ADOBE SYSTEMS INCORPORATED
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

77-0019522
(I.R.S. Employer
Identification No.)

345 Park Avenue, San Jose, California 95110-2704
(Address of principal executive offices)
(408) 536-6000
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

| Title of Each Class | Name of Each Exchange on Which Registered |
|--|--|
| Common Stock, \$0.0001 par value per share | The NASDAQ Stock Market LLC (NASDAQ Global Select Market) |

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or

Edgar Filing: ADOBE SYSTEMS INC - Form 10-K

information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☒ Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

| | | | |
|--|---|--|---|
| Large accelerated filer <input checked="" type="checkbox"/> | Accelerated filer <input type="checkbox"/> | Non-accelerated filer <input type="checkbox"/> (Do not check if a smaller reporting company) | Smaller reporting company <input type="checkbox"/> |
|--|---|--|---|

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒

The aggregate market value of the registrant's common stock, \$0.0001 par value per share, held by non-affiliates of the registrant on May 31, 2013, the last business day of the registrant's most recently completed second fiscal quarter, was \$17,106,099,177 (based on the closing sales price of the registrant's common stock on that date). Shares of the registrant's common stock held by each officer and director and each person who owns 5% or more of the outstanding common stock of the registrant have been excluded in that such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes. As of January 17, 2014, 496,604,463 shares of the registrant's common stock, \$0.0001 par value per share, were issued and outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Proxy Statement for the registrant's 2014 Annual Meeting of Stockholders (the "Proxy Statement"), to be filed within 120 days of the end of the fiscal year ended November 29, 2013, are incorporated by reference in Part III hereof. Except with respect to information specifically incorporated by reference in this Form 10-K, the Proxy Statement is not deemed to be filed as part hereof.

Forward-Looking Statements

In addition to historical information, this Annual Report on Form 10-K contains forward-looking statements, including statements regarding product plans, future growth and market opportunities which involve risks and uncertainties that could cause actual results to differ materially from these forward-looking statements. Factors that might cause or contribute to such differences include, but are not limited to, those discussed in the section entitled “Risk Factors” in Part I, Item 1A of this report. You should carefully review the risks described herein and in other documents we file from time to time with the U.S. Securities and Exchange Commission (“the SEC”), including our Quarterly Reports on Form 10-Q to be filed in 2014. When used in this report, the words “will,” “expects,” “could,” “would,” “may,” “anticipates,” “intends,” “plans,” “believes,” “seeks,” “targets,” “estimates,” “looks for,” “looks to,” “continues” and similar expressions, as well as statements regarding our focus for the future, are generally intended to identify forward-looking statements. You should not place undue reliance on these forward-looking statements which speak only as of the date of this Annual Report on Form 10-K. We undertake no obligation to publicly release any revisions to the forward-looking statements or reflect events or circumstances after the date of this document, except as required by law.

PART I

ITEM 1. BUSINESS

Founded in 1982, Adobe Systems Incorporated is one of the largest and most diversified software companies in the world. We offer a line of products and services used by creative professionals, marketers, knowledge workers, application developers, enterprises and consumers for creating, managing, delivering, measuring, optimizing and engaging with compelling content and experiences across multiple operating systems, devices and media. We market and license our products and services directly to enterprise customers through our sales force and to end-users through app stores and our own website at www.adobe.com. We also distribute our products and services through a network of distributors, value-added resellers (“VARs”), systems integrators, independent software vendors (“ISVs”), retailers and original equipment manufacturers (“OEMs”). In addition, we license our technology to hardware manufacturers, software developers and service providers for use in their products and solutions. We offer some of our products via a Software-as-a-Service (“SaaS”) model or a managed services model (both of which are referred to as a hosted or cloud-based model) as well as through term subscription and pay-per-use models. Our products run on personal and server-based computers, as well as on smartphones, tablets and other devices, depending on the product. We have operations in the Americas, Europe, Middle East and Africa (“EMEA”) and Asia-Pacific (“APAC”). See Note 18 of our Notes to Consolidated Financial Statements for further geographical information.

Adobe was originally incorporated in California in October 1983 and was reincorporated in Delaware in May 1997. We maintain executive offices and principal facilities at 345 Park Avenue, San Jose, California 95110-2704. Our telephone number is 408-536-6000. We maintain a website at www.adobe.com. Investors can obtain copies of our SEC filings from this site free of charge, as well as from the SEC website at www.sec.gov. The information posted to our website is not incorporated into this Annual Report on Form 10-K.

BUSINESS OVERVIEW

For over 30 years, Adobe’s innovations have transformed how individuals, businesses and governments communicate and interact. Across the markets Adobe serves, we help our customers create and deliver the most compelling content and interactive experiences in a streamlined workflow, and optimize those experiences and marketing activities for greater return on investment. Our solutions turn ordinary interactions into valuable digital experiences, across media and devices, anywhere, anytime.

While we continue to market and license a broad portfolio of products and solutions, we focus our investments in two strategic growth areas:

Digital Media—providing tools, services and solutions that enable individuals, small businesses and enterprises to create, publish and promote their content anywhere. Our customers include content creators, web designers, app developers and digital media professionals, as well as management in marketing departments and agencies, companies and publishers. This is the core of what we have delivered for over 20 years, and we are evolving rapidly to provide

these customers with a more complete and integrated workflow across the variety of new devices, formats and business models that continue to emerge.

Digital Marketing—providing solutions and services for creating, managing, executing, measuring and optimizing digital advertising and marketing campaigns across multiple channels. Our customers include marketers, advertisers, agencies, publishers, merchandisers, web analysts, marketing executives, information management executives, and revenue and sales executives. We process over ten trillion web transactions a year via our SaaS products, providing our customers with analytics, social, targeting, media optimization, web experience management and cross-channel campaign management solutions. This complements our

Table of Contents

digital media franchise, bringing together the art of creating and managing content with the science of measuring and optimizing it, enabling our customers to achieve their optimal business outcomes.

We believe we are uniquely positioned to be a leader in both the Digital Media and Digital Marketing categories, where our mission is to change the world through digital experiences. By integrating products from each of these two areas of Adobe's business, our customers are able to utilize a comprehensive suite of solutions and services that no other single entity in either industry currently offers. In addition, our ability to deliver innovation and productivity improvements across customer workflows involving the creation, management, delivery, measurement and optimization of rich and engaging content favorably positions Adobe to benefit from strong secular market trends as our customers increasingly invest more in their abilities to engage their constituents online.

SEGMENTS

Our business is organized into three reportable segments: Digital Marketing, Digital Media and Print and Publishing. These segments provide Adobe's senior management with a comprehensive financial view of our key businesses. Our segments are aligned around the company's two strategic growth opportunities described above, placing our Print and Publishing business in a third segment that contains many of our mature products and solutions.

This overview provides an explanation of our market opportunities and a discussion of our strategies to address our market opportunities in fiscal 2014 and beyond for each of our segments. See Note 18 of our Notes to Consolidated Financial Statements for further segment information.

PRODUCTS AND SERVICES OVERVIEW

Digital Media

Digital Media Opportunity

Recent trends in digital communications, including ever increasing data speeds which enable greater usage by consumers of mobile devices and tablets to access online content and services, continue to provide a significant market opportunity for Adobe in digital media. Due to the increase in rich media consumed in digital environments and the rise of online social communities, the demand for digital media tools and solutions to create engaging online experiences is higher than ever. We believe Adobe is in a unique position to capitalize on this opportunity by delivering rapid innovation to increase our customer reach, deepen engagement with communities and accelerate long-term revenue growth by focusing on a cloud-based model where our products and solutions are licensed on a subscription basis.

The flagship of our Digital Media business is our Adobe Creative Cloud offering. Creative Cloud is a subscription service that allows members to download and install the latest versions of our creative products such as Adobe Photoshop, Adobe Illustrator, Adobe Dreamweaver and Adobe InDesign, as well as utilize other tools such as Adobe Acrobat and Adobe Photoshop Lightroom. Creative Cloud members can also access online services to sync, store, and share files, participate in our Behance community of more than 1.5 million creative professionals, publish and deliver digital content such as digital magazines to tablets via app stores, develop mobile apps, and create and manage websites. Adobe is redefining the creative process with Creative Cloud, an integrated cloud and application service where our creative customers can obtain everything they need to create, collaborate and deliver engaging digital content.

The cornerstone of Creative Cloud is our creative family of products, which address the needs of creative professionals including graphic designers, production artists, web designers and developers, user interface designers, writers, videographers, motion graphic artists, prepress professionals, video game developers, mobile application developers, students and administrators. They rely on our solutions for publishing, web design and development, video and animation production, mobile app and gaming development and document creation and collaboration. End users of our creative tools work in businesses ranging from large publishers, media companies and global enterprises, to smaller design agencies, small and medium-sized businesses and individual freelancers. Moreover, our creative products are used to create much of the printed and online information people see, read and interact with every day, including video, animation, mobile and advertising content. Knowledge workers, educators, hobbyists and high-end consumers also use our creative products to create and deliver content that is of professional quality.

In addition to Creative Cloud, our Digital Media business offers many of the products included in Creative Cloud on a standalone basis, including subscriptions to the Creative Cloud version of certain point products, and also offers a

range of other products and creative tools, including our hobbyist products Adobe Photoshop Elements and Adobe Premiere Elements, Adobe Digital Publishing Suite, PhoneGap, Revel, TypeKit and apps such as Photoshop Touch and Revel that run on tablets and mobile devices. Further descriptions of our Digital Media products are included below under “Principal Products and Services”.

Table of Contents

Adobe's Digital Media segment also includes our Document Services business, built around our Acrobat family of products, the Adobe Reader and a set of integrated cloud-based document services. For over two decades Adobe Acrobat has provided for the reliable creation and exchange of electronic documents, regardless of platform or application source type. Users can collaborate on documents with electronic comments and tailor the security of a file in order to distribute reliable Adobe PDF documents that can be viewed, printed or filled out utilizing our free Adobe Reader. Acrobat provides essential electronic document capabilities and services to help knowledge workers accomplish a wide range of tasks ranging from simple publications and forms to mission-critical engineering and architectural plans. With our Acrobat XI product and its innovative cloud services, we have extended the capabilities of our solution. Users can take advantage of electronic document signing with Adobe EchoSign, complete form management with Adobe FormsCentral, and utilize other features such as Adobe CreatePDF, ExportPDF and Acrobat.com.

Digital Media Strategy

Our goal is to be the leading provider of tools and services that allow individuals, small businesses and enterprises to create, publish, promote and monetize their content anywhere.

We believe our Creative Cloud offering, marketed as a subscription model with attractive monthly pricing, will be a catalyst for revenue growth in the coming years. We also believe the monthly subscription pricing model will be attractive to users of older versions of our products who desire to use our latest releases and services, but who have not been willing to upgrade to newer versions due to price sensitivity. Similarly, we anticipate we can drive new user adoption of our creative tools business over the next several years outside of our core creative professional targeted market because of the attractive monthly subscription pricing combined with the strong brand of our creative tools and the broad value proposition provided by Creative Cloud. We anticipate that our shift to a subscription model will increase the amount of our recurring revenue that is ratably reported, driven by broader Creative Cloud adoption over the next several years.

To accelerate the adoption of Creative Cloud, we have focused on migrating existing users of our creative products from perpetual licenses to the subscription offering, as well as driving new customer adoption. Aspects of this strategy include: focusing future innovation by our engineering teams on delivering new and incremental functionality only through our newest Creative Cloud based products; increasing the value of Creative Cloud by delivering frequent product updates and enhancements to subscribers to address their content creation challenges; using promotions to attract customers to the offering; expanding our go-to-market reach through channel partners to reach new customers particularly in the small and medium business space; and utilizing Creative Cloud for teams and Creative Cloud for enterprise offerings to drive broad adoption with customers who license our products in volume.

As part of our Creative Cloud strategy, we plan to utilize our digital marketing solutions to drive customer awareness of our creative products and improve conversion on our website and across other channels. We believe Adobe.com will increasingly be the destination site where we engage individual and small business customers to sign up for and renew Creative Cloud subscriptions. We utilize channel partners such as corporate resellers to target mid-size creative customers with our Creative Cloud for teams offering. Our direct sales force is focused on building relationships with our largest customers and driving adoption of our Creative Cloud for enterprise offering.

In our Document Services business, although Acrobat has achieved strong market adoption in document-intensive industries such as government, financial services, pharmaceutical, legal, aerospace, insurance and technical publishing, we believe there are tens of millions of users who still need the capabilities provided by Acrobat. We plan to continue to market the benefits of our Document Services solutions to small-and medium-sized businesses, large enterprises and government institutions around the world and increase our seat penetration in these markets through the utilization of our corporate and volume licensing programs. We also intend to increase our focus on marketing and licensing Acrobat in targeted vertical markets such as education, financial services, telecommunications and government, as well as expanding into emerging markets, while simultaneously enhancing and building out the delivery of cloud-based document services to our Acrobat and Adobe Reader users. We intend to continue to promote the capabilities of our cloud-based EchoSign solution to millions of Acrobat users and hundreds of millions of Adobe Reader users. EchoSign provides a green alternative to costly paper-based solutions, and is an easier way for customers to manage their contract workflows. We believe that by growing the awareness of Adobe EchoSign in the

broader contract delivery and signing market, we can help our customers migrate away from paper-based express mailing and adopt our solution, growing our revenue with this business in the process.

Digital Marketing

Digital Marketing Opportunity

Consumers today increasingly demand personalized content and experiences in their online interactions, across multiple channels and devices. As a result, businesses or any entity with an online presence must figure out how to best attract, engage, acquire and retain customers in a world where the reach and quality of experiences directly impacts success. Delivering the best

Table of Contents

experience to a consumer at a given moment requires the right combination of data, insights and content. Marketing executives desire to know that their investment is optimizing their consumers' experiences and delivering the greatest return on their marketing spend so they can demonstrate the success of their programs using objective metrics.

We believe there is a significant opportunity to address these challenges and help customers transform their businesses. Chief Marketing Officers ("CMOs"), digital marketers, advertisers and publishers are increasingly steering their marketing and advertising budgets toward digital media. As they make this move to digital, our market opportunity is accelerating as customers look for vendors to help them navigate this transition. However, marketing in a digital world is not simply about executing campaigns in each digital channel. Marketers also need to ensure that they deliver meaningful experiences to their consumers across both digital and traditional channels.

Our Digital Marketing business targets this large and growing opportunity by providing comprehensive solutions that include analytics, social marketing, targeting, media optimization, web experience management and cross-channel campaign management, as well as premium video delivery and monetization. We deliver these capabilities through our Adobe Marketing Cloud, an integrated offering enabling marketers to measure, personalize and optimize marketing campaigns and digital experiences across channels for optimal marketing performance. With its broad set of solutions, including Adobe Analytics, Adobe Target, Adobe Social, Adobe Media Optimizer, Adobe Experience Manager and Adobe Campaign, as well as real-time dashboards and a collaborative interface, customers of Adobe Marketing Cloud are able to combine data, insights and digital content to deliver a personalized brand experience to their consumers.

With the increase in the number of consumers that watch premium video content via the web on PC, tablet and mobile devices, the monetization of video delivery is an emerging opportunity within the Adobe Marketing Cloud. To address this opportunity, we have worked closely with video content owners and distributors to develop and deliver Adobe Primetime, a modular platform that enables a more complete workflow to meet our customers' needs in areas such as video publishing, advertising and analytics. We believe customers using our Primetime solution can drive greater audience engagement, resulting in increased revenue from ad sales and subscriptions, while lowering operating costs. In addition to CMOs and digital marketers, users of our Adobe Marketing Cloud solutions include marketing professionals such as search engine marketers, media managers, media buyers and marketing research analysts.

Customers also include web content editors, web analysts and web marketing managers. These customers often are involved in workflows that utilize other Adobe products, such as our Digital Media offerings and our video workflow and delivery technologies. By combining the creativity of our Digital Media business with the science of our Digital Marketing business, we help our customers to more efficiently and effectively make, manage, measure and monetize their content across every channel with an end-to-end workflow and feedback loop.

Our Digital Marketing segment also contains two legacy enterprise software offerings: our Adobe Connect web conferencing platform and Adobe LiveCycle, an enterprise document and form platform. At the beginning of fiscal year 2012 we narrowed the focus of marketing and licensing of these products to financial services and government markets, driven by a subset of our enterprise sales force.

Digital Marketing Strategy

Our goal is to be the leading provider of marketing solutions and a standard for the way digital advertising and marketing is measured, managed, executed and optimized.

We believe that our success will be driven by focusing our efforts on making the Adobe Marketing Cloud the most comprehensive and integrated marketing solution available. Adobe Marketing Cloud consists of six key solutions—Adobe Analytics, Adobe Target, Adobe Social, Adobe Media Optimizer, Adobe Experience Manager and Adobe Campaign (which we added through our acquisition of Neolane during fiscal 2013)—as well as Adobe Primetime, our emerging video solution. We believe the Adobe Marketing Cloud provides marketers with key capabilities, such as the ability to:

- Combine data across solutions and third-party data sources, such as customer relationship management, point of sale, email, and survey, to create a single view of the consumer;
- Deliver personalized customer experiences across channels and on any device;
- Use predictive analytics to enable marketers to utilize past marketing program data and success to predict and drive their future success with digital marketing programs;

- Access all Adobe Marketing Cloud solutions from one centralized platform and visualize, socialize, and collaborate across teams with the interface;

Table of Contents

- Interact with creatives through integration with Creative Cloud, enabling content creators and marketers to collaborate and communicate in real time within a cloud-based platform;
- Accurately forecast and continually optimize their mix of paid campaigns across digital media;
- Provide robust cross-channel campaign management capabilities utilizing real-time insights, rich customer data and a sophisticated automation and execution platform;
- Manage, publish, track, and monetize social programs;
- Store, assemble, and distribute digital assets to deliver high-quality brand, campaign, and content experiences;
- Easily add, alter, and deploy marketing tags on their website, resulting in consistent page performance and accurate data collection; and
- Integrate with over 200-plus partners in 20-plus countries, covering the expansive digital marketing ecosystem.

To drive growth of the Adobe Marketing Cloud, we also intend to streamline how customers learn about, acquire and deploy Adobe Marketing Cloud solutions. We believe we can accelerate the growth of our business by expanding our go-to-market strategy to include new geographies and vertical markets where Adobe has a strong presence. We plan to continue to build out more direct sales capacity and resources to support them in our field organization focusing on driving adoption of our Adobe Marketing Cloud solutions. We believe these investments will result in continued growth in revenue in our Digital Marketing segment in fiscal 2014 and beyond.

Print and Publishing

Our Print and Publishing segment contains legacy products and services that address diverse market opportunities including eLearning solutions, technical document publishing, web application development and high-end printing. Graphics professionals and professional publishers continue to require quality, reliability and efficiency in production printing, and our Adobe PostScript and Adobe PDF printing technologies provide advanced functionality to meet the sophisticated requirements of this marketplace. As high-end printing systems evolve and transition to fully digital, composite workflows, we believe we are uniquely positioned to be a supplier of software and technology based on the PostScript and Adobe PDF standards for use by this industry.

We generate revenue by licensing our technology to OEMs that manufacture workflow software, printers and other output devices. In fiscal 2013, we maintained a consistent quarterly revenue run-rate with the mature products we market and license in our Print and Publishing business.

PRINCIPAL PRODUCTS AND SERVICES

Digital Media Products

Creative Cloud

Creative Cloud is a subscription offering that brings together everything creative professionals need to create rich and engaging content. Membership gives our members and their teams access to the latest Creative Cloud versions of all the Adobe professional creative desktop applications like Photoshop, Illustrator, and more—plus new features and upgrades as soon as they're available. Cloud storage and file syncing capabilities allow members to reliably access their files wherever they are, even on mobile devices, and members can share concepts with clients or colleagues more easily than ever. Cloud-based services let members build and publish websites, mobile apps, tablet publications, and content for any medium or device. And with Behance integration, members can publish their customized portfolio on their own websites and plug into the world's largest creative social network to get inspired, get feedback, and find new opportunities. With Creative Cloud, our members get their own central dashboard to keep their ideas, files, fonts, settings, notifications, desktop applications, and team members in sync.

We license Creative Cloud to individuals and teams of users through Adobe.com either on a monthly subscription basis or as an annual subscription. Channel partners also license Creative Cloud with annual team subscriptions to small or medium-sized businesses, or to workgroups in enterprises. With larger enterprise customers, our direct sales force utilizes enterprise term license agreements, or ETLAs, for volume-based agreements often for multi-year terms.

Photoshop

Photoshop is the world's most advanced digital imaging software. It is used by photographers, designers, web professionals, and video professionals, and is available to Creative Cloud subscribers. Customers can also subscribe to Photoshop CC as an individual subscription product, or acquire a perpetual license of Photoshop CS6. For photographers and photo hobbyists, we also

Table of Contents

offer Elements and Lightroom versions of Photoshop to address their unique photography workflow needs, as well as a Touch version enabling sophisticated photo editing using a touch-based interface on tablet and mobile devices.

Illustrator

Illustrator is our industry-standard vector graphics software used worldwide by designers of all types who want to create digital graphics and illustrations for all kinds of media: print, web, interactive, video, and mobile. Illustrator is available to Creative Cloud subscribers, and customers can also subscribe to use it as an individual subscription product, or acquire a perpetual license of Illustrator CS6.

InDesign

InDesign is the leading professional page layout software for print and digital publishing. Our customers use it to design, preflight, and publish a broad range of content including newspapers and magazines for print, online, and tablet app delivery. Customers can create simple or complex layouts quickly and efficiently with precise control over typography, built-in creative tools, and an intuitive design environment. Tight integration with other Adobe software such as Photoshop, Illustrator, Acrobat, and Flash Professional enables customers to work productively in print and digital workflows. Customers can also access Adobe Digital Publishing Suite from within InDesign to create and publish engaging apps for a broad range of devices, including iOS, Android and Amazon-based devices.

InDesign is built for designers, prepress and production professionals, and print service providers who work for magazines, design firms, advertising agencies, newspapers, book publishers, and retail/catalog companies, as well as in corporate design, commercial printing, and other leading-edge publishing environments. Customers using InDesign often use Adobe InCopy, a companion product used for professional writing and editing to enable an efficient collaborative workflow between design and editorial staff. InDesign and InCopy are available to Creative Cloud subscribers, and customers can also subscribe to use InDesign as an individual subscription product, or acquire a perpetual license of InDesign CS6.

Adobe Premiere

Adobe Premiere is our powerful, customizable, nonlinear video editing tool used by video professionals. Customers can import and combine virtually any type of media, from video shot on a phone to raw 5K and higher resolution footage, and then edit in its native format without transcoding. The user interface includes a customizable timeline and numerous editing shortcuts which enable faster, keyboard-driven editing.

With the demands of shorter production schedules and high-resolution digital media formats, real-time performance is crucial to videographers. Premiere utilizes our Mercury Playback Engine to provide the fastest performance solution in the industry. It also supports a vast majority of formats, and customers can now use multiple GPU cards to accelerate render and export times. As part of Creative Cloud, Premiere tightly integrates with other Adobe creative applications. Customers can also subscribe to use it as an individual subscription product, or acquire a perpetual license of Premiere Pro CS6.

We also offer an Elements version of Premiere, which is a powerful yet easy-to-use video-editing software for home video editing. Premiere Elements provides tools for hobbyists to quickly edit and enhance video footage with fun effects and transitions and create custom DVDs for sharing video with friends and family.

After Effects

After Effects is our industry-leading animation and creative compositing software used by a wide variety of motion graphics and visual effects artists. It offers superior control, a wealth of creative options, and integration with other post-production applications. After Effects is available to Creative Cloud subscribers, and customers can also subscribe to use it as an individual subscription product, or acquire a perpetual license of After Effects CS6.

Dreamweaver

Adobe Dreamweaver is our professional web development software development application used by designers and developers to create and edit HTML websites and mobile apps. Dreamweaver provides a broad range of capabilities for web publishing, enabling online commerce, and providing online customer service and educational content, and includes capabilities for visually designing HTML5 pages, coding HTML5 and application logic. As part of Creative Cloud, Dreamweaver tightly integrates with other Adobe creative applications. Customers can also subscribe to use it as an individual subscription product, or acquire a perpetual license of Dreamweaver CS6.

Table of Contents

Flash Professional

Adobe Flash Professional provides an advanced development environment for creating interactive content which integrates animations, motion graphics, sound, text and additional video functionality. Content built with Flash Professional is deployed via the web to browsers that run Adobe Flash Player. Flash Professional is available to Creative Cloud subscribers, and customers can also subscribe to use it as an individual subscription product, or acquire a perpetual license of Flash CS6.

Adobe Muse

Adobe Muse is built for designers who want to create and publish HTML websites without writing code. Muse is available to Creative Cloud subscribers, or customers can subscribe to use it as an individual subscription product.

Edge Tools & Services

Our Edge web tools and services include: Edge Animate, a web motion and interaction design tool that allows designers to create animated content for websites, using web standards like HTML5, JavaScript and CSS3; Edge Inspect, an inspection and preview tool that allows front-end web developers and designers to efficiently preview and debug HTML content on mobile devices; Edge Code, a code editor, built on the Brackets open source project, optimized for web designers and developers working with HTML, CSS and JavaScript; Edge Reflow, a web design tool to help users create responsive layouts and visual designs with CSS; Edge Web Fonts, a free web font service for using a growing library of open source fonts on websites and in apps; Typekit, a service that gives designers and developers access to a library of hosted, high-quality fonts to use on their websites; and PhoneGap Build, a service for packaging mobile apps built with HTML, CSS and JavaScript for popular mobile platforms. Our Edge tools and services are available to Creative Cloud subscribers and are also licensed as individual subscription products.

Digital Publishing Suite

Adobe Digital Publishing Suite is a complete solution that enables individual designers, traditional media publishers, large brand organizations, enterprise customers and ad agencies to transform their print publications into interactive digital reading experiences for tablet devices. Consisting of hosted services and viewer technology, Digital Publishing Suite tightly integrates with our Creative Cloud applications for efficient design, distribution, and monetization of a new class of innovative magazines, newspapers, brand loyalty materials, merchandising content, marketing communications, and more. A wide range of media publishers have used Digital Publishing Suite to produce well-known titles. Businesses are also using Digital Publishing Suite to produce corporate publications.

Digital Publishing Suite, Enterprise Edition is offered to large enterprise customers, and we also offer the Professional Edition and Single Edition to smaller organizations and individuals. Digital Publishing Suite, Single Edition is also available to Creative Cloud subscribers.

Revel

Adobe Revel is our consumer-focused, touch-based photo app and service. Offered through app stores, Revel gives access to photo libraries from browsers and multiple Apple and Windows 8 devices and allows users to utilize powerful photo-processing technology based on Adobe Photoshop Lightroom software to enhance their images.

Acrobat and Document Services

Adobe's Acrobat line of products is headlined by Adobe Acrobat Pro, which is the industry standard for PDF creation and conversion. Acrobat enables users to create secure, reliable and compact Adobe PDF documents from desktop authoring applications such as Microsoft Office software, graphics applications and more. Use of Acrobat enables automated collaborative workflows with a rich set of commenting tools and review tracking features; includes everything needed to create and distribute rich, secure electronic documents that can be viewed easily within leading web browsers or on computer desktops via the free Adobe Reader.

Acrobat Pro is available to Creative Cloud subscribers. Customers can also license Acrobat Pro or Acrobat Standard (which has a subset of Acrobat Pro features) as individual point products, either on a subscription or perpetual license, as well as other offerings from our Document Services business.

Through Acrobat.com we also offer a set of a cloud-based document and collaboration subscription services which provide simple PDF creation, centralized online file sharing and storage capabilities, and document/contract signing solutions. These services include Adobe CreatePDF, Adobe ExportPDF and Adobe EchoSign for safe electronic signatures.

Table of Contents

All of our document service solutions utilize Adobe Reader, which is our free software for reliable viewing, searching, reviewing and printing of Adobe PDF documents on a variety of hardware and operating system platforms.

Adobe Marketing Cloud Solutions

Adobe Analytics

Adobe Analytics helps our customers create a holistic view of their business by turning consumer interactions into actionable insights. With intuitive and interactive dashboards and reports, our customers can sift, sort, and share real-time information to provide insights that can be used to identify problems and opportunities and to drive conversion and relevant consumer experiences. Adobe Analytics enables web, social, video and mobile analytics across online and offline channels to continuously improve the performance of marketing activities. It also provides the ability to perform advanced ad-hoc segmentation and to integrate data from offline and third-party sources.

Adobe Target

Adobe Target lets our customers test, target and personalize content across multiple devices. With Adobe Target, our customers have the tools they need to quickly discover what gets noticed, what increases conversion, and what keeps consumers coming back for more. Adobe Target paves a path from simple testing to targeting to true segmentation and optimization through: A/B and multivariate testing; rules-based targeting; and automated decision-making.

Adobe Social

Adobe Social provides marketers a comprehensive solution to build stronger connections through content guided by tangible data. Customers can create more relevant posts, monitor and respond to conversations, measure results, and connect social activities to business results. With Adobe Social, our customers can: manage social content and activities across multiple social networks and profile pages; listen and respond to consumer conversations in real time; create social campaigns; and track performance with integrated analytics.

Adobe Media Optimizer

Adobe Media Optimizer is a powerful ad management platform. Customers get a consolidated view of how their media is performing, along with tools to both accurately forecast and continually optimize their mix of paid campaigns across digital media. Media Optimizer includes cross-channel optimization capabilities, search engine marketing management, and display and social advertising management.

Adobe Experience Manager

Adobe Experience Manager helps customers organize, create, and manage the delivery of creative assets and other content across digital marketing channels, including web, mobile, email, communities and video. It enables customers to manage content on premise or host it in the cloud, delivering agile and rapid deployment. With this ultimate control of content and campaigns, customers are able to deliver relevant experiences to consumers that help build the customers' brand, drive demand and extend reach. Adobe Experience Manager includes digital asset management, web content management and social capabilities, providing customers with tools enabling users to improve their market and brand perception and provide a personalized experience to their consumers.

Adobe Campaign

Adobe Campaign enables marketers to orchestrate personalized experiences determined by each consumer's habits and preferences. As part of its feature set, it provides visual campaign orchestration, allowing for intuitive design and automated consumer experiences across channels, from one-off campaigns to triggered messages, with a graphically rich interface. Marketers can also integrate consumer data from across marketing channels to develop and deliver more relevant marketing experiences to their consumers. Features also included targeted segmentation, email execution, real-time interaction, and operational reporting to easily see how well campaigns are performing.

Emerging Digital Marketing Solutions

Adobe Primetime

Adobe Primetime is a modular platform for video publishing, advertising, and analytics, enabling content programmers and distributors to profit from their video content by making every screen a TV—including PC, smartphone and tablet screens. Primetime consists of the following components: PayTV Pass, a universal system for validating access to pay TV content; DRM, which is digital rights management technology to protect video content from unauthorized copying or access; Ad Insertion,

Table of Contents

providing for the seamless insertion of ads into live and video-on-demand content; Ad Serving, the ability to determine which ads should be published; Video Analytics, which gives programmers and distributors the ability to measure, analyze and optimize online video delivery; and Audience Management, a data management platform that consolidates audience information to make it actionable from an ad or targeting perspective.

Other Digital Enterprise Solutions

Adobe Connect

Adobe Connect is a web conferencing platform for web meetings, eLearning, and webinars. It powers mission critical web conferencing solutions end-to-end, on virtually any device, and enables organizations from leading corporations to large governmental agencies to fundamentally improve productivity.

LiveCycle

Adobe LiveCycle Enterprise Suite is an enterprise document and form platform that helps enterprises capture and process information, deliver personalized communications, and protect and track sensitive information. Targeted at the financial services and government markets, LiveCycle extends business processes to an enterprise's mobile workforce and clients, increasing productivity while broadening service access to any user equipped with a desktop, smartphone, or tablet.

Other Products and Solutions

We offer a broad range of other digital media products and solutions. Information about other products not referenced here can be found on our corporate website, www.adobe.com, under the "Products" tab.

COMPETITION

The markets for our products and services are characterized by intense competition, new industry standards, evolving business and distribution models, disruptive software and hardware technology developments, frequent new product introductions, short product life cycles, price cutting with resulting downward pressure on gross margins and price sensitivity on the part of consumers. Our future success will depend on our ability to enhance and better integrate our existing products, introduce new products on a timely and cost-effective basis, meet changing customer needs, provide best-in-class information security to build customer confidence and combat cyber-attacks, extend our core technology into new applications and anticipate and respond to emerging standards, business models, software delivery methods and other technological changes.

Digital Media

No single company has offerings identical to our Creative Cloud products, but we face collective competition from a variety of point offerings, free products and downloadable apps. Our competitors include offerings from companies such as Apple, Autodesk, Avid, Corel, Microsoft, Quark and others, as well as from many lower-end offerings available on touch-enabled devices via app stores, and from various open source initiatives. We believe our greatest advantage in this market is the scope of our integrated solutions, which work together as part of Creative Cloud. With Creative Cloud we also compete favorably on the basis of features and functionality, ease of use, product reliability, value and performance characteristics.

Professional digital imaging, drawing and illustration products are characterized by feature-rich competition, brand awareness and price sensitivity. Competition in this market is also emerging with drawing and illustration applications on tablet and smartphone platforms. The demand for professional web page layout and professional web content creation tools is constantly evolving and highly volatile. In this area we face direct and indirect competition from desktop software companies and various proprietary and open source web-authoring tools. Our Flash technologies face competition from alternative approaches to building rich content and web applications such as JavaFX, HTML5, native applications and Unity.

The needs of digital imaging and video editing software users are constantly evolving due to rapid technology and hardware advancements in digital cameras, digital video cameras, printers, PCs, tablets, mobile phones and other new devices. Our imaging and video software offerings, including Photoshop, Lightroom, After Effects and Premiere, face competition from established and emerging companies offering similar products. We also continue to face competition from new and free products, including web services and mobile/tablet applications that compete directly with our Adobe Revel offering.

New image editing applications for mobile devices and tablets with features that compete with our professional products are also emerging as adoption of these devices grows. Our consumer digital imaging and video editing offerings are subject to intense competition, including customer price sensitivity, competitor brand awareness and competitor strength in OEM bundling and retail distribution. We face direct and indirect competition in the consumer digital imaging market from a number of companies that market software that competes with ours.

Table of Contents

In addition, we face competition from device, hardware and camera manufacturers as they try to differentiate their offerings by bundling, for free, their own digital imaging software, or those of our competitors. Similarly, we face potential competition from operating system manufacturers as they integrate or offer hobbyist-level digital imaging and image management features with their operating systems. We also face competition from smartphone and tablet manufacturers that integrate imaging and video software into their devices to work with cameras that come as part of their smartphone and tablet offerings. In addition, new social networking platforms such as Facebook (including Instagram) and portal sites such as Google and Yahoo! are becoming a direct means to post, edit and share images, bypassing the step of using image editing and sharing software.

