First Citizens BancShares, Inc. and Subsidiaries
Notes to Unaudited Consolidated Financial Statements

Note A
Accounting Policies and Basis of Presentation

First Citizens BancShares, Inc. (BancShares) is a financial holding company organized under the laws of Delaware and conducts operations through its banking subsidiary, First-Citizens Bank & Trust Company (FCB), which is headquartered in Raleigh, North Carolina.

General

These consolidated financial statements and notes are presented in accordance with instructions for Form 10-Q and Article 10 of Regulation S-X and, therefore, do not include all information and notes necessary for a complete presentation of financial position, results of operations and cash flow activity required in accordance with accounting principles generally accepted in the United States of America (GAAP). In the opinion of management, all normal recurring adjustments necessary for a fair presentation of the consolidated financial position and consolidated results of operations have been made. The unaudited interim consolidated financial statements included in this Form 10-Q should be read in conjunction with the consolidated financial statements and footnotes included in BancShares' Annual Report on Form 10-K for the year ended December 31, 2013.

Reclassifications

In certain instances, amounts reported in prior years' consolidated financial statements have been reclassified to conform to the current financial statement presentation. Such reclassifications had no effect on previously reported cash flows, shareholders' equity or net income.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates, and different assumptions in the application of these policies could result in material changes in BancShares' consolidated financial position, the consolidated results of its operations or related disclosures. Material estimates that are particularly susceptible to significant change include the determination of the allowance for loan and lease losses; determination of the fair value of financial instruments; pension plan assumptions; cash flow estimates on acquired loans; the receivable from and payable to the FDIC for loss share agreements; purchase accounting-related adjustments; and income tax assets, liabilities and expense.

Recent Accounting Pronouncements
Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) 2014-04, “Receivables-Troubled Debt Restructurings by Creditors (Subtopic 310-40)”
This ASU clarifies that an in-substance repossession or foreclosure occurs, and a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either (1) the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure or (2) the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. Additionally, the amendments require interim and annual disclosure of both (1) the amount of foreclosed residential real estate property held by the creditor

and (2) the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction.

The amendments in this ASU are effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. We will adopt the guidance effective the first quarter of 2015, and we do not anticipate any effect on our consolidated financial position or consolidated results of operations as a result of adoption.

Table of Contents

FASB ASU 2013-11, “Income Taxes (Topic 740)”
This ASU states that an unrecognized tax benefit, or a portion of an unrecognized tax benefit, should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, except as follows: to the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position or the tax law of the applicable jurisdiction does not require BancShares to use, and BancShares does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. The assessment of whether a deferred tax asset is available is based on the unrecognized tax benefit and deferred tax asset that exist at the reporting date and should be made presuming disallowance of the tax position at the reporting date.

The provisions of this ASU are effective for fiscal years, and interim periods within those years, beginning after December 15, 2013. BancShares adopted the guidance effective first quarter of 2014. The initial adoption had no effect on our consolidated financial position or consolidated results of operations.
FASB ASU 2013-04, “Liabilities”
This ASU provides guidance for the recognition, measurement, and disclosure of obligations resulting from joint and several liability arrangements for which the total amount of the obligation within the scope of this ASU is fixed at the reporting date, except for obligations addressed within existing guidance in GAAP.
The amendments in this update are effective for fiscal years beginning after December 31, 2013. BancShares adopted the guidance effective first quarter of 2014. The initial adoption did not have any effect on our consolidated financial position or consolidated results of operations.

Note B
Business Combinations

On January 1, 2014, FCB completed its merger with 1st Financial Services Corporation (1st Financial) of Hendersonville, NC and its wholly-owned subsidiary, Mountain 1st Bank & Trust Company (Mountain 1st). The merger allows FCB to expand its presence in Western North Carolina. Mountain 1st had twelve branches located in Asheville, Brevard, Columbus, Etowah, Fletcher, Forest City, Hendersonville, Hickory, Marion, Shelby and Waynesville. FCB requested and received approval from the North Carolina Commissioner of Banks and the FDIC to close seven Mountain 1st branches due to their proximity to legacy FCB branches. Customers have been notified, and the 90-day waiting period will expire on May 1. FCB anticipates closing the branches in Asheville, Brevard, Fletcher, Forest City, Hendersonville, Hickory and Marion sometime in May. All customer relationships assigned to those branches will be transferred to the nearest FCB branch.

FCB paid $10.0 million to acquire 1st Financial, including payments of $8.0 million to the U.S. Treasury to acquire and subsequently retire1st Financial's Troubled Asset Relief Program (TARP) obligation and $2.0 million paid to the shareholders of 1st Financial. As a result of the merger, FCB recorded $24.5 million in goodwill and $3.8 million in core deposit intangibles.

The 1st Financial transaction was accounted for under the acquisition method of accounting, and the purchased assets, assumed liabilities and identifiable intangible assets were recorded at their acquisition date estimated fair values. Fair values are subject to refinement for up to one year after the closing date of the transaction as additional information regarding closing date fair values becomes available.

Table of Contents

The following table provides the carrying value of acquired assets and assumed liabilities, as recorded by 1st Financial, the fair value adjustments calculated at the time of the merger and the resulting fair value recorded by FCB.

(Dollars in thousands)	January 1, 2014 As recorded by 1st Financial	Fair value adjustments	As recorded by FCB
Assets			
Cash and cash equivalents	$28,194	$—	$28,194
Investment securities	246,890	(9,452)	237,438
Loans held for sale	1,183	—	1,183
Restricted equity securities	3,105	671	3,776
Loans	338,170	(21,843)	316,327
Less: allowance for loan losses	(7,796)	7,796	—
Premises and equipment	3,871	(1,185)	2,686
Other real estate owned	12,896	(1,305)	11,591
Intangible asset	—	3,780	3,780
Other assets	16,811	(465)	16,346
Total assets acquired	$643,324	$(22,003)	$621,321
Liabilities			
Deposits:			
Noninterest-bearing	$152,444	$—	$152,444
Interest-bearing	477,881	1,546	479,427
Total deposits	630,325	1,546	631,871
Short-term borrowings	406	—	406
Other liabilities	3,392	167	3,559
Total liabilities assumed	$634,123	$1,713	635,836
Fair value of net liabilities assumed			14,515
Cash paid to shareholders			2,000
Cash paid to acquire TARP securities			8,000
Goodwill recorded for 1st Financial			$24,515

Goodwill recorded for 1st Financial represents future revenues to be derived from the existing customer base, including efficiencies that will result from combining operations and other non-identifiable intangible assets. The 1st Financial transaction is a taxable asset acquisition, and goodwill resulting from the transaction is deductible for income tax purposes.

Merger costs related to the 1st Financial transaction are estimated to be between $6.0 million and $7.0 million. Revenue generated from 1st Financial was approximately $6.9 million for the first quarter of 2014.

All loans resulting from the 1st Financial transaction are accounted for under the expected cash flow method (ASC 310-30).

For loans acquired from 1st Financial, the contractually required payments including principal and interest, cash flows expected to be collected and fair values as of the merger date were:

(Dollars in thousands)	January 1, 2014
Contractually required payments	$414,233
Cash flows expected to be collected	400,622
Fair value at acquisition date	316,327

Table of Contents

The recorded fair values of loans acquired in the 1st Financial transaction as of the merger date were as follows:

(Dollars in thousands)	January 1, 2014
Commercial:	
Construction and land development	$41,516
Commercial mortgage	123,925
Other commercial real estate	6,698
Commercial and industrial	29,126
Total commercial loans	201,265
Noncommercial:	
Residential mortgage	113,177
Consumer	1,885
Total noncommercial loans	115,062
Total loans acquired from 1st Financial	$316,327

	Cost	Gross unrealized gains	Gross unrealized losses	Fair value
Mortgage-backed securities	$907	$67	$—	$974

Investments in mortgage-backed securities primarily represent securities issued by the Government National Mortgage Association, Federal National Mortgage Association and Federal Home Loan Mortgage Corporation. Other investments include a subordinated debenture investment in another financial institution.

The following table provides the amortized cost and fair value by contractual maturity. Expected maturities will differ from contractual maturities because borrowers and issuers may have the right to call or prepay obligations with or

without prepayment penalties. Repayments of mortgage-backed securities are dependent on the repayments of the underlying loan balances. Equity securities do not have a stated maturity date.

Table of Contents

	March 31, 2014		December 31, 2013	
(Dollars in thousands)	Cost	Fair value	Cost	Fair value
Investment securities available for sale				
Amortizing securities maturing in:				
One year or less	$829,091	$829,997	$839,956	$840,883
One through five years	2,258,570	2,257,014	2,077,539	2,077,800
Mortgage-backed securities	2,592,766	2,566,666	2,486,297	2,446,873
Equity securities	543	22,560	543	22,147

Total	$3,104,700	$43,715	$56,830	$1,105	$3,161,530	$44,820

Investment securities with an aggregate fair value of $23.6 million and $56.8 million have had continuous unrealized losses for more than 12 months as of March 31, 2014 and December 31, 2013, with an aggregate unrealized loss of $0.8 million and $1.1 million, respectively. As of March 31, 2014, all 16 of these investments are mortgage-backed securities. None of the unrealized losses identified as of March 31, 2014 or December 31, 2013 relate to the marketability of the securities or the issuer’s ability to honor redemption obligations. For all periods presented, BancShares had the ability and intent to retain these securities for a

Table of Contents

period of time sufficient to recover all unrealized losses. Therefore, none of the securities were deemed to be other than temporarily impaired.
Investment securities having an aggregate carrying value of $2.78 billion at March 31, 2014 and $2.75 billion at December 31, 2013 were pledged as collateral to secure public funds on deposit and certain short-term borrowings, and for other purposes as required by law.

Note D
Loans and Leases
Loans and leases outstanding, by class, include the following as of the dates indicated:

(Dollars in thousands)	March 31, 2014	December 31, 2013
Acquired loans		
Commercial:		
Construction and land development	$106,670	$78,915
Commercial mortgage	728,872	642,891
Other commercial real estate	47,826	41,381
Commercial and industrial	38,838	17,254
Other	870	866

Total originated loans and leases	12,200,226	12,104,298
Total loans and leases	$13,471,044	$13,133,724

Table of Contents

At March 31, 2014, $962.4 million in acquired loans were covered under loss share agreements, compared to $1.03 billion at December 31, 2013. The remaining acquired loans as of March 31, 2014 are from the 1st Financial merger.

At March 31, 2014, $2.57 billion in originated loans were pledged to secure debt obligations, compared to $2.56 billion at December 31, 2013.

Credit quality indicators

Loans and leases are monitored for credit quality on a recurring basis. The credit quality indicators used are dependent on the portfolio segment to which the loan relates. Originated commercial loans and leases, originated noncommercial loans and leases and acquired loans have different credit quality indicators as a result of the unique characteristics relative to each loan segment being evaluated.

The credit quality indicators for commercial loans and leases are developed through a review of individual borrowers on an ongoing basis. Each commercial loan is evaluated annually with more frequent evaluation of more severely criticized loans or leases. The credit quality indicators for noncommercial loans are based on the delinquency status of the borrower. As the borrower becomes more delinquent, the likelihood of loss increases. Acquired loans are bifurcated into commercial and noncommercial segments and credit quality indicators are assigned in the same manner as the originated portfolio. The indicators represent the rating for loans or leases as of the date presented based on the most recent assessment performed. These credit quality indicators are defined as follows:

Pass – A pass rated asset is one in which repayment is considered highly likely and there are no observable weaknesses in the asset. Such an asset does not meet any of the characteristics for adverse classification.

Special mention – A special mention asset has potential weaknesses that deserve management’s close attention. If left uncorrected, such potential weaknesses may result in deterioration of the repayment prospects or collateral position at some future date. Special mention assets are not adversely classified and do not warrant adverse classification.

Substandard – A substandard asset is inadequately protected by the current net worth and paying capacity of the borrower or of the collateral pledged, if any. Assets classified as substandard generally have a well-defined weakness, or weaknesses, that jeopardize the liquidation of the debt. These assets are characterized by the distinct possibility of loss if the deficiencies are not corrected.

Doubtful – An asset classified as doubtful has all the weaknesses inherent in an asset classified substandard with the added characteristic that the weaknesses make collection or liquidation in full highly questionable and improbable on the basis of currently existing facts, conditions and values.

Loss – Assets classified as loss are considered uncollectible and of such little value that it is inappropriate to be carried as an asset. This classification is not necessarily equivalent to no potential for recovery or salvage value, but rather that it is not appropriate to defer a full charge-off even though partial recovery may be effected in the future.

Ungraded – Ungraded loans represent loans that are not included in the individual credit grading process due to their relatively small balances or borrower type. The majority of originated, ungraded loans at March 31, 2014 and December 31, 2013 relate to business credit cards. Business credit card loans are subject to automatic charge-off when they become 120 days past due in the same manner as unsecured consumer lines of credit. The remaining balance is comprised of a small amount of commercial mortgage loans and other smaller balance consumer loans. Prior to March 31, 2014, ungraded loans also included tobacco buyout loans classified as commercial and industrial loans. Final payment from the Commodity Credit Corporation was received during January 2014 for tobacco buyout loans

held by FCB. As of March 31, 2014, ungraded also includes $122.2 million of loans resulting from the 1st Financial merger.

Table of Contents

The aging of the outstanding loans and leases, by class, at March 31, 2014 and December 31, 2013 (excluding loans and leases acquired with deteriorated credit quality) is provided in the table below.

The calculation of days past due begins on the day after payment is due and includes all days through which all required interest or principal has not been paid. Loans and leases 30 days or less past due are considered current as various grace periods allow borrowers to make payments within a stated period after the due date and still remain in compliance with the loan agreement.

	March 31, 2014					
(Dollars in thousands)	30-59 days past due	60-89 days past due	90 days or greater	Total past due	Current	Total loans and leases

Total originated loans and leases	$46,952	$9,471	$53,170	$8,784

Acquired Loans

The following table provides changes in the recorded investment of acquired loans during the three months ended March 31, 2014 and March 31, 2013:

(Dollars in thousands)	2014	2013
Balance at January 1	$1,029,426	$2,362,152
Fair value of acquired loans	316,327	—
Accretion	30,200	79,886
Payments received and other changes, net	(105,135)	(258,169)
Balance at March 31	$1,270,818	$2,183,869
Outstanding principal balance at March 31	$1,727,492	$3,618,722

The recorded investment of loans on the cost recovery method was $52.1 million at March 31, 2014 and $28.5 million at December 31, 2013. This increase is primarily driven by one large acquired loan relationship that was moved to cost recovery during the quarter. The cost recovery method is applied to loans when the timing of future cash flows is not reasonably estimable due to borrower nonperformance or uncertainty in the timing and amount of ultimate disposition of the asset.

The following table documents changes to the amount of accretable yield for the first three months of 2014 and 2013.

(Dollars in thousands)	2014	2013
Balance at January 1	$439,990	$539,564
Additions	84,295	—
Accretion	(30,200)	(79,886)
Reclassifications from (to) nonaccretable difference	6,048	(11,653)
Changes in expected cash flows that do not affect nonaccretable difference	(9,888)	37,910

Balance at March 31	$490,245	$485,935

Recoveries	368	8	10	369	—	—	39	71	56	630	—	1,5
Balance at March 31	$4,311	$72,817	$1,915	$22,963	$3,543	$1,490	$3,790	$24,499	$1,419	$24,027	$15,772	$17

The provision for construction and land development - commercial totaled $1.9 million for the three months ended March 31, 2014. The March 31, 2014 provision expense was a direct result of increased loans during the quarter. Conversely, the March 31, 2013 credit provision resulted from a decline in the outstanding loan balances as well as the resolution of several individually impaired loans.

The commercial mortgage loan class had a net credit provision of $7.0 million for the three months ended March 31, 2014. The net credit provision was the result of declining loan balances, improvements in the credit risk rating mix

and lower credit default trends within this loan class. Conversely, the March 31, 2013 provision expense was impacted by increased loan balances.

The commercial and industrial loan class had a provision expense of $2.0 million for the three months ended March 31, 2014 reflecting $94.4 million in loan growth for the quarter.

Table of Contents

The following tables present the allowance for originated loan losses and the recorded investment in originated loans, by loan class, based on impairment method as of March 31, 2014 and December 31, 2013:

	March 31, 2014									
(Dollars in thousands)	Construction and land development - commercial	Commercial mortgage	Other commercial real estate	Commercial and industrial	Lease financing	Other	Residential mortgage	Revolving mortgage	Construction and land development - non-commercial	Consumer
Allowance for loan and lease losses:

Revolving mortgage	5,472	25
Construction and land development - noncommercial	866	11
Consumer	1,683	5
Total impaired originated loans and leases	$161,014	$2,123

Table of Contents

Troubled Debt Restructurings

BancShares accounts for certain loan modifications or restructurings as troubled debt restructurings (TDRs). In general, the modification or restructuring of a loan is considered a TDR if, for economic reasons or legal reasons related to a borrower's financial difficulties, a concession is granted to the borrower that creditors would not otherwise grant. Concessions may relate to the contractual interest rate, maturity date, payment structure or other actions. In accordance with GAAP, loans acquired under ASC 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality, are not initially considered to be TDRs, but can be classified as such if a modification is made subsequent to acquisition. Modifications of acquired loans that are part of a pool are not designated as TDRs. The following table provides a summary of total TDRs by accrual status.

	March 31, 2014			December 31, 2013		
(Dollars in thousands)	Accruing	Nonaccruing	Total	Accruing	Nonaccruing	Total
Commercial loans						
Construction and land development - commercial	$ 20,791	$ 1,002	$ 21,793	$ 21,032	$ 1,002	$ 22,034
Commercial mortgage	136,563	25,276	161,839	113,323	23,387	136,710
Other commercial real estate	3,308	933	4,241	3,470	1,150	4,620
Commercial and industrial	8,929	1,180	10,109	9,838	1,142	10,980
Lease	247	146	393	49	—	49
Total commercial TDRs	169,838	28,537	198,375	147,712	26,681	174,393
Noncommercial						
Residential	23,519	3,806	27,325	23,343	3,663	27,006
Revolving mortgage	3,587	—	3,587	3,095	—	3,095
Construction and land development - noncommercial	699	—	699	651	457	1,108
Consumer and other	1,015	—	1,015	1,154	—	1,154
Total noncommercial TDRs	28,820	3,806	32,626	28,243	4,120	32,363
Total TDRs	$ 198,658	$ 32,343	$ 231,001	$ 175,955	$ 30,801	$ 206,756

The following table shows the accrual status of acquired and originated TDRs.

(Dollars in thousands)	March 31, 2014	December 31, 2013
Accruing TDRs:		
Acquired	$ 105,642	$ 90,829
Originated	93,016	85,126
Total accruing TDRs	198,658	175,955
Nonaccruing TDRs:		
Acquired	11,626	11,479
Originated	20,717	19,322
Total nonaccruing TDRs	32,343	30,801
All TDRs:		
Acquired	117,268	102,308
Originated	113,733	104,448
Total TDRs	$ 231,001	$ 206,756

All TDRs are impaired loans. TDRs are, therefore, individually evaluated for impairment on a quarterly basis or more frequently as needed. Impairment is evaluated using one of three approved valuation methodologies: discounted cash flows, market prices or collateral values. Based on the accrual status and credit grade, management determines the most appropriate method to reasonably assess expectations for recovery of the investment. The discounted cash flow method, the collateral value method or a combination of the two aforementioned methods is used internally for TDR impairment analysis. Expected cash flows are discounted at the loan's original effective interest rate.

Table of Contents

Specific valuation allowances are established or partial charge-offs are recorded on TDRs in the amount equal to the difference between the estimated fair value and the loan amount.

The majority of TDRs are included in the special mention, substandard or doubtful grading categories. When a restructured loan subsequently defaults, it is evaluated and downgraded if appropriate. The more severely graded the loan, the lower the estimated expected cash flows and the greater the allowance recorded.

The following tables provide the types of TDRs made during the three months ended March 31, 2014 and March 31, 2013 for originated loans, as well as a summary of originated loans that were modified as a TDR during the 12 months ended March 31, 2014 and March 31, 2013 that subsequently defaulted during the three months ended March 31, 2014 and March 31, 2013. BancShares defines payment default as movement of the TDR to nonaccrual status, which is generally 30 days past due for TDRs, foreclosure or charge-off, whichever occurs first.

Note F
Other Real Estate Owned

The following table explains changes in other real estate owned during the three months ended March 31, 2014 and March 31, 2013.

(Dollars in thousands)	Covered	Noncovered	Total
Balance at December 31, 2012	$102,577	$43,513	$146,090
Additions	29,370	8,763	38,133
Sales	(27,316)	(6,347)	(33,663)
Writedowns	(2,730)	(1,101)	(3,831)
Balance at March 31, 2013	$101,901	$44,828	$146,729
Balance at December 31, 2013	$47,081	$36,898	$83,979
Additions [1]	1,514	14,909	16,423
Sales	(4,512)	(5,854)	(10,366)
Writedowns	(2,228)	(1,449)	(3,677)
Balance at March 31, 2014	$41,855	$44,504	$86,359

[1] Noncovered additions include $11.6 million from the 1st Financial merger.

Note G
FDIC Loss Share Receivable

The following table provides changes in the receivable from the FDIC for the three-month periods ended March 31, 2014 and March 31, 2013.

	Three months ended March 31	
(Dollars in thousands)	2014	2013
Balance at January 1	$93,397	$270,192
Amortization	(17,744)	(26,112)
Cash payments to (from) FDIC	3,490	(42,519)
Post-acquisition adjustments	(4,359)	(5,619)
Balance at March 31	$74,784	$195,942

The receivable from the FDIC for loss share agreements is measured separately from the related covered assets and is recorded at fair value at the acquisition date using projected cash flows based on the expected reimbursements for losses and the applicable loss share percentages. See Note J for information related to FCB's recorded payable to the FDIC for loss share agreements.

