(Do not check if a smaller
reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes
 No

As of March 15, 2012, the number of shares of Common Stock outstanding was 36,444,178. As of June 30, 2011 (the last business day of the registrant's most recently completed second fiscal quarter), the aggregate market value of Common Stock held by non-affiliates, based upon the last sale price of the shares as reported on the NASDAQ Global Capital Market on such date, was approximately \$564,509,202 (for this purpose, the Company has assumed that directors, executive officers and holders of more than 10% of the Company's common stock are affiliates).

Explanatory Note

The purpose of this amendment to our Annual Report on Form 10-K for the year ended December 31, 2011, originally filed with the Securities and Exchange Commission on March 15, 2012, is only to supplement certain disclosures (as detailed below) and to amend Exhibits 32.1 and 32.2 to include the appropriate Section 906 certifications from the Registrant's principal executive officer and principal financial officer that were inadvertently left out when originally filed. This amendment should be read in conjunction with the Company's full 2011 Annual Report on Form 10-K. A brief summary of the additional disclosures provided in this amended filing is as follows:

Part II Item 7 "Management's Discussion and Analysis" - Information regarding the proportional percentage of revenues from recurring subscription-based and transaction-based arrangements was added to the Overview section. Also information pertaining to the operating revenues from the Company's acquisition of ADAM in February 2011 was added to the analysis of results for the year 2011 as compared to the year 2010.

Part II Item 8 "Financial Statements and Supplementary Information" - Note 1 "Description of Business and Significant Accounting Policies" has been revised to incorporate the quantitative and qualitative disclosures concerning fair value measurements including those pertaining to the Company's contingent accrued earn-out acquisition consideration liabilities, and those pertaining to other financial instruments. Also Note 16 "Geographic Information" has been revised to disclose the basis for attributing revenues from external customers to specific individual countries.

Item 7: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

As used herein, the terms "Ebix," "the Company," "we," "our" and "us" refer to Ebix, Inc., a Delaware corporation, and its consolidated subsidiaries as a combined entity.

The information contained in this section has been derived from our historical financial statements and should be read together with our historical financial statements and related notes included elsewhere in this document. The discussion below contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements involve risks and uncertainties including, but not limited to: demand and acceptance of services offered by us, our ability to achieve and maintain acceptable cost levels, rate levels and actions by competitors, regulatory matters, general economic conditions, and changing business strategies. Forward-looking statements are subject to a number of factors that could cause actual results to differ materially from our expressed or implied expectations, including, but not limited to our performance in future periods, our ability to generate working capital from operations, the adequacy of our insurance coverage, and the results of litigation or investigation. Our forward-looking statements can be identified by the use of terminology such as "anticipates," "expects," "intends," "believes," "will" or the negative thereof or variations thereon or comparable terminology. Except as required by law, we undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.

OVERVIEW

Ebix, Inc. is a leading international supplier of on-demand software and e-commerce solutions to the insurance industry. Ebix provides various application software products for the insurance industry ranging from carrier systems, agency systems and exchanges to custom software development for all entities involved in the insurance and financial industries. Approximately 80% of the Company's revenues are of a recurring nature. Rather than license our products in perpetuity, we typically either license them for a few years with ongoing support revenues, or license them on a limited term basis using a subscription hosting or ASP model. During the year 2011 combined subscription-based and transaction-based revenues grew to 83% of the Company's total revenues, as compared to 74% in the year 2010, and in particular subscription-based revenues grew to 65% of total revenue in 2011 versus 56% in 2010. Our goal is to be the leading powerhouse of backend insurance transactions in the world. The Company's technology vision is to focus on convergence of all insurance channels, processes and entities in a manner such that data can seamlessly flow once a data entry has been made. Our customers include many of the top insurance and financial sector companies in the world.

The insurance industry has undergone significant consolidation over the past several years driven by the need for, and benefits from, economies of scale and scope in providing insurance in a competitive environment. The insurance markets have continuously increased their demands for cutting edge solutions to reduce paper based processes and improve efficiency both at the back-end side and at the consumer end side of their insurance transaction processing. Such consolidation has involved both insurance carriers and insurance brokers and is directly impacting the manner in which insurance products are distributed. Management believes the world-wide insurance industry will continue to experience significant change and the need for increased efficiencies through online exchanges and streamlined processes. The changes in the insurance industry are likely to create new opportunities for the Company. Management focuses on a variety of key indicators to monitor operating and financial performance. These performance indicators include measurements of revenue growth, operating income, operating margin, income from continuing operations, diluted earnings per share, and cash provided by operating activities. We monitor these indicators, in conjunction with our corporate governance practices, to ensure that our business is efficiently managed and that effective controls are maintained.

The key performance indicators for the twelve months ended December 31, 2011, 2010, and 2009 were as follows:

Table of Contents

(Dollar amounts in thousands except per share data)	Key Performance Indicators

TWELVE MONTHS ENDED DECEMBER 31, 2011 AND 2010

Operating Revenue

The Company derives its revenues primarily from professional and support services, which includes subscription and transaction fees pertaining to services delivered over our exchanges or from our ASP platforms, revenue generated from software development projects and associated fees for consulting, implementation, training, and project management provided to customers using our systems, and business process outsourcing revenue. Ebix's revenue streams come from four product channels. Presented in the table below is the breakout of our revenues for each of those product channels for the years ended December 31, 2011 and 2010.

(dollar amounts in thousands)	For the Year Ended December 31,	
	2011	2010
Exchanges	\$ 130,638	\$ 94,212
Broker Systems	18,006	13,841
Business Process Outsourcing ("BPO")	14,944	15,586
Carrier Systems	5,381	8,549
Totals	\$ 168,969	\$ 132,188

During the twelve months ended December 31, 2011 our total revenue increased \$36.8 million or 28%, to \$169.0 million compared to \$132.2 million in 2010. The increase in revenues is primarily the result of revenue from the acquisition of ADAM since February 2011, revenue from business acquisitions made during 2010, and continued growth achieved in our Exchange channel. \$23.1 million of ADAM's operating revenues recognized since February 7, 2011 are included in the Company's revenues reported in its consolidated statement of income for the year ended December 31, 2011. The Company continues to immediately and efficiently leverage product cross-selling opportunities across all channels, as facilitated by our operating philosophy and business acquisition strategy. Also partially effecting reported revenues was the impact from fluctuations in the exchange rates of the foreign currencies in the countries in which we conduct operations. During each of the years 2011, 2010, and 2009 the change in foreign currency exchange rates increased/(decreased) reported consolidated operating revenues by \$4.2 million, \$4.6 million, and \$(1.9) million, respectfully. The specific components of our revenue and the changes experienced during the past year are discussed further below.

Exchange division revenues increased \$36.4 million or 39% due to net increases of approximately \$5.0 million in the life and annuity sector, \$7.2 million in the property and casualty insurance sector, \$22.0 million in the health services sector, and \$2.4 million from the customer relationship insurance "CRM" services sector and \$(218) thousand from the risk management & workers compensation sector .

BPO division revenues decreased slightly by \$642 thousand or 4% due to reduced demand for some of our insurance certificate creation and tracking services. The Company's performance in this product channel is still marginally affected by the downturn in the commercial and residential housing industry which accounts for almost a third of the insurance certificates created, although the Company has recently experienced some improvement in this market segment.

Broker Systems division revenue increased \$4.2 million or 30% due to growth realized in our both our Asia-Pacific markets, regarding services delivered by on-demand back-end systems, and in our domestic U.S. market regarding systems designed for use by insurance brokers.

Carrier Systems division revenue decreased \$3.2 million or 37% due to the lack of demand by large insurance carriers for perpetually licensed back-end systems. The Company is developing and launching new on-demand products and services for prospective clients in this market that are designed to facilitate a subscription-based recurring model. We expect insurance carriers to deploy these new technologies and increase their spending for system development, and that our revenues from this channel will increase over the next few years.

Costs of Services Provided

Costs of services provided, which includes costs associated with customer support, consulting, implementation, and training services, increased \$4.0 million or 13%, from \$29.6 million in 2010 to \$33.6 million in 2011. This increase is due to additional personnel, facility, and customer support costs associated with the acquisition of ADAM and other expenses in support of our increasing revenue streams.

Product Development Expenses

Product development expenses increased \$5.6 million or 41%, from \$13.6 million in 2010 to \$19.2 million in 2011. The Company's product development efforts continue to be focused on the development of new technologies for insurance carriers, brokers and agents, and the development of new data exchanges for domestic and international insurance markets. The cost increase incurred in 2011 was associated with the expansion of our research and development efforts dedicated to the provision of additional on-demand based products and services in support of each of our product channels, and is primarily attributable to the associated incremental staffing and facilities costs that were incurred during the year.

Sales and Marketing Expenses

6

Sales and marketing expenses increased \$7.3 million or 114%, from \$6.4 million in 2010 to \$13.6 million in 2011. Approximately half of this increase is associated with the acquisition of ADAM and the remaining increase in expenses is attributable to additional sales personnel that have been hired to support the continued expansion and increase in revenues generated by our Exchange, Broker System, and BPO channels.

General and Administrative Expenses

General and administrative expenses increased \$2.2 million or 9%, from \$24.1 million in 2010 to \$26.3 million in 2011. This increase is primarily due to additional staffing necessary to fill critical positions, and increased corporate and employee health insurance costs. Partially offsetting these cost increases was a \$2.8 million net expense decrease associated with reductions to previously recorded contingency based earnout accruals pertaining to business acquisitions made during 2010. The Company reduced these estimated accruals after considering both information available at the date the business acquisitions were made and analyzing the ongoing performance of these businesses since they were acquired.

