TABLE OF CONTENTS

Managed Distribution Policy

The Fund was granted exemptive relief by the U.S. Securities and Exchange Commission (the “Order”), which under the Investment Company Act of 1940, as amended (the “1940 Act”), permits the Fund to include realized long-term capital gains as a part of its regular distributions to Common Shareholders more frequently than once per taxable year (“Managed Distribution Policy”). Pursuant to the Order, the Fund’s Board of Trustee’s (the “Board”) approved the Managed Distribution Policy and the Fund adopted the policy which allows the Fund to make periodic distributions of long-term capital gains.

Under the Managed Distribution Policy, the Fund makes quarterly distributions of an amount equal to \$0.405 per share. You should not draw any conclusions about the Fund’s investment performance from the amount of this distribution or from the terms of the Fund’s Plan.

The Managed Distribution Policy will be subject to periodic review by the Fund’s Board and the Board may amend or terminate the Managed Distribution Policy at any time without prior notice to the Fund’s shareholders; any such change or termination may have an adverse effect on the market price of Fund’s shares.

The Fund may distribute more than its net investment income and net realized capital gains; therefore, a portion of your distribution may include a return of capital. A return of capital may occur for example, when some or all of the money that you invested in the Fund is paid back to you. A return of capital distribution does not necessarily reflect the Fund’s investment performance and should not be confused with ‘yield’ or ‘income.’ With each distribution, the Fund will issue a notice to shareholders and a press release containing information about the amounts and sources of distribution and other related information. The amounts and sources of the distributions contained in a notice and press release are only estimates and are not provided for tax reporting purposes. The actual amounts and sources of the amounts for tax reporting purposes will depend upon the Fund’s investment experience during the remainder of its fiscal year and may be subject to changes based on tax regulations. The Fund will send you a Form 1099-DIV for the calendar year that will tell you how to report these distributions for federal income tax purposes.

PROXY VOTING INFORMATION

A description of the policies and procedures that the Fund uses to determine how to vote proxies related to portfolio securities is available (1) without charge, upon request, by calling Shareholder Services toll-free at (800) 992-0180; (2) on the Fund's website at www.voyainvestments.com and (3) on the U.S. Securities and Exchange Commission's ("SEC's") website at www.sec.gov. Information regarding how the Fund voted proxies related to portfolio securities during the most recent 12-month period ended June 30 is available without charge on the Fund's website at www.voyainvestments.com and on the SEC's website at www.sec.gov.

QUARTERLY PORTFOLIO HOLDINGS

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. This report contains a summary portfolio of investments for the Fund. The Fund's Forms N-Q are available on the SEC's website at www.sec.gov. The Fund's Forms N-Q may be reviewed and copied at the SEC's Public Reference Room in Washington, DC, and information on the operation of the Public Reference Room may be obtained by calling (800) SEC-0330. The Fund's Forms N-Q, as well as a complete portfolio of investments, are available without charge upon request from the Fund by calling Shareholder Services toll-free at (800) 992-0180.

TABLE OF CONTENTS
PRESIDENT'S LETTER

Dear Shareholder,

Voya Infrastructure, Industrials and Materials Fund (the "Fund") is a diversified, closed-end management investment company whose shares are traded on the New York Stock Exchange under the symbol "IDE." The Fund's investment objective is total return through a combination of current income, capital gains and capital appreciation.

The Fund seeks to achieve its investment objective by investing in companies that own and/or operate infrastructure facilities in the infrastructure sector, and in a broad range of companies, principally in the industrials and materials sector that Voya Investment Management Co. LLC (the "Sub-Adviser") believes will benefit from the building, renovation, expansion and utilization of infrastructure. Under normal market conditions the Fund will also seek to secure gains and enhance the stability of returns over a market cycle by writing (selling) call options on selected indices and/or exchange-traded funds.

For the period ended August 31, 2015, the Fund made quarterly distributions totaling \$0.81 per share, which were characterized as \$0.07 per share of net realized gain, \$0.55 per share return of capital and \$0.19 per share of net investment income.*

Based on net asset value ("NAV"), the Fund provided a total return of -8.39% for the period ended August 31, 2015.(1)(2) This NAV return reflects a decrease in the Fund's NAV from \$17.19 on February 28, 2015 to \$14.92 on August 31, 2015, after taking into account the quarterly distributions noted above. Based on its share price, the Fund provided a total return of -15.99% for the period ended August 31, 2015.(2)(3) This share price return reflects a decrease in the Fund's share price from \$15.73 on February 28, 2015 to \$12.52 on August 31, 2015, after taking into account the quarterly distributions noted above.

The global equity markets have witnessed a challenging and turbulent period. Please read the Market Perspective and Portfolio Managers' Report for more information on the market and the Fund's performance.

At Voya our mission is to help you grow and protect your wealth, by offering you and your financial advisor a range of global investment solutions. We invite you to visit our website at www.voyainvestments.com. Here you will find current information on our investment products and services, including our open- and closed-end funds and our retirement portfolios. You will see that Voya offers a broad range of equity, fixed income and multi-asset strategies that aim to fulfill a variety of investor needs.

Thank you for trusting Voya with your investment assets. We look forward to serving you in the months and years ahead.

Sincerely,

Shaun P. Mathews
President and Chief Executive Officer
Voya Family of Funds
October 1, 2015

The views expressed in the President's Letter reflect those of the President as of the date of the letter. Any such views are subject to change at any time based upon market or other conditions and the Voya mutual funds disclaim any responsibility to update such views. These views may not be relied on as investment advice and because investment decisions for a Voya mutual fund are based on numerous factors, may not be relied on as an indication of investment intent on behalf of any Voya mutual fund. Reference to specific company securities should not be construed as recommendations or investment advice. International investing poses special risks including currency fluctuation, economic and political risks not found in investments that are solely domestic.

More complete information about the Fund, including the Fund's daily New York Stock Exchange closing prices and net asset values per share, is available at www.voyainvestments.com or by calling the Fund's Shareholder Service Department at (800) 992-0180. To obtain a prospectus for any Voya mutual fund, please call your financial advisor or a fund's Shareholder Service Department at (800) 992-0180 or log on to www.voyainvestments.com. A prospectus should be read carefully before investing. Consider a fund's investment objectives, risks, charges and expenses carefully before investing. A prospectus contains this information and other information about a fund. Check with your financial advisor to determine which Voya mutual funds are available for sale within their firm. Not all funds are available for sale at all firms.

*

The final tax composition of dividends and distributions will not be determined until after the Fund's tax year-end.

(1)

Total investment return at net asset value has been calculated assuming a purchase at net asset value at the beginning of each period and a sale at net asset value at the end of each period and assumes reinvestment of dividends, capital gain distributions, and return of capital distributions/ allocations, if any, in accordance with the provisions of the Fund's dividend reinvestment plan.

(2)

Total returns shown include, if applicable, the effect of fee waivers and/or expense reimbursements by the investment adviser. Had all fees and expenses been considered, the total returns would have been lower.

(3)

Total investment return at market value measures the change in the market value of your investment assuming reinvestment of dividends, capital gain distributions, and return of capital distributions/allocations, if any, in accordance with the provisions of the Fund's dividend reinvestment plan.

TABLE OF CONTENTS

Market Perspective: Six Months Ended August 31, 2015

For most of the first half of our new fiscal year, global equities, in the form of the MSCI World IndexSM (the “Index”) measured in local currencies, including net reinvested dividends, traded within 3% either side of the starting level. But in August an unexpected announcement from China re-awakened other concerns, which intensified and drove the Index down 5.39% for the six-month period. (The Index returned -6.14% for the six-months ended August 31, 2015, measured in U.S. dollars.)

U.S. economic data started off mixed, but were improving by the end of the period. Employment was a source of strength after a dip in March. By August, the three-month average for jobs created exceeded 235,000 and the unemployment rate was down to 5.3%. Reservations remained however, about the low labor force participation rate and sluggish wage growth. Gross domestic product (“GDP”) edged up 0.6% annualized in the first quarter of 2015, held back by the effects of another harsh winter, but rebounded to 3.7% in the second quarter. Industrial production and factory orders seemed to be in a downward drift before picking up in August, while retail sales were still not showing much acceleration despite lower gasoline prices.

Superimposed on this was the prospect of rising U.S. interest rates. The U.S. Federal Reserve Board’s latest pronouncements suggested the time for an increase was approaching, while stressing that the process would be data driven. But it had not increased rates for nine years and many feared that it would feel pressed to act before the economy was really ready.

Internationally, the European Central Bank at last implemented a program of quantitative easing in March. Before long the economic data started to look a little better: the unemployment rate ticked down to 11.1%, prices stopped falling and GDP rose 0.7% in the first half of 2015. However investors’ attention turned to Greece, whose new government sought to ease the terms of its €240 billion bailout and roll back reforms. After months of wrangling the uncompromising Greek Prime Minister Tsipras walked away from his creditors’ final offer. But two weeks later, with Greece facing ejection from the euro zone and its banks shuttered, he acceded to even stricter terms than he rejected. Annual GDP growth in China decelerated to 7.0% in the first and second quarters of 2015, the slowest in six years. But to many commentators these nice round numbers were suspiciously close to government targets and the real situation was much weaker. Global nervousness intensified as the Shanghai Stock Exchange Composite Index rose 64% in 2015 to June 12, fueled by retail savings and margin debt, only to plunge 25% in two months despite government intervention. On August 11 global markets were shaken when China announced a 2% devaluation of the yuan, whose value would become more market driven. This was taken as a signal that the Chinese economy, the largest single contributor to global growth in recent years, was indeed weaker than had previously been admitted. It also threatened a round of competitive currency devaluations from other less developed economies, already suffering from China’s fading demand for their raw materials. By the end of August the Shanghai Stock Exchange Composite had lost all of its gains for 2015 and had taken the world’s equities and commodities markets with it.

