## Explanatory Note

On October 24, 2017, Northeast Bancorp, a Maine corporation (the "Company"), filed a Form 8-K reporting its earnings for the first quarter of fiscal 2018 (the "Original Form 8-K"). The full text of the press release announcing the first quarter earnings was included as an Exhibit 99.1 to the Original Form 8-K. Subsequent to filing the Original Form 8-K the Company identified that the reported earnings did not reflect the Company's adoption of ASU 2016-09, *Compensation—Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting* ("ASU 2016-09") in the first quarter of fiscal 2018. The purpose of this Form 8-K/A is to reflect the adoption of ASU 2016-09 in the Company's earnings for first quarter of fiscal 2018.

Upon adoption of ASU 2016-09, the Company must recognize all excess tax benefits and deficiencies relating to the vesting or exercising of share-based payments as income tax benefit or expense in the income statement in the reporting period in which they occur. Previously, such excess tax benefits would have been recognized as additional paid-in capital. Additionally, ASU 2016-09 may create significant volatility in the Company's effective tax rate as the excess tax benefit treatment will vary from quarter to quarter as a function of the volume of share-based payments vested or exercised and the market value of the Company's stock at the time of vest in comparison to the compensation cost recognized in the financial statements. The standard provides that the tax effects of exercised or vested awards will be treated as a discrete item in the reporting period in which they occur. Thus, the tax effect of excess benefits and deficiencies on a company's tax rate will not be part of the overall projected effective tax rate. For the three months ended September 30, 2017, the Company recognized an income tax benefit of \$818 thousand as a result of the adoption of ASU 2016-09, increasing net income to \$4.6 million for the quarter.

In addition to the excess tax benefit treatment, the assumed proceeds from applying the treasury stock method when computing earnings per share is amended to exclude the amount of excess tax benefits that would have been previously recognized as additional paid-in capital, which increased diluted weighted average common shares outstanding by 40,966 shares to 9,089,936 shares.

For the three months ended September 30, 2017, the adoption of ASU 2016-09 reduced the Company's income tax expense by \$818 thousand, decreased the Company's accrued federal and state taxes payable (included in other liabilities on the consolidated balance sheets) by \$818 thousand and increased basic and diluted earnings per share to \$0.52 and \$0.50, respectively.

The following table summarizes the changes in the earnings reported in the Original Form 8-K:
