| Common Stock, \$1.00 par value | The Nasdaq Stock Market |
| Preferred Securities of Old Second Capital Trust I | The Nasdaq Stock Market |

Securities registered pursuant to Section 12(g) of the Act:

Preferred Share Purchase Rights

(Title of Class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes
No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act.

Yes
No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days.

Yes
No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes
No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by Reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

| | |
|---|---------------------------|
| Large accelerated filer | Accelerated filer |
| Non-accelerated filer (Do not check if smaller reporting company) | Smaller reporting company |

Indicate by check mark whether the registrant is a shell company (as defined in Exchange Act Rule 12b-2).

Yes No

The aggregate market value of the voting and non-voting common equity held by non-affiliates of the registrant, on June 30, 2015, the last business day of the registrant's most recently completed second fiscal quarter, was approximately \$187.2 million. The number of shares outstanding of the registrant's common stock, par value \$1.00 per share, was 29,483,429 at March 8, 2016.

Item 1. Business

General

Old Second Bancorp, Inc. (the "Company" or the "Registrant") was organized under the laws of Delaware on September 8, 1981. It is a registered bank holding company under the Bank Holding Company Act of 1956 (the "BHCA"). The Company's office is located at 37 South River Street, Aurora, Illinois 60507.

The Company conducts a full service community banking and trust business through the following wholly owned subsidiaries, which together with the Registrant are referred to as the "Company":

- Old Second National Bank (the "Bank").
- Old Second Capital Trust I, which was formed for the exclusive purpose of issuing trust preferred securities in an offering that was completed in July 2003.
- Old Second Capital Trust II, which was formed for the exclusive purpose of issuing trust preferred securities in an offering that was completed in April 2007.
- Old Second Affordable Housing Fund, L.L.C., which was formed for the purpose of providing down payment assistance for home ownership to qualified individuals.
- A series of limited liability companies wholly owned by the Bank and formed between 2008 and 2012 to hold property acquired by the Bank through foreclosure or in the ordinary course of collecting a debt previously contracted with borrowers.
- River Street Advisors, LLC, a wholly owned subsidiary of the Bank, which was formed in May 2010 to provide investment advisory/management services.

Inter-company transactions and balances are eliminated in consolidation.

The Company provides financial services through its 24 banking locations that are located primarily in Aurora, Illinois, and its surrounding communities and throughout the Chicago metropolitan area. These locations included retail offices located in Kane, Kendall, DeKalb, DuPage, LaSalle, Will and Cook counties in Illinois as of December 31, 2015.

Business of the Company and its Subsidiaries

The Bank's full service banking businesses include the customary consumer and commercial products and services that banking institutions provide including demand, NOW, money market, savings, time deposit, individual retirement and Keogh deposit accounts; commercial, industrial, consumer and real estate lending, including installment loans, student loans, agricultural loans, lines of credit and overdraft checking; safe deposit operations; trust services; wealth management services; and an extensive variety of additional services tailored to the needs of individual customers, such as the acquisition of U.S. Treasury notes and bonds, the sale of traveler's checks, money orders, cashiers' checks and foreign currency, direct deposit, discount brokerage, debit cards, credit cards, and other special services. The Bank also offers a full complement of electronic banking services such as online and mobile banking and corporate cash management products including remote deposit capture, mobile deposit capture, investment sweep accounts, zero balance accounts, automated tax payments, ATM access, telephone banking, lockbox accounts, automated clearing house transactions, account reconciliation, controlled disbursement, detail and general information reporting, wire transfers, vault services for currency and coin, and checking accounts. Commercial and consumer loans are made to corporations, partnerships and individuals, primarily on a secured basis. Commercial lending focuses on business, capital, construction, inventory and real estate lending. Installment lending includes direct and indirect loans to consumers and commercial customers. Additionally, the Bank provides a wide range of wealth management, investment, agency, and custodial services for individual, corporate, and not-for-profit clients. These services include the administration of estates and personal trusts, as well as the management of investment accounts for individuals, employee benefit plans, and charitable foundations. The Bank also originates residential mortgages, offering a wide range of mortgage products including conventional, government, and jumbo loans. Secondary marketing of those mortgages is also handled at the Bank.

Operating segments are components of a business about which separate financial information is available and that are evaluated regularly by the Company's management in deciding how to allocate resources and assess performance. Public companies are required to report certain financial information about operating segments. The Company's management evaluates the operations of the Company as one operating segment, i.e. community banking.

Market Area

The Company's primary market area is Aurora, Illinois and its surrounding communities. The city of Aurora is located in northeastern Illinois, approximately 40 miles west of Chicago. The Bank operates primarily in Kane, Kendall, DeKalb, DuPage, LaSalle, Will and Cook counties in Illinois, and it has developed a strong presence in these counties. The Bank offers its services to retail, commercial, industrial, and public entity customers in the Aurora, North Aurora, Batavia, St. Charles, Burlington, Elburn, Elgin, Maple Park,

Table of Contents

Kaneville, Sugar Grove, Naperville, Lisle, Joliet, Yorkville, Plano, Wasco, Ottawa, Oswego, Sycamore, Frankfort, and Chicago Heights communities and surrounding areas. During 2015 the Company closed one of two branches in Batavia.

Lending Activities

The Bank provides a broad range of commercial and retail lending services to corporations, partnerships, individuals and government agencies. The Bank actively markets its services to qualified borrowers. Lending officers actively solicit the business of new borrowers entering our market areas as well as long-standing members of the local business community. The Bank has established lending policies that include a number of underwriting factors to be considered in making a loan, including location, amortization, loan to value ratio, cash flow, pricing, documentation and the credit history of the borrower. In 2015, the Bank originated approximately \$430.8 million in loans. Also in 2015, residential mortgage loans of approximately \$190.6 million (some of which were originated in 2014) were sold to third parties. The Bank's loan portfolios are comprised primarily of loans in the areas of commercial real estate, residential real estate, construction, general commercial and consumer lending. As of December 31, 2015, residential mortgages made up approximately 31% (32% at year-end 2014) of the Bank's loan portfolio, commercial real estate loans comprised approximately 53% (52% at year-end 2014), construction lending comprised approximately 2%, general commercial loans comprised approximately 12% (10% at year-end 2014), and consumer and other lending comprised less than 2%. It is the Bank's policy to comply at all times with the various consumer protection laws and regulations including, but not limited to, the Equal Credit Opportunity Act, the Fair Housing Act, the Community Reinvestment Act, the Truth in Lending Act, and the Home Mortgage Disclosure Act.

Commercial Loans. The Bank continues to focus on growing commercial and industrial prospects in its new business pipeline with positive results in 2015. As noted above, the Bank is an active commercial lender, primarily located west and south of the Chicago metropolitan area and active in other parts of the Chicago and Aurora metropolitan areas. Commercial lending reflects revolving lines of credit for working capital, lending for capital expenditures on manufacturing equipment and lending to small business manufacturers, service companies, medical and dental entities as well as specialty contractors. The Bank also has commercial and industrial loans to customers in food product manufacturing, food process and packing, machinery tooling manufacturing as well as service and technology companies. Collateral for these loans generally includes accounts receivable, inventory, equipment and real estate. In addition, the Bank may take personal guarantees to help assure repayment. Loans may be made on an unsecured basis if warranted by the overall financial condition of the borrower. Commercial term loans range principally from one to eight years with the majority falling in the one to five year range. Interest rates are primarily fixed although some have interest rates tied to the prime rate or LIBOR. In 2015, the Bank closed a meaningful amount of fixed rate loans with terms longer than four years. While management would like to continue to diversify the loan portfolio, overall demand for working capital and equipment financing continued to be muted in the Bank's primary market area in 2015.

Repayment of commercial loans is largely dependent upon the cash flows generated by the operations of the commercial enterprise. The Bank's underwriting procedures identify the sources of those cash flows and seek to match the repayment terms of the commercial loans to the sources. Secondary repayment sources are typically found in

collateralization and guarantor support.

Commercial Real Estate Loans. While management has been actively working to reduce the Bank's concentration in real estate loans, including commercial real estate loans, a large portion of the loan portfolio continues to be comprised of commercial real estate loans. As of December 31, 2015, approximately \$297.5 million, or 49.1% (50.3%, at year-end 2014) of the total commercial real estate loan portfolio of \$605.7 million was to borrowers who secured the loan with owner occupied property. A primary repayment risk for a commercial real estate loan is interruption or discontinuance of cash flows from operations. Such cash flows are usually derived from rent in the case of nonowner occupied commercial properties. Repayment could also be influenced by economic events, which may or may not be under the control of the borrower, or changes in regulations that negatively impact the future cash flow and market values of the affected properties. Repayment risk can also arise from general downward shifts in the valuations of classes of properties over a given geographic area such as the ongoing but diminished price adjustments that have been observed by the Company beginning in 2008. Property valuations could continue to be affected by changes in demand and other economic factors, which could further influence cash flows associated with the borrower and/or the property. The Bank attempts to mitigate these risks by staying apprised of market conditions and by maintaining underwriting practices that provide for adequate cash flow margins and multiple repayment sources as well as remaining in regular contact with its borrowers. In most cases, the Bank has collateralized these loans and/or has taken personal guarantees to help assure repayment. Commercial real estate loans are primarily made based on the identified cash flow of the borrower and/or the property at origination and secondarily on the underlying real estate acting as collateral. Additional credit support is provided by the borrower for most of these loans and the probability of repayment is based on the liquidation value of the real estate and enforceability of personal and corporate guarantees if any exist.

Construction Loans. The Bank's construction and development lending and related risks have greatly diminished from prior periods as the construction and development portfolio no longer dominates the Bank's commercial real estate portfolio. Loans in this category decreased from \$44.8 million at December 31, 2014, to \$19.8 million at December 31, 2015. The Bank uses underwriting and construction loan guidelines to determine whether to issue loans on build-to-suit or build out of existing borrower properties.

Construction loans are structured most often to be converted to permanent loans at the end of the construction phase or, infrequently, to be paid off upon receiving financing from another financial institution. Construction loans are generally limited to our local market area. Lending decisions have been based on the appraised value of the property as determined by an independent appraiser, an analysis

Table of Contents

of the potential marketability and profitability of the project and identification of a cash flow source to service the permanent loan or verification of a refinancing source. Construction loans generally have terms of up to 12 months, with extensions as needed. The Bank disburses loan proceeds in increments as construction progresses and as inspections warrant.

Construction loans involve additional risks. Development lending often involves the disbursement of substantial funds with repayment dependent, in part, on the success of the ultimate project rather than the ability of the borrower or guarantor to repay principal and interest. This generally involves more risk than other lending because it is based on future estimates of value and economic circumstances. While appraisals are required prior to funding, and loan advances are limited to the value determined by the appraisal, there is the possibility of an unforeseen event affecting the value and/or costs of the project. Development loans are primarily used for single-family developments, where the sale of lots and houses are tied to customer preferences and interest rates. If the borrower defaults prior to completion of the project, the Bank may be required to fund additional amounts so that another developer can complete the project. The Bank is located in an area where a large amount of development activity has occurred as rural and semi-rural areas are being suburbanized. This type of growth presents some economic risks should local demand for housing shift. The Bank addresses these risks by closely monitoring local real estate activity, adhering to proper underwriting procedures, closely monitoring construction projects, and limiting the amount of construction development lending.

Residential Real Estate Loans. Residential first mortgage loans, second mortgages, and home equity line of credit mortgages are included in this category. First mortgage loans may include fixed rate loans that are generally sold to investors. The Bank is a direct seller to the Federal National Mortgage Association (“FNMA”), Federal Home Loan Mortgage Corporation (“FHLMC”) and to several large financial institutions. The Bank typically retains servicing rights for sold mortgages. The retention of such servicing rights also allows the Bank an opportunity to have regular contact with mortgage customers and can help to solidify community involvement. Other loans that are not sold include adjustable rate mortgages, lot loans, and constructions loans that are held in the Bank’s portfolio. Residential mortgage purchase activity has reflected a moderate level of activity as the real estate market in our market area continues to stabilize. However, with continuing lower interest rates and increased stabilization in our market area, the Bank’s residential mortgage lending reflects a steady volume and mixture of both refinance and purchase financing opportunities. Home equity lending has continued to slow in the past year but is still a meaningful portion of the Bank’s business.

Consumer Loans. The Bank also provides many types of consumer loans including primarily motor vehicle, home improvement and signature loans. Consumer loans typically have shorter terms and lower balances with higher yields as compared to other loans but generally carry higher risks of default. Consumer loan collections are dependent on the borrower’s continuing financial stability and thus are more likely to be affected by adverse personal circumstances.

Competition

The Company's market area is highly competitive and the Bank's business activities require it to compete with many other financial institutions. A number of these financial institutions are affiliated with large bank holding companies headquartered outside of our principal market area as well as other institutions that are based in Aurora's surrounding communities and in Chicago, Illinois. All of these financial institutions operate banking offices in the greater Aurora area or actively compete for customers within the Company's market area. The Bank also faces competition from finance companies, insurance companies, credit unions, mortgage companies, securities brokerage firms, money market funds, loan production offices and other providers of financial services. Many of our nonbank competitors are not subject to the same extensive federal regulations that govern bank holding companies and banks, such as the Company, may have certain competitive advantages.

The Bank competes for loans principally through the quality of its client service and its responsiveness to client needs in addition to competing on interest rates and loan fees. Management believes that its long-standing presence in the community and personal one-on-one service philosophy enhances its ability to compete favorably in attracting and retaining individual and business customers. The Bank actively solicits deposit-related clients and competes for deposits by offering personal attention, competitive interest rates, and professional services made available through experienced bankers and multiple delivery channels that fit the needs of its market.

The Bank operated 24 branches in the seven counties of Kane, Kendall, LaSalle, Will, DeKalb, DuPage, and Cook County as of December 31, 2015. The financial services industry will continue to become more competitive as further technological advances enable more financial institutions to provide expanded financial services without having a physical presence in our market.

Employees

At December 31, 2015, 2014 and 2013, the Company employed 450, 485 and 492 full-time equivalent employees, respectively. Management implemented a staff reduction program in 2015 that reduced staffing levels with related severance costs and subsequent reductions in monthly compensation expenses. The Company places a high priority on staff development, which involves extensive training, including customer service training. New employees are selected on the basis of both technical skills and customer service capabilities. None of the Company's employees are covered by collective bargaining agreements.

Table of Contents

Internet

The Company maintains a corporate website at <http://www.oldsecond.com>. The Company makes available free of charge on or through its website the Annual Report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable after the Company electronically files such material with, or furnishes it to, the Securities and Exchange Commission (the "SEC"). Many of the Company's policies, committee charters and other investor information including our Code of Business Conduct and Ethics, are available on the Company's website. The Company's reports, proxy and informational statements and other information regarding the Company are available free of charge on the SEC's website (www.sec.gov). The Company will also provide copies of its filings free of charge upon written request to: J. Douglas Cheatham, Executive Vice President and Chief Financial Officer, Old Second Bancorp, Inc., 37 South River Street, Aurora, Illinois 60507.

Forward-Looking Statements: This report contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act, including with respect to management's expectations regarding future plans, strategies and financial performance, regulatory developments, industry and economic trends, and other matters. Forward-looking statements are identifiable by the inclusion of such qualifications as "expects," "intends," "believes," "may," "will," "would," "could," "should," "plan," "anticipate," "estimate," "possible," "likely" or other indications that the particular are not historical facts. Actual events and results may differ significantly from those described in such forward-looking statements, due to numerous factors, including:

- negative economic conditions that adversely affect the economy, real estate values, the job market and other factors nationally and in our market area, in each case that may affect our liquidity and the performance of our loan portfolio;
- defaults and losses on our loan portfolio;
- the financial success and viability of the borrowers of our commercial loans;
- market conditions in the commercial and residential real estate markets in our market area;
- changes U.S. monetary policy, the level and volatility of interest rates, the capital markets and other market conditions that may affect, among other things, our liquidity and the value of our assets and liabilities;
- competitive pressures in the financial services business;
- any negative perception of our reputation or financial strength;
- ability to raise additional capital on acceptable terms when needed;
- ability to use technology to provide products and services that will satisfy customer demands and create efficiencies in operations;
- adverse effects on our information technology systems resulting from failures, human error or cyberattacks;
- adverse effects of failures by our vendors to provide agreed upon services in the manner and at the cost agreed, particularly our information technology vendors;
- the impact of any claims or legal actions, including any effect on our reputation;
- losses incurred in connection with repurchases and indemnification payments related to mortgages;
- the soundness of other financial institutions;
- changes in accounting standards, rules and interpretations and the impact on our financial statements;
- our ability to receive dividends from our subsidiaries;
- a decrease in our regulatory capital ratios;

- legislative or regulatory changes, particularly changes in regulation of financial services companies;
- increased costs of compliance, heightened regulatory capital requirements and other risks associated with changes in regulation and the current regulatory environment, including the Dodd-Frank Act;
- the impact of heightened capital requirements; and
- each of the factors and risks identified under the heading “Risk Factors.”

Therefore, there can be no assurances that future actual results will correspond to these forward-looking statements. Additionally, all statements in this Form 10-K, including forward-looking statements, speak only as of the date they are made, and the Company undertakes no obligation to update any statement in light of new information or future events.

SUPERVISION AND REGULATION

General

FDIC-insured institutions, like the Bank, as well as their holding companies and their affiliates, are extensively regulated under federal and state law. As a result, the Company’s growth and earnings performance may be affected not only by management decisions and general economic conditions, but also by the requirements of federal and state statutes and by the regulations and policies of various bank regulatory agencies, including the Office of the Comptroller of the Currency (the “OCC”), the Board of Governors of the Federal Reserve System (the “Federal Reserve”), the Federal Deposit Insurance Corporation (the “FDIC”) and the Bureau of Consumer Financial Protection (the “CFPB”). Furthermore, taxation laws administered by the Internal Revenue Service and state taxing authorities, accounting rules developed by the Financial Accounting Standards Board, securities laws administered by the Securities

Table of Contents

and Exchange Commission (the “SEC”) and state securities authorities, and anti-money laundering laws enforced by the U.S. Department of the Treasury (the “Treasury”) have an impact on the business of the Company and the Bank. The effect of these statutes, regulations, regulatory policies and accounting rules are significant to the operations and results of the Company and the Bank, and the nature and extent of future legislative, regulatory or other changes affecting financial institutions are impossible to predict with any certainty.

Federal and state banking laws impose a comprehensive system of supervision, regulation and enforcement on the operations of FDIC-insured institutions, their holding companies and affiliates that is intended primarily for the protection of the FDIC-insured deposits and depositors of banks, rather than shareholders. These federal and state laws, and the regulations of the bank regulatory agencies issued under them, affect, among other things, the scope of the Company’s and the Bank’s business, the kinds and amounts of investments they may make, Bank reserve requirements, capital levels relative to assets, the nature and amount of collateral for loans, the establishment of branches, the Company’s ability to merge, consolidate and acquire, dealings with insiders and affiliates and the Bank’s payment of dividends. In the last several years, the Company and the Bank have experienced heightened regulatory requirements and scrutiny following the global financial crisis and as a result of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”). Although the reforms primarily targeted systemically important financial service providers, their influence filtered down in varying degrees to community banks over time, and the reforms have caused the Company’s compliance and risk management processes, and the costs thereof, to increase.

This supervisory and regulatory framework subjects FDIC-insured institutions and their holding companies to regular examination by their respective regulatory agencies, which results in examination reports and ratings that are not publicly available and that can impact the conduct and growth of their business. These examinations consider not only compliance with applicable laws and regulations, but also capital levels, asset quality and risk, management ability and performance, earnings, liquidity, and various other factors. The regulatory agencies generally have broad discretion to impose restrictions and limitations on the operations of a regulated entity where the agencies determine, among other things, that such operations are unsafe or unsound, fail to comply with applicable law or are otherwise inconsistent with laws and regulations or with the supervisory policies of these agencies.

The following is a summary of the material elements of the supervisory and regulatory framework applicable to the Company and the Bank, beginning with a discussion of the continuing regulatory emphasis on capital levels. It does not describe all of the statutes, regulations and regulatory policies that apply, nor does it restate all of the requirements of those that are described. The descriptions are qualified in their entirety by reference to the particular statutory and regulatory provision.

Regulatory Emphasis on Capital

Regulatory capital represents the net assets of a banking organization available to absorb losses. Because of the risks attendant to their business, FDIC-insured institutions are generally required to hold more capital than other businesses, which directly affects the Company’s earnings capabilities. Although capital has historically been one of the key measures of the financial health of banks, its role became fundamentally more important in the wake of the global financial crisis, as the banking regulators recognized that the amount and quality of capital held by banks prior to the crisis was insufficient to absorb losses during periods of severe stress. Certain provisions of the Dodd-Frank Act and Basel III, discussed below, establish strengthened capital standards for banking organizations, require more capital to be held in the form of common stock and disallow certain funds from being included in capital determinations. These standards represent regulatory capital requirements that are meaningfully more stringent than those in place previously.

Minimum Required Capital Levels. Bank holding companies have historically had to comply with less stringent capital standards than their bank subsidiaries and have been able to raise capital with hybrid instruments such as trust

preferred securities. The Dodd-Frank Act mandated that the Federal Reserve establish minimum capital levels for holding companies on a consolidated basis as stringent as those required for FDIC-insured institutions. As a consequence, the components of holding company permanent capital known as “Tier 1 Capital” were restricted to those capital instruments that were considered Tier 1 Capital for FDIC-insured institutions. A result of this change is that the proceeds of hybrid instruments, such as trust preferred securities, are being excluded from Tier 1 Capital over a phase-out period. However, if such securities were issued prior to May 19, 2010 by bank holding companies with less than \$15 billion of assets, they may be retained, subject to certain restrictions. Because the Company has assets of less than \$15 billion, the Company is able to maintain its trust preferred proceeds as Tier 1 Capital but the Company has to comply with new capital mandates in other respects and will not be able to raise Tier 1 Capital in the future through the issuance of trust preferred securities.

The capital standards for the Company and the Bank changed on January 1, 2015 to add the requirements of Basel III, discussed below. The minimum capital standards effective prior to and including December 31, 2014 are:

- A leverage requirement, consisting of a minimum ratio of Tier 1 Capital to total adjusted average quarterly assets of 3% for the most highly-rated banks with a minimum requirement of at least 4% for all others, and
- A risk-based capital requirement, consisting of a minimum ratio of Total Capital to total risk-weighted assets of 8% and a minimum ratio of Tier 1 Capital to total risk-weighted assets of 4%.

For these purposes, “Tier 1 Capital” consists primarily of common stock, noncumulative perpetual preferred stock and related surplus less intangible assets (other than certain loan servicing rights and purchased credit card relationships). Total Capital consists primarily of Tier 1 Capital plus “Tier 2 Capital,” which includes other non-permanent capital items, such as certain other debt and equity instruments that do not qualify as Tier 1 Capital, and the Bank’s allowance for loan losses, subject to a limitation of 1.25% of

Table of Contents

risk-weighted assets. Further, risk-weighted assets for the purpose of the risk-weighted ratio calculations are balance sheet assets and off-balance sheet exposures to which required risk weightings of 0% to 100% are applied.

The Basel International Capital Accords. The risk-based capital guidelines described above are based upon the 1988 capital accord known as “Basel I” adopted by the international Basel Committee on Banking Supervision, a committee of central banks and bank supervisors, as implemented by the U.S. federal banking regulators on an interagency basis. In 2008, the banking agencies collaboratively began to phase-in capital standards based on a second capital accord, referred to as “Basel II,” for large or “core” international banks (generally defined for U.S. purposes as having total assets of \$250 billion or more, or consolidated foreign exposures of \$10 billion or more). On September 12, 2010, the Group of Governors and Heads of Supervision, the oversight body of the Basel Committee on Banking Supervision, announced agreement on a strengthened set of capital requirements for banking organizations around the world, known as Basel III, to address deficiencies recognized in connection with the global financial crisis. Because of Dodd-Frank Act requirements, Basel III essentially layers a new set of capital standards on the previously existing Basel I standards.

The Basel III Rule. In July 2013, the U.S. federal banking agencies approved the implementation of the Basel III regulatory capital reforms in pertinent part, and, at the same time, promulgated rules effecting certain changes required by the Dodd-Frank Act (the “Basel III Rule”). In contrast to capital requirements historically, which were in the form of guidelines, Basel III was released in the form of regulations by each of the regulatory agencies. The Basel III Rule is applicable to all banking organizations that are subject to minimum capital requirements, including federal and state banks and savings and loan associations, as well as to bank and savings and loan holding companies, other than “small bank holding companies” (generally bank holding companies with consolidated assets of less than \$1 billion which are not publically traded companies).

The Basel III Rule not only increased most of the required minimum capital ratios effective January 1, 2015, but it introduced the concept of Common Equity Tier 1 Capital, which consists primarily of common stock, related surplus (net of treasury stock), retained earnings, and Common Equity Tier 1 minority interests subject to certain regulatory adjustments. The Basel III Rule also expanded the definition of capital by establishing more stringent criteria that instruments must meet to be considered Additional Tier 1 Capital (Tier 1 Capital in addition to Common Equity) and Tier 2 Capital. A number of instruments that qualified as Tier 1 Capital do not qualify, or their qualifications will change. For example, noncumulative perpetual preferred stock, which qualified as simple Tier 1 Capital, does not qualify as Common Equity Tier 1 Capital, but qualifies as Additional Tier 1 Capital. The Basel III Rule also constrained the inclusion of minority interests, mortgage-servicing assets, and deferred tax assets in capital and requires deductions from Common Equity Tier 1 Capital in the event that such assets exceed a certain percentage of a banking organization’s Common Equity Tier 1 Capital.

The Basel III Rule requires minimum capital ratios beginning January 1, 2015, as follows:

- A new ratio of minimum Common Equity Tier 1 equal to 4.5% of risk-weighted assets;
- An increase in the minimum required amount of Tier 1 Capital to 6% of risk-weighted assets;
- A continuation of the current minimum required amount of Total Capital (Tier 1 plus Tier 2) at 8% of risk-weighted assets; and
- A minimum leverage ratio of Tier 1 Capital to total adjusted average quarterly assets equal to 4% in all circumstances.

Not only did the capital requirements change but the risk weightings (or their methodologies) for bank assets that are used to determine the capital ratios changed as well. For nearly every class of assets, the Basel III Rule requires a more complex, detailed and calibrated assessment of credit risk and calculation of risk weightings.

Banking organizations (except for large, internationally active banking organizations) became subject to the new rules on January 1, 2015. However, there are separate phase-in/phase-out periods for: (i) the capital conservation buffer; (ii) regulatory capital adjustments and deductions; (iii) nonqualifying capital instruments; and (iv) changes to the prompt corrective action rules. The phase-in periods commenced on January 1, 2016 and extend until 2019.

Well-Capitalized Requirements. The ratios described above are minimum standards in order for banking organizations to be considered “adequately capitalized” under the Prompt Corrective Action rules discussed below. Bank regulatory agencies uniformly encourage banking organizations to hold more capital and be “well-capitalized” and, to that end, federal law and regulations provide various incentives for such organizations to maintain regulatory capital at levels in excess of minimum regulatory requirements. For example, a banking organization that is well-capitalized may: (i) qualify for exemptions from prior notice or application requirements otherwise applicable to certain types of activities; (ii) qualify for expedited processing of other required notices or applications; and (iii) accept, roll-over or renew brokered deposits. Higher capital levels could also be required if warranted by the particular circumstances or risk profiles of individual banking organizations. Moreover, the Federal Reserve’s capital guidelines contemplate that additional capital may be required to take adequate account of, among other things, interest rate risk, or the risks posed by concentrations of credit, nontraditional activities or securities trading activities. Further, any banking organization experiencing or anticipating significant growth would be expected to maintain capital ratios, including tangible capital positions (i.e., Tier 1 Capital less all intangible assets), well above the minimum levels.

Under the capital regulations of the OCC and Federal Reserve, in order to be well capitalized, a banking organization must maintain:

- A new Common Equity Tier 1 Capital ratio to risk-weighted assets of 6.5% or more;
 - A minimum ratio of Tier 1 Capital to total risk-weighted assets of 8% (6% under Basel I);

Table of Contents

- A minimum ratio of Total Capital to total risk-weighted assets of 10% (the same as Basel I); and
- A leverage ratio of Tier 1 Capital to total adjusted average quarterly assets of 5% or greater.

In addition, banking organizations that seek the freedom to make capital distributions (including for dividends and repurchases of stock) and pay discretionary bonuses to executive officers without restriction must also maintain 2.5% in Common Equity Tier 1 attributable to a capital conservation buffer to be phased in over three years beginning in 2016. The purpose of the conservation buffer is to ensure that banking organizations maintain a buffer of capital that can be used to absorb losses during periods of financial and economic stress. Factoring in the fully phased-in conservation buffer increases the minimum ratios depicted above to:

- 7% for Common Equity Tier 1,
- 8.5% for Tier 1 Capital and
- 10.5% for Total Capital.

It is possible under the Basel III Rule to be well-capitalized while remaining out of compliance with the capital conservation buffer.

As of December 31, 2015: (i) the Bank was not subject to a directive from the OCC to increase its capital and (ii) the Bank was well-capitalized, as defined by OCC regulations. As of December 31, 2015, the Company had regulatory capital in excess of the Federal Reserve's requirements and met the Basel III Rule requirements to be well-capitalized.

Prompt Corrective Action. An FDIC-insured institution's capital plays an important role in connection with regulatory enforcement as well. This regime applies to FDIC-insured institutions, not holding companies, and provides escalating powers to bank regulatory agencies as a bank's capital diminishes. Federal law provides the federal banking regulators with broad power to take prompt corrective action to resolve the problems of undercapitalized institutions. The extent of the regulators' powers depends on whether the institution in question is "adequately capitalized," "undercapitalized," "significantly undercapitalized" or "critically undercapitalized," in each case as defined by regulation. Depending upon the capital category to which an institution is assigned, the regulators' corrective powers include: (i) requiring the institution to submit a capital restoration plan; (ii) limiting the institution's asset growth and restricting its activities; (iii) requiring the institution to issue additional capital stock (including additional voting stock) or to sell itself; (iv) restricting transactions between the institution and its affiliates; (v) restricting the interest rate that the institution may pay on deposits; (vi) ordering a new election of directors of the institution; (vii) requiring dismissal of senior executive officers or directors; (viii) prohibiting the institution from accepting deposits from correspondent banks; (ix) requiring the institution to divest certain subsidiaries; (x) prohibiting the payment of principal or interest on subordinated debt; and (xi) ultimately, appointing a receiver for the institution.

Regulation and Supervision of the Company

General. The Company, as the sole shareholder of the Bank, is a bank holding company. As a bank holding company, the Company is registered with, and subject to regulation by, the Federal Reserve under the Bank Holding Company Act of 1956, as amended (the "BHCA"). The Company is legally obligated to act as a source of financial and managerial strength to the Bank and to commit resources to support the Bank in circumstances where it might not otherwise do so. The Company is subject to periodic examination by the Federal Reserve and is required to file with the Federal Reserve periodic reports of its operations and such additional information regarding its operations as the Federal Reserve may require.