Cash payments to (from) the FDIC represent the net impact of loss share loan recoveries, charge-offs and related expenses as calculated and reported in our FDIC loss share certificates. Post-acquisition adjustments represent the net change in loss estimates related to acquired loans and covered OREO as a result of changes in expected cash flows and the allowance for loan and lease losses related to those covered loans. For loans covered by loss share agreements, subsequent decreases in the amount expected to be collected from the borrower or collateral liquidation result in a provision for loan and lease losses, an increase in the allowance for loan and lease losses and a proportional adjustment to the receivable from the FDIC for the estimated amount to be reimbursed. Subsequent increases in the amount expected to be collected from the borrower or collateral liquidation result in the reversal of some or all previously recorded provision for loan and lease losses, a decrease in the related allowance for loan and lease losses

and a proportional adjustment to the receivable from the FDIC, or prospective adjustment to the accretable yield and the related receivable from the FDIC if no provision for loan and lease losses had been recorded previously.

Table of Contents

Note H
Estimated Fair Values

Fair value estimates are intended to represent the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. Where there is no active market for a financial instrument, BancShares has made estimates using discounted cash flow or other valuation techniques. Inputs to these valuation methods are subjective in nature, involve uncertainties and require significant judgment and therefore cannot be determined with precision. Accordingly, the derived fair value estimates presented below are not necessarily indicative of the amounts BancShares could realize in a current market exchange.

Assets and liabilities are recorded at fair value according to a fair value hierarchy comprised of three levels. The levels are based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. The level within the fair value hierarchy for an asset or liability is based on the highest level of input that is significant to the fair value measurement (with level 1 considered highest and level 3 considered lowest). A brief description of each level follows:

- Level 1 values are based on quoted prices for identical instruments in active markets.
- Level 2 values are based on quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-based valuation techniques for which all significant assumptions are observable in the market.
- Level 3 values are generated from model-based techniques that use at least one significant assumption not observable in the market. These unobservable assumptions reflect estimates that market participants would use in pricing the asset or liability. Valuation techniques include the use of discounted cash flow models and similar techniques.

The methodologies used to estimate the fair value of financial assets and financial liabilities are discussed below:

Investment securities available for sale. U.S.Treasury, government agency, mortgage-backed securities and municipal securities are generally measured at fair value using a third party pricing service and are classified as level 2 instruments. Equity securities are measured at fair value using observable closing prices. Management also considers the level of market activity by examining the trade volume of each security. Due to the relatively inactive nature of the markets for the existing equity securities, the inputs used for these equity securities are considered level 2 inputs.

Loans held for sale. Loans held for sale are carried at the lower of aggregate cost or fair value and are, therefore, carried at fair value only when fair value is less than the asset cost. These loans are generally traded in active secondary markets and are priced using current market pricing for similar securities adjusted for servicing, interest rate risk and credit risk. Accordingly, the inputs used to calculate fair value of residential real estate loans are classified as Level 2 inputs.

Loans and leases (acquired and originated). For variable rate loans, carrying value is a reasonable estimate of fair value. For fixed rate loans, fair values are estimated based on discounted future cash flows using the current interest rates at which loans with similar terms would be made to borrowers of similar credit quality. Additional valuation adjustments are made for liquidity and credit risk. The inputs used in the fair value measurements for loans and leases are considered level 3 inputs.

Receivable from the FDIC for loss share agreements. Fair value is estimated based on discounted future cash flows using current discount rates. Due to post-acquisition improvements in expected losses, significant portions of the FDIC receivable will be recovered through amortization of the receivable over the remaining life of the loss share agreement rather than by cash flows from the FDIC. The estimated amounts to be amortized in future periods have no fair value. The inputs used in the fair value measurement for the FDIC receivable are considered level 3 inputs. The

FDIC loss share agreements are not transferable and, accordingly, there is no market for this receivable.

FHLB stock. The carrying amount of FHLB stock is a reasonable estimate of fair value as these securities are not readily marketable and are evaluated for impairment based on the ultimate recoverability of the par value. BancShares considers positive and negative evidence, including the profitability and asset quality of the issuer, dividend payment history and recent redemption experience, when determining the ultimate recoverability of the par value. BancShares believes its investment in FHLB stock is ultimately recoverable at par. The inputs used in the fair value measurement for the FHLB stock are considered level 2 inputs.

Preferred stock issued under the TARP program and other acquired financial assets. Preferred securities issued under the Troubled Asset Recovery Program are recorded at cost and are evaluated quarterly for impairment based on the ultimate recoverability of the purchase price. The fair value of these securities is derived from a third-party proprietary model that is

considered to be a level 3 input. Other acquired financial assets represent acquired investments in various entities for Community Reinvestment Act and correspondent banking purposes. These investments were recorded at fair value at acquisition date based on level 2 inputs.

Deposits. For non-time deposits and variable rate time deposits, carrying value is a reasonable estimate of fair value. The fair value of fixed rate time deposits is estimated by discounting future cash flows using the interest rates currently offered for deposits of similar remaining maturities. The inputs used in the fair value measurement for deposits are considered level 2 inputs.

Long-term obligations. For fixed rate trust preferred securities, the fair values are determined based on recent trades of the actual security. For other long-term obligations, fair values are estimated by discounting future cash flows using current interest rates for similar financial instruments. The inputs used in the fair value measurement for long-term obligations are considered level 2 inputs.

Payable to the FDIC for loss share agreements. The fair value of the payable to the FDIC for loss share agreements is determined by the projected cash flows based on expected payments to the FDIC in accordance with the loss share agreements. Cash flows are discounted to reflect the timing of the estimated amounts due to the FDIC. The inputs used in the fair value measurement for the payable to the FDIC are considered level 3 inputs. See Note J for more information on the payable to the FDIC.

Interest rate swap. Under the terms of the existing cash flow hedge, BancShares pays a fixed payment to the counterparty in exchange for receipt of a variable payment that is determined based on the three-month LIBOR rate. The fair value of the cash flow hedge is, therefore, based on projected LIBOR rates for the duration of the hedge, values that, while observable in the market, are subject to adjustment due to pricing considerations for the specific instrument. The inputs used in the fair value measurement of the interest rate swap are considered level 2 inputs.

Off-balance-sheet commitments and contingencies. Carrying amounts are reasonable estimates of the fair values for such financial instruments. Carrying amounts include unamortized fee income and, in some cases, reserves for any credit losses from those financial instruments. These amounts are not material to BancShares' financial position.

For all other financial assets and financial liabilities, the carrying value is a reasonable estimate of the fair value as of March 31, 2014 and December 31, 2013. The carrying value and fair value for these assets and liabilities are equivalent because they are relatively short term in nature and there is no interest rate or credit risk that would cause the fair value to differ from the carrying value.

Table of Contents

(Dollars in thousands)	March 31, 2014		December 31, 2013	
	Carrying value	Fair value	Carrying value	Fair value
Cash and due from banks	$543,471	$543,471	$533,599	$533,599
Overnight investments	1,161,469	1,161,469	859,324	859,324
Investment securities available for sale	5,676,237	5,676,237	5,387,703	5,387,703
Investment securities held to maturity	782	835	907	974
Loans held for sale	53,361	54,057	47,271	47,956
Acquired loans, net of allowance for loan and lease losses	1,225,825	1,201,309	975,906	956,388
Originated loans, net of allowance for loan and lease losses	12,022,277	11,659,364	11,924,424	11,589,149
Receivable from the FDIC for loss share agreements [1]	74,784	37,303	93,397	38,438
Income earned not collected	49,668	49,668	48,390	48,390
Federal Home Loan Bank stock	34,417	34,417	40,819	40,819
Preferred stock and other acquired financial assets	17,783	18,521	33,564	34,786
Deposits	18,763,545	18,785,474	17,874,066	17,898,570
Short-term borrowings	617,794	617,794	511,418	511,418
Long-term obligations	440,300	453,313	510,769	526,037
Payable to the FDIC for loss share agreements	111,339	115,129	109,378	111,941
Accrued interest payable	5,675	5,675	6,737	6,737
Interest rate swap	6,501	6,501	7,220	7,220

[1] The fair value of the FDIC receivable excludes amortization expected to be recognized in prospective periods.

Among BancShares’ assets and liabilities, investment securities available for sale and interest rate swaps accounted for as cash flow hedges are reported at their fair values on a recurring basis. Certain other assets are adjusted to their fair value on a nonrecurring basis, including loans held for sale, which are carried at the lower of cost or fair value, and impaired loans, OREO, goodwill and other intangible assets, which are periodically tested for impairment. Non-impaired loans held for investment, deposits, short-term borrowings and long-term obligations are not reported at fair value. BancShares did not elect to voluntarily report any assets or liabilities at fair value.

Table of Contents

For assets and liabilities carried at fair value on a recurring basis, the following table provides fair value information as of March 31, 2014 and December 31, 2013.

	March 31, 2014			
		Fair value measurements using:		
(Dollars in thousands)	Fair value	Level 1 inputs	Level 2 inputs	Level 3 inputs
Assets measured at fair value				
Investment securities available for sale				
U.S. Treasury	$1,273,221	$—	$1,273,221	$—
Government agency	1,812,774	—	1,812,774	—
Mortgage-backed securities	2,566,666	—	2,566,666	—
Equity securities	22,560	—	22,560	—
Municipal securities	186	—	186	—
Other	830	—	830	—
Total	$5,676,237	$—	$5,676,237	$—
Liabilities measured at fair value				
Interest rate swaps accounted for as cash flow hedges	$6,501	$—	$6,501	$—

	December 31, 2013			
		Fair value measurements using:		
	Fair value	Level 1 inputs	Level 2 inputs	Level 3 inputs
Assets measured at fair value				
Investment securities available for sale				
U.S. Treasury	$373,437	$—	$373,437	$—
Government agency	2,544,229	—	2,544,229	—
Mortgage-backed securities	2,446,873	—	2,446,873	—

Municipal securities	187	—	187	—
Other	830	—	830	—
Total	$5,387,703	$—	$5,387,703	$—
Liabilities measured at fair value				
Interest rate swaps accounted for as cash flow hedges	$7,220	$—	$7,220	$—

There were no transfers between levels during the three months ended March 31, 2014.

Certain financial assets and liabilities are carried at fair value on a nonrecurring basis, including loans held for sale, impaired loans and OREO.

Loans held for sale are carried at the lower of aggregate cost or fair value and are, therefore, carried at fair value only when fair value is less than the asset cost. These loans are generally traded in active secondary markets and are priced using current market pricing for similar securities adjusted for servicing, interest rate risk and credit risk. Accordingly, residential real estate loans held for sale are classified as Level 2.

