# GREENLIGHT CAPITAL RE, LTD. NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. GENERAL

Greenlight Capital Re, Ltd. ("GLRE") was incorporated as an exempted company under the Companies Law of the Cayman Islands on July 13, 2004. GLRE's wholly-owned subsidiary, Greenlight Reinsurance, Ltd. ("Greenlight Reinsurance"), provides global specialty property and casualty reinsurance. Greenlight Reinsurance has an unrestricted Class "B" insurance license under Section 4(2) of the Cayman Islands Insurance Law. Greenlight Reinsurance commenced underwriting in April 2006. Effective May 30, 2007, GLRE completed an initial public offering of 11,787,500 Class A ordinary shares at \$19.00 per share. Concurrently, 2,631,579 Class B ordinary shares of GLRE were sold at \$19.00 per share in a private placement offering. On December 9, 2008, Verdant Holding Company, Ltd. ("Verdant"), a wholly owned subsidiary of GLRE, was incorporated in the state of Delaware.

The Class A ordinary shares of GLRE are listed on Nasdaq Global Select Market under the symbol "GLRE".

As used herein, the "Company" refers collectively to GLRE and its subsidiaries.

These unaudited condensed consolidated financial statements are prepared in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP") and in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete consolidated financial statements. These unaudited condensed consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements for the year ended December 31, 2009. In the opinion of management, these unaudited condensed consolidated financial statements reflect all the normal recurring adjustments considered necessary for a fair presentation of the Company's financial position and results of operations as of the dates and for the periods presented.

The results for the three months ended March 31, 2010 are not necessarily indicative of the results expected for the full year.

#### 2. SIGNIFICANT ACCOUNTING POLICIES

# **Basis of Presentation**

The condensed consolidated financial statements include the accounts of GLRE and the consolidated financial statements of all of its wholly owned subsidiaries. All significant intercompany transactions and balances have been eliminated in consolidation.

#### Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of income and expenses during the period. Actual results could differ from these estimates.

Restricted Cash and Cash Equivalents

The Company is required to maintain cash in segregated accounts with prime brokers and swap counterparties. The amount of restricted cash held by prime brokers is used to collateralize the liability created from securities sold, not yet purchased. Cash held for the benefit of counterparties is used to collateralize the current value of any amounts that may be due to the counterparty under the financial contracts.

Loss and Loss Adjustment Expense Reserves and Recoverable

The Company establishes reserves for contracts based on estimates of the ultimate cost of all losses including losses incurred but not reported. These estimated ultimate reserves are based on reports received from ceding companies, industry data, historical experience as well as the Company's own actuarial estimates. These estimates are reviewed by the Company periodically on a contract by contract basis and adjusted as necessary. Since reserves are estimates, the final settlement of losses may vary from the reserves established and any adjustments to the estimates, which may be material, are recorded in the period they are determined.

Loss and loss adjustment expense recoverable include the amounts due from retrocessionaires for paid and unpaid loss and loss adjustment expenses on retrocession agreements. Ceded losses incurred but not reported are estimated based on the Company's actuarial estimates. These estimates are reviewed periodically and adjusted when deemed necessary. The Company may not be able to ultimately recover the loss and loss adjustment expense recoverable amounts due to the retrocessionaires' inability to pay. The Company regularly evaluates the financial condition of its retrocessionaires and records provisions for uncollectible reinsurance recoverable when recovery becomes unlikely.

#### Table of contents

#### Notes Receivable

Notes receivable include promissory notes receivable from third party entities. These notes are generally recorded at cost along with accrued interest, if any, which approximates fair value. The Company regularly reviews all notes receivable for impairment and records provisions for uncollectible notes and interest receivable for non-performing notes. For the three months ended March 31, 2010, the notes earned interest at annual interest rates ranging from 6% to 10% and had remaining maturity terms ranging from 4 years to 9 years. Included in notes receivable balance were accrued interest of \$0.8 million at March 31, 2010 (December 31, 2009: \$0.7 million) and all notes were considered current and performing. Interest income earned on notes receivable is included in the condensed consolidated statements of income in net investment income.

#### Deposit Assets and Liabilities

The Company accounts for reinsurance contracts in accordance with U.S. GAAP. In the event that a reinsurance contract does not transfer sufficient risk, or a contract provides retroactive reinsurance, deposit accounting is used. Any losses on such contracts are charged to earnings immediately. Any gains relating to such contracts are deferred and amortized over the estimated remaining settlement period. All such deferred gains are included in reinsurance balances payable in the condensed consolidated balance sheets. Amortized gains are recorded in the condensed consolidated statements of income as other income. At March 31, 2010, included in the condensed consolidated balance sheets under reinsurance balances receivable and reinsurance balances payable were \$2.5 million and \$0.8 million of deposit assets and deposit liabilities (December 31, 2009: \$2.1 million and \$0.8 million), respectively. For the three months ended March 31, 2010, included in other income were \$0.2 million (2009: \$0) related to losses on deposit accounted contracts, and \$0 (2009: \$0.1 million) relating to gains on deposit accounted contracts.

#### **Financial Instruments**

#### Investments and Securities Sold, Not Yet Purchased

The Company's investments in debt instruments and equity securities that are classified as "trading securities" are carried at fair value. The fair values of the listed equity and debt instruments are derived based on quoted prices (unadjusted) in active markets for identical assets (Level 1 inputs). The fair values of private debt instruments are derived based on inputs that are observable, either directly or indirectly, such as market maker or broker quotes reflecting recent transactions (Level 2 inputs), and are generally derived based on the average of multiple market maker or broker quotes which are considered to be binding. Where quotes are not available, private debt instruments are valued using cash flow models using assumptions and estimates that may be subjective and non-observable (Level 3 inputs).

The Company's "other investments" may include investments in private and unlisted equity securities, limited partnerships, futures, commodities, exchange traded options and over-the-counter options ("OTC"), which are all carried at fair value. The Company maximizes the use of observable direct or indirect inputs (Level 2 inputs) when deriving the fair values for "other investments". For limited partnerships and private and unlisted equity securities, where observable inputs are not available, the fair values are derived based on unobservable inputs (Level 3 inputs) such as management's assumptions developed from available information using the services of the investment advisor, including the most recent net asset values. Amounts invested in exchange traded and OTC call and put options are recorded as an asset or liability at inception. Subsequent to initial recognition, unexpired exchange traded option contracts are recorded at fair value based on quoted prices in active markets (Level 1 inputs). For OTC options or exchange traded options where a quoted price in an active market is not available, fair values are derived based upon observable inputs (Level 2 inputs) such as multiple market maker quotes.

For securities classified as "trading securities," and "other investments," any realized and unrealized gains or losses are determined on the basis of specific identification method (by reference to cost and amortized cost, as appropriate) and included in net investment income in the condensed consolidated statements of income.

Dividend income and expense are recorded on the ex-dividend date. The ex-dividend date is the date as of when the underlying security must have been traded to be eligible for the dividend declared. Interest income and interest expense are recorded on an accrual basis.

#### Table of contents

#### **Derivative Financial Instruments**

U.S. GAAP requires that an entity recognize all derivatives on the balance sheet at fair value. It also requires that unrealized gains and losses resulting from changes in fair value be included in income or comprehensive income, depending on whether the instrument qualifies as a hedge transaction, and if so, the type of hedge transaction. The Company's derivative financial instrument assets generally are included in investments in securities or financial contracts receivable. The Company's derivative financial instrument liabilities generally are included in financial contracts payable. The Company's derivatives do not constitute hedges for financial reporting purposes.

#### **Financial Contracts**

The Company enters into financial contracts with counterparties as part of its investment strategy. Financial contracts, which include total return swaps, credit default swaps ("CDS"), and other derivative instruments, are recorded at their fair value with any unrealized gains and losses included in net investment income in the condensed consolidated statements of income. Financial contracts receivable represents derivative contracts whereby the Company is entitled to receive payments upon settlement of the contract. Financial contracts payable represents derivative contracts whereby the Company is obligated to make payments upon settlement on the contract.