Competition is also emerging with imaging and video applications on smartphone and tablet platforms. Competitors are extending their products and feature sets to platforms such as Apple's iPhone and iPad, and other smartphone and tablet devices. Similarly, new cloud-based offerings continue to emerge which offer image editing and video-editing capabilities, as well as social and sharing features.

As customers such as publishers and media companies increase their desire to deliver their assets to new platforms such as mobile devices and tablets, we expect new and existing companies to continue to offer solutions that address these challenges that are competitive with our Digital Publishing Suite. Many design agencies are building capabilities to offer such solutions, and companies such as Amazon, Apple and Google offer an alternative format and business model for the delivery of newspaper and magazine content to mobile devices.

With our Acrobat business, we continue to face competition from Microsoft. Their widely used Office line of products (as well as open-source alternatives available on the market) enable saving documents as PDF files, competing with Acrobat. Microsoft also offers a proprietary digital rights management technology and a document format, XML Paper Specification ("XPS"), which competes with Adobe PDF. Given the dominance of Microsoft's Office and Office 365 products, features competitive with Adobe's Acrobat solutions could harm our overall market opportunity. Our Acrobat product family also faces competition in the PDF file creation market from many clone products. In addition, other PDF creation solutions can be found at a low cost, or for free, on the web. To address these competitive threats, we are working to ensure our Adobe Acrobat applications stay at the forefront of innovation in emerging opportunities such as PDF document generation, document collaboration and document security.

Digital Marketing

The markets in which our Digital Marketing business unit competes are growing rapidly and characterized by intense competition. Our Adobe Marketing Cloud solutions face competition from large companies such as Google, IBM, Oracle, salesforce.com, SAP, SAS, Teradata and others, in addition to point product solutions and focused competitors. Additionally, new competitors are constantly entering these markets. Some of these competitors provide SaaS solutions to customers, generally through a web browser, while others provide software that is installed by customers directly on their servers. In addition, we compete at times with our customers' or potential customers' internally developed applications. Of the competitors listed, no single company has products identical to our Adobe Marketing Cloud offerings. Adobe Marketing Cloud competes in a variety of areas, including: reporting and analytics; cross-channel marketing and optimization; online and social marketing; web experience management and others.

Many of the companies with which we compete offer a variety of products or services and as a result could also bundle their products or services, which may result in these companies effectively selling their products or services at or below market prices for individual products. In addition, large software, internet and database management companies have expanded their offerings in the digital marketing area, either by developing competing services or by acquiring existing competitors or strategic partners of ours. We believe competitive factors in our markets include the proven performance, security, scalability, flexibility and reliability of services; the strategic relationships and integration with third-party applications; the intuitiveness and visual appeal of user interfaces; demonstrable cost-effective benefits to customers; pricing; the flexibility of services to match changing business demands; enterprise-level customer service and training; perceived market leadership; the usability of services; real-time data and reporting; independence from portals and search engines; the ability to deploy the services globally; and success in educating customers in how to utilize services effectively. We believe we compete favorably with both the enterprise and low-cost alternatives based on many of these competitive factors including our strong feature set, the breadth of our offerings, our focus on global, multi-brand companies, our superior user experience, tools for building

multi-screen, cross-channel applications, standards-based architecture, scalability and performance and leadership in industry standards efforts.

We believe our creative tools heritage differentiates us from our competitors. We have worked closely with marketing and creative customers for over thirty years. We also believe we have leadership in this market, with current customers representing leading global brands. Our comprehensive solutions extend more broadly than any other company in serving the needs of marketers and addressing this market opportunity; we integrate content and data, analytics, personalization, web experience management, cross-channel campaign management and social capabilities in our Adobe Marketing Cloud, surpassing the reach of any competitor. Most importantly, we provide a vision for our digital marketing customers as we engage with them across the important aspects

Table of Contents

of their business, extending from their use of our Creative Cloud, to how they manage, deliver, measure and monetize their content with our Adobe Marketing Cloud.

Print and Publishing

Our Print and Publishing product offerings face competition from large-scale electronic and web publishing systems, XML-based publishing companies as well as lower-end desktop publishing products. Depending on the product line, competition is based on a number of factors, including: the quality and features of products, ease-of-use, printer service support, the level of customization and integration with other publishing system components, the number of hardware platforms supported, service and price. We believe we can successfully compete based upon the quality and features of our products, our strong brand among users, the widespread adoption of our products among printer service bureaus, and our extensive application programming interface.

In printing technologies, we believe the principal competitive factors for OEMs in selecting a page description language or a printing technology are product capabilities, market leadership, reliability, price, support and engineering development assistance. We believe that our competitive advantages include our technology competency, OEM customer relationships and our intellectual property portfolio.

OPERATIONS

Marketing and Sales

We market and license our products directly using our sales force and through our own website at www.adobe.com.

We also market and distribute our products through sales channels, which include distributors, retailers, software developers, systems integrators, ISVs and VARs, as well as through OEM and hardware bundle customers.

We support our end users through local field offices and our worldwide distribution network, which includes locations in Australia, Austria, Belgium, Brazil, Canada, China, Czech Republic, Denmark, Dubai, Finland, France, Germany, India, Ireland, Italy, Japan, Korea, Mexico, Moldova, the Netherlands, Norway, Poland, Portugal, Romania, Russia, Singapore, South Africa, Spain, Sweden, Switzerland, Taiwan, Turkey, Ukraine, the United Arab Emirates, the United Kingdom and the United States.

We also license software with maintenance and support, which includes rights to upgrades, when and if available, support, updates and enhancements.

The table below lists our significant customer, as a percentage of net revenue, for fiscal 2012 and 2011. For fiscal 2013, there were no customers that represented at least 10% of net revenue. Revenue from Ingram Micro has declined as a percentage of net revenue due to an increase in direct sales made through our own sales force as well as adobe.com.

| | 2012 | 2011 | |
|--------------|------|------|---|
| Ingram Micro | 11 | % 14 | % |

Ingram Micro is a distributor who sells products across our various segments. We have multiple non-exclusive, independently negotiated distribution agreements with Ingram Micro and its subsidiaries covering our arrangements in specified countries and regions. Each of these contracts has an independent duration, is independent of any other agreement (such as a master distribution agreement) and any termination of one agreement does not affect the status of any of the other agreements.

In fiscal 2013 and 2012, no single customer was responsible for over 10% of our trade receivables.

Order Fulfillment for Physical Distribution

The procurement of the various components of packaged products, including DVDs and printed materials, and the assembly of packages for retail and other applications products is controlled by our product delivery operations organization. We outsource our procurement, production, inventory and fulfillment activities to third parties in the United States, EMEA and APAC.

To date, we have not experienced significant difficulties in obtaining raw materials for the manufacture of our products or in the replication of DVDs, printing and assembly of components.

Services and Support

We provide professional services, technical support and customer service across all our customer segments, including enterprises, small/medium businesses, creative professionals, and consumers. Our service and support revenue consists primarily of consulting fees, software maintenance and support fees and training fees.

Table of Contents

Services

We have a global professional services team dedicated to designing, developing and implementing solutions for enterprise customers in key vertical markets and to transfer technical expertise to our solution partners. The professional services team uses a comprehensive, customer-focused methodology to develop high-quality solutions, which in turn deliver a competitive advantage to our enterprise customers. This methodology has been developed by capturing best practices from numerous client engagements across a diverse mix of solutions, industries, and customer preferences. Based on this methodology, our teams are able to accelerate the time to value and maximize the return our clients earn on their investment in Adobe solutions.

In addition, Adobe has also created a large and vibrant partner ecosystem that includes a mix of Global System Integrators (“SIs”), Regional SIs, VARs, and solution partners. Adobe invests significant resources in enabling this ecosystem with the right skills and knowledge about our technologies and best practices. Consequently, this ecosystem provides our clients several different choices of partners, and a large accessible pool of skilled resources that can help deploy Adobe solutions. This approach not only creates value for our customers and partners, but also creates a large and productive go-to-market channel for our sales teams.

Support

A portion of our support revenue is composed of our enterprise maintenance and support offerings. These offerings entitle customers to:

- the right to receive technical support on the technology they have purchased from Adobe;
- the right to receive basic “how to” help in using our products; and
- the right to receive product upgrades and enhancements during the term of the maintenance and support period, which is typically one year.

We offer a range of support programs, from fee-based incidents to annual support contracts. Additionally, we provide extensive self-help and online technical support capabilities via the web and through social media channels allowing customers quick and easy access to possible solutions. As a registered owner of the current version of an Adobe desktop product, customers are eligible to receive Getting Started support on certain matters. Support for some products and in some countries may vary.

We provide product support through a combination of outsourced vendors and internal support centers, and through multiple channels including phone, chat, web, social media, and email. These support services are delivered by a global support organization that includes several regional and global support centers. These teams are responsible for providing timely, high quality technical expertise on all our products.

We also offer developer support to partners and developer organizations. The Adobe Partner Connection Program focuses on providing developers with high-quality tools, software development kits, information and services.

Training

We offer a comprehensive portfolio of training options to enable our customer and partner teams in the use of our products. Our training portfolio includes free on-line informational services on our website (www.adobe.com) and a growing series of how-to books published by Adobe Press pursuant to a joint publishing agreement with Peachpit Press. We sponsor workshops, work with professional associations and user groups, and conduct regular beta testing programs. We also provide fee-based education services to enhance our customers’ use of our solutions, including a wide range of traditional and online training and certifications delivered by our team of training professionals. Adobe's portfolio of technical training courses covers our Digital Media, Digital Marketing and other mature products and solutions.

Investments

We make direct investments in privately held companies. We enter into these investments with the intent of securing financial returns as well as for strategic purposes as they often increase our knowledge of emerging markets and technologies, as well as expand our opportunities to provide Adobe products and services.

PRODUCT DEVELOPMENT

As the software industry is characterized by rapid technological change, a continuous high level of investment is required for the enhancement of existing products and services and the development of new products and services. We

develop our software internally as well as acquire products or technology developed by others by purchasing the stock or assets of the business entity that owned the technology. In other instances, we have licensed or purchased the intellectual property ownership rights of programs

Table of Contents

developed by others with license or technology transfer agreements that may obligate us to pay a flat license fee or royalties, typically based on a dollar amount per unit shipped or a percentage of the revenue generated by those programs.

During fiscal 2013, 2012 and 2011, our research and development expenses were \$826.6 million, \$742.8 million and \$738.1 million, respectively.

PRODUCT PROTECTION

We regard our software as proprietary and protect it under the laws of copyrights, patents, trademarks and trade secrets. We have a number of domestic and foreign patents and pending applications that relate to various aspects of our products and technology. While we believe our patents have value, no single patent is material to us or to any of our reporting segments. We protect the source code of our software programs as trade secrets and make source code available to third parties only under limited circumstances and subject to specific security and confidentiality constraints. From time to time, we secure rights to third party intellectual property as we decide is beneficial to our business.

Our products are generally licensed to end users under one of the following two methods:

We offer products on a “right to use” basis pursuant to a license that restricts the use of the products to a designated number of devices, users or both. We also rely on copyright laws and on “shrink wrap” and electronic licenses that (1) are not physically signed by the end user. Copyright protection may be unavailable under the laws of certain countries and the enforceability of “shrink wrap” and electronic licenses has not been conclusively determined in all jurisdictions.

We offer products under a SaaS or on-demand model, where hosted software is provided on demand to customers, (2) generally through a web browser. The use of these products is governed by the enterprise licensing terms of associated with these products.

Policing unauthorized use of computer software is difficult and software piracy is a persistent problem for the software industry. This problem is particularly acute in international markets. We conduct piracy conversion and prevention programs directly and through certain external software associations. In addition, we have activation technology in certain products to guard against illegal use and will continue to do so in certain future products.

EMPLOYEES

As of November 29, 2013, we employed 11,847 people. We have not experienced work stoppages and believe our employee relations are good.

AVAILABLE INFORMATION

Our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to reports filed or furnished pursuant to Sections 13(a) and 15(d) of the Securities Exchange Act of 1934, as amended, are available free of charge on our Investor Relations website at www.adobe.com/adbe as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. The information posted on our website is not incorporated into this report.

Table of Contents

EXECUTIVE OFFICERS

Adobe's executive officers as of January 17, 2014 are as follows:

| Name | Age | Positions |
|------------------|-----|---|
| | | President and Chief Executive Officer |
| Shantanu Narayen | 50 | <p>Mr. Narayen currently serves as Adobe's President and Chief Executive Officer. Mr. Narayen joined Adobe in January 1998 as Vice President and General Manager of Adobe's engineering technology group. In January 1999, he was promoted to Senior Vice President, Worldwide Products and in March 2001 he was promoted to Executive Vice President, Worldwide Product Marketing and Development. In January 2005, Mr. Narayen was promoted to President and Chief Operating Officer and in December 2007, he was appointed Chief Executive Officer of Adobe and joined the Adobe Board of Directors. Prior to joining Adobe, Mr. Narayen co-founded Pictra Inc., a digital photo sharing software company, in 1996. He was Director of Desktop and Collaboration products at Silicon Graphics Inc. before founding Pictra. Mr. Narayen is also a director of Pfizer Inc.</p> <p>Executive Vice President, Chief Financial Officer</p> |
| Mark Garrett | 56 | <p>Mr. Garrett joined Adobe in February 2007 as Executive Vice President and Chief Financial Officer. Mr. Garrett served as Senior Vice President and Chief Financial Officer of the Software Group of EMC Corporation, a products, services and solutions provider for information management and storage, from June 2004 to January 2007, his most recent position since EMC's acquisition of Documentum, Inc., an enterprise content management company, in December 2003. Mr. Garrett first joined Documentum as Executive Vice President and Chief Financial Officer in 1997, holding that position through October 1999 and then re-joining Documentum as Executive Vice President and Chief Financial Officer in 2002. Mr. Garrett is also a director of Informatica Corporation and Model N, Inc.</p> <p>Senior Vice President, General Counsel and Corporate Secretary</p> |
| Michael Dillon | 55 | <p>Mr. Dillon joined Adobe in August 2012 as Senior Vice President, General Counsel and Corporate Secretary. Prior to joining Adobe, Mr. Dillon served as General Counsel and Corporate Secretary of Silver Spring Networks, a networking solutions provider, from November 2010 to August 2012. Before joining Silver Spring Networks, Mr. Dillon served in various capacities at Sun Microsystems, a diversified computer networking company, prior to its acquisition by Oracle Corporation. While at Sun Microsystems, from April 2006 to January 2010, Mr. Dillon served as Executive Vice President, General Counsel and Secretary, from April 2004 to April 2006, as Senior Vice President, General Counsel and Corporate Secretary, and from July 2002 to March 2004 as Vice President, Products Law Group. Prior to joining Adobe, Mr. Rowley served as Vice President, Corporate Controller, Treasurer and Principal Accounting Officer at Synopsys, Inc., a semiconductor design software company, from December 2002 to September 2005 and from 1999 to December 2002, Mr. Rowley served as Vice President, Corporate Controller and Principal Accounting Officer. From 1994 to 1999, Mr. Rowley served in several finance-related positions at Synopsys. Mr. Rowley is a certified public accountant.</p> |

Edgar Filing: ADOBE SYSTEMS INC - Form 10-K

Senior Vice President and Chief Marketing Officer

| | | |
|--------------|----|---|
| Ann Lewnes | 52 | Ms. Lewnes joined Adobe in November 2006 as Senior Vice President and Chief Marketing Officer. Prior to joining Adobe, Ms. Lewnes spent 20 years at Intel Corporation, where she was Vice President of Sales and Marketing. Senior Vice President, People and Places |
| Donna Morris | 46 | Ms. Morris currently serves as Senior Vice President of Adobe's People and Places organization. Ms. Morris joined Adobe as Senior Director of Global Talent Management in April 2002 through the acquisition of Accelio Corporation, a Canadian software company, where she served as Vice President of Human Resources and Learning. In December 2005 Ms. Morris was promoted to Vice President Global Human Resources Operations and subsequently to Senior Vice President Human Resources in March 2007. |

Table of Contents

| Name | Age | Positions |
|--------------|-----|--|
| | | Senior Vice President, Print and Publishing Business Unit and Managing Director, Adobe India |
| Naresh Gupta | 47 | Dr. Gupta currently serves as Senior Vice President of Print and Publishing and Managing Director of Adobe India. Dr. Gupta joined Adobe in 1996 as a member of the Corporate Research group. He was promoted to Managing Director of Adobe Noida in 1998. In 2003 he was promoted to Vice President of Engineering and Managing Director. In April 2005, Dr. Gupta was promoted to Senior Vice President of Emerging Business and, subsequently, in 2005, he was promoted to Senior Vice President of Print and Publishing and Managing Director of Adobe India. Prior to joining Adobe, he served as a Principal Scientist and Director of the Applied Artificial Intelligence (AI) group at LNK Corp. |

ITEM 1A. RISK FACTORS

As previously discussed, our actual results could differ materially from our forward-looking statements. Factors that might cause or contribute to such differences include, but are not limited to, those discussed below. These and many other factors described in this report could adversely affect our operations, performance and financial condition. If we cannot continue to develop, market and offer new products and services or upgrades or enhancements to existing products and services that meet customer requirements, our operating results could suffer.

The process of developing new high technology products and services and enhancing existing products and services is complex, costly and uncertain. If we fail to anticipate customers' changing needs and emerging technological trends, our market share and results of operations could suffer. We must make long-term investments, develop or obtain appropriate intellectual property and commit significant resources before knowing whether our predictions will accurately reflect customer demand for our products and services. If we are unable to extend our core technologies into new applications and new platforms and to anticipate or respond to technological changes, the market's acceptance of our products and services could decline and our results would suffer. Additionally, any delay in the development, production, marketing or offering of a new product or service or upgrade or enhancement to an existing product or service could result in customer attrition or impede our ability to attract new customers, causing a decline in our revenues, earnings or stock price and weakening our competitive position. We maintain strategic relationships with third parties to market certain of our products and support certain product functionality. If we are unsuccessful in establishing or maintaining our strategic relationships with these third parties, our ability to compete in the marketplace, to reach new customers and geographies or to grow our revenues would be impaired and our operating results would suffer.

We offer our products on a variety of PC and mobile devices. To the extent that there is a continued slowdown of customer purchases of personal computers or a general slowdown of purchases of devices on which our solutions are offered, or to the extent that significant demand arises for our products or competitive products on other platforms before we choose and are able to offer our products on those platforms, our business could be harmed. Releases of new devices or operating systems may make it more difficult for our products to perform or may require significant costs in order for us to adapt our solutions to such devices or operating systems. These potential costs and delays could harm our business.

Introduction of new products, services and business models by existing and new competitors could harm our competitive position and results of operations.

The markets for our products and services are characterized by intense competition, evolving industry standards, emerging business and distribution models, disruptive software and hardware technology developments, short product and service life cycles, price sensitivity on the part of customers, and frequent new product introductions, including alternatives with limited functionality available at lower costs or free of charge. Any of these factors could create downward pressure on pricing and gross margins and could adversely affect our renewal and upgrade rates, as well as our ability to attract new customers. Our future success will depend on our ability to enhance our existing products

and services, introduce new products and services on a timely and cost-effective basis, meet changing customer needs, extend our core technology into new applications, and anticipate and respond to emerging standards, business models, software delivery methods and other technological developments, such as the evolution and emergence of digital application marketplaces as a direct sales and software delivery environment. These digital application marketplaces often have exclusive distribution for certain platforms, which may make it more difficult for us to compete in these markets. If any competing products, services, or operating systems achieve widespread acceptance, our operating results could suffer. In addition, consolidation has occurred among some of the competitors in the markets in which we compete. Further consolidations in these markets may subject us to increased competitive pressures and may therefore harm our results of operations.

For additional information regarding our competition and the risks arising out of the competitive environment in which we operate, see the section entitled “Competition” contained in Item 1 of this report.

Table of Contents

If we fail to successfully manage transitions to new business models and markets, our results of operations could be negatively impacted.

We often release new product and service offerings and employ new software and services delivery methods in connection with our diversification into new business models and markets. It is uncertain whether these strategies will prove successful or whether we will be able to develop the necessary infrastructure and business models more quickly than our competitors. Market acceptance of new product and service offerings will be dependent on our ability (1) to include functionality and usability in such releases that address certain customer requirements where our operating history is less extensive, and (2) to optimally price our products in light of marketplace conditions, our costs and customer demand. New product and service offerings could subject us to increased risk of liability related to the provision of services as well as cause us to incur significant technical, legal or other costs. For example, with our on-demand or cloud-based services and subscription-based licensing models, such as Creative Cloud, we have entered markets that may be unaccustomed to cloud-based subscription offerings. Market acceptance of such services is affected by a variety of factors, including information security, reliability, performance, social/community engagement, local government regulations regarding online services and user-generated content, the sufficiency of technological infrastructure to support our products in certain geographies, customer concerns with entrusting a third party to store and manage their data, public concerns regarding privacy and the enactment of laws or regulations that restrict our ability to provide such services to customers in the U.S. or internationally. These changes may have negative revenue implications and make it easier for our competitors to produce products or services similar to ours. If we are unable to respond to these competitive threats, our business could be harmed.

From time to time we open-source certain of our technology initiatives, provide broader open access to our technology, license certain of our technology on a royalty-free basis, and release selected technology for industry standardization. Additionally, customer requirements for open standards or open-source products could impact adoption or use of some of our products or services. To the extent we incorrectly predict customer requirements for such products or services, or if there is a delay in market acceptance of such products or services, our business could be harmed.

We are also devoting significant resources to the development of technologies and service offerings in markets where our operating history is less extensive. These new offerings and markets may require a considerable investment of technical, financial, compliance and sales resources, and a scalable organization. Many of our competitors may have advantages over us due to their larger presence, larger developer network, deeper market experience and larger sales, consulting and marketing resources. If we are unable to successfully establish new offerings in light of the competitive environment, our results of operations could suffer.

The increased emphasis on a cloud strategy may give rise to risks that could harm our business.

In fiscal 2013 we discontinued future development and new releases of the perpetually licensed line of Creative Suite products to focus our digital media business on Creative Cloud. As a result, we expect to derive an increasing portion of our revenues in the future from subscriptions to our creative tools and cloud-based offerings. This subscription model prices and delivers our products in a way that differs from the historical pricing and delivery methods of our creative tools. These changes reflect a significant shift from perpetual license sales and distribution of our software in favor of providing our customers the right to access certain of our software in a hosted environment or use downloaded software for a specified subscription period. This cloud strategy requires continued investment in product development and cloud operations, and may give rise to a number of risks, including the following:

- if new or current customers desire only perpetual licenses or to purchase or renew only point product subscriptions rather than acquire the entire Creative Cloud offering, our subscription sales may lag behind our expectations;
- the shift to a cloud strategy may raise concerns among our customer base, including concerns regarding changes to pricing over time, information security of a cloud solution and access to files while offline or once a subscription has expired;

- small businesses and hobbyists may turn to competitive or open-source offerings;

-

we may be unsuccessful in maintaining our target pricing, new seat adoption and projected renewal rates, or we may select a target price that is not optimal and could negatively affect our sales or earnings;

- our revenues are expected to decline over the short term and may decline over the long term as a result of this strategy;
- our shift to a subscription licensing model may result in confusion among our installed perpetual license customers (which can slow adoption rates), partners, resellers and investors;
- our relationships with existing partners that resell perpetual license products may be damaged; and

Table of Contents

•We may incur costs at a higher than forecasted rate as we expand our cloud operations.

Subscription offerings create risks related to the timing of revenue recognition.

Although the subscription model is designed to increase the number of customers who purchase our products and services and create a recurring revenue stream that is more predictable, it creates certain risks related to the timing of revenue recognition and potential reductions in cash flows.

A portion of the subscription-based revenue we report each quarter results from the recognition of deferred revenue relating to subscription agreements entered into during previous quarters. A decline in new or renewed subscriptions in any period may not be immediately reflected in our reported financial results for that period, but may result in a decline in our revenue in future quarters. If we were to experience significant downturns in subscription sales and renewal rates, our reported financial results might not reflect such downturns until future periods. Our subscription model could also make it difficult for us to rapidly increase our revenues from subscription- or SaaS-based services through additional sales in any period, as revenue from new customers will be recognized over the applicable subscription term. Further, any increases in sales under our subscription sales model could result in decreased revenues over the short term if they are offset by a decline in sales from perpetual license customers.

Additionally, in connection with our sales efforts to enterprise customers and our introduction of ETLAs, a number of factors could affect our revenues, including longer than expected sales and implementation cycles, potential deferral of revenue due to multiple-element revenue arrangements and alternate licensing arrangements. If any of our assumptions about revenue from our new businesses or our addition of a subscription-based model prove incorrect, our actual results may vary materially from those anticipated, estimated or projected.

We may be unable to predict subscription renewal or upgrade rates and the impact these rates may have on our future revenue and operating results.

The SaaS business model we utilize in our Adobe Marketing Cloud offerings typically involves selling services on a subscription basis pursuant to service agreements that are generally one to three years in length. Our individual Creative Cloud subscription agreements are generally month to month or one year in length, ETLAs for our digital media products and services are generally three years in length, and subscription agreements for other products and services may provide for shorter or longer terms. Although many of our service and subscription agreements contain automatic renewal terms, our customers have no obligation to renew their subscriptions for our services after the expiration of their initial subscription period, and some customers elect not to renew. We cannot provide assurance that these subscriptions will be renewed at the same or higher level of service, for the same number of seats or for the same duration of time, if at all. Moreover, under certain circumstances, some of our customers have the right to cancel their service agreements prior to the expiration of the terms of their agreements. We cannot be assured that we will be able to accurately predict future customer renewal rates. Our customers' renewal rates may decline or fluctuate as a result of a number of factors, including their satisfaction or dissatisfaction with our services, the prices of our services, the perceived information security of our systems and services, the prices of services offered by our competitors, mergers and acquisitions affecting our customer base, reductions in our customers' spending levels, or declines in customer activity as a result of economic downturns or uncertainty in financial markets. If our customers do not renew their subscriptions for our services or if they renew on less favorable terms to us, our revenues may decline.

Our future growth is also affected by our ability to sell additional features and services to our current customers, which depends on a number of factors, including customers' satisfaction with our products and services, the prices of our offerings and general economic conditions. If our efforts to cross-sell and upsell to our customers are unsuccessful, the rate at which our business grows might decline.

Security vulnerabilities in our products and systems could lead to reduced revenues or to liability claims.

Maintaining the security of our products, computers and networks is a critical issue for us and our customers. Security researchers, criminal hackers and other third parties regularly develop new techniques to penetrate computer and network security measures and have in the past managed to penetrate certain of our systems and misused certain of our systems and software in order to access our end users' authentication and payment information. In addition, cyber-attackers also develop and deploy viruses, worms and other malicious software programs, some of which may be specifically designed to attack our products, systems, computers or networks. Sophisticated hardware and operating system software and applications that we produce or procure from third parties may contain defects in design or

manufacture, including bugs and other problems that could unexpectedly compromise the security of the system. The costs to us to eliminate or alleviate cyber or other security problems, bugs, viruses, worms, malicious software programs and security vulnerabilities are significant, and our efforts to address these problems may not be successful and could result in interruptions, delays, cessation of service and loss of existing or potential customers that may impede our sales, manufacturing, distribution or other critical functions, as well as potential liability to the company.

Table of Contents

Outside parties have in the past and may in the future attempt to fraudulently induce our employees or users of our products to disclose sensitive information in order to gain access to our data or our customers' data. Unauthorized parties may also attempt to gain physical access to one of our facilities in order to infiltrate our information systems. These actual and potential breaches of our security measures and the accidental loss, inadvertent disclosure or unauthorized dissemination of proprietary information or sensitive, personal or confidential data about us, our employees or our customers, including the potential loss or disclosure of such information or data as a result of hacking, fraud, trickery or other forms of deception, could expose us, our employees, our customers or the individuals affected to a risk of loss or misuse of this information, result in litigation and potential liability or fines for us, governmental inquiry and oversight, damage our brand and reputation or otherwise harm our business. Although these are industry-wide problems that affect computer systems and products across all platforms, they affect our products in particular because cyber-attackers tend to focus their efforts on the most popular operating systems and programs, and we expect them to continue to do so. Critical vulnerabilities may be identified in certain of our applications. These vulnerabilities could cause such applications to crash and could potentially allow an attacker to take control of the affected system, which could result in liability to us or limit our ability to conduct our business and deliver our products and services to customers. We devote significant resources to address security vulnerabilities through engineering more secure products, enhancing security and reliability features in our products and systems, code hardening, conducting rigorous penetration tests, deploying security updates to address security vulnerabilities and improving our incident response time. The cost of these steps could reduce our operating margins, and we may be unable to implement these measures quickly enough to prevent cyber-attackers from gaining unauthorized access into our systems and products. Despite our preventative efforts, actual or perceived security vulnerabilities in our products and systems may harm our reputation or lead to claims against us (and have in the past lead to such claims), and could lead some customers to seek to return products, to stop using certain services, to reduce or delay future purchases of products or services, or to use competing products or services. If we do not make the appropriate level of investment in our technology systems or if our systems become out-of-date or obsolete and we are not able to deliver the quality of data security customers require, our business could be adversely affected. Customers may also increase their expenditures on security measures designed to protect their existing computer systems from attack, which could delay adoption of new technologies. Further, if we or our customers are subject to a future attack, or our technology is utilized in a third-party attack, it may be necessary for us to take additional extraordinary measures and make additional expenditures to take appropriate responsive and preventative steps. Any of these events could adversely affect our revenues or margins. Moreover, delayed sales, lower margins or lost customers resulting from the disruptions of cyber-attacks or preventative measures could adversely affect our financial results, stock price and reputation.

Uncertainty about current and future economic conditions and other adverse changes in general political conditions in any of the major countries in which we do business could adversely affect our operating results.

As our business has grown, we have become increasingly subject to the risks arising from adverse changes in economic and political conditions, both domestically and globally. Uncertainty about current and future economic and political conditions on us, our customers, suppliers and partners, makes it difficult for us to forecast operating results and to make decisions about future investments. If economic growth in the U.S., Europe or other countries slows, or if the U.S., Europe or other countries in which we do business experience further economic recessions, many customers may delay or reduce technology purchases, advertising spending or marketing spending. This could result in reductions in sales of our products and services, longer sales cycles, slower adoption of new technologies and increased price competition. Additionally, we cannot yet predict how federal or state spending cuts in the U.S. may affect our business, if at all. Our customers include government entities, including the U.S. federal government, and if spending cuts impede the government's ability to purchase our products and solutions, our revenues could decline. Deterioration in economic conditions in any of the countries in which we do business could also cause slower or impaired collections on accounts receivable, which may adversely impact our liquidity and financial condition. There could be a number of effects from a financial institution credit crisis on our business, which could include impaired credit availability and financial stability of our customers, including our distribution partners and channels. A disruption in the financial markets may also have an effect on our derivative counterparties and could also impair

our banking partners on which we rely for operating cash management. Any of these events would likely harm our business, results of operations and financial condition.

Political instability in or around any of the major countries in which we do business would also likely harm our business, results of operations and financial condition.

We may not realize the anticipated benefits of past or future acquisitions, and integration of these acquisitions may disrupt our business and management.

We may not realize the anticipated benefits of an acquisition of a company, division, product or technology, each of which involves numerous risks. These risks include:

- difficulty in integrating the operations and personnel of the acquired company;

Table of Contents

difficulty in effectively integrating the acquired technologies, products or services with our current technologies, products or services;
 difficulty in maintaining controls, procedures and policies during the transition and integration;
 entry into markets in which we have no or limited direct prior experience and where competitors in such markets have stronger market positions;
 disruption of our ongoing business and distraction of our management and other employees from other opportunities and challenges;
 difficulty integrating the acquired company's accounting, management information, human resources and other administrative systems;
 inability to retain personnel of the acquired business;
 inability to retain key customers, distributors, vendors and other business partners of the acquired business;
 inability to achieve the financial and strategic goals for the acquired and combined businesses;
 inability to take advantage of anticipated tax benefits as a result of unforeseen difficulties in our integration activities;
 incurring acquisition-related costs or amortization costs for acquired intangible assets that could impact our operating results;
 potential additional exposure to fluctuations in currency exchange rates;
 potential additional costs of bringing acquired companies into compliance with laws and regulations applicable to us as a multi-national corporation;
 potential impairment of our relationships with employees, customers, partners, distributors or third-party providers of our technologies, products or services;
 potential failure of the due diligence processes to identify significant problems, liabilities or other challenges of an acquired company or technology, including but not limited to, issues with the acquired company's intellectual property, product quality or product architecture, data back-up and security (including security from cyber-attacks), privacy practices, revenue recognition or other accounting practices, employee, customer or partner issues or legal and financial contingencies;
 exposure to litigation or other claims in connection with, or inheritance of claims or litigation risk as a result of, an acquisition, including but not limited to claims from terminated employees, customers, former stockholders or other third parties;
 incurring significant exit charges if products or services acquired in business combinations are unsuccessful;
 potential inability to assert that internal controls over financial reporting are effective;
 potential inability to obtain, or obtain in a timely manner, approvals from governmental authorities, which could delay or prevent such acquisitions;
 potential delay in customer and distributor purchasing decisions due to uncertainty about the direction of our product and service offerings; and
 potential incompatibility of business cultures.

Mergers and acquisitions of high technology companies are inherently risky. If we do not complete an announced acquisition transaction or integrate an acquired business successfully and in a timely manner, we may not realize the benefits of the acquisition to the extent anticipated.

We may incur substantial costs enforcing or acquiring intellectual property rights and defending against third-party claims as a result of litigation or other proceedings.

In connection with the enforcement of our own intellectual property rights, the acquisition of third-party intellectual property rights, or disputes relating to the validity or alleged infringement of third-party intellectual property rights, including patent rights,

Table of Contents

we have been, are currently and may in the future be subject to claims, negotiations or complex, protracted litigation. Intellectual property disputes and litigation are typically very costly and can be disruptive to our business operations by diverting the attention and energies of management and key technical personnel. Although we have successfully defended or resolved past lawsuits and other disputes, we may not prevail in the future. Third-party intellectual property disputes, including those initiated by non-practicing entities, could subject us to significant liabilities, require us to enter into royalty and licensing arrangements on unfavorable terms, prevent us from licensing certain of our products or offering certain of our services, subject us to injunctions restricting our sale of products or services, cause severe disruptions to our operations or the markets in which we compete, or require us to satisfy indemnification commitments with our customers including contractual provisions under various license arrangements and service agreements. In addition, we may incur significant costs in acquiring the necessary third-party intellectual property rights for use in our products, in some cases to fulfill contractual obligations with our customers. Any of these occurrences could significantly harm our business.

We may not be able to protect our intellectual property rights, including our source code, from third-party infringers or unauthorized copying, use or disclosure.

Although we defend our intellectual property rights and combat unlicensed copying, access and use of software and intellectual property through a variety of techniques, preventing unauthorized use or infringement of our rights is inherently difficult. We actively combat software piracy as we enforce our intellectual property rights, but we nonetheless lose significant revenue due to illegal use of our software. If piracy activities continue at historical levels or increase, it may further harm our business.