Impaired loans are deemed to be at fair value if an associated allowance or current period charge-off has been recorded. The value of impaired loans is determined by either collateral valuations or discounted present value of the expected cash flow calculations. Collateral values are determined using appraisals or other third-party value estimates

of the subject property with discounts generally between 10 and 14 percent applied for estimated holding and selling costs and other external factors that may impact the marketability of the property. Impaired loans are assigned to an asset manager and monitored monthly for

32

Table of Contents

significant changes since the last valuation. If significant changes are noted, the asset manager orders a new valuation or adjusts the valuation accordingly. Expected cash flows are determined using expected loss rates developed from historic experience for loans with similar risk characteristics, discounted using the effective interest rate.

OREO is measured and reported at fair value using collateral valuations. Collateral values are determined using appraisals or other third-party value estimates of the subject property with discounts generally between 10 and 14 percent applied for estimated holding and selling costs and other external factors that may impact the marketability of the property. Changes to the value of the assets between scheduled valuation dates are monitored through continued communication with brokers and monthly reviews by the asset manager assigned to each asset. The asset manager uses the information gathered from brokers and other market sources to identify any significant changes in the market or the subject property as they occur. Valuations are then adjusted or new appraisals are ordered to ensure the reported values reflect the most current information. OREO that has been recently remeasured is deemed to be at fair value and included in the table below.

For financial assets and liabilities carried at fair value on a nonrecurring basis, the following table provides fair value information as of March 31, 2014 and December 31, 2013.

	March 31, 2014			
		Fair value measurements using:		
(Dollars in thousands)	Fair value	Level 1 inputs	Level 2 inputs	Level 3 inputs
Loans held for sale	$14,911	$—	$14,911	$—
Originated impaired loans	73,301	—	—	73,301
Other real estate not covered under loss share agreements remeasured during current year	17,678	—	—	17,678
Other real estate covered under loss share agreements remeasured during current year	32,402	—	—	32,402

	December 31, 2013			
		Fair value measurements using:		
	Fair value	Level 1 inputs	Level 2 inputs	Level 3 inputs
Loans held for sale	29,389	—	29,389	—
Originated impaired loans	77,817	—	—	77,817
Other real estate not covered under loss share agreements remeasured during current year	20,526	—	—	20,526
Other real estate covered under loss share agreements remeasured during current year	37,587	—	—	37,587

No financial liabilities were carried at fair value on a nonrecurring basis as of March 31, 2014 and December 31, 2013.

Note I

Employee Benefit Plans

Pension expense is a component of employee benefits expense. For the three-month periods ended March 31, 2014 and March 31, 2013, the components of pension expense are as follows:

	Three months ended March 31	
(Dollars in thousands)	2014	2013

Service cost	$3,381	$4,222
Interest cost	6,556	5,895
Expected return on assets	(7,812)	(6,931)
Amortization of prior service cost	53	53
Amortization of net actuarial loss	1,546	4,251
Total pension expense	$3,724	$7,490

Table of Contents

The assumed discount rate for 2014 is 4.90 percent, the expected long-term rate of return on plan assets is 7.50 percent and the assumed rate of salary increases is 4.00 percent. For 2013 the assumed discount rate was 4.00 percent, expected long-term rate of return was 7.25 percent and the assumed rate of salary increases was 4.00 percent.

Note J
Commitments and Contingencies

To meet the financing needs of its customers, BancShares and its subsidiaries have financial instruments with off-balance sheet risk. These financial instruments include commitments to extend credit, standby letters of credit and recourse obligations on mortgage loans sold. These instruments involve elements of credit, interest rate or liquidity risk.

Commitments to extend credit are legally binding agreements to lend to customers. Commitments generally have fixed expiration dates or other termination clauses and may require payment of fees. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future liquidity requirements. Established credit standards control the credit risk exposure associated with these commitments. In some cases, BancShares requires that collateral be pledged to secure the commitment, including cash deposits, securities and other assets. At March 31, 2014, BancShares had unused commitments totaling $6.11 billion, compared to $5.84 billion at December 31, 2013.

Standby letters of credit are commitments guaranteeing performance of a customer to a third party. Those commitments are primarily issued to support public and private borrowing arrangements. To mitigate its risk, BancShares’ follows its credit policies in the issuance of standby letters of credit. At March 31, 2014 and December 31, 2013, BancShares had standby letters of credit amounting to $52.3 million and $54.8 million, respectively. The credit risk related to the issuance of these letters of credit is essentially the same as that involved in extending loans to clients and, therefore, these letters of credit are collateralized when necessary.

Pursuant to standard representations and warranties relating to residential mortgage loan sales, contingent obligations exist for various events that may occur following the loan sale. If underwriting or documentation deficiencies are discovered at any point in the life of the loan or if the loan becomes nonperforming within 120 days of its sale, the investor may require BancShares to repurchase the loan or to repay a portion of the sale proceeds. Other liabilities included reserves of $3.6 million as of March 31, 2014, unchanged from December 31, 2013, for estimated losses arising from these standard representation and warranty provisions.

BancShares has recorded a receivable from the FDIC totaling $74.8 million and $93.4 million as of March 31, 2014 and December 31, 2013 for the expected reimbursement of losses on assets covered under the various loss share agreements. These loss share agreements impose certain obligations on us that, in the event of noncompliance, could result in the delay or disallowance of some or all of our rights under those agreements. Requests for reimbursement are subject to FDIC review and may be delayed or disallowed for noncompliance. The loss share agreements are subject to interpretation by both the FDIC and FCB, and disagreements may arise regarding coverage of losses, expenses and contingencies.

The loss share agreements for four FDIC-assisted transactions include provisions related to contingent payments that may be owed to the FDIC at the termination of the agreements (clawback liability).The clawback liability represents a payment by BancShares to the FDIC if actual cumulative losses on acquired covered assets are lower than the cumulative losses originally estimated by the FDIC at the time of acquisition. The clawback liability is estimated by discounting estimated future payments and is recorded in the Consolidated Balance Sheets as a payable to the FDIC under the relevant loss share agreements. As of March 31, 2014 and December 31, 2013, the estimated clawback

liability was $111.3 million and $109.4 million, respectively.

BancShares and various subsidiaries have been named as defendants in legal actions arising from their normal business activities in which damages in various amounts are claimed. BancShares is also exposed to litigation risk relating to the prior business activities of banks from which assets were acquired and liabilities assumed in the various FDIC-assisted transactions. Although the amount of any ultimate liability with respect to such matters cannot be determined, in the opinion of management, any such liability will not have a material effect on BancShares' consolidated financial statements.

Note K
Derivatives

At March 31, 2014, BancShares had an interest rate swap entered into during 2011 that qualifies as a cash flow hedge under GAAP. For all periods presented, the fair value of the outstanding derivative is included in other liabilities in the consolidated

Table of Contents

balance sheets, and the net change in fair value is included in the consolidated statements of cash flows under the caption net change in other liabilities.

The interest rate swap is used for interest rate risk management purposes and converts variable-rate exposure on outstanding debt to a fixed rate. The 2011 interest rate swap has a notional amount of $93.5 million, representing the amount of variable rate trust preferred capital securities issued during 2006 and still outstanding at the swap inception date. The 2011 interest rate swap hedges interest payments through June 2016 and requires fixed-rate payments by BancShares at 5.50 percent in exchange for variable-rate payments of 175 basis points above the three-month LIBOR, which is equal to the interest paid to the holders of the trust preferred capital securities. Settlement of the swap occurs quarterly. As of March 31, 2014, collateral with a fair value of $7.0 million was pledged to secure the existing obligation under the interest rate swap.

	March 31, 2014		December 31, 2013	
(Dollars in thousands)	Notional amount	Estimated fair value of liability	Notional amount	Estimated fair value of liability
2011 interest rate swap hedging variable rate exposure on trust preferred securities 2011-2016	$93,500	$6,501	$93,500	$7,220

For cash flow hedges, the effective portion of the gain or loss due to changes in the fair value of the derivative hedging instrument is included in other comprehensive income, while the ineffective portion, representing the excess of the cumulative change in the fair value of the derivative over the cumulative change in expected future discounted cash flows on the hedged transaction, is recorded in the consolidated income statement. BancShares' interest rate swap has been fully effective since inception. Therefore, changes in the fair value of the interest rate swap has had no impact on net income. For the three months ended March 31, 2014 and March 31, 2013, BancShares recognized interest expense of $0.8 million during both periods, resulting from incremental interest paid to the interest rate swap counterparty, none of which related to ineffectiveness. BancShares monitors the credit risk of the interest rate swap counterparty.

Note L

Accumulated Other Comprehensive Loss

Accumulated other comprehensive loss included the following as of March 31, 2014 and December 31, 2013:

	March 31, 2014			December 31, 2013		
(Dollars in thousands)	Accumulated other comprehensive loss	Deferred tax benefit	Accumulated other comprehensive loss, net of tax	Accumulated other comprehensive loss	Deferred tax benefit	Accumulated other comprehensive loss, net of tax

Note M
Subsequent Events

On April 29, 2014, at the 2014 annual meeting of shareholders, shareholders approved an amendment to BancShares' charter that authorizes a new class of preferred stock. Under the terms of the charter amendment, BancShares has authority to issue up to 10,000,000 shares of preferred stock with a par value of $0.01.

On April 29, 2014, shareholders also approved a long-term incentive plan that is intended to provide selected salaried employees of FCB or any of its affiliates with opportunities to earn awards in the form of cash bonuses based upon attainment of pre-established, objective performance goals.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

INTRODUCTION

Management’s discussion and analysis (MD&A) of earnings and related financial data are presented to assist in understanding the financial condition and results of operations of First Citizens BancShares, Inc. and Subsidiaries (BancShares). This discussion and analysis should be read in conjunction with the unaudited consolidated financial statements and related notes presented within this report along with our financial statements and related MD&A of financial condition and results of operations included in our 2013 Annual Report in Form 10-K. Intercompany accounts and transactions have been eliminated. Although certain amounts for prior years have been reclassified to conform to statement presentations for 2014, the reclassifications have no material effect on shareholders’ equity or net income as previously reported. Unless otherwise noted, the terms "we," "us" and "BancShares" refer to the consolidated financial position and consolidated results of operations for BancShares.

BancShares is a financial holding company headquartered in Raleigh, North Carolina, that offers full-service banking through its wholly-owned banking subsidiary, First-Citizens Bank & Trust Company (FCB). FCB is a state-chartered bank organized under the laws of the state of North Carolina. As of May 7, 2014, FCB operated 401 branches in North Carolina, Virginia, West Virginia, Maryland, Tennessee, Washington, California, Florida, Georgia, Texas, Arizona, New Mexico, Oregon, Colorado, Oklahoma, Kansas, Missouri, and Washington, DC.

EXECUTIVE OVERVIEW AND EARNINGS SUMMARY

BancShares’ earnings and cash flows are primarily derived from its commercial banking activities. We gather deposits from retail and commercial customers and also secure funding through various non-deposit sources. We invest the liquidity generated from these funding sources in interest-earning assets, including loans and leases, investment securities and overnight investments. We also invest in bank premises, hardware, software, furniture and equipment used to conduct our commercial banking business. We provide treasury services products, cardholder and merchant services, wealth management services and various other products and services typically offered by commercial banks.

