Kindred Biosciences, Inc.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

1. Description of Business, Basis of Presentation and Summary of Significant Accounting Policies

Kindred Biosciences, Inc. ("KindredBio", "we", "us" or "our") was incorporated on September 25, 2012 (inception) in the State of Delaware. On April 25, 2016, we filed a Certificate of Incorporation with the State of Delaware for a wholly owned subsidiary, KindredBio Equine, Inc. ("Subsidiary"). The Subsidiary has one class of capital stock which is designated common stock, \$0.0001 par value per share. The authorized number of shares of common stock for the Subsidiary is 1,000.

We are a pre-commercialization biopharmaceutical company focused on saving and improving the lives of pets. Our activities since inception have consisted principally of raising capital, establishing facilities, recruiting management and technical staff and performing research and development and advancing our product candidates seeking regulatory approval. Our headquarters are located in Burlingame, California.

We are subject to risks common to companies in the biotechnology and pharmaceutical industries. There can be no assurance that our research and development will be successfully completed, that adequate patent or other intellectual property protection for our technology will be obtained, that any products developed will obtain necessary government regulatory approval or that any approved products will be commercially viable. We operate in an environment of substantial competition from other animal health companies. In addition, we are dependent upon the services of our employees and consultants, as well as third-party contract research organizations and manufacturers. The accompanying unaudited interim condensed consolidated financial statements ("financial statements") have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America ("U.S. GAAP") for complete financial statements. These unaudited interim condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto for the year ended December 31, 2017 included in our annual report on Form 10-K as filed with the SEC on March 1, 2018. In the opinion of management, all adjustments, consisting of a normal and recurring nature, considered necessary for a fair presentation, have been included in these financial statements.

The accompanying financial statements include the accounts of the Company and its wholly owned Subsidiary. All inter-company accounts and transactions have been eliminated in consolidation.

Stock Offerings

In January 2015, we filed a shelf registration statement on Form S-3 to offer and sell, from time to time, equity securities in one or more offerings up to a total dollar amount of \$150.0 million. In December 2016, we entered into an At Market Issuance Sales Agreement ("Sales Agreement") with FBR Capital Markets & Co. ("FBR"), pursuant to which we were able to issue and sell shares of our common stock having an aggregate offering price up to \$30.0 million, from time to time, through FBR as our sales agent. In conjunction with the Sales Agreement, FBR would receive compensation based on an aggregate of 3% of the gross proceeds on the sale price per share of our common stock. Any sales made pursuant to the Sales Agreement were deemed an "at-the-market" offering and would be made pursuant to the shelf registration statement on Form S-3. During the six months ended June 30, 2017, we completed the sale of 4,501,985 shares of common stock under the Sales Agreement. Net proceeds, after deducting approximately \$906,000 in commissions and fees and approximately \$132,000 in offering costs, were approximately \$28,962,000. In July 2017, we completed an underwritten public offering of 3,000,000 shares of common stock and in August 2017, we completed the closing of the exercise of the underwriter's option to purchase an additional 314,000 shares of common stock, both at an offering price of \$7.50 per share for total gross proceeds of \$24,855,000. Net proceeds, after deducting underwriting commission and offering costs, were approximately \$23,198,000.

In January 2018, we filed a shelf registration statement on Form S-3 to offer and sell, from time to time, equity securities in one or more offerings up to a total dollar amount of \$150.0 million due to the expiration of our January 2015 shelf registration.

## Table of Contents

### Liquidity

We have incurred losses and negative cash flows from operations and have not generated any revenue since our inception and had an accumulated deficit of \$121,951,000 as of March 31, 2018. We expect to continue to incur losses and negative cash flows, which will increase significantly from historical levels as we expand our product development activities, seek regulatory approvals for our product candidates, establish a biologics manufacturing capability, and begin to commercialize any approved products. To date, we have been funded primarily through sales of our former convertible preferred stock, the sale of our common stock in our initial public offering in December 2013, the sale of our common stock in our April 2014 follow-on public offering, periodic sales of our common stock under the ATM in the first half year of 2017 and the sale of our common stock in a follow-on public offering in the third quarter of 2017. We might require additional capital until such time as we can generate operating revenues in excess operating expenses. We believe that our cash, cash equivalents, short-term and long-term investments totaling \$70,824,000 as of March 31, 2018, are sufficient to fund our planned operations through at least the next 18 months.

If we require additional funding for operations, we may seek such funding through public or private equity or debt financings or other sources, such as corporate collaborations and licensing arrangements. We may not be able to obtain financing on acceptable terms, or at all, and we may not be able to enter into corporate collaborations or licensing arrangements. The terms of any financing may result in dilution or otherwise adversely affect the holdings or the rights of our stockholders

### Property, Plant and Equipment

On June 21, 2017, we entered into a purchase agreement with Strategic Veterinary Pharmaceuticals, Inc. ("SVP") for the purchase of an approximately 180,000 sq. ft. biologics plant ("the Plant") with clean rooms, utility, equipment, and related

quality documentation suitable for small molecule and biologics manufacturing, that is located in Elwood, Kansas. The purchase was finalized on August 7, 2017 upon completion of the diligence period and satisfaction of the conditions of escrow. The Plant was purchased for \$3,750,000, which includes approximately eight acres of land located at 1411 Oak Street, Elwood, Kansas, all improvements located at the Plant, and all personal property and intangible property owned by SVP and located at the Plant or used in connection with the operation of the Plant.

Property and equipment are stated at cost less accumulated depreciation and amortization. We calculate depreciation using the straight-line method over the estimated useful lives of the assets, which range from two to five years for furniture, fixtures, lab and computer equipment and software, and fifteen to thirty-nine years for land improvements and real property. Land and assets held within construction in progress are not depreciated. Construction in progress is related to the construction or development of property and equipment that have not yet been placed in service for their intended use. Expenditures for repairs and maintenance of assets are charged to expense as incurred. We amortize leasehold improvements using the straight-line method over the estimated useful lives of the respective assets or the lease term, whichever is shorter. Upon retirement or sale, the cost and related accumulated depreciation and amortization of assets disposed of are removed from the accounts and any resulting gain or loss is included in other income/expense.