Amortization and Depreciation Expenses

Amortization and depreciation expenses increased \$1.5 million, or 24%, from \$6.0 million in 2010 to \$7.5 million in 2011. This increase is primarily due to additional amortization costs associated with the customer relationship, developed technology, and trademark intangible assets that were recognized in connection with the acquisition of ADAM, and \$376 thousand of additional depreciation expenses in connection with the purchases of equipment and facilities necessary to support our continued expanding operations.

Interest Income

Interest income increased \$38 thousand or 7% from \$519 thousand in 2010 to \$557 thousand in 2011 primarily due to earnings realized on funds invested in foreign banks.

Interest Expense

Interest expense decreased \$143 thousand or 16% from \$902 thousand in 2010 to \$759 thousand in 2011. This decrease is primarily due to the conversion of the Company remaining \$5.0 million of convertible debt that occurred in April 2011 thereby ceasing further recognition of the imputed interest expense associated with this debt instrument, and also due a lower rate of interest incurred with our revolving line of credit.

Other Non-Operating Income

Other non-operating income of \$647 thousand for the year ending December 31, 2011 consists of a \$537 thousand gain recognized in regards to the net decrease in the fair value of the put option that was issued to the two former stockholders of E-Z Data whom received shares of Ebix common stock as part of the acquisition consideration paid by the Company; this put option expired on October 31, 2011. Also in addition to this gain on the put option was a \$108 thousand gain that was recognized upon the settlement of a \$5.0 million convertible note that was fully converted and settled in April 2011.

Foreign Exchange Gain

Net foreign exchange gains of \$4.3 million for the year ended December 31, 2011 consisted of \$6.9 million of gains recognized upon the re-measuring of certain intercompany debt obligations partially offset by \$2.6 million of losses recorded in connection with the changes in the fair value of related derivative instruments the Company holds to hedge the impact of fluctuations in the exchange rates in the foreign jurisdictions in which we certain international operations.

Income Taxes

The Company recognized a net tax expense of \$2.1 million for the year ended December 31, 2011. The Company's tax provision for the year, before the effect of discrete items, was an expense of \$6.9 million and reflects an effective tax rate 9.5% as compared to the 4.8% effective tax rate for the same period a year earlier. The effective rate increased primarily due to an increased proportion of our taxable income having been generated in jurisdictions with higher tax rates. Included in the discrete items recognized during the year ended December 31, 2011 were the releases of the remaining valuation allowances held against deferred tax assets associated with tax net operating losses carry forwards obtained from earlier business acquisitions. The valuation

allowances were released based on analysis of the levels of taxable income being generated by these business units, available prudent and feasible tax planning strategies, and an analysis of the relevant income tax regulations. As a result of the release of the valuation allowances the Company recognized a tax benefit of \$6.6 million. Also included in recognized discrete items was a \$1.9 million income tax expense pertaining to charges associated with windfall gains realized from tax deductions in connection with exercised stock options and vested restricted stock grants, and a \$233 thousand income tax benefit from certain enhanced research and development tax deductions realized in our foreign operations. Facilitating our relatively low consolidated world-wide effective tax rate is the advantages the Company realizes from conducting activities in certain foreign low tax jurisdictions. The pre-tax income from and the applicable statutory tax rates in each jurisdiction in which the Company had operations for the year ending December 31, 2011 was as follows:

	United States	Canada	Latin America	Australia	Singapore	New Zealand	India	Sweden	Total
Pre-tax income	\$ 12,043	\$ 831	\$ 1,260	\$ 2,734	\$ 18,084	\$ 488	\$ 31,715	\$ 6,340	\$ 73,495
Statutory tax rate	35.0	% 30.5	% 34.0	% 30.0	% 10.0	% 30.0	% —	% —	%

TWELVE MONTHS ENDED DECEMBER 31, 2010 AND 2009

Operating Revenue

Presented in the table below is the breakout of our revenues from each of our four product channels the years ended December 31, 2010 and 2009.

(dollar amounts in thousands)	For the Year Ended December 31,	
	2010	2009
Exchanges	\$94,212	\$60,764
Broker Systems	13,841	11,599
BPO	15,586	14,698
Carrier Systems	8,549	10,624
Totals	\$132,188	\$97,685

During the twelve months ended December 31, 2010 our total revenue increased \$34.5 million or 35%, to \$132.2 million compared to \$97.7 million in 2009. The increase in revenues was principally a result of the impact from strategic business acquisitions made during 2010 and 2009 in our Exchange and BPO channels, and continued growth realized in our Exchange channels. Our ability to quickly integrate business acquisitions into existing operations was instrumental to achieving these results. The specific components of our revenue and the changes experienced during the past year are discussed further below.

Exchange division revenues increased \$33.4 million or 55% primarily due to net increases of approximately \$17.9 million in the life and annuity sector, \$13.4 million in the property & casualty sector, and \$2.6 million from the health insurance sector.

BPO division revenues increased \$880 thousand or 6% due to greater demand for our insurance certificate creation and tracking services. The Company's growth in this channel was strongly impacted by the downturn in the commercial and residential housing industry, which drove down the transaction volume derived from clients associated within the construction industry, which traditionally accounts for approximately 35% of the insurance certificates in the United States.

Broker Systems division revenue increased \$2.2 million or 19% principally due to further expansion into the international markets, and the associated growth of our on-demand back-end systems designed for use by insurance brokers.

Carrier Systems division revenue decreased \$2.1 million or 20% due to continued delays in capital spending decisions related to large investments in perpetually licensed back-end systems designed for use by large insurance companies.

Costs of Services Provided

Costs of services provided, which includes costs associated with customer support, consulting, implementation, and training services, increased \$8.3 million or 39%, from \$21.3 million in 2009 to \$29.6 million in 2010. This cost increase was attributable to additional personnel, professional services, and facility costs associated with our 2009 acquisitions of E-Z Data and Peak, the 2010 expansion into the Latin America market.

Product Development Expenses

Product development expenses increased \$2.2 million or 20%, from \$11.4 million in 2009 to \$13.6 million in 2010. The Company's product development efforts are focused on the development new technologies for insurance carriers, brokers and agents, and the development of new exchanges for international and domestic markets. This cost increase was associated with the expansion of our technical operations in India in regards to increased research and development efforts towards designing new futuristic on-demand based services, and our expanding intellectual property management operations in Singapore, both in support of the Company's Exchange, Broker Systems, and Carrier Systems divisions.

Sales and Marketing Expenses

Sales and marketing expenses increased \$1.3 million or 25%, from \$5.1 million in 2009 to \$6.4 million in 2010. This expense increase was primarily attributable to additional personnel, marketing, consulting, and facility related costs in support of the increased revenues generated by our Exchange and Broker Systems channels.

General and Administrative Expenses

General and administrative expenses increased \$7.3 million or 43%, from \$16.8 million in 2009 to \$24.1 million in 2010. This increase was primarily associated with additional personnel, increased health and business insurance costs, additional consulting services, increased business travel costs, and additional share-based and discretionary bonus compensation. Also a factor contributing the net increase to general and administrative expenses was the \$822 thousand of bad expense that was recognized in connection with the Company's decision to increase its reserve for doubtful accounts receivable. Partially offsetting these increases in general and administrative expenses was a \$1.5 million benefit associated with the reversal of a previously recorded contingent liability earnout obligation associated with our October 2009 acquisition of Peak, because during the subsequent 2010 earnout period the defined revenue targets was not achieved by the Peak operations.

Amortization and Depreciation Expenses

Amortization and depreciation expenses increased \$2.1 million, or 54%, from \$3.9 million in 2009 to \$6.0 million in 2010. This increase was due to \$1.3 million of additional amortization expense incurred in connection with the customer relationship, developed technology, and non-compete intangible assets that were recognized in connection with our 2010 business acquisitions of MCN, Trades Monitor, and USIX, and our 2009 business acquisitions of E-Z Data, Facts, and Peak. We also incurred increased depreciation expense amounting to \$795 thousand related to additional capital equipment expenditures in support of our growing businesses.

Interest Income

Interest income increased \$320 thousand or 161% from \$199 thousand in 2009 to \$519 thousand in 2010 primarily due to earnings realized on funds invested in foreign banks.

Interest Expense

Interest expense decreased \$168 thousand or 16% from \$1.1 million in 2009 to \$902 thousand in 2010. This decrease was primarily due to the full conversion of \$20.0 million of convertible debt during the third and fourth quarters thereby ceasing further recognition of the imputed interest expense associated with these debt instruments.

Other Non-Operating Income

Other non-operating income of \$6.3 million for the year ending December 31, 2010 consisted of a \$6.0 million gain recognized for the decrease in the fair value of the put option that was issued to the two former stockholders of E-Z Data whom received shares of Ebix common stock as part of the acquisition consideration paid by the Company, and a \$262 thousand gain realized upon the sale of a building.

Foreign Exchange Gain

Net foreign exchange gains decreased \$147 thousand or 11% from \$1.4 million in 2009 to \$1.2 million in 2010. This net decrease is due to the \$949 thousand impact of re-measuring certain intercompany debt obligations largely offset by \$802 thousand of gains recorded in connection with the changes in the fair value of the related derivative instruments the Company holds to hedge the impact of fluctuations in the exchange rates in the foreign jurisdictions in which we conduct our international operations.