Acquisitions, Activities and Change in Control. The primary purpose of a bank holding company is to control and manage banks. The BHCA generally requires the prior approval of the Federal Reserve for any merger involving a bank holding company or any acquisition by a bank holding company of another bank or bank holding company. Subject to certain conditions (including deposit concentration limits established by the BHCA), the Federal Reserve may allow a bank holding company to acquire banks located in any state of the United States. In approving interstate acquisitions, the Federal Reserve is required to give effect to applicable state law limitations on the aggregate amount of deposits that may be held by the acquiring bank holding company and its FDIC-insured institution affiliates in the state in which the target bank is located (provided that those limits do not discriminate against out-of-state institutions or their holding companies) and state laws that require that the target bank have been in existence for a minimum period of time (not to exceed five years) before being acquired by an out-of-state bank holding company. Furthermore, in accordance with the Dodd-Frank Act, bank holding companies must be well-capitalized and well-managed in order to effect interstate mergers or acquisitions. For a discussion of the capital requirements, see “Regulatory Emphasis on Capital” above.

The BHCA generally prohibits the Company from acquiring direct or indirect ownership or control of more than 5% of the voting shares of any company that is not a bank and from engaging in any business other than that of banking, managing and controlling banks or furnishing services to banks and their subsidiaries. This general prohibition is subject to a number of exceptions. The principal exception allows bank holding companies to engage in, and to own shares of companies engaged in, certain businesses found by the Federal Reserve prior to November 11, 1999 to be “so closely related to banking ... as to be a proper incident thereto.” This authority would permit the Company to engage in a variety of banking-related businesses, including the ownership and operation of a savings association, or any entity engaged in consumer finance, equipment leasing, the operation of a computer service bureau (including software development) and mortgage banking and brokerage services. The BHCA does not place territorial restrictions on the domestic activities of nonbank subsidiaries of bank holding companies.

Additionally, bank holding companies that meet certain eligibility requirements prescribed by the BHCA and elect to operate as financial holding companies may engage in, or own shares in companies engaged in, a wider range of nonbanking activities, including securities and insurance underwriting and sales, merchant banking and any other activity that the Federal Reserve, in consultation with

Table of Contents

the Secretary of the Treasury, determines by regulation or order is financial in nature or incidental to any such financial activity or that the Federal Reserve determines by order to be complementary to any such financial activity and does not pose a substantial risk to the safety or soundness of FDIC-insured institutions or the financial system generally. The Company has not elected to operate as a financial holding company.

Federal law also prohibits any person or company from acquiring “control” of an FDIC-insured depository institution or its holding company without prior notice to the appropriate federal bank regulator. “Control” is conclusively presumed to exist upon the acquisition of 25% or more of the outstanding voting securities of a bank or bank holding company, but may arise under certain circumstances between 10% and 24.99% ownership.

Capital Requirements. Bank holding companies are required to maintain capital in accordance with Federal Reserve capital adequacy requirements, as impacted by the Dodd-Frank Act and Basel III. For a discussion of capital requirements, see “—Regulatory Emphasis on Capital” above.

Dividend Payments. The Company’s ability to pay dividends to its shareholders may be affected by both general corporate law considerations and policies of the Federal Reserve applicable to bank holding companies. As a Delaware corporation, the Company is subject to the limitations of the Delaware General Corporation Law (the “DGCL”). The DGCL allows the Company to pay dividends only out of its surplus (as defined and computed in accordance with the provisions of the DGCL) or if the Company has no such surplus, out of its net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year.

As a general matter, the Federal Reserve has indicated that the board of directors of a bank holding company should eliminate, defer or significantly reduce dividends to shareholders if: (i) its net income available to shareholders for the past four quarters, net of dividends previously paid during that period, is not sufficient to fully fund the dividends; (ii) the prospective rate of earnings retention is inconsistent with its capital needs and overall current and prospective financial condition; or (iii) it will not meet, or is in danger of not meeting, its minimum regulatory capital adequacy ratios. The Federal Reserve also possesses enforcement powers over bank holding companies and their non-bank subsidiaries to prevent or remedy actions that represent unsafe or unsound practices or violations of applicable statutes and regulations. Among these powers is the ability to proscribe the payment of dividends by banks and bank holding companies. In addition, under the Basel III Rule, institutions that seek the freedom to pay dividends will have to maintain 2.5% in Common Equity Tier 1 attributable to the capital conservation buffer to be phased in over three years beginning in 2016. See “—Regulatory Emphasis on Capital” above.

Monetary Policy. The monetary policy of the Federal Reserve has a significant effect on the operating results of financial or bank holding companies and their subsidiaries. Among the tools available to the Federal Reserve to affect the money supply are open market transactions in U.S. government securities, changes in the discount rate on bank borrowings and changes in reserve requirements against bank deposits. These means are used in varying combinations to influence overall growth and distribution of bank loans, investments and deposits, and their use may affect interest rates charged on loans or paid on deposits.

Federal Securities Regulation. The Company’s common stock is registered with the SEC under the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Consequently, the Company is subject to the information, proxy solicitation, insider trading and other restrictions and requirements of the SEC under the Exchange Act.

Corporate Governance. The Dodd-Frank Act addressed many investor protection, corporate governance and executive compensation matters that will affect most U.S. publicly traded companies. The Dodd-Frank Act increased stockholder influence over boards of directors by requiring companies to give stockholders a non-binding vote on executive compensation and so-called “golden parachute” payments, and authorizing the SEC to promulgate rules that would allow stockholders to nominate and solicit voters for their own candidates using a company’s proxy

materials. The legislation also directed the Federal Reserve to promulgate rules prohibiting excessive compensation paid to executives of bank holding companies, regardless of whether such companies are publicly traded.

Regulation and Supervision of the Bank

General. The Bank is a national bank, chartered by the OCC under the National Bank Act. The deposit accounts of the Bank are insured by the FDIC's Deposit Insurance Fund (the "DIF") to the maximum extent provided under federal law and FDIC regulations, and the Bank is a member of the Federal Reserve System. As a national bank, the Bank is subject to the examination, supervision, reporting and enforcement requirements of the OCC. The FDIC, as administrator of the DIF, also has regulatory authority over the Bank.

Deposit Insurance. As an FDIC-insured institution, the Bank is required to pay deposit insurance premium assessments to the FDIC. The FDIC has adopted a risk-based assessment system whereby FDIC-insured institutions pay insurance premiums at rates based on their risk classification. An institution's risk classification is assigned based on its capital levels and the level of supervisory concern the institution poses to the regulators. For deposit insurance assessment purposes, an FDIC-insured institution is placed in one of four risk categories each quarter. An institution's assessment is determined by multiplying its assessment rate by its assessment base. In 2015 the total base assessment rates range from 2.5 basis points to 45 basis points. The assessment base is calculated using average consolidated total assets minus average tangible equity. At least semi-annually, the FDIC will update its loss and income projections for the DIF and, if needed, will increase or decrease the assessment rates, following notice and comment on proposed rulemaking.

Amendments to the Federal Deposit Insurance Act revised the assessment base against which an FDIC-insured institution's deposit insurance premiums paid to the DIF are calculated to be its average consolidated total assets less its average tangible equity. This change shifted the burden of deposit insurance premiums toward those large depository institutions that rely on funding sources other than U.S. deposits. Additionally, the Dodd-Frank Act altered the minimum designated reserve ratio of the DIF, increasing the

Table of Contents

minimum from 1.15% to 1.35% of the estimated amount of total insured deposits and eliminating the requirement that the FDIC pay dividends to FDIC-insured institutions. In lieu of dividends, the FDIC has adopted progressively lower assessment rate schedules that will take effect when the reserve ratio exceeds 1.15%, 2%, and 2.5%. As a consequence, premiums will decrease once the 1.15% threshold is exceeded. The FDIC has until September 3, 2020 to meet the 1.35% reserve ratio target. Several of these provisions could increase the Bank's FDIC deposit insurance premiums.

The Dodd-Frank Act also permanently established the maximum amount of deposit insurance for banks, savings institutions and credit unions to \$250,000 per insured depositor.

FICO Assessments. In addition to paying basic deposit insurance assessments, FDIC-insured institutions must pay Financing Corporation ("FICO") assessments. FICO is a mixed-ownership governmental corporation chartered by the former Federal Home Loan Bank Board pursuant to the Competitive Equality Banking Act of 1987 to function as a financing vehicle for the recapitalization of the former Federal Savings and Loan Insurance Corporation. FICO issued 30-year noncallable bonds of approximately \$8.1 billion that mature in 2017 through 2019. FICO's authority to issue bonds ended on December 12, 1991. Since 1996, federal legislation has required that all FDIC-insured institutions pay assessments to cover interest payments on FICO's outstanding obligations. The FICO assessment rate is adjusted quarterly and for the fourth quarter of 2015 was 0.60 basis points (60 cents per \$100 dollars of assessable deposits).

Supervisory Assessments. National banks are required to pay supervisory assessments to the OCC to fund the operations of the OCC. The amount of the assessment is calculated using a formula that takes into account the bank's size and its supervisory condition. During the year ended December 31, 2015, the Bank paid supervisory assessments to the OCC totaling \$425,000.

Capital Requirements. Banks are generally required to maintain capital levels in excess of other businesses. For a discussion of capital requirements, see "—Regulatory Emphasis on Capital" above.

Liquidity Requirements. Liquidity is a measure of the ability and ease with which assets may be converted to cash. Liquid assets are those that can be converted to cash quickly if needed to meet financial obligations. To remain viable, FDIC-insured institutions must have enough liquid assets to meet their near-term obligations, such as withdrawals by depositors. Because the global financial crisis was in part a liquidity crisis, Basel III also includes a liquidity framework that requires FDIC-insured institutions to measure their liquidity against specific liquidity tests. One test, referred to as the Liquidity Coverage Ratio ("LCR"), is designed to ensure that the institution has an adequate stock of unencumbered high-quality liquid assets that can be converted easily and immediately in private markets into cash to meet liquidity needs for a 30-calendar day liquidity stress scenario. The other test, known as the Net Stable Funding Ratio, is designed to promote more medium- and long-term funding of the assets and activities of institutions over a one-year horizon. These tests provide an incentive for institutions to increase their holdings in Treasury securities and other sovereign debt as a component of assets, increase the use of long-term debt as a funding source and rely on stable funding like core deposits (in lieu of brokered deposits).

In addition to liquidity guidelines already in place, the U.S. bank regulatory agencies implemented the Basel III LCR in September 2014, which requires large financial firms to hold levels of liquid assets sufficient to protect against constraints on their funding during times of financial turmoil. While the LCR only applies to the largest banking organizations in the country, certain elements are expected to filter down to all FDIC-insured institutions. The Bank is reviewing its liquidity risk management policies in light of the LCR and NSFR.

Stress Testing. A stress test is an analysis or simulation designed to determine the ability of a given FDIC-insured institution to deal with an economic crisis. In October 2012, U.S. bank regulators unveiled new rules mandated by the Dodd-Frank Act that require the largest U.S. banks to undergo stress tests twice per year, once internally and once

conducted by the regulators, and began recommending portfolio stress testing as a sound risk management practice for community banks. Although stress tests are not officially required for banks with less than \$10 billion in assets, they have become part of annual regulatory exams even for banks small enough to be officially exempted from the process. The OCC now recommends stress testing as means to identify and quantify loan portfolio risk and the Bank has begun the process.

Dividend Payments. The primary source of funds for the Company is dividends from the Bank. Under the National Bank Act, a national bank may pay dividends out of its undivided profits in such amounts and at such times as the bank's board of directors deems prudent. Without prior OCC approval, however, a national bank may not pay dividends in any calendar year that, in the aggregate, exceed the bank's year-to-date net income plus the bank's retained net income for the two preceding years. In addition, under the Basel III Rule, institutions that seek the freedom to pay dividends will have to maintain 2.5% in Common Equity Tier 1 attributable to the capital conservation buffer to be phased in over three years beginning in 2016. See "Regulatory Emphasis on Capital" above.

Insider Transactions. The Bank is subject to certain restrictions imposed by federal law on "covered transactions" between the Bank and its "affiliates." The Company is an affiliate of the Bank for purposes of these restrictions, and covered transactions subject to the restrictions include extensions of credit to the Company, investments in the stock or other securities of the Company and the acceptance of the stock or other securities of the Company as collateral for loans made by the Bank. The Dodd-Frank Act enhanced the requirements for certain transactions with affiliates, including an expansion of the definition of "covered transactions" and an increase in the amount of time for which collateral requirements regarding covered transactions must be maintained.

Limitations and reporting requirements are also placed on extensions of credit by the Bank to its directors and officers, to directors and officers of the Company and its subsidiaries, to principal shareholders of the Company and to "related interests" of such directors, officers and principal shareholders. In addition, federal law and regulations may affect the terms upon which any person who is a

Table of Contents

director or officer of the Company or the Bank, or a principal shareholder of the Company, may obtain credit from banks with which the Bank maintains a correspondent relationship.

Safety and Soundness Standards/Risk Management. The federal banking agencies have adopted guidelines that establish operational and managerial standards to promote the safety and soundness of FDIC-insured institutions. The guidelines set forth standards for internal controls, information systems, internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth, compensation, fees and benefits, asset quality and earnings.

In general, the safety and soundness guidelines prescribe the goals to be achieved in each area, and each institution is responsible for establishing its own procedures to achieve those goals. If an institution fails to comply with any of the standards set forth in the guidelines, the FDIC-insured institution's primary federal regulator may require the institution to submit a plan for achieving and maintaining compliance. If an FDIC-insured institution fails to submit an acceptable compliance plan, or fails in any material respect to implement a compliance plan that has been accepted by its primary federal regulator, the regulator is required to issue an order directing the institution to cure the deficiency. Until the deficiency cited in the regulator's order is cured, the regulator may restrict the FDIC-insured institution's rate of growth, require the FDIC-insured institution to increase its capital, restrict the rates the institution pays on deposits or require the institution to take any action the regulator deems appropriate under the circumstances. Noncompliance with the standards established by the safety and soundness guidelines may also constitute grounds for other enforcement action by the federal bank regulatory agencies, including cease and desist orders and civil money penalty assessments.

During the past decade, the bank regulatory agencies have increasingly emphasized the importance of sound risk management processes and strong internal controls when evaluating the activities of the FDIC-insured institutions they supervise. Properly managing risks has been identified as critical to the conduct of safe and sound banking activities and has become even more important as new technologies, product innovation, and the size and speed of financial transactions have changed the nature of banking markets. The agencies have identified a spectrum of risks facing a banking institution including, but not limited to, credit, market, liquidity, operational, legal, and reputational risk. In particular, recent regulatory pronouncements have focused on operational risk, which arises from the potential that inadequate information systems, operational problems, breaches in internal controls, fraud, or unforeseen catastrophes will result in unexpected losses. New products and services, third-party risk management and cybersecurity are critical sources of operational risk that FDIC-insured institutions are expected to address in the current environment. The Bank is expected to have active board and senior management oversight; adequate policies, procedures, and limits; adequate risk measurement, monitoring, and management information systems; and comprehensive internal controls.

Branching Authority. National banks headquartered in Illinois, such as the Bank, have the same branching rights in Illinois as banks chartered under Illinois law, subject to OCC approval. Illinois law grants Illinois-chartered banks the authority to establish branches anywhere in the State of Illinois, subject to receipt of all required regulatory approvals.

Federal law permits state and national banks to merge with banks in other states subject to: (i) regulatory approval; (ii) federal and state deposit concentration limits; and (iii) state law limitations requiring the merging bank to have been in existence for a minimum period of time (not to exceed five years) prior to the merger. The establishment of new interstate branches or the acquisition of individual branches of a bank in another state (rather than the acquisition of an out-of-state bank in its entirety) has historically been permitted only in those states the laws of which expressly authorize such expansion. However, the Dodd-Frank Act permits well-capitalized and well-managed banks to establish new branches across state lines without these impediments.

Financial Subsidiaries. Under federal law and OCC regulations, national banks are authorized to engage, through "financial subsidiaries," in any activity that is permissible for a financial holding company and any activity that the

Secretary of the Treasury, in consultation with the Federal Reserve, determines is financial in nature or incidental to any such financial activity, except (i) insurance underwriting, (ii) real estate development or real estate investment activities (unless otherwise permitted by law), (iii) insurance company portfolio investments and (iv) merchant banking. The authority of a national bank to invest in a financial subsidiary is subject to a number of conditions, including, among other things, requirements that the bank must be well-managed and well-capitalized (after deducting from capital the bank's outstanding investments in financial subsidiaries). The Bank has not applied for approval to establish any financial subsidiaries.

Federal Home Loan Bank System. The Bank is a member of the Federal Home Loan Bank of Chicago (the "FHLB"), which serves as a central credit facility for its members. The FHLB is funded primarily from proceeds from the sale of obligations of the FHLB system. It makes loans to member banks in the form of FHLB advances. All advances from the FHLB are required to be fully collateralized as determined by the FHLB.

Transaction Account Reserves. Federal Reserve regulations require FDIC-insured institutions to maintain reserves against their transaction accounts (primarily NOW and regular checking accounts). For 2016: the first \$15.2 million of otherwise reservable balances are exempt from reserves and have a zero percent reserve requirement; for transaction accounts aggregating more than \$15.2 million to \$110.2 million, the reserve requirement is 3% of total transaction accounts; and for net transaction accounts in excess of \$110.2 million, the reserve requirement is 3% up to \$110.2 million plus 10% of the aggregate amount of total transaction accounts in excess of \$110.2 million. These reserve requirements are subject to annual adjustment by the Federal Reserve.

Community Reinvestment Act Requirements. The Community Reinvestment Act requires the Bank to have a continuing and affirmative obligation in a safe and sound manner to help meet the credit needs of its entire community, including low- and moderate-income neighborhoods. Federal regulators regularly assess the Bank's record of meeting the credit needs of its communities.

Table of Contents

Applications for additional acquisitions would be affected by the evaluation of the Bank's effectiveness in meeting its Community Reinvestment Act requirements.

Anti-Money Laundering. The Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (the "USA Patriot Act"), along with anti-money laundering and bank secrecy laws ("AML-BSA"), are designed to deny terrorists and criminals the ability to obtain access to the U.S. financial system and has significant implications for FDIC-insured institutions, brokers, dealers and other businesses involved in the transfer of money. The laws mandate financial services companies to have policies and procedures with respect to measures designed to address any or all of the following matters: (i) customer identification and ongoing due diligence programs; (ii) money laundering; (iii) terrorist financing; (iv) identifying and reporting suspicious activities and currency transactions; (v) currency crimes; and (vi) cooperation among FDIC-insured institutions and law enforcement authorities.

Concentrations in Commercial Real Estate. Concentration risk exists when FDIC-insured institutions deploy too many assets to any one industry or segment. A concentration in commercial real estate is one example of regulatory concern. The interagency Concentrations in Commercial Real Estate Lending, Sound Risk Management Practices guidance ("CRE Guidance") provides supervisory criteria, including the following numerical indicators, to assist bank examiners in identifying banks with potentially significant commercial real estate loan concentrations that may warrant greater supervisory scrutiny: (i) commercial real estate loans exceeding 300% of capital and increasing 50% or more in the preceding three years; or (ii) construction and land development loans exceeding 100% of capital. The CRE Guidance does not limit banks' levels of commercial real estate lending activities, but rather guides institutions in developing risk management practices and levels of capital that are commensurate with the level and nature of their commercial real estate concentrations. On December 18, 2015, the federal banking agencies issued a statement to reinforce prudent risk-management practices related to CRE lending, having observed substantial growth in many CRE asset and lending markets, increased competitive pressures, rising CRE concentrations in banks, and an easing of CRE underwriting standards. The federal bank agencies reminded FDIC-insured institutions to maintain underwriting discipline and exercise prudent risk-management practices to identify, measure, monitor, and manage the risks arising from CRE lending. In addition, FDIC-insured institutions must maintain capital commensurate with the level and nature of their CRE concentration risk based on the Bank's loan portfolio as of December 31, 2015.

Consumer Financial Services. The historical structure of federal consumer protection regulation applicable to all providers of consumer financial products and services changed significantly on July 21, 2011, when the CFPB commenced operations to supervise and enforce consumer protection laws. The CFPB has broad rulemaking authority for a wide range of consumer protection laws that apply to all providers of consumer products and services, including the Bank, as well as the authority to prohibit "unfair, deceptive or abusive" acts and practices. The CFPB has examination and enforcement authority over providers with more than \$10 billion in assets. FDIC-insured institutions with \$10 billion or less in assets, like the Bank, continue to be examined by their applicable bank regulators.

Because abuses in connection with residential mortgages were a significant factor contributing to the global financial crisis, many new rules issued by the CFPB and required by the Dodd-Frank Act address mortgage and mortgage-related products, their underwriting, origination, servicing and sales. The Dodd-Frank Act significantly expanded underwriting requirements applicable to loans secured by 1-4 family residential real property and augmented federal law combating predatory lending practices. In addition to numerous disclosure requirements, the Dodd Frank Act imposed new standards for mortgage loan originations on all lenders, including all FDIC-insured institutions, in an effort to strongly encourage lenders to verify a borrower's "ability to repay," while also establishing a presumption of compliance for certain "qualified mortgages." In addition, the Dodd-Frank Act generally required lenders or securitizers to retain an economic interest in the credit risk relating to loans that the lender sells, and other asset backed securities that the securitizer issues, if the loans have not complied with the ability-to-repay standards. The Bank does not currently expect the CFPB's rules to have a significant impact on the Company's operations, except

for higher compliance costs.

GUIDE 3 STATISTICAL DATA REQUIREMENTS

The statistical data required by Guide 3 of the Guides for Preparation and Filing of Reports and Registration Statements under the Securities Exchange Act of 1934 is set forth in the following pages. This data should be read in conjunction with the consolidated financial statements, related notes and "Management's Discussion and Analysis of Financial Condition and Results of Operations" as set forth in Part II Items 7 and 8. All dollars in the tables are expressed in thousands.

13

Table of Contents

I. Distribution of Assets, Liabilities and Stockholders' Equity; Interest Rate and Interest Differential.

The following table sets forth certain information relating to the Company's average consolidated balance sheets and reflects the yield on average earning assets and cost of average liabilities for the years indicated. Dividing the related interest by the average balance of assets or liabilities derives rates. Average balances are derived from daily balances.

ANALYSIS OF AVERAGE BALANCES,

TAX EQUIVALENT INTEREST AND RATES

Years ended December 31, 2015, 2014 and 2013

| | 2015 Average Balance | Interest | Rate % | 2014 Average Balance | Interest | Rate % | 2013 Average Balance | Interest | Rate % |
|---|----------------------------|----------|-----------|----------------------------|----------|-----------|----------------------------|----------|-----------|

| Interest bearing liabilities to earning assets | 78.83 | % | 80.47 | % | 83.59 | % |
|--|-------|---|-------|---|-------|---|

1. Interest income from loans is shown tax equivalent as discussed below and includes fees of \$1.8 million, \$2.3 million and \$2.5 million for 2015, 2014 and 2013, respectively. Nonaccrual loans are included in the above stated average balances.

Notes: For purposes of discussion, net interest income and net interest income to earning assets have been adjusted to a non-GAAP tax equivalent ("TE") basis using a marginal rate of 35% to more appropriately compare returns on tax-exempt loans and securities to other earning assets. The table below provides a reconciliation of each non-GAAP TE measure to the GAAP equivalent:

| | Effect of Tax Equivalent Adjustment | | | | | |
|---|-------------------------------------|-----------|-----------|---|------|---|
| | 2015 | 2014 | 2013 | | | |
| Interest income (GAAP) | \$ 68,164 | \$ 68,044 | \$ 69,040 | | | |
| Taxable equivalent adjustment - loans | 103 | 111 | 68 | | | |
| Taxable equivalent adjustment - securities | 292 | 255 | 317 | | | |
| Interest income (TE) | 68,559 | 68,410 | 69,425 | | | |
| Less: interest expense (GAAP) | 9,076 | 10,984 | 13,786 | | | |
| Net interest income (TE) | \$ 59,483 | \$ 57,426 | \$ 55,639 | | | |
| Net interest income (GAAP) | \$ 59,088 | \$ 57,060 | \$ 55,254 | | | |
| Average interest earning assets | 1,842,644 | 1,797,985 | 1,761,681 | | | |
| Net interest income to total interest earning assets | 3.21 | % | 3.17 | % | 3.14 | % |
| Net interest income to total interest earning assets (TE) | 3.23 | % | 3.19 | % | 3.16 | % |

Table of Contents

The following table allocates the changes in net interest income to changes in either average balances or average rates for earnings assets and interest bearing liabilities. Interest income is measured on a tax-equivalent basis using a 35% rate as per the note to the analysis of average balance table on the preceding page.

Analysis of Year-to-Year Changes in Net Interest Income

| | 2015 Compared to 2014 | | | 2014 Compared to 2013 | | |
|---|-------------------------------------|-----------------|-----------------|-------------------------------------|-----------------|-----------------|
| | Change Due to Average Balance | Average Rate | Total Change | Change Due to Average Balance | Average Rate | Total Change |
| EARNING ASSETS/INTEREST INCOME | | | | | | |
| Interest bearing deposits | \$ (22) | \$ 4 | \$ (18) | \$ (41) | \$ 6 | \$ (35) |
| Securities: | | | | | | |
| Taxable | 845 | (939) | (94) | 621 | 1,818 | 2,439 |
| Tax-exempt | 189 | (82) | 107 | 136 | (313) | (177) |
| Dividends from Reserve Bank and FHLBC stock | 78 | (81) | (3) | (17) | 22 | 5 |
| Loans and loans held-for-sale | 937 | (780) | 157 | 1,106 | (4,353) | (3,247) |
| TOTAL EARNING ASSETS | 2,027 | (1,878) | 149 | 1,805 | (2,820) | (1,015) |

| Notes payable and other borrowings | - | (9) | (9) | - | - | - |
| INTEREST BEARING LIABILITIES | (300) | (1,608) | (1,908) | (601) | (2,201) | (2,802) |
| NET INTEREST INCOME | \$ 2,327 | \$ (270) | \$ 2,057 | \$ 2,406 | \$ (619) | \$ 1,787 |

II. Investment Portfolio

The following table presents the composition of the securities portfolio by major category as of December 31 of each year indicated:

Securities Portfolio Composition

| | 2015 | | 2014 | | 2013 | |
|--|-------------------|-------------------|-------------------|-------------------|-------------------|-------------------|
| | Amortized Cost | Fair Value | Amortized Cost | Fair Value | Amortized Cost | Fair Value |
| Securities Available-For-Sale | | | | | | |
| U.S. Treasury | \$ 1,509 | \$ 1,509 | \$ 1,529 | \$ 1,527 | \$ 1,549 | \$ 1,544 |
| U.S. government agencies | 1,683 | 1,556 | 1,711 | 1,624 | 1,738 | 1,672 |
| U.S. government agency mortgage-backed | 2,040 | 1,996 | - | - | - | - |
| States and political subdivisions | 30,341 | 30,526 | 21,682 | 22,018 | 16,382 | 16,794 |
| Corporate bonds | 30,157 | 29,400 | 31,243 | 30,985 | 15,733 | 15,102 |
| Collateralized mortgage obligations | 68,743 | 66,920 | 65,728 | 63,627 | 66,766 | 63,876 |
| Asset-backed securities | 241,872 | 231,908 | 175,565 | 173,496 | 274,118 | 273,203 |
| Collateralized loan obligations | 94,374 | 92,251 | 94,236 | 92,209 | - | - |
| Total Securities Available-For-Sale | \$ 470,719 | \$ 456,066 | \$ 391,694 | \$ 385,486 | \$ 376,286 | \$ 372,191 |
| Held-To-Maturity | | | | | | |
| U.S. government agency mortgage-backed | \$ 36,505 | \$ 38,097 | \$ 37,125 | \$ 39,155 | \$ 35,268 | \$ 35,240 |
| Collateralized mortgage obligations | 211,241 | 213,578 | 222,545 | 224,111 | 221,303 | 219,088 |
| Total Held-To-Maturity | \$ 247,746 | \$ 251,675 | \$ 259,670 | \$ 263,266 | \$ 256,571 | \$ 254,328 |

The Company's holdings of U.S. government agency and U.S. government agency mortgage-backed securities are comprised of government-sponsored enterprises, such as Fannie Mae, Freddie Mac and the FHLB, which are not backed by the full faith and credit of the U.S. government.

Table of Contents

Securities Portfolio Maturity and Yields

The following table presents the expected maturities or call dates and weighted average yield (nontax equivalent) of securities by major category as of December 31, 2015. Securities not due at a single maturity date are shown only in the total column.

| | Within One Year | | After One But Within Five Years | | After Five But Within Ten Years | | After Ten Years | | Total | |

Edgar Filing: OLD SECOND BANCORP INC - Form 10-K

As of December 31, 2015, net unrealized losses on available-for-sale securities and net losses not accreted on securities transferred from available-for-sale to held-to-maturity was \$20.6 million, which offset by deferred income taxes resulted in an overall reduction to equity capital of \$12.3 million. As of December 31, 2014, net unrealized losses on available-for-sale securities and net losses not accreted on securities transferred from available-for-sale to held-to-maturity was \$13.1 million, which offset by deferred income taxes resulted in an overall reduction to equity capital of \$7.7 million.

At December 31, 2015, there were three issuers of securities where the book value of the Company's holdings were greater than 10% of stockholders' equity. Issuers of Securities with an aggregate book value greater than 10% of stockholders equity at December 31, 2015, were as follows;

| Issuer | December 31, 2015 | |
|---------------------------------|-------------------|------------|
| | Amortized Cost | Fair Value |
| College Loan Corporation | \$ 73,293 | \$ 70,254 |
| Nelnet Student Loan | 23,359 | 23,291 |
| GCO Education Loan Funding Corp | 37,508 | 35,263 |

III. Loan Portfolio

Types of Loans

The following table presents the composition of the loan portfolio at December 31 for the years indicated:

| | 2015 | 2014 | 2013 | 2012 | 2011 |
|-----------------------------|--------------|--------------|--------------|--------------|--------------|
| Commercial | \$ 131,102 | \$ 119,717 | \$ 95,211 | \$ 87,136 | \$ 98,241 |
| Real estate - commercial | 605,721 | 600,629 | 560,233 | 579,687 | 704,415 |
| Real estate - construction | 19,806 | 44,795 | 29,351 | 42,167 | 70,919 |
| Real estate - residential | 350,557 | 369,870 | 389,931 | 414,141 | 477,196 |
| Consumer | 4,963 | 4,004 | 3,040 | 3,414 | 4,172 |
| Overdraft | 483 | 649 | 628 | 994 | 457 |
| Lease Financing Receivables | 10,953 | 8,038 | 10,069 | 6,060 | 2,087 |
| Other | 10,130 | 11,630 | 12,793 | 16,451 | 11,498 |
| Gross loans | 1,133,715 | 1,159,332 | 1,101,256 | 1,150,050 | 1,368,985 |
| Allowance for loan losses | (16,223) | (21,637) | (27,281) | (38,597) | (51,997) |
| Loans, net | \$ 1,117,492 | \$ 1,137,695 | \$ 1,073,975 | \$ 1,111,453 | \$ 1,316,988 |

The above loan totals include deferred loan fees and costs.