### Use of Estimates

The preparation of financial statements and related disclosures in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenues and expenses during the reporting periods. Significant estimates and assumptions reflected in these financial statements include, but are not limited to, the valuation of stock-based awards, the realization of deferred tax assets, the recoverability of long-lived assets and the accrual of research and development expenses. Estimates are periodically reviewed in light of changes in circumstances, facts and experience. Actual results could differ from those estimates.

Comprehensive Loss

Our comprehensive loss includes the change in unrealized gains or losses on available-for-sale securities. The cumulative amount of gains or losses are reflected as a separate component of stockholders' equity in the condensed consolidated balance sheets as accumulated other comprehensive income (loss).

## Table of Contents

### Recently Issued Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2014-09, "Revenue from Contracts with Customers". This new standard will replace most of the existing revenue recognition guidance in U.S. GAAP when it becomes effective and permits the use of either the retrospective or cumulative effect transition method. The new standard, as amended, becomes effective in the first quarter of fiscal year 2018, but allows the adoption of the standard one year earlier if we so choose. The analysis identifying areas that will be impacted by the new guidance is completed. Additionally, we continue to monitor modifications, clarifications, and interpretations issued by the FASB that may impact its assessment. We do not currently have and have never had any contracts that are within the scope of ASC 606, "Revenue from Contracts with Customers" or its predecessor guidance, ASC 605, "Revenue Recognition". We have adopted the new guidance and it did not have a material impact on our consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, "Leases (Topic 842)", requiring organizations that lease assets—referred to as “lessees”—to recognize on the consolidated balance sheet the assets and liabilities for the rights and obligations created by those leases. Under the new guidance, a lessee will be required to recognize assets and liabilities for leases with lease terms of more than 12 months. The ASU on leases will take effect for public companies for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. We are currently evaluating the new guidance and have not determined the impact this standard may have on our financial statements.

We do not believe there are any other recently issued standards not yet effective that will have a material impact on our financial statements when the standards become effective.

### 2. Fair Value Measurements

Certain assets and liabilities are carried at fair value. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value must maximize the use of observable inputs and minimize the use of unobservable inputs. A fair value hierarchy based on three levels of inputs, of which the first two are considered observable and the last is considered unobservable, is used to measure fair value:

Level 1: Quoted prices in active markets for identical assets or liabilities.

Level 2: Observable inputs (other than Level 1 quoted prices) such as quoted prices in active markets for similar assets or liabilities, quoted prices in markets that are not active for identical or similar assets or liabilities, or other inputs that are observable or can be corroborated by observable market data.

Level 3: Unobservable inputs that are supported by little or no market activity and that are significant to determining the fair value of the assets or liabilities, including pricing models, discounted cash flow methodologies and similar techniques.

The carrying amount of financial instruments, including cash and cash equivalents, accounts payable and accrued liabilities approximate fair value due to the short maturities of these financial instruments. Financial assets, which consist of money market funds and available-for-sale securities, are measured at fair value on a recurring basis.

Financial assets, which consist of money market funds and available-for-sale securities, are measured at fair value on a recurring basis and are summarized as follows (in thousands):

Table of Contents

## Fair Value Measurements as of March 31, 2018

Description	Total	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Unobservable Inputs (Level 3)
Cash equivalents:				
Money market funds	\$104	\$ 104	\$ —	\$ —
US Treasury bills	1,250	1,250	—	—
Commercial paper	40,058	—	40,058	—
Short-term investments:				
U.S. treasury bonds and notes	3,484	3,484	—	—
U.S. government agency notes	4,486	—	4,486	—
Commercial paper	6,465	—	6,465	—
Corporate notes	11,893	—	11,893	—
	\$67,740	\$ 4,838	\$ 62,902	\$ —

## Fair Value Measurements as of December 31, 2017

Description	Total	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Unobservable Inputs (Level 3)
Cash equivalents:				
Money market funds	\$801	\$ 801	\$ —	\$ —
Commercial paper	31,977	—	31,977	—
Corporate notes	1,500	—	1,500	—
Short-term investments:				
U.S. treasury bonds and notes	3,482	3,482	—	—
U.S. government agency notes	6,746	—	6,746	—
Commercial paper	22,052	—	22,052	—
Corporate notes	13,927	—	13,927	—
Long-term investments:				
Corporate notes	1,499	—	1,499	—
	\$81,984	\$ 4,283	\$ 77,701	\$ —

During the three months ended March 31, 2018, there were no transfers of assets between Level 1, Level 2 or Level 3 of the fair value hierarchy.

At March 31, 2018 and December 31, 2017, we did not have any financial liabilities which were measured at fair value on a recurring basis.

### 3. Investments

We classify all highly-liquid investments with stated maturities of greater than three months from the date of purchase and remaining maturities of less than one year as short-term investments. Investments with maturities beyond one year may be classified as short-term based on their highly liquid nature and because such investments are viewed as being available to support current operations. We classify and account for investments as available-for-sale and reflect realized gains and losses using the specific identification method. Changes in market value, if any, excluding

other-than-temporary impairments, are reflected in other comprehensive income (loss).