Additionally, we take significant measures to protect the secrecy of our confidential information and trade secrets, including our source code. Despite these measures, hackers have managed to access certain of our source code in the past and may obtain access in the future. If unauthorized disclosure of our source code occurs through security breach, cyber-attack or otherwise, we could potentially lose future trade secret protection for that source code. The loss of future trade secret protection could make it easier for third parties to compete with our products by copying functionality, which could cause us to lose customers and could adversely affect our revenue and operating margins. We also seek to protect our confidential information and trade secrets through the use of non-disclosure agreements with our customers, contractors, vendors and partners. However, there is a risk that our confidential information and trade secrets may be disclosed or published without our authorization, and in these situations it may be difficult and/or costly for us to enforce our rights.

Increasing regulatory focus on privacy issues and expanding laws and regulations could impact our new business models and expose us to increased liability.

Our new business models are more highly regulated, including for privacy and data security. We are also expanding these new models in countries that have more stringent data protection laws than those in the U.S. With these new business models, our liability exposure, compliance requirements and costs associated with privacy issues will likely increase. Privacy laws globally are changing and evolving. Governments, privacy advocates and class action attorneys are increasingly scrutinizing how companies collect, process, use, store, share or transmit personal data. New laws and industry self-regulatory codes have been enacted and more are being considered that may affect our ability to reach current and prospective customers, to understand how our products and services are being used, to respond to customer requests allowed under the laws, and to implement our new business models effectively. These new laws and regulations would similarly affect our competitors as well as our customers. Any perception of our practices or products as an invasion of privacy, whether or not consistent with current regulations and industry practices, may subject us to public criticism, class action lawsuits, reputational harm or claims by regulators, industry groups or other third parties, all of which could disrupt our business and expose us to increased liability. Additionally, both laws regulating privacy, as well as third-party products addressing perceived privacy concerns, could affect the functionality of and demand for our products, thereby harming our revenues.

On behalf of certain of our customers using some of our services, we collect and store information derived from the activities of website visitors, which may include anonymous or personal information. This enables us to provide such customers with reports on aggregated anonymous or personal information from and about the visitors to their websites in the manner specifically directed by each such individual customer. Federal, state and foreign governments and

agencies have adopted or are considering adopting laws regarding the collection, use and disclosure of this information. Our compliance with privacy laws and regulations and our reputation among the public body of website visitors depend in part on such customers' adherence to privacy laws and regulations and their use of our services in ways consistent with such visitors' expectations. We also rely on representations made to us by customers that their own use of our services and the information they provide to us via our services do not violate any applicable privacy laws, rules and regulations or their own privacy policies. We ask customers to represent to us that they provide their website visitors the opportunity to "opt-out" of the information collection associated with our services, as applicable. We do not formally audit such customers to confirm compliance with these representations. If these representations are false or if such customers do not otherwise comply with applicable privacy laws, we could face potentially adverse publicity and possible legal or other regulatory

Table of Contents

action. In addition, some countries are considering enacting laws that would expand the scope of privacy-related obligations required of service providers, such as Adobe, that would require additional compliance expense and increased liability.

If we fail to process transactions effectively or fail to adequately protect against disputed or potential fraudulent activities, our revenue and earnings may be harmed.

We process a significant volume of transactions on a daily basis in both our Digital Marketing and Digital Media businesses. Due to the size and volume of transactions that we handle, effective processing systems and controls are essential, but even the most sophisticated systems and processes may not be effective in preventing all errors. The systems supporting our business are comprised of multiple technology platforms that may be difficult to scale. If we are unable to effectively manage these systems and processes we may be unable to process customer data in an accurate, reliable and timely manner, which may harm our customer relationships or results of operations.

Some of our lines of business rely on us or our third-party service providers to host and deliver services and data, and any interruptions or delays in these hosted services, security or privacy breaches, or failures in data collection could expose us to liability and harm our business and reputation.

Some of our lines of business and services, including our online store at adobe.com, Creative Cloud and other hosted Digital Media offerings and our Adobe Marketing Cloud offerings, rely on services hosted and controlled directly by us or by third parties. We do not have redundancy for all of our systems, many of our critical applications reside in only one of our data centers, and our disaster recovery planning may not account for all eventualities. If our business relationship with a third-party provider of hosting or content delivery services is negatively affected, or if one of our content delivery suppliers were to terminate their agreement with us, we might not be able to deliver the corresponding our hosted offerings to our customers, which could subject us to reputational harm and cause us to lose customers and future business, reducing our revenues.

We hold large amounts of customer data, some of which is hosted in third-party facilities. A security incident at those facilities or ours may compromise the confidentiality, integrity or availability of customer data. Unauthorized access to customer data stored on our computers or networks may be obtained through break-ins, breach of our secure network by an unauthorized party, employee theft or misuse, or other misconduct. It is also possible that unauthorized access to customer data may be obtained through inadequate use of security controls by customers. While our products and services provide and support strong password controls, IP restriction and account controls, their use is controlled by the customer. Accounts created with weak passwords could allow cyber-attackers to gain access to customer data. Additionally, failure by customers to remove accounts of their own employees, or granting of accounts by the customer in an uncontrolled manner, may allow for access by former or unauthorized customer employees. If there were an inadvertent disclosure of personal information, or if a third party were to gain unauthorized access to the personal information we possess on behalf of our customers, our operations could be disrupted, our reputation could be damaged and we could be subject to claims or other liabilities. In addition, such perceived or actual unauthorized disclosure of the information we collect or breach of our security could damage our reputation, result in the loss of customers and harm our business.

Because of the large amount of data that we collect and manage on behalf of our customers, it is possible that hardware or software failures or errors in our systems (or those of our third-party service providers) could result in data loss or corruption or cause the information that we collect to be incomplete or contain inaccuracies that our customers regard as significant. Furthermore, our ability to collect and report data may be delayed or interrupted by a number of factors, including access to the internet, the failure of our network or software systems, security breaches or significant variability in visitor traffic on customer websites. In addition, computer viruses may harm our systems causing us to lose data, and the transmission of computer viruses could expose us to litigation. We may also find, on occasion, that we cannot deliver data and reports to our customers in near real time because of a number of factors, including significant spikes in customer activity on their websites or failures of our network or software. If we supply inaccurate information or experience interruptions in our ability to capture, store and supply information in near real time or at all, our reputation could be harmed and we could lose customers, or we could be found liable for damages or incur other losses.

Failure to manage our sales and distribution channels and third-party customer service and technical support providers effectively could result in a loss of revenue and harm to our business.

In fiscal 2013, revenue from Ingram Micro has declined to less than 10% of our net revenue, although it has remained as our top customer. We have multiple non-exclusive, independently negotiated distribution agreements with Ingram Micro and its subsidiaries covering our arrangements in specified countries and regions. Each of these contracts has an independent duration, is independent of any other agreement (such as a master distribution agreement) and any termination of one agreement does not affect the status of any of the other agreements. In fiscal 2013, no single agreement with Ingram Micro or any other distributor was responsible for over 5% of our total net revenue. If any one of our agreements with Ingram Micro were terminated, we believe we could make arrangements with new or existing distributors to distribute our products without a substantial disruption to our

Table of Contents

business; however, any prolonged delay in securing a replacement distributor could have a negative short-term impact on our results of operations.

Successfully managing our indirect channel efforts to reach various potential customer segments for our products and services is a complex process across the broad range of geographies where we do business or plan to do business. Our distributors and other channel partners are independent businesses that we do not control. Notwithstanding the independence of our channel partners, we face potential legal risk and reputational harm from the activities of these third parties including, but not limited to, export control violations, workplace conditions, corruption and anti-competitive behavior. Although we have undertaken efforts to reduce these third-party risks, they remain present. We cannot be certain that our distribution channel will continue to market or sell our products effectively. If our distribution channel is not successful, we may lose sales opportunities, customers and revenues.

Our distributors also sell our competitors' products, and if they favor our competitors' products for any reason, they may fail to market our products as effectively or to devote resources necessary to provide effective sales, which would cause our results to suffer. We also distribute some products through our OEM channel, and if our OEMs decide not to bundle our applications on their devices, our results could suffer.

In addition, the financial health of our distributors and our continuing relationships with them are important to our success. Some of these distributors may be adversely impacted by changes to our business model and practices, such as our release of Creative Cloud offerings for teams and enterprises, or unable to withstand adverse changes in current economic conditions, which could result in insolvency and/or the inability of such distributors to obtain credit to finance purchases of our products. In addition, weakness in the end-user market could negatively affect the cash flows of our distributors who could, in turn, delay paying their obligations to us, which would increase our credit risk exposure. Our business could be harmed if the financial condition of some of these distributors substantially weakened and we were unable to timely secure replacement distributors.

We also sell certain of our products and services through our direct sales force. Risks associated with this sales channel include longer sales and collection cycles associated with direct sales efforts, challenges related to hiring, retaining and motivating our direct sales force, and substantial amounts of training for sales representatives, including regular updates to cover new and upgraded systems, products and services. Moreover, our recent hires may not become as productive as we would like, as in most cases it takes a significant period of time before they achieve full productivity. Our business could be seriously harmed if these expansion efforts do not generate a corresponding significant increase in revenues and we are unable to achieve the efficiencies we anticipate. In addition, the loss of key sales employees could impact our customer relationships and future ability to sell to certain accounts covered by such employees.

We also provide products and services, directly and indirectly, to a variety of governmental entities, both domestically and internationally. Risks associated with licensing and selling products and services to governmental entities include longer sales cycles, varying governmental budgeting processes and adherence to complex procurement regulations and other requirements. Ineffectively managing these risks could result in the assessment of penalties and fines, harm to our reputation and lost sales opportunities to such governmental entities.

We outsource a substantial portion of our customer service and technical support activities to third-party service providers. We rely heavily on these third-party customer service and technical support representatives working on our behalf, and we expect to continue to rely heavily on third parties in the future. This strategy provides us with lower operating costs and greater flexibility, but also presents risks to our business due to the fact that we may not be able to influence the quality of support as directly as we would be able to do in our own company-run call centers. Our customers may react negatively to providing information to, and receiving support from, third-party organizations, especially if based overseas. If we encounter problems with our third-party customer service and technical support providers, our reputation may be harmed and we could lose customers and associated revenues.

Catastrophic events may disrupt our business.

We are a highly automated business and rely on our network infrastructure and enterprise applications, internal technology systems and our website for our development, marketing, operational, support, hosted services and sales activities. In addition, some of our businesses rely on third-party hosted services, and we do not control the operation of third-party data center facilities serving our customers from around the world, which increases our vulnerability. A

disruption, infiltration or failure of these systems or third-party hosted services in the event of a major earthquake, fire, flood, power loss, telecommunications failure, software or hardware malfunctions, cyber-attack, war, terrorist attack or other catastrophic event could cause system interruptions, reputational harm, loss of intellectual property, delays in our product development, lengthy interruptions in our services, breaches of data security and loss of critical data. Any of these events could prevent us from fulfilling our customers' orders. Our corporate headquarters, a significant portion of our research and development activities, certain of our data centers and certain other critical business operations are located in the San Francisco Bay Area, and additional facilities where we conduct significant operations

Table of Contents

are located in the Salt Lake Valley Area, both of which are near major earthquake faults. We have developed certain disaster recovery plans and backup systems to reduce the potentially adverse effect of such events, but a catastrophic event that results in the destruction or disruption of any of our data centers or our critical business or information technology systems could severely affect our ability to conduct normal business operations and, as a result, our future operating results could be adversely affected.

Net revenue, margin or earnings shortfalls or the volatility of the market generally may cause the market price of our stock to decline.

The market price for our common stock has in the past experienced significant fluctuations and may fluctuate significantly in the future. A number of factors may affect the market price for our common stock, including: shortfalls in our revenue, margins, earnings, the number of paid, active Creative Cloud subscribers, ARR, bookings within our Adobe Marketing Cloud business or other key performance metrics;

• changes in estimates or recommendations by securities analysts;

• the announcement of new products, product enhancements or service introductions by us or our competitors;

• the loss of a large customer or our inability to increase sales to existing customers or attract new customers;

• variations in our or our competitors' results of operations, changes in the competitive landscape generally and developments in our industry; and

• unusual events such as significant acquisitions, divestitures, litigation, general socio-economic, regulatory, political or market conditions and other factors, including factors unrelated to our operating performance.

We are subject to risks associated with compliance with laws and regulations globally which may harm our business.

We are a global company subject to varied and complex laws, regulations and customs domestically and internationally. These laws and regulations relate to a number of aspects of our business, including trade protection, import and export control, data and transaction processing security, payment card industry data security standards, records management, user-generated content hosted on websites we operate, corporate governance, employee and third-party complaints, gift policies, conflicts of interest, employment and labor relations laws, securities regulations and other regulatory requirements affecting trade and investment. The application of these laws and regulations to our business is often unclear and may at times conflict. Compliance with these laws and regulations may involve significant costs or require changes in our business practices that result in reduced revenue and profitability.

Non-compliance could also result in fines, damages, criminal sanctions against us, our officers or our employees, prohibitions on the conduct of our business, and damage to our reputation. We incur additional legal compliance costs associated with our global operations and could become subject to legal penalties if we fail to comply with local laws and regulations in U.S. jurisdictions or in foreign countries, which laws and regulations may be substantially different from those in the U.S. In many foreign countries, particularly in those with developing economies, it is common to engage in business practices that are prohibited by U.S. regulations applicable to us, including the Foreign Corrupt Practices Act. Although we implement policies and procedures designed to ensure compliance with these laws, there can be no assurance that all of our employees, contractors and agents, as well as those companies to which we outsource certain of our business operations, including those based in or from countries where practices that violate such U.S. laws may be customary, will not take actions in violation of our internal policies. Any such violation, even if prohibited by our internal policies, could have an adverse effect on our business.

As a global business that generates approximately 47% of our total revenue from sales to customers outside of the Americas, we are subject to a number of risks, including:

• foreign currency fluctuations;

• changes in government preferences for software procurement;

• international economic, political and labor conditions;

• tax laws (including U.S. taxes on foreign subsidiaries);

• increased financial accounting and reporting burdens and complexities;

• unexpected changes in, or impositions of, legislative or regulatory requirements;

• failure of laws to protect our intellectual property rights adequately;

Table of Contents

- inadequate local infrastructure and difficulties in managing and staffing international operations;
- delays resulting from difficulty in obtaining export licenses for certain technology, tariffs, quotas and other trade barriers and restrictions;
- the imposition of governmental economic sanctions on countries in which we do business or where we plan to expand our business;
- transportation delays;
- operating in locations with a higher incidence of corruption and fraudulent business practices; and
- other factors beyond our control, including terrorism, war, natural disasters and pandemics.

If sales to any of our customers outside of the Americas are delayed or canceled because of any of the above factors, our revenues may decline.

In addition, approximately 50% of our employees are located outside the U.S. Accordingly, we are exposed to changes in laws governing our employee relationships in various U.S. and foreign jurisdictions, including laws and regulations regarding wage and hour requirements, fair labor standards, employee data privacy, unemployment tax rates, workers' compensation rates, citizenship requirements and payroll and other taxes, which likely would have a direct impact on our operating costs. We may continue to expand our international operations and international sales and marketing activities. Expansion in international markets has required, and will continue to require, significant management attention and resources. We may be unable to scale our infrastructure effectively or as quickly as our competitors in these markets, and our revenues may not increase to offset these expected increases in costs and operating expenses, which would cause our results to suffer.

We may incur losses associated with currency fluctuations and may not be able to effectively hedge our exposure. Our operating results are subject to fluctuations in foreign currency exchange rates. We attempt to mitigate a portion of these risks through foreign currency hedging, based on our judgment of the appropriate trade-offs among risk, opportunity and expense. We have established a hedging program to partially hedge our exposure to foreign currency exchange rate fluctuations for various currencies. If the foreign currency hedging markets are negatively affected by clearing and trade execution regulations imposed by the Dodd-Frank Wall Street Reform and Consumer Protection Act, the cost of hedging our foreign exchange exposure could increase.

We regularly review our hedging program and make adjustments as necessary based on the judgment factors discussed above. Our hedging activities may not offset more than a portion of the adverse financial impact resulting from unfavorable movement in foreign currency exchange rates, which could adversely affect our financial condition or results of operations.

We have issued \$1.5 billion of notes in a debt offering and may incur other debt in the future, which may adversely affect our financial condition and future financial results.

In the first quarter of fiscal 2010, we issued \$1.5 billion in senior unsecured notes. We also have a \$1.0 billion revolving credit facility, which is currently undrawn. Although we have no current plans to request any advances under this credit facility, we may use the proceeds of any future borrowing for general corporate purposes, or for future acquisitions or expansion of our business.

This debt may adversely affect our financial condition and future financial results by, among other things: requiring the dedication of a portion of our expected cash from operations to service our indebtedness, thereby reducing the amount of expected cash flow available for other purposes, including capital expenditures and acquisitions; and

- limiting our flexibility in planning for, or reacting to, changes in our business and our industry.

Our senior unsecured notes and revolving credit facility impose restrictions on us and require us to maintain compliance with specified covenants. Our ability to comply with these covenants may be affected by events beyond our control. If we breach any of the covenants and do not obtain a waiver from the lenders or noteholders, then, subject to applicable cure periods, any outstanding indebtedness may be declared immediately due and payable.

In addition, changes by any rating agency to our credit rating may negatively impact the value and liquidity of both our debt and equity securities, as well as the potential costs associated with a refinancing of our debt. Under certain circumstances, if our credit ratings are downgraded or other negative action is taken, the interest rate payable by us under our revolving credit facility

Table of Contents

could increase. Downgrades in our credit ratings could also restrict our ability to obtain additional financing in the future and could affect the terms of any such financing.

Changes in, or interpretations of, accounting principles could have a significant impact on our financial position and results of operations.

We prepare our Consolidated Financial Statements in accordance with accounting principles generally accepted in the United States of America ("GAAP"). These principles are subject to interpretation by the SEC and various bodies formed to interpret and create appropriate accounting principles. A change in these principles can have a significant effect on our reported results and may even retroactively affect previously reported transactions.

For example, the U.S.-based Financial Accounting Standards Board ("FASB") is currently working together with the International Accounting Standards Board ("IASB") on several projects to further align accounting principles and facilitate more comparable financial reporting between companies who are required to follow GAAP under SEC regulations and those who are required to follow International Financial Reporting Standards outside of the U.S. These efforts by the FASB and IASB may result in different accounting principles under GAAP that may result in materially different financial results for us in areas including, but not limited to, principles for recognizing revenue and lease accounting.

If our goodwill or amortizable intangible assets become impaired we may be required to record a significant charge to earnings.

Under GAAP, we review our goodwill and amortizable intangible assets for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. GAAP requires us to test for goodwill impairment at least annually. Factors that may be considered a change in circumstances indicating that the carrying value of our goodwill or amortizable intangible assets may not be recoverable include declines in stock price, market capitalization or cash flows and slower growth rates in our industry. We may be required to record a significant charge to earnings in our financial statements during the period in which any impairment of our goodwill or amortizable intangible assets is determined, negatively impacting our results of operations.

Changes in, or interpretations of, tax rules and regulations may adversely affect our effective tax rates.

We are a United States-based multinational company subject to tax in multiple U.S. and foreign tax jurisdictions. A significant portion of our foreign earnings for the current fiscal year were earned by our Irish subsidiaries. In addition to providing for U.S. income taxes on earnings from the United States, we provide for U.S. income taxes on the earnings of foreign subsidiaries unless the subsidiaries' earnings are considered permanently reinvested outside the United States. While we do not anticipate changing our intention regarding permanently reinvested earnings, if certain foreign earnings previously treated as permanently reinvested are repatriated, the related U.S. tax liability may be reduced by any foreign income taxes paid on these earnings.

Our income tax expense has differed from the tax computed at the U.S. federal statutory income tax rate due primarily to discrete items and to earnings considered as permanently reinvested in foreign operations. Unanticipated changes in our tax rates could affect our future results of operations. Our future effective tax rates could be unfavorably affected by changes in the tax rates in jurisdictions where our income is earned, by changes in, or our interpretation of, tax rules and regulations in the jurisdictions in which we do business, by unanticipated decreases in the amount of earnings in countries with low statutory tax rates, by lapses of the availability of the U.S. research and development tax credit, or by changes in the valuation of our deferred tax assets and liabilities. The United States, countries in the European Union and other countries where we do business have been considering changes in relevant tax, accounting and other laws, regulations and interpretations, including changes to tax laws applicable to corporate multinationals such as Adobe. These potential changes could adversely affect our effective tax rates or result in other costs to us. In addition, we are subject to the continual examination of our income tax returns by the U.S. Internal Revenue Service ("IRS") and other domestic and foreign tax authorities, including a current examination by the IRS of our fiscal 2010, 2011 and 2012 tax returns. These tax examinations are expected to focus on our intercompany transfer pricing practices as well as other matters. We regularly assess the likelihood of outcomes resulting from these examinations to determine the adequacy of our provision for income taxes and have reserved for potential adjustments that may result from the current examinations. We believe such estimates to be reasonable; however, there can be no assurance that

the final determination of any of these examinations will not have an adverse effect on our operating results and financial position.

If we are unable to recruit and retain key personnel our business may be harmed.

Much of our future success depends on the continued service and availability of our senior management. These individuals have acquired specialized knowledge and skills with respect to Adobe. The loss of any of these individuals could harm our business. Our business is also dependent on our ability to retain, hire and motivate talented, highly skilled personnel across all levels of our

Table of Contents

organization. Experienced personnel in the information technology industry are in high demand and competition for their talents is intense in many areas where our employees are located. If we are unable to continue to successfully attract and retain key personnel, our business may be harmed. Effective succession planning is also a key factor for our long-term success. Our failure to enable the effective transfer of knowledge and facilitate smooth transitions of our key employees could adversely affect our long-term strategic planning and execution.

We believe that a critical contributor to our success to date has been our corporate culture, which we have built to foster innovation, teamwork and employee satisfaction. As we grow, including from the integration of employees and businesses acquired in connection with previous or future acquisitions, we may find it difficult to maintain important aspects of our corporate culture, which could negatively affect our ability to retain and recruit personnel who are essential to our future success.

Our investment portfolio may become impaired by deterioration of the capital markets.

Our cash equivalent and short-term investment portfolio as of November 29, 2013 consisted of corporate bonds and commercial paper, U.S. agency securities and U.S. Treasury securities, money market mutual funds, municipal securities, time deposits and foreign government securities. We follow an established investment policy and set of guidelines to monitor and help mitigate our exposure to interest rate and credit risk. The policy sets forth credit quality standards and limits our exposure to any one issuer, as well as our maximum exposure to various asset classes.

Should financial market conditions worsen in the future, investments in some financial instruments may pose risks arising from market liquidity and credit concerns. In addition, any deterioration of the capital markets could cause our other income and expense to vary from expectations. As of November 29, 2013, we had no material impairment charges associated with our short-term investment portfolio, and although we believe our current investment portfolio has little risk of material impairment, we cannot predict future market conditions or market liquidity, or credit availability, and can provide no assurance that our investment portfolio will remain materially unimpaired.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The following table sets forth the location, approximate square footage and use of each of the principal properties used by Adobe during fiscal 2013. We lease or sublease all of these properties with the exception of our property in Noida, India where we own the building and lease the land, our corporate offices in San Jose where we own the land and lease the buildings, and in San Francisco on Townsend and Lehi where we own the building and land. All leased properties are leased under operating leases. Such leases expire at various times through 2028, with the exception of our land lease in Noida, India that expires in 2091. The annual base rent expense (including operating expenses, property taxes and assessments, as applicable) for all leased facilities is currently approximately \$91.0 million and is subject to annual adjustments as well as changes in interest rates.

| Location | Approximate Square Footage | Use |

- (6) The total square footage is 122,000, of which we occupy 65,000 square feet, or approximately 53% of this facility; 37,000 square feet is unoccupied. The remaining square footage is subleased.

In general, all facilities are in good condition, suitable for the conduct of our business and are operating at an average capacity of approximately 87%.

ITEM 3. LEGAL PROCEEDINGS

In connection with disputes relating to the validity or alleged infringement of third-party intellectual property rights, including patent rights, we have been, are currently and may in the future be subject to claims, negotiations or complex, protracted litigation. Intellectual property disputes and litigation may be very costly and can be disruptive to our business operations by diverting the attention and energies of management and key technical personnel. Although we have successfully defended or resolved past litigation and disputes, we may not prevail in any ongoing or future litigation and disputes. Third-party intellectual property disputes could subject us to significant liabilities, require us to enter into royalty and licensing arrangements on unfavorable terms, prevent us from licensing certain of our products or offering certain of our services, subject us to injunctions restricting our sale of products or services, cause severe disruptions to our operations or the markets in which we compete, or require us to satisfy indemnification commitments with our customers including contractual provisions under various license arrangements and service agreements.

Between May 4, 2011 and July 14, 2011, five putative class action lawsuits were filed in Santa Clara Superior Court and Alameda Superior Court in California. On September 12, 2011, the cases were consolidated into In Re High-Tech Employee Antitrust Litigation (“HTEAL”) pending in the United States District Court for the Northern District of California, San Jose Division. In the consolidated complaint, Plaintiffs alleged that Adobe, along with Apple, Google, Intel, Intuit, Lucas Films and Pixar, agreed not to recruit each other's employees in violation of Federal and state antitrust laws. Plaintiffs claim the alleged agreements suppressed employee compensation and deprived employees of career opportunities. Plaintiffs seek injunctive relief, monetary damages, treble damages, costs and attorneys fees. All defendants deny the allegations and that they engaged in any wrongdoing of any kind. On October 24, 2013, the court certified a class of all persons who worked in the technical, creative, and/or research and development fields on a salaried basis in the United States for one or more of the following: (a) Apple from March 2005 through December 2009; (b) Adobe from May 2005 through December 2009; (c) Google from March 2005 through December 2009; (d) Intel from March 2005 through December 2009; (e) Intuit from June 2007 through December 2009; (f) Lucasfilm from January 2005 through December 2009; or (g) Pixar from January 2005 through December 2009, excluding retail employees, corporate officers, members of the boards of directors, and senior executives of all defendants. We dispute these claims and intend to vigorously defend ourselves in this matter. As of November 29, 2013, no amounts have been accrued as a loss is not considered probable or estimable. The trial is currently scheduled to be held in May 2014. In addition to intellectual property disputes and other litigation matters described above, we are subject to legal proceedings, claims and investigations in the ordinary course of business, including claims relating to commercial, employment and other matters. Some of these disputes and legal proceedings may include speculative claims for substantial or indeterminate amounts of damages. We consider all claims on a quarterly basis in accordance with GAAP and based on known facts assess whether potential losses are considered reasonably possible, probable and estimable. Based upon this assessment, we then evaluate disclosure requirements and whether to accrue for such claims in our financial statements. This determination is then reviewed and discussed with our Audit Committee and our independent registered public accounting firm.

We make a provision for a liability when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. These provisions are reviewed at least quarterly and adjusted to reflect the impacts of negotiations, settlements, rulings, advice of legal counsel and other information and events pertaining to a particular case. Unless otherwise specifically disclosed here or in our Notes to Consolidated Financial Statements, we have determined that no provision for liability nor disclosure is required related to any claim against us because: (a) there is not a reasonable possibility that a loss exceeding amounts already recognized (if any) may be incurred with respect to such claim; (b) a reasonably possible loss or range of loss cannot be estimated; or (c) such estimate is immaterial. All legal costs associated with litigation are expensed as incurred. Litigation is inherently unpredictable. However, we believe that we have valid defenses with respect to the legal matters pending against us. It is possible, nevertheless,

that our consolidated financial position, cash flows or results of operations could be negatively affected by an unfavorable resolution of one or more of such proceedings, claims or investigations.

In connection with our anti-piracy efforts, conducted both internally and through organizations such as the Business Software Alliance, from time to time we undertake litigation against alleged copyright infringers. Such lawsuits may lead to counter-claims alleging improper use of litigation or violation of other laws. We believe we have valid defenses with respect to such counter-claims; however, it is possible that our consolidated financial position, cash flows or results of operations could be affected in any particular period by the resolution of one or more of these counter-claims.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information for Common Stock

Our common stock is traded on the NASDAQ Global Select Market under the symbol "ADBE." The following table sets forth the high and low sales price per share of our common stock for the periods indicated.

| | Price Range | |
|----------------|-------------|---------|
| | High | Low |
| Fiscal 2013: | | |
| First Quarter | \$39.83 | \$34.70 |
| Second Quarter | \$47.01 | \$40.46 |
| Third Quarter | \$48.39 | \$42.72 |
| Fourth Quarter | \$57.55 | \$45.88 |
| Fiscal Year | \$57.55 | \$34.70 |
| Fiscal 2012: | | |
| First Quarter | \$33.73 | \$26.46 |
| Second Quarter | \$34.70 | \$29.82 |
| Third Quarter | \$33.92 | \$30.02 |
| Fourth Quarter | \$34.61 | \$31.44 |
| Fiscal Year | \$34.70 | \$26.46 |

Stockholders

According to the records of our transfer agent, there were 1,367 holders of record of our common stock on January 17, 2014. Because many of such shares are held by brokers and other institutions on behalf of stockholders, we are unable to estimate the total number of stockholders represented by these record holders.

Dividends

We did not declare or pay any cash dividends on our common stock during fiscal 2013 or fiscal 2012. Under the terms of our credit agreement and lease agreements, we are not prohibited from paying cash dividends unless payment would trigger an event of default or one currently exists. We do not anticipate paying any cash dividends in the foreseeable future.

Table of Contents

Issuer Purchases of Equity Securities

Below is a summary of stock repurchases for the three months ended November 29, 2013. See Note 13 of our Notes to Consolidated Financial Statements for information regarding our stock repurchase programs.

| Period | Shares Repurchased | Average Price Per Share | Total Number of Shares Purchased as Part of Publicly Announced Plans | Approximate Dollar Value that May Yet be Purchased Under the Plan ⁽¹⁾ |
|---|--|-------------------------|--|--|
| | (in thousands, except average price per share) | | | |
| Beginning repurchase authority August 31—September 27, 2013 | | | | 1,334,265 |
| Shares repurchased September 28—October 25, 2013 | 2,826 | \$47.50 | 2,826 | \$(134,265) |
| Shares repurchased October 26—November 29, 2013 | 2,589 | \$51.51 | 2,589 | \$(133,333) |
| Shares repurchased | 2,513 | \$54.71 | 2,513 | \$(137,456) ⁽²⁾ |
| Total | 7,928 | | 7,928 | \$929,211 |

⁽¹⁾ We currently have authority granted by our Board of Directors to repurchase up to \$2.0 billion in common stock through the end of fiscal 2015.

In October 2013, as part of our stock repurchase program, we entered into a structured stock repurchase agreement

⁽²⁾ with a large financial institution whereupon we provided them with a prepayment of \$400.0 million. As of November 29, 2013, approximately \$129.2 million of the prepayment remained under this agreement.

| Stockholders' equity | \$6,724,634 | \$6,665,182 | \$5,783,113 | \$5,192,387 | \$4,890,568 |
| Additional data: | | | | | |
| Worldwide employees | 11,847 | 11,144 | 9,925 | 9,117 | 8,660 |

⁽¹⁾ Information associated with our financial position is as of the Friday closest to November 30 for the five fiscal periods through 2013.

Table of Contents

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with our Consolidated Financial Statements and Notes thereto.

ACQUISITIONS

During fiscal 2013, we completed our acquisitions of privately held Neolane, a leader in cross-channel campaign management technology for \$616.7 million and privately held Behance, an online social media platform to showcase and discover creative work for \$111.1 million. During fiscal 2013, we began integrating Neolane and Behance into our Digital Marketing and Digital Media reportable segments, respectively. The impact of these acquisitions were not material to our Consolidated Financial Statements.

During fiscal 2012, we completed the acquisition of privately held Efficient Frontier, a multi-channel digital ad buying and optimization company for \$374.7 million. During fiscal 2012, we began integrating Efficient Frontier into our Digital Marketing segment.

During fiscal 2011, we completed six business combinations and two asset acquisitions with aggregate purchase prices totaling \$328.3 million. We have included the financial results of the business combinations in our consolidated results of operations beginning on the respective acquisition dates.

See Note 2 of our Notes to Consolidated Financial Statements for further information regarding these acquisitions.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

In preparing our Consolidated Financial Statements in accordance with GAAP and pursuant to the rules and regulations of the SEC, we make assumptions, judgments and estimates that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosures of contingent assets and liabilities. We base our assumptions, judgments and estimates on historical experience and various other factors that we believe to be reasonable under the circumstances. Actual results could differ materially from these estimates under different assumptions or conditions. On a regular basis, we evaluate our assumptions, judgments and estimates. We also discuss our critical accounting policies and estimates with the Audit Committee of the Board of Directors.

We believe that the assumptions, judgments and estimates involved in the accounting for revenue recognition, stock-based compensation, business combinations, goodwill impairment and income taxes have the greatest potential impact on our Consolidated Financial Statements. These areas are key components of our results of operations and are based on complex rules requiring us to make judgments and estimates, so we consider these to be our critical accounting policies.

Historically, our assumptions, judgments and estimates relative to our critical accounting policies have not differed materially from actual results.

Revenue Recognition

Our revenue is derived from the licensing of perpetual, time-based and subscription software products, associated software maintenance and support plans, non-software related hosting services, consulting services, training and technical support.

We recognize revenue when persuasive evidence of an arrangement exists, we have delivered the product or performed the service, the fee is fixed or determinable and collection is probable. Determining whether and when some of these criteria have been satisfied often involves assumptions and judgments that can have a significant impact on the timing and amount of revenue we report.

We enter into multiple element revenue arrangements in which a customer may purchase a combination of software, upgrades, maintenance and support, hosting services and consulting.

For our software and software-related multiple element arrangements, we must: (1) determine whether and when each element has been delivered; (2) determine whether undelivered products or services are essential to the functionality of the delivered products and services; (3) determine the fair value of each undelivered element using vendor-specific objective evidence ("VSOE"), and (4) allocate the total price among the various elements. VSOE of fair value is used to allocate a portion of the price to the undelivered elements and the residual method is used to allocate the remaining portion to the delivered elements. Absent VSOE, revenue is deferred until the earlier of the point at which VSOE of fair value exists for any undelivered element or until all elements of the arrangement have been delivered. However, if the only undelivered element is maintenance and support, the entire arrangement fee is recognized ratably over the

performance period. Changes in assumptions or judgments or changes to the

35

Table of Contents

elements in a software arrangement could cause a material increase or decrease in the amount of revenue that we report in a particular period.

We determine VSOE for each element based on historical stand-alone sales to third parties or from the stated renewal rate for the elements contained in the initial arrangement. In determining VSOE, we require that a substantial majority of the selling prices for a product or service fall within a reasonably narrow pricing range.

We have established VSOE for our software maintenance and support services, custom software development services, consulting services and training.