Total return swap agreements, included on the condensed consolidated balance sheets as financial contracts receivable and financial contracts payable, are derivative financial instruments whereby the Company is either entitled to receive or obligated to pay the product of a notional amount multiplied by the movement in an underlying security, which the Company does not own, over a specified time frame. In addition, the Company may also be obligated to pay or receive other payments based on either interest rate, dividend payments and receipts, or foreign exchange movements during a specified period. The Company measures its rights or obligations to the counterparty based on the fair value movements of the underlying security together with any other payments due. These contracts are carried at fair value, based on observable inputs (Level 2 inputs) with the resultant unrealized gains and losses reflected in net investment income in the condensed consolidated statements of income. Additionally, any changes in the value of amounts received or paid on swap contracts are reported as a gain or loss in net investment income in the condensed consolidated statements of income.

Financial contracts may also include exchange traded futures or options contracts that are based on the movement of a particular index or interest rate. Where such contracts are traded in an active market, the Company's obligations or rights on these contracts are recorded at fair value measured based on the observable quoted prices of the same or similar financial contract in an active market (Level 1) or on broker quotes which reflect market information based on actual transactions (Level 2).

The Company purchases and sells CDS for the purpose of either managing its exposure to certain investments or for other strategic investment purposes. A CDS is a derivative instrument that provides protection against an investment loss due to specified credit or default events of a reference entity. The seller of a CDS guarantees to the buyer a specified amount if the reference entity defaults on its obligations or fails to perform. The buyer of a CDS pays a premium over time to the seller in exchange for obtaining this protection. A CDS trading in an active market is valued at fair value based on broker or market maker quotes for identical instruments in an active market (Level 2) or based on the current credit spreads on identical contracts (Level 2).

# Earnings (Loss) Per Share

Basic earnings (loss) per share are based on the weighted average number of common shares and participating securities outstanding during the period. Diluted earnings per share include the dilutive effect of additional potential common shares issuable when stock options are exercised and are determined using the treasury stock method. In the

event of a net loss, any stock options outstanding are excluded from the calculation of diluted loss per share. U.S. GAAP requires that unvested stock awards which contain non-forfeitable rights to dividends or dividend equivalents, whether paid or unpaid (referred to as "participating securities"), be included in the number of shares outstanding for both basic and diluted earnings per share calculations. The Company's unvested restricted stock is considered a participating security. In the event of a net loss, the participating securities are excluded from the calculation of both basic and diluted loss per share. Therefore, for the three months ended March 31, 2010, unvested restricted stock has been excluded from the weighted average shares outstanding.

	Three months ended		
	March 3	1,	
	2010	2009	
Weighted average shares outstanding	35,949,107	36,078,258	
Effect of dilutive service provider share-based awards	_	98,156	
Effect of dilutive employee and director share-based awards	_	158,456	
	35,949,107	36,334,870	
Anti-dilutive stock options outstanding	160,000	239,006	
Participating securities excluded from calculation of loss per share	465,092		

#### Table of contents

#### **Taxation**

Under current Cayman Islands law, no corporate entity, including the Company, is obligated to pay taxes in the Cayman Islands on either income or capital gains. The Company has an undertaking from the Governor-in-Cabinet of the Cayman Islands, pursuant to the provisions of the Tax Concessions Law, as amended, that, in the event that the Cayman Islands enacts any legislation that imposes tax on profits, income, gains or appreciations, or any tax in the nature of estate duty or inheritance tax, such tax will not be applicable to the Company or its operations, or to the Class A or Class B ordinary shares or related obligations, until February 1, 2025.

Verdant is incorporated in Delaware, and therefore is subject to taxes in accordance with the U.S. federal rates and regulations prescribed by the Internal Revenue Service. Verdant's taxable income is generally expected to be taxed at a rate of 35%. Any deferred tax asset is evaluated for recovery and a valuation allowance is recorded when it is more likely than not that the deferred tax asset will not be realized in the future. Verdant has not taken any tax positions that are subject to uncertainty or that are reasonably likely to have a material impact to Verdant or the Company.

#### Recently Issued Accounting Standards

In January 2010, the Financial Accounting Standards Board ("FASB") issued Accounting Standard Update ("ASU") No. 2010-06, Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements. This ASU requires additional disclosures and clarifies some existing disclosure requirements about fair value measurement. ASU No. 2010-06 amends Codification Subtopic 820-10 to require a reporting entity to disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and describe the reasons for the transfers. A reporting entity should present separately information about purchases, sales, issuances, and settlements in the reconciliation for fair value measurements using significant unobservable inputs (Level 3). In addition, ASU No. 2010-06 clarifies the requirements of the existing disclosures. ASU No. 2010-06 is effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements, which are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. Early application is permitted. The Company has adopted this ASU and has provided the required disclosures in accordance with ASU No. 2010-06 in this Form 10-Q for the period ending March 31, 2010. For those additional disclosures required for fiscal years beginning after December 15, 2010, the Company anticipates first including those in its Form 10-Q for the period ending March 31, 2011.

In February 2010, the FASB issued ASU No. 2010-09 which amended Subsequent Events (Topic 855). This ASU continues to require SEC filers to evaluate subsequent events through the date its financial statements are issued, but no longer requires SEC filers to disclose in the financial statements that it has done so or the date through which subsequent events have been evaluated. The ASU was effective immediately upon issuance and as a result the Company no longer discloses the date through which subsequent events have been evaluated.

#### Reclassifications

Certain prior period balances have been reclassified to conform to the current period presentation. The reclassifications resulted in no changes to net income (loss) or retained earnings for any of the periods presented.

3. FINANCIAL INSTRUMENTS

Fair Value Hierarchy

All of the Company's financial instruments are carried at fair value, and the net unrealized gains or losses are included in net investment income (loss) in the condensed consolidated statements of income.

The following table presents the Company's investments, categorized by the level of the fair value hierarchy as of March 31, 2010:

Description Assets:	Quoted prices in active markets (Level 1)		Sair value measurements as of March 31, 2010 Significant Significant unobservable other observable inputs inputs (Level 2) (\$\text{in thousands})					Total

More than ten years		4,024		3,655		
	\$	57,862	\$	90,721		

Investment in Equity Securities, Trading

At March 31, 2010, the following long positions were included in investment securities, trading:

	Cost	Uı	nrealized gains (\$ in th	nrealized losses s)	Fair value
Equities – listed	\$ 547,437	\$	124,711	\$ (36,812)	\$ 635,336
Exchange traded funds	7,879		9,654		17,533
	\$ 555,316	\$	134,365	\$ (36,812)	\$ 652,869

At December 31, 2009, the following long positions were included in investment securities, trading:

	Cost	Unrealized gains (\$ in thou		Unrealized losses ands)		Fair value
Equities – listed	\$ 510,229	\$	104,768	\$ (40,040)	\$	574,957
Exchange traded funds	7,879		10,365			18,244
	\$ 518,108	\$	115,133	\$ (40,040)	\$	593,201

#### Other Investments

"Other investments" include options, commodities and private and unlisted equity securities. Options are derivative financial instruments that give the buyer, in exchange for a premium payment, the right, but not the obligation, to either purchase from (call option) or sell to (put option) the writer, a specified underlying security at a specified price

on or before a specified date. The Company enters into option contracts to meet certain investment objectives. For exchange traded option contracts, the exchange acts as the counterparty to specific transactions and therefore bears the risk of delivery to and from counterparties of specific positions. For OTC options a dealer acts as the counterparty and therefore the Company is exposed to credit risk to the extent the dealer is unable to meet its obligations. As of March 31, 2010, the Company held OTC call options and put options with fair values of \$0.03 million and \$10.44 million (December 31, 2009: \$0.2 million and \$8.8 million), respectively.