Table of Contents

The fair value of available-for-sale investments by type of security at March 31, 2018 was as follows (in thousands):

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Short-term investments:				
Commercial paper	\$ 6,465	\$ —	\$ —	\$6,465
U.S. government agency notes	4,493	—	(7 )	4,486
U.S. treasury bonds and notes	3,489	—	(5 )	3,484
Corporate notes	11,923	—	(30 )	11,893
Total available-for-sale investments	\$ 26,370	\$ —	\$ (42 )	\$26,328

The fair value of available-for-sale investments by type of security at December 31, 2017 was as follows (in thousands):

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Short-term investments:				
Commercial paper	\$ 22,052	\$ —	\$ —	\$22,052
U.S. government agency notes	6,750	—	(4 )	6,746
U.S. treasury bonds and notes	3,483	—	(1 )	3,482
Corporate notes	13,946	—	(19 )	13,927
	46,231	—	(24 )	46,207
Long-term investments:				
Corporate notes	1,506	—	(7 )	1,499
Total available-for-sale investments	\$ 47,737	\$ —	\$ (31 )	\$47,706

#### 4. Accrued Liabilities

Accrued liabilities consisted of the following (in thousands):

	March 31, 2018	December 31, 2017
Accrued consulting	\$288	\$ 335
Accrued research and development costs	989	919
Other expenses	642	646
Deferred rent	117	115
	2,036	2,015
Less current portion	(1,925)	(1,900 )
Long-term liability (deferred rent)	\$111	\$ 115

#### 5. Common Stock and Stock-Based Awards

##### Common Stock

During the three months ended March 31, 2018, the Company issued 41,488 shares of common stock in connection with the exercise of stock options for proceeds of \$182,000.

Table of Contents

During the three months ended March 31, 2018, 26,980 shares of restricted common stock at a cost of \$247,000 were withheld to satisfy employee tax withholding obligations arising in conjunction with the vesting of restricted stock (see below).

**Stock-Based Awards**

The table below shows the number of shares of common stock underlying options granted to employees, directors and consultants, the assumptions used in the Black-Scholes option pricing model used to value those options and the resulting weighted-average grant date fair value per share:

Stock Option Plan	Three months ended March 31,	
	2018	2017
Shares underlying options granted	1,090,200	920,700
Weighted-average exercise price	\$8.77	\$6.39
Weighted average risk- free interest rate	2.50 %	1.98 %
Weighted average expected term (years)	5.9	6.0
Weighted average expected volatility	60%	70%
Expected dividend yield	—	—
Weighted-average grant date fair value per share	\$4.97	\$4.04

In May 2016, we adopted the 2016 Equity Incentive Plan (the "2016 Plan"), and reserved 3,000,000 shares of our common stock for issuance under the 2016 Plan. The 2016 Plan is the successor to our 2012 Equity Incentive Plan (the "2012 Plan"), which was retired on May 23, 2016 upon stockholders' approval of our 2016 Plan. All awards made under the 2012 Plan shall remain subject to the terms of that plan. Options granted under the 2016 Plan may be either incentive stock options or nonstatutory stock options. The 2016 Plan also provides for the grant of stock appreciation rights, restricted stock awards, restricted stock unit awards, performance stock awards, performance cash awards and other stock awards. The exercise price of a stock option may not be less than 100% of the closing price of our common stock on the date of the grant. If, at any time we grant an incentive stock option, and the optionee directly or by attribution owns stock possessing more than 10% of the total combined voting power of all classes of KindredBio stock, the option price shall be at least 110% of the fair value and shall not be exercisable more than five years after the date of grant. Options generally vest over a period of one or four years from the date of grant. Options granted under the 2016 Plan expire no later than 10 years from the date of grant. As of March 31, 2018, there were 2,322,531 option shares outstanding, 187,500 restricted stock awards issued but unvested, 315,000 restricted stock units granted but unvested, and 109,344 shares available for future grants under the 2016 Plan.

Our Employee Stock Purchase Plan (the "Stock Purchase Plan"), adopted in December 2014, permits eligible employees to purchase common stock at a discount through payroll deductions during defined six-month consecutive offering periods beginning December 1 with the exception of our first offering period which commenced on January 1, 2015 for a five month duration. The price at which the stock is purchased is equal to the lower of 85% of the fair market value of the common stock on the first day of the offering or 85% of the fair market value of our common stock on the purchase date. A total of 200,000 shares of common stock are authorized for issuance under the Stock Purchase Plan. A participant may purchase a maximum of 2,000 shares of common stock during each offering period, not to exceed \$25,000 worth of common stock on the offering date during each calendar year.

We use the Black-Scholes option pricing model, in combination with the discounted employee price, in determining the value of the Stock Purchase Plan expense to be recognized during each offering period. The following assumptions were used in the Black-Scholes option pricing model to calculate employee stock-based compensation:

Table of Contents

Stock Purchase Plan	Three months ended March 31,	
	2018	2017
Weighted average risk-free interest rate	1.45%	0.60%
Weighted average expected term (years)	0.5	0.5
Weighted average expected volatility	41.4%	74.2%
Expected dividend yield	—	—
Weighted-average grant date fair value per share	\$1.91	\$1.32

We did not issue any common stock under the Stock Purchase Plan during the three months ended March 31, 2018. At March 31, 2018 and December 31, 2017, we had an outstanding liability of \$123,000 and \$27,000, respectively, which is included in accrued compensation on the condensed consolidated balance sheets, for employee contributions to the Stock Purchase Plan for shares pending issuance at the end of the next offering period.

We recorded stock-based compensation expense as follows (in thousands):

	Three months ended March 31,	
	2018	2017
Research and development	\$501	\$409
General and administrative	1,023	832
	\$1,524	\$1,241

We had an aggregate of approximately \$9,650,000 of unrecognized stock-based compensation expense for options outstanding and the Stock Purchase Plan as of March 31, 2018 which is expected to be recognized over a weighted-average period of 2.9 years.

#### Restricted Stock Award and Restricted Stock Units

On January 23, 2017, we granted 250,000 shares of restricted stock awards to four employees. Shares will vest 25% on each one year anniversary of the grant date provided that the employee is in the employment of the Company on such vesting date. On January 22, 2018, we granted 315,000 shares of restricted stock units to four employees. Shares will vest 25% on each one year anniversary of the grant date provided that the employee is in the employment of the Company on such vesting date. The total stock-based compensation expense related to these awards and units is \$4,356,000. As of March 31, 2018, we have an aggregate of approximately \$3,752,000 unrecognized stock-based compensation expense for restricted stock awards and units outstanding which is expected to be recognized over a weighted-average period of 3.5 years.