For multiple-element arrangements containing our non-software services, we must: (1) determine whether and when each element has been delivered; (2) determine fair value of each element using the selling price hierarchy of VSOE of selling price, third-party evidence (“TPE”) of selling price or best-estimated selling price (“BESP”), as applicable; and (3) allocate the total price among the various elements based on the relative selling price method.

For multiple-element arrangements that contain both software and non-software elements, we allocate revenue to software or software-related elements as a group and any non-software elements separately based on the selling price hierarchy. We determine the selling price for each deliverable using VSOE of selling price, if it exists, or TPE of selling price. If neither VSOE nor TPE of selling price exist for a deliverable, we use BESP. Once revenue is allocated to software or software-related elements as a group, we recognize revenue in conformance with software revenue accounting guidance. Revenue is recognized when revenue recognition criteria are met for each element.

We are generally unable to establish VSOE or TPE for non-software elements and as such, we use BESP. BESP is generally used for offerings that are not typically sold on a stand-alone basis or for new or highly customized offerings. We determine BESP for a product or service by considering multiple factors including, but not limited to, major product groupings, geographies, market conditions, competitive landscape, internal costs, gross margin objectives and pricing practices. Pricing practices taken into consideration include historic contractually stated prices, volume discounts where applicable and our price lists. We must estimate certain royalty revenue amounts due to the timing of securing information from our customers. While we believe we can make reliable estimates regarding these matters, these estimates are inherently subjective. Accordingly, our assumptions and judgments regarding future products and services as well as our estimates of royalty revenue could differ from actual events, thus materially impacting our financial position and results of operations.

Product revenue is recognized when the above criteria are met. We reduce the revenue recognized for estimated future returns, price protection and rebates at the time the related revenue is recorded. In determining our estimate for returns and in accordance with our internal policy regarding global channel inventory which is used to determine the level of product held by our distributors on which we have recognized revenue, we rely upon historical data, the estimated amount of product inventory in our distribution channel, the rate at which our product sells through to the end user, product plans and other factors. Our estimated provisions for returns can vary from what actually occurs. Product returns may be more or less than what was estimated. The amount of inventory in the channel could be different than what is estimated. Our estimate of the rate of sell-through for product in the channel could be different than what actually occurs. There could be a delay in the release of our products. These factors and unanticipated changes in the economic and industry environment could make our return estimates differ from actual returns, thus impacting our financial position and results of operations.

In the future, actual returns and price protection may exceed our estimates as unsold products in the distribution channels are exposed to rapid changes in consumer preferences, market conditions or technological obsolescence due to new platforms, product updates or competing products. While we believe we can make reliable estimates regarding these matters, these estimates are inherently subjective. Accordingly, if our estimates change, our returns and price protection reserves would change, which would impact the total net revenue we report.

We recognize revenues for hosting services that are based on a committed number of transactions ratably beginning on the date the customer commences use of our services and continuing through the end of the customer term.

Over-usage fees, and fees billed based on the actual number of transactions from which we capture data, are billed in accordance with contract terms as these fees are incurred. We record amounts that have been invoiced in accounts receivable and in deferred revenue or revenue, depending on whether the revenue recognition criteria have been met.

Our consulting revenue is recognized on a time and materials basis and is measured monthly based on input measures, such as on hours incurred to date compared to total estimated hours to complete, with consideration given to output measures, such as contract milestones, when applicable.

Table of Contents

Business Combinations

We allocate the purchase price of acquired companies to the tangible and intangible assets acquired and liabilities assumed, assumed equity awards, as well as to in-process research and development based upon their estimated fair values at the acquisition date. The purchase price allocation process requires management to make significant estimates and assumptions, especially at the acquisition date with respect to intangible assets, deferred revenue obligations and equity assumed.

Although we believe the assumptions and estimates we have made are reasonable, they are based in part on historical experience and information obtained from the management of the acquired companies and are inherently uncertain. Examples of critical estimates in valuing certain of the intangible assets we have acquired or may acquire in the future include but are not limited to:

- future expected cash flows from software license sales, subscriptions, support agreements, consulting contracts and acquired developed technologies and patents;
- expected costs to develop the in-process research and development into commercially viable products and estimated cash flows from the projects when completed;
- the acquired company's trade name and trademarks as well as assumptions about the period of time the acquired trade name and trademarks will continue to be used in the combined company's product portfolio; and
- discount rates.

In connection with the purchase price allocations for our acquisitions, we estimate the fair value of the deferred revenue obligations assumed. The estimated fair value of the support obligations is determined utilizing a cost build-up approach. The cost build-up approach determines fair value by estimating the costs related to fulfilling the obligations plus a normal profit margin. The estimated costs to fulfill the obligations are based on the historical costs related to fulfilling the obligations.

In connection with the purchase price allocations for our acquisitions, we estimate the fair value of the equity awards assumed. The estimated fair value is determined utilizing a modified binomial option pricing model which assumes employees exercise their stock options when the share price exceeds the strike price by a certain dollar threshold. If the acquired company has significant historical data on their employee's exercise behavior, then this threshold is determined based upon the acquired company's history. Otherwise, our historical exercise experience is used to determine the exercise threshold. Zero coupon yields implied by U.S. Treasury issuances, implied volatility for our common stock and our historical forfeiture rate are other inputs to the binomial model.

Unanticipated events and circumstances may occur which may affect the accuracy or validity of such assumptions, estimates or actual results.

Goodwill Impairment

We complete our goodwill impairment test on an annual basis, during the second quarter of our fiscal year, or more frequently, if changes in facts and circumstances indicate that an impairment in the value of goodwill recorded on our balance sheet may exist. In order to estimate the fair value of goodwill, we typically estimate future revenue, consider market factors and estimate our future cash flows. Based on these key assumptions, judgments and estimates, we determine whether we need to record an impairment charge to reduce the value of the asset carried on our balance sheet to its estimated fair value. Assumptions, judgments and estimates about future values are complex and often subjective. They can be affected by a variety of factors, including external factors such as industry and economic trends, and internal factors such as changes in our business strategy or our internal forecasts. Although we believe the assumptions, judgments and estimates we have made in the past have been reasonable and appropriate, different assumptions, judgments and estimates could materially affect our reported financial results.

We completed our annual impairment test in the second quarter of fiscal 2013 and determined there was no impairment. The results of our annual impairment test indicate there is no significant risk of future material goodwill impairment in any of our reporting units.

Accounting for Income Taxes

We use the asset and liability method of accounting for income taxes. Under this method, income tax expense is recognized for the amount of taxes payable or refundable for the current year. In addition, deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the financial

reporting and tax bases of assets and liabilities, and for operating losses and tax credit carryforwards. Management must make assumptions, judgments and estimates

Table of Contents

to determine our current provision for income taxes and also our deferred tax assets and liabilities and any valuation allowance to be recorded against a deferred tax asset.

Our assumptions, judgments and estimates relative to the current provision for income taxes take into account current tax laws, our interpretation of current tax laws and possible outcomes of current and future audits conducted by foreign and domestic tax authorities. We have established reserves for income taxes to address potential exposures involving tax positions that could be challenged by tax authorities. In addition, we are subject to the continual examination of our income tax returns by the IRS and other domestic and foreign tax authorities, including a current examination by the IRS of our fiscal 2010, 2011 and 2012 tax returns. We expect future examinations to focus on our intercompany transfer pricing practices as well as other matters. We regularly assess the likelihood of outcomes resulting from these examinations to determine the adequacy of our provision for income taxes and have reserved for potential adjustments that may result from the current examinations. We believe such estimates to be reasonable; however, the final determination of any of these examinations could significantly impact the amounts provided for income taxes in our Consolidated Financial Statements.

Our assumptions, judgments and estimates relative to the value of a deferred tax asset take into account predictions of the amount and category of future taxable income, such as income from operations or capital gains income. Actual operating results and the underlying amount and category of income in future years could render our current assumptions, judgments and estimates of recoverable net deferred taxes inaccurate. Any of the assumptions, judgments and estimates mentioned above could cause our actual income tax obligations to differ from our estimates, thus materially impacting our financial position and results of operations.

We are a United States-based multinational company subject to tax in multiple U.S. and foreign tax jurisdictions. A significant portion of our foreign earnings for the current fiscal year were earned by our Irish subsidiaries. In addition to providing for U.S. income taxes on earnings from the U.S., we provide for U.S. income taxes on the earnings of foreign subsidiaries unless the subsidiaries' earnings are considered permanently reinvested outside the U.S. While we do not anticipate changing our intention regarding permanently reinvested earnings, if certain foreign earnings previously treated as permanently reinvested are repatriated, the related U.S. tax liability may be reduced by any foreign income taxes paid on these earnings.

Our income tax expense has differed from the tax computed at the U.S. federal statutory income tax rate due primarily to discrete items and to earnings considered as permanently reinvested in foreign operations. Unanticipated changes in our tax rates could affect our future results of operations. Our future effective tax rates could be unfavorably affected by changes in the tax rates in jurisdictions where our income is earned, by changes in, or our interpretation of, tax rules and regulations in the jurisdictions in which we do business, by unanticipated decreases in the amount of earnings in countries with low statutory tax rates, by lapses of the availability of the U.S. research and development tax credit, or by changes in the valuation of our deferred tax assets and liabilities. The United States, countries in the European Union and other countries where we do business have been considering changes in relevant tax, accounting and other laws, regulations and interpretations, including changes to tax laws applicable to corporate multinationals such as Adobe. These potential changes could adversely affect our effective tax rates or result in other costs to us.

Recent Accounting Pronouncements

In December 2011, the FASB amended the accounting standards to increase the prominence of other comprehensive income ("OCI") by eliminating the option to present components of OCI as part of the statement of changes in shareholders' equity and requires the components of OCI to be presented either in a single continuous statement of comprehensive income or in two consecutive statements. We adopted the amended accounting standards at the beginning of our first quarter of fiscal 2013 by electing to present consolidated statements of comprehensive income separate from the consolidated statements of income.

In February 2013, the FASB further amended the above accounting standards to improve the presentation of amounts reclassified out of accumulated other comprehensive income in its entirety and by component by presenting the reclassification adjustments on either the face of the statement where net income is presented or in a separate disclosure in the notes to the financial statements. Amounts that are not required to be reclassified in their entirety to net income are required to be cross referenced to related footnote disclosures that provide additional detail. We elected to early adopt the amended accounting standard at the beginning of our second quarter of fiscal 2013 by electing to

present the reclassification adjustments and other required disclosures in a separate footnote.

The amended accounting standards only impact the financial statement presentation of OCI and do not change the components that are recognized in net income or OCI. The adoption had no impact on the Company's financial position or results of operations.

Recent Accounting Pronouncements Not Yet Effective

There have been no new accounting pronouncements not yet effective that have significance, or potential significance, to our Consolidated Financial Statements.

RESULTS OF OPERATIONS

Overview of 2013

For fiscal 2013, we reported financial results consistent with the continued execution of our plans for our two strategic growth areas, Digital Media and Digital Marketing, while continuing to market and license a broad portfolio of products and solutions.

We are a market leader in the fast-growing category addressed by our Digital Marketing segment. Our Adobe Marketing Cloud offering includes six solutions addressing the expanding needs of marketers, the newest of which is Adobe Campaign—a cross-channel campaign management tool that we added to our portfolio with the acquisition of Neolane during our third quarter of fiscal 2013.

Revenue from Adobe Marketing Cloud increased 26% and 35% during fiscal 2013 and 2012, respectively, compared to the year ago periods. Helping to drive this performance was strong adoption of our Adobe Experience Manager (“AEM”) offering and the addition of Neolane in mid-third quarter of fiscal 2013.

AEM, our fastest growing digital marketing solution, has typically been licensed by our customers as an on-premise offering where license revenue is recognized at the time of the transaction. In the past year, we introduced a managed services offering of AEM for which revenue is recognized ratably. We expect continued adoption of the newer managed services offering, which will increasingly migrate AEM revenue to recurring revenue in this segment. Given the comparisons involving more new license revenue being recognized over time versus past license revenue being recognized up front, we anticipate this trend may impact overall Adobe Marketing Cloud revenue in the near term.

Within our Digital Media segment, in May 2012 we delivered Adobe Creative Cloud, our subscription-based offering for creating and publishing content and applications. Creative Cloud is our next-generation offering that supersedes our historical model of licensing our creative products with perpetual licenses. We continue to implement strategies that will accelerate awareness, consideration and purchase of subscriptions to the offering. Key aspects of the value Creative Cloud provides include more frequent product updates, storage and access to user files stored in the cloud with syncing of files across users' machines, community-based features and services through our acquisition of Behance in December 2012, digital publishing and app creation capabilities, and lower entry point pricing for cost-sensitive customers.

In May 2013 we announced we would exclusively deliver new creative product innovations and features to Creative Cloud subscribers, and that Adobe Creative Suite 6 (“CS6”), which was released in May 2012, would be the last major update we provide for perpetual licensees. While we continue to offer CS6 on a perpetual licensing basis moving forward, we expect revenue for it to sequentially decline as our customers increasingly migrate to Creative Cloud.

We offer Creative Cloud for individuals and for teams, and we enable larger enterprise customers to acquire Creative Cloud capabilities through Enterprise Term License Agreements (“ETLAs”). The three Creative Cloud offerings address the multiple routes to market we use to license our creative software to targeted customers. Adoption of Creative Cloud is transforming our business model and we expect this to drive higher long-term revenue growth through an expansion of our customer base by acquiring new users through a lower cost of entry and delivery of additional features and value, as well as keeping existing customers current on our latest release. This model will drive our revenue to be more recurring and predictable as revenue is recognized ratably.

We have implemented, and will continue to implement, strategies that accelerate adoption of our Creative Cloud subscription model, causing our traditional perpetual license revenue to decline. These strategies include increasing the value Creative Cloud users receive, as well as targeted promotions and offers that attract past customers and

potential users to try out and ultimately subscribe to Creative Cloud.

During fiscal 2013, adoption of our Creative Cloud subscription offering continued to accelerate, which has and will continue to cause our traditional perpetual license revenue to decline and, in turn, has caused total net revenue in fiscal 2013 to decline compared with fiscal 2012. As anticipated, during this transition expenses did not and are not expected to decline in correlation to the decrease in revenue, which has adversely affected our net income and operating margin throughout fiscal 2013. However, over time we expect this business model transition will significantly increase our long-term revenue growth rate by attracting new

Table of Contents

users, keeping our end user base current and thereby driving higher revenue. Additionally, our shift to a subscription model will increase the amount of recurring revenue that is ratably recognized, driven by broader Creative Cloud adoption over the next several years. We began to see the impact of this shift in fiscal 2013.

To assist with the understanding of this transition and the related shift in revenue described above, we are using certain performance metrics to assess the health and trajectory of our overall Digital Media segment. These metrics include the total number of current paid subscriptions and Annualized Recurring Revenue (“ARR”). We define ARR as the sum of:

- the number of current paid subscriptions, multiplied by the average subscription price paid per user per month, multiplied by twelve months; plus,

- twelve months of contract value of ETLAs where the revenue is ratably recognized over the life of the contract.

ARR should be viewed independently of revenue, deferred revenue and unbilled deferred revenue as ARR is a performance metric and is not intended to be combined with any of these items.

We exited fiscal 2013 with 1.4 million paid Creative Cloud subscriptions, up from 0.3 million at the end of fiscal 2012. Total Creative ARR exiting fiscal 2013 was \$768.0 million, up from \$155.0 million exiting fiscal 2012, demonstrating the progress we have made with our transformation in this business.

Our Digital Media business also includes our Document Services products and solutions, including Acrobat. In fiscal 2013 we continued to drive solid adoption of our Acrobat family of products primarily through license agreements with enterprise customers. During fiscal 2013, a higher percentage of these agreements were ETLAs, which like ETLAs with our creative customers, cause more revenue to be recognized over time rather than at the time of contract signing. This has caused reported Document Services revenue in fiscal 2013 to decline compared to revenue achieved in fiscal 2012, with the benefit of ETLAs improving our growth potential over time. In addition to Acrobat, we also drove strong adoption of subscription based services including Acrobat cloud services and our EchoSign e-signing solution. Combined, adoption of Acrobat through ETLAs and our Document Services subscription offerings helped grow Document Services ARR to \$143.0 million exiting fiscal 2013, up from \$49.0 million at the end of fiscal 2012.

Financial Performance Summary for Fiscal 2013

We continue to derive the majority of our revenue from perpetual licenses. However, consistent with our strategy, during fiscal 2013, our subscription revenue as a percentage of total revenue increased to 28% from 15% and 11% as compared to fiscal 2012 and 2011, respectively, as we transition more of our business to a subscription-based model.

Total Digital Media ARR of approximately \$911.0 million as of November 29, 2013 increased by approximately \$707.0 million, or 347%, from approximately \$204.0 million as of November 30, 2012. The increase in our Digital Media ARR is primarily due to increases in the number of paid Creative Cloud individual and team subscriptions and adoption of our enterprise Creative Cloud offering through our ETLAs.

- Our total deferred revenue of \$828.8 million as of November 29, 2013 increased by \$209.2 million, or 34% from November 30, 2012, primarily due to increases in ETLAs and renewals for our Adobe Marketing Cloud services.

- Cost of revenue of \$586.6 million increased by \$102.8 million, or 21%, during fiscal 2013, from \$483.8 million in fiscal 2012, and \$45.9 million or 10% during fiscal 2012 from \$437.9 million in fiscal 2011. These increases are primarily due to increases in costs associated with compensation and related benefits driven by additional headcount and increased hosting and server costs associated with our subscription and SaaS offerings.

-

Operating expenses of \$3,046.0 million increased by \$306.3 million or 11%, during fiscal 2013, from \$2,739.7 million in fiscal 2012, and \$60.6 million, or 2% in fiscal 2012 from \$2,679.1 million in fiscal 2011. These increases are primarily due to increases in costs associated with compensation and related benefits driven by additional headcount.

Net income of \$290.0 million decreased by \$542.8 million, or 65%, during fiscal 2013 from \$832.8 million in fiscal 2012. The decrease is primarily due to the revenue model becoming more ratable as well as the cost and expense increases stated above. Net income during fiscal 2012 remained stable compared to fiscal 2011.

Table of Contents

Net cash flow from operations of \$1,151.7 million during fiscal 2013 decreased by \$347.9 million, or 23%, as compared to fiscal 2012 primarily due to lower net income as discussed above. Net cash flow from operations during fiscal 2012 remained stable compared to fiscal 2011.

Revenue (dollars in millions)

| | Fiscal 2013 | Fiscal 2012 | Fiscal 2011 | % Change 2013-2012 | % Change 2012-2011 |
|-----------------------------|----------------|----------------|----------------|-----------------------|-----------------------|
| Product | \$2,470.1 | \$3,342.8 | \$3,416.5 | (26)% | (2)% |
| Percentage of total revenue | 61 | % 76 | % 81 | % | |
| Subscription | 1,137.9 | 673.2 | 458.6 | 69 | % 47 |
| Percentage of total revenue | 28 | % 15 | % 11 | % | |
| Services and support | 447.2 | 387.7 | 341.2 | 15 | % 14 |
| Percentage of total revenue | 11 | % 9 | % 8 | % | |
| Total revenue | \$4,055.2 | \$4,403.7 | \$4,216.3 | (8)% | 4 |

As described in Note 18 of our Notes to Consolidated Financial Statements, we have the following segments: Digital Media, Digital Marketing and Print and Publishing.

Our subscription revenue is comprised primarily of fees we charge for our subscription and hosted service offerings including certain of our Adobe Marketing Cloud services and Creative Cloud. We recognize subscription revenue ratably over the term of agreements with our customers, beginning on the commencement of the service. We expect our subscription revenue will continue to increase as a result of our investments in new SaaS and subscription models. We also expect this to increase the amount of recurring revenue we generate as a percent of our total revenue. Of the \$1,137.9 million, \$673.2 million and \$458.6 million in subscription revenue for fiscal 2013, 2012 and 2011, respectively, approximately \$663.1 million, \$553.2 million and \$429.2 million, respectively, is from our Digital Marketing segment, with the remaining amounts substantially representing our Digital Media segment offerings. Our services and support revenue is comprised of consulting, training and maintenance and support, primarily related to the licensing of our enterprise, developer and platform products and the sale of our Adobe Marketing Cloud services. Our support revenue also includes technical support and developer support to partners and developer organizations related to our desktop products. Our maintenance and support offerings, which entitle customers to receive product upgrades and enhancements or technical support, depending on the offering, are generally recognized ratably over the term of the arrangement.

Segments

In fiscal 2013, we categorized our products into the following segments:

Digital Media—Our Digital Media segment provides tools and solutions that enable individuals, small businesses and enterprises to create, publish, promote and monetize their digital content anywhere. Our customers include traditional content creators, web application developers and digital media professionals, as well as their management in marketing departments and agencies, companies and publishers.

Digital Marketing—Our Digital Marketing segment provides solutions and services for how digital advertising and marketing are created, managed, executed, measured and optimized. Our customers include digital marketers, advertisers, publishers, merchandisers, web analysts, chief marketing officers, chief information officers and chief revenue officers.

Print and Publishing—Our Print and Publishing segment addresses market opportunities ranging from the diverse authoring and publishing needs of technical and business publishing to our legacy type and OEM printing businesses.

Fiscal 2013 Revenue Compared to Fiscal 2012 Revenue

Digital Media

Revenue from Digital Media decreased \$476.0 million during fiscal year 2013 as compared to fiscal 2012, primarily due to continued strong adoption of Creative Cloud and ETLAs as we continue to transition more of our business to a subscription-based model.

Revenue related to our creative professional products, which include our Creative Suite editions and CS point products as well as Creative Cloud, decreased during fiscal 2013 as compared to fiscal 2012 due to continued customer adoption of Creative Cloud subscription offerings, released in May 2012. We continue to anticipate accelerated adoption of Creative Cloud for individuals, teams and enterprises, for which revenue is recognized over time, and that this adoption has and will continue to cause our traditional perpetual license revenue to decline.

Revenue associated with our other creative products increased during fiscal 2013 as compared to fiscal 2012, primarily due to increases associated with distribution of third-party software via Flash Player downloads and our Digital Publishing Suite. These increases were partially offset by decreases in revenue associated with our Photoshop Elements family of products.

For our creative offerings, the total number of perpetual units licensed decreased while the number of subscription units licensed increased during fiscal 2013 as compared to fiscal 2012. Unit average selling prices for our perpetual units licensed decreased during the year ended fiscal 2013 as compared to fiscal 2012.

Document Services revenue, which includes our Acrobat product family, decreased slightly during fiscal 2013 as compared to fiscal 2012, primarily due to the continued shift to ETLAs offset by increased Document Exchange Services revenue including revenue generated from our EchoSign e-signing service.

Within Document Services, excluding large enterprise license agreement deals, the number of units licensed decreased while the unit average selling prices increased during fiscal 2013 as compared to fiscal 2012.

Digital Marketing

Revenue from Digital Marketing increased \$143.8 million during fiscal 2013 as compared to fiscal 2012. The increase was primarily due to continued revenue growth associated with our Adobe Marketing Cloud, which increased 26% during fiscal 2013, as compared to the year ago period and includes Adobe Campaign revenue from our recent acquisition of Neolane. The increase noted above was partially offset by expected declines in revenue associated with our legacy products during fiscal 2013.

Print and Publishing

Revenue from Print and Publishing decreased during fiscal 2013 as compared to fiscal 2012, primarily due to increased ETLAs for some products in this group.

Fiscal 2012 Revenue Compared to Fiscal 2011 Revenue

Digital Media

Revenue from Digital Media remained relatively stable during fiscal 2012 as compared to fiscal 2011, due to solid demand for our Acrobat family of products as well as the continued momentum of the CS6 launch in the second quarter of fiscal 2012, offset by better than expected growth associated with our subscription offerings.

Table of Contents

Revenue related to our creative professional products, which included our Creative Suite editions and CS point products as well as Creative Cloud, decreased slightly during fiscal 2012 as compared to fiscal 2011 due to higher than expected customer adoption of Creative Cloud and point product subscriptions. The decreases in revenue associated with our creative professional products were offset in part by growth associated with the May 2012 release of new Photoshop point products for which the previous release occurred in fiscal 2010.

Revenue associated with our other creative products increased during fiscal 2012 as compared to fiscal 2011 primarily due to increases associated with third-party toolbar distribution via Flash Player downloads as well as continued demand related to the May 2012 release of Adobe Lightroom 4.

For our creative offerings, the total number of perpetual units licensed remained relatively stable while the number of subscription units licensed increased during fiscal 2012 as compared to fiscal 2011. Unit average selling prices for our perpetual units licensed decreased during fiscal 2012 as compared to fiscal 2011.

Document Services revenue, which includes our Acrobat product family, also increased during fiscal 2012 as compared to fiscal 2011 primarily due to increased Document Exchange Services revenue including revenue generated from our EchoSign e-signing service and the launch of Adobe Acrobat XI in the fourth quarter of fiscal 2012.

Within Document Services, excluding large enterprise license agreement deals, the number of units licensed remained relatively stable while the unit average selling prices increased for our Acrobat offerings for fiscal 2012 as compared to fiscal 2011.

Digital Marketing

Revenue from Digital Marketing increased \$157.2 million, or 17% during fiscal 2012 when compared to fiscal 2011, primarily due to continued growth of our Adobe Marketing Cloud, which increased 35% year-over-year and includes revenue generated from products associated with our fiscal 2012 acquisition of Efficient Frontier. Also contributing to the growth in revenue was our Adobe Connect hosted offering. As expected, increases in these areas were offset in part by a decrease in revenue associated with Adobe LiveCycle product offerings as we continued to shift our focus to our Adobe Marketing Cloud.

Print and Publishing

Revenue from Print and Publishing remained relatively stable during fiscal 2012 as compared to fiscal 2011 primarily due to decreases in legacy product revenue, offset by increases in fees received for consulting services and royalties related to PostScript products.

Fiscal 2013 Revenue by Geography Compared to Fiscal 2012 Revenue by Geography

Revenue declined across all geographies during fiscal 2013 as compared to fiscal 2012. Revenue in the Americas and APAC decreased during fiscal 2013 due to decreases in Digital Media and Print and Publishing revenue, offset in part by increases in Digital Marketing revenue. Revenue in EMEA decreased during fiscal 2013 due to decreases in Digital Media revenue, offset in part by increases in Digital Marketing and Print and Publishing revenue. Within each geographical region, the fluctuations in revenue by reportable segment were attributable to the factors noted in the segment information above.

Fiscal 2012 Revenue by Geography Compared to Fiscal 2011 Revenue by Geography

Overall revenue for fiscal 2012 increased in the Americas and APAC and declined slightly in EMEA when compared to fiscal 2011. Revenue in the Americas increased during fiscal 2012 primarily due to revenue increases in Digital

Media and Digital Marketing, offset slightly by a decline in Print and Publishing revenue. Despite the launch of CS6 in May 2012, the economic

Table of Contents

conditions in Europe and the weakening of the Euro and British Pound against the U.S. Dollar caused revenue in EMEA to decline slightly during fiscal 2012 compared with fiscal 2011. Revenue in APAC increased across all reportable segments during fiscal 2012 as compared with fiscal 2011. Within each geographical region, the fluctuations in revenue by reportable segment were attributable to the factors noted in the segment information above. Included in the overall change in revenue for fiscal 2013 and fiscal 2012 were impacts associated with foreign currency as shown below. Our currency hedging program is used to mitigate a portion of the foreign currency impact to revenue.

| (in millions) | Fiscal 2013 | Fiscal 2012 | |
|----------------------|---------------------|----------------|---|
| Revenue impact: | Increase/(Decrease) | | |
| EMEA: | | | |
| Euro | \$9.1 | \$(46.9 |) |
| British Pound | (3.9 |) (1.8 |) |
| Other currencies | 0.6 | (1.1 |) |
| Total EMEA | 5.8 | (49.8 |) |
| Japanese Yen | (63.6 |) 6.0 | |
| Other currencies | (5.6 |) 1.5 | |
| Total revenue impact | (63.4 |) (42.3 |) |
| Hedging impact: | | | |
| EMEA | 3.7 | 23.4 | |
| Japanese Yen | 32.3 | 7.3 | |
| Total hedging impact | 36.0 | 30.7 | |
| Total impact | \$(27.4 |) \$(11.6 |) |

During fiscal 2013, the U.S. Dollar generally strengthened against the Japanese Yen and other Asian currencies causing revenue in APAC measured in U.S. Dollar equivalents to decrease compared with the same reporting period last year. This decrease was partially offset by the favorable impact to revenue measured in EMEA currencies as the U.S. Dollar generally weakened against these currencies. Our EMEA and Yen currency hedging programs resulted in hedging gains during fiscal 2013 as noted in the table above.

During fiscal 2012, the U.S. Dollar strengthened against the Euro, British Pound and other EMEA currencies causing revenue in EMEA measured in U.S. Dollar equivalents to decrease compared with the same reporting period last year. This decrease was offset in part by the favorable impact to revenue measured in Japanese Yen and other Asian currencies as the U.S. Dollar weakened against these currencies. Our EMEA and Yen currency hedging programs resulted in hedging gains during fiscal 2012 as noted in the table above.

See Note 18 of our Notes to Consolidated Financial Statements for further geographic information.

Product Backlog

The actual amount of product backlog at any particular time may not be a meaningful indicator of future business prospects. Shippable backlog is comprised of unfulfilled orders, excluding those associated with new product releases, those pending credit review and those not shipped due to the application of our global inventory policy. We had minimal shippable backlog at the end of the fourth quarter of fiscal 2013 and fiscal 2012. We expect that our shippable backlog will continue to be insignificant in future periods.

The deferred revenue balance on our consolidated balance sheet does not represent the total contract value of annual or multi-year, non-cancellable subscription agreements. Unbilled deferred revenue represents expected future billings which are contractually committed under our existing subscription, SaaS and managed services agreements that have not been invoiced and are not recorded in deferred revenue within our financial statements. Our presentation of unbilled deferred revenue backlog may differ from that of other companies in the industry. As of November 29, 2013, we had unbilled deferred revenue backlog of approximately \$1.0 billion.

We expect that the amount of unbilled deferred revenue backlog will change period over period due to certain factors, including the timing and duration of large customer subscription, SaaS and managed service agreements, varying billing cycles of these agreements, the timing of customer renewals, the timing of when unbilled deferred revenue backlog is to be billed, changes

Table of Contents

in customer financial circumstances and foreign currency fluctuations. Additionally, the unbilled deferred revenue backlog for multi-year subscription agreements that are billed annually is typically higher at the beginning of the contract period, lower prior to renewal and increases when the agreement is renewed. Accordingly, fluctuations in unbilled deferred revenue backlog may not be a reliable indicator of future business prospects and the related revenue associated with these contractual commitments.

Cost of Revenue (dollars in millions)

| | Fiscal 2013 | Fiscal 2012 | Fiscal 2011 | % Change 2013-2012 | % Change 2012-2011 |
|-----------------------------|----------------|----------------|----------------|-----------------------|-----------------------|
| Product | \$138.2 | \$121.7 | \$125.7 | 14 | % (3))% |
| Percentage of total revenue | 3 | % 3 | % 3 | % | |
| Subscription | 278.1 | 219.1 | 194.0 | 27 | % 13 % |
| Percentage of total revenue | 7 | % 5 | % 5 | % | |
| Services and support | 170.3 | 143.0 | 118.2 | 19 | % 21 % |
| Percentage of total revenue | 4 | % 3 | % 3 | % | |
| Total cost of revenue | \$586.6 | \$483.8 | \$437.9 | 21 | % 10 % |

Product

Cost of product revenue includes product packaging, third-party royalties, excess and obsolete inventory, amortization related to localization costs, purchased intangibles and acquired rights to use technology and the costs associated with the manufacturing of our products.

Fluctuations in cost of product revenue are due to the following:

| | % Change 2013-2012 | % Change 2012-2011 |
|---|-----------------------|-----------------------|
| Amortization of purchased intangibles and technology license arrangements | 27 | % (1))% |
| Cost of sales | (8 |) (6) |
| Excess and obsolete inventory | (4 |) 2 |
| Various individually insignificant items | (1 |) 2 |
| Total change | 14 | % (3))% |

Cost of product revenue increased during fiscal 2013 as compared to fiscal 2012 primarily due to an increase in amortization of purchased intangibles and technology license arrangements offset by decreases in cost of sales and excess and obsolete inventory. Amortization of purchased intangibles and technology license arrangements increased as we entered into certain technology licensing arrangements totaling \$51.8 million in the first quarter of fiscal 2013. Of this cost, an estimated \$25.3 million was related to future licensing rights and has been capitalized and will be amortized on a straight-line basis over the estimated useful lives ranging from five to ten years. We estimated that the remaining cost of approximately \$26.5 million was related to historical use of licensing rights and was expensed as cost of product revenue in fiscal 2013. In connection with certain of these licensing arrangements, we have the ability to acquire additional rights to use technology in the future. Cost of sales primarily decreased due to the decrease in the number of perpetual units sold and packaging costs associated with our CS6 products. During May 2013, we announced that, while we will continue to offer and support CS6 products, we plan to focus our future creative development efforts on our Creative Cloud offering. Excess and obsolete inventory decreased due to decreased reserve requirements for CS6 as we continue to transition to more of a subscription based model.

Cost of product revenue decreased during fiscal 2012 as compared to fiscal 2011 primarily due to decrease in cost of sales and amortization of purchase intangibles, offset by increases in excess and obsolete inventory. Cost of sales decreased primarily due to a decrease in packaging costs associated with our CS6 products. Amortization of purchased intangibles decreased primarily due to certain intangible assets purchased through our acquisitions in prior years that were fully amortized in fiscal 2012. Excess and obsolete inventory increased primarily due to increased reserve requirements for Adobe Creative Suite 5 and Adobe Creative Suite 5.5 products necessitated by the launch of CS6 in the second quarter of fiscal 2012.

Subscription

Cost of subscription revenue consists of expenses related to operating our network infrastructure, including depreciation expenses and operating lease payments associated with computer equipment, data center costs, salaries and related expenses of network operations, implementation, account management and technical support personnel, amortization of intangible assets and allocated overhead. We enter into contracts with third-parties for the use of their data center facilities and our data center costs largely consist of the amounts we pay to these third-parties for rack space, power and similar items.

Table of Contents

Cost of subscription revenue increased due to the following:

| | % Change 2013-2012 | % Change 2012-2011 | |
|---------------------------------------|-----------------------|-----------------------|---|
| Hosted server costs | 23 | % 7 | % |
| Amortization of purchased intangibles | 4 | 6 | |
| Total change | 27 | % 13 | % |

Cost of subscription revenue increased during fiscal 2013 as compared to fiscal 2012 primarily due to increased hosted server costs and amortization of purchased intangibles. Hosted server costs increased primarily due to increases in data center costs related to higher transaction volumes in our Adobe Marketing Cloud and Creative Cloud services, depreciation expense from higher capital expenditures in prior years and compensation and related benefits driven by additional headcount, including from our acquisition of Neolane in fiscal 2013. Amortization of purchased intangibles increased primarily due to increased amortization of intangible assets purchased associated with our acquisitions of Behance and Neolane in fiscal 2013.