In U.S. fixed income markets, the Barclays U.S. Aggregate Bond Index (“Barclays Aggregate”) lost 0.68% in the first half of the fiscal year, while the Barclays U.S. Treasury Bond sub-index slipped 0.09%. Indices of riskier classes fared worse. The Barclays U.S. Corporate Investment Grade Bond sub-index fell 2.78%; the Barclays High Yield Bond — 2% Issuer Constrained Composite Index (not a part of the Barclays Aggregate) fell 2.85%. Reflecting another kind of risk, the Barclays Global Inflation Linked U.S. TIPS Index lost 2.08% as inflationary expectations receded.

U.S. equities, represented by the S&P 500[®] Index including dividends, dropped 5.32% in the six months through August. Excluding dividends, the index fell in the second quarter of 2015, ending a streak of nine positive quarters, while August represented the worst month since May 2012. The Consumer discretionary sector did best over the six months, edging down 0.53%. The worst performing sectors were understandably energy and materials, slumping an almost identical 14.84% and 14.95% respectively. S&P 500[®] earnings per share in the second quarter of 2015, despite continuing high levels of share buybacks, were set to record their first year-over-year decline since the third quarter of 2012, dragged down by the energy sector.

In currencies, the dollar was little changed against the other majors over the half-year, in fairly trendless trading after strong dollar gains in the previous six months. The dollar eased 0.12% against the euro, gained 0.58% on the pound, and added 1.34% against the yen. After the Chinese currency devaluation, the dollar gained 2.73% against the yuan to the end of August.

Edgar Filing: Voya Infrastructure, Industrials & Materials Fund - Form N-CSRS

In international markets, the MSCI Japan® Index added 0.41%, despite a sharp fall in August. Exporters benefited from the lower yen and all sectors from the Government Pension Investment Fund's rebalancing into stocks. The MSCI Europe ex UK® Index fell 4.69%, nearly twice as much in August alone. The sub-index had set a new record in early April after the introduction of quantitative easing, the declining euro that went with it and some signs of improving data. The MSCI UK® Index slumped 8.25%. While the UK index suffered from a triple weighting in energy compared to the rest of Europe, it is dominated by multinationals and its returns are often driven by issues affecting a few of them, such as, in the six months through August, Glencore in materials, Royal Dutch Shell in energy and Standard Chartered in banks.

Past performance does not guarantee future results. The performance quoted represents past performance. Investment return and principal value of an investment will fluctuate, and shares, when redeemed, may be worth more or less than their original cost. The Fund's performance is subject to change since the period's end and may be lower or higher than the performance data shown. Please call (800) 992-0180 or log on to www.voyainvestments.com to obtain performance data current to the most recent month end.

Market Perspective reflects the views of Voya Investment Management's Chief Investment Risk Officer only through the end of the period, and is subject to change based on market and other conditions.

TABLE OF CONTENTS

Benchmark Descriptions

Index	Description
Barclays Global Inflation Linked U.S. TIPS Index	The index measures the performance of the US Treasury Inflation Protected Securities (TIPS) market.
Barclays High Yield Bond — 2% Issuer Constrained Composite Index	An unmanaged index that includes all fixed-income securities having a maximum quality rating of Ba1, a minimum amount outstanding of \$150 million, and at least one year to maturity.
Barclays U.S. Aggregate Bond Index	An unmanaged index of publicly issued investment grade U.S. Government, mortgage-backed, asset-backed and corporate debt securities.
Barclays U.S. Corporate Investment Grade Bond Index	An unmanaged index consisting of publicly issued, fixed rate, nonconvertible, investment grade debt securities.
Barclays U.S. Treasury Bond Index	A market capitalization-weighted index that measures the performance of public obligations of the U.S. Treasury that have a remaining maturity of one year or more.
MSCI All Country World Index SM	A free float-adjusted market capitalization index that is designed to measure equity market performance in the global developed and emerging markets.
MSCI Europe ex UK [®] Index	A free float-adjusted market capitalization index that is designed to measure developed market equity performance in Europe, excluding the UK.
MSCI Japan [®] Index	A free float-adjusted market capitalization index that is designed to measure developed market equity performance in Japan.
MSCI UK [®] Index	A free float-adjusted market capitalization index that is designed to measure developed market equity performance in the UK.
MSCI World Index SM	An unmanaged index that measures the performance of over 1,400 securities listed on exchanges in the U.S., Europe, Canada, Australia, New Zealand and the Far East.
S&P 500 [®] Index	An unmanaged index that measures the performance of securities of approximately 500 large-capitalization companies whose securities are traded on major U.S. stock markets.
The Shanghai Stock Exchange Composite Index	A capitalization-weighted index. The index tracks the daily price performance of all A-shares and B-shares listed on the Shanghai Stock Exchange. The index was developed on December 19, 1990 with a base value of 100.

* Includes short-term investments.

^

Includes 8 countries, which each represents 1.0% – 1.9% of net assets.

Portfolio holdings are subject to change daily.

Voya Infrastructure, Industrials and Materials Fund (the “Fund”) seeks total return through a combination of current income, capital gains and capital appreciation.

The Fund seeks to achieve its investment objective by investing in companies that own and/or operate infrastructure facilities in the infrastructure sector, and in a broad range of companies, principally in the industrials and materials sectors, that the Sub-Adviser believes will benefit from the building, renovation, expansion and utilization of infrastructure.

Portfolio Management: The Fund is managed by Martin Jansen, Brian Madonick, Joseph Vultaggio, Jody Hrazanek and Paul Zemsky, Portfolio Managers, Voya Investment Management Co. LLC — the Sub-Adviser.*

Equity Portfolio Construction: Under normal market conditions, the Fund will seek to achieve its investment objective by investing at least 80% of its managed assets in the equity securities of, or derivatives having economic characteristics similar to the equity securities of, issuers in three broad market sectors — infrastructure, industrials and materials.

The Sub-Adviser seeks to construct a diversified equity portfolio of 60 to 100 equity securities, with a focus on companies that will potentially benefit from increased government and private spending in six areas: power, construction, materials, food and water, communications and transportation.

The Sub-Adviser has constructed a broad universe of approximately 1,500 global companies that operate in industries which are related to its six investment areas. The Sub-Adviser will seek to identify, through bottom-up fundamental research, companies that it believes to be undervalued relative to their business fundamentals and outlook, and whose revenues or growth in revenues are driven by infrastructure spending.

Top Ten Holdings
as of August 31, 2015*
(as a percentage of net assets)

General Electric Co.	3.5%
Siemens AG	2.7%
General Dynamics Corp.	2.4%
Honeywell International, Inc.	2.4%
Lockheed Martin Corp.	2.3%
United Technologies Corp.	2.3%
Union Pacific Corp.	2.3%
Dow Chemical Co.	2.0%
BHP Billiton Ltd.	2.0%
Enel S.p.A.	1.9%

* Excludes short-term investments.

Portfolio holdings are subject to
change daily.

The Sub-Adviser seeks to invest in companies with the following characteristics:

1. Good growth prospects;
2. Resilient earnings potential across market cycles;
3. Disciplined capital allocation management; and
4. Strong competitive position.

Options Strategy: Under normal market conditions the Fund will also seek to secure gains and enhance the stability of returns over a market cycle by writing (selling) call options on selected indices and/or exchange-traded funds (“ETFs”). The underlying value against which such calls will be written may vary depending on the cash flow requirements of the portfolio and on the Sub-Adviser’s assessment of market conditions, generally within a range of 15% to 50%. The Fund expects to write (sell) call options primarily with shorter maturities (typically ten days to three months until expiration) generally, “at-the-money,” “out-of-the-money” or “near-the-money,” in exchange-listed option markets or over-the-counter markets with major international banks, broker-dealers and financial institutions. The Fund may also write (sell) call options on either the value of subsets of stocks in its portfolio or selected equity securities held in its portfolio.

Performance: Based on net asset value (“NAV”), the Fund provided a total return of -8.39% for the period ended August 31, 2015.(1) This NAV return reflects a decrease in the Fund’s NAV from \$17.19 on February 28, 2015 to \$14.92 on August 31, 2015, after taking into account the quarterly distributions. Based on its share price, the Fund provided a total return of -15.99% for the period ended August 31, 2015.(1) This share price return reflects a decrease in the Fund’s share price from \$15.73 on February 28, 2015 to \$12.52 on August 31, 2015, after taking into account the quarterly distributions. The Fund is not benchmarked to an index but uses the MSCI All Country World IndexSM as a reference index, which returned -7.18% for the reporting period. During the period, the Fund made quarterly distributions totaling \$0.81 per share, which were characterized as \$0.07 per share of net realized gain, \$0.55 per share return of capital and \$0.19 per share of net investment income.(2) As of August 31, 2015, the Fund had 19,805,000 shares outstanding.

TABLE OF CONTENTS

Voya Infrastructure, Industrials and Materials Fund Portfolio Managers' Report

Portfolio Specifics: After a strong start to the period, global markets peaked in late May and corrected sharply thereafter, resulting in a material contraction for the period as a whole. The sharp escalation of the financial crisis in Greece affected sentiment detrimentally in Europe, while the growth slowdown in emerging markets, especially China, induced a strong correction in emerging market stocks. Additionally, the devaluation of the Chinese renminbi in early August unsettled currency and equity markets. Regionally, Japanese equities proved more defensive due to improving corporate profitability. The U.S. and European markets contracted, especially in August. Emerging markets and Developed Asia bore the brunt of the pressure, and were notable underperformers. Globally, health care, consumer, and telecommunication services stocks proved more defensive, while energy and materials stocks weakened significantly in tandem with falling commodity prices. Industrial and information technology shares underperformed modestly.