Income Taxes

The Company's income tax provision, exclusive of discrete items, for the year ended December 31, 2010, was an expense of \$2.9 million which was reflective of an 4.8% effective tax rate. Included in the discrete items recognized during the 2010 were was the benefit recognized from the \$2.3 million release of the remaining valuation allowance that had been held against certain cumulative net operating loss ("NOL") carryforwards in the United States. This valuation allowance was released at that time as management believed that the uncertainties that had existed regarding the performance of our health benefits exchange operating segment in connection with the potential adverse impacts associated with the than pending health care legislation were no longer relevant. Net of discrete items income tax expense was \$635 thousand for the year 2010, which was \$375 thousand, or 37%, lower than the \$1.0 million income tax expense recognized in 2009, and during which year the Company had a 2.5% effective tax rate. Also facilitating the relatively low consolidated world-wide effective tax rate are the advantages the Company realizes from conducting activities in certain foreign low tax jurisdictions.

LIQUIDITY AND CAPITAL RESOURCES

Our ability to generate significant cash flows from operating activities is one the Company's fundamental financial strengths. Our principal sources of liquidity are the cash flows provided by our operating activities, our revolving credit facility, and cash and cash equivalents on hand.

We intend to utilize cash flows generated by our ongoing operating activities, in combination with possibly expanding our commercial lending facility, and the possible issuance of additional equity or debt securities to fund capital expenditures and organic growth initiatives, to make strategic business acquisitions, to retire outstanding indebtedness, and to possibly repurchase shares of our common stock as market and operating conditions warrant. In the 4th quarter of 2011 the Company paid its first quarterly dividend in the amount of \$0.04 per common share, paying \$1.5 million in the aggregate in regards to this dividend issuance. This same quarterly dividend per share was paid in February 2012. The Company intends to use a portion of its operating cash flows to continue issuing dividends to its shareholders in the foreseeable future, while remaining dedicated to using most of its cash to generate improvement in future earnings by funding organic growth initiatives and accretive business acquisitions.

We believe that anticipated cash flows provided by our operating activities, together with current cash balances and access to our credit facilities and the capital markets, if required, will be sufficient to meet our projected cash requirements for the next twelve months, and the foreseeable future thereafter, although any projections of future cash needs, cash flows, and the general market condition for credit and equity securities may be subject to substantial uncertainty. In the event additional liquidity needs arise, we may raise funds from a combination of sources, including the potential issuance of debt or equity securities. However, there are no assurances that such financing facilities will be available in amounts or on terms acceptable to us, if at all.

We continue to strategically evaluate our ability to sell additional equity or debt securities, and to expand existing or obtain new credit facilities from lenders in order to strengthen our financial position. The sale of additional equity or convertible debt securities could result in additional dilution to our shareholders. We regularly evaluate our liquidity requirements, including the need for additional debt or equity offerings, when considering potential business

acquisitions, development of new products or services, or the retirement of debt. During 2012 the Company intends to utilize its cash and other financing resources towards making strategic accretive acquisitions in the insurance data exchange arena, to fund new product development and service offerings, and to fund other organic growth initiatives. Our cash and cash equivalents were \$23.7 million and \$23.4 million at December 31, 2011 and 2010, respectively. The Company holds material cash and cash equivalent balances overseas in foreign jurisdictions. The free flow of cash from certain countries where we hold such balances may be subject to repatriation tax effects and other restrictions. Furthermore, the repatriation

of earnings from some of our foreign subsidiaries would result in the application of withholding taxes at source as well as a tax at the U.S. parent level upon receipt of the repatriation amounts. The approximate cash, cash equivalents, and short-term investments balances held in our domestic U.S. operations and each of our foreign subsidiaries as of March 12, 2012 is presented in table below (figures denominated in thousands):

	United States	Canada	Latin America	Australia	Singapore	New Zealand	India	Sweden	Total
Cash and ST investments	\$9,356	\$751	\$1,067	\$7,605	\$1,962	\$861	\$9,962	\$15	\$31,579

Due to the effect of temporary or timing differences resulting from the differing treatment of items for tax and accounting purposes and minimum alternative tax obligations in the U.S. and India, future cash outlays for income taxes are expected to exceed current income tax expense but will not adversely impact the Company's liquidity position. Specifically our operations in India benefit from a tax holiday which will continue through 2015; as such the Company's local India taxable income, other than passive interest and rental income, is not taxed. After the tax holiday expires taxable income generated by our India operations will be taxed at 50% of the normal 33.99% corporate tax rate for a period of five years. During the year 2011 this tax holiday had the effect of reducing tax expense by \$11.1 million. The Company also has a relatively low income tax rate in Singapore in which our operations are taxed at a 10% marginal tax rate as a result of concessions granted by the local Singapore Economic Development Board for the benefit of in-country intellectual property owners. The concessionary 10% income tax rate will expire after 2015, at which time our Singapore operations will be subject to the prevailing corporate tax rate in Singapore, which is currently 17%, unless the Company reaches a subsequent agreement to extend the incentive period and the then applicable concessionary rate. The concession granted by the EDB improved net income by \$1.1 million.

Our current ratio declined to 1.28 at December 31, 2011 as compared to 1.56 at December 31, 2010 and our working capital position declined to \$14.0 million at December 31, 2011 as compared to \$21.7 million at the end of the 2010. The reduction in our short-term liquidity position is primarily due to increased trade accounts payable and an increase in deferred revenue liabilities associated with our growing business. We believe that our ability to generate sustainable and robust cash flows from operations will enable the Company to continue to fund its current liabilities from current assets including available cash balances for the foreseeable future.

Business Acquisitions

On February 7, 2011 Ebix closed the merger of Atlanta, Georgia based ADAM, Inc. ("ADAM") with a wholly owned subsidiary of Ebix. Under the terms of the merger agreement, ADAM shareholders received, at a fixed exchange ratio, 0.3122 shares of Ebix common stock for every share of ADAM common stock. Ebix issued approximately 3.65 million shares of Ebix common stock pursuant to the merger. This issuance of shares increased the Company's diluted common share count to approximately 42.07 million shares as of the acquisition date. In addition Ebix paid approximately \$944 thousand in cash for unexercised ADAM stock options. ADAM is a leading provider of health information and benefits technology solutions in the United States.

On November 15, 2011, Ebix acquired Health Connect Systems, Inc. ("Health Connect"). Health connect, with operations based out of Fresno, California, is leading online Exchange for buyers and sellers of health insurance and employee benefits. Ebix acquired all of the outstanding stock of Health Connect for aggregate cash consideration in the amount of \$18.0 million, which was funded with internal resources using available cash reserves.

Operating Activities

For the twelve months ended December 31, 2011, the Company generated \$71.3 million of net cash flow from operating activities compared to \$52.8 million for the year ended December 31, 2010, representing a 35% increase. The major sources of cash provided by our operating activities for 2011 was net income of \$71.4 million, net of \$(4.0) million of net non-cash gains recognized on derivative instruments and foreign currency exchange, \$(5.1) million of deferred tax benefits, \$7.5 million of depreciation and amortization, \$2.2 million of non-cash compensation, \$(2.8) million of acquisition earnout reductions, and \$2.1 million provided by sources of working capital primarily increased trade accounts payable and increased deferred revenue liabilities.

Edgar Filing: EBIX INC - Form 10-K/A

For the twelve months ended December 31, 2010, the Company generated \$52.8 million of net cash flow from operating activities. The major sources of cash provided by our operating activities in 2010 was net income of \$59.0 million, net of \$(8.0) million of net non-cash gains recognized on derivative instruments and foreign currency exchange, \$(6.2) million of working

capital requirements primarily associated with payments of trade payables and increased outstanding trade receivables, \$6.0 million of depreciation and amortization, and \$1.9 million of non-cash compensation.

Investing Activities

Net cash used for investing activities totaled \$13.3 million for the twelve months ended December 31, 2011. During the year the Company used \$17.9 million to acquire Health Connect Solutions in November 2011 (net of \$55 thousand cash acquired), and \$3.5 million was obtained from the February 2011 acquisition of ADAM (net of \$944 thousand used to settle outstanding ADAM stock options). Also during this past year in the aggregate \$577 thousand was paid in connection with the fulfillment earnout payment obligation from certain prior business acquisitions made in 2008, 2009, and 2010. Also during the year \$4.5 million was provided from maturities of marketable securities (specifically bank certificates of deposit), net of purchases, and \$2.8 million was used for capital expenditures in connection with purchases of operating equipment to enhance the performance of our technology platforms and to support the continued growth of our businesses.

Net cash used for investing activities totaled \$24.4 million for the twelve months ended December 31, 2010 of which \$7.1 million was used for the September 2010 acquisition of USIX, \$1.0 million was used for the July 2010 acquisition of E-Trek, \$1.3 million was used for the May 2010 acquisition of Connective Technologies, \$2.7 million was used for the April 2010 acquisition of Trades Monitor, and \$2.9 million was used for the January 2010 acquisition of MCN. Also during 2010 \$3.0 million was used to fulfill earnout payment obligations to the former shareholders of ConfirmNet (a 2008 business acquisition), \$4.5 million was used towards investments in marketable securities (specifically bank certificates of deposit), net of maturities, and \$1.8 million was used for purchases of operating equipment and investments in our technology platforms and to support the growth of our businesses.