Restricted stock activity for the quarter ended March 31, 2018 was as follows:

Restricted Stock Award	Shares	Weighted Average Grant Date Fair Value
Unvested balance at December 31, 2017	250,000	\$6.40
Granted	—	—
Vested	(62,500)	6.40
Forfeited	—	—
Unvested balance at March 31, 2018	187,500	\$6.40

Table of Contents

Restricted Stock Units	Shares	Weighted Average Grant Date Fair Value
Unvested balance at December 31, 2017	—	—
Granted	315,000	\$8.75
Vested	—	—
Forfeited	—	—
Unvested balance at March 31, 2018	315,000	\$8.75

## 6. Commitments and Contingencies

We have non-cancelable operating leases for laboratory space in Burlingame, California with several amendments to expand the facility. Commencing on June 1, 2017, the non-cancelable operating lease for the entire existing laboratory space of a total 10,755 square feet was extended for another 5 years through May 2022. In February 2017, we further amended the operating lease for laboratory space with an additional 721 square feet through May 2022. In April 2017, we renewed our headquarters office lease for 6,900 square feet of office space in Burlingame, California through November 30, 2020 and in June 2017, we amended the lease with an additional 1,190 square feet of office space through November 30, 2020. In addition, we have a non-cancelable operating lease for 3,126 square feet of office space in San Diego, California through September 2019 and three equipment leases expiring through 2020.

As of March 31, 2018, we are obligated to make minimum lease payments under non-cancelable operating leases as follows (in thousands):

Year ending December 31,	Lease Payments
2018 (remaining of year)	\$ 611
2019	810
2020	726
2021	459
2022 and after	194
Total	\$ 2,800

## 7. Net Loss Per Share

Basic and diluted net loss per share was calculated as follows (in thousands, except per share amounts):

	Three months ended March 31,	
	2018	2017
Basic and diluted net loss per share:		
Numerator:		
Net loss	\$(9,971)	\$(6,492)
Denominator:		
Weighted-average number of common shares outstanding, basic and diluted	27,986	21,516
Net loss per share, basic and diluted	\$(0.36 )	\$(0.30 )

There was no difference between the Company's net loss and the net loss attributable to common stockholders for all periods presented.

Table of Contents

Stock options to purchase 5,553,560 shares of common stock, 187,500 shares unvested restricted stock awards and 315,000 restricted stock units as of March 31, 2018, were excluded from the computation of diluted net loss per share attributable to common stockholders for the three months ended March 31, 2018, because their effect was anti-dilutive.

Stock options to purchase 4,458,279 shares of common stock and 250,000 shares unvested restricted stock awards were excluded from the computation of diluted net loss per share attributable to common stockholders for the three months ended March 31, 2017, because their effect was anti-dilutive.

8. Subsequent Events

On May 7, 2018, we entered into an At Market Issuance Sales Agreement, or the sales agreement, with B. Riley FBR, Inc., and Oppenheimer & Co. Inc. (the "Sales Agents") acting as our distribution agents, relating to the sale of our common stock. In accordance with the terms of the sales agreement, we may offer and sell shares of our common stock, \$0.0001 par value per share, having an aggregate offering price of up to \$50,000,000 from time to time through the Sales Agents. Each share of common stock is accompanied by one Series A preferred stock purchase right that trades with our common stock.

On May 4, 2018, we received notification from the U.S. Food and Drug Administration's Center for Veterinary Medicine that our new drug application for Mirataz™ (mirtazapine transdermal ointment) for the management of weight loss in cats is approved. We expect the product to be commercially available to veterinarians by the third quarter of 2018.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In this section, "KindredBio," "we," "our," "ours," "us" and the "Company" refer to Kindred Biosciences, Inc. and our wholly owned subsidiary KindredBio Equine, Inc. You should read the following discussion and analysis of our consolidated financial condition and results of operations together with our consolidated financial statements and the related notes and other financial information included elsewhere in this Quarterly Report on Form 10-Q. Some of the information contained in this discussion and analysis or set forth elsewhere in this Quarterly Report on Form 10-Q consists of forward-looking statements such as statements regarding our expectations about the trials, regulatory approval, manufacturing, distribution and commercialization of our current and future product candidates and statements regarding our anticipated revenues, expenses, margins, profits and use of cash. In this Quarterly Report on Form 10-Q, the words "anticipates," "believes," "expects," "intends," "future," "could," "estimates," "plans," "would," "should," "potential" and similar words or expressions (as well as other words or expressions referencing future events, conditions or circumstances) often identify forward-looking statements.

These forward-looking statements are based on our current expectations. These statements are not promises or guarantees, but involve known and unknown risks, uncertainties and other important factors that may cause our actual results to be materially different from any future results expressed or implied by the forward-looking statements. These risks and uncertainties include, but are not limited to, the following: our limited operating history and expectations of losses for the foreseeable future; the absence of significant revenue from our product candidates for the foreseeable future; our potential inability to obtain any necessary additional financing; our substantial dependence on the success of our lead product candidates, which may not be successfully commercialized even if they are approved for marketing; the effect of competition; our potential inability to obtain regulatory approval for our existing or future product candidates; our dependence on third parties to conduct some of our development activities; our dependence upon third-party manufacturers for supplies of our product candidates; uncertainties regarding the outcomes of trials pertaining to our product candidates; our potential failure to attract and retain senior management and key scientific personnel; uncertainty about our ability to develop a satisfactory sales organization; our significant costs of operating as a public company; our potential inability to obtain patent protection and other intellectual property protection for our product candidates; potential claims by third parties alleging our infringement of their patents and other intellectual property rights; our potential failure to comply with regulatory requirements, which are subject to change on an ongoing basis; the potential volatility of our stock price; and the significant control over our business by our principal stockholders and management.