Equity Portfolio(3): Our security selection is focused on harnessing infrastructure-related opportunities based on six themes, namely materials, transportation, food and water, power, construction and communications. The broader market backdrop, with industrials, materials, energy and information technology stocks relatively weak, constituted a headwind for the strategy given its thematic focus which sources more than 80% of the Fund from these sectors. The equity portfolio outperformed the custom benchmark(3), with positive contributions from materials and industrials largely offset by a selection shortfall in utilities, telecommunication services and information technology. Regionally, security selection in Europe and North America added value, but detracted in Japan and Developed Asia ex-Japan.

Options Portfolio: The Fund wrote call options on sector and regional ETFs to generate additional income — the selection of ETFs results from an optimization intended to track the underlying equity portfolio as closely as possible. For the reporting period, the strike prices of the options written were typically at or near the money, and the average expiration dates were between four and five weeks. The coverage ratio was maintained at approximately 35% throughout the period. Given the downward bias in global equity markets, the option strategy contributed positively to the performance of the Fund, as the premiums received generally materially exceeded the amounts due at the expiry of the options. Volatility was stable at a relatively low level through June, rose somewhat as the Greek financial crisis peaked, but spiked to the highest levels since 2011 in August when the Chinese currency devalued.

Current Strategy and Outlook: In our opinion, international developed stocks have modest upside potential from current levels. The Greek financial crisis appears to have at least been temporarily alleviated. European growth, while still low by historic standards, has found traction despite the dire situation in Greece. The European Central Bank continues to provide support through its aggressive quantitative easing policy. While growth in the U.S. has lost some momentum recently, some reacceleration is expected as we head into the fall. With continued solid growth in the United States, growth for many emerging economies should stabilize in the course of calendar 2015, but no sharp acceleration is expected. A further slowdown in Chinese growth remains a key risk. On balance, the substantial fall in energy and commodity prices should stimulate global consumption and industrial production as we head into 2016. It is our view that the structural growth issues facing the developed world are expected to improve gradually, albeit with some periodic setbacks. We believe an aging infrastructure and low interest rates will allow for some pick-up in infrastructure spending in the years ahead. Companies linked to infrastructure spending continue, we believe, to be well positioned for above average long term growth in a global market where secular growth in the developed world is expected to remain relatively scarce. In our opinion, the Fund should continue to benefit from its call writing activities.

*

Effective August 7, 2015, Frank van Etten was removed as a portfolio manager of the Fund. Effective September 29, 2015, Jody Hrazanek was added as a portfolio manager of the fund.

(1)

Total returns shown include, if applicable, the effect of fee waivers and/or expense reimbursements by the investment adviser. Had all fees and expenses been considered, the total returns would have been lower.

(2)

The final tax composition of dividends and distributions will not be determined until after the Fund's tax year-end.

(3)

For the practical management of the equity portfolio, we have identified the universe of companies whose businesses, we believe, fall within the six themes underlying the investment philosophy of the Fund: communications, construction, food and water, materials, power and transportation. This universe is updated periodically. As of August 31, 2015, it consists of nearly 904 companies based in 45 countries. By market capitalization of the shares of those companies, approximately 48% of the universe is based in North America, 26% in Europe, 16% in the developed economies of the Asia Pacific region and 10% in emerging markets. The principal sector weights of this universe are Industrials at 41%, Materials 19%, Utilities 12%, Telecommunications 15%, Information Technology 7% and Energy 6%. Aside from indicating the opportunity set from which we select securities, the performance of this universe provides an internal reference benchmark against which the actual performance of the Fund's equity portfolio can be compared.

Portfolio holdings and characteristics are subject to change and may not be representative of current holdings and characteristics. The outlook for this Fund is based only on the outlook of its portfolio managers through the end of this period, and may differ from that presented for other Voya mutual funds. The Fund's performance returns shown reflect applicable fee waivers and/or expense limits in effect during this period. Absent such fee waivers/expense limitations, if any, performance would have been lower. Performance data represents past performance and is no guarantee of future results. Past performance is not indicative of future results. The indices do not reflect fees, brokerage commissions, taxes or other expenses of investing. Investors cannot invest directly in an index.

TABLE OF CONTENTS

STATEMENT OF OPERATIONS for the six months ended August 31, 2015 (Unaudited)

INVESTMENT INCOME:

Dividends, net of foreign taxes withheld*	\$ 5,009,668
Total investment income	5,009,668

EXPENSES:

Investment management fees(1)	1,756,464
Transfer agent fees	7,044
Administrative service fees(1)	55,792
Shareholder reporting expense	40,748
Professional fees	28,428
Custody and accounting expense	67,924
Trustee fees	4,916
Miscellaneous expense	22,726
Interest expense	2,562
Total expenses	1,986,604
Net investment income	3,023,064

REALIZED AND UNREALIZED GAIN (LOSS):

Net realized gain (loss) on:

Investments	951,366
Foreign currency related transactions	(42,245)
Written options	4,701,643
Net realized gain	5,610,764

Net change in unrealized appreciation (depreciation) on:

Investments	(38,676,961)
Foreign currency related transactions	3,351
Written options	1,130,140
Net change in unrealized appreciation (depreciation)	(37,543,470)
Net realized and unrealized loss	(31,932,706)

Decrease in net assets resulting from operations \$ (28,909,642)

* Foreign taxes withheld \$ 442,353

(1)

Effective May 1, 2015, the investment management fee and administration fee were combined under a single amended and restated investment management agreement. Please see Note 4 for further information.

(1)

Total investment return at net asset value has been calculated assuming a purchase at net asset value at the beginning of each period and a sale at net asset value at the end of each period and assumes reinvestment of dividends, capital gain distributions and return of capital distributions/ allocations, if any, in accordance with the provisions of the dividend reinvestment plan. Total investment return at net asset value is not annualized for periods less than one year.

(2)

Total investment return at market value measures the change in the market value of your investment assuming reinvestment of dividends, capital gain distributions and return of capital distributions/allocations, if any, in accordance with the provisions of the Fund's dividend reinvestment plan. Total investment return at market value is not annualized for periods less than one year.

(3)

Annualized for periods less than one year.

(4)

Edgar Filing: Voya Infrastructure, Industrials & Materials Fund - Form N-CSRS

The Investment Adviser has entered into a written expense limitation agreement with the Fund under which it will limit the expenses of the Fund (excluding interest, taxes, investment-related costs, leverage expenses, extraordinary expenses and acquired fund fees and expenses) subject to possible recoupment by the Investment Adviser within three years of being incurred.

(5)

Commencement of operations.

(6)

Net asset value at beginning of period reflects the deduction of the sales load of \$0.90 per share and the offering costs of \$0.04 per share paid by the shareholder from the \$20.00 offering price.

•

Calculated using average number of shares outstanding throughout the period.

*

Amount is less than \$0.005 or 0.005% or more than \$(0.005) or (0.005)%.

†

Impact of waiving the advisory fee for the ING Institutional Prime Money Market Fund holding has less than 0.005% impact on the expense ratio and net investment income or loss ratio.

9

TABLE OF CONTENTS

NOTES TO FINANCIAL STATEMENTS as of August 31, 2015 (Unaudited)

NOTE 1 — ORGANIZATION

Voya Infrastructure, Industrials and Materials Fund (the “Fund”) is a diversified, closed-end management investment company registered under the Investment Company Act of 1940, as amended (the “1940 Act”). The Fund is organized as a Delaware statutory trust.

Voya Investments, LLC (“Voya Investments” or the “Investment Adviser”), an Arizona limited liability company, serves as the Investment Adviser to the Fund. Voya Investments oversees all investment advisory and portfolio management services for the Fund and assists in managing and supervising all aspects of the general day-to-day business activities and operations of the Fund, including custodial, transfer agency, dividend disbursing, accounting, auditing, compliance and related services. The Investment Adviser has engaged Voya Investment Management Co. LLC (“Voya IM” or the “Sub-Adviser”), a Delaware limited liability company, to serve as the Sub-Adviser to the Fund.

NOTE 2 — SIGNIFICANT ACCOUNTING POLICIES

The following significant accounting policies are consistently followed by the Fund in the preparation of its financial statements. The Fund is considered an investment company under U.S. generally accepted accounting principles (“GAAP”) and follows the accounting and reporting guidance applicable to investment companies.

A. Security Valuation. The Fund is open for business every day the New York Stock Exchange (“NYSE”) opens for regular trading (each such day, a “Business Day”). The net asset value (“NAV”) per share of the Fund is determined each Business Day as of the close of the regular trading session (“Market Close”), as determined by the Consolidated Tape Association (“CTA”), the central distributor of transaction prices for exchange-traded securities (normally 4:00 p.m. Eastern time unless otherwise designated by the CTA). The NAV per share of the Fund is calculated by taking the value of the Fund’s assets, subtracting the Fund’s liabilities, and dividing by the number of shares that are outstanding. On days when the Fund is closed for business, Fund shares will not be priced and the Fund does not transact purchase and redemption orders. To the extent the Fund’s assets are traded in other markets on days when the Fund does not price its shares, the value of the Fund’s assets will likely change and you will not be able to purchase or redeem shares of the Fund.

Assets for which market quotations are readily available are valued at market value. A security listed or traded on an exchange is valued at its last sales price or official closing price as of the close of the regular trading session on the exchange where the security is principally traded or, if such price is not available, at the last sale price as of the Market Close for such security provided by the CTA. Bank loans are valued at the average of the averages between the bid and ask prices provided to an independent loan pricing service by brokers. Futures contracts are valued at the final settlement price set by an exchange on which they are principally traded. Listed options are valued at the mean between the last bid and ask prices from the exchange on which they are principally traded. Investments in open-end registered investment companies that do not trade on an exchange are valued at the end of day NAV per share. Investments in registered investment companies that trade on an exchange are valued at the last sales price or official closing price as of the close of the regular trading session on the exchange where the security is principally traded.

