NHI reports first quarter results

MURFREESBORO, Tenn. -- National Health Investors, Inc., (NYSE: NHI) announced income from continuing operations for the first quarter ended March 31, 2004 of \$13,614,000 or 49 cents per basic and diluted share of common stock compared to \$10,530,000 or 38 cents per basic and 37 cents per diluted share of common stock for the same period in 2003.

Funds from operations, ("FFO") from continuing operations for the first quarter ended March 31, 2004 was \$16,586,000 or 62 cents per basic and \$16,618,000, or 60 cents per diluted share of common stock compared to \$13,226,000 or 50 cents per basic and \$13,264,000 or 49 cents per diluted share of common stock in 2003.

Income and FFO from continuing operations for the first quarter of 2003 excludes a \$1,932,000 or seven cents per basic and diluted share of common stock gain on the sale of real estate.

The improvement in income from continuing operations for the first quarter ended March 31, 2004 was primarily due to gains on sales of marketable securities of \$668,000, recovery of previous write downs of marketable securities of \$687,000 and recovery of a previous write down of a mortgage note of \$1,302,000. Interest expense also declined as a result of lower debt outstanding. Income from continuing operations for the first quarter of 2003 included loan loss expense of \$1,500,000.

Edgar Filing: NATIONAL HEALTH INVESTORS INC - Form 8-K

"At March 31, 2004, cash and marketable securities totaled approximately 79% of total debt outstanding," said President Andy Adams. "Even with this unsurpassed liquidity, our debt to capitalization ratio declined to 27.7%, the lowest level in our 12 year history."

NHI specializes in the financing of health care real estate by first mortgage and by purchase and leaseback transactions. The common stock of the company trades on the New York Stock Exchange with the symbol NHI. ⁽¹⁾We believe that funds from operations is an important supplemental measure of operating performance. We, therefore, disclose funds from operations, although it is a measurement that is not defined by accounting principles generally accepted in the United States. We generally use the National Association of Real Estate Investment Trusts (NAREIT) measure of funds from operations. We define funds from operations as income before extraordinary items adjusted for certain non-cash items, primarily real estate depreciation, less gains/losses on sales of facilities. Our measure may not be comparable to similarly titled measures used by other REITs. Consequently, our funds from operations may not provide a meaningful measure of our performance as compared to that of other REITs. Funds from operations does not represent cash generated from operating activities as defined by accounting principles generally accepted in the United States (funds from operations does not include changes in operating assets and liabilities) and, therefore, should not be considered as an alternative to net income as the primary indicator of operating performance or to cash flow as a measure of liquidity.