For a further description of these risks and uncertainties and other risks and uncertainties that we face, please see the "Risk Factors" sections that are contained in our filings with the U.S. Securities and Exchange Commission (the SEC), including the "Risk Factors" section of our Annual Report on Form 10-K for the year ended December 31, 2017, which was filed with the SEC on March 1, 2018, and any subsequent updates that may be contained in the "Risk Factors" sections of this Quarterly Report on Form 10-Q and our other Quarterly Reports on Form 10-Q filed with the SEC. As a result of the risks and uncertainties described above and in our filings with the SEC, actual results may differ materially from those indicated by the forward-looking statements made in this Quarterly Report on Form 10-Q. Forward-looking statements contained in this Quarterly Report on Form 10-Q speak only as of the date of this report and we undertake no obligation to update or revise these statements, except as may be required by law.

## Table of Contents

### Overview

We are a pre-commercialization biopharmaceutical company focused on saving and improving the lives of pets. Our mission is to bring to our pets the same kinds of safe and effective medicines that our human family members enjoy. Our core strategy is to identify compounds and targets that have already demonstrated safety and efficacy in humans and to develop therapeutics based on these validated compounds and targets for pets, primarily dogs, cats and horses. We believe this approach will lead to shorter development times and higher approval rates than pursuing new, non-validated compounds and targets. Our current portfolio includes over 20 product candidates in development consisting of both small molecule pharmaceuticals and biologics.

We have submitted all major technical sections of the New Animal Drug Application, or NADA, to the Food and Drug Administration, or FDA, for two product candidates. In addition, we have multiple other product candidates, including several biologics, in various stages of development. We believe there are significant unmet medical needs for pets, and that the pet therapeutics segment of the animal health industry is likely to grow substantially as new therapeutics are identified, developed and marketed specifically for pets.

On May 4, KindredBio received approval of Mirataz™ (mirtazapine transdermal ointment).

Mirataz is the first and only transdermal medication specifically developed and Food and Drug Administration (FDA)-approved for the management of weight loss in cats. Weight loss is a serious and potentially fatal condition that represents the leading cause of visits to the veterinarian for cats. Mirataz, which is formulated with our proprietary Accusorb™ technology, is applied topically to the cat's inner ear (pinna) once a day, providing a more attractive application route compared to oral administration. The product is classified as a weight gain drug and can be used in cats with various underlying diseases associated with unintended weight loss.

The European Marketing Agency, or EMA, has accepted our European marketing authorization application for the review of Mirataz with the official acceptance date of December 21, 2017.

In November 2015, we completed a pivotal trial of Zimeta™ (dipyrone injection), previously known as KIND-012, for the control of pyrexia (fever) in horses with positive topline results. We submitted all major technical sections of the NADA for Zimeta to the FDA before the end of the first quarter of 2016. We have received the technical section complete letters for effectiveness and safety from the FDA and the agency does not have any additional questions or requests for KindredBio regarding the Chemistry, Manufacturing and Controls, or CMC, technical section. FDA approval is pending a pre-approval inspection, or PAI, at the contract manufacturer of Zimeta scheduled by the FDA in July 2018, and an acceptable resolution by the contract manufacturer of the active pharmaceutical ingredient (API) dipyrone of findings identified during an inspection in April 2018. We believe that the findings at the API manufacturer are minor and addressable. Regulatory approval is subject to the typical risks inherent in such a process. Preparations for the commercial launch remain on track.

We have also completed the pivotal field effectiveness study of Zimeta Oral™ (dipyrone oral gel) for the treatment of fever in horses and announced positive topline results in December 2017. This study was a multicenter, randomized, blinded, placebo-controlled pivotal study that enrolled 139 horses to assess the effectiveness of Zimeta Oral. We have completed the in-life portion of the Target Animal Safety Study and the drug was found to be well tolerated. We are in discussion with the FDA regarding the data required for submission and is in the process of transferring the product to the commercial manufacturer. The oral gel form of dipyrone is expected to be an additional valuable tool for equine veterinarians to provide horse owners with an easy-to-administer fever reducing agent for the horse.

We initiated or are in the process of initiating pilot field effectiveness studies for several molecules for atopic dermatitis, including fully caninized anti-IL31 antibody, fully-caninized anti-IL17 antibody, and canine anti-IL4/IL13 SINK molecule. We are also developing KIND-014 for the treatment of equine gastric ulcers in horses, KIND-015 for

the management of clinical signs associated with equine metabolic syndrome and epoCat™ (feline recombinant erythropoietin) for the control of non-regenerative anemia in cats. We expect to continue pilot field efficacy studies for the above product candidates in 2018. Our pilot field efficacy study of KIND-011, an anti-TNF monoclonal antibody targeting sick or septic foals has been completed with positive results and we intend to continue field studies during the

## Table of Contents

2019 foaling season. In addition, we are also developing multiple other products, including interleukin antibodies and canine checkpoint inhibitors. In all, we have over 20 programs for various indications for dogs, cats, and horses.

In addition to the product candidates discussed above, we are in the early stages of development for multiple additional indications, including several biologics, with the potential to attain approval for one or more products annually for several years. We plan to commercialize our products in the United States through a direct sales force complemented by selected distributor relationships, and in the EU through distributors and other third parties. Because we seek to identify product candidates that are not protected by third-party patents, we typically do not need to obtain licenses or make any upfront, milestone or royalty payments in connection with our product candidates.

Our Good Manufacturing Practice, or GMP, biologics manufacturing plant in Burlingame, California, is fully commissioned and has proceeded to GMP manufacturing of epoCat. In addition, we have started construction on biologics manufacturing lines in the Elwood, Kansas facility we acquired last year. The facility includes approximately 180,000 square feet with clean rooms, utility, equipment and related quality documentation suitable for small molecule and biologics manufacturing. Construction to support our initial production lines is expected to be completed by mid-2019.