Cost of subscription revenue increased during fiscal 2012 as compared to fiscal 2011 primarily due to increased hosted server costs and amortization of purchased intangibles. Hosted server costs increased primarily due to increases in compensation and related benefits driven by additional headcount and hosting expenses associated with the launch of our Creative Cloud services in the second quarter of fiscal 2012. Also contributing to the increase in hosted server costs is the increase in depreciation expense from higher capital expenditures in prior years and data center costs related to higher transaction volumes in our Adobe Marketing Cloud and Creative Cloud services. Amortization of purchased intangibles increased primarily due to increased amortization of intangible assets associated with our acquisition of Efficient Frontier in the first quarter of fiscal 2012.

Services and Support

Cost of services and support revenue is primarily comprised of employee-related costs and associated costs incurred to provide consulting services, training and product support.

Cost of services and support revenue increased during fiscal 2013 as compared to fiscal 2012 primarily due to increases in third-party fees related to training and consulting services provided to our customers and compensation and related benefits driven by additional headcount, including headcount from our acquisition of Neolane in fiscal 2013.

Cost of services and support revenue increased during fiscal 2012 as compared to fiscal 2011 primarily due to increases in costs associated with compensation and related benefits driven by additional headcount, including headcount from our acquisition of Efficient Frontier.

Operating Expenses (dollars in millions)

| | Fiscal 2013 | Fiscal 2012 | Fiscal 2011 | % Change 2013-2012 | % Change 2012-2011 | |
|---|----------------|----------------|----------------|-----------------------|-----------------------|---|
| Research and development | \$826.6 | \$742.8 | \$738.1 | 11 | % 1 | % |
| Percentage of total revenue | 20 | % 17 | % 18 | % | | |

| Total operating expenses | \$3,046.0 | \$2,739.7 | \$2,679.1 | 11 | % 2 | % |

(*) Percentage is greater than 100%.

Table of Contents

Research and Development, Sales and Marketing and General and Administrative Expenses

The increase in research and development, sales and marketing and general and administrative expenses during fiscal 2013 as compared to fiscal 2012 is primarily due to higher incentive compensation program achievement in fiscal 2013, increases in stock-based compensation expense due to higher share prices during fiscal 2013 as compared to fiscal 2012 as well as a shorter vesting term, which decreased from four years to three years, for stock awards granted as part of our annual review process during the first quarter of fiscal 2013.

Research and Development

Research and development expenses consist primarily of salary and benefit expenses for software developers, contracted development efforts, related facilities costs and expenses associated with computer equipment used in software development.

Research and development expenses increased during fiscal 2013 as compared to fiscal 2012 due to the following:

| | % Change 2013-2012 | |
|--|-----------------------|---|
| Compensation and related benefits associated with headcount | 3 | % |
| Compensation associated with incentive compensation and stock-based compensation | 7 | |
| Various individually insignificant items | 1 | |
| Total change | 11 | % |

Research and development expenses remained relatively stable during fiscal 2012 as compared to fiscal 2011.

We believe that investments in research and development, including the recruiting and hiring of software developers, are critical to remain competitive in the marketplace and are directly related to continued timely development of new and enhanced products. We will continue to focus on long-term opportunities available in our end markets and make significant investments in the development of our application, tool and service offerings.

Sales and Marketing

Sales and marketing expenses consist primarily of salary and benefit expenses, sales commissions, travel expenses and related facilities costs for our sales, marketing, order management and global supply chain management personnel.

Sales and marketing expenses also include the costs of programs aimed at increasing revenue, such as advertising, trade shows, public relations and other market development programs.

Sales and marketing expenses increased due to the following:

| | % Change 2013-2012 | % Change 2012-2011 | |
|--|-----------------------|-----------------------|---|
| Compensation and related benefits associated with headcount | 4 | % 2 | % |
| Marketing spending related to product launches and overall marketing efforts to further increase revenue | — | 2 | |
| Compensation associated with incentive compensation and stock-based compensation | 4 | 3 | |
| Various individually insignificant items | (1 |) 2 | |
| Total change | 7 | % 9 | % |

General and Administrative

General and administrative expenses consist primarily of compensation and benefit expenses, travel expenses and related facilities costs for our finance, facilities, human resources, legal, information services and executive personnel.

General and administrative expenses also include outside legal and accounting fees, provision for bad debts, expenses associated with computer equipment and software used in the administration of the business, charitable contributions and various forms of insurance.

Table of Contents

General and administrative expenses increased due to the following:

| | % Change 2013-2012 | % Change 2012-2011 |
|--|-----------------------|-----------------------|
| Compensation and related benefits associated with headcount growth | 4 | 4 |
| Professional and consulting fees | 7 | (3) |
| Compensation associated with incentive compensation and stock-based compensation | 4 | 1 |
| Charitable contributions | 2 | (1) |
| Various individually insignificant items | 3 | 4 |
| Total change | 20 | 5 |

Professional and consulting fees increased during fiscal 2013 as compared to fiscal 2012 primarily due to increased professional and legal fees including those associated with the attacks on our network discovered in September 2013. Professional and consulting fees decreased during fiscal 2012 as compared to fiscal 2011 primarily due to decreased litigation expense.

Restructuring and Other Charges

During May 2013, we began to actively market the Waltham property assets and we expected to sell the property within one year from management's approval of the plan. We classified the Waltham property assets with a total carrying amount of \$47.4 million as held for sale at \$23.6 million representing their fair value, net of estimated costs to sell which was the lesser of the fair value less cost to sell or carrying amount of the assets. We recorded a write-down of \$23.8 million during the second quarter of fiscal 2013. We ceased recognizing depreciation expense on the Waltham property assets upon reclassification which would have been minimal for fiscal 2013. In September 2013, we finalized the sale of the Waltham property assets for net proceeds of \$24.3 million which approximated the carrying value of the assets at the time of sale.

During the past several years, we have initiated various restructuring plans. During fiscal 2013, in connection with our Fiscal 2011 Restructuring Plan and Other Restructuring Plans, we recorded \$6.3 million associated with termination benefits and closing redundant facilities. We also recorded \$3.0 million in net favorable employee termination and facility related adjustments for changes in previous estimates during the fiscal year. During fiscal 2012, in connection with our Fiscal 2011 Restructuring Plan and Other Restructuring Plans, we recorded \$17.4 million associated with termination benefits and closing redundant facilities. We also recorded \$20.3 million in net favorable employee termination and facility related adjustments for changes in previous estimates during the fiscal year. During fiscal 2011, in connection with our 2011 Restructuring Plan and Other Restructuring Plans, we recorded \$85.6 million associated with termination benefits and closing redundant facilities as well as \$12.7 million related to the write-off of certain assets that were no longer useful to the company based on changes in our business. We also recorded minor favorable adjustments for changes in previous estimates.

See Note 10 of our Notes to Consolidated Financial Statements for further information regarding our restructuring plans.

Amortization of Purchased Intangibles

During the last several years, we have completed a number of business combinations and asset acquisitions including Omniture in fiscal 2009, Day in fiscal 2010, Efficient Frontier in fiscal 2012, and Behance and Neolane in fiscal 2013. As a result of these acquisitions, we purchased intangible assets that are being amortized over their estimated useful lives ranging from one to fourteen years.

Amortization expense increased 7% during fiscal 2013 as compared to fiscal 2012 primarily due to amortization expense associated with intangible assets purchased through our acquisitions of Behance and Neolane in fiscal 2013. Amortization expense increased 14% during fiscal 2012 as compared to fiscal 2011 primarily due to amortization expense associated with intangible assets purchased through our acquisition of Efficient Frontier in fiscal 2012.

Table of Contents

Non-Operating Income (Expense), Net (dollars in millions)

| | Fiscal 2013 | Fiscal 2012 | Fiscal 2011 | % Change 2013-2012 | % Change 2012-2011 |
|---|----------------|----------------|----------------|-----------------------|-----------------------|
| Interest and other income (expense), net | \$4.9 | \$(3.4) | \$(3.0) | * | 13 |
| Percentage of total revenue | ** | ** | ** | | % |
| Interest expense | (67.5) | (67.5) | (67.0) | — | 1 |
| Percentage of total revenue | (2) | (2) | (2) | % | % |
| Investment gains (losses), net | (4.0) | 9.5 | 5.9 | (142) | 61 |
| Percentage of total revenue | ** | ** | ** | | % |
| Total non-operating income (expense), net | \$(66.6) | \$(61.4) | \$(64.1) | 8 | (4) |

(*) Percentage is not meaningful.

(**) Percentage is less than 1%.

Interest and Other Income (Expense), Net

Interest and other income (expense), net consists primarily of interest earned on cash, cash equivalents and short-term fixed income investments. Interest and other income (expense), net also includes gains and losses on fixed income investments and foreign exchange gains and losses other than any gains recorded to revenue from hedging Euro, British Pounds and Yen currencies.

Interest and other income (expense), net increased in net income in fiscal 2013 as compared to fiscal 2012 primarily due to decreased foreign exchange losses.

Interest and other income (expense), net increased in net expense in fiscal 2012 as compared to fiscal 2011 primarily due to lower average interest rates on our investments.

Interest Expense

Interest expense primarily represents interest associated with our senior notes. Interest is payable semi-annually, in arrears, on February 1 and August 1. Interest expense has remained relatively stable for all fiscal years presented.

Investment Gains (Losses), Net

Investment gains (losses), net consists principally of realized gains or losses from the sale of marketable equity investments, other-than-temporary declines in the value of marketable and non-marketable equity securities and unrealized holding gains and losses associated with our deferred compensation plan assets (classified as trading securities) and gains and losses associated with our direct and indirect investments in privately held companies.

Investment gains (losses), net fluctuated due to the following (in millions):

| | Fiscal 2013 | Fiscal 2012 | Fiscal 2011 |
|--|----------------|----------------|----------------|
| Write-downs due to other-than-temporary declines in value of our marketable and non-marketable equity securities | \$(7.0) | \$(0.1) | \$(0.2) |
| Net gains related to our trading securities | 3.0 | 1.6 | — |
| Net gains (losses) related to our direct and indirect investments in privately held companies | — | (0.2) | 5.3 |
| Gains from sale of marketable equity securities | — | 8.2 | 0.8 |
| Total investment gains (losses), net | \$(4.0) | \$9.5 | \$5.9 |

During fiscal 2013, total investment gains (losses), net decreased to net losses primarily due to a decrease in net realized gains from the sale of marketable equity securities and an increase in write-downs for other-than-temporary declines in value of our direct investments in privately held companies.

During fiscal 2012, total investment gains (losses), net improved primarily due to an increase in net realized gains from the sale of marketable equity securities. This was offset in part by a decrease in realized gains related to our direct investments in privately held companies in fiscal 2011 that did not recur during fiscal 2012.

Table of Contents

Provision for Income Taxes (dollars in millions)

| | Fiscal 2013 | Fiscal 2012 | Fiscal 2011 | % Change 2013-2012 | % Change 2012-2011 |
|-----------------------------|----------------|----------------|----------------|-----------------------|-----------------------|
| Provision | \$66.2 | \$286.0 | \$202.4 | (77)% | 41% |
| Percentage of total revenue | 2 | % 6 | % 5 | % | |
| Effective tax rate | 19 | % 26 | % 20 | % | |

Our effective tax rate decreased by approximately seven percentage points during fiscal 2013 as compared to fiscal 2012. The decrease is primarily related to the retroactive reinstatement of the U.S. research and development credit which resulted in the credits for both fiscal 2012 and 2013 being reflected in the fiscal 2013 results.

Our effective tax rate increased by approximately six percentage points during fiscal 2012 as compared to fiscal 2011. The rate increase in fiscal 2012 was primarily related to the expiration of the U.S. research and development credit in fiscal 2011, as well as items in fiscal 2011 including tax benefits associated with a favorable state income tax ruling and tax costs associated with licensing acquired company assets to Adobe's trading companies that were not present in fiscal 2012.

We are a United States-based multinational company subject to tax in multiple U.S. and foreign tax jurisdictions. A significant portion of our foreign earnings for the current fiscal year were earned by our Irish subsidiaries. In addition to providing for U.S. income taxes on earnings from the U.S., we provide for U.S. income taxes on the earnings of foreign subsidiaries unless the subsidiaries' earnings are considered permanently reinvested outside the U.S. While we do not anticipate changing our intention regarding permanently reinvested earnings, if certain foreign earnings previously treated as permanently reinvested are repatriated, the related U.S. tax liability may be reduced by any foreign income taxes paid on these earnings. Currently, there are a significant amount of foreign earnings upon which U.S. income taxes have not been provided.

Accounting for Uncertainty in Income Taxes

The gross liability for unrecognized tax benefits at November 29, 2013 was \$136.1 million, exclusive of interest and penalties. If the total unrecognized tax benefits at November 29, 2013 were recognized in the future, \$125.6 million of unrecognized tax benefits would decrease the effective tax rate, which is net of an estimated \$10.5 million federal benefit related to deducting certain payments on future state tax returns.

As of November 29, 2013, the combined amount of accrued interest and penalties related to tax positions taken on our tax returns was approximately \$11.4 million. This amount is included in non-current income taxes payable.

The timing of the resolution of income tax examinations is highly uncertain as are the amounts and timing of tax payments that are part of any audit settlement process. These events could cause large fluctuations in the balance sheet classification of current and non-current assets and liabilities. We believe that within the next 12 months, it is reasonably possible that either certain audits will conclude or statutes of limitations on certain income tax examination periods will expire, or both. Given the uncertainties described above, we can only determine a range of estimated potential decreases in underlying unrecognized tax benefits ranging from \$0 to approximately \$5 million.

In July 2013, a U.S. income tax examination covering our fiscal years 2008 and 2009 was completed. Our accrued tax and interest related to these years was \$48.4 million and was previously reported in long-term income taxes payable. We settled the tax obligation resulting from this examination with cash and income tax assets totaling \$41.2 million, and the resulting \$7.2 million income tax benefit was recorded in the third quarter of fiscal 2013.

LIQUIDITY AND CAPITAL RESOURCES

This data should be read in conjunction with our Consolidated Statements of Cash Flows.

| (in millions) | As of November 29, 2013 | November 30, 2012 |
|---------------------------|-------------------------------|----------------------|
| Cash and cash equivalents | \$834.6 | \$1,425.1 |
| Short-term investments | \$2,339.2 | \$2,113.3 |
| Working capital | \$2,520.3 | \$3,125.3 |

| | | |
|----------------------|-----------|-----------|
| Stockholders' equity | \$6,724.6 | \$6,665.2 |
|----------------------|-----------|-----------|

50

Table of Contents

A summary of our cash flows is as follows:

| (in millions) | Fiscal 2013 | Fiscal 2012 | Fiscal 2011 |
|--|----------------|----------------|----------------|
| Net cash provided by operating activities | \$1,151.7 | \$1,499.6 | \$1,543.3 |
| Net cash used for investing activities | (1,177.8) |) (834.7 |) (757.4) |
| Net cash used for financing activities | (559.1) |) (234.7 |) (550.4) |
| Effect of foreign currency exchange rates on cash and cash equivalents | (5.2) |) 5.4 | 4.1 |
| Net increase (decrease) in cash and cash equivalents | \$(590.4 |) \$435.6 | \$239.6 |

Our primary source of cash is receipts from revenue. The primary uses of cash are payroll related expenses, general operating expenses including marketing, travel and office rent, and cost of revenue. Other sources of cash are proceeds from the exercise of employee options and participation in the employee stock purchase plan. Other uses of cash include our stock repurchase program, which is described below, business acquisitions and purchases of property and equipment.

Cash Flows from Operating Activities

For fiscal 2013, net cash provided by operating activities of \$1,151.7 million was primarily comprised of net income plus the net effect of non-cash items. The primary working capital sources of cash were net income coupled with increases in deferred revenue and accrued expenses and decreases in trade receivables. Deferred revenue increased primarily due to increased subscription and ETLA activity for our Creative Cloud offering and increases in Digital Marketing hosted services, offset in part by decreases in billings for our maintenance and Creative product software upgrade plans which we discontinued in January 2013. Accrued expenses increased primarily due to amounts due under our fiscal 2013 annual incentive plan and sales commission accruals associated with higher achievement levels. Trade receivables declined primarily due to lower perpetual license revenue levels and improved collections compared to the fourth quarter of fiscal 2012.

The primary working capital uses of cash were decreases in taxes payable and increases in prepaid expenses and other assets. The decrease in taxes payable is largely attributed to tax payments made combined with audit settlement adjustments, offset in part by tax expense and other adjustments during fiscal 2013. Prepaid expenses and other assets increased primarily due to increases in short-term income tax receivables related to the carryback of R&D and foreign tax credits in the fourth quarter of fiscal 2013.

For fiscal 2012, net cash provided by operating activities of \$1,499.6 million was primarily comprised of net income plus the net effect of non-cash items. The primary working capital sources of cash were net income coupled with increases in deferred revenue and decreases in trade receivables. Deferred revenue increased primarily due to an increase in activity for both upgrade plans with support and site and term licenses largely associated with our Digital Media and Digital Marketing enterprise license agreements. The decrease in trade receivables is primarily related to an increase in revenue linearity and improved collections in our Digital Marketing portfolio offset in part by higher revenue levels due to the CS6 product release which occurred late in the second quarter of fiscal 2012.

The primary working capital uses of cash were decreases in accrued restructuring and trade payables. Decreases in accrued restructuring primarily related to payments and adjustments for employee terminations and facility exit costs associated with the Fiscal 2011 Restructuring Plan, a significant portion of which were paid and adjusted in the first and second quarters of fiscal 2012. Trade payables decreased primarily due to the timing of payments as a greater number of invoices were paid prior to the fiscal year end in fiscal 2012 as compared to fiscal 2011.

For fiscal 2011, net cash provided by operating activities of \$1,543.3 million was primarily comprised of net income plus the net effect of non-cash items. The primary working capital sources of cash were net income coupled with increases in deferred revenue and accrued restructuring. Increases in deferred revenue related primarily to an overall increase in billing activity for maintenance and support/upgrade plans, hosted and professional services and site and term licenses. Accrued restructuring increased primarily due to recognition of liabilities related to employee termination and facility exit costs associated with the Fiscal 2011 Restructuring Plan which occurred in the fourth quarter of fiscal 2011 for which a majority was paid and adjusted in the first and second quarters of fiscal 2012.

The primary working capital uses of cash for fiscal 2011 were increases in trade receivables coupled with decreases in accrued expenses and taxes payable. Trade receivables increased primarily as a result of overall higher sales levels and billing occurring during the latter half of the fourth quarter of fiscal 2011, offset in part by an increased rate of collection for Digital Marketing services. Decreases in accrued expenses were primarily related to lower accrued bonus levels in fiscal 2011, coupled with payment of our second and third semi-annual interest payments associated with our Notes totaling \$62.3 million. The resulting reduction in accrued interest was partially offset by additional interest accruals made during the period. Taxes payable decreased

Table of Contents

primarily due to the resolution of a Canadian Tax audit offset in part by quarterly increases to the tax provision in excess of taxes paid.

Cash Flows from Investing Activities

For fiscal 2013, net cash used for investing activities of \$1,177.8 million was primarily due to our acquisitions of Neolane and Behance. Other uses of cash during fiscal 2013 represented purchases of short-term investments, purchases of property and equipment associated with our construction projects in Oregon and India and purchases of long-term technology licenses. These cash outflows were offset in part by sales and maturities of short-term investments and the sale of the Waltham Property. See Note 2 of our Notes to the Consolidated Financial Statements for further information regarding our acquisitions of Neolane and Behance.

For fiscal 2012, net cash used for investing activities of \$834.7 million was primarily due to our acquisition of Efficient Frontier in the first quarter of fiscal 2012. Other uses of cash during fiscal 2012 represented purchases of short-term investments and property and equipment, offset in part by sales and maturities of short-term investments. See Note 2 of our Notes to the Consolidated Financial Statements for further information regarding our acquisition of Efficient Frontier.

For fiscal 2011, net cash used for investing activities of \$757.4 million was primarily due to purchases of short-term investments and multiple business acquisitions, offset in part by maturities and sales of short-term investments. Other uses of cash during fiscal 2011 represented purchases of property, plant and equipment and long-term investments, intangibles and other assets.

Cash Flows from Financing Activities

For fiscal 2013, fiscal 2012 and fiscal 2011, net cash used for financing activities of \$559.1 million, \$234.7 million and \$550.4 million, respectively, was primarily due to treasury stock repurchases offset in part by proceeds from our treasury stock issuances. See the section titled “Stock Repurchase Program” discussed below.

We expect to continue our investing activities, including short-term and long-term investments, venture capital, facilities expansion and purchases of computer systems for research and development, sales and marketing, product support and administrative staff. Furthermore, cash reserves may be used to repurchase stock under our stock repurchase program and to strategically acquire companies, products or technologies that are complementary to our business.

Restructuring

During the past several years, we have initiated various restructuring plans. Currently, we have two active restructuring plans that were of significance to us:

Fiscal 2011 Restructuring Plan

Fiscal 2009 Restructuring Plan

As of November 29, 2013, we have accrued total restructuring charges of \$13.9 million of which approximately \$11.7 million relates to cost of closing redundant facilities and are expected to be paid under contract through fiscal 2021. Approximately 54% of these facility closing costs will be paid through 2015. During fiscal 2013, we made payments related to the above restructuring plans totaling \$10.3 million which consisted of \$1.3 million and \$9.0 million in payments related to termination benefits and contract terminations and the closing of redundant facilities, respectively. As of November 30, 2012, we accrued total restructuring charges of \$21.6 million of which \$2.3 million related to ongoing termination benefits and contract terminations. The remaining accrued restructuring charges of \$19.3 million related to the cost of closing redundant facilities. During fiscal 2012, we made payments related to restructuring plans totaling \$63.1 million which consisted of \$50.5 million and \$12.6 million in payments related to termination benefits and contract terminations and the closing of redundant facilities, respectively.

We believe that our existing cash and cash equivalents, short-term investments and cash generated from operations will be sufficient to meet the cash outlays for the restructuring actions described above.

See Note 10 of our Notes to Consolidated Financial Statements for additional information regarding our restructuring plans.

Other Liquidity and Capital Resources Considerations

Our existing cash, cash equivalents and investment balances may fluctuate during fiscal 2014 due to changes in our planned cash outlay, including changes in incremental costs such as direct and integration costs related to our business acquisitions. Our cash and investments totaled \$3.2 billion as of November 29, 2013. Of this amount, approximately 80% was held by our foreign

Table of Contents

subsidiaries and subject to material repatriation tax effects. Our intent is to permanently reinvest a significant portion of our earnings from foreign operations, and current plans do not anticipate that we will need funds generated from foreign operations to fund our domestic operations. In the event funds from foreign operations are needed to fund operations in the United States and if U.S. tax has not already been previously provided, we would provide for and pay additional U.S. taxes in connection with repatriating these funds.

Cash from operations could also be affected by various risks and uncertainties, including, but not limited to the risks detailed in Part I, Item 1A titled “Risk Factors”. However, based on our current business plan and revenue prospects, we believe that our existing balances, our anticipated cash flows from operations and our available credit facility will be sufficient to meet our working capital and operating resource expenditure requirements for the next twelve months. As of November 29, 2013, the amount outstanding under our senior notes was \$1.5 billion. On March 2, 2012, we entered into a five-year \$1.0 billion senior unsecured revolving credit agreement (the “Credit Agreement”), providing for loans to us and certain of our subsidiaries. On March 1, 2013, we exercised our option under the Credit Agreement to extend the maturity date of the Credit Agreement by one year to March 2, 2018. As of November 29, 2013, there were no outstanding borrowings under this Credit Agreement and the entire \$1.0 billion credit line remains available for borrowing.

We use professional investment management firms to manage a large portion of our invested cash. External investment firms managed, on average, 77% of our consolidated invested balances during fiscal 2013. The fixed income portfolio is primarily invested in corporate bonds and commercial paper, U.S. agency securities and U.S. Treasury securities, municipal securities and foreign government securities.

In September 2013, we finalized the sale of the Waltham property assets for net proceeds of \$24.3 million. The sale price, net of costs to sell, approximated the carrying value of the assets at the time of sale. See Note 6 for further details regarding our assets held for sale.

Stock Repurchase Program

We currently have authority granted by our Board of Directors to repurchase up to \$2.0 billion in common stock through the end of fiscal 2015. The new stock repurchase program approved by our Board of Directors is similar to our previous \$1.6 billion stock repurchase program authorized by the Board of Directors in fiscal 2010.

During fiscal 2013, 2012 and 2011, we entered into several structured stock repurchase agreements with large financial institutions, whereupon we provided them with prepayments totaling \$1.1 billion, \$405.0 million and \$695.0 million, respectively. The \$1.1 billion prepayments during fiscal 2013 were under the \$2.0 billion stock repurchase authority. Of the \$405.0 million of prepayments during fiscal 2012, \$100.0 million were under the \$2.0 billion stock repurchase program and the remaining \$305.0 million were under our previous \$1.6 billion stock repurchase authority. The \$695.0 million of prepayments during fiscal 2011 were under the \$1.6 billion stock repurchase authority. We enter into these agreements in order to take advantage of repurchasing shares at a guaranteed discount to the Volume Weighted Average Price (“VWAP”) of our common stock over a specified period of time. We only enter into such transactions when the discount that we receive is higher than the foregone return on our cash prepayments to the financial institutions. There were no explicit commissions or fees on these structured repurchases. Under the terms of the agreements, there is no requirement for the financial institutions to return any portion of the prepayment to us. The financial institutions agree to deliver shares to us at monthly intervals during the contract term. The parameters used to calculate the number of shares deliverable are: the total notional amount of the contract, the number of trading days in the contract, the number of trading days in the interval and the average VWAP of our stock during the interval less the agreed upon discount. During fiscal 2013, we repurchased approximately 21.6 million shares at an average price of \$46.47 through structured repurchase agreements entered into during fiscal 2013 and fiscal 2012. During fiscal 2012, we repurchased approximately 11.5 million shares at an average price of \$32.29 through structured repurchase agreements entered into during fiscal 2012. During fiscal 2011, we repurchased approximately 21.8 million shares at an average price per share of \$31.81 through structured repurchase agreements entered into during fiscal 2011.

For fiscal 2013, 2012 and 2011, the prepayments were classified as treasury stock on our Consolidated Balance Sheets at the payment date, though only shares physically delivered to us by November 29, 2013, November 30, 2012 and December 2, 2011 were excluded from the computation of earnings per share. As of November 29, 2013, \$129.2

million of prepayments remained under the agreement.

Subsequent to November 29, 2013, as part of our \$2.0 billion stock repurchase program, we entered into a structured stock repurchase agreement with a large financial institution whereupon we provided them with a prepayment of \$200.0 million. This amount will be classified as treasury stock on our Consolidated Balance Sheets. Upon completion of the \$200.0 million stock

Table of Contents

repurchase agreement, \$600.0 million remains under our current authority. See Note 13 of our Notes to Consolidated Financial Statements for further discussion of our stock repurchase programs.

See Item 5, Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities for share repurchases during the quarter ended November 29, 2013.

Summary of Stock Repurchases for Fiscal 2013, 2012 and 2011

(in thousands, except average amounts)

| Board Approval Date | Repurchases Under the Plan | 2013 Shares | Average | 2012 Shares | Average | 2011 Shares | Average |
|---------------------|---------------------------------------|-------------|---------|-------------|---------|-------------|---------|
| December 1997 | From employees ⁽¹⁾ | — | \$— | | | 1 | \$33.57 |
| | Structured repurchases ⁽²⁾ | — | \$— | — | \$— | — | \$— |
| June 2010 | Structured repurchases ⁽²⁾ | — | \$— | 9,482 | \$32.17 | 21,849 | \$31.81 |
| April 2012 | Structured repurchases ⁽²⁾ | 21,603 | \$46.47 | 2,038 | \$32.87 | — | \$— |
| Total shares | | 21,603 | \$46.47 | 11,520 | \$32.29 | 21,850 | \$31.81 |
| Total cost | | \$1,003,794 | | \$371,995 | | \$695,015 | |

(1) The repurchases from employees represent shares canceled when surrendered in lieu of cash payments for the option exercise price or withholding taxes due.

(2) Stock repurchase agreements executed with large financial institutions. See Stock Repurchase Program above.

Off-Balance Sheet Arrangements and Aggregate Contractual Obligations

Our principal commitments as of November 29, 2013 consist of obligations under operating leases, capital leases, royalty agreements and various service agreements. See Note 15 of our Notes to Consolidated Financial Statements for additional information regarding our contractual commitments.

Contractual Obligations

The following table summarizes our contractual obligations as of November 29, 2013 (in millions):

| | Payment Due by Period | | | | |
|-----------------------------|-----------------------|------------------|-----------|-----------|-------------------|
| | Total | Less than 1 year | 1-3 years | 3-5 years | More than 5 years |
| Notes | \$1,807.2 | \$62.3 | \$695.3 | \$85.5 | \$964.1 |
| Operating lease obligations | 214.1 | 47.2 | 62.8 | 43.7 | 60.4 |
| Capital lease obligations | 18.2 | 14.9 | 3.3 | — | — |
| Purchase obligations | 498.3 | 390.8 | 80.8 | 16.7 | 10.0 |
| Total | \$2,537.8 | \$515.2 | \$842.2 | \$145.9 | \$1,034.5 |

Senior Notes

In February 2010, we issued \$600.0 million of 3.25% senior notes due February 1, 2015 and \$900.0 million of 4.75% senior notes due February 1, 2020. Interest on the Notes is payable semi-annually, in arrears on February 1 and August 1, commencing on August 1, 2010. During fiscal 2013 interest payments totaled \$62.3 million. At November 29, 2013, our maximum commitment for interest payments under the Notes was \$307.1 million.

Capital Lease Obligation

In the first quarter of fiscal 2013, we entered into a sale-leaseback agreement totaling \$25.7 million over a period of 24 months. This transaction was classified as a capital lease obligation and was recorded at fair value.

Covenants

Our credit facility contains a financial covenant requiring us not to exceed a maximum leverage ratio. Our Almaden Tower lease includes certain financial ratios as defined in the lease agreements that are reported to the lessors quarterly. As of November 29, 2013, we were in compliance with all of our covenants. We believe these covenants will not impact our credit or cash in the coming fiscal year or restrict our ability to execute our business plan. Our Notes do not contain any financial covenants.

Table of Contents

Under the terms of our credit agreement and lease agreements, we are not prohibited from paying cash dividends unless payment would trigger an event of default or one currently exists. We do not anticipate paying any cash dividends in the foreseeable future.

Accounting for Uncertainty in Income Taxes

The gross liability for unrecognized tax benefits at November 29, 2013 was \$136.1 million, exclusive of interest and penalties.

The timing of the resolution of income tax examinations is highly uncertain as are the amounts and timing of tax payments that are part of any audit settlement process. These events could cause large fluctuations in the balance sheet classification of current and non-current assets and liabilities. We believe that within the next 12 months, it is reasonably possible that either certain audits will conclude or statutes of limitations on certain income tax examination periods will expire, or both. Given the uncertainties described above, we can only determine a range of estimated potential decreases in underlying unrecognized tax benefits ranging from \$0 to approximately \$5 million.

Royalties

We have certain royalty commitments associated with the shipment and licensing of certain products. Royalty expense is generally based on a dollar amount per unit shipped or a percentage of the underlying revenue.

Indemnifications

In the normal course of business, we provide indemnifications of varying scope to customers against claims of intellectual property infringement made by third parties arising from the use of our products and from time to time, we are subject to claims by our customers under these indemnification provisions. Historically, costs related to these indemnification provisions have not been significant and we are unable to estimate the maximum potential impact of these indemnification provisions on our future results of operations.

To the extent permitted under Delaware law, we have agreements whereby we indemnify our directors and officers for certain events or occurrences while the director or officer is or was serving at our request in such capacity. The indemnification period covers all pertinent events and occurrences during the director's or officer's lifetime. The maximum potential amount of future payments we could be required to make under these indemnification agreements is unlimited; however, we have director and officer insurance coverage that limits our exposure and enables us to recover a portion of any future amounts paid.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

All market risk sensitive instruments were entered into for non-trading purposes.

Foreign Currency Risk**Foreign Currency Exposures and Hedging Instruments**

In countries outside the U.S., we transact business in U.S. Dollars and various other currencies which subject us to exposure from movements in exchange rates. We may use foreign exchange purchased options or forward contracts to hedge our foreign currency revenue denominated in Euro, British Pounds and Yen. Additionally, we hedge our net recognized foreign currency assets and liabilities with foreign exchange forward contracts. We hedge these exposures to reduce the risk that our earnings and cash flows will be adversely affected by changes in exchange rates.

Our revenue exposures for fiscal 2013, 2012 and 2011 were as follows (in millions, except Yen):

| | Fiscal 2013 | Fiscal 2012 | Fiscal 2011 |
|-------------------|----------------|----------------|----------------|
| Euro | €434.7 | €530.7 | €557.6 |
| Yen (in billions) | ¥32.5 | ¥34.8 | ¥34.7 |
| British Pounds | £145.3 | £145.1 | £144.8 |

Table of Contents

As of November 29, 2013, the total absolute value of all outstanding foreign exchange contracts, including options and forwards, was \$718.5 million which included the notional equivalent of \$312.7 million in Euros, \$104.2 million in British Pounds, \$169.8 million in Yen and \$131.8 million in other foreign currencies. As of November 29, 2013, all contracts were set to expire at various dates through June 2014. The bank counterparties in these contracts expose us to credit-related losses in the event of their nonperformance. However, to mitigate that risk, we only contract with counterparties who meet our minimum requirements under our counterparty risk assessment process. In addition, our hedging policy establishes maximum limits for each counterparty.

A sensitivity analysis was performed on all of our foreign exchange derivatives as of November 29, 2013. This sensitivity analysis measures the hypothetical market value resulting from a 10% shift in the value of exchange rates relative to the U.S. Dollar. For option contracts, the Black-Scholes option pricing model was used. A 10% increase in the value of the U.S. Dollar and a corresponding decrease in the value of the hedged foreign currency asset would lead to an increase in the fair value of our financial hedging instruments by \$34.6 million. Conversely, a 10% decrease in the value of the U.S. Dollar would result in a decrease in the fair value of these financial instruments by \$9.3 million. As a general rule, we do not use foreign exchange contracts to hedge local currency denominated operating expenses in countries where a natural hedge exists. For example, in many countries, revenue in the local currencies substantially offsets the local currency denominated operating expenses.

We also have long-term investment exposures consisting of the capitalization and retained earnings in our non-USD functional currency foreign subsidiaries. As of November 29, 2013 and November 30, 2012, this long-term investment exposure totaled a notional equivalent of \$355.6 million and \$419.6 million, respectively. At this time, we do not hedge these long-term investment exposures.

We do not use foreign exchange contracts for speculative trading purposes, nor do we hedge our foreign currency exposure in a manner that entirely offsets the effects of changes in foreign exchange rates. We regularly review our hedging program and assess the need to utilize financial instruments to hedge currency exposures on an ongoing basis.