16

Table of Contents

Maturity and Rate Sensitivity of Loans to Changes in Interest Rates

The following table sets forth the remaining contractual maturities for certain loan categories at December 31, 2015:

| | One Year or Less | Over 1 Year Through 5 Years | | Over 5 Years | | Total |
|-----------------------------|---------------------|--------------------------------|------------------|---------------|------------------|--------------|
| | | Fixed Rate | Floating Rate | Fixed Rate | Floating Rate | |
| Commercial | \$ 45,692 | \$ 39,676 | \$ 30,387 | \$ 12,793 | \$ 2,554 | \$ 131,102 |
| Real estate - commercial | 33,246 | 392,302 | 42,731 | 73,219 | 64,223 | 605,721 |
| Real estate - construction | 6,056 | 9,107 | 637 | 1,754 | 2,252 | 19,806 |
| Real estate - residential | 22,933 | 66,450 | 52,591 | 34,489 | 174,094 | 350,557 |
| Consumer | 714 | 3,374 | 764 | 111 | - | 4,963 |
| Overdraft | 483 | - | - | - | - | 483 |
| Lease financing receivables | 73 | 7,208 | - | 3,672 | - | 10,953 |
| Other | 2,576 | 416 | 6,249 | 189 | 700 | 10,130 |
| Total | \$ 111,773 | \$ 518,533 | \$ 133,359 | \$ 126,227 | \$ 243,823 | \$ 1,133,715 |

The above loan total includes deferred loan fees and costs; column one includes demand notes.

While there are no significant concentrations of loans where the customers' ability to honor loan terms is dependent upon a single economic sector, the real estate related categories represented 86.1% and 87.6% of the portfolio at December 31, 2015 and 2014, respectively. The Company had no concentration of loans exceeding 10% of total loans that were not otherwise disclosed as a category of loans at December 31, 2015.

Risk Elements

The following table sets forth the amounts of nonperforming assets at December 31 of the years indicated:

| | 2015 | 2014 | 2013 | 2012 | 2011 |
|------------------|-----------|-----------|-----------|-----------|------------|
| Nonaccrual loans | \$ 14,389 | \$ 26,926 | \$ 38,911 | \$ 77,519 | \$ 126,786 |
| | 165 | 154 | 796 | 4,987 | 11,839 |

| | | | | | |
|---|-----------|-----------|-----------|------------|------------|
| Nonperforming Troubled debt restructured loans accruing interest | | | | | |
| Loans past due 90 days or more and still accruing interest | 65 | - | 87 | 89 | 318 |
| Total nonperforming loans | 14,619 | 27,080 | 39,794 | 82,595 | 138,943 |
| Other real estate owned | 19,141 | 31,982 | 41,537 | 72,423 | 93,290 |
| Total nonperforming assets | \$ 33,760 | \$ 59,062 | \$ 81,331 | \$ 155,018 | \$ 232,233 |

| | | | | | | | | | | |
|--|------|---|------|---|------|---|------|---|------|---|
| Other real estate owned ("OREO") as % of nonperforming assets | 56.7 | % | 54.1 | % | 51.1 | % | 46.7 | % | 40.2 | % |
|--|------|---|------|---|------|---|------|---|------|---|

Accrual of interest is discontinued on a loan when principal or interest is ninety days or more past due, unless the loan is well secured and in the process of collection. When a loan is placed on nonaccrual status, interest previously accrued but not collected in the current period is reversed against current period interest income. Interest income of approximately \$116,000, \$511,000 and \$333,000 was recorded and collected during 2015, 2014 and 2013, respectively, on loans that subsequently went to nonaccrual status by year-end. Interest income, which would have been recognized during 2015, 2014 and 2013, had these loans been on an accrual basis throughout the year, was approximately \$815,000, \$1.8 million and \$3.0 million respectively. There were approximately \$4.4 million and \$4.8 million in restructured residential mortgage loans that were still accruing interest based upon their prior performance history at December 31, 2015 and 2014, respectively. Additionally, the nonaccrual loans above include \$2.9 million and \$5.1 million in restructured loans for the period ending December 31, 2015 and 2014, respectively.

Potential Problem Loans

The Company utilizes an internal asset classification system as a means of reporting problem and potential problem assets. At the scheduled board of directors meetings of the Bank, loan listings are presented, which show significant loan relationships listed as "Special Mention," "Substandard," and "Doubtful." Loans classified as Substandard include those that have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected. Assets classified as Doubtful have all the weaknesses inherent as those classified Substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. Assets that do not currently expose us to sufficient risk to warrant classification in one of the aforementioned categories, but possess weaknesses that deserve management's close attention, are deemed to be Special Mention.

Management defines potential problem loans as performing loans rated Substandard that do not meet the definition of a nonperforming loan. These potential problem loans carry a higher probability of default and require additional attention by management. A more detailed description of these loans can be found in Note 4 to the Financial Statements.

IV. Summary of Loan Loss Experience

Analysis of Allowance for Loan Losses

The following table summarizes, for the years indicated, activity in the allowance for loan losses, including amounts charged-off, amounts of recoveries, additions to the allowance charged to operating expense, and the ratio of net charge-offs to average loans outstanding:

| | 2015 | 2014 | 2013 | 2012 | 2011 |
|--|--------------|--------------|--------------|--------------|--------------|
| Average total loans (exclusive of loans held-for-sale) | \$ 1,144,618 | \$ 1,124,335 | \$ 1,102,197 | \$ 1,263,172 | \$ 1,527,311 |
| Allowance at beginning of year | 21,637 | 27,281 | 38,597 | 51,997 | 76,308 |
| Charge-offs: | | | | | |
| Commercial | 993 | 578 | 316 | 344 | 366 |
| Real estate - commercial | 1,653 | 1,972 | 2,985 | 13,508 | 19,576 |
| Real estate - construction | 2 | 174 | 1,014 | 4,969 | 10,430 |
| Real estate - residential | 1,639 | 3,393 | 6,293 | 8,406 | 10,229 |
| Consumer and other loans | 483 | 526 | 597 | 638 | 568 |
| Total charge-offs | 4,770 | 6,643 | 11,205 | 27,865 | 41,169 |
| Recoveries: | | | | | |
| Commercial | 451 | 58 | 119 | 115 | 173 |
| Real estate - commercial | 1,595 | 1,346 | 5,325 | 3,576 | 3,947 |
| Real estate - construction | 276 | 633 | 1,266 | 3,420 | 1,262 |
| Real estate - residential | 1,075 | 1,842 | 1,221 | 583 | 1,807 |
| Consumer and other loans | 359 | 420 | 508 | 487 | 782 |
| Total recoveries | 3,756 | 4,299 | 8,439 | 8,181 | 7,971 |
| Net charge-offs | 1,014 | 2,344 | 2,766 | 19,684 | 33,198 |
| Provision for loan losses | (4,400) | (3,300) | (8,550) | 6,284 | 8,887 |
| Allowance at end of year | \$ 16,223 | \$ 21,637 | \$ 27,281 | \$ 38,597 | \$ 51,997 |
| Net charge-offs to average loans | 0.09 | % 0.21 | % 0.25 | % 1.56 | % 2.17 |
| Allowance at year-end to average loans | 1.42 | % 1.92 | % 2.48 | % 3.06 | % 3.40 |

The provision for loan losses is based upon management's estimate of losses inherent in the portfolio and its evaluation of the adequacy of the allowance for loan losses. Factors which influence management's judgment in estimating loan losses are the composition of the portfolio, past loss experience, loan delinquencies, nonperforming loans and other credit risk considerations that, in management's judgment, deserve evaluation in estimating loan losses. The Company has consistently followed GAAP and regulatory guidance in all calculation methodologies with no significant criticism of those methodologies from outside third party evaluations.

Allocation of the Allowance for Loan Losses

The following table shows the Company's allocation of the allowance for loan losses by types of loans and the amount of unallocated allowance at December 31 of the years indicated:

| | 2015 | | 2014 | | 2013 | | 2012 | |
|----------------------------|-----------|--------------------------|-----------|--------------------------|-----------|--------------------------|-----------|--------------------------|
| | Amount | Loan Type to Total Loans | Amount | Loan Type to Total Loans | Amount | Loan Type to Total Loans | Amount | Loan Type to Total Loans |
| Commercial | \$ 2,096 | 12.5 % | \$ 1,644 | 11.0 % | \$ 2,250 | 9.5 % | \$ 4,517 | 7.7 % |
| Real estate - commercial | 9,013 | 53.4 % | 12,577 | 51.8 % | 16,763 | 50.9 % | 20,100 | 50.4 % |
| Real estate - construction | 265 | 1.7 % | 1,475 | 3.9 % | 1,980 | 2.7 % | 3,837 | 3.7 % |
| Real estate - residential | 1,694 | 31.0 % | 1,981 | 31.9 % | 2,837 | 35.4 % | 4,535 | 36.0 % |
| Consumer | 1,190 | 0.4 % | 1,454 | 0.3 % | 1,439 | 0.3 % | 1,178 | 0.3 % |
| Unallocated | 1,965 | 1.0 % | 2,506 | 1.1 % | 2,012 | 1.2 % | 4,430 | 1.9 % |
| Total | \$ 16,223 | 100.0 % | \$ 21,637 | 100.0 % | \$ 27,281 | 100.0 % | \$ 38,597 | 100.0 % |

The allowance for loan losses is a valuation allowance for loan losses, increased by the provision for loan losses and decreased by both loan loss reserve releases (\$4.4 million loan loss reserve release in 2015, \$3.3 million loan loss reserve release in 2014 and \$8.6 million loan loss reserve release in 2013) and charge-offs less recoveries. Allocations of the allowance may be made for specific loans, but the entire allowance is available for losses inherent in the loan portfolio. In addition, the OCC, as part of their examination process, periodically reviews the allowance for loan losses. Regulators can require management to record adjustments to the allowance level based upon their assessment of the information available to them at the time of examination. The OCC, in conjunction with the other federal banking agencies, has adopted an interagency policy statement on the allowance for loan losses. The policy statement provides guidance for financial institutions on both the responsibilities of management for the assessment and establishment of adequate allowances and guidance for banking agency examiners to use in determining the adequacy of general valuation guidelines. Generally, the policy statement recommends that (1) institutions have effective systems and controls to identify, monitor and address asset quality problems; (2) management has analyzed all significant factors that affect the collectability of the portfolio in a reasonable manner; and (3) management has established acceptable allowance evaluation processes that meet the objectives set forth in the policy statement and that the Company is in full compliance with the policy statement. Management believes it has established an adequate estimated

Table of Contents

allowance for probable loan losses. Management reviews its process quarterly as evidenced by an extensive and detailed loan review process, makes changes as needed, and reports those results at meetings of the Company's Board of Directors Audit Committee. Although management believes the allowance for loan losses is sufficient to cover probable losses inherent in the loan portfolio, there can be no assurance that the allowance will prove sufficient to cover actual loan losses or that regulators, in reviewing the loan portfolio, would not request us to materially adjust our allowance for loan losses at the time of their examination.

V. Deposits

The following table sets forth the amount and maturities of deposits of \$100,000 or more at December 31 of the years indicated:

| | 2015 | 2014 |
|---------------------------------|------------|------------|
| 3 months or less | \$ 30,085 | \$ 30,580 |
| Over 3 months through 6 months | 10,464 | 19,353 |
| Over 6 months through 12 months | 29,295 | 38,877 |
| Over 12 months | 102,669 | 79,587 |
| | \$ 172,513 | \$ 168,397 |

YTD Average Balances and Interest Rates

| | 2015 | | 2014 | | 2013 | | |
|----------------------------|--------------------|------|--------------------|------|--------------------|------|---|
| | Average Balance | Rate | Average Balance | Rate | Average Balance | Rate | |
| Noninterest bearing demand | \$ 429,403 | - | % \$ 388,295 | - | % \$ 362,871 | - | % |
| Interest bearing: | | | | | | | |
| NOW and money market | 638,197 | 0.09 | 619,807 | 0.09 | 609,341 | 0.11 | |
| Savings | 249,570 | 0.06 | 238,326 | 0.07 | 226,404 | 0.07 | |
| Time | 410,691 | 0.78 | 446,133 | 1.01 | 493,855 | 1.37 | |
| Total deposits | \$ 1,727,861 | | \$ 1,692,561 | | \$ 1,692,471 | | |

VI. Return on Equity and Assets

The following table presents selected financial ratios as of December 31 for the years indicated:

| | 2015 | | 2014 | | 2013 | |
|----------------------------------|------|---|------|---|-------|---|
| Return on average total assets | 0.74 | % | 0.50 | % | 4.18 | % |
| Return on average equity | 8.87 | % | 5.57 | % | 90.09 | % |
| Average equity to average assets | 8.39 | % | 8.94 | % | 4.64 | % |
| Dividend payout ratio | - | | - | | - | |

VII.Short-Term Borrowings

There were no categories of short-term borrowings having an average balance greater than 30% of the Company's stockholders' equity as of December 31, 2015, 2014 and 2013.

Item 1.A. Risk Factors

RISK FACTORS

The material risks that management believes affect the Company are described below. Before making an investment decision with respect to any of the Company's securities, you should carefully consider the risks as described below, together with all of the information included herein. The risks described below are not the only risks the Company faces. Additional risks not presently known also may have a material adverse effect on the Company's results of operations and financial condition. The risks discussed below also include forward-looking statements, and actual results may differ substantially from those discussed or implied in these forward-looking statements.

Risks Relating to the Company's Business

A return of recessionary conditions could result in increases in the Company's level of nonperforming loans and/or reduced demand for the Company's products and services, which could lead to lower revenue, higher loan losses and lower earnings.

A return of recessionary conditions and/or negative developments in the domestic and international credit markets may significantly affect the markets in which the Company does business, the value of its loans and investments and its ongoing operations, costs and

Table of Contents

profitability. Declines in real estate values and sales volumes and increased unemployment or underemployment levels may result in higher than expected loan delinquencies, increases in the Company's levels of nonperforming and classified assets and a decline in demand for its products and services. These negative events may cause the Company to incur losses and may adversely affect its capital, liquidity and financial condition.

The size of the Company's loan portfolio has not grown in recent years, and, if the Company is unable to return to loan growth, its profitability may be adversely affected.

Since December 31, 2010, the Company's gross loans held for investment have declined from \$1.69 billion to \$1.13 billion at December 31, 2015. During some years in this period, the Company was managing its balance sheet composition to manage its capital levels and position the Bank to meet and exceed its targeted capital levels. The Company's ability to increase profitability will depend on a variety of factors, including its ability to originate attractive new lending relationships. While the Company believes it has the management resources and lending staff in place to continue the successful implementation of its strategic plan, if the Company is unable to increase the size of its loan portfolio, its strategic plan may not be successful and its profitability may be adversely affected.

The Company has incurred net losses in the past and cannot ensure that the Company will not incur further net losses in the future.

Although the Company reported net income of \$15.4 million in 2015, \$10.1 million in 2014 and \$82.1 million in 2013, the Company has incurred losses in the past, including a net loss of \$72,000 in 2012 and \$6.5 million in 2011. Despite a general improvement in the overall economy and the real estate market, the economic environment remains challenging, particularly in our market area, and the Company cannot ensure it will not incur future losses. Any future losses may affect its ability to meet its expenses or raise additional capital and may delay the time in which the Company can resume dividend payments on its common stock. In addition, future losses may cause the Company to re-establish a valuation allowance against its deferred tax assets. Furthermore, any future losses would likely cause a decline in its holding company regulatory capital ratios, which could materially and adversely affect its financial condition, liquidity and results of operations.

Nonperforming assets take significant time to resolve, adversely affect the Company's results of operations and financial condition and could result in further losses in the future.

At December 31, 2015, the Company's nonperforming loans (which consist of nonaccrual loans and loans past due 90 days or more, still accruing interest and restructured loans still accruing interest) and its nonperforming assets (which include nonperforming loans plus OREO) are reflected in the table below (in millions):

| | 12/31/2015 | 12/31/2014 | % Change |
|----------------------|------------|------------|----------|
| Nonperforming loans | \$ 14.6 | \$ 27.1 | (46.0) |
| OREO | 19.1 | 32.0 | (40.2) |
| Nonperforming assets | \$ 33.8 | \$ 59.1 | (42.8) |

The Company's nonperforming assets adversely affect its net income in various ways. For example, the Company does not accrue interest income on nonaccrual loans and OREO may have expenses in excess of lease revenues collected, thereby adversely affecting the Company's net income, return on assets and return on equity. The Company's loan administration costs also increase because of its nonperforming assets. The resolution of nonperforming assets requires significant time commitments from management, which can be detrimental to the performance of their other responsibilities. While the Company has made significant progress in reducing its nonperforming assets, there is no assurance that it will not experience increases in nonperforming assets in the future, or that its nonperforming assets will not result in further losses in the future.

The Company's loan portfolio is concentrated heavily in commercial and residential real estate loans, including exposure to construction loans, which involve risks specific to real estate values and the real estate markets in general, all of which have experienced significant weakness.

The Company's loan portfolio generally reflects the profile of the communities in which the Company operates. Because the Company operates in areas that saw rapid historical growth, real estate lending of all types is a significant portion of its loan portfolio. Total real estate lending, excluding deferred fees, remains at \$976.5 million, or approximately 86.1% of the Company's December 31, 2015 loan portfolio compared to \$1.02 billion or approximately 87.6% at December 31, 2014. Given that the primary (if not only) source of collateral on these loans is real estate, additional adverse developments affecting real estate values in the Company's market area could increase the credit risk associated with the Company's real estate loan portfolio.

The effects of ongoing real estate challenges, combined with the ongoing correction in commercial and residential real estate market prices and reduced levels of home sales, have adversely affected the Company's real estate loan portfolio and have the potential to

Table of Contents

further adversely affect such portfolio in several ways, each of which could further adversely impact its financial condition and results of operations.

Real estate market volatility and future changes in disposition strategies could result in net proceeds that differ significantly from fair value appraisals of loan collateral and OREO and could negatively impact the Company's operating performance.

Many of the Company's nonperforming real estate loans are collateral-dependent, meaning the repayment of the loan is largely dependent upon the successful operation of the property securing the loan. For collateral-dependent loans, the Company estimates the value of the loan based on appraised value of the underlying collateral less costs to sell. The Company's OREO portfolio essentially consists of properties acquired through foreclosure or deed in lieu of foreclosure in partial or total satisfaction of certain loans as a result of borrower defaults. Some property in OREO reflects property formerly utilized as a bank premise or land that was acquired with the expectation that a bank premise would be established at the location.

OREO is recorded at the lower of the recorded investment in the loans for which property served as collateral or estimated fair value, less estimated selling costs. In determining the value of OREO properties and loan collateral, an orderly disposition of the property is generally assumed. Significant judgment is required in estimating the fair value of property, and the period of time within which such estimates can be considered current is significantly shortened during periods of market volatility.

The Company's allowance for loan losses may be insufficient to absorb potential losses in the Company's loan portfolio.

The Company maintains an allowance for loan losses at a level the Company believes adequate to absorb estimated losses inherent in its existing loan portfolio. The level of the allowance reflects management's continuing evaluation of industry concentrations; specific credit risks; credit loss experience; current loan portfolio quality; present economic, political, and regulatory conditions; and unidentified losses inherent in the current loan portfolio.

Determination of the allowance is inherently subjective since it requires significant estimates and management judgment of credit risks and future trends, all of which may undergo material changes. For example, the final allowance for December 31, 2015, December 31, 2014, and December 31, 2013, included an amount reserved for other not specifically identified risk factors. New information regarding existing loans, identification of additional problem loans, and other factors, both within and outside of the Company's control, may require an increase in the allowance for loan losses. In addition, bank regulatory agencies periodically review the Company's allowance and may require an increase in the provision for loan losses or the recognition of additional loan charge-offs, based on judgments different from those of management. Finally, if charge-offs in future periods exceed the allowance for loan

losses, the Company will need additional provisions to increase the allowance. Any increases in the allowance will result in a decrease in net income and capital and may have a material adverse effect on the Company's financial condition and results of operations.

While the Company had loan loss reserve releases in 2013, 2014 and 2015, its provision for loan losses was elevated in several prior years and the Bank may be required to make increases in the provision for loan losses and to charge-off additional loans in the future.

For the years ended December 31, 2015, 2014 and 2013, the Company recorded a loan loss reserve release of \$4.4 million, \$3.3 million and \$8.6 million, respectively. While levels of net loan charge – offs, nonperforming assets and classified assets have all improved over that period, events in the Company's markets or in the national economy could impact those key metrics. If the economy and/or the real estate market do not continue to improve, more of the Company's classified assets may become nonperforming and the Company may be required to take additional provisions to increase its allowance for loan losses for these assets as the value of the collateral may be insufficient to pay any remaining net loan balance, which could have a negative effect on the Company's results of operations. The Company maintains an allowance for loan losses to provide for loans in its portfolio that may not be repaid in their entirety. The Company believes that its allowance for loan losses is maintained at a level adequate to absorb probable losses inherent in its loan portfolio as of the corresponding balance sheet date. However, the Company's allowance for loan losses may not be sufficient to cover actual loan losses and future provisions for loan losses could materially adversely affect its operating results.

The Company's business is concentrated in and dependent upon the welfare of several counties in Illinois specifically and the State of Illinois generally.

The Company's primary market area is Aurora, Illinois, and surrounding communities as well as Cook County. The city of Aurora is located in northeastern Illinois, approximately 40 miles west of Chicago. The Bank operates primarily in Kane, Kendall, DeKalb, DuPage, LaSalle, Will and Cook counties in Illinois, and, as a result, the Company's financial condition, results of operations and cash flows are subject to changes and fluctuations in the economic conditions in those areas.

The communities that the Company serves grew rapidly during the early 21st century, and despite the economic downturn that hit the Company's markets, the Company intends to continue concentrating its business efforts in these communities. The Company's future success is largely dependent upon the overall economic health of these communities and the ability of the communities to continue to rebound from the difficulties that began in 2007. While the economies in our market have stabilized, difficult economic conditions remain, and the State of Illinois' continues to experience severe budget shortfalls with elected representatives unable to reach an

Table of Contents

agreement on a state budget. Payment lapses by the State of Illinois to its vendors and government sponsored entities may have negative effects on our primary market area. To the extent that these issues, or any future state tax increases, impact the economic vitality of the businesses operating in Illinois, encourage businesses to leave the state or discourage new employers to start or move businesses to Illinois, they could have a material adverse effect on the Company's financial condition and results of operations.

If the overall economic conditions do not continue to improve or decline further, particularly within the Company's primary market areas, the Company could experience a lack of demand for its products and services, an increase in loan delinquencies and defaults and high or increased levels of problem assets and foreclosures with little prospect of state governmental issue resolution or assistance, even contractual assistance. Moreover, because of the Company's geographic concentration, it is less able than other regional or national financial institutions to diversify its credit risks across multiple markets.

Credit downgrades, partial charge-offs and specific reserves could develop in selected exposures with resulting impact on the Company's financial condition if the State of Illinois encounters more severe financial difficulties. Management continues to closely monitor the impact of developments on our markets and customers.

The Company operates in a highly competitive industry and market area and may face severe competitive disadvantages.

The Company faces substantial competition in all areas of its operations from a variety of different competitors, many of which are larger and have more financial resources. The Company's competitors primarily include national and regional banks as well as community banks within the markets the Company serves. Recently, local competitors have expanded their presence in the western suburbs of Chicago, including the communities that surround Aurora, Illinois, and these competitors may be better positioned than the Company to compete for loans, acquisitions and personnel.

The Company also faces competition from savings and loan associations, credit unions, personal loan and finance companies, retail and discount stockbrokers, investment advisors, mutual funds, insurance companies, and other financial intermediaries. The financial services industry could become even more competitive as a result of legislative and regulatory changes. Banks, securities firms, and insurance companies can merge under the umbrella of a financial holding company, which can offer a wide spectrum of financial services to many customer segments. Many large scale competitors can leverage economies of scale and be able to offer better pricing for products and services compared to what the Company can offer.

The Company's ability to compete successfully depends on developing and maintaining long-term customer relationships, offering community banking services with features and pricing in line with customer interests and expectations, consistently achieving outstanding levels of customer service and adapting to many and frequent changes in banking as well as local or regional economies. Failure to excel in these areas could significantly weaken the Company's competitive position, which could adversely affect the Company's growth and profitability. These weaknesses could have a significant negative impact on the Company's business, financial condition, and results of

operations.

The Company is a community bank and its ability to maintain its reputation is critical to the success of its business and the failure to do so may materially adversely affect its performance.

The Company is a community bank, and its reputation is one of the most valuable components of its business. As such, the Company strives to conduct its business in a manner that enhances its reputation. This is done, in part, by recruiting, hiring and retaining employees who share the Company's core values: being an integral part of the communities the Company serves; delivering superior service to the Company's customers; and caring about the Company's customers and associates. If the Company's reputation is negatively affected, by the actions of its employees or otherwise, its business and operating results may be adversely affected.

The Company is subject to interest rate risk, and a change in interest rates could have a negative effect on its net income.

The Company's earnings and cash flows are largely dependent upon the Company's net interest income. Interest rates are highly sensitive to many factors that are beyond the Company's control, including general economic conditions, the Company's competition and policies of various governmental and regulatory agencies, particularly the Federal Reserve. Changes in monetary policy could influence Company earnings. Such changes could also affect the Company's ability to originate loans and obtain deposits as well as the average duration of the Company's securities portfolio. If the interest rates paid on deposits and other borrowings increase at a faster rate than the interest rates received on loans and other investments, the Company's net interest income, and therefore earnings, could be adversely affected. Earnings could also be adversely affected if the interest rates received on loans and other investments fall more quickly than the interest rates paid on deposits and other borrowings.

Although management believes it has implemented effective asset and liability management strategies to reduce the potential effects of changes in interest rates on the Company's results of operations, any substantial, unexpected, prolonged change in market interest rates could have a material adverse effect on the Company's financial condition and results of operations.

Table of Contents

If the Company fails to maintain sufficient capital, whether due to losses, an inability to raise additional capital or otherwise, its financial condition, liquidity and results of operations, as well as its ability to maintain regulatory compliance, would be adversely affected.

The Company and the Bank must meet minimum regulatory capital requirements and maintain sufficient liquidity. Bank capital is impacted by dividends paid by the Bank to the Company. The Company also faces significant capital and other regulatory requirements as a financial institution. The Company's ability to raise additional capital, when and if needed, will depend on conditions in the economy and capital markets, and a number of other factors – including investor perceptions regarding the Company, banking industry and market condition, and governmental activities – many of which are outside the Company's control, and on the Company's financial condition and performance. If the Company fails to meet these capital and other regulatory requirements, its financial condition, liquidity and results of operations could be materially and adversely affected.

The Company could experience an unexpected inability to obtain needed liquidity.

Liquidity measures the ability to meet current and future cash flow needs as they become due. The liquidity of a financial institution reflects its ability to meet loan requests, to accommodate possible outflows in deposits, and to take advantage of interest rate market opportunities and is essential to a financial institution's business. The ability of a financial institution to meet its current financial obligations is a function of its balance sheet structure, its ability to liquidate assets and its access to alternative sources of funds. The Company seeks to ensure that its funding needs are met by maintaining an appropriate level of liquidity through asset and liability management. In 2015, the Bank also secured liquidity under the advance program provided under terms offered by the Federal Home Loan Bank of Chicago. If the Company or the Bank becomes unable to obtain funds when needed, it could have a material adverse effect on its business, financial condition and results of operations.

Loss of customer deposits due to increased competition could increase the Company's funding costs.

The Company relies on bank deposits to be a low cost and stable source of funding. All federal prohibitions on the ability of financial institutions to pay interest on business demand deposit accounts were repealed as part of the Dodd-Frank Act, and, as a result, some financial institutions offer demand deposits to compete for customers. The Company competes with banks and other financial services companies for deposits. If the Company's competitors raise the rates they pay on deposits in response to interest rate changes initiated by the Federal Reserve Bank Open Market Committee or for other reasons of their choice, the Company's funding costs may increase, either because the Company raises its rates to avoid losing deposits or because the Company loses deposits and must rely on more expensive sources of funding. Higher funding costs could reduce the Company's net interest margin and net interest income and could have a material adverse effect on the Company's financial condition and results of operations.

The Company's estimate of fair values for its investments may not be realizable if it were to sell these securities today.

The Company's available-for-sale securities are carried at fair value. The Company's held-to-maturity securities are carried at amortized cost.

The determination of fair value for securities categorized in Level 3 involves significant judgment due to the complexity of the factors contributing to the valuation, many of which are not readily observable in the market. Recent market disruptions and the resulting fluctuations in fair value have made the valuation process even more difficult and subjective. If the valuations are incorrect, it could harm the Company's financial results and financial condition.

The Company may be materially and adversely affected by the highly regulated environment in which the Company operates.

The Company is subject to extensive federal and state regulation, supervision and examination. Banking regulations are primarily intended to protect depositors' funds, FDIC funds, customers and the banking system as a whole, rather than the Company's stockholders. These regulations affect the Company's lending practices, capital structure, investment practices, dividend policy, and growth, among other things.

As a bank holding company, the Company and the Bank are subject to extensive regulation and supervision, and undergo periodic examinations by its regulators, who have extensive discretion and authority to prevent or remedy unsafe or unsound practices or violations of law by banks and bank holding companies. Failure to comply with applicable laws, regulations or policies could result in sanctions by regulatory agencies, civil monetary penalties, and/or damage to the Company's reputation, which could have a material adverse effect on the Company. Although the Company has policies and procedures designed to mitigate the risk of any such violations, there can be no assurance that such violations will not occur.

A more detailed description of the primary federal and state banking laws and regulations that affect the Company and the Bank is included in this Form 10-K under the section captioned "Supervision and Regulation" in Item 1. These laws, regulations, rules, standards, policies and interpretations are constantly evolving and may change significantly over time. For example, on July 21, 2010, the Dodd-Frank Act was signed into law, which significantly changed the regulation of financial institutions and the financial services industry. The Dodd-Frank Act, together with the regulations to be developed thereunder, includes provisions affecting large and small

Table of Contents

financial institutions alike, including several provisions that affect how community banks, thrifts and small bank and thrift holding companies will be regulated. In addition, the Federal Reserve, in recent years, has adopted numerous new regulations addressing banks' overdraft and mortgage lending practices. Further, the CFPB was established, with broad powers to supervise and enforce consumer protection laws, and additional consumer protection legislation and regulatory activity is anticipated in the future. Any rules or regulations promulgated by the CFPB may increase our compliance costs and could limit our revenue from certain consumer products and services.

The Company and its subsidiaries could become subject to claims and litigation pertaining to the Company's or the Bank's fiduciary responsibility.