#### Table of contents

At March 31, 2010, the following securities were included in other investments:

	Co		Cost g			nrealized losses ls)	Fair value
Commodities	\$	96,552	\$	7,335	\$	<u> </u>	\$ 103,887
Private and unlisted equity securities		44,138		1,230		(2,881)	42,487
Put options		12,323		93		(1,980)	10,436
Call options		6,289			-	(5,704)	585
	\$	159,302	\$	8,658	\$	(10,565)	157,395

At December 31, 2009, the following securities were included in other investments:

	Unrealized Cost gains (\$ in thousa		1	Unrealized losses ands)		Fair value	
Commodities	\$	96,552	\$ 5,687	\$	_	\$	102,239
Private and unlisted equity securities		27,636	1,430		(3,838)		25,228
Put options		6,269	2,540				8,809
Call options		6,406	51		(1,172)		5,285
	\$	136,863	\$ 9,708	\$	(5,010)	\$	141,561

Included in private and unlisted equity securities are investments in private equity funds with a fair value of \$2.1 million. The fair values of private equity funds were determined based on unadjusted net asset values reported by the funds' managers as of periods prior to the Company's reporting period. The private equity funds have varying lock-up periods and as of March 31, 2010 none of the funds were redeemable. The Company had unfunded commitments relating to a private equity fund of \$6.8 million as of March 31, 2010 which are included in the schedule of commitments and contingencies in Note 8 of these condensed consolidated financial statements.

#### Investments in Securities Sold, Not Yet Purchased

At March 31, 2010 and December 31, 2009, all equities sold, not yet purchased included in the Company's investment portfolio were in equities listed on recognized exchanges (Level 1).

At March 31, 2010, the following securities were included in investments in securities sold, not yet purchased:

	Proceeds	Un	realized gains (\$ in th	ins Unrealized losses (\$ in thousands)			Fair value
Equities - listed	\$ (530,424)	\$	58,672	\$	(100,285)	\$	(572,037)

# Table of contents

#### **Financial Contracts**

As of March 31, 2010 and December 31, 2009, the Company had entered into total return swaps, CDS, and interest rate options contracts with various financial institutions to meet certain investment objectives but not for hedging purposes. Under the terms of each of these financial contracts, the Company is either entitled to receive or is obligated to make payments which are based on the product of a formula contained within the contract that includes the change in the fair value of the underlying or reference security.

At March 31, 2010, the fair value of financial contracts outstanding was as follows:

			Fair	value of net	t
		Notional	assets		
		amount of	(ob	oligations)	
	Listing	underlying	on	n financial	
Financial Contracts	currency	instruments	C	contracts	
		(\$ in t	housand	is)

Credit default swaps, purchased – corporate debt	USD	121,118		(7,281)	
Credit default swaps, issued – corporate debt	USD	13,909		(8,739)	
Total return swaps – equities	USD	2,286		(52)	

# Total financial contracts payable, at fair value

\$ (16,200)

As of March 31, 2010, included in interest rate options are contracts on U.S. and Japanese interest rates. As of March 31, 2010, included in financial contracts payable was a CDS issued by the Company relating to the debt issued by an unrelated entity ("reference entity"). The CDS is scheduled to terminate in September 2013 and has a notional amount of \$13.9 million. Under this contract, the Company receives fees for guaranteeing the debt and in return will be obligated to pay the notional amount to the counterparty if the reference entity defaults under its debt obligations. As of March 31, 2010, the reference entity had a financial strength rating of (B3) and a surplus notes rating of (Caa3) from Moody's Investors Service. The fair value of the CDS at March 31, 2010 was \$7.5 million which was determined based on broker quotes obtained for identical or similar contracts traded in an active market (Level 2 inputs). At March 31, 2010, based on an evaluation of the reference entity, management believed it was not probable that the Company would be required to pay the notional amount of the CDS.

# Table of contents

During the three months ended March 31, 2010 and 2009, the Company reported gains and losses on derivatives as follows:

Derivatives not designated as hedging instruments	Location of gains and losses on derivatives recognized in income	rec	Gain (loss) cognized in ee months	n income	for the
		2	2010		2009
			(\$ in th	nousands	)
Interest rate options	Net investment income (loss)	\$	(5,206)	\$	970
Credit default swaps, purchased – Corporate					
debt	Net investment income (loss)		(3)		3,917
Credit default swaps, purchased – Sovereign					
debt	Net investment income (loss)		2,157		(2,036)
Total return swaps – Equities	Net investment income (loss)		797		(10,586)
Credit default swaps, issued – Corporate debt	Net investment income (loss)		1,448		(1,986)
Options, futures, warrants, and rights	Net investment income (loss)		(7,286)		(2,389)
		\$	(8,093)	\$	(12,110)

The Company generally does not enter into derivatives for risk management or hedging purposes, and the volume of derivative activities varies from period to period depending on potential investment opportunities. For the three months ended March 31, 2010, the Company's volume of derivative activities (based on notional amounts) was as follows:

Derivatives not designated as hedging instruments	Entered			Exited		
		(\$ in the	s)			
Credit default swaps	\$	_	\$	130,644		
Total return swaps		10,238		4,116		
Options		188,260		2,199		
Futures		44,436		41,763		
Total	\$	242,934	\$	178,722		

For the three months ended March 31, 2009, the Company's volume of derivative activities (based on notional amounts) was as follows:

Derivatives not designated as hedging instruments	_	Entered in thousands)	-	Exited		
Credit default swaps	\$	33,343	\$	20,850		
Total return swaps				2,509		
Interest rate options		27,770				
Options		2,971		12,223		
Rights		4,126		2,613		
Total	\$	68,210	\$	38,195		

Due to Prime Brokers

At March 31, 2010, the Company had an indebtedness of \$112.8 million to its prime brokers relating to investments purchased on margin. In the normal course of business, the Company's investment guidelines allow for temporary (30 days) leverage up to 20% of net invested assets, and for an extended time period up to 5% of net invested assets.

#### 4. REINSURANCE BALANCES RECEIVABLE

At March 31, 2010, included in reinsurance balances receivable were \$26.7 million due from a ceding insurer drawn under a letter of credit issued by the Company to the ceding insurer. These funds are being held in an interest bearing segregated account by the ceding insurer.

#### 5. RETROCESSION

The Company may from time to time purchase retrocessional coverage for one or more of the following reasons: to manage its overall exposure, to reduce its net liability on individual risks, to obtain additional underwriting capacity and to balance its underwriting portfolio. Additionally, retrocession can be used as a mechanism to share the risks and rewards of business written and therefore can be used as a tool to align the Company's interests with those of its counter-parties. The Company currently has coverages that provide for recovery of a portion of loss and loss expenses incurred on certain contracts. Loss and loss adjustment expense recoverables from the retrocessionaires are recorded as assets. For the three months ended March 31, 2010 and 2009, loss and loss adjustment expenses incurred of \$29.1 million and \$30.2 million reported on the condensed consolidated statements of income are net of loss and loss expenses recovered and recoverable of \$1.4 million and \$3.5 million, respectively. Retrocession contracts do not relieve the Company from its obligations to policyholders. Failure of retrocessionaires to honor their obligations could result in losses to the Company. The Company regularly evaluates the financial condition of its retrocessionaires. At March 31, 2010, the Company had loss and loss adjustment expense recoverables of \$0.4 million (December 31, 2009: \$0.3 million) with a retrocessionaire rated "A+ (Superior)" by A.M. Best. Additionally, the Company has loss recoverables of \$7.8 million (December 31, 2009: \$7.0 million) with unrated retrocessionaires. At March 31, 2010 and December 31, 2009, the Company retained funds and other collateral from the unrated retrocessionaires for amounts in excess of the loss recoverable asset, and the Company had recorded no provision for uncollectible losses recoverable.

#### 6. SHARE CAPITAL

During the three months ended March 31, 2010, 94,720 (2009: 186,956) restricted shares of Class A ordinary shares were issued to employees pursuant to the Company's stock incentive plan. These shares contain certain restrictions relating to, among other things, vesting, forfeiture in the event of termination of employment and transferability. Each of these restricted shares will cliff vest after three years from issue date, subject to the grantee's continued service with the Company.