When a market quotation is not readily available or is deemed unreliable, the Fund will determine a fair value for the relevant asset in accordance with procedures adopted by the Board of Trustees (“Board”). Such procedures provide, for example, that: (a) Exchange-traded securities are valued at the mean of the closing bid and ask; (b) Debt obligations are valued using an evaluated price provided by an independent pricing service. Evaluated prices provided by the pricing service may be determined without exclusive reliance on quoted prices, and may reflect factors such as institution-size trading in similar groups of securities, developments related to specific securities, benchmark yield, quality, type of issue, coupon rate, maturity, individual trading characteristics and other market data; (c) Securities traded in the over-the-counter market are valued based on prices provided by independent pricing services or market makers; (d) Options not listed on an exchange are valued by an independent source using an industry accepted model, such as Black-Scholes; (e) Centrally cleared swap agreements are valued using a price provided by the central counterparty clearinghouse; (f) Over-the-counter swap agreements are valued using a price provided by an independent pricing service; (g) Forward foreign currency contracts are valued utilizing current and forward rates obtained from an independent pricing service. Such prices from the third party pricing service are for specific

settlement periods and the Fund's forward foreign currency contracts are valued at an interpolated rate between the closest preceding and subsequent period reported by the independent pricing service and (h) Securities for which market prices are not provided by any of the above methods may be valued based upon quotes furnished by brokers. The prospectuses of the open-end registered investment companies in which the Fund may invest explain the circumstances under which they will use fair value pricing and the effects of using fair value pricing.

TABLE OF CONTENTS

NOTES TO FINANCIAL STATEMENTS as of August 31, 2015 (Unaudited) (continued)

NOTE 2 — SIGNIFICANT ACCOUNTING POLICIES (continued)

Foreign securities' (including foreign exchange contracts) prices are converted into U.S. dollar amounts using the applicable exchange rates as of Market Close. If market quotations are available and believed to be reliable for foreign exchange-traded equity securities, the securities will be valued at the market quotations. Because trading hours for certain foreign securities end before Market Close, closing market quotations may become unreliable. An independent pricing service determines the degree of certainty, based on historical data, that the closing price in the principal market where a foreign security trades is not the current value as of Market Close. Foreign securities' prices meeting the approved degree of certainty that the price is not reflective of current value will be valued by the independent pricing service using pricing models designed to estimate likely changes in the values of those securities between the times in which the trading in those securities is substantially completed and Market Close. Multiple factors may be considered by the independent pricing service in determining the value of such securities and may include information relating to sector indices, American Depositary Receipts and domestic and foreign index futures.

All other assets for which market quotations are not readily available or became unreliable (or if the above fair valuation methods are unavailable or determined to be unreliable) are valued at fair value as determined in good faith by or under the supervision of the Board following procedures approved by the Board. The Board has delegated to the Investment Adviser responsibility for overseeing the implementation of the Fund's valuation procedures; a "Pricing Committee" comprised of employees of the Investment Adviser or its affiliates has responsibility for applying the fair valuation methods set forth in the procedures and, if a fair valuation cannot be determined pursuant to the fair valuation methods, determining the fair value of assets held by the Fund. Issuer specific events, transaction price, position size, nature and duration of restrictions on disposition of the security, market trends, bid/ask quotes of brokers and other market data may be reviewed in the course of making a good faith determination of a security's fair value. Valuations change in response to many factors including the historical and prospective earnings of the issuer, the value of the issuer's assets, general economic conditions, interest rates, investor perceptions and market liquidity. Because of the inherent uncertainties of fair valuation, the values used to determine the Fund's NAV may materially differ from the value received upon actual sale of those investments. Thus, fair valuation may have an unintended dilutive or accretive effect on the value of shareholders' investments in the Fund.

Each investment asset or liability of the Fund is assigned a level at measurement date based on the significance and source of the inputs to its valuation. Quoted prices in active markets for identical securities are classified as "Level 1," inputs other than quoted prices for an asset or liability that are observable are classified as "Level 2" and unobservable inputs, including the Sub-Adviser's or Pricing Committee's judgment about the assumptions that a market participant would use in pricing an asset or liability are classified as "Level 3." The inputs used for valuing securities are not necessarily an indication of the risks associated with investing in those securities. Short-term securities of sufficient credit quality are generally considered to be Level 2 securities under applicable accounting rules. A table summarizing the Fund's investments under these levels of classification is included following the Summary Portfolio of Investments.

U.S. GAAP requires a reconciliation of the beginning to ending balances for reported fair values that presents changes attributable to total realized and unrealized gains or losses, purchases and sales, and transfers in or out of the Level 3 category during the period. The beginning of period timing recognition is used for the transfers between Levels of the Fund's assets and liabilities. A reconciliation of Level 3 investments is presented only when the Fund has a significant amount of Level 3 investments.

For the period ended August 31, 2015, there have been no significant changes to the fair valuation methodologies.

B. Security Transactions and Revenue Recognition. Security transactions are recorded on the trade date. Realized gains or losses on sales of investments are calculated on the identified cost basis. Interest income is recorded on the accrual basis. Premium amortization and discount accretion are determined using the effective yield method. Dividend income is recorded on the ex-dividend date, or in the case of some foreign dividends, when the information becomes available to the Fund.

C. Foreign Currency Translation. The books and records of the Fund are maintained in U.S. dollars. Any foreign currency amounts are translated into U.S. dollars on the following basis:

(1)

Market value of investment securities, other assets and liabilities — at the exchange rates prevailing at the end of the day.

(2)

Purchases and sales of investment securities, income and expenses — at the rates of exchange prevailing on the respective dates of such transactions.

TABLE OF CONTENTS

NOTES TO FINANCIAL STATEMENTS as of August 31, 2015 (Unaudited) (continued)

NOTE 2 — SIGNIFICANT ACCOUNTING POLICIES (continued)

Although the net assets and the market values are presented at the foreign exchange rates at the end of the day, the Fund does not isolate the portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gains or losses from investments. For securities, which are subject to foreign withholding tax upon disposition, liabilities are recorded on the Statement of Assets and Liabilities for the estimated tax withholding based on the securities current market value. Upon disposition, realized gains or losses on such securities are recorded net of foreign withholding tax. Reported net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities other than investments in securities, resulting from changes in the exchange rate. Foreign security and currency transactions may involve certain considerations and risks not typically associated with investing in U.S. companies and U.S. government securities. These risks include, but are not limited to, revaluation of currencies and future adverse political and economic developments which could cause securities and their markets to be less liquid and prices more volatile than those of comparable U.S. companies and U.S. government securities. The foregoing risks are even greater with respect to securities of issuers in emerging markets.

D. Distributions to Shareholders. The Fund intends to make quarterly distributions from its cash available for distribution, which consists of the Fund's dividends and interest income after payment of Fund expenses, net option premiums and net realized and unrealized gains on investments. Such quarterly distributions may also consist of a return of capital. Under the Managed Distribution Policy, the Fund may make periodic distributions of long-term capital gains more frequently than once per taxable year. On January 15, 2014, the Fund paid its first dividend under the Fund's managed distribution policy. Prior to the managed distribution policy, the Fund paid distributions pursuant to a level rate distribution policy. Under its former policy and consistent with 1940 Act, as amended, the Fund could not distribute long-term capital gains, as defined in the IRS Code of 1986, more often than once in any one taxable year. The Fund received exemptive relief from the SEC that permits the Fund to distribute long-term capital gains more often than once in one taxable year. After consideration by the Fund's Board, the Fund adopted the current managed distribution policy which allows the Fund to make periodic distributions of long-term capital gains. Distributions are recorded on the ex-dividend date. Distributions are determined annually in accordance with federal tax principles, which may differ from U.S. GAAP for investment companies.

The tax treatment and characterization of the Fund's distributions may vary significantly from time to time depending on whether the Fund has gains or losses on the call options written on its portfolio versus gains or losses on the equity securities in the portfolio. Each quarter, the Fund will provide disclosures with distribution payments made that estimate the percentages of that distribution that represent net investment income, other income or capital gains, and return of capital, if any. The final composition of the tax characteristics of the distributions cannot be determined with certainty until after the end of the Fund's tax year, and will be reported to shareholders at that time. A significant portion of the Fund's distributions may constitute a return of capital. The amount of quarterly distributions will vary, depending on a number of factors. As portfolio and market conditions change, the rate of dividends on the common shares will change. There can be no assurance that the Fund will be able to declare a dividend in each period.

E. Federal Income Taxes. It is the policy of the Fund to comply with the requirements of subchapter M of the Internal Revenue Code that are applicable to regulated investment companies and to distribute substantially all of its net investment income and any net realized capital gains to its shareholders. Therefore, a federal income tax or excise tax provision is not required. Management has considered the sustainability of the Fund's tax positions taken on federal income tax returns for all open tax years in making this determination. The Fund may utilize equalization accounting for tax purposes, whereby a portion of redemption payments are treated as distributions of income or gain.

F. Use of Estimates. The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

TABLE OF CONTENTS

NOTES TO FINANCIAL STATEMENTS as of August 31, 2015 (Unaudited) (continued)

NOTE 2 — SIGNIFICANT ACCOUNTING POLICIES (continued)

G. Risk Exposures and the Use of Derivative Instruments. The Fund's investment objectives permit the Fund to enter into various types of derivatives contracts, including, but not limited to, forward foreign currency exchange contracts and purchased and written options. In doing so, the Fund will employ strategies in differing combinations to permit it to increase or decrease the level of risk, or change the level or types of exposure to market risk factors. This may allow the Fund to pursue its objectives more quickly and efficiently than if it were to make direct purchases or sales of securities capable of affecting a similar response to market factors.

Market Risk Factors. In pursuit of its investment objectives, the Fund may seek to use derivatives to increase or decrease its exposure to the following market risk factors:

Credit Risk. Credit risk relates to the ability of the issuer to meet interest and principal payments, or both, as they come due. In general, lower-grade, higher-yield bonds are subject to credit risk to a greater extent than lower-yield, higher-quality bonds.