Financing Activities

Net cash used for financing activities during the twelve months ended December 31, 2011 was \$55.5 million. This financing cash outflow was comprised of \$63.7 million was used to complete open market repurchases of our common stock, \$6.8 million used to settle a previously issued convertible debt instrument, \$1.5 million used to pay cash dividends in November 2011 to the holders of our common stock, and \$300 thousand was used to service existing capital lease obligations. Partially offsetting these financing cash outflows was \$9.8 million of proceeds (net of \$6.4 million of principal repayments) from our term loan facility with Bank of America, N.A. ("BOA"), and \$6.8 million of proceeds (net of \$33.5 million of repayments) from our revolving credit facility with BOA.

Net cash used for financing activities during the twelve months ended December 31, 2010 was \$25.7 million. This financing cash outflow was comprised of \$22.5 million used for the settlement of previously issued convertible debt instruments, \$10.7 million used to complete open market repurchases of our common stock, and \$804 thousand was used to service capital lease obligations. Partially offsetting these financing cash outflows was \$5.2 million of proceeds (net of principal repayments) from our term loan facility with Bank of America, N.A. ("BOA"), \$1.9 million of proceeds (net of repayments) from our revolving credit facility with BOA, and \$1.2 million from the exercise of stock options.

Commercial Bank Financing Facility

On April 20, 2011 the Company entered into a seventh amendment to a credit agreement (the "Seventh Amendment") with Bank of America, N.A. ("BOA"), as administrative agent, which materially amended the initial credit agreement dated February 12, 2010. The Seventh Amendment increased the existing revolving credit facility from \$25 million to \$35 million with its term ending on April 20, 2014, and the \$10 million secured term loan was increased to \$20 million and amortizing over a three year period with quarterly principal and interest payments that commenced on June 30, 2011 and a final payment of all remaining outstanding principal and accrued interest that will be due on April 20, 2014. The entire credit facility has a variable interest rate currently set at LIBOR plus 1.50%. The Company deferred the origination costs in connection with this expanded and amended credit facility, and is amortizing these costs into interest expense over the three-year life of the credit agreement. The revolving credit facility is used by the Company to fund working capital requirements primarily in support of current operations, expanding operations and associated growth, and strategic business acquisitions. The underlying financing agreement contains financial covenants regarding the Company's annualized EBITDA, fixed charge coverage ratio, and leverage

ratio, as well as certain restrictive covenants pertaining to such matters incurring new debt, the aggregate amount of repurchases of the Company's equity shares, and the consummation of new business acquisitions. The Company currently is in compliance with all such financial and restrictive covenants, and there have been no violations thereof or in the event of noncompliance, appropriate waivers having been obtained.

Originally in February 2010 the Company entered into the initial credit facility with BOA. The financing was comprised of a two-year, \$25 million secured revolving credit facility, and a \$10 million secured term loan which amortized over a two year period with quarterly principal and interest payments that commenced on March 31, 2010 and a final payment of all remaining outstanding principal and accrued interest that was to be due on February 12, 2012. The interest rate applicable to the entire BOA credit facility was LIBOR plus 1.50%.

At December 31, 2011 the outstanding balance on the revolving line of credit was \$31.8 million and the facility carried an interest rate of 1.75%. This balance is included in long-term liabilities section of the Condensed Consolidated Balance Sheet. During the twelve months ending December 31, 2011 the average and maximum outstanding balance on the revolving line of credit was \$20.9 million and \$34.8 million, respectively.

At December 31, 2011, the outstanding balance on the term loan was \$15.0 million of which \$6.7 million is due within the next twelve months. This term loan also carried an interest rate of 1.75%. During the twelve months ended December 31, 2011 payments in the aggregate amount of \$6.3 million were made against the term loan.

Convertible Debt

In August 2009 the Company entered into a Convertible Note Purchase Agreement with the Rennes Foundation in an original amount of \$5.0 million, which amount is convertible into shares of common stock at a conversion price of \$16.66 per share (the "Note"). The Note had a 0.0% stated interest rate and no warrants were issued. The Note was to be payable in full at its maturity date of August 25, 2011. The Company applied imputed interest on this convertible note using an interest rate of 1.75% and discounted their carrying value accordingly. During the twelve months ending December 31, 2011 the Company recognized \$21 thousand of interest expense on the Note. With respect to this convertible note, and in accordance with its terms, as was understood between the Company and the holder, upon a conversion election by the holder, the Company had to satisfy the related original principal balance in cash and could satisfy the conversion spread (that being the excess of the conversion value over the related original principal component) in either cash or stock at option of the Company. On April 18, 2011, the Rennes Foundation elected to fully convert the Note. The Company settled this conversion election by paying \$5.00 million in cash with respect to the principal component, and paying \$1.8 million in cash with respect to the conversion spread.

Also in August 2009 the Company issued two convertible promissory notes raising a total of \$20.0 million.

Specifically the Company entered into a Convertible Note Purchase Agreement with Whitebox in an original amount of \$19.0 million, which amount was convertible into shares of common stock at a conversion price of \$16.00 per share. The note had a 0.0% stated interest rate and no warrants were issued. The note was to be payable in full at its maturity date of August 26, 2011. Also at this time the Company entered into a Convertible Note Purchase Agreement with IAM Mini-Fund 14 Limited, a fund managed by Whitebox, in an original amount of \$1.0 million, which amount was convertible into shares of common stock at a conversion price of \$16.00 per share. The note had a 0.0% stated interest rate and no warrants were issued. The note was to be payable in full at its maturity date of August 26, 2011. The Company also applied imputed interest on these convertible notes using an interest rate of 1.75% and discounted their carrying value accordingly. During the twelve months ending December 31, 2010 the Company recognized \$328 thousand of interest expense in regards to these notes. With respect to each of these convertible notes, and in accordance with the terms of the notes, as understood between the Company and each of the holders, upon a conversion election by the holder the Company was to satisfy the related original principal balance in cash and could satisfy the conversion spread (that being the excess of the conversion value over the related original principal component) in either cash or stock at option of the Company. On November 10, 2010 Whitebox VSC, Ltd and IAM Mini-Fund 14 Limited elected to fully convert all of the remaining Convertible Promissory Notes. The Company settled these conversion elections by paying \$20 million in cash with respect to the principal component, paying \$2.5 million in cash for a portion of the conversion spread, and issuing 283,378 shares of Ebix common stock for the remainder of the conversion spread.

The Company also previously had a \$15.0 million convertible note with Whitebox, originally dated July 11, 2008. On February 3, 2010, Whitebox fully converted the remaining principal on the \$15 million note in the amount of \$4.39 million and accrued interest in the amount of \$62 thousand into 476,662 shares of the Company's common stock.

As of December 31, 2011 the Company has no remaining convertible debt obligations.

Contractual Obligations and Commercial Commitments

The following table summarizes our known contractual purchase obligations and other long-term obligations as of December 31, 2011. The table excludes commitments that are contingent based on events or factors uncertain at this time.

13

	Payment Due by Period				
	Total	Less Than 1 Year	1 - 3 Years	3 - 5 Years	More than 5 years
	(in thousands)				
Short and Long-term Debt	\$46,750	\$6,667	\$40,083	\$—	\$—
Operating leases	16,487	4,196	6,104	2,941	3,246
Capital Leases	346	198	148	—	—
Total	\$63,583	\$11,061	\$46,335	\$2,941	\$3,246

Off Balance Sheet Transactions

We do not engage in off-balance sheet financing activities.

Inflation

We do not believe that the rate of inflation has had a material effect on our operating results. However, inflation could adversely affect our future operating results.

RECENT ACCOUNTING PRONOUNCEMENTS

The following is a brief discussion of recently released accounting pronouncements that are pertinent to the Company's business:

In June 2011, the FASB issued new financial reporting guidance regarding the reporting of "other comprehensive income, or (OCI)". This guidance revises the manner in which entities present comprehensive income in their financial statements. The new guidance requires entities to report components of comprehensive income in either (1) a continuous statement of comprehensive income, or (2) two separate but consecutive statements. Under the two-statement approach, the first statement would include components of net income, which is consistent with the income statement format used currently, and the second statement would include components of OCI. Under either method, entities must display adjustments for items that are reclassified from OCI to net income in both net income and OCI. The new reporting guidance does not change the items that must be reported in OCI. This new reporting standard is effective for interim and annual periods beginning after December 15, 2011, however, the FASB recently decided to defer the effective date for the part of this new guidance that would require adjustments of items out of accumulated other income to be presented as components of both net income and other comprehensive income in financial statements. Those changes would have been effective for annual and interim periods beginning on or after December 15, 2011, but are now deferred until FASB can adequately evaluate the costs and benefits of this presentation requirement. After adoption, the guidance must be applied retrospectively for all periods presented in the financial statements. The Company will adopt this new guidance promptly when required, however we do not expect that it will have a material impact on our financial position or operating results as the only element of comprehensive income relevant to Ebix is in regards to cumulative foreign currency translation adjustments.

In September 2011, the FASB issued new technical guidance regarding an entity's evaluation of goodwill for possible impairment. Under this new guidance an entity has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If after assessing the totality of events or circumstances, an entity determines that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step quantitative impairment test is unnecessary. This new technical guidance was effective for fiscal years beginning after December 15, 2011. Early adoption was permitted for annual and interim goodwill impairment evaluations performed as of a date before September 2011, if an entity's financial statements for the most recent annual or interim period have not yet been issued. The Company elected to adopt early and accordingly applied this new guidance to its 2011 annual impairment evaluation of goodwill.