#### Table of contents

The restricted share award activities during the three months ended March 31, 2010 were as follows:

	Number of	
	non-vested	Weighted average
	restricted shares	grant date fair value
Balance at December 31, 2009	474,782	\$ 16.51
Granted	94,720	25.00
Vested	(104,410)	16.12
Forfeited	-	-
Balance at March 31, 2010	465,092	\$ 18.32

During the three months ended March 31, 2010, 2,340 (2009: 17,500) stock options were exercised which had a weighted average exercise price of \$13.85 (2009: \$12.72) per share. The intrinsic value of options exercised during the three months ended March 31, 2010 was \$26,511 (2009: \$39,900). For any options exercised, the Company issues new Class A ordinary shares from the shares authorized for issuance under the Company's stock incentive plan. At March 31, 2010, 39,177 Class A ordinary shares were available for future issuance under the Company's stock incentive plan.

On April 28, 2010, the Company's shareholders approved an amendment to the Company's stock incentive plan to increase the number of Class A ordinary shares available for issuance from 2.0 million to 3.5 million Class A ordinary shares. At April 30, 2010, as a result of this amendment, there were 1,539,177 Class A ordinary shares available for future issuance.

Employee and director stock option activities during the three months ended March 31, 2010 were as follows:

	7	Weighted average	Weighted average
	Number of options	exercise price	grant date fair value
Balance at December 31, 2009	1,281,340 \$	14.24	\$ 6.33

# 7. RELATED PARTY TRANSACTIONS

# **Investment Advisory Agreement**

The Company is party to an Investment Advisory Agreement (the "Advisory Agreement") with DME Advisors, LP ("DME Advisors") under which the Company and DME Advisors created a joint venture for the purposes of managing

certain jointly held assets. DME Advisors is a related party and an affiliate of David Einhorn, Chairman of the Company's Board of Directors.

Pursuant to the Advisory Agreement with DME Advisors, performance compensation equal to 20% of the net income of the Company's share of the account managed by DME Advisors is payable to DME Advisors, subject to a loss carry forward provision. The loss carry forward provision allows DME Advisors to earn reduced incentive compensation of 10% on net investment income in any year subsequent to the year in which the investment account incurs a loss, until all the losses are recouped and an additional amount equal to 150% of the aggregate investment loss is earned. DME Advisors is not entitled to earn performance compensation in a year in which the investment portfolio incurs a loss. At March 31, 2010, the loss carry forward balance was \$111.2 million. At March 31, 2010, no performance compensation expense was recorded due to the net investment loss reported for the three months ended March 31, 2010. For the three months ended March 31, 2009, \$3.0 million of performance compensation expense was recorded.

Additionally, pursuant to the Advisory Agreement, DME Advisors is entitled to receive a monthly management fee equal to 0.125% (1.5% on an annual basis) of the Company's share of the account managed by DME Advisors. Included in net investment loss for the three months ended March 31, 2010 are management fees of \$3.3 million (March 31, 2009: \$2.2 million). All management fees were fully paid as of March 31, 2010.

#### Service Agreement

The Company has entered into a service agreement with DME Advisors, pursuant to which DME Advisors provides investor relations services to the Company for compensation of \$5,000 per month (plus expenses). The agreement is automatically renewed for one year periods until terminated by the Company or DME Advisors for any reason with 30 days prior written notice to the other party.

#### COMMITMENTS AND CONTINGENCIES

# Operating Lease

8.

Effective September 1, 2005, the Company entered into a five-year non-cancelable lease agreement to rent office space in the Cayman Islands. Effective April 25, 2010, this lease was terminated and the Company was released from all future obligations and liabilities relating to this lease agreement. On July 9, 2008, the Company entered into an additional lease agreement for new office space in the Cayman Islands. Under the terms of the latter lease agreement, the Company is committed to annual rent payments ranging from \$253,539 to \$311,821. The lease expires on June 30, 2018 and the Company has the option to renew the lease for a further five-year term. Included in the schedule below are the minimum lease payment obligations relating to these leases as of March 31, 2010.

The total rent expense related to leased office spaces for the three months ended March 31, 2010 was \$0.1 million (2009: \$0.2 million).

#### Specialist Service Agreement

The Company has entered into a service agreement with a specialist whereby the specialist service provider provides administration and support in developing and maintaining business relationships, reviewing and recommending programs and managing risks relating to certain specialty lines of business. The service provider does not have any authority to bind the Company to any reinsurance contracts. Under the terms of the agreement, the Company has committed to quarterly payments to the service provider. If the agreement is terminated, the Company is obligated to make minimum payments for another two years to ensure contracts to which the Company is bound are adequately administered by the specialist service provider. Included in the schedule below are the minimum payment obligations relating to this agreement.

#### **Private Equity**

Periodically, the Company makes investments in private equity vehicles. As part of the Company's participation in such private equity investments, the Company may make funding commitments. As of March 31, 2010, the Company had commitments to invest an additional \$17.1 million in private equity investments.

The following is a schedule of future minimum payments required under the above commitments:

	2010	2	011	2	2012		013 nousands		014	The	ereafter	Total
Operating lease obligations	\$ 250	\$	276	\$	276	\$	276	\$	276	\$	967	\$ 2,321
Specialist service agreement	470		400		150		_	-	_	-		1,020
Private and unlisted investments (1)	17,110		_	-	_	-	_	-	_	-	_	17,110
	\$ 17,830	\$	676	\$	426	\$	276	\$	276	\$	967	\$ 20,451

(1) Given the nature of these investments, the Company is unable to determine with any degree of accuracy when these commitments will be called. Therefore, for purposes of the above table, the Company has assumed that all commitments with no fixed payment schedules will be called during the year ended December 31, 2010.

#### Letters of Credit

At March 31, 2010, the Company had the following letter of credit facilities, which automatically renew each year unless terminated by either party in accordance with the required notice period:

	Available (\$ in thousands)	Termination Date	Notice period required for termination
			120 days prior to
Citibank N.A	\$ 400,000	October, 11, 2010	termination date
Butterfield Bank (Cayman)			30 days prior to
Limited	25,000	June 6, 2010	termination date
			90 days prior to
Bank of America, N.A	50,000	July 20, 2010	termination date
	\$ 475,000		

At March 31, 2010, an aggregate amount of \$245.2 million (December 31, 2009: \$278.4 million) in letters of credit were issued under the above facilities. Under these facilities, the Company provides collateral that may consist of equity securities and cash equivalents. At March 31, 2010, total equity securities and cash equivalents with a fair value in the aggregate of \$296.6 million (December 31, 2009: \$315.2 million) were pledged as security against the letters of credit issued. Each of the facilities requires that the Company comply with certain covenants, including restrictions on the Company's ability to place a lien or charge on the pledged assets, and restricts issuance of any debt without the consent of the letter of credit provider. Additionally, if an event of default exists, as defined in the letter of credit facilities, Greenlight Re will be prohibited from paying dividends to its parent company. The Company was in compliance with all the covenants of each of these facilities as of March 31, 2010 and December 31, 2009.

#### Litigation

From time to time in the normal course of business, we may be involved in formal and informal dispute resolution procedures, which may include arbitration or litigation, the outcomes of which determine our rights and obligations under our reinsurance contracts and other contractual agreements. In some disputes, we may seek to enforce our rights under an agreement or to collect funds owing to us. In other matters, we may resist attempts by others to collect funds or enforce alleged rights. While the final outcome of legal disputes cannot be predicted with certainty, we do not believe that any of existing disputes, when finally resolved, will have a material adverse effect on our business, financial condition or operating results.

# 9. SEGMENT REPORTING

The Company manages its business on the basis of one operating segment, property and casualty reinsurance.