Equity Risk. Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Foreign Exchange Rate Risk. Foreign exchange rate risk relates to the change in the U.S. dollar value of a security held that is denominated in a foreign currency. The U.S. dollar value of a foreign currency denominated security will decrease as the U.S. dollar appreciates against the currency, while the U.S. dollar value will increase as the U.S. dollar depreciates against the currency.

Interest Rate Risk. Interest rate risk refers to the fluctuations in value of fixed-income securities resulting from the inverse relationship between price and yield. For example, an increase in general interest rates will tend to reduce the market value of already issued fixed-income investments, and a decline in general interest rates will tend to increase their value. In addition, debt securities with longer durations, which tend to have higher yields, are subject to potentially greater fluctuations in value from changes in interest rates than obligations with shorter durations. The Fund may lose money if short-term or long-term interest rates rise sharply or otherwise change in a manner not anticipated by the Sub-Adviser. As of the date of this report, interest rates in the United States are at, or near, historic lows, which may increase the Fund's exposure to risks associated with rising interest rates. Rising interest rates could have unpredictable effects on the markets and may expose fixed-income and related markets to heightened volatility. For fixed-income securities, an increase in interest rates may lead to increased redemptions and increased portfolio turnover, which could reduce liquidity for certain Fund investments, adversely affect values, and increase the Fund's costs. If dealer capacity in fixed-income markets is insufficient for market conditions, it may further inhibit liquidity and increase volatility in the fixed-income markets.

Risks of Investing in Derivatives. The Fund's use of derivatives can result in losses due to unanticipated changes in the market risk factors and the overall market. In instances where the Fund is using derivatives to decrease, or hedge, exposures to market risk factors for securities held by the Fund, there are also risks that those derivatives may not perform as expected resulting in losses for the combined or hedged positions.

The use of these strategies involves certain special risks, including a possible imperfect correlation, or even no correlation, between price movements of derivative instruments and price movements of related investments. While some strategies involving derivative instruments can reduce the risk of loss, they can also reduce the opportunity for gain or even result in losses by offsetting favorable price movements in related investments or otherwise, due to the possible inability of the Fund to purchase or sell a portfolio security at a time that otherwise would be favorable or the possible need to sell a portfolio security at a disadvantageous time because the Fund is required to maintain asset coverage or offsetting positions in connection with transactions in derivative instruments. Additional associated risks from investing in derivatives also exist and potentially could have significant effects on the valuation of the derivative and the Fund. Associated risks are not the risks that the Fund is attempting to increase or decrease exposure to, per its investment objectives, but are the additional risks from investing in derivatives. Examples of these associated risks are liquidity risk, which is the risk that the Fund will not be able to sell the derivative in the open market in a timely manner, and counterparty credit risk, which is the risk that the counterparty will not fulfill its obligation to the Fund.

Associated risks can be different for each type of derivative and are discussed by each derivative type in the following notes.

Counterparty Credit Risk and Credit Related Contingent Features. Certain derivative positions are subject to counterparty credit risk, which is the risk that the counterparty will not fulfill its obligation to the Fund. The Fund's derivative counterparties are financial institutions who are subject to market conditions that may weaken their financial position. The Fund intends to enter into financial transactions with counterparties that it believes to be

TABLE OF CONTENTS

NOTES TO FINANCIAL STATEMENTS as of August 31, 2015 (Unaudited) (continued)

NOTE 2 — SIGNIFICANT ACCOUNTING POLICIES (continued)

creditworthy at the time of the transaction. To reduce this risk, the Fund generally enters into master netting arrangements, established within the Fund's International Swap and Derivatives Association, Inc. ("ISDA") Master Agreements ("Master Agreements"). These agreements are with select counterparties and they govern transactions, including certain over-the-counter ("OTC") derivative and forward foreign currency contracts, entered into by the Fund and the counterparty. The Master Agreements maintain provisions for general obligations, representations, agreements, collateral, and events of default or termination. The occurrence of a specified event of termination may give a counterparty the right to terminate all of its contracts and affect settlement of all outstanding transactions under the applicable Master Agreement.

The Fund may also enter into collateral agreements with certain counterparties to further mitigate credit risk associated with OTC derivative and forward foreign currency contracts. Subject to established minimum levels, collateral is generally determined based on the net aggregate unrealized gain or loss on contracts with a certain counterparty. Collateral pledged to the Fund is held in a segregated account by a third-party agent and can be in the form of cash or debt securities issued by the U.S. government or related agencies.

The Fund's maximum risk of loss from counterparty credit risk on OTC derivatives is generally the aggregate unrealized gain in excess of any collateral pledged by the counterparty to the Fund. For purchased OTC options, the Fund bears the risk of loss in the amount of the premiums paid and the change in market value of the options should the counterparty not perform under the contracts. The Fund did not enter into any purchased OTC options during the period ended August 31, 2015.

The Fund's master agreements with derivative counterparties have credit related contingent features that if triggered would allow its derivatives counterparties to close out and demand payment or additional collateral to cover their exposure from the Fund. Credit related contingent features are established between the Fund and its derivatives counterparties to reduce the risk that the Fund will not fulfill its payment obligations to its counterparties. These triggering features include, but are not limited to, a percentage decrease in the Fund's net assets and or a percentage decrease in the Fund's NAV, which could cause the Fund to accelerate payment of any net liability owed to the counterparty. The contingent features are established within the Fund's Master Agreements.

Written options by the Fund do not give rise to counterparty credit risk, as written options obligate the Fund to perform and not the counterparty. As of August 31, 2015, the total value of written OTC call options subject to Master Agreements in a liability position was \$1,208,785. If a contingent feature had been triggered, the Fund could have been required to pay this amount in cash to its counterparties. The Fund did not hold or post collateral for its open written OTC call options at period end. There were no credit events for the period ended August 31, 2015 that triggered any credit related contingent features.

H. Options Contracts. The Fund may purchase put and call options and may write (sell) put options and covered call options. The premium received by the Fund upon the writing of a put or call option is included in the Statement of Assets and Liabilities as a liability which is subsequently marked-to-market until it is exercised or closed, or it expires. The Fund will realize a gain or loss upon the expiration or closing of the option contract. When an option is exercised, the proceeds on sales of the underlying security for a written call option or purchased put option or the purchase cost of the security for a written put option or a purchased call option is adjusted by the amount of premium received or paid. The risk in writing a call option is that the Fund gives up the opportunity for profit if the market price of the security increases and the option is exercised. The risk in buying an option is that the Fund pays a premium whether or not the option is exercised. Risks may also arise from an illiquid secondary market or from the inability of counterparties to meet the terms of the contract.

The Fund generates premiums and seeks gains by writing options on ETFs or indexes on a portion of the value of the equity portfolio. Please refer to Note 7 for the volume of written OTC call option activity during the period ended August 31, 2015.

I. Indemnifications. In the normal course of business, the Fund may enter into contracts that provide certain indemnifications. The Fund's maximum exposure under these arrangements is dependent on future claims that may be

made against the Fund and, therefore, cannot be estimated; however, based on experience, management considers risk of loss from such claims remote.

NOTE 3 — INVESTMENT TRANSACTIONS

The cost of purchases and the proceeds from sales of investments for the period ended August 31, 2015, excluding short-term securities, were \$104,237,550 and \$113,386,529, respectively.

TABLE OF CONTENTS

NOTES TO FINANCIAL STATEMENTS as of August 31, 2015 (Unaudited) (continued)

NOTE 4 — INVESTMENT MANAGEMENT FEES

Prior to May 1, 2015, the Fund had entered into an investment management agreement (“Management Agreement”) with the Investment Adviser. The Management Agreement compensated the Investment Adviser with a management fee, payable monthly, based on an annual rate of 1.00% of the Fund’s average daily managed assets. For the purposes of the Management Agreement, managed assets are defined as the Fund’s average daily gross asset value, minus the sum of the Fund’s accrued and unpaid dividends on any outstanding preferred shares and accrued liabilities (other than liabilities for the principal amount of any borrowings incurred, commercial paper or notes issued by the Fund and the liquidation preference of any outstanding preferred shares). As of August 31, 2015, there were no preferred shares outstanding. Amounts paid to the Investment Adviser through April 30, 2015 are reflected as investment management fees on the accompanying Statement of Operations.

Also, prior to May 1, 2015, the Fund had entered into an administrative agreement (“Administrative Agreement”) with Voya Funds Services, LLC (the “Administrator”), a Delaware limited liability company. The Administrator provided certain administrative and shareholder services necessary for Fund operations and was responsible for the supervision of other service providers. For its services, the Administrator was entitled to receive from the Fund a fee at an annual rate of 0.10% of the Fund’s average daily managed assets. Amounts paid to the Administrator through April 30, 2015 are reflected as administrative service fees on the accompanying Statement of Operations.

Effective May 1, 2015, the terms of the Fund’s Management Agreement and Administrative Agreement were combined under a single Amended and Restated Investment Management Agreement with a single management fee. The single management fee rate under the Fund’s Amended and Restated Investment Management Agreement does not exceed the former combined investment management and administrative services fee rates for the Fund and there is no change to the investment management or administrative services provided.

The Amended and Restated Investment Management Agreement compensates the Investment Adviser with a management fee, payable monthly, based on an annual rate of 1.10% of the Fund’s average daily managed assets. Single management fee amounts paid to the Investment Adviser from May 1, 2015 through August 31, 2015 are reflected as investment management fees on the accompanying Statement of Operations.

The Investment Adviser has entered into a sub-advisory agreement with Voya IM. Subject to policies as the Board or the Investment Adviser may determine, Voya IM manages the Fund’s assets in accordance with the Fund’s investment objectives, policies and limitations.

NOTE 5 — EXPENSE LIMITATION AGREEMENT

The Investment Adviser has entered into a written expense limitation agreement (“Expense Limitation Agreement”) with the Fund under which it will limit the expenses of the Fund, excluding interest, taxes, investment-related costs, leverage expenses, extraordinary expenses, and acquired fund fees and expenses to 1.25% of average daily managed assets.