Beginning in 2009, leveraging on our strong capital and liquidity positions, we participated in six FDIC-assisted transactions involving distressed financial institutions. Each of the FDIC-assisted transactions include indemnification assets, or loss share agreements, that protect us from a substantial portion of the credit and asset quality risk we would otherwise incur. Under accounting principles generally accepted in the United States of America (GAAP), acquired assets, assumed liabilities and the indemnification asset are recorded at their fair values as of the acquisition date. Subsequent to the acquisition date, the amortization and accretion of premiums and discounts, the recognition of post-acquisition improvement and deterioration, and the related accounting for the FDIC loss share agreements have contributed to significant income statement volatility.

On January 1, 2014, FCB completed its merger with1st Financial Services Corporation (1st Financial) and its wholly-owned banking subsidiary Mountain 1st Bank & Trust Company. In accordance with the acquisition method of accounting, all assets and liabilities were recorded at their fair value as of the acquisition date. As a result of the 1st Financial transaction, during the first quarter of 2014, FCB recorded loans with a fair value of $316.3 million, investment securities with a fair value of $237.4 million and other real estate with a fair value of $11.6 million. The fair value of deposits assumed totaled $631.9 million. FCB paid $10.0 million to acquire 1st Financial, including $8.0 million to acquire and subsequently retire the 1st Financial securities that had been issued under the Troubled Asset Relief Program. As a result of the transaction, FCB recorded $24.5 million of goodwill and $3.8 million in core

deposit intangibles. BancShares and FCB remain well-capitalized following the 1st Financial merger.

Various external factors influence the focus of our business efforts, and the results of our operations can change significantly based on those external factors. US economic conditions are improving, but unemployment rates remain high. The rate of economic growth continued at a modest rate in the first quarter of 2014. Consumer confidence continues to improve, with consumer spending at the highest level of growth in three years. Continued growth in household net worth, driven by increases in home, stock and other asset values, is believed to have positively influenced consumer confidence. As a result of perceived strength in the economy, the Federal Reserve has begun to taper its bond-buying program during the first quarter of 2014. The target asset purchase amount has continued to decline as the Federal Reserve seeks to gradually reduce stimulus efforts.

Table of Contents

We believe improved economic stability has contributed to modest loan growth during the first quarter of 2014. However, low interest rates and competitive loan and deposit pricing continue to constrain interest margins. Additionally, we have experienced improved loan demand during late 2013 and early 2014, as well as improved credit quality quarter over quarter.

BancShares' consolidated net income during the first quarter of 2014 equaled $22.4 million, a decrease of $4.9 million from the $27.2 million earned during the fourth quarter of 2013 and a decrease of $33.2 million from the $55.6 million earned during the first quarter of 2013. The annualized returns on average assets and equity amounted to 0.41 percent and 4.33 percent, respectively, during the first quarter of 2014, compared to 0.50 percent and 5.37 percent during the fourth quarter of 2013 and 1.07 percent and 12.01 percent during the first quarter of 2013. Net income per share during the first quarter of 2014 totaled $2.33, compared to $2.83 and $5.78 during the fourth and first quarters of 2013, respectively. The decrease in net income during 2014 was primarily a result of lower net interest income driven by nonrecurring adjustments and expected declining loan balances within the FDIC-assisted loan portfolio. This decrease was partially offset by improved investment yields and the reduction of funding costs.

As discussed more fully under the caption Business Combinations-Income statement impact, net income during the first quarter of 2014 has been influenced by various post-acquisition events affecting acquired loans. These events, which are not predictable, include unexpected repayments of loans outstanding and improvements in future cash flow projections. Reductions in acquired loan balances have led to a reduction in accretion income when compared to the first quarter of 2013. Unscheduled repayments have also resulted in credits to provision for loan and lease losses due to reversal of previously-identified impairment, although the first quarter 2014 credits were significantly less than those recorded during the first quarter of 2013. Lower amortization of the FDIC receivable during 2014, when compared to the first quarter of 2013, has contributed to a favorable variance in noninterest income.

Net income generated by our non-acquired bank operations has been positive during the first quarter of 2014. Originated loan provision for loan and lease losses declined significantly for the first quarter of 2014 compared to the sequential quarter and the same quarter in the prior year due to credit quality improvements in the originated portfolio and lower net charge-offs. Originated loan growth with declining provision expense and improved yield on investments contributed to higher net interest income after provision, despite a reduction in originated loan yields for the current quarter compared to the fourth and first quarters of 2013.

Net interest income decreased $15.7 million to $160.9 million in the first quarter of 2014 from $176.6 million in the fourth quarter of 2013 and decreased $44.0 million from $204.9 million in the first quarter of 2013, primarily due to FDIC-assisted loan portfolio changes including sustained loan runoff over all periods and nonrecurring acquisition accounting adjustments recognized during the first quarter of 2013. The taxable-equivalent yield on interest-earning assets was 3.26 percent during the first quarter of 2014, compared to 3.55 percent for the fourth quarter of 2013, a decline of 29 basis points, and 4.35 percent for the first quarter of 2013, a decline of 109 basis points. The yield on interest-earning assets remains volatile due to the unpredictable nature of unscheduled repayments of acquired loans.

BancShares recorded a $1.9 million credit to provision for loan and lease losses during the first quarter of 2014, compared to provision expense of $7.3 million in the fourth quarter of 2013 and a credit to provision of $18.6 million during the first quarter of 2013. The credit for acquired loans totaled $2.3 million during the first quarter of 2014, compared to credits of $0.8 million and $22.6 million during the fourth and first quarters of 2013, respectively, the result of loan runoff, repayment and other adjustments. Provision expense for originated loans totaled $0.4 million during the first quarter of 2014 compared to $8.1 million and $4.0 million during the fourth and first quarters of 2013, respectively, the result of credit quality improvements in the originated loan portfolio.

During the first quarter of 2014, noninterest income decreased $8.0 million compared to the fourth quarter of 2013, and increased $3.7 million compared to the first quarter of 2013. The $8.0 million decrease is the result of lower fees

from processing services, reductions in other noninterest income and net adjustments to the FDIC receivable in the fourth quarter of 2013, compared to the current quarter. The increase when compared to the first quarter of 2013 is due to improved merchant and cardholder services and net adjustments to the FDIC receivable, partially offset by lower mortgage income and reductions in other income.

Noninterest expense totaled $191.0 million in the first quarter of 2014, a decrease of $5.3 million compared to the fourth quarter of 2013, due to lower collection costs and advertising and other expenses, partially offset by increased third party processing fees. Noninterest expense decreased $3.3 million in the first quarter of 2014 compared to the first quarter of 2013, the result of reductions in employee benefits, collections and a fixed asset write-offs that were recorded in the first quarter of 2013 related to the client bank processing relationships that were sold, partially offset by higher salaries and wages.

Table of Contents

Income tax expense in the first quarter of 2014 totaled $10.6 million compared to $15.0 million for the fourth quarter and $31.1 million for the first quarter of 2013, representing effective tax rates of 32.2 percent, 35.5 percent and 35.8 percent during the respective periods. The decreased effective tax rate for the first quarter of 2014 is a result of the impact of permanent differences on lower pre-tax earnings.

Investment securities available for sale totaled $5.7 billion at March 31, 2014, an increase of $288.5 million or 5.4 percent compared to December 31, 2013. Investment securities acquired in the 1st Financial merger totaled $237.4 million. Acquired loans and leases increased $241.4 million since December 31, 2013, the result of the acquisition of $316.3 million in the 1st Financial merger. Originated loans and leases increased $95.9 million, or 0.8 percent, since December 31, 2013 to $12.2 billion at March 31, 2014.

Total deposits increased $889.5 million during the first quarter of 2014, with increases in both demand and time deposit balances. Deposits resulting from the 1st Financial merger totaled $593.3 million at March 31, 2014.

BancShares remains well-capitalized, with a tier 1 leverage ratio of 9.66 percent at March 31, 2014, compared to 9.82 percent at December 31, 2013, both comfortably above the published well-capitalized minimum of 5.00 percent. The total risk-based capital ratio was 16.05 percent at March 31, 2014, compared to 16.42 percent at December 31, 2013, both of which compare favorably to the published well-capitalized minimum of 10.00 percent. The risk-based capital ratio decrease during the first quarter was primarily driven by the addition of $24.5 million in goodwill and $3.8 million in core deposit intangibles from the 1st Financial merger.

Table of Contents

BUSINESS COMBINATIONS

FDIC-assisted transactions occurring between 2009 and 2011 provided us significant growth opportunities and continue to provide significant contributions to our results of operations. These transactions allowed us to increase our presence in existing markets and to expand our banking presence to adjacent markets. Each of the FDIC-assisted transactions included loss share agreements that, for the term of the loss share agreement, protect us from a substantial portion of the credit and asset quality risk we would otherwise incur. Two of the loss share agreements expire during the third quarter of 2014. We will process all necessary filings in accordance with the agreements before expiration to collect the earned loss share receivables. Going forward, we will continue to manage these loans and loan relationships in accordance with our standard credit administration policies and procedures.

In January 2014, FCB completed its merger with 1st Financial Services Corporation (1st Financial) and its wholly-owned banking subsidiary, Mountain 1st Bank & Trust Company. The merger allowed FCB to expand its presence in Western North Carolina, within the communities of Columbus, Etowah, Hendersonville, Shelby and Waynesville. This merger was not an FDIC-assisted transaction and, therefore, it has no loss share agreements.

Table 2
FAIR VALUE OF 1ST FINANCIAL SERVICES ACQUIRED ASSETS AND LIABILITIES

(Dollars in thousands)	January 1, 2014

Cash paid to 1st Financial shareholders	2,000
Cash paid to U.S. Treasury for TARP securities	8,000
Goodwill recorded	$ 24,515

Income statement impact. The 1st Financial merger was accretive to net interest income during the first quarter of 2014 and is expected to continue to be accretive going forward. The nonrecurring merger related costs are in line with original expectations totaling approximately $6 million to $7 million. Revenue generated from 1st Financial was approximately $6.9 million for the first quarter of 2014.

When comparing the current quarter to the first quarter of 2013, acquired loans had an unfavorable impact on earnings. Unfavorable variances were noted in interest income and provision for loan and lease losses, partially offset

by improved noninterest income. The decrease in interest income, and overall earnings, for the first quarter of 2014 compared to the same quarter in the prior year is driven by sustained runoff in the acquired loan portfolio and nonrecurring FDIC-assisted acquisition accounting adjustments recorded during the the first quarter of 2013. Due to various factors that affect income or expense

Table of Contents

related to acquired loans recognized in a given period, these components of net income are not easily predictable for future periods. Variations among these items may affect the comparability of various components of net income.