The following tables provide a breakdown of the Company's gross premiums written by line of business and by geographic area of risks insured for the periods indicated:

# Gross Premiums Written by Line of Business

Property	Three months ende March 31, 2010 (\$ in thousands)	d	Three months ende March 31, 2009 (\$ in thousands)	ed
Commercial lines	\$ 13,407	20.0%	\$ 19,413	27.0%
Personal lines	6,855	10.2	11	0.0
Casualty				
General liability	5,662	8.5	2,632	3.7
Motor liability	11,689	17.5	16,688	23.2
Specialty				
Health	21,987	32.9	17,379	24.2
Medical malpractice	(1,360) (1)	(2.0)	4,620	6.4
Workers' compensation	3,275	4.9	11,128	15.5
Financial	5,372	8.0		_
	\$ 66,887	100.0%	\$ 71,871	100.0%

(1) The negative balance represents premiums returned upon commutation of a contract.

# Gross Premiums Written by Geographic Area of Risks Insured

	Three months ended March 31, 2010				Three months en March 31, 200	9		
		(\$ in thousands		(\$ in thousands)				
North America	\$	51,863	77.5%	\$	51,267	71.3%		
Worldwide (1)		15,024	22.5		20,358	28.3		
Caribbean		_	_		246	0.4		
	\$	66,887	100.0%	\$	71,871	100.0%		

(1) "Worldwide" risk is comprised of individual policies that insure risks on a worldwide basis.

# Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

References to "we," "us," "our," "our company," "Greenlight Re," or "the Company" refer to Greenlight Capital Re, Ltd. wholly-owned subsidiaries, Greenlight Reinsurance, Ltd. and Verdant Holding Company, Ltd., unless the context dictates otherwise. References to our "Ordinary Shares" refers collectively to our Class A Ordinary Shares and Class B Ordinary Shares.

The following is a discussion and analysis of our results of operations for the three months ended March 31, 2010 and 2009 and financial condition as of March 31, 2010 and December 31, 2009. This discussion and analysis should be read in conjunction with our audited consolidated financial statements and related notes thereto contained in our annual report on Form 10-K for the fiscal year ended December 31, 2009.

# Special Note About Forward-Looking Statements

Certain statements in Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A"), other than purely historical information, including estimates, projections, statements relating to our business plans, objectives and expected operating results, and the assumptions upon which those statements are based, are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). These forward-looking statements generally are identified by the words "believe," "project," "predict," "expect," "anticipate," "estimate," "intend," "plan," "may," "should," "will," "would," "will be," "will continue," expressions. Forward-looking statements are based on current expectations and assumptions that are subject to risks and uncertainties which may cause actual results to differ materially from the forward-looking statements. A detailed discussion of risks and uncertainties that could cause actual results and events to differ materially from such forward-looking statements is included in the section entitled "Risk Factors" (refer to Part I, Item 1A) contained in our annual report on Form 10-K for the fiscal year ended December 31, 2009. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise. Readers are cautioned not to place undue reliance on the forward looking statements, which speak only to the dates on which they were made.

We intend to communicate certain events that we believe may have a material adverse impact on the Company's operations or financial position, including property and casualty catastrophic events and material losses in our investment portfolio, in a timely manner through a public announcement. Other than as required by the Exchange Act, we do not intend to make public announcements regarding reinsurance or investments events that we do not believe, based on management's estimates and current information, will have a material adverse impact on the Company's operations or financial position.

# General

We are a Cayman Islands-based specialist property and casualty reinsurer with a reinsurance and investment strategy that we believe differentiates us from our competitors. Our goal is to build long-term shareholder value by selectively offering customized reinsurance solutions in markets where capacity and alternatives are limited, which we believe will provide us with favorable long-term returns on equity.

We aim to complement our underwriting results with a non-traditional investment approach in order to achieve higher rates of return over the long term than reinsurance companies that employ more traditional, fixed-income investment strategies. We manage our investment portfolio according to a value-oriented philosophy, in which we take long

positions in perceived undervalued securities and short positions in perceived overvalued securities.

In addition, we seek to form strategic alliances with insurance companies and general agents to complement our property and casualty reinsurance business and our non-traditional investment approach. To facilitate such strategic alliances, we formed Verdant Holding Company, Ltd. ("Verdant"), our wholly owned subsidiary which, among other activities, has made or may make strategic investments in a select group of property and casualty insurers and general agents in the United States.

Because we employ an opportunistic underwriting philosophy, period-to-period comparisons of our underwriting results may not be meaningful. In addition, our historical investment results may not be indicative of future performance. In addition, due to the nature of our reinsurance and investment strategies, our operating results will likely fluctuate from period to period.

# Segments

We manage our business on the basis of one operating segment, property and casualty reinsurance, in accordance with the qualitative and quantitative criteria established by U.S. GAAP. Within the property and casualty reinsurance segment, we analyze our underwriting operations using two categories:

frequency business; and

severity business.

Frequency business is characterized by contracts containing a potentially large number of relatively smaller losses emanating from multiple events. Clients generally buy this protection to increase their own underwriting capacity and typically select a reinsurer based upon the reinsurer's financial strength and expertise. We expect the results of frequency business to be less volatile than those of severity business from period to period due to its greater predictability. We also expect that over time the profit margins and return on equity of our frequency business will be lower than those of our severity business.

Severity business is typically characterized by contracts with the potential for significant losses emanating from one event or multiple events. Clients generally buy this protection to remove volatility from their balance sheets and, accordingly, we expect the results of severity business to be volatile from period to period. However, over the long term, we also expect our severity business to generate higher profit margins and return on equity than those of our frequency business.

#### Table of contents

#### Outlook and Trends

We believe that the rebound in the financial markets during 2009 resulted in restored financial positions in the property and casualty insurance and reinsurance industry. As a result, we believe that underwriting capacity has become more available in the property and casualty market which has resulted in a delay in significant price increases for our specialty products. In addition, the lack of large catastrophes in 2009 has preserved industry capital. Further, we believe the slowdown in worldwide economic activity has decreased the overall demand for insurance. Notwithstanding, price reductions from prior years appear to have slowed, and in some areas reversed. We believe that pricing of the property and casualty industry will be relatively flat for the near term until insurers and reinsurers begin to realize that the current price levels are not economically rational. Given that throughout the industry prior years' reserve redundancies have been reduced substantially and current interest rates are low, which limits opportunities for traditional fixed maturity investment income, we believe the industry will eventually need to increase pricing. However, we do not expect to see the effects of this until late 2010 or 2011. Price increases could occur earlier if financial and credit markets experience additional adverse shocks and loss of capital of insurers and reinsurers.

Despite an overall less attractive marketplace, we believe that we are well positioned to compete for frequency business due to our increasing market recognition and the development of certain strategic relationships. In addition, there are a number of insurers and reinsurers that continue to suffer from capacity issues even after the rebound of the financial markets during 2009. In the first quarter of 2010, we have seen a number of large, frequency-oriented opportunities that we believe fit well within our business strategy. Attractive underwriting opportunities could increase for us if financial and credit markets report large losses while we maintain our financial strength. We continue to see some consolidation in the insurance and reinsurance industry in 2010. We believe if merger and acquisition activity in the reinsurance industry increases and the number of industry participants decreases we may benefit from increased opportunities since insurers may prefer to diversify their reinsurance placements.

If the current challenges facing the insurance industry create significant dislocations, we believe we will be well positioned to capitalize on and compete for resulting opportunities. In some markets, such as subsectors of the credit and surety markets, we believe prices are rising substantially and reinsurance capacity is being withdrawn due to recent loss activity. In January 2010, we entered the credit and surety markets for the first time, as we believe recent dislocations will create above average opportunities for profit over the near term. Property catastrophe retrocession pricing has remained flat during first quarter of 2010. At the same time, property catastrophe reinsurance pricing softened by an estimated 8% to 10% versus first quarter of 2009. We believe this soft pricing is due to the increased underwriting capacity of the industry, and in the absence of large catastrophe events, could further soften the property catastrophe retrocessional market later in 2010 and into 2011. If pricing softens significantly in property catastrophe retrocessional coverage, we expect to reduce our exposures accordingly. While it is unclear what other businesses could be significantly affected by the current economic downturn, we believe that opportunities are likely to arise in a number of areas, including the following:

- lines of business that experience significant losses;
- lines of business where current market participants are experiencing financial distress or uncertainty; and
- business that is premium and capital intensive due to regulatory and other requirements.