In December 2010, the Emerging Issues Task Force of the FASB reached consensus regarding the disclosure of pro forma information for business combinations. This new guidance addressed the diversity in practice concerning the

interpretation of the pro forma revenue and earnings disclosure requirements for business combinations. The guidance specifies that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination had occurred as of the beginning of the comparable prior annual reporting period only. The amendments also expand the supplemental pro forma disclosures to include a description of the nature and amount of material, nonrecurring

pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. The amendments affect any public entity that enters into business combinations that are material on an individual or aggregate basis. The new guidance was applicable to business combinations for which the acquisition date is on or after the first annual reporting period beginning on or after December 15, 2010. The Company adopted this new guidance in 2011 and applied it to the disclosures regarding our recent acquisitions of ADAM, completed in February 2011, and Health Connect, completed in November 2011.

In January 2010, the FASB issued new guidance regarding disclosures about fair value measurements. The guidance requires additional disclosures and clarifies some existing disclosure requirements about fair value measurement as set forth in earlier related guidance. Specifically this new guidance requires a reporting entity to disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and describe the reasons for the transfers; and for fair value measurements using significant unobservable inputs, a reporting entity should present separately information about purchases, sales, issuances, and settlements. Also a reporting entity should provide disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements. This new guidance was effective for interim and annual reporting periods beginning after December 15, 2009. The Company adopted and applied this technical guidance 2010.

In September 2009, FASB issued amended revenue recognition guidance related to revenue arrangements with multiple deliverables. This new pronouncement: (a) provides application guidance on whether multiple deliverables exist in an arrangement with a customer, and if so, how the arrangement consideration should be separated and allocated; (b) requires an entity to allocate revenue using estimated selling prices of deliverables if vendor-specific objective evidence (“VSOE”) or third party evidence (“TPE”) of selling prices is not available; and, (c) eliminates the use of the “residual method” to allocate revenue. This guidance was to be applied on a prospective basis for revenue arrangements entered into in fiscal years beginning on or after June 15, 2010, with earlier application permitted.

Alternatively, an entity can elect to adopt new guidance on a retrospective basis. The Company adopted this new guidance in 2011 and its adoption did not have a material impact on the Company's consolidated results of operation. Also in September 2009, the FASB issued new guidance related to certain revenue arrangements that include software elements and provides guidance on determining whether software deliverables in an arrangement that include tangible products are within the scope of existing software revenue guidance. This guidance is to be applied on a prospective basis for revenue arrangements entered into in fiscal years beginning on or after June 15, 2010, with earlier application permitted. Alternatively, an entity can elect to adopt new guidance on a retrospective basis. The Company adopted this new guidance in 2011 and its adoption did not have a material impact on the Company's consolidated results of operation.

APPLICATION OF CRITICAL ACCOUNTING POLICIES

The preparation of financial statements in conformity with generally accepted accounting principles (“GAAP”), as promulgated in the United States, requires our management to make estimates and assumptions that affect the reported amounts of assets and liabilities, revenues and expenses and related disclosures of contingent assets and liabilities in our Consolidated Financial Statements and accompanying notes. We believe the most complex and sensitive judgments, because of their significance to the Consolidated Financial Statements, result primarily from the need to make estimates and assumptions about the effects of matters that are inherently uncertain. The following accounting policies involve the use of “critical accounting estimates” because they are particularly dependent on estimates and assumptions made by management about matters that are uncertain at the time the accounting estimates are made. In addition, while we have used our best estimates based on facts and circumstances available to us at the time, different estimates reasonably could have been used in the current period, or changes in the accounting estimates that we used are reasonably likely to occur from period to period which may have a material impact on our financial condition and results of operations. For additional information about these policies, see Note 1 of the Notes to the Consolidated Financial Statements in this Form 10-K. Although we believe that our estimates, assumptions and judgments are reasonable, they are limited based upon information presently available. Actual results may differ significantly from these estimates under different assumptions, judgments or conditions.

Revenue Recognition

The Company derives its revenues primarily from professional and support services, which includes subscription and transaction fees pertaining to services delivered over our exchanges or from our ASP platforms, revenue generated from software development projects and associated fees for consulting, implementation, training, and project management provided to customers with installed systems, and business process outsourcing revenue. Sales and value-added taxes are not included in revenues, but rather are recorded as a liability until the taxes assessed are remitted to the respective taxing authorities.

In accordance with Financial Accounting Standard Board (FASB) and Securities and Exchange Commission Staff

Accounting (SEC) accounting guidance on revenue recognition the Company considers revenue earned and realizable when: (a) persuasive evidence of the sales arrangement exists, (b) the arrangement fee is fixed or determinable, (c) service delivery or performance has occurred, (d) customer acceptance has been received, if contractually required, and (e) collectability of the arrangement fee is probable. The Company typically uses signed contractual agreements as persuasive evidence of a sales arrangement. We apply the provisions of the relevant FASB accounting pronouncements when making estimates or assumptions related to transactions involving the license of software where the software deliverables are considered more than inconsequential to the other elements in the arrangement. For contracts that contain multiple deliverables, we analyze the revenue arrangements when making estimates or assumptions in accordance with the appropriate authoritative guidance, which provides criteria governing how to determine whether goods or services that are delivered separately in a bundled sales arrangement should be considered as separate units of accounting for the purpose of revenue recognition. Deliverables are accounted for separately if they meet all of the following criteria: (a) the delivered item has value to the customer on a stand-alone basis; (b) there is objective and reliable evidence of the fair value of the undelivered items; and (c) if the arrangement includes a general right of return relative to the delivered items, the delivery or performance of the undelivered items is probable and substantially controlled by the Company.

The Company begins to recognize revenue from license fees for its ASP products upon delivery and the customer's acceptance of the software implementation and customizations if necessary and applicable. Transaction services fee revenue for this use of our exchanges or ASP platforms is recognized as the transactions occur and are generally billed in arrears. Service fees for hosting arrangements are recognized over the requisite service period. Revenue derived from the licensing of third party software products in connection with sales of the Company's software licenses and is recognized upon delivery together with the Company's licensed software products. Training, data conversion, installation, and consulting services fees are recognized as revenue when the services are performed. Revenue for maintenance and support services is recognized ratably over the term of the support agreement. Revenues derived from initial setup or registration fees are recognized ratably over the term of the agreement in accordance with FASB and SEC accounting guidance on revenue recognition.

Deferred revenue includes maintenance and support payments or billings that have been received and recorded prior to performance and, in certain cases, cash collections; initial setup or registration fees under hosting agreements; software license fees received in advance of delivery, acceptance, and/or completion of the earnings process; and amounts received under multi-element arrangements in which objective evidence of the fair value for the undelivered elements does not exist. In these instances revenue is recognized when the fair value of the undelivered elements is determinable or when all contractual elements have been completed and delivered.

Allowance for Doubtful Accounts Receivable

Management specifically analyzes accounts receivable and historical bad debts, write-offs, customer concentrations, customer credit-worthiness, current economic trends and changes in our customer payment terms when evaluating uncertainties and estimate as to the collectability of outstanding accounts receivable and the adequacy of the Company's recorded allowance for doubtful accounts.

Valuation of Goodwill

Goodwill represents the cost in excess of the fair value of the identifiable net assets of acquired businesses. The Company applies the provisions of the FASB's accounting guidance on goodwill and other intangible assets which addresses how goodwill and other acquired intangible assets should be accounted for in financial statements. In this regard we test these intangible assets for impairment annually or more frequently if indicators of potential impairment are present. Such potential impairment indicators include a significant change in the business climate, legal factors, operating performance indicators, competition, and the sale or disposition of a significant portion of the business. The testing involves comparing the reporting unit and intangible asset carrying values to their respective fair values; we determine fair value by applying the discounted cash flow method using the present value of future estimated net cash flows. The cash flow projections are based on our views of growth rates, anticipated future economic conditions and the appropriate discount rates relative to risk and estimates of residual values. We believe that our estimates are consistent with assumptions that marketplace participants would use in their estimates of fair value. The use of different estimates or assumptions for our projected discounted cash flows (e.g., growth rates, future economic conditions, discount rates and estimates of terminal values) when determining the fair value of our reporting units

could result in different values and may result in a goodwill impairment charge. During the twelve months ended December 31, 2011, 2010, and 2009, we had no impairment of our reporting unit goodwill balances. For additional information about goodwill, see Note 1 of the Notes to Consolidated Financial Statements in this Form 10-K.

Income Taxes

We account for income taxes in accordance with FASB accounting guidance on the accounting and disclosure of income taxes, which involves estimating the Company's current tax exposure together with assessing temporary differences

resulting from differing treatment of items for tax and accounting purposes. These differences result in deferred tax assets and liabilities, which are included in our Consolidated Balance Sheets. We then assess the likelihood that our net deferred tax assets will be recovered from future taxable income in the years in which those temporary differences are expected to be recovered or settled, and, to the extent we believe that recovery is not likely, we establish a valuation allowance.