We are a pre-commercialization stage company with one product just recently approved for marketing and sale, and we have not generated any revenue to-date. We have incurred significant net losses since our inception. We incurred cumulative net losses of \$121,951,000 through March 31, 2018. These losses have resulted principally from costs incurred in connection with investigating and developing our product candidates, research and development activities and general and administrative costs associated with our operations.

Historically, our funding has been a combination of private and public offerings, including our initial public offering in December 2013 that provided us with net proceeds of \$54,871,000 and a follow-on public offering in April 2014 that provided us with net proceeds of \$58,065,000. In December 2016, we entered into an At Market Issuance, or ATM, Sales Agreement with FBR Capital Markets & Co., or FBR, for the sale of our common stock from time to time with an aggregate offering price of up to \$30,000,000. During the six months ended June 30, 2017, we completed the sale of 4,501,985 shares of common stock under the ATM that provided us with net proceeds of \$28,962,000, after deducting commissions and offering costs. In July 2017, we completed an underwritten public offering of 3,000,000 shares of common stock and in August 2017, we completed the closing of the exercise of the underwriter's option to purchase an additional 314,000 shares of common stock, both at an offering price of \$7.50 per share for total gross proceeds of \$24,855,000. Net proceeds, after deducting underwriting commission and offering costs, were approximately \$23,198,000 (See Note 1). As of March 31, 2018, we had cash, cash equivalents and investments of \$70,824,000.

For the foreseeable future, we expect to continue to incur losses, which will increase significantly from historical levels as we expand our product development activities, seek regulatory approvals for our product candidates and begin to commercialize them if they are approved by the Center for Veterinary Medicine branch, or CVM, of the FDA, the U.S. Department of Agriculture, or USDA, or the European Medicines Agency, or EMA. If we are required to further fund our operations, we expect to do so through public or private equity offerings, debt financings, corporate collaborations and licensing arrangements. We cannot assure you that such funds will be available on terms favorable to us, if at all. Arrangements with collaborators or others may require us to relinquish rights to certain of our technologies or product candidates. In addition, we may never successfully complete development of, obtain adequate patent protection for, obtain necessary regulatory approval, or achieve commercial viability for any other product candidates besides Mirataz. If we are not able to raise additional capital on terms acceptable to us, or at all, as and when needed, we may be required to curtail our operations, and we may be unable to continue as a going concern.

## Critical Accounting Policies and Significant Judgments and Estimates

Our management's discussion and analysis of financial condition and results of operations is based on our unaudited condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States, or U.S. GAAP. The preparation of our unaudited condensed consolidated financial statements and related disclosures requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities, and revenue, costs and expenses and related disclosures during the reporting periods. On an ongoing basis, we evaluate our estimates and judgments, including those described below. We base our

Table of Contents

estimates on historical experience and on various other factors that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

There have been no significant changes to our critical accounting policies since the beginning of our fiscal year. Our critical accounting policies are described in the “Management’s Discussion and Analysis of Financial Condition and Results of Operations” section of our Annual Report on Form 10-K for the year ended December 31, 2017, which was filed with the SEC on March 1, 2018.

**Results of Operations**

The following table summarizes the results of our operations for the periods indicated (in thousands):

	Three months ended March 31,	
	2018	2017
Operating expenses:		
Research and development	\$5,346	\$3,780
General and administrative	4,902	2,843
Total operating expenses	10,248	6,623
Loss from operations	(10,248)	(6,623)
Interest and other income, net	277	131
Net loss	\$(9,971)	\$(6,492)

**Revenue**

We have not generated any revenue since our inception. If our development efforts result in clinical success and regulatory approval or collaboration agreements with third parties for any of our product candidates, we may generate revenue from those product candidates. We recently received FDA approval of Mirataz and are preparing for the product launch with the expectation of product being shipped within the next two to three months. In addition, we currently have one product candidate under regulatory review and anticipate FDA approval in the next few months.

**Research and Development Expense**

All costs of research and development are expensed in the period incurred. Research and development costs consist primarily of salaries and related expenses for personnel, stock-based compensation expense, fees paid to consultants, outside service providers, professional services, travel costs and materials used in clinical trials and research and development. We are currently pursuing multiple product candidates for over a dozen indications. We typically use our employee and infrastructure resources across multiple development programs.

Table of Contents

Research and development expense was as follows for the periods indicated (in thousands, except for percentages):

	Three months ended March 31,			%
	2018	2017	Change	
Payroll and related	\$2,184	\$1,454	50%	
Consulting	351	321	9%	
Field trial costs, including materials	662	890	(26)%	
Biologics development and supplies	937	256	266%	
Stock-based compensation	501	409	22%	
Other	711	450	58%	
	\$5,346	\$3,780	41%	

During the three months ended March 31, 2018, research and development expense related primarily to advancing the development of Zimeta Oral, KIND-014, canine atopic dermatitis and epoCat . We also increased our spending in biologics as we continue to advance additional potential candidates in our biologics program. In addition, we have increased the headcount of our in-house team to focus on the GMP manufacturing process for our potential biologic candidates.

Research and development expenses for the three months ended March 31, 2018, increased by 41% to \$5,346,000 compared with \$3,780,000 for the same period in 2017. The increase was mainly due to \$730,000 increased payroll and related costs due to increase in headcount and \$681,000 in biologics development costs, including lab supplies, as we advance our biologics programs. In addition, the stock-based compensation costs increased by \$92,000 over the same period in 2017. The increase in depreciation, rent and other facility costs were offset by lower CMC expenses. Outsourced research and development expenses related to Zimeta Oral and IV, KIND-014, canine atopic dermatitis, epoCat and other product development programs for the three months ended March 31, 2018 were \$313,000, \$131,000, \$94,000, \$35,000 and \$312,000, respectively. Outsourced research and development expense consists primarily of costs related to CMC, clinical trial costs and consulting.

