MESA LABORATORIES, INC. NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2000 AND 1999

NOTE A. SUMMARY OF ACCOUNTING POLICIES

The summary of the Issuer's significant accounting policies is incorporated by reference to the Company's annual report on Form 10KSB, at March 31, 2000.

The accompanying unaudited condensed financial statements reflect all adjustments, which, in the opinion of management, are necessary for a fair presentation of the results of operations, financial position and cash flows. The results of the interim period are not necessarily indicative of the results for the full year.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF

OPERATIONS

LIQUIDITY AND CAPITAL RESOURCES

On December 31, 2000, the Company had cash and short term investments of \$2,847,332. In addition, the Company had other current assets totaling \$5,597,156 and total current assets of \$8,444,488. Current liabilities of Mesa Laboratories, Inc. were \$968,605 which resulted in a current ratio of 8.7:1.

The Company has made net capital asset purchases of \$80,053 for the fiscal year-to-date.

The Company has instituted a program to repurchase up to 500,000 shares of its outstanding common stock. Under the plan, the shares may be purchased from time to time in the open market at prevailing prices or in negotiated transactions off the market. Shares purchased will be canceled and repurchases will be made with existing cash reserves. During the first nine months of the current fiscal year, the Company repurchased 157,051 shares of its outstanding common stock.

RESULTS OF OPERATIONS

REVENUE

Net sales for the nine months ended December 31, 2000 increased \$670,570 or 11% to \$6,616,902 from the \$5,946,332 net sales level achieved for the same nine month period last year. Net sales for the quarter decreased \$266,864 or 12% to \$2,010,386 from the \$2,277,250 net sales level achieved in the same quarter last year. For the first nine months, Medical products increased over 100% which was off-set by 24% decreases in Nusonics and Datatrace sales. The Medical products sales increase was attributable to the addition of the Automata product line. Nusonics products continued its downward trend for the first nine months. The Datatrace line suffered a decrease of 24% during the first nine months. This decline was attributable to a decrease in international sales when compared to the same period last year. In total, third fiscal quarter sales were affected by production delays due to parts shortages. At quarter end, the Company was carrying a backlog of over \$400,000 which was more than double normal levels.

COST OF GOODS SOLD

Cost of goods sold for the first nine months as a percent of net sales was 37% which represents a 3% increase from the 34% level for the same nine month period last year. Cost of goods sold for the current quarter as a percent of net sales was 36%, representing a 4% increase compared to the 32% level in the same quarter last year. The increase realized during the first nine months of fiscal 2001 was attributable to changing mix of products sold due to the addition of the new Automata products and increasing sales of Reprocessing products.

SELLING, GENERAL AND ADMINISTRATIVE

Selling, general and administrative expenses for the first nine

months increased 6% or \$114,411 to \$1,880,903 from \$1,766,492 in the same period last year.

For the current quarter, selling, general and administrative expenses totaled \$611,497, which was down 17% or \$123,306 from \$734,803 expended in the same quarter one year ago. For the first nine months, marketing expenses accounted for a decrease of less than one percent with Medical marketing expenses gaining 58% from the prior year and Nusonics marketing expenses decreasing over 37%. The increased marketing expense for the Medical products can be attributed to increased advertising, compensation and telephone costs in marketing its new Automata products and is lower than the rate of increase in Medical sales dollars. Decreased Nusonics marketing expenses are attributed to lower commission and advertising costs. For the first nine months, Datatrace marketing costs decreased 13%. Administration costs for the first nine months increased 14% due to increased amortization and consultant expense associated with the acquisition of Automata Instrumentation, Inc.

RESEARCH AND DEVELOPMENT

Research and development for the first nine months decreased to \$203,430 from \$204,617 which represents a decrease of less than 1% from the same period last year. Research and development for the quarter was \$77,683 which represents an increase of \$3,969 or 5% from the \$73,714 level expensed in the same quarter last year. During the first nine months of fiscal 2001, the change in research and development costs was negligible. For the third fiscal quarter, spending increased due mainly to increased labor costs for prototype development of the Company's new Datatrace logging products.

NET INCOME

Net income for the nine months ended December 31, 2000 increased 5% to \$1,437,256 or \$.38 per share from \$1,373,789 or \$.36 per share last year. Net income for the quarter was \$408,600 or \$.11 per share compared to net income of \$513,630 or \$.14 per share in the same quarter last year. During the first nine months, net income increased due chiefly to increased revenue levels. This increase for the periods was partially off-set by higher amortization costs and lower interest income due to the acquisition of Automata Instrumentation, Inc. For the fiscal third quarter, net income decreased due chiefly to lower revenue levels.

PART II-OTHER INFORMATION None.