The Investment Adviser may at a later date recoup from the Fund for fees waived and other expenses assumed by the Investment Adviser during the previous 36 months, but only if, after such recoupment, the Fund’s expense ratio does not exceed the percentage described above. Waived and reimbursed fees net of any recoupment by the Investment Adviser of such waived and reimbursed fees are reflected on the accompanying Statement of Operations. Amounts payable by the Investment Adviser are reflected on the accompanying Statement of Assets and Liabilities.

As of August 31, 2015, there are no amounts of waived or reimbursed fees that are subject to possible recoupment by the Investment Adviser.

The Expense Limitation Agreement is contractual through March 1, 2016 and shall renew automatically for one-year terms. Termination or modification of this obligation requires approval by the Board.

NOTE 6 — OTHER TRANSACTIONS WITH AFFILIATES AND RELATED PARTIES

The Fund has adopted a Deferred Compensation Plan (the “Plan”), which allows eligible non-affiliated trustees, as described in the Plan, to defer the receipt of all or a portion of the trustees’ fees that they are entitled to receive from the Fund. For purposes of determining the amount owed to the trustee under the Plan, the amounts deferred are invested in shares of the funds selected by the trustee (the “Notional Funds”). The Fund purchases shares of the Notional Funds, which are all advised by Voya Investments, in amounts equal to the trustees’ deferred fees, resulting in a Fund

asset equal to the deferred compensation liability. Such assets are included as a component of “Other assets” on the accompanying Statement of Assets and Liabilities. Deferral of trustees’ fees under the Plan will not affect net assets of the Fund, and will not materially affect the Fund’s assets, liabilities or net investment income per share. Amounts will be deferred until distributed in accordance with the Plan.

TABLE OF CONTENTS

NOTES TO FINANCIAL STATEMENTS as of August 31, 2015 (Unaudited) (continued)

NOTE 7 — TRANSACTIONS IN WRITTEN OPTIONS

Transactions in written OTC call options on equity indices were as follows:

	Number of Contracts	Premiums Received
Balance at 02/28/2015	2,128,206	\$ 1,820,208
Options Written	12,079,686	10,691,749
Options Expired	(9,502,305)	(7,914,446)
Options Terminated in Closing Purchase Transactions	(2,599,402)	(2,184,964)
Balance at 08/31/2015	2,106,185	\$ 2,412,546

NOTE 8 — CONCENTRATION OF INVESTMENT RISKS

All Voya family of funds involve risk — some more than others — and there is always the chance that you could lose money or not earn as much as you hope. The Fund's risk profile is largely a factor of the principal securities in which it invests and investment techniques that it uses. The following are the principal risks associated with investing in the Fund. This is not, and is not intended to be, a description of all risks of investing in the Fund.

Foreign Securities and Emerging Markets. The Fund makes significant investments in foreign securities and securities issued by companies located in countries with emerging markets. Investing in foreign (non-U.S.) securities may result in the Fund experiencing more rapid and extreme changes in value than a fund that invests exclusively in securities of U.S. companies due to: smaller markets; differing reporting, accounting, and auditing standards; nationalization, expropriation, or confiscatory taxation; foreign currency fluctuations, currency blockage, or replacement; potential for default on sovereign debt; or political changes or diplomatic developments, which may include the imposition of economic sanctions or other measures by the United States or other governments and supranational organizations. Markets and economies throughout the world are becoming increasingly interconnected, and conditions or events in one market, country or region may adversely impact investments or issuers in another market, country or region.

Industrials Sector. The industrials sector can be significantly affected by general economic trends, including employment, economic growth, and interest rates, changes in consumer sentiment and spending, the supply of and demand for specific industrial and energy products or services, commodity prices, legislation, government regulation and spending, import controls, and worldwide competition. Furthermore, a company in the industrials sector can be subject to liability for environmental damage, depletion of resources, and mandated expenditures for safety and pollution control.

Infrastructure-Related Investment. Because the Fund invests in infrastructure companies, it has greater exposure to potentially adverse economic, regulatory, political and other changes affecting such companies. Infrastructure companies are subject to a variety of factors that may adversely affect their business or operations including interest rates and costs in connection with capital construction projects, costs associated with environmental and other regulations, the effects of economic slowdowns, surplus capacity, increased competition from other suppliers of services, uncertainties concerning the availability of necessary fuels, energy costs, the effects of energy conservation policies and other factors.

Leverage. Although the Fund has no current intention to do so, the Fund is authorized to utilize leverage through the issuance of preferred shares and/or borrowings, including the issuance of debt securities. In the event that the Fund determines in the future to utilize investment leverage, there can be no assurance that such a leveraging strategy will be successful during any period in which it is employed.

Market Discount. Shares of closed-end investment companies frequently trade at a discount from their NAV. The possibility that Shares of the Fund will trade at a discount from their NAV is a risk separate and distinct from the risk that the Fund's NAV may decrease.

Materials Sector. The materials sector can be significantly affected by the level and volatility of commodity prices, the exchange value of the dollar, import controls, and worldwide competition. At times, worldwide production of

materials has exceeded demand as a result of over-building or economic downturns, which has led to commodity price declines and unit price reductions. Companies in the materials industries can also be adversely affected by liability for environmental damage, depletion of resources, mandated expenditures for safety and pollution control, labor relations, and government regulations.

NOTE 9 — CAPITAL SHARES

There was no capital share activity during the period ended August 31, 2015 and during the year ended February 28, 2015.

NOTE 10 — FEDERAL INCOME TAXES

The amount of distributions from net investment income and net realized capital gains are determined in accordance with federal income tax regulations, which may differ from U.S. GAAP for investment companies. These book/tax differences may be either temporary or permanent. Permanent differences are reclassified within the capital accounts based on their federal tax-basis treatment; temporary differences are not reclassified. Key

TABLE OF CONTENTS

NOTES TO FINANCIAL STATEMENTS as of August 31, 2015 (Unaudited) (continued)

NOTE 10 — FEDERAL INCOME TAXES (continued)

differences include the treatment of short-term capital gains, foreign currency transactions, and wash sale deferrals. Distributions in excess of net investment income and/or net realized capital gains for tax purposes are reported as return of capital.

Dividends paid by the Fund from net investment income and distributions of net realized short-term capital gains are, for federal income tax purposes, taxable as ordinary income to shareholders.

The tax composition of dividends and distributions in the current period will not be determined until after the Fund's tax year-end of December 31, 2015. The tax composition of dividends and distributions as of the Fund's most recent tax year-end was as follows:

Tax Year Ended	
December 31, 2014	
Ordinary Income	Long-term Capital Gain
\$9,138,323	\$ 22,945,777

The tax-basis components of distributable earnings as of the tax year ended December 31, 2014 were:

Undistributed Long-term Capital Gains	Unrealized Appreciation/ (Depreciation)
\$1,558,680	\$ 37,842,166

At December 31, 2014, the Fund did not have any capital loss carryforwards for U.S. federal income tax purposes. The Fund's major tax jurisdictions are U.S. federal and Arizona. The earliest tax year that remains subject to examination by these jurisdictions is 2010.

As of August 31, 2015, no provision for income tax is required in the Fund's financial statements as a result of tax positions taken on federal and state income tax returns for open tax years. The Fund's federal and state income and federal excise tax returns for tax years for which the applicable statutes of limitations have not expired are subject to examination by the Internal Revenue Service and state department of revenue.

NOTE 11 — RESTRUCTURING PLAN

Prior to May 2013, Voya Financial, Inc. was a wholly-owned subsidiary of ING Groep N.V. ("ING Groep"). In October 2009, ING Groep submitted a restructuring plan (the "Restructuring Plan") to the European Commission in order to receive approval for state aid granted to ING Groep by the Kingdom of the Netherlands in November 2008 and March 2009. To receive approval for this state aid, ING Groep was required to divest its insurance and investment management businesses, including Voya Financial, Inc., before the end of 2013. In November 2012, the Restructuring Plan was amended to permit ING Groep additional time to complete the divestment. Pursuant to the amended Restructuring Plan, ING Groep was required to divest at least 25% of Voya Financial, Inc. by the end of 2013 and more than 50% by the end of 2014, and was required to divest its remaining interest by the end of 2016 (such divestment, the "Separation Plan").

In May 2013, Voya Financial, Inc. conducted an initial public offering of its common stock (the "IPO"). In October 2013, March 2014, and September 2014, ING Groep divested additional shares in several secondary offerings of common stock of Voya Financial, Inc. and concurrent share repurchases by Voya Financial, Inc. These transactions reduced ING Groep's ownership interest in Voya Financial, Inc. to 32%. Voya Financial, Inc. did not receive any proceeds from these offerings.

In November 2014, through an additional secondary offering and the concurrent repurchase of shares by Voya Financial, Inc., ING Groep further reduced its interest in Voya Financial, Inc. below 25% to approximately 19% (the "November 2014 Offering"). The November 2014 Offering was deemed by the Investment Adviser to be a change of control (the "Change of Control"), which resulted in the automatic termination of the existing investment advisory and sub-advisory agreements under which the Investment Adviser and sub-adviser provide services to the Fund. In

anticipation of this termination, and in order to ensure that the existing investment advisory and sub-advisory services could continue uninterrupted, in 2013 the Board approved new advisory and sub-advisory agreements for the Fund, as applicable, in connection with the IPO. In addition, in 2013, shareholders of the Fund approved new investment advisory and affiliated sub-advisory agreements prompted by the IPO, as well as any future advisory and affiliated sub-advisory agreements prompted by the Separation Plan that are approved by the Board and that have terms not materially different from the current agreements. This meant that shareholders would not have another opportunity to vote on a new agreement with the Investment Adviser or the current affiliated sub-adviser even upon a change of control prompted by the Separation Plan, as long as no single person or group of persons acting together gains “control” (as defined in the 1940 Act) of Voya Financial, Inc.