Economic Hedging—Hedges of Forecasted Transactions

We may use foreign exchange purchased options or forward contracts to hedge foreign currency revenue denominated in Euros, British Pounds and Yen. We hedge these cash flow exposures to reduce the risk that our earnings and cash flows will be adversely affected by changes in exchange rates. These foreign exchange contracts, carried at fair value, may have maturities between one and twelve months. We enter into these foreign exchange contracts to hedge forecasted revenue in the normal course of business and accordingly, they are not speculative in nature.

We record changes in the intrinsic value of these cash flow hedges in accumulated other comprehensive income, until the forecasted transaction occurs. When the forecasted transaction occurs, we reclassify the related gain or loss on the cash flow hedge to revenue. In the event the underlying forecasted transaction does not occur, or it becomes probable that it will not occur, we reclassify the gain or loss on the related cash flow hedge from accumulated other comprehensive income to interest and other income, net on our Consolidated Statements of Income at that time. For the fiscal year ended November 29, 2013, net gains or losses recognized in other income relating to hedges of forecasted transactions that did not occur were insignificant.

See Note 5 of our Notes to Consolidated Financial Statements for information regarding our hedging activities.

Balance Sheet Hedging—Hedging of Foreign Currency Assets and Liabilities

We hedge exposures related to our net recognized foreign currency assets and liabilities with foreign exchange forward contracts to reduce the risk that our earnings and cash flows will be adversely affected by changes in foreign currency exchange rates. These foreign exchange contracts are carried at fair value with changes in the fair value recorded as interest and other income, net. These foreign exchange contracts do not subject us to material balance sheet risk due to exchange rate movements because gains and losses on these contracts are intended to offset gains and losses on the assets and liabilities being hedged. At November 29, 2013, the outstanding balance sheet hedging derivatives had maturities of 180 days or less.

See Note 5 of our Notes to Consolidated Financial Statements for information regarding our hedging activities.

Table of Contents

Interest Rate Risk

Short-Term Investments and Fixed Income Securities

At November 29, 2013, we had debt securities classified as short-term investments of \$2.3 billion. Changes in interest rates could adversely affect the market value of these investments. The following table separates these investments, based on stated maturities, to show the approximate exposure to interest rates (in millions):

| | |
|------------------------|-----------|
| Due within one year | \$509.4 |
| Due within two years | 908.8 |
| Due within three years | 702.0 |
| Due after three years | 218.3 |
| Total | \$2,338.5 |

A sensitivity analysis was performed on our investment portfolio as of November 29, 2013. The analysis is based on an estimate of the hypothetical changes in market value of the portfolio that would result from an immediate parallel shift in the yield curve of various magnitudes.

The following tables present the hypothetical fair values of our debt securities classified as short-term investments assuming immediate parallel shifts in the yield curve of 50 basis points ("BPS"), 100 BPS and 150 BPS. The analysis is shown as of November 29, 2013 and November 30, 2012 (dollars in millions):

| -150 BPS | -100 BPS | -50 BPS | Fair Value 11/29/13 | +50 BPS | +100 BPS | +150 BPS |
|----------|----------|---------|------------------------|---------|----------|----------|
| 2,363.7 | 2,360.9 | 2,353.8 | 2,338.5 | 2,320.5 | 2,302.5 | 2,284.5 |
| -150 BPS | -100 BPS | -50 BPS | Fair Value 11/30/12 | +50 BPS | +100 BPS | +150 BPS |
| 2,138.4 | 2,136.6 | 2,129.3 | 2,113.1 | 2,094.6 | 2,076.5 | 2,058.5 |

Other Market Risk

Privately Held Long-Term Investments

The privately held companies in which we invest can still be considered in the start-up or development stages which are inherently risky. The technologies or products these companies have under development are typically in the early stages and may never materialize, which could result in a loss of a substantial part of our initial investment in these companies. The evaluation of privately held companies is based on information that we request from these companies, which is not subject to the same disclosure regulations as U.S. publicly traded companies, and as such, the basis for these evaluations is subject to the timing and accuracy of the data received from these companies.

Marketable Equity Securities

We have minimal exposure to equity price risk on our portfolio of marketable equity securities. As of November 29, 2013 and November 30, 2012, our total equity holdings in publicly traded companies were insignificant.

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

Operations

Founded in 1982, Adobe Systems Incorporated is one of the largest and most diversified software companies in the world. We offer a line of products and services used by creative professionals, marketers, knowledge workers, application developers, enterprises and consumers for creating, managing, delivering, measuring, optimizing and engaging with compelling content and experiences across multiple operating systems, devices and media. We market and license our products and services directly to enterprise customers through our sales force and to end-users through app stores and our own website at www.adobe.com. We also distribute our products and services through a network of distributors, value-added resellers (“VARs”), systems integrators, independent software vendors (“ISVs”), retailers and original equipment manufacturers (“OEMs”). In addition, we license our technology to hardware manufacturers, software developers and service providers for use in their products and solutions. We offer some of our products via a Software-as-a-Service (“SaaS”) model or a managed services model (both of which are referred to as a hosted or cloud-based model) as well as through term subscription and pay-per-use models. Our products run on personal and server-based computers, as well as on smartphones, tablets and other devices, depending on the product. We have operations in the Americas, Europe, Middle East and Africa (“EMEA”) and Asia-Pacific (“APAC”).

Basis of Presentation

The accompanying Consolidated Financial Statements include those of Adobe and its subsidiaries, after elimination of all intercompany accounts and transactions. We have prepared the accompanying Consolidated Financial Statements in accordance with accounting principles generally accepted in the United States of America (“GAAP”) and pursuant to the rules and regulations of the United States Securities and Exchange Commission (the “SEC”).

Use of Estimates

In preparing Consolidated Financial Statements and related disclosures in conformity with GAAP and pursuant to the rules and regulations of the SEC, we must make estimates and judgments that affect the amounts reported in the Consolidated Financial Statements and accompanying notes. Estimates are used for, but not limited to sales allowances and programs, bad debts, stock-based compensation, determining the fair value of acquired assets and assumed liabilities, excess inventory and purchase commitments, restructuring charges, facilities lease losses, impairment of goodwill and intangible assets, litigation, income taxes and investments. Actual results may differ materially from these estimates.

Fiscal Year

Our fiscal year is a 52- or 53-week year that ends on the Friday closest to November 30. Fiscal 2013, 2012 and 2011 were 52-week years.

Reclassification

Certain prior year amounts have been reclassified to conform to current year presentation in the Consolidated Balance Sheets.

Significant Accounting Policies

Revenue Recognition

Our revenue is derived from the licensing of perpetual, time-based, and subscription software products, associated software maintenance and support plans, non-software related hosting services, consulting services, training and technical support.

We recognize revenue when all four revenue recognition criteria have been met: persuasive evidence of an arrangement exists, we have delivered the product or performed the service, the fee is fixed or determinable and collection is probable. Determining whether and when some of these criteria have been satisfied often involves assumptions and judgments that can have a significant impact on the timing and amount of revenue we report.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Multiple Element Arrangements

We enter into multiple element revenue arrangements in which a customer may purchase a combination of software, upgrades, maintenance and support, hosting services, and consulting.

For our software and software-related multiple element arrangements, we must: (1) determine whether and when each element has been delivered; (2) determine whether undelivered products or services are essential to the functionality of the delivered products and services; (3) determine the fair value of each undelivered element using vendor-specific objective evidence (“VSOE”), and (4) allocate the total price among the various elements. VSOE of fair value is used to allocate a portion of the price to the undelivered elements and the residual method is used to allocate the remaining portion to the delivered elements. Absent VSOE, revenue is deferred until the earlier of the point at which VSOE of fair value exists for any undelivered element or until all elements of the arrangement have been delivered. However, if the only undelivered element is maintenance and support, the entire arrangement fee is recognized ratably over the performance period. Changes in assumptions or judgments or changes to the elements in a software arrangement could cause a material increase or decrease in the amount of revenue that we report in a particular period.

We determine VSOE for each element based on historical stand-alone sales to third parties or from the stated renewal rate for the elements contained in the initial arrangement. In determining VSOE, we require that a substantial majority of the selling prices for a product or service fall within a reasonably narrow pricing range.

We have established VSOE for our software maintenance and support services, custom software development services, consulting services and training.

For multiple-element arrangements containing our non-software services, we must: (1) determine whether and when each element has been delivered; (2) determine fair value of each element using the selling price hierarchy of VSOE of selling price, third-party evidence (“TPE”) of selling price or best-estimated selling price (“BESP”), as applicable; and (3) allocate the total price among the various elements based on the relative selling price method.

For multiple-element arrangements that contain both software and non-software elements, we allocate revenue to software or software-related elements as a group and any non-software elements separately based on the selling price hierarchy. We determine the selling price for each deliverable using VSOE of selling price, if it exists, or TPE of selling price. If neither VSOE nor TPE of selling price exist for a deliverable, we use BESP. Once revenue is allocated to software or software-related elements as a group, we recognize revenue in conformance with software revenue accounting guidance. Revenue is recognized when revenue recognition criteria are met for each element.

We are generally unable to establish VSOE or TPE for non-software elements and as such, we use BESP. BESP is generally used for offerings that are not typically sold on a stand-alone basis or for new or highly customized offerings. We determine BESP for a product or service by considering multiple factors including, but not limited to major product groupings, geographies, market conditions, competitive landscape, internal costs, gross margin objectives and pricing practices. Pricing practices taken into consideration include historic contractually stated prices, volume discounts where applicable and our price lists. We must estimate certain royalty revenue amounts due to the timing of securing information from our customers. While we believe we can make reliable estimates regarding these matters, these estimates are inherently subjective. Accordingly, our assumptions and judgments regarding future products and services as well as our estimates of royalty revenue could differ from actual events, thus materially impacting our financial position and results of operations.

Product Revenue

We recognize our product revenue upon shipment, provided all other revenue recognition criteria have been met. Our desktop application product revenue from distributors is subject to agreements allowing limited rights of return, rebates and price protection. Our direct sales and OEM sales are also subject to limited rights of return. Accordingly,

we reduce revenue recognized for estimated future returns, price protection and rebates at the time the related revenue is recorded. The estimates for returns are adjusted periodically based upon historical rates of returns, inventory levels in the distribution channel and other related factors.

We record the estimated costs of providing free technical phone support to customers for our software products.

We recognize OEM licensing revenue, primarily royalties, when OEMs ship products incorporating our software, provided collection of such revenue is deemed probable. For certain OEM customers, we must estimate royalty revenue due to the timing

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

of securing customer information. This estimate is based on a combination of our generated forecasts and actual historical reporting by our OEM customers. To substantiate our ability to estimate revenue, we review license royalty revenue reports ultimately received from our significant OEM customers in comparison to the amounts estimated in the prior period.

Our product-related deferred revenue includes maintenance upgrade revenue and customer advances under OEM license agreements. Our maintenance upgrade revenue for our desktop application products is included in our product revenue line item as the maintenance primarily entitles customers to receive product upgrades. In cases where we provide a specified free upgrade to an existing product, we defer the fair value for the specified upgrade right until the future obligation is fulfilled or when the right to the specified free upgrade expires.

Subscription and Services and Support Revenue

We recognize revenue for hosting services that are based on a committed number of transactions, ratably beginning on the date the customer commences use of our services and continuing through the end of the customer term.

Over-usage fees, and fees billed based on the actual number of transactions from which we capture data, are billed in accordance with contract terms as these fees are incurred. We record amounts that have been invoiced in accounts receivable and in deferred revenue or revenue, depending on whether all revenue recognition criteria have been met.

Our services and support revenue is composed of consulting, training and maintenance and support, primarily related to the licensing of our Enterprise and Mobile and Device Solutions products. Our support revenue also includes technical support and developer support to partners and developer organizations related to our desktop products.

Our consulting revenue is recognized using a time and materials basis and is measured monthly based on input measures, such as hours incurred to date, with consideration given to output measures, such as contract milestones when applicable.

Our maintenance and support offerings, which entitle customers to receive product upgrades and enhancements on a when and if available basis or technical support, depending on the offering, are recognized ratably over the performance period of the arrangement.

Our software subscription offerings, which may include product upgrades and enhancements on a when and if available basis, hosted services, and online storage are generally offered to our customers over a specified period of time and we recognize revenue associated with these arrangements ratably over the subscription period.

Rights of Return, Rebates and Price Protection

As discussed above, we offer limited rights of return, rebates and price protection of our products under various policies and programs with our distributors, resellers and/or end-user customers. We estimate and record reserves for these programs as an offset to revenue and accounts receivable. Below is a summary of each of the general provisions in our contracts:

Distributors are allowed limited rights of return of products purchased during the previous quarter. In addition, distributors are allowed to return products that have reached the end of their lives and products that are being replaced by new versions.

We offer rebates to our distributors, resellers and/or end user customers. The amount of revenue that is reduced for distributor and reseller rebates is based on actual performance against objectives set forth by us for a particular reporting period (volume, timely reporting, etc.). If mail-in or other promotional rebates are offered, the amount of revenue reduced is based on the dollar amount of the rebate, taking into consideration an estimated redemption rate calculated using historical trends.

From time to time, we may offer price protection to our distributors that allow for the right to a credit if we permanently reduce the price of a software product. The amount of revenue that is reduced for price protection is calculated as the difference between the old and new price of a software product on inventory held by the distributor prior to the effective date of the decrease.

Although our subscription contracts are generally non-cancelable, a limited number of customers have the right to cancel their contracts by providing prior written notice to us of their intent to cancel the remainder of the contract term. In the event a customer cancels its contract, they are not entitled to a refund for prior services we have provided to them.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

On a quarterly basis, the amount of revenue that is reserved for future returns is calculated based on our historical trends and data specific to each reporting period. We review the actual returns evidenced in prior quarters as a percent of revenue to determine a historical returns rate. We then apply the historical rate to the current period revenue as a basis for estimating future returns. When necessary, we also provide a specific returns reserve for product in the distribution channel in excess of estimated requirements. This estimate can be affected by the amount of a particular product in the channel, the rate of sell-through, product plans and other factors.

Revenue Reserve

Revenue reserve rollforward (in thousands):

| | 2013 | 2012 | 2011 |
|---------------------------|------------|------------|------------|
| Beginning balance | \$57,058 | \$60,887 | \$49,426 |
| Amount charged to revenue | 74,031 | 170,839 | 162,491 |
| Actual returns | (102,425) | (174,668) | (151,030) |
| Ending balance | \$28,664 | \$57,058 | \$60,887 |

Deferred Revenue

Deferred revenue consists substantially of payments received in advance of revenue recognition for our products and services described above. We recognize deferred revenue as revenue only when the revenue recognition criteria are met.

Allowance for Doubtful Accounts

We maintain an allowance for doubtful accounts which reflects our best estimate of potentially uncollectible trade receivables. The allowance is based on both specific and general reserves. We regularly review our trade receivables allowances by considering such factors as historical experience, credit-worthiness, the age of the trade receivable balances and current economic conditions that may affect a customer's ability to pay and we specifically reserve for those deemed uncollectible.

| (in thousands) | 2013 | 2012 | 2011 |
|-------------------------------|----------|----------|----------|
| Beginning balance | \$12,643 | \$15,080 | \$15,233 |
| Increase due to acquisition | 1,038 | 325 | 269 |
| Charged to operating expenses | 933 | 3,356 | 6,271 |
| Deductions ⁽¹⁾ | (4,386) | (6,118) | (6,693) |
| Ending balance | \$10,228 | \$12,643 | \$15,080 |

(1) Deductions related to the allowance for doubtful accounts represent amounts written off against the allowance, less recoveries.

Property and Equipment

We record property and equipment at cost less accumulated depreciation and amortization. Property and equipment are depreciated using the straight-line method over their estimated useful lives ranging from 1 to 5 years for computers and equipment as well as server hardware under capital leases, 1 to 6 years for furniture and fixtures and up to 35 years for buildings. Leasehold improvements are amortized using the straight-line method over the lesser of the remaining respective lease term or estimated useful lives ranging from 1 to 15 years.

Goodwill, Purchased Intangibles and Other Long-Lived Assets

Goodwill is assigned to one or more reporting segments on the date of acquisition. We evaluate goodwill for impairment by comparing the fair value of each of our reporting segments to its carrying value, including the associated goodwill. To determine the fair values, we use the market approach based on comparable publicly traded companies in similar lines of businesses and the income approach based on estimated discounted future cash flows. Our cash flow assumptions consider historical and forecasted revenue, operating costs and other relevant factors.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

We review our goodwill for impairment annually, or more frequently, if facts and circumstances warrant a review. We completed our annual impairment test in the second quarter of fiscal 2013. We elected to use the Step 1 quantitative assessment for our three reporting units—Digital Media, Digital Marketing and Print and Publishing—and determined that there was no impairment of goodwill. There is no significant risk of material goodwill impairment in any of our reporting units, based upon the results of our annual goodwill impairment test.

We amortize intangible assets with finite lives over their estimated useful lives and review them for impairment whenever an impairment indicator exists. We continually monitor events and changes in circumstances that could indicate carrying amounts of our long-lived assets, including our intangible assets may not be recoverable. When such events or changes in circumstances occur, we assess recoverability by determining whether the carrying value of such assets will be recovered through the undiscounted expected future cash flows. If the future undiscounted cash flows are less than the carrying amount of these assets, we recognize an impairment loss based on any excess of the carrying amount over the fair value of the assets. We did not recognize any intangible asset impairment charges in fiscal 2013, 2012 or 2011.

Our intangible assets are amortized over their estimated useful lives of 1 to 14 years. Amortization is based on the pattern in which the economic benefits of the intangible asset will be consumed or on a straight-line basis when the consumption pattern is not apparent. The weighted average useful lives of our intangible assets were as follows:

| | Weighted Average Useful Life (years) |
|--------------------------------------|---|
| Purchased technology | 6 |
| Customer contracts and relationships | 10 |
| Trademarks | 8 |
| Acquired rights to use technology | 8 |
| Localization | 1 |
| Other intangibles | 3 |

Software Development Costs

Capitalization of software development costs for software to be sold, leased, or otherwise marketed begins upon the establishment of technological feasibility, which is generally the completion of a working prototype that has been certified as having no critical bugs and is a release candidate. Amortization begins once the software is ready for its intended use, generally based on the pattern in which the economic benefits will be consumed. To date, software development costs incurred between completion of a working prototype and general availability of the related product have not been material.

Internal Use Software

We capitalize costs associated with customized internal-use software systems that have reached the application development stage. Such capitalized costs include external direct costs utilized in developing or obtaining the applications and payroll and payroll-related expenses for employees, who are directly associated with the development of the applications. Capitalization of such costs begins when the preliminary project stage is complete and ceases at the point in which the project is substantially complete and is ready for its intended purpose.

Income Taxes

We use the asset and liability method of accounting for income taxes. Under this method, income tax expense is recognized for the amount of taxes payable or refundable for the current year. In addition, deferred tax assets and liabilities are recognized for expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and liabilities, and for operating losses and tax credit carryforwards. We record a

valuation allowance to reduce deferred tax assets to an amount for which realization is more likely than not.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Taxes Collected from Customers

We net taxes collected from customers against those remitted to government authorities in our financial statements. Accordingly, taxes collected from customers are not reported as revenue.

Treasury Stock

We account for treasury stock under the cost method. When treasury stock is re-issued at a price higher than its cost, the difference is recorded as a component of additional paid-in-capital in our Consolidated Balance Sheets. When treasury stock is re-issued at a price lower than its cost, the difference is recorded as a component of additional paid-in-capital to the extent that there are previously recorded gains to offset the losses. If there are no treasury stock gains in additional paid-in-capital, the losses upon re-issuance of treasury stock are recorded as a component of retained earnings in our Consolidated Balance Sheets.

Advertising Expenses

Advertising costs are expensed as incurred. Advertising expenses for fiscal 2013, 2012 and 2011 were \$88.5 million, \$99.4 million and \$75.1 million, respectively.

Foreign Currency Translation

We translate assets and liabilities of foreign subsidiaries, whose functional currency is their local currency, at exchange rates in effect at the balance sheet date. We translate revenue and expenses at the monthly average exchange rates. We include accumulated net translation adjustments in stockholders' equity as a component of accumulated other comprehensive income.

Foreign Currency and Other Hedging Instruments

In countries outside the United States ("U.S."), we transact business in U.S. Dollars and in various other currencies. In Europe and Japan, transactions that are denominated in Euro, Yen and British Pounds are subject to exposure from movements in exchange rates. We hedge our net recognized foreign currency assets and liabilities with foreign exchange forward contracts to reduce the risk that our earnings and cash flows will be adversely affected by changes in exchange rates. We use foreign exchange option and forward contracts for revenue denominated in Euro, British Pounds and Yen.

We account for our foreign currency hedging instruments as either assets or liabilities on the balance sheet and measure them at fair value. Gains and losses resulting from changes in fair value are accounted for depending on the use of the derivative and whether it is designated and qualifies for hedge accounting. Contracts that do not qualify for hedge accounting are adjusted to fair value through earnings. See Note 5 for information regarding our hedging activities.

Gains and losses from foreign exchange forward contracts which hedge certain balance sheet positions, primarily non-functional currency denominated assets and liabilities (e.g., trade receivables and accounts payable) are recorded each period as a component of interest and other income, net in our Consolidated Statements of Income. Foreign exchange option contracts hedging forecasted foreign currency revenue are designated as cash flow hedges under accounting for derivative instruments and hedging activities, with gains and losses recorded net of tax, as a component of other comprehensive income ("OCI") in stockholders' equity and reclassified into revenue at the time the forecasted transactions occur.

Concentration of Risk

Financial instruments that potentially subject us to concentrations of credit risk are short-term fixed-income investments, structured repurchase transactions, contracts hedging foreign currency risk, and trade receivables. Our investment portfolio consists of investment-grade securities diversified among security types, industries and issuers. Our cash and investments are held and managed by recognized financial institutions that follow our investment policy. Our policy limits the amount of credit exposure to any one security issue or issuer and we believe no significant concentration of credit risk exists with respect to these investments.

We mitigate concentration of risk related to foreign currency hedges through a policy that establishes counterparty limits. The bank counterparties in these contracts expose us to credit-related losses in the event of their nonperformance. However, to mitigate that risk, we only contract with counterparties who meet our minimum requirements under our counterparty risk assessment

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

process. In addition, our hedging policy establishes maximum limits for each counterparty. We monitor ratings, credit spreads and potential downgrades on at least a quarterly basis. Based on our on-going assessment of counterparty risk, we will adjust our exposure to various counterparties.

The aggregate fair value of foreign currency contracts in net asset positions as of November 29, 2013 and November 30, 2012 was \$11.9 million and \$13.5 million, respectively. These amounts represent the maximum exposure to loss at the reporting date as a result of all of the counterparties failing to perform as contracted. These exposures could be reduced by up to \$1.1 million and \$1.0 million, respectively from liabilities included in master netting arrangements with those same counterparties.

Credit risk in receivables is limited to OEMs, dealers and distributors of hardware and software products to the retail market, customers to whom we license software directly and our SaaS offerings. We are also experiencing elevated delinquency and bad debt write-offs related to our receivables assumed in business combinations. A credit review is completed for our new distributors, dealers and OEMs. We also perform ongoing credit evaluations of our customers' financial condition and require letters of credit or other guarantees, whenever deemed necessary. The credit limit given to the customer is based on our risk assessment of their ability to pay, country risk and other factors and is not contingent on the resale of the product or on the collection of payments from their customers. We also purchase credit insurance to mitigate credit risk in some foreign markets where we believe it is warranted. If we license our software or provide SaaS services to a customer where we have a reason to believe the customer's ability to pay is not probable, due to country risk or credit risk, we will not recognize the revenue. We will revert to recognizing the revenue on a cash basis, assuming all other criteria for revenue recognition has been met.

See Note 18 for information regarding our significant customers.

We derive a significant portion of our OEM PostScript and Other licensing revenue from a small number of OEMs. Our OEMs on occasion seek to renegotiate their royalty arrangements. We evaluate these requests on a case-by-case basis. If an agreement is not reached, a customer may decide to pursue other options, which could result in lower licensing revenue for us.

Recent Accounting Pronouncements

In December 2011, the FASB amended the accounting standards to increase the prominence of OCI by eliminating the option to present components of OCI as part of the statement of changes in shareholders' equity and requires the components of OCI to be presented either in a single continuous statement of comprehensive income or in two consecutive statements. We adopted the amended accounting standards at the beginning of our first quarter of fiscal 2013 by electing to present consolidated statements of comprehensive income separate from the consolidated statements of income.

In February 2013, the FASB further amended the above accounting standards to improve the presentation of amounts reclassified out of accumulated other comprehensive income in its entirety and by component by presenting the reclassification adjustments on either the face of the statement where net income is presented or in a separate disclosure in the notes to the financial statements. Amounts that are not required to be reclassified in their entirety to net income are required to be cross referenced to related footnote disclosures that provide additional detail. We elected to early adopt the amended accounting standard at the beginning of our second quarter of fiscal 2013 by electing to present the reclassification adjustments and other required disclosures in a separate footnote.

The amended accounting standards only impact the financial statement presentation of OCI and do not change the components that are recognized in net income or OCI. The adoption had no impact on the Company's financial position or results of operations.

NOTE 2. ACQUISITIONS

Fiscal 2013 Acquisitions

Neolane

On July 22, 2013, we completed our acquisition of privately held Neolane, a leader in cross-channel campaign management technology. During the third quarter of fiscal 2013, we began integrating Neolane into our Digital Marketing reportable segment. Neolane brings a platform for automation and execution of marketing campaigns across the web, e-mail, social, mobile, call center,

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

direct mail, point of sale and other emerging channels which will drive consistent brand experiences and personalized campaigns for our customers.

Under the acquisition method of accounting, the total preliminary purchase price was allocated to Neolane's net tangible and intangible assets based upon their estimated fair values as of July 22, 2013. The total preliminary purchase price for Neolane was \$616.7 million of which \$515.2 million was allocated to goodwill (non-deductible for tax purposes), \$115.0 million to identifiable intangible assets and \$13.5 million to net liabilities assumed. The impact of this acquisition was not material to our Consolidated Financial Statements.

Behance

On December 20, 2012, we completed our acquisition of privately held Behance, an online social media platform to showcase and discover creative work. During the first quarter of fiscal 2013, we began integrating Behance into our Digital Media reportable segment. Behance's community and portfolio capabilities will accelerate our strategy to bring additional community features to Creative Cloud. We have included the financial results of Behance in our Consolidated Financial Statements beginning on the acquisition date.

Under the acquisition method of accounting, the total purchase price was allocated to Behance's net tangible and intangible assets based upon their estimated fair values as of December 20, 2012. The total final purchase price for Behance was approximately \$111.1 million of which \$91.4 million was allocated to goodwill, \$28.5 million to identifiable intangible assets and \$8.8 million to net liabilities assumed. The impact of this acquisition was not material to our Consolidated Financial Statements.

Fiscal 2012 Acquisition

Efficient Frontier

On January 13, 2012, we completed our acquisition of privately held Efficient Frontier, a multi-channel digital ad buying and optimization company. During the first quarter of fiscal 2012, we began integrating Efficient Frontier into our Digital Marketing segment. The Efficient Frontier business adds cross-channel digital ad campaign forecasting, execution and optimization capabilities to our Adobe Marketing Cloud, along with a social marketing engagement platform and social ad buying capabilities. We have included the financial results of Efficient Frontier in our Consolidated Financial Statements beginning on the acquisition date.

Under the acquisition method of accounting, the total purchase price was allocated to Efficient Frontier's net tangible and intangible assets based upon their estimated fair values as of January 13, 2012. During fiscal 2012, we made adjustments to the preliminary purchase price allocation. The total final purchase price for Efficient Frontier was \$374.7 million of which \$291.4 million was allocated to goodwill, \$122.7 million to identifiable intangible assets and \$39.4 million to net liabilities assumed. The impact of this acquisition was not material to our Consolidated Financial Statements.

Fiscal 2011 Acquisitions

During fiscal 2011, we completed six business combinations with aggregate purchase prices totaling approximately \$281.0 million of which \$213.3 million was allocated to goodwill, \$87.5 million to identifiable intangible assets and \$19.8 million to net liabilities assumed. We also completed two asset acquisitions with aggregate purchase prices totaling \$47.3 million. We have included the financial results of the business combinations in our Consolidated Financial Statements beginning on the respective acquisition dates however the impact of these acquisitions was not material to our Consolidated Financial Statements.

NOTE 3. CASH, CASH EQUIVALENTS AND SHORT-TERM INVESTMENTS

Cash equivalents consist of instruments with remaining maturities of three months or less at the date of purchase. We classify all of our cash equivalents and short-term investments as "available-for-sale." In general, these investments are free of trading restrictions. We carry these investments at fair value, based on quoted market prices or other readily available market information. Unrealized gains and losses, net of taxes, are included in accumulated other comprehensive income, which is reflected as a separate component of stockholders' equity in our Consolidated

Balance Sheets. Gains and losses are recognized when realized in our Consolidated Statements of Income. When we have determined that an other-than-temporary decline in fair value has occurred,

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

the amount of the decline that is related to a credit loss is recognized in income. Gains and losses are determined using the specific identification method.

Cash, cash equivalents and short-term investments consisted of the following as of November 29, 2013 (in thousands):

| | Amortized Cost | Unrealized Gains | Unrealized Losses | Estimated Fair Value |
|---|-------------------|---------------------|----------------------|-------------------------|
| Current assets: | | | | |
| Cash | \$286,221 | \$— | \$— | \$286,221 |

| Total cash, cash equivalents and short-term investments | \$3,523,902 | \$14,711 | \$(260) |) \$3,538,353 |

See Note 4 for further information regarding the fair value of our financial instruments.

The following table summarizes the fair value and gross unrealized losses related to available-for-sale securities, aggregated by investment category, that have been in a continuous unrealized loss position for less than twelve months, as of November 29, 2013 and November 30, 2012 (in thousands):

| | 2013 | | 2012 | |
|--------------------------------------|---------------|-------------------------------|---------------|-------------------------------|
| | Fair Value | Gross Unrealized Losses | Fair Value | Gross Unrealized Losses |
| Corporate bonds and commercial paper | \$225,759 | \$(631) |) \$95,489 | \$(132) |
| Foreign government securities | — | — | 2,105 | (12) |
| Municipal securities | 13,522 | (24) |) 40,524 | (60) |
| U.S. Treasury and agency securities | 105,278 | (283) |) 48,203 | (55) |
| Total | \$344,559 | \$(938) |) \$186,321 | \$(259) |

There were 177 securities and 65 securities in an unrealized loss position for less than twelve months at November 29, 2013 and at November 30, 2012, respectively.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

As of November 29, 2013, there were no securities in an unrealized loss position for more than twelve months. As of November 30, 2012 there was one security in an unrealized loss position for more than twelve months. The following table summarizes the fair value and gross unrealized losses related to available-for-sale securities, aggregated by investment category, that were in a continuous unrealized loss position for more than twelve months, as of November 30, 2012 (in thousands):

| | 2012 | |
|--------------------------------------|------------|-------------------------|
| | Fair Value | Gross Unrealized Losses |
| Corporate bonds and commercial paper | \$2,999 | \$(1) |
| Total | \$2,999 | \$(1) |

The following table summarizes the cost and estimated fair value of short-term fixed income securities classified as short-term investments based on stated effective maturities as of November 29, 2013 (in thousands):

| | Amortized Cost | Estimated Fair Value |
|---------------------------------|----------------|----------------------|
| Due within one year | \$508,359 | \$509,438 |
| Due between one and two years | 904,704 | 908,767 |
| Due between two and three years | 698,679 | 702,035 |
| Due after three years | 217,857 | 218,236 |
| Total | \$2,329,599 | \$2,338,476 |

We review our debt and marketable equity securities classified as short-term investments on a regular basis to evaluate whether or not any security has experienced an other-than-temporary decline in fair value. We consider factors such as the length of time and extent to which the market value has been less than the cost, the financial condition and near-term prospects of the issuer and our intent to sell, or whether it is more likely than not we will be required to sell the investment before recovery of the investment's amortized cost basis. If we believe that an other-than-temporary decline exists in one of these securities, we write down these investments to fair value. For debt securities, the portion of the write-down related to credit loss would be recorded to interest and other income, net in our Consolidated Statements of Income. Any portion not related to credit loss would be recorded to accumulated other comprehensive income, which is reflected as a separate component of stockholders' equity in our Consolidated Balance Sheets. For equity securities, the write-down would be recorded to investment gains (losses), net in our Consolidated Statements of Income. During fiscal 2013, we did not consider any of our investments to be other-than-temporarily impaired. During fiscal 2012 and 2011, we recorded immaterial other-than-temporary impairment losses associated with our marketable equity securities and did not consider any of our debt securities to be other-than-temporarily impaired.

NOTE 4. FAIR VALUE MEASUREMENTS

Assets and Liabilities Measured and Recorded at Fair Value on a Recurring Basis

We measure certain financial assets and liabilities at fair value on a recurring basis. There have been no transfers between fair value measurement levels during the year ended November 29, 2013.

The fair value of our financial assets and liabilities at November 29, 2013 was determined using the following inputs (in thousands):

| | Fair Value Measurements at Reporting Date Using | | | |
|--|---|--|---|--|
| | | Quoted Prices in Active Markets for Identical Assets (Level 1) | Significant Other Observable Inputs (Level 2) | Significant Unobservable Inputs (Level 3) |

| Accrued expenses: | | | | |
| Foreign currency derivatives | \$998 | \$— | \$998 | \$— |
| Total liabilities | \$998 | \$— | \$998 | \$— |

See Note 3 for further information regarding the fair value of our financial instruments.

Our fixed income available-for-sale securities consist of high quality, investment grade securities from diverse issuers with a minimum credit rating of BBB and a weighted average credit rating of AA-. We value these securities based on pricing from pricing vendors who may use quoted prices in active markets for identical assets (Level 1 inputs) or inputs other than quoted prices that are observable either directly or indirectly (Level 2 inputs) in determining fair value. However, we classify all of our fixed income available-for-sale securities as having Level 2 inputs. The valuation techniques used to measure the fair value of our financial instruments having Level 2 inputs were derived from non-binding market consensus prices that are corroborated by observable market data, quoted market prices for similar instruments, or pricing models such as discounted cash flow techniques. Our procedures include controls to ensure that appropriate fair values are recorded such as comparing prices obtained from multiple independent sources. Our deferred compensation plan assets consist of prime money market funds and mutual funds.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

We also have direct investments in privately held companies accounted for under the cost method, which are periodically assessed for other-than-temporary impairment. If we determine that an other-than-temporary impairment has occurred, we write down the investment to its fair value. We estimate fair value of our cost method investments considering available information such as pricing in recent rounds of financing, current cash positions, earnings and cash flow forecasts, recent operational performance and any other readily available market data. During fiscal 2013, we determined there were other-than-temporary impairments of \$7.0 million on certain of our cost method investments and wrote down the investments to fair value. During fiscal 2012, we determined there were no material other-than-temporary impairments on our cost method investments.