Customers make claims and on occasion take legal action pertaining to the Company's performance of its fiduciary responsibilities. Whether customer claims and legal action related to the Company's performance of its fiduciary responsibilities are founded or unfounded, if such claims and legal action are not resolved in a manner favorable to the Company, they may result in significant financial liability and/or adversely affect the market perception of the Company and its products and services as well as impact customer demand for those products and services. Any financial liability or reputational damage could have a material adverse effect on the Company's business, which, in turn, could have a material adverse impact on its financial condition and results of operations.

Loss of key employees may disrupt relationships with certain customers.

The Company's business is primarily relationship-driven in that many of its key employees have extensive customer or asset management relationships. Loss of key employees with such relationships may lead to the loss of business if the customers were to follow that employee to a competitor or if asset management expertise was not timely replaced. While the Company believes its relationships with its key personnel are strong, it cannot guarantee that all of its key personnel will remain with the organization. Loss of such key personnel could have a negative impact on the company's business, financial condition, and results of operations.

The Company's information systems may experience an interruption or breach in security and cyber-attacks, all of which could have a material adverse effect on the Company's business.

The Company relies heavily on internal and outsourced technologies, communications, and information systems to conduct its business. Additionally, in the normal course of business, the Company collects, processes and retains sensitive and confidential information regarding our customers. As the Company's reliance on technology has increased, so have the potential risks of a technology-related operation interruption (such as disruptions in the Company's customer relationship management, general ledger, deposit, loan, or other systems) or the occurrence of a cyber-attack (such as unauthorized access to the Company's systems). These risks have increased for all financial institutions as new technologies emerge, including the use of the Internet and the expansion of telecommunications

technologies (including mobile devices) to conduct financial and other business transactions, as well as the increased sophistication and activities of organized crime, perpetrators of fraud, hackers, terrorists and others have combined to increase overall risk.

In addition to cyber-attacks or other security breaches involving the theft of sensitive and confidential information, hackers recently have engaged in attacks against large financial institutions, particularly denial of service attacks, that are designed to disrupt key business services, such as customer-facing web sites. The Company operates in an industry where otherwise effective preventive measures against security breaches become vulnerable as breach strategies change frequently and cyber-attacks can originate from a wide variety of sources. It is possible that a cyber incident, such as a security breach, may be undetected for a period of time. However, applying guidance from FFIEC, the Company has identified security risks and employs risk mitigation controls. Following a layered security approach, the Company has analyzed and will continue to analyze security related to device specific considerations, user access topics, transaction-processing and network integrity. The Company expects that it will spend additional time and will incur additional cost going forward to modify and enhance protective measures. Further effort and spending will be required to investigate and remediate any information security vulnerabilities.

The Company also faces risks related to cyber-attacks and other security breaches in connection with credit card and debit card transactions that typically involve the transmission of sensitive information regarding the Company's customers through various third parties, including merchant acquiring banks, payment processors, payment card networks and its processors. Some of these parties have in the past been the target of security breaches and cyber-attacks, and because the transactions involve third parties and environments such as the point of sale that the Company does not directly control or secure, future security breaches or cyber-attacks affecting any of these third parties could impact the Company and in some cases the Company may have exposure and suffer losses for breaches or attacks. Despite third-party security risks that are beyond our control, the Company offers its customers protection against fraud and attendant losses for unauthorized use of debit cards in order to stay competitive in the market place. Offering such protection exposes the Company to potential losses which, in the event of a data breach at one or more retailers of considerable magnitude, may adversely affect its business, financial condition, and results of operation. Further cyber-attacks or other breaches in the future, whether affecting the Company or others, could intensify consumer concern and regulatory focus and result in reduced use of payment cards and increased costs, all of which could have a material adverse effect on the Company's business. To the extent we are involved in any future cyber-attacks or other breaches, the Company's reputation could be affected with a potentially material adverse effect on the Company's business, financial condition or results of operations.

Table of Contents

The Company is dependent upon outside third parties for the processing and handling of Company records and data.

The Company relies on software developed by third party vendors to process various Company transactions. In some cases, the Company has contracted with third parties to run their proprietary software on behalf of the Company at a location under the control of the third party. These systems include, but are not limited to, payroll, wealth management record keeping, and securities portfolio management. While the Company performs a review of controls instituted by the vendor over these programs in accordance with industry standards and institutes its own user controls, the Company must rely on the continued maintenance of the performance controls by the outside party, including safeguards over the security of customer data. In addition, the Company creates backup copies of key processing output daily in the event of a failure on the part of any of these systems. Nonetheless, the Company may incur a temporary disruption in its ability to conduct its business or process its transactions, or incur damage to its reputation if the third party vendor fails to adequately maintain internal controls or institute necessary changes to systems. Such disruption or breach of security may have a material adverse effect on the Company's financial condition and results of operations.

The Company and its subsidiaries are defendants in a variety of litigation and other actions.

Currently, there are certain other legal proceedings pending against the Company and its subsidiaries in the ordinary course of business. While the outcome of any legal proceeding is inherently uncertain, based on information currently available, the Company's management believes that any liabilities arising from pending legal matters would not have a material adverse effect on the Bank or on the consolidated financial statements of the Company. However, if actual results differ from management's expectations, it could have a material adverse effect on the Company's financial condition, results of operations, or cash flows.

Risks Associated with the Company's Common Stock

The Company has not established a minimum dividend payment level, and it cannot ensure its ability to pay dividends in the future.

For several years prior to January 2014, the Company was under a Written Agreement with the Federal Reserve which included among other things restrictions on the Company's payment of dividends on its common stock. Although the Written Agreement was terminated in January 2014, the Company has not yet paid dividends on its common stock and has not determined when it will be in a position to resume paying dividends or at what level it will be able to pay.

Despite the termination of the Written Agreement, the Company is still subject to various restrictions on its ability to pay dividends imposed by the Federal Reserve. The Company is also subject to the limitations of the Delaware General Corporation Law (the "DGCL"). The DGCL allows the Company to pay dividends only out of its surplus (as defined and computed in accordance with the provisions of the DGCL) or, if the Company has no such surplus, out of its net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year.

Holders of the Company's common stock are also only entitled to receive such dividends as the Company's board of directors may declare out of funds legally available for such payments.

The holders of the Company's debt have rights that are senior to those of its stockholders.

The Company currently has a \$45.5 million credit facility with a correspondent lender, which includes \$45.0 million of subordinated debt and \$500,000 in term debt. As of December 31, 2014, and December 31, 2015, the \$45.0 million in principal of subordinated debt and the \$500,000 in principal of term debt were outstanding. The term debt and subordinated debt mature on March 31, 2018. The term debt portion of the senior debt is secured by all of the capital stock of the Bank.

The rights of the holders of the Company's senior debt, subordinated debt and junior subordinated debentures are senior to the shares of its common stock and preferred stock. As a result, the Company must make payments on its senior debt, subordinated debt and junior subordinated debentures (and the related Trust Preferred Securities) before any dividends can be paid on its common stock or preferred stock and, in the event of its bankruptcy, dissolution or liquidation, the holders of the Company's senior debt, subordinated debt and junior subordinated debentures must be satisfied before any distributions can be made to its common stockholders.

The trading volumes in the Company's common stock may not provide adequate liquidity for investors.

Shares of the Company's common stock are listed on the Nasdaq Global Select Market; however, the average daily trading volume in its common stock is less than that of most larger financial services companies. A public trading market having the desired characteristics of depth, liquidity and orderliness depends on the presence in the marketplace of a sufficient number of willing buyers and sellers of the common stock at any given time. This presence depends on the individual decisions of investors and general economic and market conditions over which the Company has no control. Given the current daily average trading volume of the Company's common stock, significant sales of the Company's common stock in a brief period of time, or the expectation of these sales, could cause a significant decline in the price of the Company's stock.

Table of Contents

The trading price of the Company's common stock may be subject to continued significant fluctuations and volatility.

The market price of the Company's common stock could be subject to significant fluctuations due to, among other things:

- actual or anticipated quarterly fluctuations in its operating and financial results, particularly if such results vary from the expectations of management, securities analysts and investors, including with respect to further loan losses the Company may incur;
- announcements regarding significant transactions in which the Company may engage;
 - market assessments regarding such transactions;
- changes or perceived changes in its operations or business prospects;
- legislative or regulatory changes affecting its industry generally or its businesses and operations;
- the failure of general market and economic conditions to stabilize and recover, particularly with respect to economic conditions in Illinois, and the pace of any such stabilization and recovery;
- the operating and share price performance of companies that investors consider to be comparable to the Company;
- future offerings by the Company of debt, preferred stock or trust preferred securities, each of which would be senior to its common stock upon liquidation and for purposes of dividend distributions;
- actions of its current shareholders, including future sales of common stock by existing shareholders and its directors and executive officers; and
- other changes in U.S. or global financial markets, economies and market conditions, such as interest or foreign exchange rates, stock, commodity, credit or asset valuations or volatility.

Stock markets in general, and the Company's common stock in particular, have experienced significant volatility since 2007 and continue to experience significant price and volume volatility. As a result, the market price of the Company's common stock may continue to be subject to similar market fluctuations that may or may not be related to its operating performance or prospects. Increased volatility could result in a decline in the market price of the Company's common stock.

Certain banking laws and the Company's Rights Plan may have an anti-takeover effect.

Certain federal banking laws, including regulatory approval requirements, could make it more difficult for a third party to acquire the Company, even if doing so would be perceived to be beneficial to the Company's shareholders. In addition, the Company's Amended and Restated Rights Plan and Tax Benefits Preservation Plan (the "Rights Plan") is intended to discourage any person from acquiring 5% or more of the Company's outstanding stock (with certain limited exceptions). The Company amended the Rights Plan in connection with the public offering of 15,525,000 shares of its common stock, which closed on April 3, 2014, to allow two investors in the offering to acquire more than 5% of the Company's common stock. The Company cannot guarantee that it will allow any other holders of its

common stock to acquire shares in excess of the limits set forth in the Rights Plan. The combination of these provisions may inhibit a non-negotiated merger or other business combination, which, in turn, could adversely affect the market price of the Company's common stock.

Item 1B. Unresolved Staff Comments

None

Item 2. Properties

The principal business office of the Company is located at 37 South River Street, Aurora, Illinois. We conduct our business at 24 retail banking center locations in various communities throughout the greater western and southern Chicago metropolitan area. . We own 23 locations and lease the other location. The Company's leased location is under lease through March 2018. We believe that all of our properties and equipment are well maintained, in good operating condition and adequate for all of our present and anticipated needs.

The total net book value of our premises and equipment (including land and land improvements, buildings, furniture and equipment, and buildings and leasehold improvements) at December 31, 2015, was \$39.6 million.

Item 3. Legal Proceedings

The Company and its subsidiaries have, from time to time, collection suits and other actions that arise in the ordinary course of business against its borrowers and are defendants in legal actions arising from normal business activities. Management, after consultation with legal counsel, believes that the ultimate liabilities, if any, resulting from these actions will not have a material adverse effect on the financial position of the Bank or on the consolidated financial position of the Company.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market for the Company’s Common Stock

The Company’s common stock trades on The Nasdaq Global Select Market under the symbol “OSBC”. As of December 31, 2015, the Company had 938 stockholders of record of its common stock. The following table sets forth the range of prices during each quarter for 2015 and 2014.

| | 2015 | | | 2014 | | |
|----------------|---------|---------|----------|---------|---------|----------|
| | High | Low | Dividend | High | Low | Dividend |
| First quarter | \$ 5.85 | \$ 5.06 | \$ - | \$ 5.27 | \$ 4.33 | \$ - |
| Second quarter | 6.96 | 5.42 | - | 5.02 | 4.53 | - |
| Third quarter | 6.79 | 5.93 | - | 5.25 | 4.60 | - |
| Fourth quarter | 8.14 | 5.98 | - | 5.45 | 4.47 | - |

The Company incorporates by reference the information contained Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations under the caption “Capital”.

The Company also incorporates by reference the information contained under the “Notes to Consolidated Financial Statements Note 15: Regulatory & Capital Matters”.

The Company did not pay any dividends in 2015 or 2014 as set forth in the table above. The Company’s shareholders are entitled to receive dividends when, as and if declared by the board of directors out of funds legally available therefor. The Company’s ability to pay dividends to shareholders is largely dependent upon the dividends it receives from the Bank; however, certain regulatory restrictions and the terms of its debt and equity securities, limit the amount of cash dividends it may pay.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

The following discussion provides additional information regarding the Company's operations for the twelve-month periods ending December 31, 2015, 2014 and 2013, and financial condition at December 31, 2015 and 2014. This discussion should be read in

Table of Contents

conjunction with “Selected Financial Data” and the Company’s consolidated financial statements and the accompanying notes thereto included or incorporated by reference elsewhere in this document.

The Company provides a wide range of financial services through its 24 branch locations located in Kane, Kendall, DeKalb, DuPage, LaSalle, Will and Cook counties in Illinois. These banking centers offer access to a full range of traditional retail and commercial banking services including treasury management operations as well as fiduciary and wealth management services. The Company focuses its business upon establishing and maintaining relationships with its clients while maintaining a commitment to providing for the financial services needs of the communities in which it operates through its retail branch network. The Company emphasizes relationships with individual customers as well as small to medium-sized businesses throughout our market area. The Company’s market area includes a mix of commercial and industrial, real estate, and consumer related lending opportunities, and provides a stable, loyal core deposit base. The Company also has extensive wealth management services, which includes a registered investment advisory platform in addition to trust administration and trust services related to personal and corporate trusts, including employee benefit plan administration services.

The health of the overall real estate market in the Company’s markets continued to improve in 2015. While the precipitous decline in the value of certain real estate assets slowed in the latter part of 2010, continued difficult market conditions generated smaller declines in the 2015 values of real estate and associated asset types with overall stable market conditions during the reporting period that ended December 31, 2015. The availability of ready local markets for real estate, while improved, remained limited and continued to affect the ability of many borrowers to pay on their obligations. The Company’s net income for 2015 was \$15.4 million, \$10.1 million in 2014 and \$82.1 million in 2013 with 2013 results derived largely from tax related benefits.

In 2015, the Company recorded net income of \$15.4 million, or \$0.46 per diluted share, which compares with a net income of \$10.1 million, or \$0.46 per diluted share in 2014 and net income of \$82.1 million or \$5.45 per diluted share in 2013. The basic earnings per share was \$0.46 in 2015, \$0.46 in 2014, and \$5.45 in 2013. The Company recorded a \$4.4 million release of reserves for loan losses in 2015, compared to \$3.3 million release of reserves for loan losses in 2014 and \$8.6 million release of reserves for loan losses in 2013. Net charge-offs were \$1.0 million during 2015, \$2.3 million during 2014 and \$2.8 million during 2013. The net income available to common stockholders was \$13.5 million for the year ended December 31, 2015, \$11.9 million for the year ended December 31, 2014 and \$76.8 million for the year ended December 31, 2013.

Net interest and dividend income increased 3.6% for the year ended December 31, 2015 compared to the year ended December 31, 2014. Average loans, including loans held-for-sale increased 2.0% in 2015 compared to 2014. Average interest bearing liabilities increased \$5.7 million or 0.39% while at the same time the average rate decreased 14 basis points. This decrease was primarily due to reduced time or certificates of deposit while noninterest bearing deposits increased.

In 2014, net interest income of \$57.1 million increased \$1.8 million from \$55.3 million in 2013.

In 2014 and 2015, the Bank continued to reposition its balance sheet to further reduce asset quality risk and increase lending. Management also continued to emphasize credit quality and maintain its capital ratios with continued strong liquidity. In 2015, loans decreased 2.2% after growth of 5.3% in 2014 and a 4.2% decline in 2013. The Company also continued to take steps to cut operating expenses and increase net earnings. Under this overarching approach, the Company significantly reduced problem loans and nonperforming assets. Reduced other real estate owned holdings resulted in lower property valuation and maintenance expenses in both 2015 and 2014. As the Company focused on reducing all noninterest expenses, it was able to maintain its profitable wealth management business and extensive residential real estate business as important sources of noninterest income.

The Company's primary deposit products are checking, NOW, money market, savings, and certificate of deposit accounts, and the Company's primary lending products are commercial mortgages, construction lending, commercial loans, residential mortgages and consumer loans. Major portions of the Company's loans are secured by various forms of collateral including real estate, business assets, and consumer property although borrower cash flow is the primary source of repayment at the time of loan origination.

As discussed, under this approach, net interest and dividend income increased \$2.0 million, or 3.6%, in 2015 from \$57.1 million for the year ended 2014. Average earning assets increased from \$1.80 billion in 2014 to \$1.84 billion in 2015. Average loans, including loans held-for-sale during the year, increased to \$1.15 billion for 2015 from \$1.13 billion for 2014. In 2015, loan volumes reflected a continued low level of qualified borrower demand within the Company's market areas and charge-off activity. Average interest bearing liabilities were essentially unchanged at \$1.45 billion in 2015 and 2014, as the need for funding remained low with the stabilization in assets.

Application of critical accounting policies

The Company's consolidated financial statements are prepared in accordance with generally accepted accounting principles ("GAAP") and follow general practices within the banking industry. Application of these principles requires management to make estimates, assumptions, and judgments that affect the amounts reported in the consolidated financial statements and accompanying notes. These estimates, assumptions, and judgments are based on information available as of the date of the consolidated financial statements.

Table of Contents

Future changes in information may affect these estimates, assumptions, and judgments, which, in turn, may affect amounts reported in the consolidated financial statements.

Significant accounting policies are presented in Note 1 of the financial statements included in this annual report. These policies, along with the disclosures presented in the other financial statement notes and in this discussion, provide information on how significant assets and liabilities are valued in the financial statements and how those values are determined.

Management firmly believes that the Company's accounting policies with respect to the allowance for loan losses is an accounting area requiring subjective or complex judgments very important to the Company's financial position and results of operations. Therefore, the allowance policy is one of the Company's most critical accounting policies. The allowance for loan losses represents management's estimate of probable credit losses inherent in the loan portfolio. Determining the amount of the allowance for loan losses is considered a critical accounting estimate because it requires significant judgment. The amounts of estimated losses on pools of homogeneous loans are based on historical loss experience, consideration of current economic trends and conditions, as well as estimated collateral valuations, all of which may be susceptible to significant change. Management incorporated methodology changes in the allowance for loan losses calculation in 2015. These methodology changes are described in the Allowance for Loan Losses section of this Management Discussion and Analysis of Financial Condition and Results of Operations. As a result of management's analysis of the adequacy of the allowance for loan losses, loan loss reserve releases were recorded during the years ended December 31, 2015, 2014 and 2013.

The loan portfolio represents the largest asset class on the consolidated balance sheets. The allowance for loan losses is a valuation allowance for loan losses, increased by the provision for loan losses and decreased by both loan loss reserve releases and charge-offs less recoveries. Management estimates the allowance balance required using an assessment of various risk factors including, but not limited to, past loan loss experience, known and inherent risks in the portfolio, information about specific borrower situations, estimated collateral values, volume trends in delinquencies, nonaccruals, economic conditions, and other credit market considerations. Allocations of the allowance may be made for specific loans, but the entire allowance is available for losses inherent in the loan portfolio.

A loan is considered impaired when it is probable that not all contractual principal or interest due will be received according to the original terms of the loan agreement. Management defines the measured value of an impaired loan based upon the present value of the future cash flows, discounted at the loan's original effective interest rate, or the fair value reflecting costs to sell the underlying collateral, if the loan is collateral dependent. Impaired loans were \$20.9 million at December 31, 2015. This total compares to \$35.9 million and \$46.6 million December 31, 2014 and 2013, respectively. In addition, a discussion of the factors driving changes in the amount of the allowance for loan losses is included in the Allowances for Loan Losses section that follows.

The Company recognizes expense for federal and state income taxes currently payable as well as deferred federal and state taxes, estimated future tax effects of temporary differences between the tax basis of assets and liabilities and amounts reported in the consolidated balance sheets, as well as loss carryforwards and tax credit carryforwards. The Company maintained deferred tax assets for deductible temporary differences, the largest of which related to the goodwill amortization/impairment. For income tax return purposes this relates to Section 197 goodwill amortization and goodwill impairment charges. Realization of deferred tax assets is dependent upon generating sufficient taxable income in either the carryforward or carryback periods to cover net operating losses generated by the reversal of temporary differences.

Future issuances or sales of common stock or other equity securities could also result in an “ownership change” as defined for U.S. federal income tax purposes. If an ownership change were to occur, the Company could realize a loss of a portion of its U.S. federal and state deferred tax assets, including certain built-in losses that have not been recognized for tax purposes, as a result of the operation of Section 382 of the Internal Revenue Code of 1986, as amended. The amount of the permanent loss would be determined by the annual limitation period and the carryforward period (generally up to 20 years for federal net operating losses) and any resulting loss could have a material adverse effect on the results of operations and financial condition. On September 12, 2012, the Company and the Bank, as rights agent, entered into a Rights Plan which was designed to protect the Company’s deferred tax assets against an unsolicited ownership change.

On September 2, 2015, the Company and the Bank, as Rights Agent, entered into a Second Amendment to the Amended and Restated Rights Agreement and Tax Benefits Preservation Plan (the “Amendment”). The Amendment, which will be submitted to the Company’s shareholders for ratification at the Company’s 2016 annual meeting, extended the final expiration date of the Company’s Amended and Restated Rights Agreement and Tax Benefits Preservation Plan from September 12, 2015 to September 12, 2018. The purpose of the Rights Plan is to protect the Company’s deferred tax asset against an unsolicited ownership change, which could significantly limit the Company’s ability to utilize its deferred tax assets. For a description of the Rights Plan, please refer to the Company’s Form 8-A, filed September 2, 2015 and Exhibit 4.1 filed on Form 8-K September 2, 2015 also.

Income tax returns are also subject to audit by the Internal Revenue Service (the “IRS”) and state taxing authorities. Income tax expense for current and prior periods is subject to adjustment based upon the outcome of such audits. All audit work by the IRS has been completed through and including 2011. The Company believes it has adequately accrued for all probable income taxes payable. All audit work by the Illinois Department of Revenue or the State of Illinois has been completed through 2010.

Table of Contents

Another of the Company's critical accounting policies relates to the fair value measurement of various nonfinancial and financial instruments including investment securities, valuation of OREO, derivative instruments and the expanded fair value measurement disclosures that are related to Accounting Standards Codification ("ASC") 820-10 in detail in Notes 1 and 17 to the consolidated financial statements included in this annual report.

Results of operations

Net interest income

Net interest income increased \$2.0 million, from the year ended December 31, 2014, to \$59.1 million for the year ended December 31, 2015. The Company realized modest improvements in interest income and more substantial net interest income benefit in reduced interest expense. Net interest income increased 3.6% in 2015 compared to 2014. Net interest income increased \$1.8 million, from \$55.3 million for the year ended December 31, 2013, to \$57.1 million for the year ended December 31, 2014.

Average earning assets increased \$44.7 million in 2015 compared to 2014 including a year over year \$22.0 million increase in average loans including loans held-for-sale. Results reflect some increased loan volume during periods of 2015. Average earning assets increased \$36.3 million, or 2.1% in 2014, from \$1.76 billion for the year ended December 31, 2013, to \$1.80 billion for the year ended December 31, 2014, as a result of growth in both securities volume and loan volume during 2014. Management continues to develop loan pipelines that can be expected to generate future loan originations and loan growth.

The Company's net interest income can be significantly influenced by a variety of factors, including overall loan demand, economic conditions, credit risk, the amount of nonearning assets including nonperforming loans and OREO, the amounts of and rates at which assets and liabilities reprice, variances in prepayment of loans and securities, early withdrawal of deposits, exercise of call options on borrowings or securities, a general rise or decline in interest rates, changes in the slope of the yield-curve, and balance sheet growth or contraction. The Company's asset and liability committee ("ALCO") seeks to manage interest rate risk under a variety of rate environments by structuring the Company's balance sheet and off-balance sheet positions. This process is discussed in more detail in the interest rate risk section.

1. Interest income from loans is shown tax equivalent as discussed below and includes fees of \$1.8 million, \$2.3 million and \$2.5 million for 2015, 2014 and 2013, respectively. Nonaccrual loans are included in the above stated

average balances.

Asset Quality

Nonperforming loans consist of nonaccrual loans, nonperforming restructured accruing loans and loans 90 days or greater past due but still accruing. Management believes recovery in the overall commercial real estate segment is firmly evident but could be stifled by macroeconomic events. This change in segment posture would adversely impact Company totals for nonperforming loans. Total nonperforming loans were \$14.6 million at December 31, 2015, down from \$27.1 million at December 31, 2014.

Net charge offs of \$1.0 million in 2015 compare to \$2.3 million in 2014 and \$2.8 million in 2013.

33

Table of Contents

The following table shows classified loans by segment for the following periods.

| (in thousands) | Classified loans as of | | | Percent Change From | |
|-----------------------------------|------------------------|-----------|-----------|---------------------|-----------|
| | December 31, 2015 | 2014 | 2013 | 2015-2014 | 2014-2013 |
| Real estate - construction | \$ 83 | \$ 4,045 | \$ 3,024 | (97.9) | 33.8 |
| Real estate - residential: | | | | | |
| Investor | 1,136 | 2,263 | 9,750 | (49.8) | (76.8) |
| Owner occupied | 7,079 | 7,343 | 7,699 | (3.6) | (4.6) |
| Revolving and junior liens | 3,055 | 3,713 | 3,971 | (17.7) | (6.5) |
| Real estate - commercial, nonfarm | 10,568 | 19,170 | 37,297 | (44.9) | (48.6) |
| Real estate - commercial, farm | 1,272 | - | - | - | - |
| Commercial | 2,029 | 4,403 | 481 | (53.9) | 815.4 |
| Other | 1 | 1 | 1 | - | - |
| | \$ 25,223 | \$ 40,938 | \$ 62,223 | (38.4) | (34.2) |

Classified loans include nonaccrual, performing troubled debt restructurings and all other loans considered substandard. All three components are down since December 31, 2014. Classified assets include both classified loans and OREO. Management monitors a ratio of classified assets to the sum of Bank Tier 1 capital and the allowance for loan loss reserve. This ratio reflects another measure of overall improvement in loan related asset quality. The decline in both classified loans and OREO as well as improved Bank Tier 1 capital in the fourth quarter again strengthened this ratio.

Other positive trends included continued reduction in nonaccrual loans. The December 31, 2015, nonaccrual total of \$14.4 million reflects a trend of reduced nonaccrual loans at year-end that has been experienced since year-end 2010. Similarly, total past due loans, including accruing and nonaccrual loans, of \$12.6 million for year-end 2015 is the most recent decreased year-end total for this metric in a trend of reductions seen since year-end 2010. Both results reflect aggressive portfolio management process and diligent follow up by individual relationship managers on specific credits.

Summarizing numerous encouraging developments, the classified asset ratio showed a positive change to 20.31% at December 31, 2015, after standing at 28.10% at December 31, 2014.

Allowance for Loan Losses

The Bank's allowance for loan losses methodology reasonably estimates loan and lease losses as of the financial statement date(s) and incorporates management's current judgments about the credit quality of the loan portfolio through a disciplined and consistently applied methodology. The methodology follows GAAP including, but not limited to, guidance included in Accounting Standards Codification ("ASC") 310 and ASC 450. Analysis is prepared in accordance with guidelines established by the SEC, the Federal Financial Institutions Examination Council, the American Institution of Certified Public Accountants Audit and Accounting Guide for Banks and Savings Institutions, and banking industry practices. Methodology is periodically reviewed by the Bank's independent accountants and banking regulators. Methodology changes were made in 2015. Beyond these methodology changes, only minor changes in the risk evaluation factors for commercial loans and commercial real estate credits were made in 2015.

One methodology change reflects use of average balances in historical required reserve calculations to avoid loss rate impact if loan balances increase or decrease significantly. Previously, period end balances were used in the required reserve calculation. A second methodology change negates quarterly net recovery data in the historical loss rate experience calculations. The previous treatment of net recoveries was seen as a less meaningful treatment of current historical loss experience. The last methodology change replaces the commercial real estate pool management factor with a collateral calculation on balances for special mention and problem accruing loans in the period. This methodology change more accurately reflects all portfolio risk. The impact of these changes to the ALLL was an increase of \$1.3 million. All calculations conform to U. S. generally accepted accounting principles.

The coverage ratio of the allowance for loan losses to nonperforming loans was 111.0% as of December 31, 2015, which reflects an increase from 79.9% as of December 31, 2014. A decrease of \$12.5 million, or 46.0%, in nonperforming loans in 2015 drove the overall coverage ratio change. Following established methodology, management updated the estimated specific allocations each quarter after receiving more recent appraisal valuations or information on cash flow trends related to the impaired credits. General allocations decreased by \$5.2 million from December 31, 2014, while the overall loan balances subject to general factors also decreased at December 31, 2015. Management determined the estimated amount to include in the allowance for loan losses based upon a number of factors, including an evaluation of credit market circumstances, loan growth or contraction, the quality and composition of the loan portfolio and loan loss experience.

Management reviews the performance of the management risk factors including higher risk loan pools rated as special mention and problem loans, and adjusts the population and the related loss factors taking into account adverse market trends including collateral valuation as well as its assessments of the credits in that pool. Changes are identified in the Company's comprehensive loan review process and made in the related risk factors when needed with a formal affirmation at each quarter end. Those assessments capture

Table of Contents

management's estimate of the potential for adverse migration to an impaired status as well as its estimation of what potential valuation impact would result from that migration. Management has also observed that many stresses in those credits were generally attributable to cyclical economic events that continue to show some signs of stabilization in 2015.

Management conducts a full annual review of all Home Equity Lines of Credit ("HELOC") by looking at credit scores and collateral values. When the Company is notified of a foreclosure on a first mortgage, the HELOC loan is moved to nonaccrual and a decision is made if the loan is collectible. Loan balances are actively charged-off in the absence of sufficient equity unless the borrower reaffirms or notifies us of an intention to reaffirm.

The above changes in estimates were made by management to be consistent with observable trends on asset quality within loan portfolio segments (as discussed in the Asset Quality section above) and in conjunction with market conditions and credit review administration activities. Several environmental factors are also evaluated monthly, when appropriate, with formal affirmation each quarter end and are included in the assessment of the adequacy of the allowance for loan losses. Further and importantly, significant improvement was seen in 2015 net charge-offs and nonperforming loans. Net charge-offs of \$2.3 million in 2014 declined by 56.7% to \$1.0 million in 2015. Nonperforming loans of \$27.1 million at year-end 2014 declined 46.0% to \$14.6 million at December 31, 2015. Based on this assessment, management determined that an overall improvement in loan asset quality justified loan loss reserve releases of \$4.4 million in 2015. When measured as a percentage of loans outstanding, the total allowance for loan losses decreased from 1.9% of total loans as of December 31, 2014, to 1.4% of total loans at December 31, 2015. In management's judgment, an adequate allowance for estimated losses has been established for inherent losses at December 31, 2015; however, there can be no assurance that actual losses will not exceed the estimated amounts in the future.