On November 18, 2014, in response to the Change of Control, the Board, at an in-person meeting, approved new investment advisory and sub-advisory agreements. At that meeting, the Investment Adviser represented that the new investment advisory and affiliated sub-advisory

TABLE OF CONTENTS

NOTES TO FINANCIAL STATEMENTS as of August 31, 2015 (Unaudited) (continued)

NOTE 11 — RESTRUCTURING PLAN (continued)

agreements approved by the Board were not materially different from the agreements approved by shareholders in 2013 and no single person or group of persons acting together was expected to gain “control” (as defined in the 1940 Act) of Voya Financial, Inc. As a result, shareholders of the Fund will not be asked to vote again on the new agreements with the Investment Adviser and affiliated sub-adviser.

In March 2015, ING Groep divested the remainder of its interest in Voya Financial, Inc. through a secondary offering of Voya Financial, Inc.’s common stock and a concurrent share repurchase by Voya Financial, Inc. Voya Financial, Inc. did not receive any proceeds from these transactions.

NOTE 12 — SUBSEQUENT EVENTS

Dividends: Subsequent to August 31, 2015, the Fund made a distribution of:

Per Share Amount	Declaration Date	Payable Date	Record Date
\$ 0.365	9/15/2015	10/15/2015	10/5/2015

Each quarter, the Fund will provide disclosures with distribution payments made that estimate the percentages of that distribution that represent net investment income, capital gains, and return of capital, if any. A significant portion of the quarterly distribution payments made by the Fund may constitute a return of capital.

Portfolio Manager changes: Effective September 29, 2015, Jody Hrazanek was added as a portfolio manager of the Fund.

The Fund has evaluated events occurring after the Statement of Assets and Liabilities date (“subsequent events”) to determine whether any subsequent events necessitated adjustment to or disclosure in the financial statements. Other than the above, no such subsequent events were identified.

+

Other Financial Instruments are derivatives not reflected in the Portfolio of Investments and may include open forward foreign currency contracts, futures, centrally cleared swaps, OTC swaps and written options. Forward foreign currency contracts, futures and centrally cleared swaps are valued at the unrealized gain (loss) on the instrument. OTC swaps and written options are valued at the fair value of the instrument.

#

The earlier close of the foreign markets gives rise to the possibility that significant events, including broad market moves, may have occurred in the interim and may materially affect the value of those securities. To account for this, the Fund may frequently value many of its foreign equity securities using fair value prices based on third party vendor modeling tools to the extent available. Accordingly, a portion of the Fund’s investments are categorized as Level 2 investments.

A summary of derivative instruments by primary risk exposure is outlined in the following tables. The fair value of derivative instruments as of August 31, 2015 was as follows:

Derivatives not accounted for as hedging instruments	Location on Statement of Assets and Liabilities	Fair Value
Liability Derivatives		
Equity contracts	Written options, at fair value	\$ 1,208,785
Total Liability Derivatives		\$ 1,208,785

The effect of derivative instruments on the Fund's Statement of Operations for the period ended August 31, 2015 was as follows:

Derivatives not accounted for as hedging instruments	Amount of Realized Gain or (Loss) on Derivatives Recognized in Income
Equity contracts	Written options \$ 4,701,643

Edgar Filing: Voya Infrastructure, Industrials & Materials Fund - Form N-CSRS

Total	\$ 4,701,643
	Change in Unrealized Appreciation or Depreciation on Derivatives Recognized in Income
Derivatives not accounted for as hedging instruments	Written options
Equity contracts	\$ 1,130,140
Total	\$ 1,130,140

The following is a summary by counterparty of the fair value of OTC derivative instruments subject to Master Netting Agreements and collateral pledged (received), if any, at August 31, 2015:

	Citigroup, Inc.	UBS AG	Totals
Liabilities:			
Written options	\$ 456,359	\$ 752,426	\$ 1,208,785
Total Liabilities	\$ 456,359	\$ 752,426	\$ 1,208,785
Net OTC derivative instruments by counterparty, at fair value	\$ (456,359)	\$ (752,426)	\$ (1,208,785)
Total collateral pledged by the Fund/(Received from counterparty)	\$ —	\$ —	\$ —
Net Exposure(1)	\$ (456,359)	\$ (752,426)	\$ (1,208,785)

(1)
Positive net exposure represents amounts due from each respective counterparty. Negative exposure represents amounts due from the Fund. Please refer to Note 2 for additional details regarding counterparty credit risk and credit related contingent features.

Voya Infrastructure, Industrials SUMMARY PORTFOLIO OF INVESTMENTS
and Materials Fund as of August 31, 2015 (Unaudited) (continued)

Supplemental Option Information (Unaudited)

Supplemental Call Option Statistics as of August 31, 2015:

% of Total Net Assets against which calls written	35.61%
Average Days to Expiration at time written	28 days
Average Call Moneyness* at time written	ATM
Premiums received for calls	\$ 2,412,546
Value of calls	\$ (1,208,785)

*

“Moneyness” is the term used to describe the relationship between the price of the underlying asset and the option’s exercise or strike price. For example, a call (buy) option is considered “in-the-money” when the value of the underlying asset exceeds the strike price. Conversely, a put (sell) option is considered “in-the-money” when its strike price exceeds the value of the underlying asset. Options are characterized for the purpose of Moneyness as, “in-the-money” (“ITM”), “out-of-the-money” (“OTM”) or “at-the-money” (“ATM”), where the underlying asset value equals the strike price.

ADVISORY CONTRACT APPROVAL DISCUSSION (Unaudited)

APPROVAL OF AMENDED AND RESTATED INVESTMENT MANAGEMENT AGREEMENT

At a meeting held on March 12, 2015, the Board of Trustees (the “Board”) of Voya Infrastructure, Industrials and Materials Fund (the “Fund”), including a majority of Board members who have no direct or indirect interest in the advisory agreement (“Independent Trustees”), approved amending and restating the Investment Management Agreement between the Fund and Voya Investments, LLC (the “Adviser”) so that, effective May 1, 2015, the terms of the Fund’s Investment Management Agreement and its Administration Agreement are combined under a single Amended and Restated Investment Management Agreement with a single management fee. The single management fee rate under the Fund’s Amended and Restated Investment Management Agreement does not exceed the former combined investment management and administrative services fee rates for the Fund and, under the Fund’s Amended and Restated Investment Management Agreement, there was no change to the investment management or administrative services provided or the fees charged to the Fund.

In connection with its review, the Board determined that it did not need to consider certain factors it typically considers during its review of the Fund’s advisory agreements because it had reviewed, among other matters, the nature, extent and quality of services being provided and, as applicable, actions taken in certain instances to improve the relationship between the costs and the quality of services being provided, on September 12, 2014, when it renewed the Agreement. On September 12, 2014, the Board concluded, in light of all factors it considered, to renew the Agreement and that the fee rate set forth in the Agreement was fair and reasonable. Among other factors considered at that meeting, the Board considered: (1) the nature, extent and quality of services provided under the Agreement; (2) the extent to which economies of scale are reflected in the fee rate schedule under the Agreement; (3) the existence of any “fall-out” benefits to the Adviser and its affiliates; (4) a comparison of the fee rate, expense ratio, and investment performance to those of similar funds; and (5) the costs incurred and profits realized by the Adviser and its affiliates with respect to their services to the Fund. A further description of the process followed by the Board in approving the Agreement on September 12, 2014, including the information reviewed, certain material factors considered and certain related conclusions reached, is set forth in the Fund’s annual report to shareholders for the period ended February 28, 2015.

On March 12, 2015, the Board, including the Independent Trustees, approved the Amended and Restated Investment Management Agreement. In analyzing whether to approve the Amended and Restated Investment Management Agreement, the Board did consider, among other things: (1) a memorandum and related materials outlining the terms of this Agreement and Management’s rationale for proposing the amendments that combine the terms of the Fund’s investment management and administrative services arrangements under a single agreement; (2) Management’s representations that, under the Amended and Restated Investment Management Agreement, there would be no change in the fees payable for the combination of advisory and administrative services provided to the Fund; (3) Management’s confirmation that the implementation of the Amended and Restated Investment Management Agreement would result in no change in the scope of services that the Adviser provides to the Fund and that the personnel who have provided administrative and advisory services to the Fund previously would continue to do so after the Amended and Restated Investment Management Agreement becomes effective; and (4) representations from Management that the combination of the Agreements better aligns the Fund’s contracts with the manner in which the Adviser and its affiliates provide such services to the Fund. In approving the amendment to the Fund’s Investment Management Agreement, different Board members may have given different weight to different individual factors and related conclusions.

TABLE OF CONTENTS

ADDITIONAL INFORMATION (Unaudited)

During the reporting period, there were no material changes in the Fund's investment objective or policies that were not approved by the shareholders or the Fund's charter or by-laws or in the principal risk factors associated with investment in the Fund. Effective August 7, 2015, Frank van Etten was removed as a portfolio manager of the Fund. The Fund may lend portfolio securities in an amount equal to up to 33 1/3% of its managed assets to broker dealers or other institutional borrowers, in exchange for cash collateral and fees. The fund may use the cash collateral in connection with the Fund's investment program as approved by the Investment Adviser, including generating cash to cover collateral posting requirements. Although the Fund has no current intention to do so, it may use the cash collateral to generate additional income. The use of cash collateral in connection with the Fund's investment program may have a leveraging effect on the Fund, which would increase the volatility of the Fund and could reduce its returns and/or cause a loss.

The Fund intends to engage in lending portfolio securities only when such lending is secured by cash or other permissible collateral in an amount at least equal to the market value of the securities loaned. The Fund will maintain cash, cash equivalents or liquid securities holdings in an amount sufficient to cover its repayment obligation with respect to the collateral, marked to market on a daily basis.

