basis equal to (i) the applicable LIBOR rate plus 2.75% or (ii) the applicable base rate plus 0.75%. We will pay unused commitment fees of 0.375% per annum on the average unused lender commitments under the Investment Facility. BB&T and Compass Bank are the lenders under the Investment Facility. We have no borrowings currently outstanding under the Investment Facility.

Due to the maturation of our investment portfolio and the additional flexibility provided by the Investment Facility, we have unilaterally reduced the Treasury Facility from \$100 million to \$50 million. The reduction in the size of the Treasury Facility will reduce the amount of unused commitment fees paid by us. We have no borrowings currently outstanding under the Treasury Facility.

Item 3. *Quantitative and Qualitative Disclosure about Market Risk*

We are subject to financial market risks, including changes in interest rates. Changes in interest rates may affect both our cost of funding and our interest income from portfolio investments, cash and cash equivalents and idle funds investments. Our risk management systems and procedures are designed to identify and analyze our risk, to set appropriate policies and limits and to continually monitor these risks and limits by means of reliable administrative and information systems and other policies and programs. Our investment income will be affected by changes in various interest rates, including LIBOR and prime rates, to the extent of any of our debt investments that include floating interest rates. A significant majority of our debt investments are made with fixed interest rates for the term of the investment. However, as of September 30, 2008, approximately 15.1% of our debt investment portfolio (at cost) bore interest at floating rates with 10.2% of these debt investments subject to contractual minimum rates. All of our

current outstanding indebtedness is subject to fixed interest rates for the 10-year life of such debt. As of September 30, 2008, we had not entered into any interest rate hedging arrangements. At September 30, 2008, based on our applicable levels of floating-rate debt investments, a 1% change in interest rates would not have a material effect on our level of interest income from debt investments.

Item 4. Controls and Procedures

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chairman and Chief Executive Officer, our President and Chief Financial Officer, our Chief Compliance Officer and our Chief Accounting Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15 of the Securities Exchange Act of 1934). Based on that evaluation, our Chairman and Chief Executive Officer, our President and Chief Financial Officer, our Chief Compliance Officer and our Chief Accounting Officer, have concluded that our current disclosure controls and procedures are effective in timely alerting them of material information relating to us that is required to be disclosed in the reports we file or submit under the Securities Exchange Act of 1934. There have been no changes in our internal control over financial reporting that occurred during the quarter ended September 30, 2008 that have materially affected, or are reasonable likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II OTHER INFORMATION****Item 1. *Legal Proceedings.***

Although we may, from time to time, be involved in litigation arising out of our operations in the normal course of business or otherwise, we are currently not a party to any pending material legal proceedings.

Item 1A. *Risk Factors.*

There were no material changes from the risk factors as previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2007, that we filed with the SEC on March 21, 2008.

Item 2. *Unregistered Sales of Equity Securities and Use of Proceeds.*

During the three months ended September 30, 2008, we issued 15,820 shares of our common stock under our dividend reinvestment plan pursuant to an exemption from the registration requirements of the Securities Act of 1933. The aggregate offering price for the shares of common stock sold under the dividend reinvestment plan was approximately \$213,728.

Item 6. *Exhibits.*

Listed below are the exhibits which are filed as part of this report (according to the number assigned to them in Item 601 of Regulation S-K):

Exhibit Number	Description of Exhibit
3.1*	Articles of Amendment and Restatement of Main Street Capital Corporation (previously filed as exhibit (a) to Main Street Capital Corporation's Registration Statement on Form N-2 (Reg. 333-142879)).
3.2*	Main Street Capital Corporation Amended and Restated Bylaws effective May 1, 2008 (previously filed as exhibit 99.1 to Main Street Capital Corporation's current report on Form 8-K filed May 2, 2008).
10.1*	Main Street Capital Corporation 2008 Equity Incentive Plan (incorporated by reference to Exhibit 4.4 to Main Street Capital Corporation's Registration Statement on Form S-8 (Reg. No. 333-151799)).
10.2*	Main Street Capital Corporation 2008 Non-Employee Director Restricted Stock Plan (incorporated by reference to Exhibit 4.5 to Main Street Capital Corporation's Registration Statement on Form S-8 (Reg. No. 333-151799)).
10.3*	Form of Restricted Stock Agreement - Main Street Capital Corporation 2008 Equity Incentive Plan (incorporated by reference to Exhibit 4.6 to Main Street Capital Corporation's Registration Statement on Form S-8 (Reg. No. 333-151799)).