Significant market dislocations that increase the pricing of certain insurance coverage could create the need for insureds to retain risks and therefore fuel the opportunity or need to form new captives. If this happens, a number of these captives could form in the Cayman Islands, enhancing our opportunity to provide additional reinsurance to the Cayman Islands' captive market.

During the first quarter of 2010, the U.S. government passed the Health Care Reform Bill – "Patient Protection and Affordable Care Act" which is expected to overhaul the health care system in the U.S. We are monitoring the impact of this Act on our business and the health care industry, but it is currently too early to predict with certainty the magnitude of any impact, and whether the Act will positively or negatively impact our business.

Our investment portfolio continues to be conservatively postured in 2010 as the market appears to have priced in a sustained economic recovery which may or may not hold. Our long portfolio is, for the most part, invested in stable, less cyclical businesses and three of our top five positions were initiated in 2009. We continue to hold short positions in businesses that we believe should be fundamentally challenged, especially in a difficult economic environment. We believe that there is a risk that the market will contract the multiples of higher reported earnings, which we believe have been principally supported by significant government stimulus programs and one-time temporary inventory improvements. Given the challenging macroeconomic environment and higher government deficits, we continue to hold a significant position in gold and have other macro hedges in place in the form of options on higher interest rates and some corporate and sovereign CDS. We will continue to opportunistically evaluate mispriced equity investments as the credit contraction continues to bear out.

We intend to continue monitoring both underwriting and financial market conditions to position ourselves to participate in future underserved or capacity-constrained markets as they arise and intend to offer products that we believe will generate favorable returns on equity over the long term. Accordingly, our underlying results and product line concentrations in any given period may not be indicative of our future results of operations.

# **Critical Accounting Policies**

Our consolidated financial statements are prepared in accordance with U.S. GAAP, which requires management to make estimates and assumptions that affect reported and disclosed amounts of assets and liabilities and the reported amounts of revenues and expenses during the reporting period. We believe that the critical accounting policies set forth in our annual report on Form 10-K for the fiscal year ended December 31, 2009, continue to describe the more significant judgments and estimates used in the preparation of our consolidated financial statements. These accounting policies pertain to premium revenues and risk transfer, investments, loss and loss adjustment expense reserves, acquisition costs, bonus accruals and share-based payments. If actual events differ significantly from the underlying judgments or estimates used by management in the application of these accounting policies, there could be a material effect on our results of operations and financial condition.

Recently issued accounting standards and their impact to the Company have been presented under "Recently Issued Accounting Standards" in Note 2 of the accompanying condensed consolidated financial statements.

#### Table of contents

#### **Results of Operations**

Three Months Ended March 31, 2010 and 2009

For the three months ended March 31, 2010, we reported a net loss of \$12.4 million, as compared to a net income of \$27.8 million reported for the same period in 2009. The net loss is principally due to our investment portfolio reporting a net loss of \$16.8 million, or a loss of 1.9%, for the first quarter of 2010 as compared to a net investment income of \$27.7 million, or a return of 4.6%, for the same period in 2009. The underwriting income for the three months ended March 31, 2010 was \$9.3 million compared to \$2.8 million for the same period in 2009. The increase in the underwriting income for the three months ended March 31, 2010 was principally due to no major catastrophe losses being reported during the period as compared to the same period in 2009, as well as a gain reported on commutation of a severity contract during the first quarter of 2010.

During the three months ended March 31, 2010, the basic adjusted book value per share decreased by \$0.37 per share, or 1.9%, to \$18.87 per share from \$19.24 per share at December 31, 2009. During the three months ended March 31, 2010, fully diluted adjusted book value decreased by \$0.35 per share, or 1.9%, to \$18.60 per share from \$18.95 per share at December 31, 2009.

Basic adjusted book value per share is a non-GAAP measure which excludes the non-controlling interest in a joint venture from total shareholders' equity. In addition, fully diluted adjusted book value per share is also a non-GAAP measure and represents basic adjusted book value per share combined with the impact from dilution of all in-the-money stock options issued and outstanding as of any period end. We believe that long-term growth in fully diluted adjusted book value per share is the most relevant measure of our financial performance. In addition, fully diluted adjusted book value per share may be of benefit to our investors, shareholders, and other interested parties to form a basis of comparison with other companies within the property and casualty reinsurance industry.

The following table presents a reconciliation of the non-GAAP basic adjusted and fully diluted adjusted book value per share to the most comparable GAAP measure.

Basic adjusted and fully diluted adjusted book value per share numerator:	2	Iarch 31, 010 \$ in thousan	ds)	ecember 31 009	Ι,	Se <sub>1</sub> 200	otember 3 )9	30,	June 30, 2009		March 31, 2009

#### Premiums Written

Details of gross premiums written are provided below:

	•	Three months ended March 31,								
	2010	2010								
	(\$ in thousands)									
Frequency	\$ 52,341	78.3%	\$ 46,799	65.1%						
Severity	14,546	21.7	25,072	34.9						
Total	\$ 66,887	100.0%	\$ 71,871	100.0%						

We expect quarterly reporting of premiums written to remain volatile as our underwriting portfolio continues to develop. The composition of premiums written between frequency and severity business will vary from quarter to quarter depending on the specific market opportunities that we pursue. The volatility in premiums is reflected in the premiums written for both frequency business and severity business when comparing the three month periods ended March 31, 2010 and 2009. In the first quarter of 2010, we identified a new opportunity relating to credit and surety markets (which we have classified as "Specialty – Financial" in our line of business analysis) which accounted for \$4.1 million of the increase in frequency premiums written for the three months ended March 31, 2010. The remaining \$1.6 million of increase in frequency premiums written was the net impact of increases in our personal lines, health, and general liability lines partially offset by decreases in motor liability and workers' compensation lines. The decrease in motor liability premiums resulted from the termination of a poorly performing contract and a deteriorating motor liability market, while the decrease in workers' compensation lines was mainly a result of decreases in the underlying insured policies due to the current economic slowdown.

The decrease in severity premiums was partially due to our decision to decrease our participation in a property catastrophe contract due to changing market conditions and partially due to a medical malpractice contract being terminated and unearned premiums being returned to the ceding insurer during the three months ended March 31, 2010. Offsetting these decreases was \$1.3 million of severity premiums written in our financial line relating to surety risk. A detailed analysis of gross premiums written by line of business can be found in Note 9 to the condensed consolidated financial statements.

#### Table of contents

For the three months ended March 31, 2010, our ceded premiums were \$0.6 million compared to \$1.2 million of ceded premiums for same period in 2009. The decrease in ceded premiums was primarily the result of decreases in health and workers' compensation lines which were partially offset by an increase in our general liability line. While the health premiums written increased for the three months ended March 31, 2010, the health premiums ceded decreased. This was due to one of our ceding insurers retaining the excess layer of coverage which in turn no longer required us to obtain retrocession coverage of the excess layer on those health contracts.

Details of net premiums written are provided below:

		Three months ended  March 31,								
	2010	2010 2009								
		(\$ in tho	usar	ids)						
Frequency	\$ 51,763	78.1%	\$	46,053	65.2%					
Severity	14,546	21.9		24,598	34.8					
Total	\$ 66,309	100.0%	\$	70,651	100.0%					

#### Net Premiums Earned

Net premiums earned reflect the pro rata inclusion into income of net premiums written over the life of the reinsurance contracts. Details of net premiums earned are provided below:

		Three months ended March 31,							
	2010	2010 2009							
		(\$ in thousands)							
Frequency	\$ 45,861	82.9%	\$	31,877	69.0%				
Severity	9,455	17.1		14,316	31.0				
Total	\$ 55,316	100.0%	\$	46,193	100.0%				

Premiums relating to quota share contracts are earned over the contract period in proportion to the period of protection. The increase in frequency net premiums earned is attributable principally to increased premiums earned from the health, personal and general liability lines offset by small decreases in motor liability and workers compensation lines, as compared to the corresponding 2009 period. Similarly the decrease in our severity earned premiums is a direct result of the decrease in our severity underwriting portfolio for reasons explained above.