The allowance for loan losses consists of three components: (i) specific allocations established for losses resulting from an analysis developed through reviews of individual impaired loans for which the recorded investment in the loan exceeds the measured value of the loan; (ii) reserves based on historical loss experience for each loan category; and (iii) reserves based on general current economic conditions as well as specific economic and other factors believed to be relevant to the Company's loan portfolio. The components of the allowance for loan losses represent an estimation performed pursuant to ASC Topic 450, "Contingencies", and ASC Topic 310, "Receivables" including "Accounting by Creditors for Impairment of a Loan – Income Recognition and Disclosures". See Note 1 on Summary of Significant Accounting Policies for further detail.

The historical loss experience component is based on actual loss experience for a rolling 20-quarter period and the related internal risk rating and category of loans charged-off, including any charge-off on TDRs. The loss migration analysis is performed quarterly, and the loss factors are updated based on actual experience.

Management takes into consideration many internal and external qualitative factors when estimating the additional adjustment for management factors, including:

- Changes in the composition of the loan portfolio, trends in the volume and terms of loans, and trends in delinquent and nonaccrual loans that could indicate that historical trends do not reflect current conditions.
 - Changes in credit policies and procedures, such as underwriting standards and collection, charge-off, and recovery practices.
- Changes in the experience, ability, and depth of credit management and other relevant staff.
- Changes in the quality of the Company's loan review system and board of directors' oversight.
- Changes in the value of the underlying collateral for collateral-dependent loans.
- Changes in the national and local economy that affect the collectability of various segments of the portfolio.
- Changes in other external factors, such as competition and legal or regulatory requirements are considered when determining the level of estimated loss in various segments of the portfolio.

The analysis of these factors involves a high degree of judgment by management. Because of the imprecision surrounding these factors, the Company estimates a range of inherent losses and maintains a general allowance that is not allocated to a specific category. In 2015, the general allowance decreased \$2.0 million, compared to the decrease of \$2.5 million in 2014. Changes in the allowance for loan losses are detailed in Note 5 on the consolidated financial statements of this report.

Table of Contents

Noninterest income

| (in thousands) | Noninterest Income for the Twelve Months ending December 31, | | | Percent Change From | |
|---|--|-----------|-----------|---------------------|-----------|
| | 2015 | 2014 | 2013 | 2015-2014 | 2014-2013 |
| Trust income | \$ 5,953 | \$ 6,198 | \$ 6,339 | (4.0) | (2.2) |
| Service charges on deposits | 6,820 | 7,079 | 7,256 | (3.7) | (2.4) |
| Residential mortgage banking revenue | 7,169 | 4,424 | 8,361 | 62.0 | (47.1) |
| Securities (loss) gains, net | (178) | 1,719 | 2,205 | (110.4) | (22.0) |
| Loss on sale of CDO | - | - | (4,117) | - | - |
| Total Securities gains (loss), net | (178) | 1,719 | (1,912) | (110.4) | 189.9 |
| Increase in cash surrender value of bank-owned life insurance | 1,221 | 1,397 | 1,603 | (12.6) | (12.9) |
| Death benefit realized on bank-owned life insurance | - | - | 381 | - | - |
| Debit card interchange income | 4,028 | 3,806 | 3,458 | 5.8 | 10.1 |
| (Loss) gain on disposal and transfer of fixed assets | (1,119) | (121) | 9 | - | - |
| Other income | 5,400 | 4,714 | 5,688 | 14.6 | (17.1) |
| | \$ 29,294 | \$ 29,216 | \$ 31,183 | 0.3 | (6.3) |

Total noninterest income was essentially unchanged in 2015 from 2014 even though there were several material changes year over year. While trust income and deposit service charges declined, residential mortgage banking revenue showed strong improvement. The Company's residential mortgage operation functioned very efficiently in a difficult rate environment. Also, valuations in the mortgage business improved year over year. The Company incurred a noncash impairment charge of approximately \$1.1 million on the now closed branch in Batavia, Illinois. The Company also recorded revenue of approximately \$917,000 on a one-time payment from a long term service provider. Last, net losses of securities sales of \$178,000 in 2015 compares to net gains on securities sales of \$1.7 million in 2014.

Total noninterest income in 2014 dropped to \$29.2 million from \$31.2 million in 2013 even after the 2013 \$4.1 million loss on the sale of a collateralized debt obligation is considered. Essentially all operating categories were down year over year, most notably residential mortgage banking income on slow residential markets in the Company's selected market areas.

Noninterest expense

| (in thousands) | Noninterest Expense for the Twelve Months ending | | | Percent Change From | |
|---|---|-----------|-----------|---------------------|-----------|
| | December 31, 2015 | 2014 | 2013 | 2015-2014 | 2014-2013 |
| Salaries | \$ 28,173 | \$ 28,440 | \$ 27,853 | (0.9) | 2.1 |
| Bonus | 1,320 | 1,955 | 2,869 | (32.5) | (31.9) |
| Benefits and other | 5,568 | 5,772 | 5,966 | (3.5) | (3.3) |
| Total salaries and employee benefits | 35,061 | 36,167 | 36,688 | (3.1) | (1.4) |
| Occupancy expense, net | 4,749 | 4,963 | 5,032 | (4.3) | (1.4) |
| Furniture and equipment expense | 4,430 | 3,972 | 4,264 | 11.5 | (6.8) |
| FDIC insurance | 1,334 | 2,170 | 4,027 | (38.5) | (46.1) |
| General bank insurance | 1,273 | 1,561 | 2,318 | (18.4) | (32.7) |
| Amortization of core deposit intangible asset | - | 1,177 | 2,099 | - | (43.9) |
| Advertising expense | 1,340 | 1,278 | 1,225 | 4.9 | 4.3 |
| Debit card interchange expense | 1,514 | 1,631 | 1,433 | (7.2) | 13.8 |
| Legal fees | 1,175 | 1,333 | 2,066 | (11.9) | (35.5) |
| Other real estate owned expense, net | 5,191 | 6,917 | 10,747 | (25.0) | (35.6) |
| Other expense | 12,354 | 12,510 | 13,245 | (1.2) | (5.5) |
| Total noninterest expense | \$ 68,421 | \$ 73,679 | \$ 83,144 | (7.1) | (11.4) |

Total noninterest expense decreased by 7.1% in 2015 compared to 2014. Most notably, the Company recorded no amortization expense on the core deposit intangible in 2015 compared to \$1.2 million expense in 2014. Expenses related to the Company's portfolio of properties owned as a result of loan foreclosure declined year over year. General bank insurance decreased on the renewal of company-wide coverages. Salaries and benefits, and FDIC expenses were meaningfully lower year over year. Branch closures in 2014 and 2015 as well as 2015 staff reductions are the main source of this decrease along with strict management attention to control replacement hiring when positions become open.

Table of Contents

Total noninterest expense in 2014 dropped to \$73.7 million compared to \$83.1 million in 2013. Meaningful expense reductions were attained on the cost of FDIC insurance, general bank insurance and legal fees. The most significant expense reduction was realized in the cost of the Company's portfolio of foreclosed properties. These expenses dropped from \$10.7 million in 2013 to \$6.9 million in 2014.

Income taxes

The Company's provision for income taxes includes both federal and state income tax expense (benefit). An analysis of the provision for income taxes for the three years ended December 31, 2015 is detailed in Note 11. The Company income tax accounting policies are described in Note 1.

Income tax expense totaled \$9.0 million for the year ended December 31, 2015 compared to an income tax expense of \$5.8 million in 2014 and an income tax benefit of \$70.2 million in 2013. Income tax expense reflected all relevant statutory tax rates and GAAP accounting.

On September 2, 2015, the Company and the Bank, as rights agent (the "Rights Agent"), entered into a Second Amendment to Amended and Restated Rights Agreement and Tax Benefits Preservation Plan (the "Amendment"), which amended the Amended and Restated Rights Agreement and Tax Benefits Preservation Plan, dated as of September 12, 2012, between the Company and the Rights Agent (as amended, the "Tax Benefits Plan").

The Amendment, which will be submitted to the Company's stockholders for ratification at the Company's 2016 annual meeting, extended the final expiration date of the Tax Benefits Plan from September 12, 2015 to September 12, 2018.

The determination of being able to realize the deferred tax assets is highly subjective and dependent upon judgment concerning management's evaluation of both positive and negative evidence, including forecasts of future income, available tax planning strategies, and assessments of the current and future economic and business conditions. Management considered both positive and negative evidence regarding the Company's ability to ultimately realize the deferred tax assets, which is largely dependent upon the ability to derive benefits based upon future taxable income. As of September 30, 2013, management determined that the realization of most of the deferred tax asset was "more likely than not" as required by accounting principles and reversed a significant portion of an established valuation allowance to reflect this judgment.

The Company considered the federal and state net operating loss carryforwards separately when determining if a valuation allowance was required. After considering tax-planning strategies, the Company reserved a portion of the state net operating loss carryforward management did not anticipate using by December 31, 2016, based on forecasts

made at September 30, 2013. While the state net operating loss carryforward does not begin to expire until 2021, management acknowledges that forecasts are inherently subjective and only periods in the foreseeable future should be considered when determining if net deferred tax assets will be utilized. In each future accounting period, the Company's management will reevaluate whether the current conditions in conjunction with positive and negative evidence support a change in the valuation allowance against the Company's deferred tax assets.

The positive evidence considered included the following: (1) the current quarter results reflect the Company's sixth consecutive quarter of pre-tax earnings (2) reduced nonperforming assets for the eleventh consecutive quarter; and (3) strongly encouraging indications from OCC on the removal of the Consent Order subsequently confirmed with the removal of the Consent Order effective October 17, 2013. Negative evidence considered included the decrease in the Company's net interest margin and reduced noninterest income, primarily from decreased mortgage banking income. The only tax planning strategy considered was selling the Company's bank-owned life insurance which would have resulted in immediate taxable income of approximately \$11.4 million if it had been sold effective September 30, 2013. While the Company did not complete this sale, management did confirm the sale would have been considered in the event a deferred tax asset was close to expiration.

There have been no significant changes in the Company's ability to utilize the deferred tax assets through December 31, 2015. The Company has no valuation reserve on the deferred tax assets as of December 31, 2015.

Table of Contents

Financial condition

General

Total assets increased \$16.1 million, or 0.8%, from December 31, 2014 to close at \$2.08 billion as of December 31, 2015. Loans decreased by 2.2%, to \$1.13 billion over the course of 2015. Management continued to emphasize balance sheet stabilization and credit quality in all lending deliberations and continued to encounter low demand for loans in the Company's target markets. At the same time, net loan charge-off activity reduced balances and collateral that previously secured loans moved to OREO. In total, OREO assets decreased \$12.8 million, or 40.2%, for the year ended December 31, 2015 compared to December 31, 2014, as sale activity and valuation write-downs exceeded new properties added. Total securities increased by \$58.7 million, or 9.1%, for the year ended December 31, 2015, reflecting continued management emphasis on investment securities. Management continued to fund new lending as well as available-for-sale securities and held-to-maturity securities in 2015 consistent with the Company's past practice of utilizing available liquid funds supplemented by short term borrowings from the Federal Home Loan Bank of Chicago (the "FHLBC"). For the year ended December 31, 2015, large dollar purchases were made in asset-backed securities (almost all backed by student loan assets) with most other categories essentially unchanged. At December 31, 2015, the largest changes by loan type included increases in commercial and real estate commercial while holdings of real estate construction and real estate residential loans declined.

Similarly, total assets at year-end 2014 of \$2.06 billion were increased slightly from \$2.00 billion from year-end 2013. Both loans and securities increased in the year while other balance sheet items reflected small decreases. Total deposits increased by an insignificant amount.

Investments

As shown below, net investment purchases during 2015 changed the composition of the Company's securities portfolio.

| (in thousands) | Securities Portfolio as of December | | | Percent Change From | |
|--|-------------------------------------|----------|----------|---------------------|-----------|
| | 31, 2015 | 2014 | 2013 | 2015-2014 | 2014-2013 |
| Securities available-for-sale, at fair value | | | | | |
| U.S. Treasury | \$ 1,509 | \$ 1,527 | \$ 1,544 | (1.2) | (1.1) |
| U.S. government agencies | 1,556 | 1,624 | 1,672 | (4.2) | (2.9) |
| U.S. government agency mortgage-backed | 1,996 | - | - | - | - |

Edgar Filing: OLD SECOND BANCORP INC - Form 10-K

| | | | | | |
|--|------------|------------|------------|-------|--------|
| States and political subdivisions | 30,526 | 22,018 | 16,794 | 38.6 | 31.1 |
| Corporate bonds | 29,400 | 30,985 | 15,102 | (5.1) | 105.2 |
| Collateralized mortgage obligations | 66,920 | 63,627 | 63,876 | 5.2 | (0.4) |
| Asset-backed securities | 231,908 | 173,496 | 273,203 | 33.7 | (36.5) |
| Collateralized loan obligations | 92,251 | 92,209 | - | - | - |
| Total securities available-for-sale | \$ 456,066 | \$ 385,486 | \$ 372,191 | 18.3 | 3.6 |
| Securities held-to-maturity, at amortized cost | | | | | |
| U.S. government agency mortgage-backed | \$ 36,505 | \$ 37,125 | \$ 35,268 | (1.7) | 5.3 |
| Collateralized mortgage obligations | 211,241 | 222,545 | 221,303 | (5.1) | 0.6 |
| Total securities held-to-maturity | \$ 247,746 | \$ 259,670 | \$ 256,571 | (4.6) | 1.2 |
| Total securities | \$ 703,812 | \$ 645,156 | \$ 628,762 | 9.1 | 2.6 |

The Company's total securities show a net increase of \$58.7 million since December 31, 2014. During 2014, holdings in asset-backed securities (primarily securities backed by student loan paper) declined to be largely replaced by collateralized loan obligations and corporate bonds. During 2013, net additions of \$105.7 million in available-for-sale asset-backed securities (again primarily securities backed by student loan paper) were offset by reductions in virtually all other available-for-sale categories along with the adoption in 2013 of a held-to-maturity portfolio. In 2015, the Company increased holdings in asset-backed securities (again securities backed by student loan paper) with only small changes in other categories of securities.

| | \$ 1,133,715 | \$ 1,159,332 | \$ 1,101,256 | (2.2) | 5.3 |

Loan production in the fourth quarter of 2015 continued at the slow pace found earlier in the year. A volume increase in commercial for the year is offset by decreases in real estate loans. Fourth quarter loan production provided a positive close to 2014 and an increase in loans outstanding from the third quarter. This loan production reflects extensive work done earlier in the year to build business origination pipelines. Significant new business was realized during the quarter in the multi-family, commercial real estate (both owner occupied and nonowner occupied) and commercial & industrial classifications. Other commercial real estate credits were realized with relationships in our targeted customer and geographic markets, in one instance via a participation in a transaction originated by a larger Illinois based financial institution. Similarly, significant new commercial & industrial lending was realized to businesses that conform to the Company's profile of customers defined in Company loan policies. Additionally, we strive to serve customers near our geographical locations in communities served by the Company. The Company continues to seek opportunities in its primary lending markets that will develop additional relationship banking customers; however, markets remain very competitive for new loan business.

Total loans were \$1.13 billion as of December 31, 2015, a decrease from \$1.16 billion as of December 31, 2014. Loan production in 2015 declined as compared to the loan growth seen in 2014. Loan results in 2014 represented an increase of \$58.1 million in the year. While the Company worked diligently to rebuild and build loan origination pipelines during 2014 and 2015, the lack of demand from qualified borrowers, including borrower reluctance to drawdown on existing credit lines through the year, as well as the competitive landscape, moderated growth in the loan portfolio. As discussed in the Asset Quality section above, management continued to emphasize loan portfolio quality in 2015 and, as a result, \$1.0 million of net loan charge-offs were recorded in 2015 compared to \$2.3 million of net loan charge-offs recorded in 2014 and \$2.8 million in 2013.

The quality of the loan portfolio is in large part a reflection of the economic health of the communities in which the Company operates. The local economies have been affected by the improved but still difficult economic conditions, referred to by many as structural headwinds that have been experienced nationwide. The less than vibrant economic conditions continue to affect business regions served in particular and financial markets generally. Real estate related activity, including valuations and transactions, while improved from past severe conditions, continues to be less than expansive. Because the Company is located in an area with significant open space and undeveloped real estate, real estate lending (including commercial, residential, and construction) has been and continues to be a sizable portion of the portfolio.

Real estate lending categories comprised the largest group in the portfolio as of December 31, 2015 and December 31, 2014. The commercial loan portfolio increased \$11.2 million to \$130.4 million at December 31, 2015, from \$119.2 million at December 31, 2014. The Company remains committed to overseeing and managing its loan portfolio to avoid unnecessarily high credit concentrations in accordance with the general interagency guidance on risk management. Consistent with those commitments, management updated its asset diversification plan and policy and anticipates that the percentage of real estate lending to the overall portfolio will decrease in the future.

The allowance for loan losses was \$16.2 million at year-end 2015 compared to \$21.6 million and \$27.3 million at year-end 2014 and 2013, respectively. One measure of the adequacy of the allowance for loan losses is the ratio of the allowance to total loans. The allowance for loan losses as a percentage of total loans was 1.4% as of December 31, 2015, compared to 1.9% at year-end 2014 and 2.5% as of December 31, 2013. In management's judgment, an adequate allowance for estimated losses has been established; however, there can be no assurance that losses will not exceed the estimated amounts in the future.

Management remains cautious about the continued slow recovery in the local and overall economic environment. Furthermore, the sustained difficulties in the commercial and investor real estate sector, while showing signs of improvement, could continue to adversely affect collateral values. These events may adversely affect cash flows generally for both commercial and individual borrowers. While portfolio stability has taken hold, the Company could experience undesirable levels of problem assets, delinquencies, and losses on loans in future periods if economic recession or politically triggered economic instability develops.

Table of Contents

Other Real Estate Owned

OREO decreased \$12.8 million from \$32.0 million at December 31, 2014 to \$19.1 million at December 31, 2015. Of note, the year-end 2015 total includes \$468,000 related to a building formerly occupied by a Bank branch, now closed, in Batavia, Illinois. The Bank recorded a loss of approximately \$1.1 million upon the transfer of this property to OREO. A similar reduction in overall holdings is seen at December 31, 2014 compared to December 31, 2013. The Company has successfully managed the reduction of OREO holdings from a total of \$93.3 million at December 31, 2011. The trend of year over year reductions in valuation adjustments continued but at a lower level in 2015 compared to 2014.

| (in thousands) | OREO Properties by Type as | | | Percent Change From | |
|-------------------------------------|----------------------------|-----------|-----------|---------------------|-----------|
| | of December 31, | | | 2015-2014 | 2014-2013 |
| | 2015 | 2014 | 2013 | | |
| Single family residence | \$ 2,334 | \$ 2,621 | \$ 4,658 | (11.0) | (43.7) |
| Lots (single family and commercial) | 10,042 | 13,235 | 15,020 | (24.1) | (11.9) |
| Vacant land | 2,104 | 2,725 | 3,135 | (22.8) | (13.1) |
| Multi-family | 314 | 1,549 | 1,783 | (79.7) | (13.1) |
| Commercial property | 4,347 | 11,852 | 16,941 | (63.3) | (30.0) |
| Total OREO properties | \$ 19,141 | \$ 31,982 | \$ 41,537 | (40.2) | (23.0) |

The OREO valuation reserve ended 2015 at \$14.1 million, which was 42.5% of gross OREO at year-end 2015. This compares to \$19.2 million, or 37.5% of gross OREO at year-end 2014.

Deposits & Borrowings

In 2015, the Company grew total deposits by \$74.0 million, or 4.4%, to a total of \$1.76 billion at year-end 2015. A reduced level of time or certificates of deposits as higher yielding certificates matured in the current lower rate environment was offset by larger increases in transactional demand, money market and savings account balances. These results compare to results in 2014 when the Company saw virtually unchanged total deposits of \$1.68 billion from year-end 2013 to December 31, 2014. Notably, time deposits or certificates of deposit dropped as renewals took place in a very different rate environment. Availability of other liquidity sources reduced the need for deposit funding.

The Company's most significant borrowing relationship continued to be the \$45.5 million credit facility with a correspondent bank. The credit facility was originally composed of a \$30.5 million senior debt facility, which included \$500,000 in term debt, and \$45.0 million of subordinated debt. The Company had remaining debt of \$500,000 in principal outstanding in term debt, and \$45.0 million in principal outstanding in subordinated debt under that facility at the end of December 31, 2015, and December 31, 2014. The term debt is secured by all of the outstanding capital stock of the Bank. The subordinated debt and term debt portion of the senior debt facility mature on March 31, 2018. At December 31, 2015, the Company was in compliance with all of the financial covenants contained within the credit agreement. The Company has made all required interest payments on the outstanding principal amounts on a timely basis.

The Company's borrowings at the FHLBC require the Bank to be a member and invest in the stock of the FHLBC and total borrowings are generally limited to the lower of 35% of total assets or 60% of the book value of certain mortgage loans. The Bank primarily uses these borrowings as a source of short-term funding.

Capital

As of December 31, 2015, total stockholders' equity was \$155.9 million, which was a decrease of \$38.2 million, or 19.7%, from \$194.2 million as of December 31, 2014. This decrease was attributable to the Series B Stock redemption of \$47.3 million conducted during 2015. Accumulated other comprehensive loss on securities net of deferred taxes was \$7.7 million at December 31, 2014, and \$12.7 million at December 31, 2015.

Table of Contents

Recapping important events from 2014 and relevant history, the Company completed the sale of \$32.6 million of cumulative trust preferred securities by its subsidiary, Old Second Capital Trust I in July 2003. These trust preferred securities remain outstanding for a 30-year term, but subject to regulatory approval, they can be called in whole or in part at the Company's discretion after an initial five-year period, which has since passed. The Company does not currently intend to seek regulatory approval to call these securities. Dividends are payable quarterly at an annual rate of 7.80% and are included in interest expense in the consolidated financial statements even when deferred. Likewise, the Company issued an additional \$25.8 million of cumulative trust preferred securities through a private placement completed by a second unconsolidated subsidiary, Old Second Capital Trust II in April 2007. These trust preferred securities also mature in 30 years, but subject to the aforementioned regulatory approval, can be called in whole or in part in 2017. When not in deferral the quarterly cash distributions on the securities are fixed at 6.77% through June 15, 2017 and float at 150 basis points over the three-month LIBOR rate thereafter. The Company entered into a forward starting interest rate swap on August 18, 2015, with an effective date of June 15, 2017. This transaction had a notional amount totaling \$25.8 million as of December 31, 2015, was designated as a cash flow hedge of certain junior subordinated debentures and was determined to be fully effective during the period presented. As such, no amount of ineffectiveness has been included in net income. Therefore, the aggregate fair value of the swap is recorded in other liabilities with changes in fair value recorded in other comprehensive income, net of tax. The amount included in other comprehensive income would be reclassified to current earnings should all or a portion of the hedge no longer be considered effective. The Company expects the hedge to remain fully effective during the remaining term of the swap. The Bank will pay the counterparty a fixed rate and receive a floating rate based on three month LIBOR. Management concluded that it would be advantageous to enter into this transaction given that the Company has trust preferred securities that will change from fixed rate to floating rate on June 15, 2017. The cash flow hedge has a maturity date of June 15, 2037.

The Company is currently paying interest on all trust preferred securities as that interest comes due. As of December 31, 2015, trust preferred proceeds of \$44.1 million qualified as Tier 1 regulatory capital and \$12.5 million qualified as Tier 2 regulatory capital. As of December 31, 2014, trust preferred proceeds of \$56.6 million qualified as Tier 1 regulatory capital. Additionally, \$18.0 million and \$27.0 million of the \$45.0 million in subordinated debt that was obtained to finance the February 2008 acquisition qualified as Tier 2 regulatory capital as of December 31, 2015, and December 31, 2014, respectively.

In January 2009, the Company issued and sold (i) 73,000 shares of Series B Stock and (ii) a warrant to purchase 815,339 shares of its common stock at an exercise price of \$13.43 per share to the Treasury. The total liquidation value of the Series B Stock and the warrant was \$73.0 million at issuance. All of the Series B Stock held by Treasury was sold to third parties, including certain of the Company's directors, in public auctions that were completed in the first quarter of 2013. The warrant was also sold at a subsequent auction to a third party. At December 31, 2014, the Company carried \$47.3 million of Series B Stock in total stockholders' equity. During 2015 the Company redeemed \$15.8 million of Series B Stock in the first quarter of 2015 and the remaining shares in the third quarter of 2015. As of December 31, 2015 the Series B Stock is fully redeemed.

At December 31, 2015, the Bank's Tier 1 capital leverage ratio was 9.94%, down 208 basis points from December 31, 2014. The Bank's total capital ratio was 15.23%, down 350 basis points from December 31, 2014. The Company's regulatory capital ratios of Total capital to risk weighted assets, Tier 1 common equity to risk weighted assets, Tier 1 capital to risk weighted assets and Tier 1 capital to average assets decreased to 15.56%, 10.55%, 12.30%

and 8.69%, at December 31, 2015, respectively, compared to the Company's regulatory capital ratios of Total capital to risk weighted assets, Tier 1 capital to risk weighted assets and Tier 1 capital to average assets to 17.68%, 14.44% and 9.93%, respectively, at December 31, 2014. The Company, on a consolidated basis, exceeded the minimum capital ratios to be deemed "well capitalized" at December 31, 2015 pursuant to the capital requirements in effect at that time. All ratios conform to the regulatory calculation requirements in effect as of the date noted.

At December 31, 2015, and December 31, 2014, the Company, on a consolidated basis, exceeded the minimum thresholds to be considered "adequately capitalized" under current regulatory defined capital ratios. The Company and the Bank are subject to regulatory capital requirements administered by federal banking agencies. Generally, if adequately capitalized, regulatory approval is not required to accept brokered deposits. In addition to the above regulatory ratios, the Company's non-GAAP tangible common equity to tangible assets increased from 7.12% at December 31, 2014, to 7.50% at December 31, 2015, largely attributable to the increased tangible common equity as a result of the redemption of the Series B Stock.

The Company repurchased 21,579 shares for \$117,000 in 2015, resulting in an increase in treasury stock to 4,943,805 shares and \$96.0 million as of December 31, 2015. The Company repurchased 9,600 shares for \$46,000 in 2014, resulting in an increase in treasury stock to 4,922,226 shares and \$95.8 million as of December 31, 2014. Treasury stock repurchased decreases stockholders' equity, but also increases earnings per share by reducing the number of shares outstanding. No stock options were exercised in the years ended December 31, 2015 and 2014.

Liquidity

Liquidity is the Company's ability to fund operations, to meet depositor withdrawals, to provide for customer's credit needs, and to meet maturing obligations and existing commitments. The liquidity of the Company principally depends on cash flows from net operating activities, including pledging requirements, investment in, and both maturity and repayment of assets, changes in balances of deposits and borrowings, and its ability to borrow funds. In addition, the Company's liquidity depends on the Bank's ability to pay dividends, which is subject to certain regulatory requirements. See "Supervision and Regulation". The Company continually monitors

Table of Contents

its cash position and borrowing capacity as well as performs monthly stress tests of contingency funding as part of its liquidity management process. Stress testing of liquidity for contingency funding purposes includes tests that outline scenarios for specifically identified liquidity risk events, which are then aggregated into a Bank-wide assessment of liquidity risk stress levels. The outcomes of these tests are reviewed by management and the Company's Board of Directors monthly.

Net cash inflows from operating activities were \$21.1 million during 2015, compared with outflows of \$6.3 million in 2014 and inflows of \$35.3 million in 2013. Proceeds from sales of loans held-for-sale, net of funds used to originate loans held-for-sale, was a source of inflows for 2015 and 2014. Interest received, net of interest paid, combined with changes in provision for loan losses, and other assets and liabilities were a source of outflows for 2015, and 2014. The Company recorded a deferred income tax benefit of \$70.4 million including a DTA reversal for the year ended December 31, 2013. Management of investing and financing activities, as well as market conditions, determines the level and the stability of net interest cash flows. Management's policy is to mitigate the impact of changes in market interest rates to the extent possible as part of the balance sheet management process.

Net cash outflows from investing activities were \$32.2 million in 2015, compared to net cash outflows of \$66.1 million in 2014 and net cash inflows of \$9.6 million in 2013. In 2015, securities transactions accounted for a net outflow of \$65.9 million, net principal received on loans accounted for net inflows of \$16.1 million, and proceeds from the sales of OREO assets accounted for inflows of \$18.8 million. In 2014, securities transactions accounted for a net outflow of \$12.8 million, and net principal received on loans accounted for net outflows of \$74.3 million whereas proceeds from the sale of OREO assets accounted for inflows of \$22.9 million.

Net cash inflows from financing activities in 2015, were \$7.2 million compared with net cash inflows of \$69.0 million in 2014, while 2013 had net cash outflows of \$125.7 million. Significant cash inflows from financing activities in 2015 included increases of \$74.0 million in deposits and \$13.0 million in securities sold under repurchase agreements. Significant cash outflows from financing activities in 2015 include the Series B Stock redemption of \$47.3 million, \$30.0 million in the reductions of other short-term borrowing and \$2.4 million in dividends paid on the Series B Stock. Significant cash inflows from financing activities in 2014 included the proceeds from the issuance of common stock of \$64.3 million and increases of \$40.0 million in other short-term borrowings. Significant cash outflows from financing activities in 2014 include the Series B Stock redemption of \$24.3 million and \$12.4 million in dividends paid on the Series B Stock.

Contractual Obligations, Commitments, Contingent Liabilities, and Off-balance sheet arrangements

The Company has various financial obligations that may require future cash payments. The following table presents, as of December 31, 2015, significant fixed and determinable contractual obligations (all dollars in thousands) to third parties by payment date:

| | Within One Year | One to Three Years | Three to Five Years | Over Five Years | Total |
|--|--------------------|-----------------------|------------------------|--------------------|--------------|
| Deposits without a stated maturity | \$ 1,351,237 | \$ - | \$ - | \$ - | \$ 1,351,237 |
| Certificates of deposit | 155,633 | 178,258 | 73,958 | - | 407,849 |
| Securities sold under repurchase agreements | 34,070 | - | - | - | 34,070 |

Purchase obligations represent obligations under agreements to purchase goods or services that are enforceable and legally binding on the Company and that specify all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction. The purchase obligation amounts presented above primarily relate to certain contractual payments for services provided for information technology, capital expenditures, and the outsourcing of certain operational activities. The Company routinely enters into contracts for services. These contracts may require payment for services to be provided in the future and may also contain penalty clauses for early termination. In this disclosure, the Company has made an effort to estimate such payments, where applicable. Additionally, where necessary, all data reflects reasonable management estimates as to certain purchase obligations as of December 31, 2015. Management has used the information available to make the estimations necessary to value the related purchase obligations.

Derivative contracts, which include contracts under which the Company either receives cash from, or pays cash to, counterparties reflecting changes in interest rates are carried at fair value on the consolidated balance sheet as disclosed in Note 19 of the Notes to the Consolidated Financial Statements provided in Part II, Item 8, "Financial Statements and Supplementary Data". Because the fair value

Table of Contents

of derivative contracts changes daily as market interest rates change, the derivative assets and liabilities recorded on the balance sheet at December 31, 2015, do not necessarily represent the amounts that may ultimately be paid. As a result, these assets and liabilities are not included in the table of contractual obligations presented above.