The Company has not recognized a deferred U.S. tax liability and associated income tax expense for the undistributed earnings of its foreign subsidiaries because the from these foreign subsidiaries will remain permanently reinvested in those subsidiaries to fund ongoing operations and growth. The amount of such unrecognized deferred tax liability as of December 31, 2011 would have been approximately \$51.4 million

The Company follows the provisions of FASB accounting guidance on accounting for uncertain income tax positions. This guidance clarified the accounting for uncertainty in income taxes by prescribing the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. The guidance utilizes a two-step approach for evaluating tax positions. Recognition (“Step 1”) occurs when an enterprise concludes that a tax position, based solely on its technical merits is more likely than not to be sustained upon examination. Measurement (“Step 2”) is only addressed if Step 1 has been satisfied. Under Step 2, the tax benefit is measured at the largest amount of benefit, determined on a cumulative probability basis that is more likely than not to be realized upon final settlement.

Foreign Currency Translation

Our reporting currency is the U.S. dollar. The functional currency of the Company’s foreign subsidiaries is the local currency of the country in which the subsidiary operates. The assets and liabilities of foreign subsidiaries are translated into U.S. Dollars at the rates of exchange at the balance sheet dates. Income and expense accounts are translated at the average exchange rates in effect during the period. Gains and losses resulting from translation adjustments are included as a component of other comprehensive income in the accompanying consolidated financial statements. Foreign exchange transaction gains and losses that are derived from transactions denominated in other than the subsidiary’s’ functional currency is included in the determination of net income.

Quarterly Financial Information (unaudited):

Item 8: FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Notes to Consolidated Financial Statements

Note 1: Description of Business and Summary of Significant Accounting Policies

Description of Business—Ebix, Inc. and subsidiaries (“Ebix” or the “Company”) is an international supplier of on-demand software and e-commerce solutions to the insurance industry. Ebix provides various application software products for the insurance industry ranging from carrier systems, agency systems and exchanges to custom software development for all entities involved in the insurance and financial industries. Products include data exchanges, carrier systems, agency systems, and feature fully customizable and scalable on-demand software designed to improve the way insurance professionals manage all aspects of distribution, including: marketing, sales, service, accounting and management. The Company has its headquarters in Atlanta, Georgia and also operated in eight other countries during 2011 including Australia, Canada, China, India, Japan, New Zealand, Singapore, and Brazil. International revenue accounted for 29%, 29% and 25% of total revenue in 2011, 2010 and 2009, respectively.

The Company’s revenues are derived from four product channels. Presented in the table below is the breakout of our revenue streams for each of those product channels for the years ended December 31, 2011, 2010 and 2009.

(dollar amounts in thousands)	For the Year Ended		
	December 31,		
	2011	2010	2009
Exchanges	\$ 130,638	\$ 94,212	\$ 60,764
Broker Systems	18,006	13,841	11,599
Business Process Outsourcing (“BPO”)	14,944	15,586	14,698
Carrier Systems	5,381	8,549	10,624
Totals	\$ 168,969	\$ 132,188	\$ 97,685

Summary of Significant Accounting Policies

Basis of Presentation—The consolidated financial statements include the accounts of Ebix and its wholly-owned subsidiaries which include:

Ebix.com, International, Inc., a Delaware corporation

Ebix International, LLC, a Delaware limited liability company

Ebix Insurance Agency, Inc., an Illinois corporation

EbixLife Inc., a Utah corporation

Finetre Corporation, an Indiana corporation

Ebix BPO Division — San Diego, a California corporation

Jenquest, Inc., a California corporation

Acclamation Systems, Inc., a Pennsylvania corporation

FACTS Services Inc., a Florida corporation

E-Z Data, Acquisition Sub, LLC, a California limited liability company

Peak Performance Solutions, Inc., a Delaware limited liability company

ADAM, Inc., a Georgia corporation

Agency Solutions.com, LLC (d.b.a. HealthConnect Systems), a Delaware limited liability company

Ebix Software India Private Limited

Ebix Software India SEZ, Private Limited

Premier Ebix Exchange Software Private Ltd.

Ebix Australia Pty., Ltd.

Ebix Australia (VIC) Pty. Ltd.

Ebix Exchange-Australia PTY LTD

Ebix New Zealand

Ebix New Zealand Holdings

Ebix Singapore PTE LTD

Ebix Latin America, LLC, a Georgia limited liability company
EIH Holdings AB, a Swedish business corporation
EIH Holdings KB, a Swedish business partnership
Ebix Asia Holdings Inc., a Mauritius business corporation.
USIX Technology, S.A., a Brazilian corporation

MCN Technology & Consulting, Ltda., a Brazilian limited liability company.

The effect of inter-company balances and transactions has been eliminated.

Use of Estimates—The preparation of consolidated financial statements in conformity with generally accepted accounting principles ("GAAP") in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and reported amounts of revenue and expenses during the reporting periods. Management has made material estimates primarily with respect to revenue recognition and deferred revenue, accounts receivable, acquired intangible assets, and the provision for income taxes. Actual results may be materially different from those estimates.

Reclassification—Certain of the prior year balances including the note thereto have been reclassified to conform to the current year presentation.

Segment Reporting—Since the Company, from the perspective of its chief operating decision maker, allocates resources and evaluates business performance as a single entity that provides software and related services to a single industry on a worldwide basis, the Company reports as a single segment. The applicable enterprise-wide disclosures are included in Note 16.

Cash and Cash Equivalents—The Company considers all highly liquid investments with an original maturity of three months or less at the time of purchase to be cash equivalents. Such investments are stated at cost, which approximates fair value. The Company does not maintain cash balances in banking institutions in excess of federally insured amounts and therefore is exposed to the related potential credit risk associated with such cash deposits.

Short-term Investments—The Company's short-term investments consist of certificates of deposits with established commercial banking institutions with readily determinable fair values. Ebix accounts for investments that are reasonably expected to be realized in cash, sold or consumed during the year as short-term investments that are available-for-sale. The carrying amount of investments in marketable securities approximates fair value. The carrying value of our short-term investments was \$1.5 million and \$6.3 million at December 31, 2011 and 2010, respectively.

Fair Value of Financial Instruments—The Company follows the relevant GAAP guidance regarding the determination and measurement of the fair value of financial instruments in which fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction value hierarchy which requires an entity to maximize the use of observable inputs when measuring fair value. The guidance describes the following three levels of inputs that may be used in the methodology to measure fair value:

- Level 1 — Quoted prices available in active markets for identical investments as of the reporting date;
- Level 2 — Inputs other than quoted prices in active markets, which are either directly or indirectly observable as of the reporting date; and,
- Level 3 — Unobservable inputs, which are to be used in situations where there is little or no market activity for the asset or liability and wherein the reporting entity makes estimates and assumptions related to the pricing of the asset or liability including assumptions regarding risk.

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

As of December 31, 2011 the Company has the following financial instruments to which it had to consider fair values and had to make fair assessments:

- Foreign currency hedges for which the fair values are measured as a Level 2 instrument.
- Common share-based put option for which the fair value was measured as Level 2 instrument.
- Short-term investments for which the fair values are measured as a Level 1 instrument.
- Contingent accrued earn-out business acquisition consideration liabilities.

Additional information regarding the Company's assets and liabilities that are measured at fair value on a recurring basis is presented in the following table:

20

Descriptions	Fair Values at Reporting Date Using*			
	Balance at December 31, 2011	Quoted Prices in Active Markets for Identical Assets or Liabilities (Level 1)	Significant Observable Inputs (Level 2)	Other Significant Unobservable Inputs (Level 3)
(In thousands)				
Assets				
Available-for-sale securities:				
Commercial bank certificates of deposits	\$1,505	\$1,505	\$—	\$—
Total assets measured at fair value	\$1,505	\$1,505	\$—	\$—
Liabilities				
Derivatives:				
Foreign exchange contracts (a)	\$2,346	\$—	\$2,346	\$—
Contingent accrued earn-out acquisition consideration (b)	7,590	—	—	7,590
Total liabilities measured at fair value	\$9,936	\$—	\$2,346	\$7,590

(a) The market valuation approach is applied and the valuation inputs include foreign currency exchange spot rates, forward premiums, forward foreign currency exchange rates, term, and maturity dates

(b) The income valuation approach is applied and the valuation inputs include the contingent payment arrangement terms, projected cash flows, rate of return, and probability assessments.

* During the year ending December 31, 2011 there were no transfers between fair value levels 1, 2 or 3.

For the Company's assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3), the following table provides a reconciliation of the beginning and ending balances for each category therein, and gains or losses recognized during the year.

Fair Value Measurements Using Significant Unobservable Inputs (Level 3)

	Contingent Liability for Accrued Earn-out Acquisition Consideration (in thousands)	
Beginning balance at January 1, 2011	\$8,693	
Total remeasurement adjustments:		
(Gains) or losses included in earnings **	(2,846))
(Gains) or losses recorded against goodwill	(1,177))
Foreign currency translation adjustments ***	(205))
Acquisitions and settlements		
Business acquisitions	3,506	
Settlements	(381))
Ending balance at December 31, 2011	\$7,590	
The amount of total (gains) or losses for the year included in earnings or changes to net assets, attributable to changes in unrealized (gains) or losses relating to assets or liabilities still held at year-end.	\$(2,671))

** recorded as an adjustment to reported general and administrative expenses

*** recorded as a component of other comprehensive income within stockholders' equity

The Company believes the carrying amount of its commercial line of credit, term loan, and capital lease obligations are a reasonable estimate of their fair value due to the short remaining maturity of these items and/or their fluctuating interest rates.