#### Losses Incurred, Net

Losses incurred include losses paid and changes in loss reserves, including reserves for losses incurred but not reported, or IBNR, net of actual and estimated loss recoverables. Details of losses incurred are provided below:

	Three months ended									
	March 31,									
	2010 2009									
		(\$ in thou	ısanc	ds)						
Frequency	\$ 28,717	98.6%	\$	16,978	56.2%					
Severity	418	1.4		13,218	43.8					
Total	\$ 29,135	100.0%	\$	30,196	100.0%					

Total losses incurred on frequency contracts continued to increase as a result of an increase in premiums earned. Losses incurred as a percentage of premiums earned (i.e. loss ratio) fluctuate based on the mix of business, and the favorable or adverse development of our larger contracts. Our overall loss ratio for the three months ended March 31, 2010 was 52.7% compared to 65.4% for the same period in 2009. The loss ratios for our frequency business were 62.6% and 53.3% for the three months ended March 31, 2010 and 2009, respectively. The increase in frequency loss ratio was primarily related to our personal lines. During the first quarter of 2010, we had no changes to our loss ratio estimates in personal lines, however, during the first quarter of 2009 our personal lines had reported significantly favorable loss development which had resulted in a reversal of losses (and a lower overall frequency loss ratio) during the first quarter of 2009. During the three months ended March 31, 2010, we also reported higher loss ratios relating to general liability and workers' compensation lines which were partially offset by a decrease in our health line loss ratio.

We expect losses incurred on our severity business to be volatile from period to period. The loss ratios for our severity business were 4.4% and 92.3% for the three months ended March 31, 2010 and 2009, respectively. The decrease in the loss ratio for our severity business during the three months ended March 31, 2010 is primarily due to the lack of losses incurred on catastrophe excess of loss contracts during the three months ended March 31, 2010 compared to the same period in 2009. In addition, the severity loss ratio reported for the three months ended March 31, 2010 was unusually low due to the reversal of loss reserves upon commutation of a medical malpractice contract during the first quarter of 2010. Losses incurred for the three months ended March 31, 2010 can be further broken down into losses paid and changes in loss reserves as follows:

	Three months ended March 31, 2010				Three months ended March 31, 2009							
		Gross Ceded Net					Gross	(	Ceded	Net		
		(\$ in thousands)										
Losses paid (recovered)	\$	21,566	\$	(423)	\$	21,143	\$	8,372	\$	(1,155)	\$	7,217
Change in reserves		8,921		(929)		7,992		18,317		4,662		22,979
Total losses incurred	\$	30,487	\$	(1,352)	\$	29,135	\$	26,689	\$	3,507	\$	30,196

#### Table of contents

Included in change in reserves of \$8.0 million for the three months ended March 31, 2010, were changes in prior period reinsurance reserves primarily due to the elimination of \$1.9 million loss reserves relating to a medical malpractice contract that was commuted during the first quarter of 2010. There were no other significant developments of prior period reserves during the three months ended March 31, 2010.

#### **Acquisition Costs**

Acquisition costs represent the amortization of commission and brokerage expenses incurred on contracts written as well as profit commissions and other underwriting expenses which are expensed when incurred. Deferred acquisition costs are limited to the amount of commission and brokerage expenses that are expected to be recovered from future earned premiums and anticipated investment income. Details of acquisition costs are provided below:

		Three months ended March 31,							
	2010			20	09				
		(\$ in tho	usand	ls)					
Frequency	\$ 15,996	94.6%	\$	13,493	101.9%				
Severity	914	5.4		(248)	(1.9)				
Total	\$ 16,910	100.0%	\$	13,245	100.0%				

Increased acquisition costs for the three months ended March 31, 2010, compared to the corresponding 2009 period are a result of the increases in premiums earned during the period. For the three months ended March 31, 2010, the acquisition cost ratio for frequency business was 34.9% compared to 42.3% for the corresponding 2009 period. The lower ratio was principally due to no further profit commissions being accrued on a personal lines contract for the three months ended March 31, 2010, where as for the same period in 2009, a large profit commission was recorded on this contract due to favorable loss development. The decrease in acquisition cost ratio was also attributed to downward swings in profit and ceding commission rates for workers' compensation and general liability contracts which had increases in loss ratios during the period. These decreases in our acquisition cost ratio were partially offset by increases in profit commission rates on health contracts which had improved loss ratios during the period. We expect acquisition costs to be higher for frequency business than for severity business. The acquisition cost ratio for severity business was 9.7% for the three months ended March 31, 2010 compared to (1.7) % for the corresponding 2009 period. The negative acquisition cost ratio in 2009 was a result of reversal of profit commissions previously accrued relating to an aggregate catastrophe severity contract which reported a large loss during the three months ended March 31, 2009. In the absence of any large catastrophe losses for the three months ended March 31, 2010, the severity acquisition cost ratio reflects the profit commissions, ceding commissions and brokerage expenses related to our severity contracts. The overall acquisition cost ratio for the three months ended March 31, 2010 increased to 30.6% from 28.7% for the corresponding 2009 period.

# General and Administrative Expenses

Our general and administrative expenses increased by \$0.8 million to \$5.1 million for the three months ended March 31, 2010 compared to the same period in 2009. The increase in general and administrative expenses for the three months ended March 31, 2010 resulted mainly from higher employee costs including employee bonuses. The general and administrative expenses for the three months ended March 31, 2010 and 2009 include \$0.9 million and \$0.7 million, respectively, for the expensing of the fair value of stock options and restricted stock granted to employees and directors.

Net Investment (Loss) Income

A summary of our net investment (loss) income is as follows:

	Three months ended					
	March 31,					
	2010 2009					
	(\$ in thousands)					
Realized gains (losses) and movement in unrealized gains (losses)	\$ (10,700)	\$	33,441			
Interest, dividend and other investment income	2,328		2,808			
Interest, dividend and other investment expenses	(5,197)		(3,296)			
Investment advisor compensation	(3,262)		(5,236)			
Net investment (loss) income	\$ (16,831)	\$	27,717			

For the three months ended March 31, 2010, investment loss, net of all fees and expenses, was 1.9% on our investment portfolio. This compares to a 4.6% investment gain reported for the corresponding 2009 period. For the three months ended March 31, 2010, our long portfolio's positive returns were offset by losses on our short portfolio, resulting in a net loss of 1.9%.

Pursuant to the Advisory Agreement, performance compensation equal to 20% of the net income of the Company's share of the account managed by DME Advisors is payable to DME Advisors, subject to a loss carry forward provision. The loss carry forward provision allows DME Advisors to earn reduced incentive compensation of 10% on net investment income in any year subsequent to the year in which the investment account incurs a loss, until all the losses are recouped and an additional amount equal to 150% of the aggregate investment loss is earned. As of March 31, 2010, the loss carry forward balance was \$111.2 million.

Our investment advisor, DME Advisors, LP ("DME Advisors"), and its affiliates manage and expect to manage client accounts other than ours, some of which have investment objectives similar to ours. To comply with Regulation FD, our investment returns are posted on our website on a monthly basis. Additionally, on our website we provide the names of the largest disclosed long positions in our investment portfolio as of the last trading day of each month. DME Advisors may choose not to disclose certain positions to its other clients in order to protect its investment strategy. Therefore, our website presents the largest positions held by us that are disclosed by DME Advisors or its affiliates to their other clients.

#### Taxes

We are not obligated to pay any taxes in the Cayman Islands on either income or capital gains. We have been granted an exemption by the Governor-In-Cabinet from any taxes that may be imposed in the Cayman Islands for a period of 20 years, expiring on February 1, 2025.