Acquired loan accretion income, which is included in interest income, may be accelerated in the event of unscheduled repayments and various other post-acquisition events. During the three months ended March 31, 2014, accretion income on acquired loans equaled $30.2 million, compared to $44.9 million during the fourth quarter and $79.9 million during the first quarter of 2013. Accretion income during the first quarter of 2013 was impacted by a higher volume of repayments and nonrecurring acquisition accounting adjustments related to the FDIC-assisted transactions.

During the three months ended March 31, 2014, we recorded a credit to provision for loan and lease losses for acquired loans totaling $2.3 million compared to a credit of $22.6 million during the same period of 2013. During both periods, unscheduled loan payments resulted in the reversal of previously-recognized impairment, although as expected, the volume of repayments during the first quarter of 2014 was significantly less than repayments during the first quarter of 2013.

During the three-month period ended March 31, 2014, the net adjustment to the FDIC receivable resulted in a reduction to noninterest income of $12.3 million, compared to a corresponding reduction in noninterest income of $24.1 million during the same period of 2013. The smaller impact during 2014 primarily results from lower amortization expense of the FDIC receivable as the expiration dates of the loss share agreements approach.

Receivable from the FDIC for loss share agreements. The various terms of each loss share agreement and the components of the receivable from the FDIC is provided in Table 3. As of March 31, 2014, the FDIC receivable included $37.3 million of expected FDIC cash receipts and $37.5 million we expect to recover through prospective amortization of the asset due to post-acquisition improvements in the related loans. Generally, losses on single family residential loans are covered for ten years. All other loans are generally covered for five years. During the third quarter of 2014, loss share protection will expire for non-single family residential loans acquired from Temecula Valley Bank (TVB) and Venture Bank (VB). During the first quarter of 2015, loss share protection will expire for loans acquired from First Regional Bank (FRB) and for non-single family residential loans acquired from Sun American Bank (SAB). Protection for all other covered assets extends beyond December 31, 2015.

Table 3
LOSS SHARE PROVISIONS FOR FDIC-ASSISTED TRANSACTIONS

(Dollars in thousands) Entity	Fair value at acquisition date	Losses/expenses incurred through 3/31/2014	Cumulative amount reimbursed by FDIC through 3/31/2014	Carrying value at March 31, 2014 Receivable from FDIC	Payable to FDIC	Current portion of receivable due from (to) FDIC for 3/31/2014 filings	Prospective amortization (accretion)
TVB - combined losses	$103,558	$ 195,585	$832	$8,374	$—	$1,026	$5,906
VB - combined losses	138,963	156,480	125,004	1,051	—	180	(607)
FRB - combined losses	378,695	248,893	169,331	10,632	77,474	(3,670)	11,300
SAB - combined losses	89,734	97,764	76,701	12,712	1,491	1,510	6,487
United Western							

Non-single family residential losses	112,672	111,035	89,014	13,535	17,014	(134	)6,266
Single family residential losses	24,781	4,679	3,623	10,876	—	120	189
Colorado Capital - combined losses	155,070	186,504	149,256	17,604	15,360	108	7,940
Total	$1,003,473	$ 1,000,940	$613,761	$74,784	$111,339	$(860	)$37,481

Fair value at acquisition date represents the initial fair value of the receivable from FDIC, excluding the payable to FDIC. Prospective amortization (accretion) reflects balances that, due to post-acquisition credit quality improvement, will be amortized over the shorter of the covered asset's life or the term of the loss share period.

Table of Contents

INTEREST-EARNING ASSETS

Interest-earning assets include loans and leases, investment securities and overnight investments, all of which reflect varying interest rates based on the risk level and repricing characteristics of the underlying asset. Riskier investments typically carry a higher interest rate but expose us to potentially higher levels of default.

We have historically focused on maintaining high-asset quality, which results in a loan and lease portfolio subjected to strenuous underwriting and monitoring procedures and corresponding tighter margins. We avoid high-risk industry concentrations, but we do maintain a concentration of owner-occupied real estate loans to borrowers in medical and medical-related fields. The credit department actively monitors all loan concentrations to ensure potential risks are identified timely and managed accordingly. Our focus on asset quality also influences the composition of our investment securities portfolio. At March 31, 2014, mortgage-backed securities and government agency securities represented 45.2 percent and 31.9 percent of investment securities available for sale, respectively, compared to U.S. Treasury securities, which represented 22.4 percent of the portfolio. Investments in mortgage-backed securities primarily represent securities issued by government entities. The balance of the available-for-sale portfolio includes common stock of other financial institutions, municipal securities and a subordinated debenture issued by another financial institution. Overnight investments include interest-bearing deposits at the Federal Reserve Bank and other financial institutions and federal funds sold.

Interest-earning assets averaged $20.14 billion for the first quarter of 2014, compared to $19.79 billion and $19.18 billion for the fourth and first quarters of 2013, respectively. The 2014 increase results from higher levels of investment securities, overnight investments and originated loans and leases.

LOANS AND LEASES

Originated loans increased $691.1 million from $11.51 billion at March 31, 2013 to $12.20 billion at March 31, 2014 and increased $95.9 million since December 31, 2013. Acquired loans totaled $1.27 billion at March 31, 2014, compared to $1.03 billion at December 31, 2013, and $1.62 billion at March 31, 2013.

Table of Contents

Table 4
LOANS AND LEASES

(Dollars in thousands)	March 31, 2014	December 31, 2013	March 31, 2013
Acquired loans:

Total noncommercial loans	347,742	248,119	328,384
Total acquired loans	1,270,818	1,029,426	1,621,327
Originated loans and leases:			
Commercial:			
Construction and land development	335,271	319,847	300,497
Commercial mortgage	6,330,843	6,362,490	5,352,594
Other commercial real estate	177,082	178,754	176,456
Commercial and industrial	1,175,543	1,081,158	1,662,124
Lease financing	394,268	381,763	336,329
Other	179,725	175,336	194,186
Total commercial loans	8,592,732	8,499,348	8,022,186
Noncommercial:			
Residential mortgage	1,030,032	982,421	834,879
Revolving mortgage	2,091,000	2,113,285	2,150,800
Construction and land development	119,049	122,792	115,628
Consumer	367,413	386,452	385,587
Total noncommercial loans	3,607,494	3,604,950	3,486,894
Total originated loans and leases	12,200,226	12,104,298	11,509,080
Total loans and leases	$13,471,044	$13,133,724	$13,130,407

At March 31, 2014, total acquired loans increased $241.4 million, or 23.4 percent, compared to the fourth quarter of 2013 due to the 1st Financial acquisition. Conversely, acquired loans decreased $591.9 million, or 36.5 percent, at December 31, 2013, compared to March 31, 2013, due to continued loan runoff. At March 31, 2014, total originated loans increased $95.9 million, or 0.8 percent, compared to December 31, 2013, primarily driven by increases in commercial and industrial and residential mortgage loans. Total originated loans for the first quarter of 2014 increased $691.1 million, or 6.0 percent, compared to March 31, 2013, driven primarily by increases in commercial mortgage and residential mortgage, offset by decreases in commercial and industrial and revolving mortgage loans.

While management recognizes that economic conditions continue to suppress loan demand, we believe the first quarter 2014 growth points to general improvement in consumer confidence, and we expect originated loan growth to continue for the remainder of 2014.

45

Table of Contents

INVESTMENT SECURITIES

Investment securities available for sale equaled $5.68 billion at March 31, 2014, compared to $5.39 billion at December 31, 2013. Available for sale securities are reported at their aggregate fair value, and unrealized gains and losses are included as a component of other comprehensive income, net of deferred taxes. As of March 31, 2014, investment securities available for sale had a net unrealized loss of $4.7 million, compared to a net unrealized loss of $16.6 million as of December 31, 2013. After evaluating the securities with unrealized losses, management concluded that no other than temporary impairment existed as of March 31, 2014.

Changes in the amount of our investment securities portfolio result from balance sheet trends including loans and leases, deposits and short-term borrowings. When inflows arising from deposit and treasury services products exceed loan and lease demand, we invest excess funds in the securities portfolio. Conversely, when loan demand exceeds growth in deposits and short-term borrowings, we allow overnight investments to decline and use proceeds from maturing securities to fund loan demand. Details of investment securities at March 31, 2014, December 31, 2013 and March 31, 2013 are provided in Table 5.

INTEREST-BEARING LIABILITIES

Interest-bearing liabilities include interest-bearing deposits, short-term borrowings and long-term obligations. Interest-bearing liabilities totaled $14.19 billion as of March 31, 2014, an increase of $539.3 million since December 31, 2013 and $26.5 million from March 31, 2013. The increase in the first quarter of 2014 is the result of increases in interest-bearing deposits and short-term borrowings, much of which relates to the 1st Financial merger, partially offset by a decrease in long-term obligations.

DEPOSITS

At March 31, 2014, total deposits equaled $18.76 billion, an increase of $889.5 million, or 5.0 percent, since December 31, 2013 and an increase of $698.6 million, or 3.9 percent, since March 31, 2013. The increase during both periods resulted from $593.3 million from the 1st Financial merger and additional organic growth in legacy markets.

Due to our focus on maintaining a strong liquidity position, core deposit retention remains a key business objective. We believe that traditional bank deposit products remain an attractive option for many customers, but as economic conditions improve, we recognize that our liquidity position could be adversely affected as bank deposits are withdrawn and invested elsewhere. Our ability to fund future loan growth is dependent on our success at retaining existing deposits and generating new deposits at a reasonable cost.

Table of Contents

SHORT-TERM BORROWINGS

At March 31, 2014, short-term borrowings totaled $617.8 million compared to $511.4 million at December 31, 2013 and $573.1 million at March 31, 2013. The increase in short-term borrowings since December 31, 2013 is due to higher customer balances in our business and treasury services sweep products and the reclassification of long-term obligations to short-term borrowings for debt maturing in less than one year.

LONG-TERM OBLIGATIONS

Long-term obligations equaled $440.3 million at March 31, 2014, down $70.5 million from December 31, 2013, and $4.0 million from March 31, 2013. The decrease since December 31, 2013 is a result of FHLB borrowings with maturities less than one year being reclassified to short-term borrowings.

At March 31, 2014, December 31, 2013 and March 31, 2013, long-term obligations included $96.4 million in junior subordinated debentures representing obligations to FCB/NC Capital Trust III, a special purpose entity and the grantor trust for $93.5 million of trust preferred securities. FCB/NC Capital Trust III's trust preferred securities mature in 2036 and may be redeemed at par in whole or in part at any time. BancShares has guaranteed all obligations of FCB/NC Capital Trust III. The proceeds from the trust preferred securities were used to purchase the junior subordinated debentures issued by BancShares.

