Item 7.01 Regulation FD Disclosure

GM Statement on Delphi Price Agreement

General Motors Corp. (NYSE: GM) today confirmed that it has agreed to temporarily forgo previously agreed-to 2006 price reductions on components supplied by Delphi Corp. to GM while Delphi is in talks with its unions on a new labor contract.

As we have been saying, GM will continue to work constructively in the bankruptcy court proceedings with Delphi, its unions and other participants in Delphi's restructuring process in an effort to achieve outcomes that are in the best interests of GM and its stockholders and that enable Delphi to continue to be an important supplier to GM.

In this statement and in related comments by General Motors management, our use of the words "expect", "anticipate", "design," "estimate", "forecast", "initiative," "objective", "plan", "goal", "project", "outlook", "priorities," "targets", "intend", "evaluate," "seek" and similar expressions is intended to identify forward looking statements. While these statements represent our current judgment on what the future may hold, and we believe these judgments are reasonable, actual results may differ materially due to numerous important factors that are described in GM's most recent report on SEC Form 10-K which may be revised or supplemented in subsequent reports on SEC Forms 10-Q and 8-K. Such factors include, among others, the following: the ability of GM to complete a transaction with a strategic investor regarding a controlling interest in GMAC while maintaining a significant stake in GMAC, securing separate credit ratings and low cost funding to sustain growth for GMAC and ResCap and maintaining the mutually beneficial relationship between GMAC and GM; changes in relations with unions and employees/retirees and the legal interpretations of the agreements with those unions with regard to employees/retirees; changes in economic conditions, currency exchange rates or political stability; shortages of and price increases for fuel, labor strikes or work stoppages; health care costs; market acceptance of the corporation's new products; pace of product introductions; significant changes in the competitive environment; changes in laws, regulations and tax rates; and, the ability of the corporation to achieve reductions in cost and employment levels to realize production efficiencies and implement capital expenditures at levels and times planned by management.