Assets under management and assets under custody are held in fiduciary or custodial capacity for clients. In accordance with GAAP, these assets are not included on the Company's balance sheet.

Financial instruments with off-balance sheet risk address the financing needs of our clients. These instruments include commitments to extend credit as well as performance, standby and commercial letters of credit. Further discussion of these commitments is included in Note 14 of the Notes to Consolidated Financial Statements provided in Part II, Item 8, "Financial Statements and Supplementary Data."

The following table details the amounts and expected maturities of significant commitments to extend credit as of December 31, 2015:

| | Within One Year | One to Three Years | Three to Five Years | Over Five Years | Total |
|--|--------------------|-----------------------|------------------------|--------------------|------------|
| Commitment to extend credit: | | | | | |
| Commercial secured by real estate | \$ 8,473 | \$ 7,603 | \$ 2,189 | \$ 4,836 | \$ 23,101 |
| Revolving open end residential | 9,573 | 29,896 | 13,185 | 42,343 | 94,997 |
| Other | 116,479 | 25,520 | 440 | 8,388 | 150,827 |
| Financial standby letters of credit (borrowers) | 3,572 | 55 | 5 | - | 3,632 |
| Performance standby letters of credit (borrowers) | 7,366 | - | 50 | - | 7,416 |
| Commercial letters of credit (borrowers) | 47 | - | - | - | 47 |
| Performance standby letters of credit (others) | 575 | - | - | - | 575 |
| Total | \$ 146,085 | \$ 63,074 | \$ 15,869 | \$ 55,567 | \$ 280,595 |

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

Interest rate risk

As part of its normal operations, the Company is subject to interest-rate risk on the assets it invests in (primarily loans and securities) and the liabilities it funds (primarily customer deposits and borrowed funds), as well as its ability to manage such risk. Fluctuations in interest rates may result in changes in the fair market values of the Company's financial instruments, cash flows, and net interest income. Like most financial institutions, the Company has an exposure to changes in both short-term and long-term interest rates.

In December 2015, the Federal Reserve raised short-term interest rates by 0.25%. It is uncertain whether the Federal Reserve will move short-term interest rates higher during the course of 2016. Generally, the Federal Reserve action has not had a significant impact on long-term rates. The Company manages interest rate risk within guidelines established by policy which limits the amount of rate exposure. In practice, interest rate risk exposure is maintained well within those guidelines and does not pose a material risk to the future earnings of the Company.

The Company manages various market risks in its normal course of operations, including credit, liquidity risk, and interest-rate risk. Other types of market risk, such as foreign currency exchange risk and commodity price risk, do not arise in the normal course of the Company's business activities and operations. In addition, since the Company does not hold a trading portfolio, it is not exposed to significant market risk from trading activities. The changes in the Company's interest rate risk exposures at December 31, 2015, and December 31, 2014, are outlined in the table below.

The Company's net income can be significantly influenced by a variety of external factors, including: overall economic conditions, policies and actions of regulatory authorities, the amounts of and rates at which assets and liabilities reprice, variances in prepayment of loans and securities other than those that are assumed, early withdrawal of deposits, exercise of call options on borrowings or securities, competition, a general rise or decline in interest rates, changes in the slope of the yield-curve, changes in historical relationships between indices (such as LIBOR and prime), and balance sheet growth or contraction. The Company's ALCO seeks to manage interest rate risk under a variety of rate environments by structuring the Company's balance sheet and off-balance sheet positions, which includes interest rate swap derivatives as discussed in Note 19 of the financial statements included in this annual report. The risk is monitored and managed within approved policy limits.

The Company utilizes simulation analysis to quantify the impact of various rate scenarios on net interest income. Specific cash flows, repricing characteristics, and embedded options of the assets and liabilities held by the Company are incorporated into the simulation model. Earnings at risk is calculated by comparing the net interest income of a stable interest rate environment to the net interest income of a different interest rate environment in order to determine the percentage change. Significant declines in interest rates that occurred during the first half of 2012 had made it impossible to calculate valid interest rate scenarios for rate declines of 1.0% or more, a situation that continues to date. As of December 2014, the Company had modest amounts of earnings gains (in both dollars and percentage) should interest rates rise. The gains in the rising rate scenarios increased significantly as of December 2015, due to (1) an interest rate swap to fix the rate on the Company's Old Second Capital Trust II Preferred debt when it changes to floating rate debt in

Table of Contents

June 2017, (2) increases in adjustable-rate loans and securities and (3) increases in checking deposits whose rates change little when market interest rates increase. Management considers the current level of interest rate risk to be moderate, but intends to continue closely monitoring changes in that risk in case corrective actions might be needed in the future. Federal Funds rates and the Bank's prime rate rose 0.25% in December of 2015, to 0.50% and 3.50%, respectively.

The following table summarizes the effect on annual income before income taxes based upon an immediate increase or decrease in interest rates of 0.5%, 1%, and 2% and no change in the slope of the yield curve. The -2% and -1% sections of the table do not show model changes for those magnitudes of decrease due to the low interest rate environment over the relevant time periods.

Analysis of Net Interest Income Sensitivity

| | Immediate Changes in Rates | | | | | |
|-------------------|----------------------------|---------|------------|--------|----------|----------|
| | (2.0) % | (1.0) % | (0.5) % | 0.5 % | 1.0 % | 2.0 % |
| December 31, 2015 | | | | | | |
| Dollar change | N/A | N/A | \$ (1,058) | \$ 711 | \$ 1,569 | \$ 3,339 |
| Percent change | N/A | N/A | (1.9) % | 1.3 % | 2.8 % | 6.1 % |
| December 31, 2014 | | | | | | |
| Dollar change | N/A | N/A | \$ (718) | \$ 264 | \$ 1,086 | \$ 2,243 |
| Percent change | N/A | N/A | (1.2) % | 0.5 % | 1.9 % | 3.9 % |

The amounts and assumptions used in the simulation model should not be viewed as indicative of expected actual results. Actual results will differ from simulated results due to timing, magnitude and frequency of interest rate changes as well as changes in market conditions and management strategies. The above results do not take into account any management action to mitigate potential risk.

Effects of Inflation

In management's opinion, changes in interest rates affect the financial condition of a financial institution to a far greater degree than changes in the inflation rate. While interest rates are greatly influenced by changes in the inflation rate, they do not change at the same rate or in the same magnitude as the inflation rate. Rather, interest rate volatility is based on changes in the expected rate of inflation, as well as on changes in monetary and fiscal policies. A financial institution's ability to be relatively unaffected by changes in interest rates is a good indicator of its capability to perform in today's volatile economic environment. The Company seeks to insulate itself from interest rate volatility by using its best efforts to ensure that rate sensitive assets and rate sensitive liabilities respond to changes in interest rates in a similar time frame and to a similar degree.

Notes to Consolidated Financial Statements

December 31, 2015, 2014 and 2013

(Table amounts in thousands, except per share data)

Note 1: Summary of Significant Accounting Policies

The Company uses the accrual basis of accounting for financial reporting purposes.

Use of Estimates – The preparation of consolidated financial statements in conformity with generally accepted accounting principles (“GAAP”) and following general practices within the banking industry requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Although these estimates and assumptions are based on the best available information, actual results could differ from those estimates.

Principles of Consolidation – The accompanying consolidated financial statements include the accounts and results of operations of the Company and its subsidiaries after elimination of all significant intercompany accounts and transactions. Assets held in a fiduciary or agency capacity are not assets of the Company or its subsidiaries and are not included in the consolidated financial statements.

Cash and Cash Equivalents – For purposes of the Consolidated Statements of Cash Flows, management has defined cash and cash equivalents to include cash and due from banks, interest-bearing deposits in other banks, and other short-term investments, such as federal funds sold and securities purchased under agreements to resell.

Securities – Securities are classified as available-for-sale or held-to-maturity at the time of purchase or transfer.

Securities that are classified as available-for-sale are carried at fair value. Unrealized gains and losses, net of related deferred income taxes, are recorded in stockholders’ equity as a separate component of accumulated other comprehensive income or loss.

Securities held-to-maturity are carried at amortized cost and the discount or premium created at acquisition or in the transfer from available-for-sale is accreted or amortized to the maturity or expected payoff date but not an earlier call.

The historical cost of debt securities is adjusted for amortization of premiums and accretion of discounts over the estimated life of the security, using the level yield method. Amortization of premium and accretion of discount are included in interest income from the related security.

Purchases and sales of securities are recognized on a trade date basis. Realized securities gains or losses are reported in securities gains, net in the Consolidated Statements of Income. The cost of securities sold is based on the specific identification method. On a quarterly basis, the Company makes an assessment (at the individual security level) to determine whether there have been any events or circumstances indicating that a security with an unrealized loss is other-than-temporarily impaired (“OTTI”). In evaluating OTTI, the Company considers many factors, including the severity and duration of the impairment; the financial condition and near-term prospects of the issuer, which for debt securities considers external credit ratings and recent downgrades; its ability and intent to hold the security for a period of time sufficient for a recovery in value; and the likelihood that it will be required to sell the security before a recovery in value, which may be at maturity. The amount of the impairment related to other factors is recognized in other comprehensive income (loss) unless management intends to sell the security or believes it is more likely than not that it will be required to sell the security prior to full recovery.

Federal Home Loan Bank and Federal Reserve Bank Stock – The Company owns the stock of the Federal Home Loan Bank of Chicago (“FHLBC”) and the Federal Reserve Bank of Chicago (“Reserve Bank”). Both of these entities require the Bank to invest in their nonmarketable stock as a condition of membership. The FHLBC is a governmental sponsored entity. The Bank continues to utilize the various products and services of the FHLBC and management considers this stock to be a long-term investment. FHLBC members are required to own a certain amount of stock based on the level of borrowings and other factors, and may invest in additional amounts. FHLBC stock is carried at cost, classified as a restricted security, and periodically evaluated for impairment based on ultimate recovery of par value. The Company’s ability to redeem the shares owned is dependent on the redemption practices of the FHLBC. The Company records dividends in income on the ex-dividend date. Reserve Bank stock is redeemable at par, and therefore market value equals cost.

Loans Held-for-Sale – The Bank originates residential mortgage loans, which consist of loan products eligible for sale to the secondary market. Residential mortgage loans eligible for sale in the secondary market are carried at fair market value. The fair value of loans held-for-sale is determined using quoted secondary market prices on similar loans.

Table of Contents

Loans – Loans held-for-investment are carried at the principal amount outstanding, including certain net deferred loan origination fees and costs. Interest income on loans is accrued based on principal amounts outstanding. Loan and lease origination fees, commitment fees, and certain direct loan origination costs are deferred, and the net amount is amortized over the life of the related loans or commitments as a yield adjustment. Fees related to standby letters of credit, whose ultimate exercise is remote, are amortized into fee income over the estimated life of the commitment. Other credit-related fees are recognized as fee income when earned.

Concentration of Credit Risk – Most of the Company’s business activity is with customers located within Kane, Kendall, DeKalb, DuPage, LaSalle, Will and Cook counties in Illinois. These banking centers surround the Chicago metropolitan area. Therefore, the Company’s exposure to credit risk is significantly affected by changes in the economy in that market area since the Bank generally makes loans within its market. There are no significant concentrations of loans where the customers’ ability to honor loan terms is dependent upon a single economic sector.

Commercial and Industrial Loans – Such credits typically comprise working capital loans, loans for physical asset expansion, asset acquisition loans and other business loans. Loans to closely held businesses will generally be guaranteed in full or for a meaningful amount by the businesses’ major owners. Commercial loans are made based primarily on the historical and projected cash flow of the borrower and secondarily on the underlying collateral provided by the borrower. The cash flows of borrowers, however, may not behave as forecasted and collateral securing loans may fluctuate in value due to economic or individual performance factors. Minimum standards and underwriting guidelines have been established for all commercial loan types.

Commercial Real Estate Loans – Commercial real estate loans are subject to underwriting standards and processes similar to commercial and industrial loans. These are loans secured by mortgages on real estate collateral. Commercial real estate loans are viewed primarily as cash flow loans and the repayment of these loans is largely dependent on the successful operation of the property. Loan performance may be adversely affected by factors impacting the general economy or conditions specific to the real estate market such as geographic location and/or property type.

Residential Real Estate Loans – These are loans that are extended to purchase or refinance 1 – 4 family residential dwellings, or to purchase or refinance vacant lots intended for the construction of a 1 – 4 family home. Residential real estate loans are considered homogenous in nature. Homes may be the primary or secondary residence of the borrower or may be investment properties of the borrower.

Real Estate Construction & Development Loans – The Company defines construction loans as loans where the loan proceeds are controlled by the Company and used exclusively for the improvement of real estate in which the Company holds a mortgage. Due to the inherent risk in this type of loan, they are subject to other industry specific policy guidelines outlined in the Company’s Credit Risk Policy and are monitored closely.

Consumer Loans – Consumer loans include loans extended primarily for consumer and household purposes although they may include very small business loans for the purchase of vehicles and equipment to a single-owner enterprise and could include business purpose lines of credit if made under the terms of a small business product whose features and underwriting criteria are specified in advance by the Loan Committee. These also include overdrafts and other items not captured by the definitions above.

Nonaccrual loans – Generally, commercial loans and loans secured by real estate are placed on nonaccrual status (i) when either principal or interest payments become 90 days or more past due based on contractual terms unless the loan is sufficiently collateralized such that full repayment of both principal and interest is expected and is in the process of collection within a reasonable period or (ii) when an individual analysis of a borrower’s creditworthiness indicates a credit should be placed on nonaccrual status whether or not the loan is 90 days or more past due. When a loan is placed on nonaccrual status, unpaid interest credited to income is reversed. Generally, after the loan is placed on nonaccrual, all debt service payments are applied to the principal on the loan. Nonaccrual loans are returned to accrual status when the financial position of the borrower and other relevant factors indicate there is no longer doubt that the Company will collect all principal and interest due.

Commercial loans and loans secured by real estate are generally charged-off when deemed uncollectible. A loss is recorded at that time if the net realizable value can be quantified and it is less than the associated principal outstanding.

Troubled Debt Restructurings (“TDRs”) – A restructuring of debt is considered a TDR when (i) the borrower is experiencing financial difficulties and (ii) the creditor grants a concession, such as forgiveness of principal, reduction of the interest rate, changes in payments, or extension of the maturity, that it would not otherwise consider. Loans are not classified as TDRs when the modification is short-term or results in only an insignificant delay or shortfall in the payments to be received. The Company’s TDRs are determined on a case-by-case basis in connection with ongoing loan collection processes.

The Company does not accrue interest on any TDRs unless it believes collection of all principal and interest under the modified terms is reasonably assured. For TDRs to accrue interest, the borrower must demonstrate both some level of past performance and the capacity to perform under the modified terms. Generally, six months of consecutive payment performance by the borrower under the restructured terms is required before TDRs are returned to accrual status. However, the period could vary depending on the individual facts and circumstances of the loan. An evaluation of the borrower’s current creditworthiness is used to assess whether the borrower

Table of Contents

has the capacity to repay the loan under the modified terms. This evaluation includes an estimate of expected cash flows, evidence of strong financial position, and estimates of the value of collateral, if applicable.

Impaired Loans – Impaired loans consist of nonaccrual loans and TDRs (both accruing and on nonaccrual). A loan is considered impaired when it is probable that the Company will be unable to collect all contractual principal and interest due according to the terms of the loan agreement based on current information and events. With the exception of TDRs still accruing interest, loans deemed to be impaired are classified as nonaccrual and are exclusive of smaller homogeneous loans, such as home equity, 1-4 family mortgages, and consumer loans.

90-Days or Greater Past Due Loans – 90-days or more past due loans are loans with principal or interest payments three months or more past due, but that still accrue interest. The Company continues to accrue interest if it determines these loans are sufficiently collateralized and the process of collection will conclude within a reasonable time period.

Allowance for Loan Losses – The allowance for loan losses is calculated according to GAAP standards and is maintained by management at a level believed adequate to absorb estimated losses inherent in the existing loan portfolio. Determination of the allowance for loan losses is inherently subjective since it requires significant estimates and management judgment, including the amounts and timing of expected future cash flows on impaired loans, estimated losses on pools of homogeneous loans based on a migration analysis that uses historical loss experience, consideration of current economic trends, and other credit market factors.

Loans deemed to be uncollectible are charged-off against the allowance for loan losses while recoveries of amounts previously charged-off are credited to the allowance for loan losses. Approved releases from previously established loan loss reserves authorized under our allowance methodology also reduce the allowance for loan losses. Additions to the allowance for loan losses are established through the provision for loan losses charged to expense. The amount charged to operating expense depends on a number of factors, including historic loan growth, changes in the composition of the loan portfolio, net charge-off levels, and the Company's assessment of the allowance for loan losses based on the methodology discussed below. The Company had no major methodology changes in 2014. One methodology change, implemented in 2015, reflects the use of average balances in historical required reserve calculations to avoid loss rate impact if loan balances increase or decrease significantly. Previously, period end balances were used in the required reserve calculation. A second methodology change negates quarterly net recovery data in the historical loss rate experience calculations. The previous treatment of net recoveries was seen as a less meaningful treatment of current historical loss experience. The last methodology change replaces the commercial real estate pool management factor with a collateral calculation on balances for special mention and problem accruing loans in the period. This methodology change more accurately reflects all portfolio risk. The result of these methodology changes increased the allowance for loan losses by approximately \$1.3 million. All calculations conform to U. S. generally accepted accounting principles.

The allowance for loan losses methodology consists of (i) specific reserves established for probable losses on individual loans for which the recorded investment in the loan exceeds the present value of expected future cash flows

or the net realizable value of the underlying collateral, if collateral dependent, (ii) an allowance based on a loss migration analysis that uses historical credit loss experience for each loan category, and (iii) the impact as assessed by management in detailed loan review sessions of other internal and external qualitative and credit market factors.

The establishment of the allowance for loan losses involves a high degree of judgment and includes a level of imprecision given the difficulty of identifying and assessing the factors impacting loan repayment and estimating the timing and amount of losses. While management utilizes its best judgment and information available, the ultimate adequacy of the allowance for loan losses is dependent upon a variety of factors beyond the Company's direct control, including the performance of its loan portfolio, the economy, changes in interest rates and property values, and the interpretation of loan risk classifications by regulatory authorities. While each component of the allowance for loan losses is determined separately, the entire balance is available for the entire loan portfolio.

Mortgage Servicing Rights – The Bank is also involved in the business of servicing mortgage loans. Servicing activities include collecting principal, interest, and escrow payments from borrowers, making tax and insurance payments on behalf of the borrowers, monitoring delinquencies, executing foreclosure proceedings, and accounting for and remitting principal and interest payments to the investors. Mortgage servicing rights represent the right to a stream of cash flows and an obligation to perform specified residential mortgage servicing activities.

Mortgage loans that the Company is servicing for others aggregated to \$638.2 million and \$604.2 million at December 31, 2015, and 2014, respectively. Mortgage loans that the Company is servicing for others are not included in the consolidated balance sheets. Fees received in connection with servicing loans for others are recognized as earned. Loan servicing costs are charged to expense as incurred.

Servicing rights are recognized separately as assets when they are acquired through sales of loans and servicing rights are retained. Servicing rights are initially recorded at fair value with the effect recorded in gains on sales of loans on the Consolidated Statements of Income. Fair value is based on market prices for comparable mortgage servicing contracts, when available, or alternatively, is based on a valuation model that calculates the present value of estimated future net servicing income. The valuation model incorporates

Table of Contents

assumptions that market participants would use in estimating future net servicing income, such as the cost to service, the discount rate, the custodial earnings rate, an inflation rate, ancillary income, prepayment speeds and default rates and losses.

Servicing fee income, which is included on the Consolidated Statements of Income as mortgage servicing income, net of fair value changes, is recorded for fees earned for servicing loans. The fees are based on a contractual percentage of the outstanding principal or a fixed amount per loan and are recorded as income when earned.

Under the fair value measurement method, the Company measures mortgage servicing rights at fair value at each reporting date, reports changes in fair value of servicing assets in earnings in the period in which the changes occur, and includes these changes in mortgage servicing gain, net of fair value changes, on the Consolidated Statements of Income. The fair values of mortgage servicing rights are subject to significant fluctuations as a result of changes in estimated and actual prepayment speeds and default rates and losses.

Other Real Estate Owned (“OREO”) – Real estate assets acquired in settlement of loans are recorded at fair value when acquired, less estimated costs to sell, establishing a new cost basis. Any deficiency between the net book value and fair value at the foreclosure or deed in lieu date is charged to the allowance for loan losses. If fair value declines after acquisition, a valuation allowance is established for the decrease between the recorded value and the updated fair value less costs to sell. Such declines are included in other noninterest expense. A subsequent reversal of an OREO valuation adjustment can occur, but the resultant carrying value cannot exceed the cost basis established at transfer to OREO. OREO properties are valued at the lower of cost or fair value less estimated costs to sell. Operating costs after acquisition are also expensed.

Premises and Equipment – Premises, furniture, equipment, and leasehold improvements are stated at cost less accumulated depreciation and amortization. Depreciation expense is determined by the straight-line method over the estimated useful lives of the assets. Leasehold improvements are amortized on a straight-line basis over the shorter of the life of the asset or the lease term including anticipated renewals. Rates of depreciation are generally based on the following useful lives: buildings, 25 to 40 years; building improvements, 3 to 15 years or longer under limited circumstances; and furniture and equipment, 3 to 10 years. Gains and losses on dispositions are included in other noninterest income in the Consolidated Statements of Income. Maintenance and repairs are charged to operating expenses as incurred, while improvements that conform to definitions of tangible property improvements are capitalized and depreciated over the estimated remaining life.

Bank-Owned Life Insurance (“BOLI”) – BOLI represents life insurance policies on the lives of certain Company employees (both current and former) for which the Company is the sole owner and beneficiary. These policies are recorded as an asset on the Consolidated Statements of Financial Condition at their cash surrender value (“CSV”) or the amount that could be realized. The change in CSV and insurance proceeds received are recorded as BOLI income in the Consolidated Statements of Income in noninterest income.

Core Deposit Intangible – The core deposit intangible (“CDI”) was amortized on an accelerated method over its useful life and was fully amortized in 2014.

Loss Contingencies – Loss contingencies, including claims and legal actions arising in the ordinary course of business, are recorded as liabilities when the likelihood of loss is probable and an amount or range of loss can be reasonably estimated. Management does not believe there are such matters that will have a material effect on the financial statements.

Wealth Management – Assets held in a fiduciary or agency capacity for customers are not included in the consolidated financial statements as they are not assets of the Company or its subsidiaries. Fee income is included as a component of noninterest income in the Consolidated Statements of Income.

Advertising Costs – All advertising costs incurred by the Company are expensed in the period in which they are incurred.

Long-term Incentive Plan – Compensation cost is recognized for stock options and restricted stock awards issued to employees based upon the fair value of the awards at the date of grant. A binomial model is utilized to estimate the fair value of stock options, while the market price of the Company’s common stock at the date of grant is used for restricted stock awards. Compensation cost is recognized over the required service period, generally defined as the vesting period. Once the award is settled, the Company would determine whether the cumulative tax deduction exceeded the cumulative compensation cost recognized in the Consolidated Statement of Income. The cumulative tax deduction would include both the deductions from the dividends and the deduction from the exercise or vesting of the award. If the tax benefit received from the cumulative deductions exceeds the tax effect of the recognized cumulative compensation cost, the excess would be recognized as an increase to additional paid-in capital.

Income Taxes – The Company files income tax returns in the U.S. federal jurisdiction and in Illinois. The provision for income taxes is based on income in the consolidated financial statements, rather than amounts reported on the Company’s income tax return. Income tax expense is the total of the current year income tax due or refundable and the change in deferred tax assets and liabilities.

Table of Contents

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using the enacted tax rates that are expected to apply to taxable income in years in which those temporary differences are expected to be recovered or settled. A full valuation allowance was previously established for the deferred tax assets excluding the amount associated with a net unrealized gain or loss on available-for-sale investment securities. Due to the implicit recovery of the book basis of the underlying securities along with management's intent and ability to hold the securities to recovery or maturity, no valuation allowance on this specific deferred tax asset was established. At September 30, 2013, the Company reversed a significant portion of the valuation allowance after an analysis of both positive and negative evidence concerning the likelihood of deferred tax asset recognition under GAAP. The remaining portion of the valuation allowance against the deferred tax assets was reversed in 2014. See Note 11 – Income Taxes for further discussion.

As of December 31, 2015 and 2014, the Company evaluated tax positions taken for filing with the Internal Revenue Service and all state jurisdictions in which it operates. The Company believes that income tax filing positions will be sustained under examination and does not anticipate any adjustments that would result in a material adverse effect on the Company's financial condition, results of operations, or cash flows. Accordingly, the Company has not recorded any reserves or related accruals for interest and penalties for uncertain tax positions at December 31, 2015 and 2014. The Company is currently open to audit under the statute of limitations by the Internal Revenue Service from 2012 to 2014 and the appropriate state income taxing authorities from 2011 to 2014.

Earnings Per Common Share ("EPS") – Basic EPS is computed by dividing net income applicable to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted EPS is computed by dividing net income applicable to common shareholders by the weighted-average number of common shares outstanding plus the number of additional common shares that would have been outstanding if the dilutive potential shares had been issued. The Company's potential common shares represent shares issuable under its long-term incentive compensation plans and under the common stock warrant issued to preferred stockholders. Such common stock equivalents are computed based on the treasury stock method using the average market price for the period.

Treasury Stock – Treasury stock acquired is recorded at cost and is carried as a reduction of stockholders' equity in the Consolidated Balance Sheet. Treasury stock issued is valued based on the "last in, first out" inventory method. The difference between the consideration received upon issuance and the carrying value is charged or credited to additional paid-in capital.

Mortgage Banking Derivatives – As part of ongoing residential mortgage business, the Company enters into mortgage banking derivatives such as forward contracts and interest rate lock commitments. The derivatives and loans held-for-sale are carried at fair value with the changes in fair value recorded in current earnings. The net gain or loss on mortgage banking derivatives is included in gain on sale of loans.

Derivative Financial Instruments – The Company occasionally enters into derivative financial instruments as part of its interest rate risk management strategies. These derivative financial instruments consist primarily of interest rate swaps.

The Company records all derivatives on the balance sheet at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative and whether the Company has elected to designate a derivative as a hedging relationship and apply hedge accounting. A further consideration involves a determination on whether the hedging relationship has satisfied the criteria necessary to apply hedge accounting. Derivatives designated and qualifying as a hedge of the exposure to changes in the fair value of an asset, liability, or firm commitment attributable to a particular risk, such as interest rate risk, are considered fair value hedges. Hedge accounting generally provides for the matching of the timing of gain or loss recognition on the hedging instrument with the recognition of the changes in the fair value of the hedged asset or liability that are attributable to the hedged risk in a fair value hedge or the earnings effect of the hedged forecasted transactions in a cash flow hedge. The Company may enter into derivative contracts that are intended to economically hedge certain risks, even though hedge accounting does not apply or the Company elects not to apply hedge accounting.

If it is determined that the derivative instrument is not highly effective as a hedge, hedge accounting is discontinued, and the adjustment to fair value of the derivative instrument is recorded in earnings. For a derivative used to hedge changes in cash flows associated with forecasted transactions, the gain or loss on the effective portion of the derivative are deferred and reported as a component of accumulated other comprehensive income, which is a component of shareholders' equity, until such time the hedged transaction affects earnings. For derivative instruments not accounted for as hedges, changes in fair value are recognized in noninterest income/expense. Counterparty risk with correspondent banks is considered through loan covenant agreements and, as such, does not have a significant impact on the fair value of the swaps. Deferred gains and losses from derivatives not accounted for as hedges and that are terminated are amortized over the shorter of the original remaining term of the derivative or the remaining life of the underlying asset or liability.

Comprehensive Income – Comprehensive income is the total of reported earnings for all other revenues, expenses, gains, and losses that are not reported in earnings under GAAP. The Company includes the following items, net of tax, in other comprehensive income in the Consolidated Statements of Comprehensive Income: (i) changes in unrealized gains or losses on securities available-for-sale, (ii) changes in unrealized gains or losses on securities held-to-maturity established upon transfer from securities available-for-sale and (iii) the effective portion of a derivative used to hedge cash flows.

Table of Contents

New Accounting Pronouncements: In May 2014, the FASB issued ASU No. 2014-09 "Revenue from Contracts with Customers (Topic 606)." The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. ASU 2014-09 was to be effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. The Company is assessing the impact of ASU 2014-09 on its accounting and disclosures. In August 2015, the FASB issued ASU 2015-14 "Revenue from Contracts with Customers (Topic 606) Deferral of the Effective Date." This accounting standards update defers the effective date for an additional year to be effective for annual reporting periods beginning after December 15, 2017.

Note 2: Cash and Due from Banks

The Bank is required to maintain reserve balances with the Reserve Bank. In accordance with the Reserve Bank requirements, the average reserve balances were \$10.7 million and \$16.0 million, for the years ended December 31, 2015, and 2014, respectively.

The nature of the Company's business requires that it maintain amounts with other banks and federal funds which, at times, may exceed federally insured limits. Management monitors these correspondent relationships, and the Company has not experienced any losses in such accounts. In 2014, the Bank also had a \$4.4 million pledge requirement, met with cash, to a correspondent bank as it relates to credit card processing services and there was no such requirement in 2015.

Note 3: Securities

Investment Portfolio Management

Our investment portfolio serves the liquidity and income needs of the Company. While the portfolio serves as an important component of the overall liquidity management at the Bank, portions of the portfolio will also serve as income producing assets. The size and composition of the portfolio reflects liquidity needs, loan demand and interest income objectives.

Portfolio size and composition will be adjusted from time to time. While a significant portion of the portfolio consists of readily marketable securities to address liquidity, other parts of the portfolio may reflect funds invested pending

future loan demand or to maximize interest income without undue interest rate risk.

Investments are comprised of debt securities and non-marketable equity investments. Until the third quarter of 2013, all debt securities had been classified as available-for-sale. Securities available-for-sale are carried at fair value. Unrealized gains and losses, net of tax, on securities available-for-sale are reported as a separate component of equity. This balance sheet component changes as interest rates and market conditions change. Unrealized gains and losses are not included in the calculation of regulatory capital.

Securities held-to-maturity are carried at amortized cost and the discount or premium created in the 2013 transfer from available-for-sale securities or at the time of purchase thereafter is accreted or amortized to the maturity or expected payoff date but not an earlier call. In accordance with GAAP, the Company has the positive intent and ability to hold the securities to maturity.

Nonmarketable equity investments include FHLBC stock and Reserve Bank stock. FHLBC stock was \$3.7 million and \$4.3 million at December 31, 2015, and December 31, 2014. Reserve Bank stock was \$4.8 million at December 31, 2015, and December 31, 2014. Our FHLBC stock is necessary to maintain access to FHLBC advances.