NET INTEREST INCOME

Net interest income for the first quarter of 2014 totaled $160.9 million, a $44.0 million decrease from the first quarter of 2013. This reduction was primarily due to a $54.1 million reduction in interest income on acquired loans, excluding 1st Financial, resulting from the sustained runoff and nonrecurring FDIC-assisted acquisition accounting adjustments recorded during the first quarter of 2013. The reduction was offset by $4.4 million and $3.3 million increases in interest income from the 1st Financial loan portfolio and the investment portfolio, respectively, as well as a $3.3 million reduction in interest expense when comparing the first quarter of 2014 to the same quarter of the prior year. The taxable-equivalent net interest margin for the first quarter of 2014 was 3.26 percent, a decrease of 29 basis points on a sequential basis from 3.55 percent, and a 109 basis point decrease from 4.35 percent when compared to the first quarter of 2013. While margin compression is a continuing concern in the current interest rate environment, the majority of our margin compression during the current and prior quarter was a direct result of the acquired loan portfolio runoff. Taxable-equivalent net interest margin, excluding acquired loans for the current quarter of 2014, sequential quarter and the same quarter in the prior year was 2.83 percent, 2.81 percent and 2.90 percent.

Interest-earning assets averaged $20.14 billion in the first quarter of 2014, an increase of $351.9 million and $958.8 million since the fourth and first quarter of 2013, respectively. When compared to both the fourth and first quarters of 2013, average earning assets during the first quarter of 2014 have increased due to the 1st Financial merger and growth among investment securities, overnight borrowings and originated loans. Interest income totaled $173.4 million for the first quarter of 2014, a $16.2 million and a $47.2 million decrease from the fourth and first quarters of 2013, respectively. The taxable-equivalent yield on earning assets was 3.50 percent for the first quarter of 2014, declining 118 basis points since the first quarter of 2013 and declining 31 basis points since the fourth quarter of 2013. The decrease in interest income and earning asset margins is due to the significant reduction in the acquired loan portfolio which are being replaced by lower yielding assets.
Average loans and leases increased $371.3 million and $170.1 million comparing the first quarter of 2014 to the fourth and first quarters of 2013, respectively. However, interest income earned from loans and leases for the first quarter of 2014 decreased $17.0 million and $50.6 million when compared to the sequential quarter and the same quarter in the prior year. The taxable-equivalent yield for total loans also decreased during the first quarter of 2014 by 54 basis points and 161 basis points compared to the sequential quarter and the same quarter in the prior year. The

yield reduction was due to lower acquired loan accretion income. Accretion income on acquired loans totaled $30.2 million during the first quarter of 2014 compared to $44.9 million and $79.9 million during the fourth and first quarters of 2013, respectively. Loan yields are also down for originated loans due to pricing competition and general market conditions. Taxable equivalent yield on originated loans for the first quarter of 2014 was 4.38 percent compared to 4.43 percent and 4.61 percent for the fourth and first quarters of 2013, respectively.

Interest income earned on the investment securities portfolio totaled $11.7 million during the first quarter of 2014 compared to $10.6 million and $8.5 million during the fourth and first quarters of 2013, respectively. This increase is the result of an increase in average balances and higher yields on certain investments. Average investment securities increased $320.9 million and $409.8 million since the fourth and first quarters of 2013, respectively, with a 4 and 18 basis point increase in the taxable-equivalent yield for the respective periods. Average investment balances continue to increase as cash provided by acquired loan repayments and increased deposits are redeployed.

Table of Contents

Interest expense amounted to $12.5 million during the first quarter of 2014, a $0.6 million and $3.3 million decrease from the fourth and first quarters of 2013, respectively. The rate on average interest-bearing liabilities equaled 0.35 percent during the first quarter of 2014, a 3 and 10 basis point decrease from the fourth and first quarter of 2013, respectively. Average interest-bearing liabilities increased $399.1 million from the fourth quarter of 2013 to $14.19 billion during the first quarter of 2014 and $48.7 million from the first quarter of 2013 to the first quarter of 2014 due to higher long-term obligations.

Average interest-bearing deposits equaled $13.14 billion during the first quarter of 2014, an increase of $463.7 million and $8.2 million from the fourth and first quarter of 2013, respectively. This increase includes deposits acquired in the 1st Financial merger of $593.3 million at March 31, 2014, as well as recurring seasonal trends.

For the quarters ended March 31, 2014, December 31, 2013 and March 31, 2013, short-term borrowings averaged $543.9 million, $597.4 million and $559.6 million, respectively.

Loans and leases include acquired loans, originated loans, nonaccrual loans and loans held for sale. Yields related to loans, leases and securities exempt from both federal and state income taxes, federal income taxes only, or state income taxes only are stated on a taxable-equivalent basis assuming statutory federal income tax rates of 35.0 percent for each period and state income tax rates of 6.0 percent and 6.9 percent for 2014 and 2013, respectively. The taxable-equivalent adjustment was $763 and $671 for 2014 and 2013, respectively. The rate/volume variance is allocated equally between the changes in volume and rate.

Table of Contents

NONINTEREST INCOME

The primary sources of noninterest income have traditionally consisted of cardholder services income, merchant services income, service charges on deposit accounts and revenues derived from wealth management services.

FDIC-assisted acquired loan recoveries and related adjustments in the FDIC receivable and payable is another source of noninterest income. As the loss share agreements begin to expire in the third quarter of 2014, we expect the impact on noninterest income to be reduced going forward.

Table 7
NONINTEREST INCOME

	Three months ended March 31		Change	
(Dollars in thousands)	2014	2013	$	%
Cardholder services	$ 11,832	$ 11,071	$ 761	6.9 %
Merchant services	13,521	12,486	1,035	8.3
Service charges on deposit accounts	14,440	14,999	(559)	(3.7)
Wealth management services	14,880	14,515	365	2.5
Fees from processing services	4,861	5,619	(758)	(13.5)
Other service charges and fees	3,944	3,766	178	4.7
Mortgage income	955	3,788	(2,833)	(74.8)
Insurance commissions	3,287	2,980	307	10.3
ATM income	1,202	1,168	34	2.9
Adjustments to FDIC receivable for loss share agreements	(12,349)	(24,053)	11,704	(48.7)
Other	4,608	11,174	(6,566)	(58.8)
Total noninterest income	$ 61,181	$ 57,513	$ 3,668	6.4 %

During the first three months of 2014, noninterest income amounted to $61.2 million, compared to $69.2 million and $57.5 million during the fourth and first quarters of 2013, respectively.

When comparing the first quarter of 2014 to the first quarter of 2013, noninterest income improved due to $11.7 million in favorable adjustments to the FDIC receivable for loss share agreements, and $1.8 million increase in merchant services and cardholder services. FDIC adjustments are a result of acquired portfolio performance, while the changes in service charges are directly related to account activity. These first quarter improvements were partially offset by a $2.8 million reduction in mortgage income and a $6.6 million reduction in other noninterest income. The decrease in mortgage fee income was due to reduced mortgage originations and the decrease in the other category is the result of a $7.5 million gain generated from the sale of our rights and most of our obligations under various service agreements with client banks during the first quarter of 2013.

The decrease in noninterest income from the first quarter of 2014 compared to the sequential quarter is primarily driven by a $2.8 million reduction in processing service fees, $1.8 million unfavorable adjustment to the FDIC receivable, and $2.5 million reduction in other noninterest income due to a decrease in acquired loan recoveries for loans that had been fully charged off.

Table of Contents

NONINTEREST EXPENSE

The primary components of noninterest expense are salaries and related employee benefits, occupancy costs for branch offices and support facilities and equipment and software costs for our branch offices and our technology and operations infrastructure.

Table 8
NONINTEREST EXPENSE

	Three months ended March 31		Change	
(Dollars in thousands)	2014	2013	$	%
Salaries and wages	$79,874	$76,119	$3,755	4.9 %
Employee benefits	20,100	25,019	(4,919)	(19.7)
Occupancy expense	20,425	18,809	1,616	8.6
Equipment expense	18,791	18,946	(155)	(0.8)
FDIC insurance expense	2,636	2,666	(30)	(1.1)
Foreclosure-related expenses	5,410	4,305	1,105	25.7
Merchant processing	8,481	8,234	247	3.0
Processing fees paid to third parties	5,125	4,381	744	17.0
Card processing	2,597	3,077	(480)	(15.6)
Consultant	2,231	1,626	605	37.2
Collection	1,835	5,274	(3,439)	(65.2)
Advertising	1,289	297	992	(a)
Other	22,236	25,602	(3,366)	(13.1)
Total noninterest expense	$191,030	$194,355	$(3,325)	(1.7)%

(a) not meaningful

Noninterest expense decreased $5.3 million in the first quarter of 2014 to $191.0 million when compared to $196.3 million in the sequential quarter, and decreased $3.3 million when compared to $194.4 million in the first quarter of 2013. The $5.3 million decrease in first quarter 2014 compared to the fourth quarter 2013, is primarily driven by decreases in collection and advertising expenses, partially offset by an increase in processing fees paid to third parties.

When comparing the first quarter of 2014 to the first quarter of 2013, employee benefit expense decreased $4.9 million due to lower pension and health claims expenses resulting from a higher discount rate used to calculate pension expense during 2014. Collection costs decreased $3.4 million during the first quarter of 2014, when compared to the same period of 2013 due to lower nonperforming assets. These favorable variances were partially offset by higher salaries and wages, occupancy costs and foreclosure-related expenses.

INCOME TAXES

We monitor and evaluate the potential impact of current events on the estimates used to establish income tax expenses and income tax liabilities. On a periodic basis, we evaluate our income tax positions based on current tax law, positions taken by various tax auditors within the jurisdictions where BancShares is required to file income tax returns, as well as potential or pending audits or assessments by tax auditors.

Income tax expense totaled $10.6 million, $15.0 million and $31.1 million for the first quarter of 2014 and the fourth and first quarters of 2013, respectively, representing effective tax rates of 32.2 percent, 35.45 percent and 35.8 percent during the respective periods. The decrease in the effective tax rate for the first quarter 2014 results from the impact of permanent differences on lower pre-tax earnings.

Table of Contents

SHAREHOLDERS' EQUITY AND CAPITAL ADEQUACY

BancShares and FCB are required to meet minimum requirements imposed by regulatory authorities. Failure to meet certain capital requirements may result in actions by regulatory agencies that could have a material impact on our consolidated financial statements.

Under GAAP, unrealized gains and losses on certain assets and liabilities and adjustment for pension funded status, net of deferred taxes, are included in accumulated other comprehensive income within shareholder's equity and directly impact the calculation of our capital ratios. In the aggregate, these items represented a net reduction in shareholders' equity of $16.6 million at March 31, 2014, compared to $25.3 million at December 31, 2013, and $79.9 million at March 31, 2013. The $8.7 million reduction in shareholders' equity from December 31, 2013, resulted from a reduction in unrealized losses on investment securities available for sale arising due to interest rate changes during 2013. The $63.3 million reduction in shareholders' equity from March 31, 2013 reflects the combined impact of lower unrealized losses on investment securities available for sale and changes in the funded status of the pension plan.