We expect research and development expense to increase for the foreseeable future as we increase our headcount, commence pilot studies and further develop our small molecule compounds and biologics development programs. Due to the inherently unpredictable nature of our development, we cannot reasonably estimate or predict the nature, specific timing or estimated costs of the efforts that will be necessary to complete the development of our product candidates.

#### General and Administrative Expense

General and administrative expense was as follows for the periods indicated (in thousands, except for percentages):

	Three months ended March 31,			%
	2018	2017	Change	
Payroll and related	\$1,612	\$836	93%	
Consulting, legal fees and professional services	532	391	36%	
Stock-based compensation	1,023	832	23%	
Corporate and marketing expenses	879	384	129%	
Other	856	400	114%	
	\$4,902	\$2,843	72%	

## Table of Contents

General and administrative expenses for the three months ended March 31, 2018 increased by 72% to \$4,902,000, when compared to the same period in 2017. The increase was due to higher payroll expenses due to headcount increases as we begin to expand our commercial organization, higher stock-based compensation expense as well as legal and consulting fees, and marketing and travel expenses related to launch preparation of the Mirataz and Zimeta. We expect general and administrative expense to increase going forward as we prepare for the commercial launches of Mirataz and Zimeta.

### Interest and Other Income, Net

The increase of approximately \$146,000 in interest income for the three months in 2018 compared to 2017 is due to better yields from higher interest rates.

### Income Taxes

We have historically incurred operating losses and maintain a full valuation allowance against our net deferred tax assets. Our management has evaluated the factors bearing upon the realizability of our deferred tax assets, which are comprised principally of net operating loss carryforwards and concluded that, due to the uncertainty of realizing any tax benefits as of March 31, 2018, a valuation allowance was necessary to fully offset our deferred tax assets.

### Liquidity and Capital Resources

We have incurred losses and negative cash flows from operations and have not generated any revenue since our inception in September 2012 through March 31, 2018. As of March 31, 2018, we had an accumulated deficit of \$121,951,000. In December 2013, we raised approximately \$66.0 million, net of offering costs, primarily in connection with our initial public offering and through the sale of preferred stock (subsequently converted to common stock at the time of our initial public offering). In April 2014, we completed a follow-on public offering of common stock, resulting in net proceeds of approximately \$58.1 million. In the first six months of 2017, we raised approximately \$28,962,000 in net proceeds from sale of common stock under the ATM sales agreement, after deducting commission and offering costs. On July 12, 2017, we completed an underwritten public offering of 3,000,000 shares of common stock at an offering price of \$7.50 per share and on August 11, 2017, we completed the closing of the exercise of the underwriter's option to purchase additional 314,000 shares. After giving effect to the exercise of the over-allotment option, the total number of shares sold by us in the public offering was 3,314,000 shares with gross proceeds of \$24,855,000. Net proceeds, after deducting underwriting commission and offering costs, were approximately \$23,198,000 (See Note 1). As of March 31, 2018, we had cash, cash equivalents and investments of \$70,824,000. We believe that our cash, cash equivalents and investments balances as of March 31, 2018, are sufficient to fund our planned operations through at least the next 18 months.

### Cash Flows

The following table summarizes our cash flows for the periods set forth below:

	Three months ended	
	March 31,	
	2018	2017
	(In thousands)	
Net cash used in operating activities	\$(11,222)	\$(5,865 )
Net cash provided by investing activities	\$20,987	\$2,422
Net cash (used in) provided by financing activities	\$(82 )	\$16,622

## Table of Contents

### Net cash used in operating activities

During the three months ended March 31, 2018, net cash used in operating activities was \$11,222,000. The net loss of \$9,971,000 for the three months ended March 31, 2018 included non-cash charges of \$1,524,000 for stock-based compensation expense, and \$144,000 for depreciation and amortization, offset by \$29,000 for the amortization of premium on marketable securities. Net cash used in operating activities was further impacted by changes in operating assets and liabilities of \$2,890,000.

During the three months ended March 31, 2017, net cash used in operating activities was \$5,865,000. Net cash used in operating activities resulted primarily from our net loss of \$6,492,000, partially offset by non-cash, stock-based compensation of \$1,241,000, depreciation and amortization of \$46,000, and amortization of premium on marketable securities of \$88,000. Net cash used was further impacted by changes in operating assets and liabilities of \$748,000.

### Net cash provided by investing activities

During the three months ended March 31, 2018, net cash provided by investing activities was \$20,987,000, which resulted from proceeds from maturities of marketable securities of \$25,875,000 and sales of investments of \$800,000, offset by \$5,279,000 related to the purchase of marketable securities and \$409,000 related to purchases of equipment.

During the three months ended March 31, 2017, net cash provided by investing activities was \$2,422,000, primarily due to proceeds from maturities of marketable securities of \$17,510,000 and sale of investments of \$1,600,000, offset by the purchase of marketable securities of \$16,356,000 and purchases of property and equipment of \$332,000.

### Net cash (used in) provided by financing activities

During the three months ended March 31, 2018, net cash used in financing activities was \$82,000. Proceeds of \$165,000 from exercise of stock options was offset by payment of \$247,000 related to restricted stock awards tax liability on net settlement.

During the three months ended March 31, 2017, net cash provided by financing activities of \$16,622,000 was related to net proceeds of \$16,546,000 from the sale of common stock under our ATM sales agreement and \$76,000 proceeds from the purchase of common stock through exercise of stock options.

### Future Funding Requirements

We anticipate that we will continue to incur losses for the next several years due to expenses relating to:

- pivotal trials of our product candidates;
- toxicology (target animal safety) studies for our product candidates;
- small molecule manufacturing;
- establishment of biologics manufacturing capability in Kansas; and
- commercialization of one or more of our product candidates.