Table of Contents

The following table summarizes the amortized cost and fair value of the securities portfolio at December 31, 2015 and December 31, 2014 and the corresponding amounts of gross unrealized gains and losses (in thousands):

| | Amortized Cost | Gross Unrealized Gains | Gross Unrealized Losses | Fair Value |
|--|-------------------|------------------------------|-------------------------------|---------------|
| December 31, 2015: | | | | |
| Securities Available-for-Sale | | | | |

| U.S. government agency mortgage-backed | \$ 37,125 | \$ 2,030 | \$ - | \$ 39,155 |
| Collateralized mortgage obligations | 222,545 | 3,005 | (1,439) | 224,111 |
| Total Securities Held-to-Maturity | \$ 259,670 | \$ 5,035 | \$ (1,439) | \$ 263,266 |

During the twelve months ended December 31, 2015, we added \$58.7 million to the total securities portfolio (net of payoffs, maturities, sales, calls, amortization and accretion). This change is largely found in asset-backed securities and, to a lesser amount, states and political subdivisions. Holdings of asset backed securities, primarily securities backed by student loan obligations, were reduced in 2014.

Securities valued at \$340.2 million as of December 31, 2015, (up from \$267.8 million at year-end 2014) were pledged to secure deposits and for other purposes.

57

Table of Contents

The fair value, amortized cost and weighted average yield of debt securities at December 31, 2015, by contractual maturity, were as follows in the table below. Securities not due at a single maturity date are shown separately.

| | Amortized Cost | Weighted Average Yield | | Fair Value |
|---|-------------------|------------------------------|---|---------------|
| Securities Available-for-Sale | | | | |
| Due in one year or less | \$ 17,130 | 1.74 | % | \$ 17,138 |
| Due after one year through five years | 6,897 | 2.92 | % | 6,959 |
| Due after five years through ten years | 34,843 | 2.39 | % | 34,171 |
| Due after ten years | 4,820 | 3.21 | % | 4,723 |
| | 63,690 | 2.33 | % | 62,991 |
| Mortgage-backed and collateralized mortgage obligations | 70,783 | 2.29 | % | 68,916 |
| Asset-backed securities | 241,872 | 1.47 | % | 231,908 |
| Collateralized loan obligations | 94,374 | 3.06 | % | 92,251 |
| | \$ 470,719 | 2.03 | % | \$ 456,066 |
| Securities Held-to-Maturity | | | | |
| Mortgage-backed and collateralized mortgage obligations | \$ 247,746 | 2.78 | % | \$ 251,675 |

At December 31, 2015, the Company's investments include asset-backed securities that are backed by student loans originated under the Federal Family Education Loan program ("FFEL"). Under the FFEL, private lenders made federally guaranteed student loans to parents and students. While the program was modified several times before elimination in 2010, not less than 97% of the outstanding principal amount of the loans made under FFEL are guaranteed by the U.S. Department of Education. A number of major student loan originators packaged loans and sold them as asset-backed securities.

The Company has accumulated the securities of the following three different originators that individually amount to over 10% of the Company's stockholders equity. Information regarding these three issuers and the value of the securities issued follows:

| Issuer | December 31, 2015 | |
|---------------------------------|-------------------|---------------|
| | Amortized Cost | Fair Value |
| College Loan Corporation | \$ 73,293 | \$ 70,254 |
| Nelnet Student Loan | 23,359 | 23,291 |
| GCO Education Loan Funding Corp | 37,508 | 35,263 |

Securities with unrealized losses at December 31, 2015, and December 31, 2014, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, were as follows (in thousands except for number of securities):

Recognition of other-than-temporary impairment was not necessary in the year ended December 31, 2015, or the year ended December 31, 2014. The changes in fair value related primarily to interest rate fluctuations. Our review of other-than-temporary impairment confirmed no credit quality deterioration.

| | Years ended December 31, | | |
|---|--------------------------|------------|------------|
| | 2015 | 2014 | 2013 |

Note 4: Loans

Major classifications of loans were as follows:

| | December 31, 2015 | December 31, 2014 |
|-----------------------------|-------------------|-------------------|
| Commercial | \$ 130,362 | \$ 119,158 |
| Real estate - commercial | 605,721 | 600,629 |
| Real estate - construction | 19,806 | 44,795 |
| Real estate - residential | 351,007 | 370,191 |
| Consumer | 4,216 | 3,504 |
| Overdraft | 483 | 649 |
| Lease financing receivables | 10,953 | 8,038 |
| Other | 10,130 | 11,630 |
| | 1,132,678 | 1,158,594 |
| Net deferred loan costs | 1,037 | 738 |
| | \$ 1,133,715 | \$ 1,159,332 |

It is the policy of the Company to review each prospective credit in order to determine if an adequate level of security or collateral was obtained prior to making a loan. The type of collateral, when required, will vary from liquid assets to real estate. The Company's access to collateral, in the event of borrower default, is assured through adherence to lending law, the Company's lending standards and credit monitoring procedures. The Bank generally makes loans solely within its market area. There are no significant concentrations of loans where the customers' ability to honor loan terms is dependent upon a single economic sector although the real estate related categories listed above represent 86.1% and 87.6% of the portfolio at December 31, 2015, and December 31, 2014, respectively.

1. The "All other" class includes overdrafts and net deferred loan fees and costs.

Credit Quality Indicators:

The Company categorizes loans into credit risk categories based on current financial information, overall debt service coverage, comparison against industry averages, historical payment experience, and current economic trends. This analysis includes loans with outstanding balances or commitments greater than \$50,000 and excludes homogeneous loans such as home equity lines of credit and residential mortgages. Loans with a classified risk rating are reviewed quarterly regardless of size or loan type. The Company uses the following definitions for classified risk ratings:

Special Mention. Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan at some future date.

Substandard. Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize

Table of Contents

the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful. Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Credits that are not covered by the definitions above are pass credits, which are not considered to be adversely rated. Loans listed as not rated have outstanding loans or commitments less than \$50,000 or are included in groups of homogeneous loans.

Credit Quality Indicators by class of loans as of December 31, 2015, and December 31, 2014, were as follows:

| December 31, 2015 | Pass | Special Mention | Substandard 1 | Doubtful | Total |

Troubled debt restructurings (“TDRs”) are loans for which the contractual terms have been modified and both of these conditions exist: (1) there is a concession to the borrower and (2) the borrower is experiencing financial difficulties. Loans are restructured on a case-by-case basis during the loan collection process with modifications generally initiated at the request of the borrower. These modifications may include reduction in interest rates, extension of term, deferrals of principal, and other modifications. The Bank participates in the U.S. Department of the Treasury’s (the “Treasury”) Home Affordable Modification Program (“HAMP”) which gives qualifying homeowners an opportunity to refinance into more affordable monthly payments.

The specific allocation of the allowance for loan losses on a TDR is determined by either discounting the modified cash flows at the original effective rate of the loan before modification or is based on the underlying collateral value less costs to sell, if repayment of the

Table of Contents

loan is collateral-dependent. If the resulting amount is less than the recorded book value, the Bank either establishes a valuation allowance (i.e. specific reserve) as a component of the allowance for loan losses or charges off the impaired balance if it determines that such amount is a confirmed loss. This method is used consistently for all segments of the portfolio.

Loans that were modified during the period are summarized as follows:

| TDR Modifications | | | |
|---------------------------------------|----------------|--------------------------------------|---------------------------------------|
| Twelve months ended December 31, 2015 | | | |
| | # of contracts | Pre-modification recorded investment | Post-modification recorded investment |
| Troubled debt restructurings | | | |
| Real estate - residential | | | |
| Owner occupied | | | |
| Other1 | 2 | \$ 256 | \$ 255 |
| Revolving and junior liens | | | |
| HAMP3 | 5 | 193 | 153 |
| Other1 | 3 | 378 | 347 |
| | 10 | \$ 827 | \$ 755 |

| TDR Modifications | | | |
|---------------------------------------|----------------|--------------------------------------|---------------------------------------|
| Twelve months ended December 31, 2014 | | | |
| | # of contracts | Pre-modification recorded investment | Post-modification recorded investment |
| Troubled debt restructurings | | | |
| Real estate - commercial | | | |
| Other1 | 2 | \$ 1,320 | \$ 1,106 |

| Real estate - residential | | | |
| Investor | | | |
| Other1 | 2 | 237 | 221 |
| Owner occupied | | | |
| Other1 | 1 | 136 | 133 |
| HAMP3 | 2 | 250 | 218 |
| Deferral4 | 2 | 344 | 224 |
| Revolving and junior liens | | | |
| Other1 | 5 | 343 | 334 |
| | 15 | \$ 3,305 | \$ 2,593 |

- ¹ Other: Change of terms from bankruptcy court
- ² Bifurcate: Refers to an “A/B” restructure separated into two notes, charging off the entire B portion of the note.
- ³ HAMP: Home Affordable Modification Program
- ⁴ Deferral: Refers to the deferral of principal

Table of Contents

TDRs are classified as being in default on a case-by-case basis when they fail to be in compliance with the modified terms. The following table presents TDRs that defaulted during the periods shown and were restructured within the 12 month period prior to default.

| Troubled debt restructurings that Subsequently Defaulted | TDR Default Activity Twelve months ended December 31, 2015 | | TDR Default Activity Twelve months ended December 31, 2014 | |
|---|--|---|--|---|
| | # of contracts | Pre-modification outstanding recorded investment | # of contracts | Pre-modification outstanding recorded investment |
| Real estate - commercial | - | \$ - | - | \$ - |
| Owner occupied special purpose | - | - | - | - |
| Real estate - residential | - | - | - | - |
| Investor | - | - | - | - |
| Owner occupied | - | - | 1 | 137 |
| Revolving and junior liens | - | - | 2 | 210 |
| | - | \$ - | 3 | \$ 347 |

The Bank had no commitments to borrowers whose loans were classified as impaired at December 31, 2015.

Loans to principal officers, directors, and their affiliates, which are made in the ordinary course of business, were as follows at December 31:

| | 2015 | 2014 |
|---------------------------------|----------|----------|
| Beginning balance | \$ 7,793 | \$ 6,414 |
| New loans | 864 | 41,810 |
| Repayments and other reductions | (635) | (38,295) |
| Change in related party status | (6,235) | (2,136) |
| Ending balance | \$ 1,787 | \$ 7,793 |

No loans to principal officers, directors, and their affiliates were past due greater than 90 days at either December 31, 2015, or December 31, 2014.

Note 5: Allowance for Loan Losses

Edgar Filing: OLD SECOND BANCORP INC - Form 10-K

Changes in the allowance for loan losses by segment of loans based on method of impairment for the year ended December 31, 2015, were as follows:

Note 8: Deposits

Major classifications of deposits were as follows:

| | 2015 | 2014 |
|--|--------------|--------------|
| Noninterest bearing demand | \$ 442,639 | \$ 400,447 |
| Savings | 252,169 | 239,845 |
| NOW accounts | 376,720 | 328,641 |
| Money market accounts | 279,709 | 296,617 |
| Certificates of deposit of less than \$100,000 | 235,336 | 251,108 |
| Certificates of deposit of \$100,000 through \$250,000 | 109,855 | 112,515 |
| Certificates of deposit of more than \$250,000 | 62,658 | 55,882 |
| | \$ 1,759,086 | \$ 1,685,055 |

The Company had \$3.9 million in brokered certificates of deposit as of December 31, 2015. The Company had \$255,000 in brokered certificates of deposit as of December 31, 2014. Deposits held by senior officers and directors, including their related interests, totaled \$1.6 million and \$15.1 million, respectively, as of December 31, 2015 and 2014.

At December 31, 2015, scheduled maturities of time deposits were as follows:

| | |
|-------|------------|
| 2016 | \$ 155,633 |
| 2017 | 116,127 |
| 2018 | 62,131 |
| 2019 | 24,603 |
| 2020 | 49,355 |
| Total | \$ 407,849 |

Table of Contents

Note 9: Borrowings

The following table is a summary of borrowings as of December 31, 2015, and December 31, 2014. Junior subordinated debentures are discussed in detail in Note 10:

| | 2015 | 2014 |
|---|------------|------------|
| Securities sold under repurchase agreements | \$ 34,070 | \$ 21,036 |
| FHLBC advances ¹ | 15,000 | 45,000 |
| Junior subordinated debentures | 58,378 | 58,378 |
| Subordinated debt | 45,000 | 45,000 |
| Notes payable and other borrowings | 500 | 500 |
| | \$ 152,948 | \$ 169,914 |

¹ Included in other short-term borrowing on the balance sheet.

The Company enters into deposit sweep transactions where the transaction amounts are secured by pledged securities. These transactions consistently mature within 1 to 90 days from the transaction date and are governed by sweep repurchase agreements. All sweep repurchase agreements are treated as financings secured by U.S. government agencies and collateralized mortgage-backed securities and had a carrying amount of \$34.1 million at December 31, 2015, and \$21.0 million at December 31, 2014. The fair value of the pledged collateral was \$45.4 million and \$43.4 million at December 31, 2015 and December 31, 2014, respectively. At December 31, 2015, there were no customers with secured balances exceeding 10% of stockholders' equity.

The following table is a summary of additional information related to repurchase agreements:

| | 2015 | 2014 | 2013 |
|--|-----------|-----------|-----------|
| Average daily balance during the year | \$ 28,194 | \$ 26,093 | \$ 23,313 |
| Average interest rate during the year | 0.01 % | 0.01 % | 0.01 % |
| Maximum month-end balance during the year | \$ 34,785 | \$ 38,133 | \$ 30,510 |
| Weighted average interest rate at year-end | 0.01 % | 0.01 % | 0.01 % |

The Company's borrowings at the FHLBC require the Bank to be a member and invest in the stock of the FHLBC. Total borrowings are generally limited to the lower of 35% of total assets or 60% of the book value of certain mortgage loans. As of December 31, 2015, the Bank had taken an advance of \$15.0 million at 0.16% interest

on the FHLBC stock valued at \$3.7 million, collateralized securities with a fair value of \$98.8 million and loans with a principal balance of \$169.7 million, which carry a combined collateral value of \$190.7 million. The Company has excess collateral of \$174.4 million available to secure borrowings.

One of the Company's most significant borrowing relationships continued to be the \$45.5 million credit facility with a correspondent bank. That credit is composed of \$500,000 in senior term debt, and \$45.0 million of subordinated debt. The subordinated debt and the senior term debt mature on March 31, 2018. The interest rate on the senior debt resets quarterly and at the Company's option, is based on, the lender's prime rate or three-month LIBOR plus 90 basis points. The interest rate on the subordinated debt resets quarterly, and is equal to three-month LIBOR plus 150 basis points. The Company had \$500,000 in principal outstanding in senior term debt and \$45.0 million in principal outstanding in subordinated debt at the end of both December 31, 2015, and December 31, 2014. The term debt is secured by all of the outstanding capital stock of the Bank. The Company has made all required interest payments on the outstanding principal balance on a timely basis.

The credit facility agreement contains usual and customary provisions regarding acceleration of the senior debt upon the occurrence of an event of default by the Company under the senior debt agreement. The senior debt agreement also contains certain customary representations and warranties, and financial covenants. At December 31, 2015, the Company was in compliance with all covenants contained within the credit agreement supporting the \$45.5 million credit facility with a correspondent bank. The agreement provides that noncompliance is an event of default and as the result of the Company's failure to comply with a financial covenant, the lender may (i) terminate all commitments to extend further credit, (ii) increase the interest rate on the revolving line of the term debt by 200 basis points, (iii) declare the senior debt immediately due and payable and (iv) exercise all of its rights and remedies at law, in equity and/or pursuant to any or all collateral documents, including foreclosing on the collateral. The total outstanding principal in senior debt is the \$500,000 in term debt. Because the subordinated debt is treated as Tier 2 capital for regulatory capital purposes, the senior debt agreement does not provide the lender with any rights of acceleration or other remedies with regard to the subordinated debt upon an event of default caused by the Company's failure to comply with a financial covenant.

Table of Contents

Scheduled maturities and weighted average rates of borrowings for the years ended December 31 were as follows:

| | 2015 | | | 2014 | |
|------------|------------|-----------------------------|--|------------|-----------------------------|
| | Balance | Weighted Average Rate | | Balance | Weighted Average Rate |
| 2015 | N/A | N/A | | \$ 66,036 | 0.09 % |
| 2016 | \$ 49,070 | 0.06 % | | - | - |
| 2017 | - | - | | - | - |
| 2018 | 45,500 | 1.82 % | | 45,500 | 1.75 % |
| 2019 | - | - | | - | - |
| 2020 | - | - | | - | - |
| Thereafter | 58,378 | 7.35 % | | 58,378 | 7.35 % |
| Total | \$ 152,948 | 3.37 % | | \$ 169,914 | 3.03 % |

Note 10: Junior Subordinated Debentures

The Company completed the sale of \$27.5 million of cumulative trust preferred securities by its unconsolidated subsidiary, Old Second Capital Trust I in June 2003. An additional \$4.1 million of cumulative trust preferred securities were sold in July 2003. The costs associated with the issuance of the cumulative trust preferred securities are being amortized over 30 years. The trust preferred securities may remain outstanding for a 30 year term but, subject to regulatory approval, can be called in whole or in part by the Company after June 30, 2008 and can be exercised by the Company from time to time thereafter. When not in deferral, distributions on the securities are payable quarterly at an annual rate of 7.80%. The Company issued a new \$32.6 million subordinated debenture to Old Second Capital Trust I in return for the aggregate net proceeds of this trust preferred offering. The interest rate and payment frequency on the debenture are equivalent to the cash distribution basis on the trust preferred securities.

The Company sold an additional \$25.0 million of cumulative trust preferred securities through a private placement completed by an additional, unconsolidated subsidiary, Old Second Capital Trust II, in April 2007. These trust preferred securities also mature in 30 years, but subject to the aforementioned regulatory approval, can be called in whole or in part on a quarterly basis commencing June 15, 2017. The quarterly cash distributions on the securities are fixed at 6.77% through June 15, 2017 and float at 150 basis points over three-month LIBOR thereafter. The Company issued a new \$25.8 million subordinated debenture to the Old Second Capital Trust II in return for the aggregate net

proceeds of this trust preferred offering. The interest rate and payment frequency on the debenture are equivalent to the cash distribution basis on the trust preferred securities.

Under the terms of the subordinated debentures issued to each of Old Second Capital Trust I and II, the Company is allowed to defer payments of interest for 20 quarterly periods without default or penalty, but such amounts continue to accrue. Also during a deferral period, the Company generally may not pay cash dividends on or repurchase its common stock or preferred stock, including the Series B Fixed Rate Cumulative Perpetual Preferred Stock (the "Series B Stock"), as discussed in Note 20. In August of 2010, the Company elected to defer regularly scheduled interest payments on the \$58.4 million of junior subordinated debentures. Because of the deferral on the subordinated debentures, the trusts deferred regularly scheduled dividends on the trust preferred securities. On April 21, 2014, the Company paid all outstanding interest, which totaled \$19.7 million, on the trust preferred securities to the trustees for payment to holders as of the next record date set forth in the indentures and terminated the deferral period. As of December 31, 2015 the Company is current on the payments due on these securities. Both of the debentures issued by the Company are disclosed on the Consolidated Balance Sheet as junior subordinated debentures and the related interest expense for each issuance is included in the Consolidated Statements of Income.

Note 11: Income Taxes

Income tax expense (benefit) for years ending December 31, 2015, 2014 and 2013 were as follows:

| | 2015 | 2014 | 2013 |
|-------------------------------|----------|----------|-------------|
| Current federal | \$ 220 | \$ 122 | \$ 105 |
| Current state | - | 6 | 29 |
| Deferred federal | 7,023 | 3,120 | 2,780 |
| Deferred state | 1,733 | 4,876 | 989 |
| Change in valuation allowance | - | (2,363) | (74,145) |
| | \$ 8,976 | \$ 5,761 | \$ (70,242) |

Table of Contents

The following were the components of the deferred tax assets and liabilities as of December 31, 2015 and December 31, 2014:

| | 2015 | 2014 |
|---|-----------|-----------|
| Allowance for loan losses | \$ 7,099 | \$ 9,579 |
| Deferred compensation | 690 | 787 |
| Amortization of core deposit | 1,629 | 1,859 |
| Goodwill amortization/impairment | 11,623 | 13,129 |
| Stock based compensation | 814 | 663 |
| OREO write-downs | 6,917 | 8,639 |
| Federal net operating loss ("NOL") carryforward | 24,105 | 27,001 |
| State net operating loss ("NOL") carryforward | 8,746 | 9,405 |
| Deferred tax credit | 1,749 | 1,551 |
| Other assets | 792 | 1,006 |
| Total deferred tax assets | 64,164 | 73,619 |
| Accumulated depreciation on premises and equipment | (601) | (802) |
| Mortgage servicing rights | (2,484) | (2,320) |
| State tax benefits | (4,686) | (5,290) |
| Other liabilities | (336) | (394) |
| Total deferred tax liabilities | (8,107) | (8,806) |
| Net deferred tax asset before adjustments related to other comprehensive loss | 56,057 | 64,813 |
| Tax effect of adjustments related to other comprehensive loss | 8,495 | 5,328 |
| Net deferred tax asset | \$ 64,552 | \$ 70,141 |

At December 31, 2015, the Company had a \$68.9 million federal net operating loss carryforward of which, \$13.6 million expires in 2030, \$31.4 million expires in 2031, \$8.6 million expires in 2032, and \$15.3 million expires in 2033. The Company had a \$112.9 million state net operating loss carryforward of which, \$17.2 million expires in 2021, and \$95.7 million expires in 2025. In addition, the Company had a \$1.7 million alternative minimum tax credit subject to indefinite carryforward. Included in the tax effect of adjustments related to other comprehensive loss above are net unrealized losses on held-to-maturity securities that were transferred from available-for-sale securities of \$2.4 million and \$2.8 million as of December 31, 2015 and December 31, 2014, respectively.

The components of the provision for deferred income tax expense (benefit) for the years ending December 31 were as follows:

| | 2015 | 2014 | 2013 |
|---------------------------|----------|----------|----------|
| Provision for loan losses | \$ 2,480 | \$ 3,146 | \$ 5,511 |
| Deferred Compensation | 97 | 1 | (109) |

Edgar Filing: OLD SECOND BANCORP INC - Form 10-K

| | | | |
|--|----------|----------|-------------|
| Amortization of core deposit | 230 | (203) | (691) |
| Stock based compensation | (151) | (80) | 202 |
| OREO write-downs | 1,722 | 1,402 | 6,591 |
| Federal net operating loss carryforward | 2,896 | 1,022 | (7,287) |
| State net operating loss carryforward | 659 | 2,442 | (1,661) |
| Deferred tax credit | (198) | (107) | - |
| Depreciation | (201) | (233) | (28) |
| Net premiums and discounts on securities | - | (8) | (114) |
| Mortgage servicing rights | 164 | (251) | 752 |
| Goodwill amortization/impairment | 1,506 | 2,123 | 1,544 |
| State tax benefits | (604) | (1,704) | (321) |
| Change in valuation allowance | - | (2,363) | (74,145) |
| Other, net | 156 | 446 | (620) |
| Total deferred tax expense | \$ 8,756 | \$ 5,633 | \$ (70,376) |

70

Table of Contents

Effective tax rates differ from federal statutory rates applied to financial statement income (loss) for the years ended December 31 due to the following:

| | 2015 | 2014 | 2013 |
|--|----------|----------|-------------|
| Tax at statutory federal income tax rate | \$ 8,526 | \$ 5,564 | \$ 4,145 |
| Nontaxable interest income, net of disallowed interest deduction | (253) | (233) | (245) |
| BOLI income | (487) | (508) | (694) |
| State income taxes, net of federal benefit | 1,126 | 872 | 662 |
| Change in valuation allowance | - | (2,363) | (74,145) |
| Deficiency from restricted stock | - | - | 10 |
| Impact of Illinois tax rate change | - | 2,363 | - |
| Other, net | 64 | 66 | 25 |
| Tax at effective tax rate | \$ 8,976 | \$ 5,761 | \$ (70,242) |

The Company evaluated positive and negative evidence in order to determine if it was more likely than not that the deferred tax asset would be recovered through future income. Significant positive evidence evaluated included recent and projected earnings, significantly improved asset quality and an improved capital position. Negative evidence identified included a reduction in net interest margin as a result of the current rate environment, and historic runoff of loans.

Note 12: Equity Compensation Plans

There are stock-based awards outstanding under the Company's 2008 Equity Incentive Plan (the "2008 Plan") and the Company's 2014 Equity Incentive Plan (the "2014 Plan," and together with the 2008 Plan, the "Plans"). The 2014 Plan was approved at the 2014 annual meeting of stockholders. Following approval of the 2014 Plan, no further awards will be granted under the 2008 Plan or any other Company equity compensation plan. A maximum of 375,000 shares may be issued under the 2014 Plan. The Plan authorizes the granting of qualified stock options, non-qualified stock options, restricted stock, restricted stock units, and stock appreciation rights. Awards may be granted to selected directors and officers or employees under the 2014 Plan at the discretion of the Compensation Committee of the Company's Board of Directors. As of December 31, 2015, 125,000 shares remained available for issuance under the 2014 Plan.

Total compensation cost that has been charged for the Plans was \$613,000, \$295,000 and \$167,000 for the years ending December 31, 2015, 2014 and 2013.

There were no stock options granted for the years ending December 31, 2015, 2014 or 2013. All stock options are granted for a term of ten years. There were no stock options exercised during the years ending December 31, 2015 or 2014. There is no unrecognized compensation cost related to unvested stock options as all stock options of the Company's common stock have vested.

A summary of stock option activity in the Plans for the year ending December 31, 2015, is as follows:

| | Shares | Weighted Average Exercise Price | Weighted- Average Remaining Contractual Term (years) | Aggregate Intrinsic Value |
|------------------------------|----------|--|--|------------------------------|
| Beginning outstanding | 229,000 | \$ 28.28 | | |
| Canceled | (36,500) | 31.34 | | |
| Expired | (30,000) | 31.34 | | |
| Ending outstanding | 162,500 | \$ 27.03 | 1.6 | \$ - |
| Exercisable at end of period | 162,500 | \$ 27.03 | 1.6 | \$ - |

Generally, restricted stock and restricted stock units granted under the Plans vest three years from the grant date, but the Compensation Committee of the Company's Board of Directors has discretionary authority to change some terms including the amount of time until the vest date.

Awards under the 2008 Plan will become fully vested upon a merger or change in control of the Company. Under the 2014 Plan, upon a change in control of the Company, if (i) the 2014 Plan is not an obligation of the successor entity following the change in control, or (ii) the 2014 Plan is an obligation of the successor entity following the change in control and the participant incurs an involuntary termination, then the stock options, stock appreciation rights, stock awards and cash incentive awards under the 2014 Plan will become fully exercisable and vested. Performance-based awards generally will vest based upon the level of achievement of the applicable performance measures through the change in control.

Table of Contents

The Company granted restricted stock under its equity compensation plans beginning in 2005 and it began granting restricted stock units in February 2009. Restricted stock awards under the Plans generally entitle holders to voting and dividend rights upon grant and are subject to forfeiture until certain restrictions have lapsed including employment for a specific period. Restricted stock units under the Plans are also subject to forfeiture until certain restrictions have lapsed including employment for a specific period, and generally entitle holders to receive dividend equivalents during the restricted period but do not entitle holders to voting rights until the restricted period ends and shares are transferred in connection with the units.

There were 101,500 restricted awards issued during the year ending December 31, 2015. There were 184,500 restricted awards issued for the year ending December 31, 2014. Compensation expense is recognized over the vesting period of the restricted award based on the market value of the award on the issue date.

A summary of changes in the Company's unvested restricted awards for the year ending December 31, 2015, is as follows:

| | December 31, 2015 | |
|--------------------------|---|---|
| | Restricted Stock Shares and Units | Weighted Average Grant Date Fair Value |
| Nonvested at January 1 | 325,000 | \$ 4.15 |
| Granted | 101,500 | 5.38 |
| Vested | (62,500) | 4.13 |
| Forfeited | (16,000) | 4.43 |
| Nonvested at December 31 | 348,000 | \$ 4.50 |

Total unrecognized compensation cost of restricted awards was \$733,000 as of December 31, 2015, which is expected to be recognized over a weighted-average period of 1.92 years.

Note 13: Earnings Per Share

The earnings per share – both basic and diluted – are included below as of December 31 (in thousands except for share data):

Edgar Filing: OLD SECOND BANCORP INC - Form 10-K

| | 2015 | 2014 | 2013 |
|--|------------|------------|------------|
| Basic earnings per share: | | | |
| Weighted-average common shares outstanding | 29,476,821 | 25,300,909 | 13,939,919 |
| Weighted-average common shares less stock based awards | 29,476,821 | 25,298,813 | 13,896,893 |
| Weighted-average common shares stock based awards | - | 201,558 | 209,140 |
| Net income | \$ 15,385 | \$ 10,136 | \$ 82,085 |
| Gain on preferred stock redemption | - | (1,348) | - |
| Preferred stock dividends and accretion, net of dividends waived | 1,873 | (371) | 5,258 |
| Net earnings available to common stockholders | 13,512 | 11,855 | 76,827 |
| Basic earnings per share common undistributed earnings | N/A | 0.46 | 5.45 |
| Basic earnings per share | 0.46 | 0.46 | 5.45 |
| Diluted earnings per share: | | | |
| Weighted-average common shares outstanding | 29,476,821 | 25,300,909 | 13,939,919 |
| Dilutive effect of nonvested restricted awards ¹ | 253,253 | 248,284 | 166,114 |
| Diluted average common shares outstanding | 29,730,074 | 25,549,193 | 14,106,033 |
| Net earnings available to common stockholders | \$ 13,512 | \$ 11,855 | \$ 76,827 |
| Diluted earnings per share | \$ 0.46 | \$ 0.46 | \$ 5.45 |
| Number of antidilutive options and warrants excluded from the diluted earnings per share calculation | 977,839 | 1,044,339 | 1,140,839 |

¹ Includes the common stock equivalents for restricted share rights that are dilutive.

The above earnings per share calculation did not include a warrant for 815,339 shares of common stock that was outstanding as of December 31, 2015, 2014 and 2013, because the warrant was anti-dilutive at an exercise price of \$13.43. Of note, the warrant was sold at auction by the Treasury in June 2013 to a third party investor.

Table of Contents

Note 14: Commitments

In the normal course of business, there are outstanding commitments that are not reflected in the Consolidated Financial Statements. Commitments include financial instruments that involve, to varying degrees, elements of credit, interest rate, and liquidity risk. In management's opinion, these do not represent unusual risks and management does not anticipate significant losses as a result of these transactions. The Company uses the same credit policies in making commitments and conditional obligations for borrowers as it does for on-balance sheet instruments.