Revenue Recognition and Deferred Revenue—The Company derives its revenues primarily from professional and support services, which includes revenue generated from subscription and transaction fees pertaining to services delivered over our exchanges or from our application service provider (“ASP”) platforms, software development projects and associated fees for consulting, implementation, training, and project management provided to customers using our systems, and business process outsourcing revenue (“BPO”). Sales and value-added taxes are not included in revenues, but rather are recorded as a liability until the taxes assessed are remitted to the respective taxing authorities. In accordance with the Financial Accounting Standards Board (“FASB”), GAAP, and Securities and Exchange Commission Staff Accounting (“SEC”) accounting guidance on revenue recognition the Company considers revenue earned and realizable when: (a) persuasive evidence of the sales arrangement exists, (b) the arrangement fee is fixed or determinable, (c) service delivery or performance has occurred, (d) customer acceptance has been received, if contractually required, and (e) collectability of the arrangement fee is probable. The Company typically uses signed contractual agreements as persuasive evidence of a sales arrangement. We apply the provisions of the relevant FASB accounting pronouncements related to all transactions involving the

license of software where the software deliverables are considered more than inconsequential to the other elements in the arrangement. For contracts that contain multiple deliverables, we analyze the revenue arrangements in accordance with the appropriate authoritative guidance, which provides criteria governing how to determine whether goods or services that are delivered separately in a bundled sales arrangement should be considered as separate units of accounting for the purpose of revenue recognition. Deliverables are accounted for separately if they meet all of the following criteria: a) the delivered item has value to the customer on a stand-alone basis; b) there is objective and reliable evidence of the fair value of the undelivered items; and c) if the arrangement includes a general right of return relative to the delivered items, the delivery or performance of the undelivered items is probable and substantially controlled by the Company.

The Company begins to recognize revenue from license fees for its ASP products upon granting customer access to the respective processing platform. Transaction services fee revenue for this use of our exchanges or ASP platforms is recognized as the transactions occur and are generally billed in arrears. Revenues from BPO arrangements, which include data entry and call center services, and insurance certificate creation and tracking services, are recognized as the services are performed. Service fees for hosting arrangements are recognized over the requisite service period. Revenue derived from the licensing of third party software products in connection with sales of the Company's software licenses is recognized upon delivery together with the Company's licensed software products. Fees for training, data conversion, installation, and consulting services fees are recognized as revenue when the services are performed. Revenue for maintenance and support services are recognized ratably over the term of the support agreement.

Software development arrangements involving significant customization, modification or production are accounted for in accordance with the appropriate technical accounting guidance issued by the FASB using the percentage-of-completion method. The Company recognizes revenue using periodic reported actual hours worked as a percentage of total expected hours required to complete the project arrangement and applies the percentage to the total arrangement fee.

Deferred revenue includes payments or billings that have been received or made prior to performance and, in certain cases, cash collections and pertain to maintenance and support, initial setup or registration fees under hosting agreements, and software license fees received in advance of delivery and acceptance. Approximately \$8.3 million and \$5.0 million of deferred revenue were included in accounts receivable at December 31, 2011 and 2010, respectively.

Accounts Receivable and the Allowance for Doubtful Accounts Receivable—Reported accounts receivable as of December 31, 2011 include \$31.1 million of trade receivables net of the \$1.7 million estimated allowance for doubtful accounts receivable. Included in accounts receivable is \$5.2 million of unbilled receivables. There was approximately \$8.3 million of deferred revenue included in accounts receivable, billed and unbilled, at December 31, 2011. At December 31, 2010 the Company had \$26.0 of trade accounts receivable net of the \$1.1 million estimated allowance for doubtful accounts receivable, and included \$4.6 million of unbilled receivables. There was approximately \$5.0 million of deferred revenue included in accounts receivable, billed and unbilled, at December 31, 2010. Management specifically analyzes accounts receivable and historical bad debts, write-offs, customer concentrations, customer credit-worthiness, current economic trends, and changes in our customer payment terms when evaluating the adequacy of the allowance for doubtful accounts. Bad debt expense was \$1.0 million, \$1.2 million, and \$321 thousand for the year ended December 31, 2011, 2010, and 2009 respectively.

Costs of Services Provided—Costs of services provided consist of data processing costs, customer support costs including personnel costs to maintain our proprietary databases, costs to provide customer call center support, hardware and software expense associated with transaction processing systems and exchanges, telecommunication and computer network expense, and occupancy costs associated with facilities where these functions are performed. Depreciation expense is not included in costs of services provided.

Goodwill and Indefinite-Lived Intangible Assets— Goodwill represents the cost in excess of the fair value of the identifiable net assets from the businesses that we acquire. In accordance with the relevant FASB accounting guidance, goodwill is tested for impairment at the reporting unit level on an annual basis or on an interim basis if an event occurred or circumstances change that would indicate that fair value of a reporting unit decreased below its carrying value. Potential impairment indicators include a significant change in the business climate, legal factors,

operating performance indicators, competition, and the sale or disposition of a significant portion of the business. In 2011 the Company is applying the new guidance concerning goodwill impairment evaluation. In accordance with this new technical guidance the Company first assessed certain qualitative factors to determine whether the existence of events or circumstances would indicate that it is more likely than not that the fair value of any of our reporting units was less than their than its carrying amount. If after assessing the totality of events or circumstances, we were to determine that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then we would not perform the two-step quantitative impairment testing described further below.

The aforementioned two-step quantitative testing process involves comparing the reporting unit carrying values to their respective fair values; we determine fair value of our reporting units by applying the discounted cash flow method using the

present value of future estimated net cash flows. If the fair value of a reporting unit exceeds its carrying value, then no further testing is required. However, if a reporting unit's fair value were to be less than its carrying value, we would then determine the amount of the impairment charge, if any, which would be the amount that the carrying value of the reporting unit's goodwill exceeded its implied value. Projections of cash flows are based on our views of growth rates, operating costs, anticipated future economic conditions and the appropriate discount rates relative to risk and estimates of residual values. We believe that our estimates are consistent with assumptions that marketplace participants would use in their estimates of fair value. The use of different estimates or assumptions for our projected discounted cash flows (e.g., growth rates, future economic conditions, discount rates and estimates of terminal values) when determining the fair value of our reporting units could result in different values and may result in a goodwill impairment charge. We perform our annual goodwill impairment evaluation and testing as of September 30 each year. During the years ended December 31, 2011, 2010, and 2009, we had no impairment of our reporting unit goodwill balances.

During 2011 the Company recorded \$60.1 million of goodwill in connection with the recent acquisitions of ADAM, Inc. ("ADAM") acquired in February 2011 and \$20.4 million of goodwill in connection with the acquisition of Health Connect Systems ("HCS") acquired in November 2011. Also during 2011 the Company recognized a net reduction in the amount of \$257 thousand in regards to adjustments to recorded goodwill in connection with business acquisitions made during the years 2008 to 2010. During 2010 the Company recorded \$19.2 million of goodwill in connection with the acquisitions of MCN Technology & Consulting ("MCN"), Trades Monitor Australia Pty ("Trades Monitor"), Connective Technologies, Inc. ("Connective Technologies"), E-Trek Solutions PTE Ltd, ("E-Trek"), and USIX Technology, S.A.

Changes in the carrying amount of goodwill for the year ended December 31, 2011 and 2010 are as follows:

	December 31, 2011	December 31, 2010
	(In thousands)	
Beginning Balance	\$180,602	\$157,245
Additions	80,259	19,211
Foreign currency translation adjustments	(1,643) 4,146
Ending Balance	\$259,218	\$180,602

The Company's indefinite-lived assets are associated with the estimated fair value of the contractual customer relationships existing with the property and casualty insurance carriers in Australia using our property and casualty ("P&C") data exchange and with ten corporate customers using our client relationship management ("CRM") platform in the United States. Prior to these underlying business acquisitions Ebix had pre-existing contractual relationships with these carriers and corporate clients. The contracts are renewable at little or no cost, and Ebix intends to continue to renew these contracts indefinitely and has the ability to do so. The proprietary technology supporting the P&C data exchange and CRM platform, and used to deliver services to these carriers and corporate clients, cannot feasibly be effectively replaced in the foreseeable future, and accordingly the cash flows forthcoming from these customers are expected to continue indefinitely. With respect to the determination of the indefinite life, the Company considered the expected use of these intangible assets, historical experience in renewing or extending similar arrangements, and the effects of competition, and concluded that there were no indications from these factors to suggest that the expected useful life of these customer relationships would be finite. The Company concluded that no legal, regulatory, contractual, or competitive factors limited the useful life these intangible assets and therefore their life was considered to be indefinite, and accordingly the Company expects these customer relationships to remain the same for the foreseeable future. The fair values of these indefinite-lived intangible assets were based on the analysis of discounted cash flow ("DCF") models extended out fifteen to twenty years. In that indefinite-lived does not imply an infinite life, but rather means that the subject customer relationships are expected to extend beyond the foreseeable time horizon, we utilized fifteen to twenty year DCF projections, as the valuation models that were applied consider a fifteen to twenty year time frame to be an indefinite period. Indefinite-lived intangible assets are not amortized, but rather are tested for impairment annually. We perform our annual impairment testing of indefinite-lived intangible assets as of September 30th of each year. During the years ended December 31, 2011, 2010, and 2009, we had no impairments to the recorded balances of our indefinite-lived intangible assets. We perform the impairment test for our indefinite-lived

intangible assets by comparing the asset's fair value to its carrying value. An impairment charge is recognized if the asset's estimated fair value is less than its carrying value.