As of November 29, 2013, the carrying value of our lease receivables approximated fair value, based on Level 2 valuation inputs which include Treasury rates, LIBOR rates and applicable credit spreads. See Note 15 for further details regarding our investment in lease receivables. The fair value of our long-term debt was approximately \$1.6 billion as of November 29, 2013, based on Level 2 quoted prices in inactive markets. See Note 16 for further details regarding our debt.

NOTE 5. DERIVATIVES AND HEDGING ACTIVITIES

Hedge Accounting

We recognize derivative instruments and hedging activities as either assets or liabilities in our Consolidated Balance Sheets and measure them at fair value. Gains and losses resulting from changes in fair value are accounted for depending on the use of the derivative and whether it is designated and qualifies for hedge accounting.

Economic Hedging—Hedges of Forecasted Transactions

In countries outside the U.S., we transact business in U.S. Dollars and in various other currencies. We may use foreign exchange option contracts or forward contracts to hedge certain cash flow exposures resulting from changes in these foreign currency exchange rates. These foreign exchange contracts, carried at fair value, have maturities of up to twelve months. We enter into these foreign exchange contracts to hedge a portion of our forecasted foreign currency denominated revenue in the normal course of business and accordingly, they are not speculative in nature.

We recognize these contracts as derivative instruments and they are classified as either assets or liabilities on the balance sheet and measured on a recurring basis at fair value. Gains and losses resulting from changes in fair value are accounted for depending on the use of the contract and whether it is designated and qualifies for hedge accounting. To receive hedge accounting treatment, all hedging relationships are formally documented at the inception of the hedge, and the hedges must be highly effective in offsetting changes to future cash flows on hedged transactions. We record changes in the intrinsic value of these cash flow hedges in accumulated other comprehensive income in our Consolidated Balance Sheets, until the forecasted transaction occurs. When the forecasted transaction occurs, we reclassify the related gain or loss on the cash flow hedge to revenue. In the event the underlying forecasted transaction does not occur, or it becomes probable that it will not occur, we reclassify the gain or loss on the related cash flow hedge from accumulated other comprehensive income to interest and other income (expense), net in our Consolidated Statements of Income at that time. If we do not elect hedge accounting, or the contract does not qualify for hedge accounting treatment, the changes in fair market value from period to period are recorded in interest and other income (expense), net in our Consolidated Statements of Income. For fiscal 2012 and 2011, there were no such gains or losses recognized in interest and other income, net relating to hedges of forecasted transactions that did not occur. For fiscal 2013, net gains or losses recognized in other income relating to hedges of forecasted transactions that did not occur were insignificant.

We evaluate hedge effectiveness at the inception of the hedge prospectively as well as retrospectively and record any ineffective portion of the hedging instruments in interest and other income, net on our Consolidated Statements of Income. The net gain (loss) recognized in interest and other income, net for cash flow hedges due to hedge ineffectiveness was insignificant for all fiscal years presented. The time value of purchased contracts is recorded in

interest and other income, net in our Consolidated Statements of Income.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Balance Sheet Hedging—Hedging of Foreign Currency Assets and Liabilities

We also hedge our net recognized foreign currency denominated assets and liabilities with foreign exchange forward contracts to reduce the risk that the value of these assets and liabilities will be adversely affected by changes in exchange rates. These contracts hedge assets and liabilities that are denominated in foreign currencies and are carried at fair value with changes in the fair value recorded to interest and other income (expense), net in our Consolidated Statements of Income. These contracts do not subject us to material balance sheet risk due to exchange rate movements because gains and losses on these derivatives are intended to offset gains and losses on the assets and liabilities being hedged. As of November 29, 2013, total notional amounts of outstanding contracts were \$282.8 million which included the notional equivalent of \$99.0 million in Euro, \$33.8 million in British Pounds and \$150.0 million in other foreign currencies. As of November 30, 2012, total notional amounts of outstanding contracts were \$422.9 million which included the notional equivalent of \$209.8 million in Euro, \$44.2 million in Yen and \$168.9 million in other foreign currencies. At November 29, 2013 and November 30, 2012, the outstanding balance sheet hedging derivatives had maturities of 180 days or less.

The fair value of derivative instruments on our Consolidated Balance Sheets as of November 29, 2013 and November 30, 2012 was as follows (in thousands):

| | 2013 Fair Value Asset Derivatives ⁽¹⁾ | Fair Value Liability Derivatives ⁽²⁾ | 2012 Fair Value Asset Derivatives ⁽¹⁾ | Fair Value Liability Derivatives ⁽²⁾ |
|--|---|---|---|---|
| Derivatives designated as hedging instruments: | | | | |
| Foreign exchange option contracts ⁽³⁾ | \$8,913 | \$— | \$10,897 | \$— |
| Derivatives not designated as hedging instruments: | | | | |
| Foreign exchange forward contracts | 2,978 | 1,067 | 2,616 | 998 |
| Total derivatives | \$11,891 | \$1,067 | \$13,513 | \$998 |

⁽¹⁾ Included in prepaid expenses and other current assets on our Consolidated Balance Sheets.

⁽²⁾ Included in accrued expenses on our Consolidated Balance Sheets.

⁽³⁾ Hedging effectiveness expected to be recognized to income within the next twelve months.

The effect of derivative instruments designated as cash flow hedges and of derivative instruments not designated as hedges in our Consolidated Statements of Income for fiscal 2013, 2012 and 2011 were as follows (in thousands):

| | 2013 | | 2012 | | 2011 | |
|--|--|---|--|---|--|---|
| | Foreign Exchange Option Contracts | Foreign Exchange Forward Contracts | Foreign Exchange Option Contracts | Foreign Exchange Forward Contracts | Foreign Exchange Option Contracts | Foreign Exchange Forward Contracts |
| Derivatives in cash flow hedging relationships: | | | | | | |
| Net gain (loss) recognized in OCI, net of tax ⁽¹⁾ | \$34,677 | \$— | \$23,922 | \$— | \$16,952 | \$— |
| Net gain (loss) reclassified from accumulated OCI into income, net of tax ⁽²⁾ | \$35,914 | \$— | \$30,672 | \$— | \$3,749 | \$— |
| Net gain (loss) recognized in income ⁽³⁾ | \$(21,098) | \$— | \$(29,554) | \$— | \$(28,796) | \$— |
| Derivatives not designated as hedging relationships: | | | | | | |
| Net gain (loss) recognized in income ⁽⁴⁾ | \$— | \$2,129 | \$— | \$8,742 | \$— | \$(3,973) |

- (1) Net change in the fair value of the effective portion classified in OCI.
- (2) Effective portion classified as revenue.
- (3) Ineffective portion and amount excluded from effectiveness testing classified in interest and other income (expense), net.
- (4) Classified in interest and other income (expense), net.

Net gains (losses) recognized in interest and other income (expense), net relating to balance sheet hedging for fiscal 2013, 2012 and 2011 were as follows (in thousands):

| | 2013 | 2012 | 2011 |
|--|------------|------------|------------|
| Gain (loss) on foreign currency assets and liabilities: | | | |
| Net realized gain (loss) recognized in other income | \$(4,783) | \$(5,899) | \$6,604) |
| Net unrealized gain (loss) recognized in other income | 2,751 | (4,720) | (4,062) |
| | (2,032) | (10,619) | 2,542) |
| Gain (loss) on hedges of foreign currency assets and liabilities: | | | |
| Net realized gain recognized in other income | 1,835 | 9,312 | 4,633 |
| Net unrealized gain (loss) recognized in other income | 294 | (570) | (8,606) |
| | 2,129 | 8,742 | (3,973) |
| Net gain (loss) recognized in interest and other income (expense), net | \$97 | \$(1,877) | \$(1,431) |

NOTE 6. PROPERTY AND EQUIPMENT

Property and equipment, net consisted of the following as of November 29, 2013 and November 30, 2012 (in thousands):

| | 2013 | 2012 |
|--|------------|------------|
| Computers and equipment | \$731,767 | \$702,270 |
| Furniture and fixtures | 82,904 | 84,697 |
| Server hardware under capital lease | 61,007 | 35,303 |
| Capital projects in-progress | 54,593 | 63,980 |
| Leasehold improvements | 235,859 | 222,262 |
| Land | 106,283 | 114,941 |
| Buildings | 175,325 | 175,222 |
| Total | 1,447,738 | 1,398,675 |
| Less accumulated depreciation and amortization | (787,964) | (734,373) |
| Property and equipment, net | \$659,774 | \$664,302 |

Depreciation and amortization expense of property and equipment for fiscal 2013, 2012 and 2011 was \$144.7 million, \$134.4 million and \$117.5 million, respectively.

In May 2013, management approved a plan to sell land, building and other assets located in Waltham, Massachusetts (the "Waltham property assets") with a total carrying amount of \$47.4 million. The decision to sell the Waltham property assets was largely based upon lack of operational needs for a facility of this size, in combination with recent improvements in market conditions for commercial real estate in the area. During May 2013, we began to actively market the Waltham property assets and we expected to sell the property within one year from management's approval of the plan and classified the Waltham property assets as held for sale at \$23.6 million representing their fair value, net of estimated costs to sell which was the lesser of the fair value less cost to sell or carrying amount of the assets. The fair value, net of estimated cost to sell was measured with the assistance of third-party valuation models which used inputs such as market comparable data for similar properties to be purchased by other operating and investing entities and discounted cash flow techniques as part of the analysis. The fair value measurement was categorized as Level 3 as significant unobservable inputs were used in the valuation analysis. We ceased recognizing depreciation expense on the Waltham property assets upon reclassification. As a result, we recorded a write-down of \$23.8 million during fiscal 2013. These charges are included in restructuring and other related charges in our Consolidated Statements of Income for fiscal 2013. In September 2013, we finalized the sale of the Waltham property assets for net proceeds of \$24.3 million which approximated the carrying value of the assets at the time of sale.

NOTE 7. GOODWILL AND PURCHASED AND OTHER INTANGIBLES

During fiscal 2013, 2012 and 2011, we modified our segments due to changes in how we operate our business. See Note 18 for further information regarding our segment changes. Prior year information in the tables below has been reclassified to reflect these changes.

Goodwill by reportable segment and activity for the years ended November 29, 2013 and November 30, 2012 was as follows (in thousands):

| | 2011 | Acquisitions | Other ⁽¹⁾ | 2012 | Acquisitions | Other ⁽¹⁾ | 2013 |
|----------------------|-------------|--------------|----------------------|---------------|--------------|----------------------|-------------|
| Digital Media | \$1,958,941 | \$— | \$(611) |) \$1,958,330 | \$91,355 | \$41 | \$2,049,726 |
| Digital Marketing | 1,631,725 | 291,422 | (6,679) |) 1,916,468 | 526,739 | 20,621 | 2,463,828 |
| Print and Publishing | 258,551 | — | (90) |) 258,461 | — | (34) |) 258,427 |
| Goodwill | \$3,849,217 | \$291,422 | \$(7,380) |) \$4,133,259 | \$618,094 | \$20,628 | \$4,771,981 |

⁽¹⁾ Amounts primarily consist of foreign currency translation adjustments.

Purchased and other intangible assets, net by reportable segment as of November 29, 2013 and November 30, 2012 were as follows (in thousands):

| | 2013 | 2012 |
|--|-----------|-----------|
| Digital Media | \$170,213 | \$148,215 |
| Digital Marketing | 433,245 | 396,786 |
| Print and Publishing | 1,796 | 35 |
| Purchased and other intangible assets, net | \$605,254 | \$545,036 |

Purchased and other intangible assets subject to amortization as of November 29, 2013 and November 30, 2012 were as follows (in thousands):

| | 2013 | | | 2012 | | |
|--|-------------|--------------------------|-------------|-----------|--------------------------|-------------|
| | Cost | Accumulated Amortization | Net | Cost | Accumulated Amortization | Net |
| Purchased technology | \$423,237 | \$(220,414) |) \$202,823 | \$366,574 | \$(161,538) |) \$205,036 |
| Customer contracts and relationships | \$389,800 | \$(111,416) |) \$278,384 | \$318,027 | \$(74,214) |) \$243,813 |
| Trademarks | 67,546 | (27,933) |) 39,613 | 53,293 | (19,171) |) 34,122 |
| Acquired rights to use technology | 155,322 | (76,740) |) 78,582 | 104,402 | (56,782) |) 47,620 |
| Localization | 3,404 | (2,172) |) 1,232 | 8,586 | (4,654) |) 3,932 |
| Other intangibles | 16,447 | (11,827) |) 4,620 | 18,742 | (8,229) |) 10,513 |
| Total other intangible assets | \$632,519 | \$(230,088) |) \$402,431 | \$503,050 | \$(163,050) |) \$340,000 |
| Purchased and other intangible assets, net | \$1,055,756 | \$(450,502) |) \$605,254 | \$869,624 | \$(324,588) |) \$545,036 |

In the first quarter of fiscal 2013, we acquired rights to use certain technology for approximately \$51.8 million. Of this cost, an estimated \$25.3 million was related to future licensing rights and has been capitalized and will be amortized on a straight-line basis over the estimated useful lives ranging from five to ten years. We estimated that the remaining cost of approximately \$26.5 million was related to historical use of licensing rights and was expensed as cost of product revenue.

Purchased intangibles associated with certain of our prior year acquisitions became fully amortized and were removed from the balance sheet in the first quarter of fiscal 2013. Excluding the expense associated with historical use of the acquired rights to use the technology discussed in the paragraph above, amortization expense related to purchased and

other intangible assets was \$156.9 million, \$146.2 million and \$131.5 million for fiscal 2013, 2012 and 2011, respectively. Of these amounts, for fiscal 2013, 2012 and 2011, \$111.0 million, \$98.3 million and \$88.3 million, respectively, were included in cost of sales.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Purchased and other intangible assets are amortized over their estimated useful lives of 1 to 14 years. As of November 29, 2013, we expect amortization expense in future periods to be as follows (in thousands):

| Fiscal Year | Purchased Technology | Other Intangible Assets |
|-------------------------------------|----------------------|-------------------------|
| 2014 | \$74,811 | \$75,239 |
| 2015 | 61,273 | 68,041 |
| 2016 | 22,808 | 62,061 |
| 2017 | 15,350 | 52,771 |
| 2018 | 8,961 | 41,779 |
| Thereafter | 19,620 | 102,540 |
| Total expected amortization expense | \$202,823 | \$402,431 |

NOTE 8. ACCRUED EXPENSES

Accrued expenses as of November 29, 2013 and November 30, 2012 consisted of the following (in thousands):

| | 2013 | 2012 |
|-----------------------------------|-----------|-----------|
| Accrued compensation and benefits | \$318,219 | \$242,887 |
| Sales and marketing allowances | 66,502 | 87,916 |
| Accrued corporate marketing | 22,801 | 39,503 |
| Taxes payable | 18,225 | 26,164 |
| Royalties payable | 14,778 | 10,040 |
| Accrued interest expense | 20,613 | 20,796 |
| Other | 195,801 | 162,834 |
| Accrued expenses | \$656,939 | \$590,140 |

Other primarily includes general corporate accruals for local and regional expenses and technical support. Other is also comprised of deferred rent related to office locations with rent escalations and foreign currency liability derivatives.

NOTE 9. INCOME TAXES

Income before income taxes for fiscal 2013, 2012 and 2011 consisted of the following (in thousands):

| | 2013 | 2012 | 2011 |
|----------------------------|-----------|-------------|-------------|
| Domestic | \$132,916 | \$512,987 | \$252,476 |
| Foreign | 223,225 | 605,807 | 782,754 |
| Income before income taxes | \$356,141 | \$1,118,794 | \$1,035,230 |

Domestic income before taxes is significantly lower than foreign income before taxes due to certain accounting charges that our foreign subsidiaries are not required to bear under foreign accounting standards. These charges do not lower our domestic income subject to U.S. tax. Prior year amounts have been reclassified to conform to the current year presentation.

Deferred Tax Assets and Liabilities

The tax effects of the temporary differences that gave rise to significant portions of the deferred tax assets and liabilities as of November 29, 2013 and November 30, 2012 are presented below (in thousands):

| | 2013 | 2012 |
|--|-------------|-------------|
| Deferred tax assets: | | |
| Acquired technology | \$14,379 | \$3,890 |
| Reserves and accruals | 67,753 | 71,888 |
| Deferred revenue | 10,218 | 9,941 |
| Unrealized losses on investments | 9,793 | 17,482 |
| Stock-based compensation | 64,244 | 85,179 |
| Net operating loss carryforwards of acquired companies | 9,222 | 16,257 |
| Credit carryforwards | 43,175 | 31,172 |
| Capitalized expenses | 188 | 4,023 |
| Other | 6,788 | 5,165 |
| Total gross deferred tax assets | 225,760 | 244,997 |
| Deferred tax asset valuation allowance | (21,493) | (28,247) |
| Total deferred tax assets | 204,267 | 216,750 |
| Deferred tax liabilities: | | |
| Depreciation and amortization | (89,611) | (81,034) |
| Undistributed earnings of foreign subsidiaries | (211,417) | (187,528) |
| Acquired intangible assets | (176,626) | (153,757) |
| Total deferred tax liabilities | (477,654) | (422,319) |
| Net deferred tax liabilities | \$(273,387) | \$(205,569) |

The deferred tax assets and liabilities for fiscal 2013 and 2012 include amounts related to various acquisitions. The total change in deferred tax assets and liabilities in fiscal 2013 includes changes that are recorded to OCI, additional paid-in capital, goodwill and retained earnings.

We provide for U.S. income taxes on the earnings of foreign subsidiaries unless the subsidiaries' earnings are considered permanently reinvested outside the U.S. To the extent that the foreign earnings previously treated as permanently reinvested are repatriated, the related U.S. tax liability may be reduced by any foreign income taxes paid on these earnings. As of November 29, 2013, the cumulative amount of earnings upon which U.S. income taxes have not been provided is approximately \$3.1 billion. The unrecognized deferred tax liability for these earnings is approximately \$0.8 billion.

As of November 29, 2013, we have net operating loss carryforwards of approximately \$10.8 million for federal, \$30.4 million for state, and \$10.8 million for foreign. We also have federal, state and foreign tax credit carryforwards of approximately \$1.4 million, \$30.2 million and \$22.2 million, respectively. The net operating loss carryforward assets, federal tax credits and foreign tax credits will expire in various years from fiscal 2014 through 2033. The state tax credit carryforwards can be carried forward indefinitely. The net operating loss carryforward assets and certain credits are subject to an annual limitation under Internal Revenue Code Section 382, but are expected to be fully realized. In addition, we track certain deferred tax attributes of \$47.0 million which have not been recorded in the financial statements pursuant to accounting standards related to stock-based compensation. These amounts are no longer included in our gross or net deferred tax assets. Pursuant to these standards, the benefit of these deferred tax assets will be recorded to equity if and when they reduce taxes payable.

As of November 29, 2013, a valuation allowance of \$21.5 million has been established for certain deferred tax assets related to the impairment of investments and certain foreign assets. For fiscal 2013, the total change in the valuation allowance was \$6.8 million, of which \$0.5 million was recorded as a tax expense through the income statement.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Accounting for Uncertainty in Income Taxes

During fiscal 2013 and 2012, our aggregate changes in our total gross amount of unrecognized tax benefits are summarized as follows (in thousands):

| | 2013 | 2012 |
|---|-----------|-----------|
| Beginning balance | \$160,468 | \$163,607 |
| Gross increases in unrecognized tax benefits – prior year tax positions | 20,244 | 1,038 |
| Gross increases in unrecognized tax benefits – current year tax positions | 16,777 | 23,771 |
| Settlements with taxing authorities | (55,851) | (1,754) |
| Lapse of statute of limitations | (4,066) | (25,387) |
| Foreign exchange gains and losses | (1,474) | (807) |
| Ending balance | \$136,098 | \$160,468 |

As of November 29, 2013, the combined amount of accrued interest and penalties related to tax positions taken on our tax returns and included in non-current income taxes payable was approximately \$11.4 million.

We file income tax returns in the U.S. on a federal basis and in many U.S. state and foreign jurisdictions. We are subject to the continual examination of our income tax returns by the IRS and other domestic and foreign tax authorities. Our major tax jurisdictions are the U.S., Ireland and California. For California, Ireland and the U.S., the earliest fiscal years open for examination are 2005, 2006 and 2010, respectively. We regularly assess the likelihood of outcomes resulting from these examinations to determine the adequacy of our provision for income taxes and have reserved for potential adjustments that may result from the current examinations. We believe such estimates to be reasonable; however, there can be no assurance that the final determination of any of these examinations will not have an adverse effect on our operating results and financial position.

In July 2013, a U.S. income tax examination covering our fiscal years 2008 and 2009 was completed. Our accrued tax and interest related to these years was \$48.4 million and was previously reported in long-term income taxes payable. We settled the tax obligation resulting from this examination with cash and income tax assets totaling \$41.2 million, and the resulting \$7.2 million income tax benefit was recorded in the third quarter of fiscal 2013.

The timing of the resolution of income tax examinations is highly uncertain as are the amounts and timing of tax payments that are part of any audit settlement process. These events could cause large fluctuations in the balance sheet classification of current and non-current assets and liabilities. We believe that within the next 12 months, it is reasonably possible that either certain audits will conclude or statutes of limitations on certain income tax examination periods will expire, or both. Given the uncertainties described above, we can only determine a range of estimated potential decreases in underlying unrecognized tax benefits ranging from \$0 to approximately \$5 million.

NOTE 10. RESTRUCTURING

Fiscal 2011 Restructuring Plan

In the fourth quarter of fiscal 2011, we initiated a restructuring plan consisting of reductions in workforce and the consolidation of facilities in order to better align our resources around our Digital Media and Digital Marketing strategies.

During fiscal 2013, we continued to implement restructuring activities under this plan. Total costs incurred to date and expected to be incurred for closing redundant facilities are \$12.2 million as all facilities under this plan have been exited as of November 29, 2013.

Other Restructuring Plans

Other restructuring plans include other Adobe plans and other plans associated with certain of our acquisitions that are substantially complete. We continue to make cash outlays to settle obligations under these plans, however the current impact to our Consolidated Financial Statements is not significant. Our other restructuring plans primarily consist of the 2009 Restructuring Plan, which was implemented in the fourth quarter of fiscal 2009, in order to appropriately align our costs in connection with our fiscal 2010 operating plan.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

During fiscal 2013 we vacated approximately 21,000 square feet of sales facilities in Australia in connection with our other restructuring plans.

Summary of Restructuring Plans

The following table sets forth a summary of restructuring activities related to all of our restructuring plans described above during fiscal 2013 (in thousands):

| | November 30, 2012 | Costs Incurred | Cash Payments | Other Adjustments* | November 29, 2013 |
|--------------------------------------|----------------------|-------------------|------------------|-----------------------|----------------------|
| Fiscal 2011 Plan: | | | | | |
| Termination benefits | \$ 1,248 | \$— | \$(776 |) \$(30 |) \$442 |
| Cost of closing redundant facilities | 9,623 | — | (1,916 |) (2,348 |) 5,359 |
| Other Restructuring Plans: | | | | | |
| Termination benefits | 991 | 1,291 | (484 |) (8 |) 1,790 |
| Cost of closing redundant facilities | 9,688 | 5,021 | (7,109 |) (1,304 |) 6,296 |
| Total restructuring plans | \$ 21,550 | \$ 6,312 | \$(10,285 |) \$(3,690 |) \$ 13,887 |

(*) Included in Other Adjustments are foreign currency translation adjustments and goodwill adjustments of \$0.5 million and \$0.2 million, respectively.

Accrued restructuring charges of approximately \$13.9 million at November 29, 2013 includes \$6.2 million recorded in accrued restructuring, current and \$7.7 million related to long-term facilities obligations recorded in accrued restructuring, non-current on our Consolidated Balance Sheets. We expect to pay accrued termination benefits through fiscal 2014 and facilities-related liabilities under contract through fiscal 2021 of which approximately 54% will be paid through 2015.

NOTE 11. BENEFIT PLANS**Retirement Savings Plan**

In 1987, we adopted an Employee Investment Plan, qualified under Section 401(k) of the Internal Revenue Code, which is a retirement savings plan covering substantially all of our U.S. employees, now referred to as the Adobe 401(k) Retirement Savings Plan. Under the plan, eligible employees may contribute up to 65% of their pretax or after-tax salary, subject to the Internal Revenue Service annual contribution limits. In fiscal 2013, we matched 50% of the first 6% of the employee's eligible compensation. We contributed \$22.3 million, \$19.4 million and \$19.6 million in fiscal 2013, 2012 and 2011, respectively. Adobe is under no obligation to continue matching future employee contributions and at the Company's discretion may change its practices at any time.

Deferred Compensation Plan

On September 21, 2006, the Board of Directors approved the Adobe Systems Incorporated Deferred Compensation Plan, effective December 2, 2006 (the "Deferred Compensation Plan"). The Deferred Compensation Plan is an unfunded, non-qualified, deferred compensation arrangement under which certain executives and members of the Board of Directors are able to defer a portion of their annual compensation. Participants may elect to contribute up to 75% of their base salary and 100% of other specified compensation, including commissions, bonuses, performance-based and time-based restricted stock units, and directors' fees. Participants are able to elect the payment of benefits to begin on a specified date at least three years after the end of the plan year in which the election is made in the form of a lump sum or annual installments over five, ten or fifteen years. Upon termination of a participant's employment with Adobe, such participant will receive a distribution in the form of a lump sum payment. All distributions will be made in cash, except for deferred performance-based and time-based restricted stock units which will be settled in stock. As of November 29, 2013 and November 30, 2012, the invested amounts under the Deferred Compensation Plan total \$19.8 million and \$15.1 million, respectively and were recorded as other assets on our Consolidated Balance Sheets. As of November 29, 2013 and November 30, 2012, \$22.0 million and \$16.4 million,

respectively, was recorded as long-term liabilities to recognize undistributed deferred compensation due to employees.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NOTE 12. STOCK-BASED COMPENSATION

Our stock-based compensation programs are long-term retention programs that are intended to attract, retain and provide incentives for talented employees, officers and directors, and to align stockholder and employee interests. We have the following stock-based compensation plans and programs:

Restricted Stock Plans

We grant restricted stock units to all eligible employees under our 2003 Equity Incentive Plan, as amended ("2003 Plan") and our 2005 Equity Incentive Assumption Plan ("2005 Assumption Plan"). Restricted stock units granted under these plans as part of our annual review process vest annually over three years. Other restricted stock units granted under these plans generally vest over four years, the majority of which vest 25% annually. Certain grants have other vesting periods approved by our Board of Directors or an authorized committee of the Board of Directors.

We grant performance awards to officers and key employees under our 2003 Plan. Performance awards granted under these plans from fiscal 2009 to fiscal 2012 generally vest annually over three years with the exception of the performance awards granted in fiscal 2013 which cliff-vest after three years. Performance awards granted prior to fiscal 2009 vest annually over four years.

As of November 29, 2013, we had reserved 154.4 million and 5.7 million shares of common stock for issuance under our 2003 Plan and 2005 Assumption Plan, respectively, and had 44.0 million and 0.6 million shares available for grant under our 2003 Plan and 2005 Assumption Plan, respectively.

Employee Stock Purchase Plan

Our 1997 Employee Stock Purchase Plan ("ESPP") allows eligible employee participants to purchase shares of our common stock at a discount through payroll deductions. The ESPP consists of a twenty-four month offering period with four six-month purchase periods in each offering period. Employees purchase shares in each purchase period at 85% of the market value of our common stock at either the beginning of the offering period or the end of the purchase period, whichever price is lower. The ESPP will continue until the earlier of (i) termination by the Board or (ii) the date on which all of the shares available for issuance under the plan have been issued.

As of November 29, 2013, we had reserved 93.0 million shares of our common stock for issuance under the ESPP and approximately 15.8 million shares remain available for future issuance.

Stock Option Plans

The 2003 Plan and the 2005 Assumption Plan allows us to grant options to all employees, including executive officers, outside consultants and non-employee directors. These plans will continue until the earlier of (i) termination by the Board or (ii) the date on which all of the shares available for issuance under the plan have been issued and restrictions on issued shares have lapsed. Option vesting periods are generally four years for all of these plans. Options granted under these plans generally expire seven years from the effective date of grant.

The Executive Compensation Committee of Adobe's Board of Directors eliminated the use of stock option grants for all employees in fiscal 2012. Stock option grants to non-employee directors were minimal in fiscal 2013, and in December 2013 the Board of Directors eliminated the use of options for directors going forward.

Performance Share Programs

Effective January 24, 2013, our Executive Compensation Committee modified our Performance Share Program (the "2013 Program") by eliminating the use of qualitative performance objectives, with 100% of shares to be earned based on the achievement of an objective total stockholder return measure over a three-year performance period.

Performance awards will be granted under the 2013 Program pursuant to the terms of our 2003 Equity Incentive Plan. The purpose of the 2013 Program is to align key management and senior leadership with stockholders' interests over the long term and to retain key employees. Performance share awards will be awarded and fully vest upon the Executive Compensation Committee's certification of the level of achievement following the three-year anniversary of the grant date on January 24, 2016. Participants in the 2013 Program generally have the ability to receive up to 200% of the target number of shares originally granted.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Issuance of Shares

Upon exercise of stock options, vesting of restricted stock and performance shares, and purchases of shares under the ESPP, we will issue treasury stock. If treasury stock is not available, common stock will be issued. In order to minimize the impact of on-going dilution from exercises of stock options and vesting of restricted stock and performance shares, we instituted a stock repurchase program. See Note 13 for information regarding our stock repurchase programs.

Valuation of Stock-Based Compensation

Stock-based compensation cost is measured at the grant date based on the fair value of the award. We use the Black-Scholes option pricing model to determine the fair value of stock options and ESPP shares. The determination of the fair value of stock-based payment awards on the date of grant using an option pricing model is affected by our stock price as well as assumptions regarding a number of complex and subjective variables. These variables include our expected stock price volatility over the expected term of the awards, actual and projected employee stock option exercise behaviors, a risk-free interest rate and any expected dividends.

We estimate the expected term of options granted by calculating the average term from our historical stock option exercise experience. We estimate the volatility of our common stock by using implied volatility in market traded options. Our decision to use implied volatility was based upon the availability of actively traded options on our common stock and our assessment that implied volatility is more representative of future stock price trends than historical volatility. We base the risk-free interest rate that we use in the option valuation model on zero-coupon yields implied by U.S. Treasury issues with remaining terms similar to the expected term on the options. We do not anticipate paying any cash dividends in the foreseeable future and therefore use an expected dividend yield of zero in the option valuation model. We are required to estimate forfeitures at the time of grant and revise those estimates in subsequent periods if actual forfeitures differ from those estimates. We use historical data to estimate pre-vesting option forfeitures and record stock-based compensation expense only for those awards that are expected to vest. The assumptions used to value our option grants were as follows:

| | Fiscal Years | | |
|--------------------------|--------------|---------------|--------------|
| | 2013 | 2012 | 2011 |
| Expected life (in years) | 3.2 | 3.9 - 4.2 | 3.8 - 4.2 |
| Volatility | 27 | % 31 - 34% | 30 - 41% |
| Risk free interest rate | 0.36 | % 0.54 - .71% | 0.64 - 1.92% |

The expected term of ESPP shares is the average of the remaining purchase periods under each offering period. The assumptions used to value employee stock purchase rights were as follows:

| | Fiscal Years | | |
|--------------------------|--------------|--------------|--------------|
| | 2013 | 2012 | 2011 |
| Expected life (in years) | 0.5 - 2.0 | 0.5 - 2.0 | 0.5 - 2.0 |
| Volatility | 26 - 30% | 30 - 36% | 30 - 34% |
| Risk free interest rate | 0.09 - 0.34% | 0.06 - 0.30% | 0.10 - 0.61% |

We recognize the estimated compensation cost of restricted stock awards and restricted stock units, net of estimated forfeitures, over the vesting term. The estimated compensation cost is based on the fair value of our common stock on the date of grant.

We recognize the estimated compensation cost of performance shares, net of estimated forfeitures. The fiscal 2013 awards are earned upon achievement of an objective total stockholder return measure at the end of the three-year performance period, as described above. The fair value of the awards was fixed at grant date and will be amortized over the longer of the remaining performance or service period. In previous years, the awards were earned upon attainment of identified performance goals, some of which contained discretionary metrics. As such, these awards

were measured based on our traded stock price at the end of each

87

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

reporting period until achieved. The fair value of the awards were based on the achievement date and amortized over the longer of the remaining performance or service period.

Summary of Restricted Stock Units

Restricted stock unit activity for fiscal 2013, 2012 and 2011 was as follows (in thousands):

| | 2013 | 2012 | 2011 |
|-------------------------------|---------|---------|---------|
| Beginning outstanding balance | 18,415 | 16,871 | 13,890 |
| Awarded | 7,236 | 9,431 | 8,180 |
| Released | (6,224) | (5,854) | (3,819) |
| Forfeited | (1,479) | (2,147) | (1,587) |
| Increase due to acquisition | — | 114 | 207 |
| Ending outstanding balance | 17,948 | 18,415 | 16,871 |

The weighted average grant date fair values of restricted stock units granted during fiscal 2013, 2012 and 2011 were \$39.87, \$31.36 and \$33.10, respectively. The total fair value of restricted stock units vested during fiscal 2013, 2012 and 2011 was \$249.5 million, \$180.1 million and \$123.3 million, respectively.

Information regarding restricted stock units outstanding at November 29, 2013, November 30, 2012 and December 2, 2011 is summarized below:

| | Number of Shares (thousands) | Weighted Average Remaining Contractual Life (years) | Aggregate Intrinsic Value(*) (millions) |
|--|------------------------------------|--|--|
| 2013 | | | |
| Restricted stock units outstanding | 17,948 | 1.09 | \$1,019.1 |
| Restricted stock units vested and expected to vest | 16,265 | 1.02 | \$920.5 |
| 2012 | | | |
| Restricted stock units outstanding | 18,415 | 1.37 | \$637.3 |
| Restricted stock units vested and expected to vest | 16,289 | 1.26 | \$562.8 |
| 2011 | | | |
| Restricted stock units outstanding | 16,871 | 1.35 | \$457.4 |
| Restricted stock units vested and expected to vest | 14,931 | 1.25 | \$404.3 |

The intrinsic value is calculated as the market value as of the end of the fiscal period. As reported by the NASDAQ (*) Global Select Market, the market values as of November 29, 2013, November 30, 2012 and December 2, 2011 were \$56.78, \$34.61 and \$27.11, respectively.