The following table is a summary of financial instrument commitments (in thousands):

| | December 31, 2015 | | | December 31, 2014 | | |
|--------------------------|-------------------|------------|------------|-------------------|------------|------------|
| | Fixed | Variable | Total | Fixed | Variable | Total |
| Letters of credit: | | | | | | |
| Borrower: | | | | | | |
| Financial standby | \$ 60 | \$ 3,572 | \$ 3,632 | \$ 55 | \$ 4,745 | \$ 4,800 |
| Commercial standby | - | 47 | 47 | - | 49 | 49 |
| Performance standby | 66 | 7,350 | 7,416 | 416 | 5,690 | 6,106 |
| | 126 | 10,969 | 11,095 | 471 | 10,484 | 10,955 |
| Non-borrower: | | | | | | |
| Performance standby | - | 575 | 575 | - | 572 | 572 |
| | - | 575 | 575 | - | 572 | 572 |
| Total letters of credit | \$ 126 | \$ 11,544 | \$ 11,670 | \$ 471 | \$ 11,056 | \$ 11,527 |
| Unused loan commitments: | \$ 71,016 | \$ 197,909 | \$ 268,925 | \$ 62,391 | \$ 169,717 | \$ 232,108 |

The Bank occupies facilities under long-term operating leases, some of which include provisions for future rent increases. In addition, the Company leases space at sites that house automatic teller machines (ATMs). As of December 31, 2015, the estimated aggregate minimum annual rental commitments under these leases totaled \$50,000 in 2016, \$33,000 in 2017, \$24,000 in 2018, and \$15,000 thereafter. The Company also receives rental income on certain leased properties. As of December 31, 2015, aggregate future minimum rental income to be received under noncancelable leases totaled \$113,000. Total facility net operating lease expense or revenue recorded under all operating leases was a net expense of \$11,000 in 2015 net revenue of \$67,000 in 2014 and \$64,000 in 2013. Total ATM lease expense, including the costs related to servicing those ATM's, was \$826,000, \$829,000 and \$830,000 in 2015, 2014 and 2013, respectively.

Legal proceedings

The Company and its subsidiaries, from time to time, pursue collection suits and other actions that arise in the ordinary course of business against their borrowers and are defendants in legal actions arising from normal business activities. Management, after consultation with legal counsel, believes that the ultimate liabilities, if any, resulting from these actions will not have a material adverse effect on the financial position of the Bank or on the consolidated financial position of the Company based on all known information at this time.

Note 15: Regulatory & Capital Matters

The Bank is subject to the risk-based capital regulatory guidelines, which include the methodology for calculating the risk-weighted Bank assets, developed by the Office of the Comptroller of the Currency (the “OCC”) and the other bank regulatory agencies. In connection with the current economic environment, the Bank’s current level of nonperforming assets and the risk-based capital guidelines, the Bank’s board of directors has determined that the Bank should maintain a Tier 1 leverage capital ratio at or above eight percent (8%) and a total risk-based capital ratio at or above twelve percent (12%). The Bank currently exceeds those thresholds.

Bank holding companies are required to maintain minimum levels of capital in accordance with capital guidelines implemented by the Board of Governors of the Federal Reserve System. The general bank and holding company capital adequacy guidelines in force as of the periods reported are shown in the accompanying table, as are the capital ratios of the Company and the Bank, as of December 31, 2015, and December 31, 2014.

In July 2013, the U.S. federal banking authorities issued final rules (the “Basel III Rules”) establishing more stringent regulatory capital requirements for U.S. banking institutions, which went into effect on January 1, 2015. A detailed discussion of the Basel III Rules is included in Part I, Item 1 of the under the heading “Supervision and Regulation.”

Table of Contents

At December 31, 2015, the Company, on a consolidated basis, exceeded the minimum thresholds to be considered “adequately capitalized” under current regulatory defined capital ratios. For all periods prior to 2015, all capital ratios displayed were calculated without giving effect to the final Basel III capital rules.

The Company and the Bank are subject to regulatory capital requirements administered by federal banking agencies. The capital ratios below are calculated pursuant to the capital requirements in effect for the periods reported below.

Capital levels and industry defined regulatory minimum required levels:

| | Actual Amount | Ratio | Minimum Required for Capital Adequacy Purposes Amount | Ratio | Minimum Required to be Well Capitalized 1 Amount | Ratio |
|--|------------------|---------|--|--------|---|---------|
| 2015 | | | | | | |
| Common equity tier 1 capital to risk weighted assets | | | | | | |
| Consolidated | \$ 151,410 | 10.55 % | \$ 64,582 | 4.50 % | N/A | N/A |
| Old Second Bank | 202,158 | 14.10 | 64,519 | 4.50 | \$ 93,193 | 6.50 % |

| 2014 | | | | | | |
| Total capital to risk weighted assets | | | | | | |
| Consolidated | \$ 240,566 | 17.68 % | \$ 108,853 | 8.00 % | N/A | N/A |
| Old Second Bank | 254,897 | 18.73 | 108,872 | 8.00 | \$ 136,090 | 10.00 % |
| Tier 1 capital to risk weighted assets | | | | | | |
| Consolidated | 196,499 | 14.44 | 54,432 | 4.00 | N/A | N/A |
| Old Second Bank | 237,828 | 17.47 | 54,454 | 4.00 | 81,681 | 6.00 |
| Tier 1 capital to average assets | | | | | | |
| Consolidated | 196,499 | 9.93 | 79,154 | 4.00 | N/A | N/A |
| Old Second Bank | 237,828 | 12.02 | 79,144 | 4.00 | 98,930 | 5.00 |

¹ The Bank exceeded the general minimum regulatory requirements to be considered “well capitalized”.

Dividend Restrictions and Deferrals

In addition to the above requirements, banking regulations and capital guidelines generally limit the amount of dividends that may be paid by a Bank without prior regulatory approval. Under these regulations, the amount of dividends that may be paid in any calendar year is limited to the current year's profits, combined with the retained profit of the previous two years, subject to the capital requirements described above. Pursuant to the Basel III rules that came into effect January 1, 2015, the Bank must keep a buffer of 0.625% in 2016, 1.25% in 2017, 1.875% in 2018, and 2.5% in 2019 and thereafter of minimum capital requirements in order to avoid additional limitations on capital distributions. The Bank has the ability and the authority to pay dividends to the Company.

Table of Contents

Note 16: Mortgage Banking Derivatives

Commitments to fund certain mortgage loans (interest rate locks) to be sold into the secondary market and forward commitments for the future delivery of mortgage loans to third party investors are considered derivatives. It is the Company's practice to sell mortgage-backed securities ("MBS") contracts for the future delivery to economically hedge the effect of changes in interest rates resulting from its commitments to fund the loans. These contracts are also derivatives and collectively with the forward commitments for the future delivery of mortgage loans are considered forward contracts. These mortgage banking derivatives are not designated in hedge relationships using the accepted accounting for derivative instruments and hedging activities at December 31 (dollars in thousands):

| | 2015 | 2014 |
|------------------------|-----------|-----------|
| Forward contracts: | | |
| Notional amount | \$ 15,500 | \$ 14,000 |
| Fair value | 484 | 615 |
| Change in fair value | 21 | (79) |
| Rate lock commitments: | | |
| Notional amount | \$ 10,973 | \$ 10,876 |
| Fair value | 502 | 509 |
| Change in fair value | 167 | 222 |

Fair values were estimated based on changes in mortgage interest rates from the date of the commitments. Changes in the fair values of these mortgage banking derivatives are included in net gains on sales of loans. The Company sold \$190.6 million in loans to investors receiving proceeds of \$196.4 million and resulting in a gain on sale of \$5.8 million for the year ended December 31, 2015. Sales to investors included \$132.7 million or 69.8% to Federal National Mortgage Association and \$33.6 million, or 17.7% to Wells Fargo for the year ended December 31, 2015. No other individual investor was sold more than 10% of the total loans sold.

Periodic changes in value of both forward MBS contracts and rate lock commitments are reported in current period earnings as net gain on sale of mortgage loans. Net gain recognized in earnings for the years ended December 31, 2015, 2014 and 2013 were \$188,000, \$143,000 and \$315,000, respectively.

Note 17: Fair Value Measurements

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The fair value hierarchy established by the Company also requires an entity to

maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Three levels of inputs that may be used to measure fair value are:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the Company has the ability to access as of the measurement date.

Level 2: Significant observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a company's own view about the assumptions that market participants would use in pricing an asset or liability.

Transfers between levels are deemed to have occurred at the end of the reporting period. For the year ended December 31, 2015, the Company transferred auction rate asset-backed securities from Level 3 to Level 2. For the year ended December 31, 2014 there were no significant transfers between levels.

The majority of securities (available-for-sale and held-to-maturity) are valued by external pricing services or dealer market participants and are classified in Level 2 of the fair value hierarchy. Both market and income valuation approaches are utilized. Quarterly, the Company evaluates the methodologies used by the external pricing services or dealer market participants to develop the fair values to determine whether the results of the valuations are representative of an exit price in the Company's principal markets and an appropriate representation of fair value. The Company uses the following methods and significant assumptions to estimate fair value:

- Government-sponsored agency debt securities are primarily priced using available market information through processes such as benchmark spreads, market valuations of like securities, like securities groupings and matrix pricing.
- Other government-sponsored agency securities, MBS and some of the actively traded real estate mortgage investment conduits and collateralized mortgage obligations are priced using available market information including benchmark yields, prepayment speeds, spreads, volatility of similar securities and trade date.

Table of Contents

- State and political subdivisions are largely grouped by characteristics (e.g., geographical data and source of revenue in trade dissemination systems). Because some securities are not traded daily and due to other grouping limitations, active market quotes are often obtained using benchmarking for like securities.
- From December 31, 2013, to December 31, 2014, the Company utilized pricing data from a nationally recognized valuation firm providing specialized securities valuation services for auction rate asset-backed securities. Beginning March 31, 2015, these securities are priced using market spreads, cash flows, prepayment speeds, and loss analytics. Therefore, the valuations of auction rate asset-backed securities were transferred to Level 2 valuations.
- During the third quarter of 2014, asset-backed collateralized loan obligations were acquired and priced using data from a pricing matrix supported by our bond accounting service provider and are therefore considered Level 2 valuations.
- Once each quarter every security holding is priced by a pricing service independent of the regular and recurring pricing services used. The independent service provides a measurement to indicate if the price assigned by the regular service is within or outside of a reasonable range. Management reviews this report and applies judgment in adjusting calculations at quarter end related to securities pricing.
- Residential mortgage loans eligible for sale in the secondary market are carried at fair market value. The fair value of loans held-for-sale is determined using quoted secondary market prices.
- Lending related commitments to fund certain residential mortgage loans, e.g. residential mortgage loans with locked interest rates to be sold in the secondary market and forward commitments for the future delivery of mortgage loans to third party investors as well as forward commitments for future delivery of MBS are considered derivatives. Fair values are estimated based on observable changes in mortgage interest rates including prices for MBS from the date of the commitment and do not typically involve significant judgments by management.
- The fair value of mortgage servicing rights is based on a valuation model that calculates the present value of estimated net servicing income. The valuation model incorporates assumptions that market participants would use in estimating future net servicing income to derive the resultant value. The Company is able to compare the valuation model inputs, such as the discount rate, prepayment speeds, weighted average delinquency and foreclosure/bankruptcy rates to widely available published industry data for reasonableness.
 - Interest rate swap positions, both assets and liabilities, are based on valuation pricing models using an income approach reflecting readily observable market parameters such as interest rate yield curves.
- The fair value of impaired loans with specific allocations of the allowance for loan losses is essentially based on recent real estate appraisals or the fair value of the collateralized asset. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are made in the appraisal process by the appraisers to reflect differences between the available comparable sales and income data. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value.
- Nonrecurring adjustments to certain commercial and residential real estate properties classified as OREO are measured at the lower of carrying amount or fair value, less costs to sell. Fair values are based on third party appraisals of the property, resulting in a Level 3 classification. In cases where the carrying amount exceeds the fair value, less costs to sell, an impairment loss is recognized.

Table of Contents

Assets and Liabilities Measured at Fair Value on a Recurring Basis:

The tables below present the balance of assets and liabilities (dollars in thousands) at December 31, 2015, and December 31, 2014, respectively, measured by the Company at fair value on a recurring basis:

| | December 31, 2015 | | | |
|---|-------------------|------------|----------|------------|
| | Level 1 | Level 2 | Level 3 | Total |
| Assets: | | | | |

| | Year ended December 31, 2014 | | | |
| | Investment securities available-for-sale | | | |
| | Asset- backed | States and Political Subdivisions | Mortgage Servicing Rights | Interest Rate Swap Valuation |
| Beginning balance January 1, 2014 | \$ 154,137 | \$ 125 | \$ 5,807 | \$ (6) |
| Total gains or losses | | | | |
| Included in earnings (or changes in net assets) | 3,556 | - | (1,214) | 6 |
| Included in other comprehensive income | (1,454) | - | - | - |
| Purchases, issuances, sales, and settlements | | | | |
| Purchases | 63,704 | - | - | - |
| Issuances | - | - | 869 | - |
| Settlements | - | (7) | - | - |
| Sales | (167,002) | - | - | - |
| Ending balance December 31, 2014 | \$ 52,941 | \$ 118 | \$ 5,462 | \$ - |

The following table and commentary presents quantitative (dollars in thousands) and qualitative information about Level 3 fair value measurements as of December 31, 2015:

| Measured at fair value on a recurring basis: | Fair Value | Valuation Methodology | Unobservable Inputs | Range of Input | Weighted Average of Inputs |
|--|------------|-----------------------|---------------------|----------------|----------------------------|
| Mortgage Servicing rights | \$ 5,847 | Discounted Cash Flow | Discount Rate | 10.0-15.5% | 10.2 % |
| | | | Prepayment Speed | 6.0-35.2% | 10.1 % |

The following table and commentary presents quantitative (dollars in thousands) and qualitative information about Level 3 fair value measurements as of December 31, 2014:

| Measured at fair value on a recurring basis: | Fair Value | Valuation Methodology | Unobservable Inputs | Range of Input | Weighted Average of Inputs |
|--|------------|---|---------------------|----------------|----------------------------|
| Mortgage Servicing rights | \$ 5,462 | Discounted Cash Flow | Discount Rate | 9.7-108.2% | 10.2 % |
| | | | Prepayment Speed | 5.0-78.4% | 10.9 % |
| Asset-backed securities | 52,941 | Discounted Cash Flow with comparable transaction yields | Credit Risk Premium | 0.9-0.9% | 0.9 % |
| | | | Liquidity Discount | 3.5-3.7% | 3.6 % |

The \$111,000 on the state and political subdivisions line at December 31, 2015, under Level 3 represents a security from a small, local municipality. Given the small dollar amount and size of the municipality involved, this is categorized as Level 3 based on the payment stream received by the Company from the municipality. That payment stream is otherwise an unobservable input.

Table of Contents

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis:

The Company may be required, from time to time, to measure certain other assets at fair value on a nonrecurring basis in accordance with GAAP. These assets consist of impaired loans and OREO. For assets measured at fair value on a nonrecurring basis at December 31, 2015, and December 31, 2014, respectively, the following tables provide the level of valuation assumptions used to determine each valuation and the carrying value of the related assets:

| | December 31, 2015 | | | Total |
|---|-------------------|---------|-----------|-----------|
| | Level 1 | Level 2 | Level 3 | |
| Impaired loans ¹ | \$ - | \$ - | \$ 81 | \$ 81 |
| Other real estate owned, net ² | - | - | 19,141 | 19,141 |
| Total | \$ - | \$ - | \$ 19,222 | \$ 19,222 |

¹ Represents carrying value and related write-downs of loans for which adjustments are substantially based on the appraised value of collateral for collateral-dependent loans, had a carrying amount of \$115,000, with a valuation allowance of \$34,000, resulting in a decrease of specific allocations within the allowance for loan losses of \$243,000 for the year ending December 31, 2015.

² OREO is measured at the lower of carrying or fair value less costs to sell, and had a net carrying amount of \$19.1 million, which is made up of the outstanding balance of \$34.9 million, net of a valuation allowance of \$14.1 million and participations of \$1.7 million, at December 31, 2015.

| | December 31, 2014 | | | Total |
|---|-------------------|---------|-----------|-----------|
| | Level 1 | Level 2 | Level 3 | |
| Impaired loans ¹ | \$ - | \$ - | \$ 564 | \$ 564 |
| Other real estate owned, net ² | - | - | 31,982 | 31,982 |
| Total | \$ - | \$ - | \$ 32,546 | \$ 32,546 |

¹ Represents carrying value and related write-downs of loans for which adjustments are substantially based on the appraised value of collateral for collateral-dependent loans, had a carrying amount of \$842,000, with a valuation allowance of \$278,000, resulting in a decrease of specific allocations within the provision for loan losses of \$2.1 million for the year ending December 31, 2014.

² OREO is measured at the lower of carrying or fair value less costs to sell, and had a net carrying amount of \$32.0 million, which is made up of the outstanding balance of \$53.0 million, net of a valuation allowance of \$19.2 million and participations of \$1.8 million, at December 31, 2014.

The Company also has assets that under certain conditions are subject to measurement at fair value on a nonrecurring basis. These assets include OREO and impaired loans. The Company has estimated the fair values of these assets based primarily on Level 3 inputs. OREO and impaired loans are generally valued using the fair value of collateral provided by third party appraisals. These valuations include assumptions related to cash flow projections, discount rates, and recent comparable sales. The numerical range of unobservable inputs for these valuation assumptions are not meaningful.

Note 18: Fair Values of Financial Instruments

The estimated fair values approximate carrying amount for all items except those described in the following table. Investment security fair values are based upon market prices or dealer quotes, and if no such information is available, on the rate and term of the security. The carrying value of FHLBC stock approximates fair value as the stock is nonmarketable and can only be sold to the FHLBC or another member institution at par. During the years ended December 31, 2015, and 2014, the Company participated in redemptions and a purchase with the FHLBC and, using these transactions values as the carrying value, FHLBC stock is carried at a Level 2 fair value. Fair values of loans were estimated for portfolios of loans with similar financial characteristics, such as type and fixed or variable interest rate terms. Cash flows were discounted using current rates at which similar loans would be made to borrowers with similar ratings and for similar maturities. The fair value of time deposits is estimated using discounted future cash flows at current rates offered for deposits of similar remaining maturities. The fair values of borrowings were estimated based on interest rates available to the Company for debt with similar terms and remaining maturities. The fair value of off balance sheet volume is not considered material. The fair value of mortgage banking derivatives is discussed above in Note 16.

Table of Contents

The carrying amount and estimated fair values of financial instruments were as follows:

| | December 31, 2015 | | | | |
|---|--------------------|---------------|------------|-----------|-----------|
| | Carrying Amount | Fair Value | Level 1 | Level 2 | Level 3 |

Note 19: Financial Instruments with Off-Balance Sheet Risk and Derivative Transactions

To meet the financing needs of its customers, the Bank, as a subsidiary of the Company, is a party to various financial instruments with off-balance-sheet risk in the normal course of business. These off-balance-sheet financial instruments include commitments to originate and sell loans as well as financial standby, performance standby and commercial letters of credit. The instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheet. The Bank's exposure to credit loss for loan commitments and letters of credit is represented by the dollar amount of those instruments.

Table of Contents

Management generally uses the same credit policies and collateral requirements in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Interest Rate Swap Designated as a Cash Flow Hedge

The Company entered into a forward starting interest rate swap on August 18, 2015, with an effective date of June 15, 2017. This transaction had a notional amount totaling \$25.8 million as of December 31, 2015, was designated as a cash flow hedge of certain junior subordinated debentures and was determined to be fully effective during the period presented. As such, no amount of ineffectiveness has been included in net income. Therefore, the aggregate fair value of the swap is recorded in other liabilities with changes in fair value recorded in other comprehensive income, net of tax. The amount included in other comprehensive income would be reclassified to current earnings should all or a portion of the hedge no longer be considered effective. The Company expects the hedge to remain fully effective during the remaining term of the swap. The Bank will pay the counterparty a fixed rate and receive a floating rate based on three month LIBOR. Management concluded that it would be advantageous to enter into this transaction given that the Company has trust preferred securities that will change from fixed rate to floating rate on June 15, 2017. The cash flow hedge has a maturity date of June 15, 2037.

Summary information about the interest rate swap designated as a cash flow hedge is as follows:

| | As of | |
|-----------------|-------------------|-------------------|
| | December 31, 2015 | December 31, 2014 |
| Notional amount | \$ 25,774 | \$ - |
| Unrealized loss | (631) | - |

Interest Rate Swaps

The Bank also has interest rate derivative positions to assist with risk management that are not designated as hedging instruments. These derivative positions relate to transactions in which the Bank enters an interest rate swap with a client while at the same time entering into an offsetting interest rate swap with another financial institution. Due to financial covenant violations relating to nonperforming loans, the Bank had \$2.4 million in investment securities pledged to support interest rate swap activity with two correspondent financial institutions at December 31, 2015. The Bank had \$3.0 million in investment securities pledged to support interest rate swap activity with three correspondent financial institutions at December 31, 2014.

In connection with each transaction, the Bank agreed to pay interest to the client on a notional amount at a variable interest rate and receive interest from the client on the same notional amount at a fixed interest rate. At the same time, the Bank agreed to pay another financial institution the same fixed interest rate on the same notional amount and receive the same variable interest rate on the same notional amount. The transaction allows the client to convert a variable rate loan to a fixed rate loan and is part of the Company's interest rate risk management strategy. Because the Bank acts as an intermediary for the client, changes in the fair value of the underlying derivative contracts offset each other and do not generally affect the results of operations. At December 31, 2015, the notional amount of non-hedging interest rate swaps was \$20.7 million with a weighted average maturity of 5.1 years. At December 31, 2014, the notional amount of non-hedging interest rate swaps was \$16.3 million with a weighted average maturity of 2.7 years. The Bank offsets derivative assets and liabilities that are subject to a master netting arrangement.

The Bank also grants mortgage loan interest rate lock commitments to borrowers, subject to normal loan underwriting standards. The interest rate risk associated with these loan interest rate lock commitments is managed with contracts for future deliveries of loans as well as selling forward mortgage-backed securities contracts. Loan interest rate lock commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Commitments to originate residential mortgage loans held-for-sale and forward commitments to sell residential mortgage loans or forward MBS contracts are considered derivative instruments and changes in the fair value are recorded to mortgage banking revenue. Fair values are estimated based on observable changes in mortgage interest rates including mortgage-backed securities prices from the date of the commitment.

Table of Contents

The following table presents derivatives not designated as hedging instruments as of December 31, 2015, and periodic changes in the values of the interest rate swaps are reported in other noninterest income. Periodic changes in the value of the forward contracts related to mortgage loan origination are reported in the net gain on sales of mortgage loans.

| | Notional or Contractual Amount | Asset Derivatives | | Liability Derivatives | |
|--------------------------------|--------------------------------|------------------------|------------|------------------------|------------|
| | | Balance Sheet Location | Fair Value | Balance Sheet Location | Fair Value |
| Interest rate swap contracts | \$ 20,708 | Other Assets | \$ 114 | Other Liabilities | \$ 114 |
| Commitments ¹ | 226,346 | Other Assets | 188 | N/A | - |
| Forward contracts ² | 15,500 | N/A | - | Other Liabilities | - |
| Total | | | \$ 302 | | \$ 114 |

¹ Includes unused loan commitments and interest rate lock commitments.

² Includes forward MBS contracts and forward loan contracts.

The following table presents derivatives not designated as hedging instruments as of December 31, 2014.

| | Notional or Contractual Amount | Asset Derivatives | | Liability Derivatives | |
|--|--------------------------------|------------------------|------------|------------------------|------------|
| | | Balance Sheet Location | Fair Value | Balance Sheet Location | Fair Value |
| Interest rate swap contracts net of credit valuation | \$ 16,334 | Other Assets | \$ 30 | Other Liabilities | \$ 30 |
| Commitments ¹ | 201,946 | Other Assets | 143 | N/A | - |
| Forward contracts ² | 14,000 | N/A | - | Other Liabilities | - |
| Total | | | \$ 173 | | \$ 30 |

¹ Includes unused loan commitments and interest rate lock commitments.

² Includes forward MBS contracts.

Note 20: Preferred Stock

The Series B Stock was issued as part of the Treasury's Troubled Asset Relief Program and Capital Purchase Program (the "CPP"). The Series B Stock qualifies as Tier 1 capital and pays cumulative dividends on the liquidation preference

amount on a quarterly basis at a rate of 5% per annum for the first five years, and 9% per annum thereafter effective in February 2014. Concurrent with issuing the Series B Stock, the Company issued to the Treasury a ten year warrant to purchase 815,339 shares of the Company's common stock at an exercise price of \$13.43 per share.

Subsequent to the Company's receipt of the \$73.0 million in proceeds from the Treasury in the first quarter of 2009, the Company allocated the proceeds between the Series B Stock and the warrant that was issued. The Company recorded the warrant as equity, and the allocation was based on their relative fair values in accordance with accounting guidance. The fair value was determined for both the Series B Stock and the warrant as part of the allocation process in the amounts of \$68.2 million and \$4.8 million, respectively.

In the second quarter of 2014, the Company completed redemption of 25,669 shares of its Series B Stock at a price equal to 94.75% of liquidation value or \$24.3 million (including \$1.4 million to Company Directors) provided that the holders of shares entered into agreements to forebear payment of dividends due and to waive any rights to such dividends upon redemption. The Company redeemed 15,778 shares of its Series B Stock in the first quarter of 2015 and the remaining 31,553 shares of its Series B Stock in the third quarter of 2015. During the year ending December 31, 2015 and 2014, the Company paid \$2.4 million and \$12.4 million in dividends on the Series B Stock, respectively. At December 31, 2015, the Company has fully redeemed the Series B Stock. At December 31, 2014, the Company carried \$47.3 million of Series B Stock in total stockholders' equity.

Note 22: Employee Benefit Plans

Old Second Bancorp, Inc. Employees 401(k) Savings Plan and Trust

The Company sponsors a qualified, tax-exempt defined contribution plan (the "Plan") qualifying under section 401(k) of the Internal Revenue Code. Virtually all employees are eligible to participate after meeting certain age and service requirements. Eligible employees are permitted to contribute up to a dollar limit set by law of their compensation to the Plan. For the years ended December 31, 2015, 2014 and 2013, a discretionary match equal to 100% of the first 2% of the participant's compensation was contributed to participants of the Plan. Participants are 100% vested in the discretionary matching contributions. The profit sharing portion of the Plan arrangement provides an annual discretionary contribution to the retirement account of each employee based in part on the Company's profitability in a given year, and on each participant's annual compensation. Participants can choose between several different

investment options under the Plan, including shares of the Company's common stock.

The total expense relating to the Plan was approximately \$464,000, \$477,000 and \$468,000 in 2015, 2014 and 2013, respectively.

Old Second Bancorp, Inc. Voluntary Deferred Compensation Plan for Executives

The Company sponsors an executive deferred compensation plan, which is a means by which certain executives may voluntarily defer a portion of their salary or bonus. This plan is an unfunded, nonqualified deferred compensation arrangement. Company obligations under this arrangement as of December 31, 2015, 2014 and 2013 were \$1.6 million, \$1.9 million and \$1.8 million, respectively, and are included in other liabilities.

Report of Independent Registered Public Accounting Firm

Board of Directors and Shareholders

Old Second Bancorp, Inc. and Subsidiaries

Aurora, Illinois

We have audited the accompanying consolidated balance sheets of Old Second Bancorp, Inc. and Subsidiaries as of December 31, 2015 and 2014, and the related consolidated statements of income, comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended December 31, 2015. The Company's management is responsible for these financial statements. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. Our audits included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Old Second Bancorp, Inc. and Subsidiaries as of December 31, 2015 and 2014, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2015, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Old Second Bancorp, Inc. and Subsidiaries' internal control over financial reporting as of December 31, 2015, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 10, 2016, expressed an unqualified opinion thereon.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures, as defined in Rule 13a-15(e) promulgated under the Securities and Exchange Act of 1934, as amended, as of December 31, 2015. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that as of December 31, 2015, the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms and such information is accumulated and communicated to the issuer's management, including its principal executive and principal financial officers as appropriate to allow timely decisions regarding required disclosure.

There were no changes in the Company's internal control over financial reporting during the quarter ended December 31, 2015, that have materially affected or are reasonably likely to affect, the Company's internal control over financial reporting.

Management's Report on Internal Control Over Financial Reporting

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934. The Company's internal control over financial reporting is a process designed under the supervision of the Company's Chief Executive Officer and Chief Financial Officer to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company's financial statements for external reporting purposes in accordance with U.S. generally accepted accounting principles.

As of December 31, 2015, management assessed the effectiveness of the Company's internal control over financial reporting based on the framework established in the "Internal Control - Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation, management has determined that the Company's internal control over financial reporting was effective as of December 31, 2015, based on the criteria specified.

Plante & Moran PLLC, the independent registered public accounting firm that audited the consolidated financial statements of the Company incorporated by reference to this Annual Report on Form 10-K, has issued an attestation report, included herein, on the Company's internal control over financial reporting as of December 31, 2015.

Table of Contents

Report of Independent Registered Public Accounting Firm

Board of Directors and Shareholders

Old Second Bancorp, Inc. and Subsidiaries

Aurora, Illinois

We have audited Old Second Bancorp, Inc. and Subsidiaries' internal control over financial reporting as of December 31, 2015, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (referred to as "COSO"). Old Second Bancorp, Inc. and Subsidiaries' management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying "Management's Report on Internal Control Over Financial Reporting." Our responsibility is to express an opinion on Old Second Bancorp, Inc. and Subsidiaries' internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Old Second Bancorp, Inc. and Subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2015, based on criteria established in Internal Control - Integrated Framework issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Old Second Bancorp, Inc. and Subsidiaries as of December 31, 2015, and the related consolidated statements of income, comprehensive income, changes in stockholders' equity and cash flows for the year then ended, and our report dated March 10, 2016, expressed an unqualified opinion on those financial statements.

Item 9B. Other Information

On March 9, 2016, the Company amended its Certificate of Incorporation to eliminate all references to the Company's Fixed Rate Cumulative Perpetual Preferred Stock, Series B (the "Series B Stock"), since no shares of the Series B Stock remained outstanding, or would be issued in the future, following the redemption of all outstanding shares of Series B Stock in August 2015. A copy of the Company's Certificate of Incorporation reflecting this amended is filed with this Annual Report on Form 10-K as Exhibit 3.1.

In addition, on March 9, 2016, the Company's board of directors amended the Company's bylaws to (i) restore the right of the Company's stockholders to call a special meeting upon the written request of stockholders owning at least 50% of the shares of the Company issued and outstanding and entitled to vote, (ii) adopt a majority voting standard for the election of directors, with a plurality standard in the case of contested elections, and (iii) restore the right of the Company's stockholders to, in the event the directors in office at the time of the creation of any vacancy on the board of directors constitute less than a majority of the entire board of directors, petition the Court of Chancery to order an election of directors to fill such vacancies. A copy of the Company's Amended and Restated Bylaws reflecting this amendment is filed with this Annual Report on Form 10-K as Exhibit 3.2.