Purchased Intangible Assets—Purchased intangible assets represent the estimated fair value of acquired intangible assets from the businesses that we acquire in the U.S. and foreign countries in which we operate. These purchased intangible assets include customer relationships, developed technology, informational databases, and trademarks. We amortize these intangible assets on a straight-line basis over their estimated useful lives, as follows:

24

Category	Life (yrs)
Customer relationships	4-20
Developed technology	3-12
Trademarks	5-15
Non-compete agreements	5
Database	10

Intangible assets as of December 31, 2011 and December 31, 2010 are as follows:

	December 31,	
	2011	2010
	(In thousands)	
Intangible assets:		
Customer relationships	\$40,289	\$24,001
Developed technology	11,640	9,343
Trademarks	2,188	218
Non-compete agreements	418	418
Backlog	140	140
Database	207	213
Total intangibles	54,882	34,333
Accumulated amortization	(16,496)	(11,759)
Intangibles, net	\$38,386	\$22,574
Indefinite-lived intangibles:		
Customer/territorial relationships	\$30,453	\$30,552

Income Taxes— The Company follows the asset and liability method of accounting for income taxes pursuant to the pertinent guidance issued by the FASB. Deferred income taxes are recorded to reflect the tax consequences on future years of differences between the tax basis of assets and liabilities, and operating loss and tax credit carry forwards, and their financial reporting amounts at each period end using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. In assessing the realizability of the deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. A valuation allowance is recorded for the portion of the deferred tax assets that are not expected to be realized based on the levels of historical taxable income and projections for future taxable income over the periods in which the temporary differences will be deductible.

The Company follows the provisions of FASB accounting guidance on accounting for uncertain income tax positions. The guidance utilizes a two-step approach for evaluating tax positions. Recognition (“Step 1”) occurs when an enterprise concludes that a tax position, based solely on its technical merits is more likely than not to be sustained upon examination. Measurement (“Step 2”) is only addressed if Step 1 has been satisfied. Under Step 2, the tax benefit is measured at the largest amount of benefit, determined on a cumulative probability basis that is more likely than not to be realized upon final settlement. As used in this context, the term “more likely than not” is interpreted to mean that the likelihood of occurrence is greater than 50%.

Foreign Currency Translation—The functional currency of the Company’s foreign subsidiaries is generally the local currency of the country in which the subsidiary operates. The assets and liabilities of foreign subsidiaries are translated into U.S. dollars at the rates of exchange at the balance sheet dates. Income and expense accounts are translated at the average exchange rates in effect during the period. Gains and losses resulting from translation adjustments are included as a component of other comprehensive income in the accompanying consolidated balance sheets. Foreign exchange transaction gains and losses that are derived from transactions denominated in a currency other than the subsidiary’s functional currency are included in the determination of net income.

Advertising—Advertising costs are expensed as incurred. Advertising costs amounted to \$1.0 million, \$973 thousand, and \$548 thousand in 2011, 2010 and 2009, respectively, and are included in sales and marketing expenses in the accompanying consolidated statements of income.

Sales Commissions —Certain sales commission paid with respect to subscription-based revenues are deferred and subsequently amortized into operating expenses ratably over the term of the related customer subscription contracts.
As of

25

December 31, 2011 and 2010, \$402 thousand and \$100 thousand, respectfully, of sales commissions were deferred and included in other current assets on the accompanying consolidated balance sheet. During the year ended December 31, 2011 the Company amortized \$465 thousand of previously deferred sales commissions and included this expense in sales and marketing costs on the accompanying consolidated income statement.

Property and Equipment—Property and equipment is stated at cost less accumulated depreciation and amortization. Depreciation and amortization are computed using the straight-line method over the assets' estimated useful lives.

Leasehold improvements are amortized over the shorter of the expected life of the improvements or the remaining lease term. Repairs and maintenance are charged to expense as incurred and major improvements that extend the life of the asset are capitalized and depreciated over the expected remaining life of the related asset. Gains and losses resulting from sales or retirements are recorded as incurred, at which time related costs and accumulated depreciation are removed from the Company's accounts. Fixed assets acquired in acquisitions are recorded at fair value. The estimated useful lives applied by the Company for property and equipment are as follows:

Asset Category	Life (yrs)
Computer equipment	5
Furniture, fixtures and other	7
Buildings	30
Leasehold improvements	Life of the lease

Recent Accounting Pronouncements

The following is a summary brief discussion of recently released accounting pronouncements that are pertinent to the Company's business:

In June 2011, the FASB issued new financial reporting guidance regarding the reporting of "other comprehensive income, or (OCI)". This guidance revises the manner in which entities present comprehensive income in their financial statements. The new guidance requires entities to report components of comprehensive income in either (1) a continuous statement of comprehensive income, or (2) two separate but consecutive statements. Under the two-statement approach, the first statement would include components of net income, which is consistent with the income statement format used currently, and the second statement would include components of OCI. Under either method, entities must display adjustments for items that are reclassified from OCI to net income in both net income and OCI. The new reporting guidance does not change the items that must be reported in OCI. This new reporting standard is effective for interim and annual periods beginning after December 15, 2011, however, the FASB recently decided to defer the effective date for the part of this new guidance that would require adjustments of items out of accumulated other income to be presented as components of both net income and other comprehensive income in financial statements. Those changes would have been effective for annual and interim periods beginning on or after December 15, 2011, but are now deferred until FASB can adequately evaluate the costs and benefits of this presentation requirement. After adoption, the guidance must be applied retrospectively for all periods presented in the financial statements. The Company will adopt this new guidance promptly when required, however we do not expect that it will have a material impact on our financial position or operating results as the only element of comprehensive income relevant to Ebix is in regards to cumulative foreign currency translation adjustments.

In September 2011, the FASB issued new technical guidance regarding an entity's evaluation of goodwill for possible impairment. Under this new guidance an entity has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If after assessing the totality of events or circumstances, an entity determines that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step quantitative impairment test is unnecessary. This new technical guidance was effective for fiscal years beginning after December 15, 2011. Early adoption was permitted for annual and interim goodwill impairment evaluations performed as of a date before September 2011, if an entity's financial statements for the most recent annual or interim period have not yet been issued. The Company elected to adopt early and accordingly applied this new guidance to its 2011 annual impairment evaluation of goodwill.

In December 2010, the Emerging Issues Task Force of the FASB reached consensus regarding the disclosure of pro forma information for business combinations. This new guidance addressed the diversity in practice concerning the

interpretation of the pro forma revenue and earnings disclosure requirements for business combinations. The guidance specifies that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination had occurred as of the beginning of the comparable prior annual reporting period only. The amendments

also expand the supplemental pro forma disclosures to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. The amendments affect any public entity that enters into business combinations that are material on an individual or aggregate basis. The new guidance was applicable to business combinations for which the acquisition date is on or after the first annual reporting period beginning on or after December 15, 2010. The Company adopted this new guidance in 2011 and applied it to the disclosures regarding our recent acquisitions of ADAM, completed in February 2011, and Health Connect, completed in November 2011.

In January 2010, the FASB issued new guidance regarding disclosures about fair value measurements. The guidance requires additional disclosures and clarifies some existing disclosure requirements about fair value measurement as set forth in earlier related guidance. Specifically this new guidance requires a reporting entity to disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and describe the reasons for the transfers; and for fair value measurements using significant unobservable inputs, a reporting entity should present separately information about purchases, sales, issuances, and settlements. Also a reporting entity should provide disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements. This new guidance was effective for interim and annual reporting periods beginning after December 15, 2009. The Company adopted and applied this technical guidance in 2010.

In September 2009, FASB issued amended revenue recognition guidance related to revenue arrangements with multiple deliverables. This new pronouncement: (a) provides application guidance on whether multiple deliverables exist in an arrangement with a customer, and if so, how the arrangement consideration should be separated and allocated; (b) requires an entity to allocate revenue using estimated selling prices of deliverables if vendor-specific objective evidence (“VSOE”) or third party evidence (“TPE”) of selling prices is not available; and, (c) eliminates the use of the “residual method” to allocate revenue. This guidance was to be applied on a prospective basis for revenue arrangements entered into in fiscal years beginning on or after June 15, 2010, with earlier application permitted. Alternatively, an entity can elect to adopt new guidance on a retrospective basis. The Company adopted this new guidance in 2011 and its adoption did not have a material impact on the Company's consolidated results of operation. Also in September 2009, the FASB issued new guidance related to certain revenue arrangements that include software elements and provides guidance on determining whether software deliverables in an arrangement that include tangible products are within the scope of existing software revenue guidance. This guidance is to be applied on a prospective basis for revenue arrangements entered into in fiscal years beginning on or after June 15, 2010, with earlier application permitted. Alternatively, an entity can elect to adopt new guidance on a retrospective basis. The Company adopted this new guidance in 2011 and its adoption did not have a material impact on the Company's consolidated results of operation.

Note 16: Geographic Information

The Company operates with one reportable segment whose results are regularly reviewed by the Company's chief operating decision maker as to performance and allocation of resources. The following enterprise wide information is provided. The following information relates to the primary geographic locations in which the Company conducts its operations. External customer revenues in the tables below were attributed to an particular country based on whether the customer had a direct contract with the Company which was executed in that particular country for the sale of the Company's products/services with an Ebix subsidiary located in that country. (all amounts in thousands):

Year Ended December 31, 2011

	United States	Canada	Latin America	Australia	Singapore	New Zealand	India	Total
External Revenues	\$120,780	\$836	\$10,504	\$31,991	\$2,943	\$1,915	\$—	\$168,969