Table 9
ANALYSIS OF CAPITAL ADEQUACY

	March 31, 2014		December 31, 2013		March 31, 2013		Regulatory minimum		Well-capitalized requirement	
BancShares										
Risk-based capital ratios										
Tier 1 capital	14.56	%	14.92	%	14.72	%	4.00	%	6.00	%
Total capital	16.05		16.42		16.41		8.00		10.00	
Tier 1 leverage ratio	9.66		9.82		9.53		3.00		5.00	
Bank										
Risk-based capital ratios										
Tier 1 capital	13.78	%	14.14	%	14.31	%	4.00	%	6.00	%
Total capital	15.21		15.57		15.95		8.00		10.00	
Tier 1 leverage ratio	9.21		9.36		9.31		3.00		5.00	

BancShares continues to exceed minimum capital standards and FCB remains well-capitalized.

In July 2013, Bank regulatory agencies approved new global regulatory capital guidelines (Basel) aimed at strengthening existing capital requirements for bank holding companies through a combination of higher minimum capital requirements, new capital conservation buffers and more conservative definitions of capital and balance sheet exposure. BancShares will be subject to the requirements of Basel effective January 1, 2015, subject to a transition period for several aspects of the rule.

Under the revised rules, BancShares' tier 1 common equity ratio based on the current tier 1 capital and risk-weighted assets calculations, excluding trust preferred securities, would be 13.91 percent at March 31, 2014, compared to the fully phased-in, well-capitalized minimum of 9.0 percent, which includes the 2.5 percent minimum conservation buffer. Management continues to monitor Basel developments and remains committed to managing our capital levels in a prudent manner. The proposed tier 1 common equity ratio is calculated in Table 10.

Table 10

TIER 1 COMMON EQUITY

(Dollars in thousands)	March 31, 2014	
Tier 1 capital	$2,101,125	
Less: restricted core capital	93,500	
Tier 1 common equity	$2,007,625	
Risk-adjusted assets	$14,429,905	
Tier 1 common equity ratio	13.91	%

Table of Contents

Table 11 describes the minimum and well-capitalized requirements for the transitional period beginning during 2016 and the fully phased-in requirements that become effective during 2019.

Table 11
BASEL CAPITAL REQUIREMENTS

Basel final rules	Basel minimum requirement 2016	Basel well-capitalized 2016	Basel minimum requirement 2019	Basel well-capitalized 2019

Total capital ratio plus conservation buffer	8.63	10.63	10.50	12.50

RISK MANAGEMENT

Effective risk management is critical to our success. The Dodd-Frank Act required that banks with total assets in excess of $10 billion establish an enterprise-wide risk committee consisting of members of its board of directors. At its July 2013 meeting, the board of directors established a Risk Committee that provides oversight of enterprise-wide risk management. The Risk Committee is responsible for establishing risk appetite and supporting tolerances for credit, market and operational risk and ensuring that risk is managed within those tolerances, monitoring compliance with laws and regulations, reviewing the investment securities portfolio to ensure that portfolio returns are managed within market risk tolerance and monitoring our legal activity and associated risk. With guidance from and oversight by the Risk Committee, management continually refines and enhances its risk management policies and procedures to maintain effective risk management programs and processes.

Mortgage reform rules mandated by the Dodd-Frank Act became effective in January 2014, requiring lenders to make a reasonable, good faith determination of a borrower's ability to repay any consumer credit transaction secured by a dwelling and to limit prepayment penalties. Increased risks of legal challenge, private right of action and regulatory enforcement are presented by these rules. BancShares implemented the required system, process, procedural and product changes prior to the effective date of the new rules. We have modified our underwriting standards to ensure compliance with the ability to repay requirements and have determined that we will continue to offer both qualified and non-qualified mortgage products. Historical performance and conservative underwriting of impacted loan portfolios mitigates the risks of non-compliance.

Credit risk management. Credit risk is the risk of not collecting payments pursuant to the contractual terms of loans, leases and investment securities. Loans and leases not covered by loss share agreements with the FDIC were underwritten in accordance with our credit policies and procedures and are subject to periodic ongoing reviews. Acquired loans were recorded at fair value as of the acquisition date and are subject to periodic reviews to identify any further credit deterioration. Our independent credit review function conducts risk reviews and analyses of both acquired and originated loans to ensure compliance with credit policies and to monitor asset quality trends. The risk reviews include portfolio analysis by geographic location, industry, collateral type and product. We strive to identify potential problem loans as early as possible, to record charge-offs or write-downs as appropriate and to maintain adequate allowances for loan and lease losses that are inherent in the loan and lease portfolio.

Interest rate risk management. Interest rate risk (IRR) results principally from assets and liabilities maturing or repricing at different points in time, from assets and liabilities repricing at the same point in time but in different amounts and from short-term and long-term interest rates changing in different magnitudes.

We assess our short term interest rate risk by forecasting net interest income under various interest rate scenarios and comparing those results to forecast net interest income assuming stable rates. Rate shock scenarios represent an instantaneous and parallel shift in rates, up or down, from a base yield curve. Due to the existence of contractual floors on certain loans, competitive pressures that constrain our ability to reduce deposit interest rates and the extraordinarily low current level of interest rates, it is unlikely that the rates on most interest-earning assets and interest-bearing liabilities can decline materially from current levels. Our shock projections incorporate assumptions of likely customer migration of short-term deposit instruments to long-term, higher rate instruments as rates rise. Various other IRR scenarios are modeled to supplement shock

Table of Contents

scenarios. This may include interest rate ramps, changes in the shape of the yield curve and changes in the relationships of FCB rates to market rates.

Table 12 provides the impact on net interest income resulting from various interest rate scenarios as of March 31, 2014 and December 31, 2013.

Table 12
NET INTEREST INCOME SENSITIVITY SIMULATION ANALYSIS

	Estimated increase (decrease) in net interest income			
Change in interest rate (basis point)	March 31, 2014		December 31, 2013	
+100	2.77	%	2.95	%
+200	4.37		4.56	
+300	3.66		3.62	

Long-term interest rate risk exposure is measured using the economic value of equity (EVE) sensitivity analysis to study the impact of long-term cash flows on earnings and capital. EVE involves discounting present values of all cash flows of balance sheet items under different interest rate scenarios. EVE represents the difference between the sum of the present value of all asset cash flows and the sum of the present value of the liability cash flows. Cash flows will vary by interest rate scenario, resulting in variations in EVE. The amount of base-case measurement and its sensitivity to shifts in the yield curve allow management to measure longer-term repricing and option risk in the balance sheet. Table 13 presents the EVE profile as of March 31, 2014 and December 31, 2013.

Table 13
ECONOMIC VALUE OF EQUITY MODELING ANALYSIS

	Estimated increase (decrease) in EVE			
Change in interest rate (basis point)	March 31, 2014		December 31, 2013	
+100	1.46	%	2.68	%
+200	0.53		0.70	
+300	(2.19	)	(3.05	)

We do not typically utilize interest rate swaps, floors, collars or other derivative financial instruments to attempt to hedge our overall balance sheet rate sensitivity and interest rate risk. However, we have entered into an interest rate swap to synthetically convert the variable rate on $93.5 million of junior subordinated debentures to a fixed rate of 5.50 percent through June 2016. The interest rate swap qualifies as a hedge under GAAP. See Note L "Derivative" in the Notes to Consolidated Financial Statements for additional discussion of this interest rate swap.

Liquidity risk management. Liquidity risk is the risk that an institution is unable to generate or obtain sufficient cash or its equivalents on a cost-effective basis to meet commitments as they fall due. The most common sources of liquidity risk arise from mismatches in the timing and value of on-balance sheet and off-balance sheet cash inflows and outflows. In general, on-balance sheet mismatches generate liquidity risk when the effective maturity of assets exceeds the effective maturity of liabilities. A commonly cited example of a balance sheet liquidity mismatch is when long-term loans (assets) are funded with short-term deposits (liabilities). Other forms of liquidity risk include market constraints on the ability to convert assets into cash at expected levels, an inability to access funding sources at sufficient levels at a reasonable cost, and changes in economic conditions or exposure to credit, market, operation, legal and reputation risks that can affect an institution’s liquidity risk profile.

Table of Contents

We utilize various limit-based measures to monitor, measure and control liquidity risk across three different types of liquidity:

- Tactical liquidity measures the risk of a negative cash flow position whereby cash outflows exceed cash inflows over a short-term horizon out to nine weeks;
- Structural liquidity measures the amount by which illiquid assets are supported by long-term funding; and
- Contingent liquidity utilizes cash flow stress testing across three crisis scenarios to determine the adequacy of our liquidity.

We aim to maintain a diverse mix of existing and potential liquidity sources to support the liquidity management function. At its core is a reliance on the retail deposit book, due to the generally stable balances and low cost it offers. Other sources of liquidity include asset-based liquidity in the form of cash and unencumbered securities, as well as access to wholesale funding from external counterparties, primarily FHLB advances and Federal Funds lines. We aim to avoid funding concentrations by diversifying our external funding with respect to maturities, counterparties and nature (i.e. secured versus unsecured).

One of our principal sources of noncore funding is advances from the FHLB of Atlanta. Outstanding FHLB advances equaled $275.3 million as of March 31, 2014, and we had sufficient collateral pledged to secure $1.03 billion of additional borrowings. Additionally, we maintain Federal Funds lines and other borrowing facilities. At March 31, 2014, BancShares had access to $665.0 million in unsecured borrowings through various sources.

Free liquidity includes cash on deposit at various banks, overnight investments and the unpledged portion of investment securities available for sale, all of which can be easily converted to cash. Free liquidity totaled $3.94 billion at March 31, 2014 compared to $3.39 billion at December 31, 2013 and $3.13 billion at March 31, 2013.

NONPERFORMING ASSETS

Nonperforming assets include nonaccrual loans and leases and OREO resulting from both acquired and originated loans. At March 31, 2014, BancShares' nonperforming assets amounted to $185.4 million, or 1.37 percent, of total loans and leases plus OREO, compared to $165.6 million, or 1.25 percent, at December 31, 2013.

Acquired nonaccrual loans equaled $52.1 million as of March 31, 2014, compared to $28.5 million at December 31, 2013, an increase due to one large commercial loan being placed on nonaccrual in the first quarter of 2014. Originated nonaccrual loans decreased $6.2 million from December 31, 2013 to $47.0 million at March 31, 2014, due to lower nonaccrual commercial mortgage and commercial and industrial loans.

At March 31, 2014, total OREO was $86.4 million, compared to $84.0 million at December 31, 2013. OREO includes foreclosed property and branch facilities that we have closed but not sold. Noncovered OREO totaled $44.5 million at March 31, 2014, compared to $36.9 million at December 31, 2013.

Table of Contents

Table 14
NONPERFORMING ASSETS

	2014	2013			
(Dollars in thousands)	First Quarter	Fourth Quarter	Third Quarter	Second Quarter	First Quarter
Risk Elements					
Nonaccrual loans and leases:					
Acquired	$52,108	$28,493	$29,194	$46,892	$43,882
Originated	46,952	53,170	66,840	69,133	82,583
Other real estate:					
Covered under loss share agreements	41,855	47,081	58,769	84,833	101,901
Not covered under loss share agreements	44,504	36,898	40,338	36,942	44,828
Total nonperforming assets	$185,419	$165,642	$195,141