Our wholly owned subsidiary, Verdant, is incorporated in Delaware, and therefore is subject to taxes in accordance with the U.S. federal rates and regulations prescribed by the Internal Revenue Service. Verdant's taxable income is expected to be taxed at a rate of 35%. For the three months ended March 31, 2010, we recorded a deferred tax asset of \$66,899 (December 31, 2009: \$68,719) resulting solely from the temporary differences in recognition of expenses for tax purposes. An accrual of \$15,882 (December 31, 2009: \$19,529) was recorded for current taxes payable as of March 31, 2010. Based on the timing of the reversal of the temporary differences and likelihood of generating sufficient taxable income to realize the future tax benefit, management believes it is more likely than not that the deferred tax asset will be fully realized in the future and therefore no valuation allowance has been recorded. Verdant has not taken any tax positions that are subject to uncertainty or that are reasonably likely to have a material impact to Verdant or the Company.

#### Ratio Analysis

Due to the opportunistic and customized nature of our underwriting operations, we expect to report different loss and expense ratios in both our frequency and severity businesses from period to period. The following table provides the ratios for the three months ended March 31, 2010 and 2009:

	Three months ended March 31, 2010				ee months ended Iarch 31, 2009	
	Frequency	Severity	Total	Frequency	Severity	Total
Loss ratio	62.6%	4.4%	52.7%	53.3%	92.3%	65.4%
Acquisition cost ratio	34.9%	9.7%	30.6%	42.3%	(1.7)%	28.7%
Composite ratio	97.5%	14.1%	83.3%	95.6%	90.6%	94.1%
Internal expense ratio			9.3%			9.5%
Combined ratio			92.6%			103.6%

The loss ratio is calculated by dividing loss and loss adjustment expenses incurred by net premiums earned. We expect that our loss ratio will be volatile for our severity business and may exceed that of our frequency business in certain periods. Given that we opportunistically underwrite a concentrated portfolio across several lines of business that have varying expected loss ratios, we can expect there to be significant annual variations in the loss ratios reported from our frequency business. In addition, the loss ratios for both frequency and severity business can vary depending on the lines of business written.

The acquisition cost ratio is calculated by dividing acquisition costs by net premiums earned. This ratio demonstrates the higher acquisition costs incurred for our frequency business than for our severity business.

The composite ratio is the ratio of underwriting losses incurred, loss adjustment expenses and acquisition costs, excluding general and administrative expenses, to net premiums earned. Similar to the loss ratio, we expect that this ratio will be more volatile for our severity business depending on loss activity in any particular period.

The internal expense ratio is the ratio of all general and administrative expenses to net premiums earned. We expect our internal expense ratio to decrease as we continue to expand our underwriting operations.

The combined ratio is the sum of the composite ratio and the internal expense ratio. It measures the total profitability of our underwriting operations. This ratio does not take net investment (loss) income or other income into account. Given the nature of our opportunistic underwriting strategy, we expect that our combined ratio may be volatile from period to period.

#### **Financial Condition**

#### Investments and Due to Prime Brokers

At March 31, 2010, investments reported in the condensed consolidated balance sheets were \$901.0 million compared to \$830.6 million as of December 31, 2009, an increase of 8.5%. For the three months ended March 31, 2010, our exposure to long investments increased from 85% as of December 31, 2009, to 96%, while our exposure to short investments increased from 65% as of December 31, 2009, to 70%. This exposure analysis is conducted on a notional basis and does not include cash (U.S. dollar and foreign currencies), gold, CDS, foreign exchange options or interest rate options. The increase in our long exposure was in part facilitated by investments purchased using leverage. At March 31, 2010, we had an indebtedness of \$112.8 million to our prime brokers. From time to time we incur indebtedness to our prime brokers to implement our investment strategy in accordance with our investment guidelines. On a net basis, our invested assets decreased as a result of a \$26.7 million letter of credit being redeemed by a ceding insurer, as well as a net investment loss of \$16.8 million for the three months ended March 31, 2010. These decreases were offset by \$26.1 million of funds from our underwriting activities transferred into our investment portfolio.

Our investment portfolio, including any derivatives, is valued at fair value and any unrealized gains or losses are reflected in net investment (loss) income in the condensed consolidated statements of income. As of March 31, 2010, 87.9% of our investment portfolio (excluding restricted and unrestricted cash and cash equivalents and due to brokers) was comprised of investments valued based on quoted prices in actively traded markets (Level 1), 9.2% comprised of securities valued based on observable inputs other than quoted prices (Level 2) and 2.9% was comprised of securities valued based on non-observable inputs (Level 3).

In determining whether a market for a financial instrument is active or inactive, we obtain information from our investment advisor who makes the determination based on feedback from executing brokers, market makers, and in-house traders to assess the level of market activity and available liquidity for any given financial instrument. Where a financial instrument is valued based on broker quotes, our investment advisor generally requests multiple quotes. The ultimate value is based on an average of the quotes obtained. Broker quoted prices are generally not adjusted in determining the ultimate values and are obtained with the expectation of the quotes being binding. As of March 31, 2010, \$115.0 million of our investments were valued based on broker quotes, of which \$102.9 million were based on observable market information and classified as Level 2, and \$12.1 million were based on non-observable inputs and classified as Level 3.

During the three months ended March 31, 2010, there were no transfers between Level 1, Level 2 and Level 3 investments. Our Level 3 investments increased primarily as a result of private equity investments purchased during the three months ended March 31, 2010.

Non-observable inputs used by our investment advisor include discounted cash flow models for valuing certain corporate debt instruments. In addition, other non-observable inputs include the use of investment manager statements and management estimates based on third party appraisals of underlying assets for valuing private equity investments.

#### Table of contents

#### Reinsurance Balances Receivable

At March 31, 2010, reinsurance balances receivable were \$106.1 million compared to \$82.7 million as of December 31, 2009, an increase of \$23.4 million, or 28.3%. The increase in the reinsurance balances receivable relates primarily to \$26.7 million due from one of our ceding insurers which drew \$26.7 million under a letter of credit we had issued to the ceding insurer. At March 31, 2010, the funds were being held in an interest-bearing segregated account. Interest on the account accrues to our benefit.

#### Loss and Loss Adjustment Expense Reserves

We establish reserves for contracts based on estimates of the ultimate cost of all losses including incurred but not reported reserves ("IBNR") as well as allocated and unallocated loss expenses. These estimated ultimate reserves are based on reports received from ceding companies, historical experience and actuarial estimates. These estimates are reviewed quarterly on a contract by contract basis and adjusted when appropriate. Since reserves are based on estimates, the setting of appropriate reserves is an inherently uncertain process. Our estimates are based upon actuarial and statistical projections and on our assessment of currently available data, predictions of future developments and estimates of future trends and other factors. The final settlement of losses may vary, perhaps materially, from the reserves initially established and any adjustments to the estimates are recorded in the period in which they are determined. Under U.S. GAAP, we are not permitted to establish loss reserves, which include case reserves and IBNR, until the occurrence of an event which may give rise to a claim. As a result, only loss reserves applicable to losses incurred up to the reporting date are established, with no allowance for the establishment of loss reserves to account for expected future occurrences.

For natural peril risk exposed business, once an event has occurred that may give rise to a claim, we establish loss reserves based on loss payments and case reserves reported by our clients. We then add to these case reserves our estimates for IBNR. To establish our IBNR loss estimates, in addition to the loss information and estimates communicated by ceding companies, we rely on industry information, knowledge of the business written and management's judgment.

Reserves for loss and loss adjustment expenses as of March 31, 2010 and December 31, 2009 were comprised of the following:

	M	arch 31, 2010	0	December 31, 2009				
	Case	Case						
	Reserves	IBNR	Total	Reserves	<b>IBNR</b>	Total		
			(\$ in tho	usands)				
Frequency	\$ 21,256