Securities lending involves the risks of delay in recovery or even loss of rights in the securities loaned if the borrower of the securities fails financially. Loans will be made only to organizations whose credit quality or claims paying ability is considered by the Sub-Adviser to be at least investment grade. The financial condition of the borrower will be monitored by the Investment Adviser on an ongoing basis. The Fund will not lend portfolio securities subject to a written American style covered call option contract. The Fund may lend portfolio securities subject to a written European style covered call option contract as long as the lending period is less than or equal to the term of the covered call option contract.

Dividend Reinvestment Plan

Unless the registered owner of Common Shares elects to receive cash by contacting Computershare Shareowner Services LLC (the "Plan Agent"), all dividends declared on Common Shares of the Fund will be automatically reinvested by the Plan Agent for shareholders in additional Common Shares of the Fund through the Fund's Dividend Reinvestment Plan (the "Plan"). Shareholders who elect not to participate in the Plan will receive all dividends and other distributions in cash paid by check mailed directly to the shareholder of record (or, if the Common Shares are held in street or other nominee name, then to such nominee) by the Plan Agent. Participation in the Plan is completely voluntary

and may be terminated or resumed at any time without penalty by notice if received and processed by the Plan Agent prior to the dividend record date; otherwise such termination or resumption will be effective with respect to any subsequently declared dividend or other distribution. Some brokers may automatically elect to receive cash on your behalf and may re-invest that cash in additional Common Shares of the Fund for you. If you wish for all dividends declared on your Common Shares of the Fund to be automatically reinvested pursuant to the Plan, please contact your broker.

The Plan Agent will open an account for each Common Shareholder under the Plan in the same name in which such Common Shareholder's Common Shares are registered. Whenever the Fund declares a dividend or other distribution (together, a "Dividend") payable in cash, non-participants in the Plan will receive cash and participants in the Plan will receive the equivalent in Common Shares. The Common Shares will be acquired by the Plan Agent for the participants' accounts, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized Common Shares from the Fund ("Newly Issued Common Shares") or (ii) by purchase of outstanding Common Shares on the open market ("Open-Market Purchases") on the NYSE or elsewhere. Open-market purchases and sales are usually made through a broker affiliated with the Plan Agent.

If, on the payment date for any Dividend, the closing market price plus estimated brokerage commissions per Common Share is equal to or greater than the NAV per Common Share, the Plan Agent will invest the Dividend amount in Newly Issued Common Shares on behalf of the participants. The number of Newly Issued Common Shares to be credited to each participant's account will be determined by dividing the dollar amount of the Dividend by the NAV per Common Share on the payment date; provided that, if the NAV is less than or equal to 95% of the closing

market value on the payment date, the dollar amount of the Dividend will be divided by 95% of the closing market price per Common Share on the payment date. If, on the payment date for any Dividend, the NAV per Common Share is greater than the closing market value plus estimated brokerage commissions, the Plan Agent will invest the Dividend amount in Common Shares acquired on behalf of the participants in Open-Market Purchases. In the event of a market discount on the payment date for any Dividend, the Plan Agent will have until the last business day before the next date on which the Common Shares trade on an “ex-dividend” basis or 30 days after the payment date for such Dividend, whichever is sooner (the “Last Purchase Date”), to invest the Dividend amount in Common Shares acquired in Open-Market Purchases.

The Fund pays quarterly Dividends. Therefore, the period during which Open-Market Purchases can be made will

TABLE OF CONTENTS

ADDITIONAL INFORMATION (Unaudited) (continued)

exist only from the payment date of each Dividend through the date before the next “ex-dividend” date, which typically will be approximately ten days.

If, before the Plan Agent has completed its Open-Market Purchases, the market price per common share exceeds the n NAV per Common Share, the average per Common Share purchase price paid by the Plan Administrator may exceed the NAV of the Common Shares, resulting in the acquisition of fewer Common Shares than if the Dividend had been paid in Newly Issued Common Shares on the Dividend payment date. Because of the foregoing difficulty with respect to Open-Market Purchases, the Plan provides that if the Plan Agent is unable to invest the full Dividend amount in Open-Market Purchases during the purchase period or if the market discount shifts to a market premium during the purchase period, the Plan Agent will cease making Open-Market Purchases and will invest the un-invested portion of the Dividend amount in Newly Issued Common Shares at the NAV per common share at the close of business on the Last Purchase Date provided that, if the NAV is less than or equal to 95% of the then current market price per Common Share, the dollar amount of the Dividend will be divided by 95% of the market price on the payment date. The Plan Agent maintains all shareholders’ accounts in the Plan and furnishes written confirmation of all transactions in the accounts, including information needed by shareholders for tax records. Common Shares in the account of each Plan participant will be held by the Plan Agent on behalf of the Plan participant, and each shareholder proxy will include those shares purchased or received pursuant to the Plan. The Plan Agent will forward all proxy solicitation materials to participants and vote proxies for shares held under the Plan in accordance with the instructions of the participants.

In the case of shareholders such as banks, brokers or nominees which hold shares for others who are the beneficial owners, the Plan Agent will administer the Plan on the basis of the number of Common Shares certified from time to time by the record shareholder’s name and held for the account of beneficial owners who participate in the Plan. There will be no brokerage charges with respect to Common Shares issued directly by the Fund. However, each participant will pay a pro rata share of brokerage commissions incurred in connection with Open-Market Purchases. The automatic reinvestment of Dividends will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such Dividends. Participants that request a partial or full sale of shares through the Plan Agent are subject to a \$15.00 sales fee and a \$0.10 per share brokerage commission on purchases or sales, and may be subject to certain other service charges.

The Fund reserves the right to amend or terminate the Plan. There is no direct service charge to participants with regard to purchases in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants.

All questions concerning the Plan or a request to terminate participation should be directed to the Fund’s Shareholder Service Department at (800) 992-0180.

KEY FINANCIAL DATES — CALENDAR 2015 DISTRIBUTIONS:

Declaration Date	Ex Date	Record Date	Payable Date
16-Mar-15	1-Apr-15	6-Apr-15	15-Apr-15
15-Jun-15	1-Jul-15	6-Jul-15	15-Jul-15
15-Sep-15	1-Oct-15	5-Oct-15	15-Oct-15
15-Dec-15	29-Dec-15	31-Dec-15	15-Jan-16

Record date will be two business days after each Ex-Dividend Date. These dates are subject to change.

Stock Data

The Fund’s common shares are traded on the NYSE (Symbol: IDE).

Repurchase of Securities by Closed-End Companies

In accordance with Section 23(c) of the 1940 Act, and Rule 23c-1 under the 1940 Act the Fund may from time to time purchase shares of beneficial interest of the Fund in the open market, in privately negotiated transactions and/or purchase shares to correct erroneous transactions.

Number of Shareholders

Edgar Filing: Voya Infrastructure, Industrials & Materials Fund - Form N-CSRS

The number of record holders of Common Stock as of August 31, 2015 was 4, which does not include approximately 10,791 beneficial owners of shares held in the name of brokers of other nominees.

Certifications

In accordance with Section 303A.12 (a) of the New York Stock Exchange Listed Company Manual, the Fund's CEO submitted the Annual CEO Certification on July 31, 2015 certifying that he was not aware, as of that date, of any violation by the Fund of the NYSE's Corporate governance listing standards. In addition, as required by Section 302 of the Sarbanes-Oxley Act of 2002 and related SEC rules, the Fund's principal executive and financial officers have made quarterly certifications, included in filings with the SEC on Forms N-CSR and N-Q, relating to, among other things, the Fund's disclosure controls and procedures and internal controls over financial reporting.

Not required for semi-annual filing.

Item 8. Portfolio Managers of Closed-End Management Investment Companies.

Not required for semi-annual filing.

Item 9. Purchases of Equity Securities by Closed-End Management Investment Company and Affiliated Purchasers.

None.

Item 10. Submission of Matters to a Vote of Security Holders.

N/A.

Item 11. Controls and Procedures.

(a) Based on our evaluation conducted within 90 days of the filing date, hereof, the design and operation of the registrant's disclosure controls and procedures are effective to ensure that material information relating to the registrant is made known to the certifying officers by others within the appropriate entities, particularly during the period in which Forms N-CSR are being prepared, and the registrant's disclosure controls and procedures allow timely preparation and review of the information for the registrant's Form N-CSR and the officer certifications of such Form N-CSR.

(b) There were no significant changes in the registrant's internal controls that occurred during the second fiscal quarter of the period covered by this report that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

Item 12. Exhibits.

(a) (1) The Code of Ethics is not required for the semi-annual filing.

(a) A separate certification for each principal executive officer and principal financial officer of the registrant as required by Rule 30a-2 under the Act (17 CFR 270.30a-2) is attached hereto as EX-99.CERT.

(a) (3) Not required for semi-annual filing.

(b) The officer certifications required by Section 906 of the Sarbanes-Oxley Act of 2002 are attached hereto as EX-99.906CERT.

Notices to the registrant's common shareholders in accordance with the order under Section 6(c) of the 1940 Act (c) granting an exemption from Section 19(b) of the 1940 Act and Rule 19b-1 under the 1940 Act, dated August 16, 2011.¹

(c)(1) 2nd Qtr 2015

(c)(2) 3rd Qtr 2015

The Fund has received exemptive relief from the Securities and Exchange Commission permitting it to make periodic distributions of long-term capital gains with respect to its outstanding common stock as frequently as twelve times each year, and as frequently as distributions are specified by or in accordance with the terms of its outstanding preferred stock. This relief is conditioned, in part, on an undertaking by the Fund to make the disclosures to the holders of the Fund's common shares, in addition to the information required by Section 198(a) of the 1940 Act and Rule 19a-1 thereunder. The Fund is likewise obligated to file with the SEC the information contained in any such notice to shareholders and, in that regard, has attached hereto copies of each such notice made during the period.