Summary of Performance Shares

The following table sets forth the summary of performance share activity under our 2013 Program for the fiscal year ended November 29, 2013 (in thousands):

| | Shares Granted | Maximum Shares Eligible to Receive |
|-------------------------------|-------------------|--|
| Beginning outstanding balance | — | — |
| Awarded | 946 | 1,891 |

| | | | |
|----------------------------|-----|--------|---|
| Forfeited | (92 |) (184 |) |
| Ending outstanding balance | 854 | 1,707 | |

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In the first quarter of fiscal 2013, the Executive Compensation Committee certified the actual performance achievement of participants in the 2012 Performance Share Program (the “2012 Program”). Based upon the achievement of specific and/or market-based performance goals outlined in the 2012 Program, participants had the ability to receive up to 150% of the target number of shares originally granted. Actual performance resulted in participants achieving 116% of target or approximately 1.3 million shares for the 2012 Program. One third of the shares under the 2012 Program vested in the first quarter of fiscal 2013 and the remaining two thirds vest evenly on the following two anniversaries of the grant, contingent upon the recipient's continued service to Adobe.

In the first quarter of fiscal 2012, the Executive Compensation Committee certified the actual performance achievement of participants in the 2011 Performance Share Program (the “2011 Program”). Based upon the achievement of goals outlined in the 2011 Program, participants had the ability to receive up to 150% of the target number of shares originally granted. Actual performance resulted in participants achieving 130% of target or approximately 0.5 million shares for the 2011 Program. One third of the shares under the 2011 Program vested in the first quarter of fiscal 2012 and the remaining two thirds vest evenly on the following two annual anniversary dates of the grant, contingent upon the recipient's continued service to Adobe.

In the first quarter of fiscal 2011, the Executive Compensation Committee certified the actual performance achievement of participants in the 2010 Performance Share Program (the “2010 Program”). Based upon the achievement of goals outlined in the 2010 Program, participants had the ability to receive up to 150% of the target number of shares originally granted. Actual performance resulted in participants achieving 135% of target or approximately 0.3 million shares for the 2010 Program. One third of the shares under the 2011 Program vested in the first quarter of fiscal 2012 and the remaining two thirds vest evenly on the following two annual anniversary dates of the grant, contingent upon the recipient's continued service to Adobe.

The following table sets forth the summary of performance share activity under our 2010, 2011 and 2012 programs, based upon share awards actually achieved, for the fiscal years ended November 29, 2013, November 30, 2012 and December 2, 2011 (in thousands):

| | 2013 | 2012 | 2011 |
|-------------------------------|-------|--------|---------|
| Beginning outstanding balance | 388 | 405 | 557 |
| Achieved | 1,279 | 492 | 337 |
| Released | (665) |) (464 |) (436) |
| Forfeited | (141) |) (45 |) (53) |
| Ending outstanding balance | 861 | 388 | 405 |

The total fair value of performance awards vested during fiscal 2013, 2012 and 2011 was \$25.4 million, \$14.4 million and \$14.8 million, respectively.

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Information regarding performance shares outstanding at November 29, 2013, November 30, 2012 and December 2, 2011 is summarized below:

| | Number of Shares (thousands) | Weighted Average Remaining Contractual Life (years) | Aggregate Intrinsic Value ^(*) (millions) |
|--|------------------------------------|--|--|
| 2013 | | | |
| Performance shares outstanding | 861 | 0.58 | \$48.9 |
| Performance shares vested and expected to vest | 817 | 0.56 | \$46.3 |
| 2012 | | | |
| Performance shares units outstanding | 388 | 0.54 | \$13.4 |
| Performance shares vested and expected to vest | 369 | 0.51 | \$12.7 |
| 2011 | | | |
| Performance shares units outstanding | 405 | 0.41 | \$11.0 |
| Performance shares vested and expected to vest | 390 | 0.39 | \$10.4 |

The intrinsic value is calculated as the market value as of the end of the fiscal period. As reported by the NASDAQ Global Select Market, the market values as of November 29, 2013, November 30, 2012 and December 2, 2011 were \$56.78, \$34.61 and \$27.11, respectively.

Summary of Employee Stock Purchase Plan Shares

The weighted average subscription date fair value of shares under the ESPP during fiscal 2013, 2012 and 2011 were \$11.40, \$9.09 and \$9.01, respectively. Employees purchased 3.4 million shares at an average price of \$25.71, 3.2 million shares at an average price of \$23.81, and 3.7 million shares at an average price of \$23.48, respectively, for fiscal 2013, 2012 and 2011. The intrinsic value of shares purchased during fiscal 2013, 2012 and 2011 was \$58.5 million, \$22.8 million and \$28.9 million, respectively. The intrinsic value is calculated as the difference between the market value on the date of purchase and the purchase price of the shares.

Summary of Stock Options

Option activity under our stock option program for fiscal 2013, 2012 and 2011 was as follows (shares in thousands):

| | Outstanding Options | |
|-----------------------------|---------------------|--|
| | Number of Shares | Weighted Average Exercise Price |
| December 3, 2010 | 37,075 | \$30.33 |
| Granted | 4,507 | \$33.60 |
| Exercised | (4,987) |) \$21.02 |
| Cancelled | (2,268) |) \$33.85 |
| Increase due to acquisition | 475 | \$2.25 |
| December 2, 2011 | 34,802 | \$31.47 |
| Granted | 57 | \$32.19 |
| Exercised | (6,754) |) \$23.61 |
| Cancelled | (4,692) |) \$33.07 |
| Increase due to acquisition | 1,104 | \$3.23 |
| November 30, 2012 | 24,517 | \$32.09 |
| Granted | 25 | \$45.03 |
| Exercised | (15,872) |) \$32.15 |
| Cancelled | (1,584) |) \$37.37 |
| Increase due to acquisition | 273 | \$6.82 |
| November 29, 2013 | 7,359 | \$29.93 |

The weighted average fair values of options granted during fiscal 2013, 2012 and 2011 were \$8.64, \$8.50 and \$8.82, respectively.

The total intrinsic value of options exercised during fiscal 2013, 2012 and 2011 was \$181.8 million, \$62.6 million and \$59.4 million, respectively. The intrinsic value is calculated as the difference between the market value on the date of exercise and the exercise price of the shares.

| Options exercisable | 26,622 | \$32.31 | 2.56 | \$42.1 |

The intrinsic value is calculated as the difference between the market value as of the end of the fiscal period and ^(*) the exercise price of the shares. As reported by the NASDAQ Global Select Market, the market values as of November 29, 2013, November 30, 2012 and December 2, 2011 were \$56.78, \$34.61 and \$27.11, respectively.

All stock options granted to current executive officers are made after a review by and with the approval of the Executive Compensation Committee of the Board of Directors.

Grants to Non-Employee Directors

The Directors Plan (and starting in fiscal 2008, the 2003 Plan) provides for the granting of nonqualified stock options to non-employee directors. Initial equity grant to a new non-employee director is a restricted stock unit award having an aggregate value of \$0.5 million based on the average stock price over the 30 calendar days ending on the day before the date of grant. The initial equity award vests over 2 years, 50% on the day preceding each of our next 2 annual meetings. For all periods presented, a non-employee director could elect to receive the annual equity grant as either 100% options, 100% restricted stock units or 50% of each and shall have an aggregate value of \$0.2 million as based on the average stock price over the 30 calendar days ending on the day before the date of grant. The target grant value converted to stock options is based on a 1:3 conversion of restricted stock units to stock options. Annual equity awards vest 100% on the day preceding the next annual meeting. Options granted have a seven-year term. The exercise price of the options that are issued is equal to the fair market value of our common stock on the date of grant. Options granted to directors for fiscal 2013, 2012 and 2011 were as follows (shares in thousands):

| | 2013 | 2012 | 2011 |
|---------------------------------------|---------|---------|---------|
| Options granted to existing directors | 25 | 43 | 85 |
| Exercise price | \$45.03 | \$33.18 | \$33.23 |

Restricted stock units granted to directors for fiscal 2013, 2012 and 2011 were as follows (in thousands):

| | 2013 | 2012 | 2011 |
|--|------|------|------|
| Restricted stock units granted to existing directors | 36 | 42 | 28 |

| | | | |

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Compensation Costs

With the exception of performance shares, stock-based compensation expense is recognized on a straight-line basis over the requisite service period of the entire award, which is generally the vesting period. For performance shares, expense is recognized on a straight-line basis over the requisite service period for each vesting tranche of the award. As of November 29, 2013, there was \$428.9 million of unrecognized compensation cost, adjusted for estimated forfeitures, related to non-vested stock-based awards which will be recognized over a weighted average period of 1.9 years. Total unrecognized compensation cost will be adjusted for future changes in estimated forfeitures.

Total stock-based compensation costs that have been included in our Consolidated Statements of Income for fiscal 2013, 2012 and 2011 were as follows (in thousands):

| | Income Statement Classifications | | | | | Total ⁽¹⁾ |
|---|----------------------------------|--------------------------------------|--------------------------|---------------------|----------------------------|----------------------|
| | Cost of Revenue—Subscription | Cost of Revenue—Services and Support | Research and Development | Sales and Marketing | General and Administrative | |
| Option Grants and Stock Purchase Rights | | | | | | |
| 2013 | \$2,059 | \$3,413 | \$ 18,188 | \$21,283 | \$ 8,410 | \$53,353 |
| 2012 | \$2,840 | \$4,130 | \$ 24,823 | \$31,379 | \$ 15,455 | \$78,627 |
| 2011 | \$936 | \$4,716 | \$ 28,132 | \$31,754 | \$ 20,605 | \$86,143 |
| Restricted Stock and Performance Share Awards | | | | | | |
| 2013 | \$5,052 | \$6,961 | \$ 102,464 | \$101,423 | \$ 59,734 | \$275,634 |
| 2012 | \$3,100 | \$9,461 | \$ 83,349 | \$76,359 | \$ 47,606 | \$219,875 |
| 2011 | \$1,521 | \$8,607 | \$ 79,427 | \$68,485 | \$ 41,920 | \$199,960 |

(1) During fiscal 2013, 2012 and 2011, we recorded tax benefits of \$70.7 million, \$61.5 million and \$58.3 million, respectively.

NOTE 13. STOCKHOLDERS' EQUITY

Comprehensive Income

The following table sets forth the components of accumulated other comprehensive income and activity, net of related taxes, for fiscal 2013 (in thousands):

| | November 30, 2012 | Increase / Decrease | Reclassification Adjustments | November 29, 2013 |
|--|-------------------|---------------------|------------------------------|-------------------|
| Net unrealized gains on available-for-sale securities: | | | | |

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following table sets forth the taxes related to each component of other comprehensive income for fiscal 2013, 2012 and 2011 (in thousands):

| | 2013 | 2012 | 2011 |
|--|---------|----------|-----------|
| Available-for-sale securities: | | | |
| Unrealized gains / losses on available-for-sale securities | \$ 169 | \$(686) |) \$20 |
| Reclassification adjustments | (2 |) (1 |) 185 |
| Subtotal available-for-sale securities | 167 | (687 |) 205 |
| Derivatives designated as hedging instruments: | | | |
| Unrealized gains on derivative instruments* | — | — | — |
| Reclassification adjustments* | — | — | — |
| Subtotal derivatives designated as hedging instruments | — | — | — |
| Foreign currency translation adjustments | 2,789 | (1,314 |) 2,208 |
| Total taxes, other comprehensive income | \$2,956 | \$(2,001 |) \$2,413 |

(*) Taxes related to derivative instruments were zero for all fiscal years based on the tax jurisdiction where the derivative instruments were executed.

Stock Repurchase Program

To facilitate our stock repurchase program, designed to return value to our stockholders and minimize dilution from stock issuances, we repurchase shares in the open market and also enter into structured repurchase agreements with third-parties.

We currently have authority granted by our Board of Directors to repurchase up to \$2.0 billion in common stock through the end of fiscal 2015. The new stock repurchase program approved by our Board of Directors is similar to our previous \$1.6 billion stock repurchase program authorized by the Board of Directors in fiscal 2010.

During fiscal 2013, 2012 and 2011, we entered into several structured stock repurchase agreements with large financial institutions, whereupon we provided them with prepayments totaling \$1.1 billion, \$405.0 million and \$695.0 million, respectively. The \$1.1 billion prepayments during fiscal 2013 were under the \$2.0 billion stock repurchase authority. Of the \$405.0 million of prepayments during fiscal 2012, \$100.0 million were under the \$2.0 billion stock repurchase program and the remaining \$305.0 million were under our previous \$1.6 billion stock repurchase authority. The \$695.0 million of prepayments during fiscal 2011 were under the \$1.6 billion stock repurchase authority. We enter into these agreements in order to take advantage of repurchasing shares at a guaranteed discount to the Volume Weighted Average Price ("VWAP") of our common stock over a specified period of time. We only enter into such transactions when the discount that we receive is higher than the foregone return on our cash prepayments to the financial institutions. There were no explicit commissions or fees on these structured repurchases. Under the terms of the agreements, there is no requirement for the financial institutions to return any portion of the prepayment to us. The financial institutions agree to deliver shares to us at monthly intervals during the contract term. The parameters used to calculate the number of shares deliverable are: the total notional amount of the contract, the number of trading days in the contract, the number of trading days in the interval and the average VWAP of our stock during the interval less the agreed upon discount. During fiscal 2013, we repurchased approximately 21.6 million shares at an average price of \$46.47 through structured repurchase agreements entered into during fiscal 2013 and fiscal 2012. During fiscal 2012, we repurchased approximately 11.5 million shares at an average price of \$32.29 through structured repurchase agreements entered into during fiscal 2012. During fiscal 2011, we repurchased approximately 21.8 million shares at an average price per share of \$31.81 through structured repurchase agreements entered into during fiscal 2011.

For fiscal 2013, 2012 and 2011, the prepayments were classified as treasury stock on our Consolidated Balance Sheets at the payment date, though only shares physically delivered to us by November 29, 2013, November 30, 2012 and

December 2, 2011 were excluded from the computation of earnings per share. As of November 29, 2013, \$129.2 million of prepayments remained under the agreement.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Subsequent to November 29, 2013, as part of our \$2.0 billion stock repurchase program, we entered into a structured stock repurchase agreement with a large financial institution whereupon we provided them with a prepayment of \$200.0 million. This amount will be classified as treasury stock on our Consolidated Balance Sheets. Upon completion of the \$200.0 million stock repurchase agreement, \$600.0 million remains under our current authority.

NOTE 14. NET INCOME PER SHARE

Basic net income per share is computed using the weighted average number of common shares outstanding for the period, excluding unvested restricted stock. Diluted net income per share is based upon the weighted average common shares outstanding for the period plus dilutive potential common shares, including unvested restricted stock and stock options using the treasury stock method.

The following table sets forth the computation of basic and diluted net income per share for fiscal 2013, 2012 and 2011 (in thousands, except per share data):

| | 2013 | 2012 | 2011 |
|--|-----------|-----------|-----------|
| Net income | \$289,985 | \$832,775 | \$832,847 |
| Shares used to compute basic net income per share | 501,372 | 494,731 | 497,469 |
| Dilutive potential common shares: | | | |
| Unvested restricted stock and performance share awards | 8,736 | 7,624 | 4,214 |
| Stock options | 3,368 | 366 | 2,238 |
| Shares used to compute diluted net income per share | 513,476 | 502,721 | 503,921 |
| Basic net income per share | \$0.58 | \$1.68 | \$1.67 |
| Diluted net income per share | \$0.56 | \$1.66 | \$1.65 |

For fiscal 2013, options to purchase shares of common stock with exercise prices greater than the average fair market value of our stock of \$45.08 were not included in the calculation because the effect would have been anti-dilutive. The number of shares of common stock under these options was immaterial. For fiscal 2012 and 2011 options to purchase approximately 19.4 million and 27.1 million shares, respectively, of common stock with exercise prices greater than the annual average fair market value of our stock of \$31.98 and \$30.27, respectively, were not included in the calculation because the effect would have been anti-dilutive.

NOTE 15. COMMITMENTS AND CONTINGENCIES

Lease Commitments

We lease certain of our facilities and some of our equipment under non-cancellable operating lease arrangements that expire at various dates through 2028. We also have one land lease that expires in 2091. Rent expense includes base contractual rent and variable costs such as building expenses, utilities, taxes, insurance and equipment rental. Rent expense and sublease income for these leases for fiscal 2013, 2012 and 2011 were as follows (in thousands):

| | 2013 | 2012 | 2011 |
|-----------------------|-----------|-----------|-----------|
| Rent expense | \$118,976 | \$105,809 | \$111,574 |
| Less: sublease income | 3,057 | 2,330 | 3,211 |
| Net rent expense | \$115,919 | \$103,479 | \$108,363 |

We occupy three office buildings in San Jose, California where our corporate headquarters are located. We reference these office buildings as the Almaden Tower and the East and West Towers.

The lease agreements for the East and West Towers and the Almaden Tower are effective through August 2014 and March 2017, respectively. We are the investors in the lease receivables related to these leases for the East and West Towers and the Almaden Tower in the amount of \$126.8 million and \$80.4 million, respectively, which is recorded as investment in lease receivables on our Consolidated Balance Sheets. As of November 29, 2013, the carrying value of the lease receivables related to the towers approximated fair value. Under the agreement for the East and West Towers and the agreement for the Almaden Tower, we have the option to purchase the buildings at any time during the lease term for approximately \$143.2 million and \$103.6 million,

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

respectively. The residual value guarantees under the East and West Towers and the Almaden Tower obligations are \$126.8 million and \$89.4 million, respectively. If we purchase the properties, the investments in the lease receivables may be credited against the purchase price.

These two leases are both subject to standard covenants including certain financial ratios on the Almaden Tower lease that are reported to the lessors quarterly. In August 2009, we were required to obtain a standby letter of credit on the East and West Tower lease for approximately \$16.6 million which enabled us to secure a lower interest rate and reduce the number of covenants. As defined in the lease agreement, the standby letter of credit primarily represents the lease investment equity balance which is callable in the event of default. As of November 29, 2013, we were in compliance with all of the covenants. In the case of a default, the lessor may demand we purchase the buildings for an amount equal to the lease balance, or require that we remarket or relinquish the buildings. If we choose to remarket or are required to do so upon relinquishing the buildings, we are bound to arrange the sale of the buildings to an unrelated party and will be required to pay the lessor any shortfall between the net remarketing proceeds and the lease balance, up to the residual value guarantee amount less our investment in the lease receivables. Both leases qualify for operating lease accounting treatment and, as such, the buildings and the related obligations are not included in our Consolidated Balance Sheets.

See Note 16 for discussion of our capital lease obligation.

Unconditional Purchase Obligations

Our purchase obligations consist of agreements to purchase goods and services entered into in the ordinary course of business.

The following table summarizes our non-cancellable unconditional purchase obligations, operating leases and capital leases for each of the next five years and thereafter as of November 29, 2013 (in thousands):

| Fiscal Year | Purchase Obligations | Operating Leases | | Capital Leases |
|----------------|-------------------------|--|---|--|
| | | Future Minimum Lease Payments | Future Minimum Sublease Income | Future Minimum Lease Payments |
| 2014 | \$390,758 | \$48,360 | \$1,147 | \$14,892 |
| 2015 | 45,654 | 36,270 | 1,345 | 3,280 |
| 2016 | 35,137 | 29,377 | 1,481 | — |
| 2017 | 2,030 | 23,991 | 1,441 | — |
| 2018 | 14,736 | 22,172 | 1,019 | — |
| Thereafter | 10,000 | 63,058 | 2,700 | — |
| Total | \$498,315 | \$223,228 | \$9,133 | \$18,172 |
| Less: interest | | | | (227) |
| Total | | | | \$17,945 |

The table above includes operating lease commitments related to our restructured facilities. See Note 10 for information regarding our restructuring charges.

Guarantees

The lease agreements for our corporate headquarters provide for residual value guarantees as noted above. The fair value of a residual value guarantee in lease agreements entered into after December 31, 2002, must be recognized as a liability on our Consolidated Balance Sheets. As such, we recognized \$5.2 million and \$3.0 million in liabilities, related to the extended East and West Towers and Almaden Tower leases, respectively. These liabilities were recorded in other long-term liabilities with the offsetting entry recorded as prepaid rent in other assets. The balance was amortized to our Consolidated Statements of Income over the life of the original leases. As of November 29, 2013

there was no remaining balance of the unamortized portion of the fair value of the residual value guarantees, for either lease, remaining on our Consolidated Balance Sheets.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Royalties

We have royalty commitments associated with the shipment and licensing of certain products. Royalty expense is generally based on a dollar amount per unit shipped or a percentage of the underlying revenue. Royalty expense, which was recorded under our cost of products revenue on our Consolidated Statements of Income, was approximately \$40.2 million, \$29.6 million and \$29.8 million in fiscal 2013, 2012 and 2011, respectively.

Indemnifications

In the ordinary course of business, we provide indemnifications of varying scope to customers against claims of intellectual property infringement made by third parties arising from the use of our products and from time to time, we are subject to claims by our customers under these indemnification provisions. Historically, costs related to these indemnification provisions have not been significant and we are unable to estimate the maximum potential impact of these indemnification provisions on our future results of operations.

To the extent permitted under Delaware law, we have agreements whereby we indemnify our officers and directors for certain events or occurrences while the officer or director is or was serving at our request in such capacity. The indemnification period covers all pertinent events and occurrences during the officer's or director's lifetime. The maximum potential amount of future payments we could be required to make under these indemnification agreements is unlimited; however, we have director and officer insurance coverage that reduces our exposure and enables us to recover a portion of any future amounts paid. We believe the estimated fair value of these indemnification agreements in excess of applicable insurance coverage is minimal.

Legal Proceedings

In connection with disputes relating to the validity or alleged infringement of third-party intellectual property rights, including patent rights, we have been, are currently and may in the future be subject to claims, negotiations or complex, protracted litigation. Intellectual property disputes and litigation may be very costly and can be disruptive to our business operations by diverting the attention and energies of management and key technical personnel. Although we have successfully defended or resolved past litigation and disputes, we may not prevail in any ongoing or future litigation and disputes. Third-party intellectual property disputes could subject us to significant liabilities, require us to enter into royalty and licensing arrangements on unfavorable terms, prevent us from licensing certain of our products or offering certain of our services, subject us to injunctions restricting our sale of products or services, cause severe disruptions to our operations or the markets in which we compete, or require us to satisfy indemnification commitments with our customers including contractual provisions under various license arrangements and service agreements.

Between May 4, 2011 and July 14, 2011, five putative class action lawsuits were filed in Santa Clara Superior Court and Alameda Superior Court in California. On September 12, 2011, the cases were consolidated into In Re High-Tech Employee Antitrust Litigation ("HTEAL") pending in the United States District Court for the Northern District of California, San Jose Division. In the consolidated complaint, Plaintiffs alleged that Adobe, along with Apple, Google, Intel, Intuit, Lucas Films and Pixar, agreed not to recruit each other's employees in violation of Federal and state antitrust laws. Plaintiffs claim the alleged agreements suppressed employee compensation and deprived employees of career opportunities. Plaintiffs seek injunctive relief, monetary damages, treble damages, costs and attorneys fees. All defendants deny the allegations and that they engaged in any wrongdoing of any kind. On October 24, 2013, the court certified a class of all persons who worked in the technical, creative, and/or research and development fields on a salaried basis in the United States for one or more of the following: (a) Apple from March 2005 through December 2009; (b) Adobe from May 2005 through December 2009; (c) Google from March 2005 through December 2009; (d) Intel from March 2005 through December 2009; (e) Intuit from June 2007 through December 2009; (f) Lucasfilm from January 2005 through December 2009; or (g) Pixar from January 2005 through December 2009, excluding retail employees, corporate officers, members of the boards of directors, and senior executives of all defendants. We dispute these claims and intend to vigorously defend ourselves in this matter. As of November 29, 2013, no amounts have

been accrued as a loss is not considered probable or estimable. The trial is currently scheduled to be held in May 2014. In addition to intellectual property disputes and other litigation matters described above, we are subject to legal proceedings, claims and investigations in the ordinary course of business, including claims relating to commercial, employment and other matters. Some of these disputes and legal proceedings may include speculative claims for substantial or indeterminate amounts of damages. We consider all claims on a quarterly basis in accordance with GAAP and based on known facts assess whether potential losses are considered reasonably possible, probable and estimable. Based upon this assessment, we then evaluate disclosure

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

requirements and whether to accrue for such claims in our financial statements. This determination is then reviewed and discussed with our Audit Committee and our independent registered public accounting firm.

We make a provision for a liability when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. These provisions are reviewed at least quarterly and adjusted to reflect the impacts of negotiations, settlements, rulings, advice of legal counsel and other information and events pertaining to a particular case. Unless otherwise specifically disclosed here or in our Notes to Consolidated Financial Statements, we have determined that no provision for liability nor disclosure is required related to any claim against us because: (a) there is not a reasonable possibility that a loss exceeding amounts already recognized (if any) may be incurred with respect to such claim; (b) a reasonably possible loss or range of loss cannot be estimated; or (c) such estimate is immaterial.

All legal costs associated with litigation are expensed as incurred. Litigation is inherently unpredictable. However, we believe that we have valid defenses with respect to the legal matters pending against us. It is possible, nevertheless, that our consolidated financial position, cash flows or results of operations could be negatively affected by an unfavorable resolution of one or more of such proceedings, claims or investigations.

In connection with our anti-piracy efforts, conducted both internally and through organizations such as the Business Software Alliance, from time to time we undertake litigation against alleged copyright infringers. Such lawsuits may lead to counter-claims alleging improper use of litigation or violation of other laws. We believe we have valid defenses with respect to such counter-claims; however, it is possible that our consolidated financial position, cash flows or results of operations could be affected in any particular period by the resolution of one or more of these counter-claims.

NOTE 16. DEBT

Our debt as of November 29, 2013 and November 30, 2012 consisted of the following (in thousands):

| | 2013 | 2012 |
|--|-------------|-------------|
| Notes | \$1,496,028 | \$1,495,312 |
| Capital lease obligations | 17,945 | 12,843 |
| Total debt and capital lease obligations | 1,513,973 | 1,508,155 |
| Less: current portion | 14,676 | 11,217 |
| Debt and capital lease obligations | \$1,499,297 | \$1,496,938 |

Notes

In February 2010, we issued \$600.0 million of 3.25% senior notes due February 1, 2015 (the “2015 Notes”) and \$900.0 million of 4.75% senior notes due February 1, 2020 (the “2020 Notes” and, together with the 2015 Notes, the “Notes”). Our proceeds were approximately \$1.5 billion and were net of an issuance discount of \$6.6 million. The Notes rank equally with our other unsecured and unsubordinated indebtedness. In addition, we incurred issuance costs of approximately \$10.7 million. Both the discount and issuance costs are being amortized to interest expense over the respective terms of the Notes using the effective interest method. The effective interest rate including the discount and issuance costs is 3.45% for the 2015 Notes and 4.92% for the 2020 Notes. Interest is payable semi-annually, in arrears, on February 1 and August 1, commencing on August 1, 2010. During fiscal 2013 interest payments on our Notes totaled \$62.3 million. Based on quoted prices in inactive markets, the fair value of the Notes was approximately \$1.6 billion.

We may redeem the Notes at any time, subject to a make whole premium. In addition, upon the occurrence of certain change of control triggering events, we may be required to repurchase the Notes, at a price equal to 101% of their principal amount, plus accrued and unpaid interest to the date of repurchase. The Notes also include covenants that limit our ability to grant liens on assets and to enter into sale and leaseback transactions, subject to significant allowances. As of November 29, 2013, we were in compliance with all of the covenants.

Credit Agreement

On March 2, 2012, we entered into a five-year \$1.0 billion senior unsecured revolving credit agreement (the “Credit Agreement”), providing for loans to us and certain of our subsidiaries. Pursuant to the terms of the Credit Agreement, we may,

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

subject to the agreement of the applicable lenders, request up to an additional \$500.0 million in commitments, for a maximum aggregate commitment of \$1.5 billion. Loans under the Credit Agreement will bear interest at either (i) the London Interbank Offered Rate ("LIBOR") plus a margin, based on our debt ratings, ranging from 0.795% and 1.30% or (ii) the base rate, which is defined as the highest of (a) the agent's prime rate, (b) the federal funds effective rate plus 0.50% or (c) LIBOR plus 1.00% plus a margin, based on our debt ratings, ranging from 0.00% to 0.30%. Commitment fees are payable quarterly at rates between 0.08% and 0.20% per year also based on our public debt ratings. Subject to certain conditions stated in the Credit Agreement, we and any of our subsidiaries designated as additional borrowers may borrow, prepay and re-borrow amounts under the revolving credit facility at any time during the term of the Credit Agreement.

The Credit Agreement contains customary representations, warranties, affirmative and negative covenants, including a financial covenant, events of default and indemnification provisions in favor of the lenders. The negative covenants include restrictions regarding the incurrence of liens and indebtedness, certain merger and acquisition transactions, dispositions and other matters, all subject to certain exceptions. The financial covenant, based on a quarterly financial test, requires us not to exceed a maximum leverage ratio.

On March 1, 2013, we exercised an option under the Credit Agreement to extend the maturity date of the Credit Agreement by one year to March 2, 2018. The facility will terminate and all amounts owing thereunder will be due and payable on the maturity date unless (a) the commitments are terminated earlier upon the occurrence of certain events, including an event of default, or (b) the maturity date is further extended upon our request, subject to the agreement of the lenders.

As of November 29, 2013, there were no outstanding borrowings under this Credit Agreement and we were in compliance with all covenants.

Capital Lease Obligation

In the first quarter of fiscal 2013, we entered into a sale-leaseback agreement totaling \$25.7 million over a period of 24 months. This transaction was classified as a capital lease obligation and was recorded at fair value. As of November 29, 2013, our capital lease obligations of \$17.9 million includes \$14.7 million of current debt.

NOTE 17. NON-OPERATING INCOME (EXPENSE)

Non-operating income (expense) for fiscal 2013, 2012 and 2011 included the following (in thousands):

| | 2013 | 2012 | 2011 |
|--|------------|-------------|---------------|
| Interest and other income (expense), net: | | | |
| Interest income | \$21,887 | \$24,549 | \$24,506 |
| Foreign exchange gains (losses) | (21,001) |) (31,431 |) (30,226) |
| Realized gains on fixed income investment | 4,090 | 3,152 | 2,012 |
| Realized losses on fixed income investment | (1,077) |) (278 |) (178) |
| Other | 1,042 | 594 | 912 |
| Interest and other income (expense), net | \$4,941 | \$(3,414) |) \$(2,974) |
| Interest expense | \$(67,508) |) \$(67,487 |) \$(66,952) |
| Investment gains (losses), net: | | | |

NOTE 18. INDUSTRY SEGMENT, GEOGRAPHIC INFORMATION AND SIGNIFICANT CUSTOMERS

We report segment information based on the “management” approach. The management approach designates the internal reporting used by management for making decisions and assessing performance as the source of our reportable segments.

Our CEO, the chief operating decision maker, reviews revenue and gross margin information for each of our reportable segments, but does not review operating expenses on a segment by segment basis. In addition, with the exception of goodwill and intangible assets, we do not identify or allocate our assets by the reportable segments. Effective in the first quarter of fiscal 2013, we moved our video server solutions products from our Digital Media segment to our Digital Marketing segment to better align the role of how Adobe can help its customers monetize their video assets with our Digital Marketing solutions. Prior year information in the table below has been updated to reflect this change.

We have the following reportable segments:

Digital Media—Our Digital Media segment provides tools and solutions that enable individuals, small businesses and enterprises to create, publish, promote and monetize their digital content anywhere. Our customers include traditional content creators, web application developers and digital media professionals, as well as their management in marketing departments and agencies, companies and publishers.

Digital Marketing—Our Digital Marketing segment provides solutions and services for how digital advertising and marketing are created, managed, executed, measured and optimized. Our customers include digital marketers, advertisers, publishers, merchandisers, web analysts, chief marketing officers, chief information officer and chief revenue officers.

Print and Publishing—Our Print and Publishing segment addresses market opportunities ranging from the diverse authoring and publishing needs of technical and business publishing to our legacy type and OEM printing businesses. Our segment results for fiscal 2013, 2012 and 2011 were as follows (dollars in thousands):

| | Digital Media | Digital Marketing | Print and Publishing | Total | |
|---|---------------|-------------------|----------------------|-------------|---|
| Fiscal 2013 | | | | | |
| Revenue | \$2,625,913 | \$1,228,868 | \$200,459 | \$4,055,240 | |
| Cost of revenue | 170,788 | 404,804 | 10,965 | 586,557 | |
| Gross profit | \$2,455,125 | \$824,064 | \$189,494 | \$3,468,683 | |
| Gross profit as a percentage of revenue | 93 | % 67 | % 95 | % 86 | % |
| Fiscal 2012 | | | | | |
| Revenue | \$3,101,864 | \$1,085,042 | \$216,771 | \$4,403,677 | |

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders

Adobe Systems Incorporated:

We have audited the accompanying consolidated balance sheets of Adobe Systems Incorporated and subsidiaries (the “Company”) as of November 29, 2013 and November 30, 2012, and the related consolidated statements of income, comprehensive income, stockholders’ equity, and cash flows for each of the years in the three-year period ended November 29, 2013. We also have audited Adobe Systems Incorporated’s internal control over financial reporting as of November 29, 2013, based on criteria established in Internal Control - Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”). Adobe Systems Incorporated’s management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Annual Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express an opinion on these consolidated financial statements and an opinion on the Company’s internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Adobe Systems Incorporated and subsidiaries as of November 29, 2013 and November 30, 2012, and the results of their operations and their cash flows for each of the years in the three-year period ended November 29, 2013, in conformity with U.S. generally accepted accounting principles. Also in our opinion, Adobe Systems Incorporated maintained, in all material respects, effective internal control over financial reporting as of November 29, 2013, based on criteria established in Internal Control - Integrated Framework (1992) issued by the COSO.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Our management has evaluated, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures as of November 29, 2013. Based on their evaluation as of November 29, 2013, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) were effective at the reasonable assurance level to ensure that the information required to be disclosed by us in this Annual Report on Form 10-K was (i) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and regulations and (ii) accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

Our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our disclosure controls and procedures or our internal controls over financial reporting will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within Adobe have been detected.

Management's Annual Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934, as amended). Our management assessed the effectiveness of our internal control over financial reporting as of November 29, 2013. In making this assessment, our management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in Internal Control-Integrated Framework. Our management has concluded that, as of November 29, 2013, our internal control over financial reporting is effective based on these criteria.

KPMG LLP, the independent registered public accounting firm that audited our financial statements included in this Annual Report on Form 10-K, has issued an attestation report on our internal control over financial reporting, which is included herein.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the quarter ended November 29, 2013 that have materially affected, or are reasonably likely to materially affect our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information required by this Item 10 of Form 10-K that is found in our 2014 Proxy Statement to be filed with the SEC in connection with the solicitation of proxies for the Company's 2014 Annual Meeting of Stockholders ("2014 Proxy Statement") is incorporated by reference to our 2014 Proxy Statement. The 2014 Proxy Statement will be filed with the SEC within 120 days after the end of the fiscal year to which this report relates. For information with respect to our executive officers, see "Executive Officers" at the end of Part I, Item 1 of this report.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this Item 11 of Form 10-K is incorporated by reference to our 2014 Proxy Statement.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by this Item 12 of Form 10-K is incorporated by reference to our 2014 Proxy Statement.