We believe our existing cash, cash equivalents and investments will be sufficient to fund our operating plan through at least the next 18 months. However, our operating plan may change as a result of many factors currently unknown to us, and we may need to seek additional funds sooner than planned, through public or private equity or debt financings or other sources, such as strategic collaborations. Such financing may result in dilution to stockholders, imposition of debt covenants and repayment obligations or other restrictions that may affect our business. In addition, we may seek additional capital due to favorable market conditions or strategic considerations even if we believe we have sufficient funds for our current or future operating plans.

Our future capital requirements depend on many factors, including, but not limited to:

- the scope, progress, results and costs of researching and developing our current or future product candidates;

## Table of Contents

the timing of, and the costs involved in, obtaining regulatory approvals for any of our current or future product candidates;

the number and characteristics of the product candidates we pursue;

the cost of manufacturing our current and future product candidates and any products we successfully commercialize, including the cost of building internal biologics manufacturing capacity;

the cost of commercialization activities if any of our current or future product candidates are approved for sale, including marketing, sales and distribution costs;

the expenses needed to attract and retain skilled personnel;

the costs associated with being a public company;

our ability to establish and maintain strategic collaborations, licensing or other arrangements and the financial terms of such agreements; and

the costs involved in preparing, filing, prosecuting, maintaining, defending and enforcing possible patent claims, including litigation costs and the outcome of any such litigation.

Since inception, we have not engaged in the use of any off-balance sheet arrangements, such as structured finance entities, special purpose entities or variable interest entities.

### Contractual Obligations

We have non-cancelable operating leases for laboratory space in Burlingame, California with several amendments to expand the facility. Commencing on June 1, 2017, the non-cancelable operating lease for the entire existing laboratory space of a total 10,755 square feet was extended for another 5 years through May 2022. In February 2017, we further amended the operating lease for laboratory space with an additional 721 square feet through May 2022. In April 2017, we renewed our headquarters office lease for 6,900 square feet of office space in Burlingame, California through November 30, 2020 and in June 2017, we amended the lease with an additional 1,190 square feet of office space through November 30, 2020. In addition, we have a non-cancelable operating lease for 3,126 square feet of office space in San Diego, California through September 2019 and three equipment leases expiring through 2020. Under the operating leases we are obligated to make minimum lease payments as of March 31, 2018 totaling \$2,800,000 through May 2022, the timing of which is described in more detail in the notes to the condensed consolidated financial statements.

### Off-Balance Sheet Arrangements

As of March 31, 2018, we did not have any material off-balance sheet arrangements as defined in Item 303(a)(4)(ii) of SEC Regulation S-K.

### Recently Issued Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2014-09, "Revenue from Contracts with Customers". This new standard will replace most of the existing revenue recognition guidance in U.S. GAAP when it becomes effective and permits the use of either the retrospective or cumulative effect transition method. The new standard, as amended, becomes effective in the first quarter of fiscal year 2018, but allows the adoption of the standard one year earlier if we so choose. The analysis identifying areas that will be impacted by the new guidance is completed. Additionally, we continue to monitor modifications, clarifications, and interpretations issued by the FASB that may impact its assessment. We do not currently have and have never had any contracts that are within the scope of ASC 606, "Revenue from Contracts with Customers" or its predecessor guidance, ASC 605, "Revenue Recognition". We have adopted the new guidance and it did not have a material impact on our consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, "Leases (Topic 842)", requiring organizations that lease assets—referred to as “lessees”—to recognize on the consolidated balance sheet the assets and liabilities for the rights and obligations created by those leases. Under the new guidance, a lessee will be required to recognize assets and liabilities for leases with lease terms of more than 12 months. The ASU on leases will take effect for public companies for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. We are currently

evaluating the new guidance and have not determined the impact this standard may have on our financial statements.

Table of Contents

We do not believe there are any other recently issued standards not yet effective that will have a material impact on our financial statements when the standards become effective.

Table of Contents

**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

The primary objective of our investment activities is to preserve capital. We do not utilize hedging contracts or similar instruments.

We are exposed to certain market risks relating primarily to (1) interest rate risk on our cash and cash equivalents, (2) market price risk on our investments, and (3) risks relating to the financial viability of the institutions which hold our capital and through which we have invested our funds. We manage such risks by investing in short-term, liquid, highly-rated instruments. As of March 31, 2018, our cash equivalents and investments are invested in money market funds, U.S. treasury bills, U.S. federal agency notes, corporate notes, commercial paper and U.S treasury bonds. We do not believe we have any material exposure to interest rate risk due to the extremely low interest rate environment, the short duration of the securities we hold and our ability to hold our investments to maturity if necessary. Declines in interest rates would reduce investment income, but would not have a material effect on our financial condition or results of operations.

We do not currently have exposure to foreign currency risk.

**ITEM 4. CONTROLS AND PROCEDURES**

**Disclosure Controls and Procedures**

As of the end of the period covered by this quarterly report on Form 10-Q, our management, with the participation of our Chief Executive Officer and Chief Financial Officer (the “Certifying Officers”), evaluated the effectiveness of our disclosure controls and procedures. Disclosure controls and procedures are controls and procedures designed to reasonably assure that information required to be disclosed in our reports filed under the Securities Exchange Act of 1934 (the “Exchange Act”), such as this report, is recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms. Disclosure controls and procedures are also designed to reasonably assure that such information is accumulated and communicated to our management, including the Certifying Officers, as appropriate to allow timely decisions regarding required disclosure. Based on these evaluations, the Certifying Officers have concluded, that, as of the end of the period covered by this report:

- (a) our disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by us in the reports we file or submit under the Exchange Act was recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms; and
- (b) our disclosure controls and procedures were effective to provide reasonable assurance that material information required to be disclosed by us in the reports we file or submit under the Exchange Act was accumulated and communicated to our management, including the Certifying Officers, as appropriate to allow timely decisions regarding required disclosure.

**Changes in Internal Control over Financial Reporting**

There has not been any change in our internal control over financial reporting that occurred during the period ended March 31, 2018 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
