2 SEMI-ANNUAL REPORT FEBRUARY 28, 2014	

#### Dear Shareholder

One year ago, US financial markets were improving despite a sluggish global economy, as easy monetary policy gave investors enough conviction to take on more risk in their portfolios. Slow but positive growth in the US was sufficient to support corporate earnings, while uncomfortably high unemployment reinforced expectations that the Federal Reserve would continue its aggressive monetary stimulus programs. International markets were more volatile given uneven growth rates and more direct exposure to macro risks such as the banking crisis in Cyprus and a generally poor outlook for European economies. Emerging markets significantly lagged the rest of the world amid fears over slowing growth and debt problems.

Global financial markets were rattled in May when then-Fed Chairman Bernanke mentioned the possibility of reducing (or tapering ) the central bank s asset purchase programs comments that were widely misinterpreted as signaling an end to the Fed s zero-interest-rate policy. US Treasury yields rose sharply, triggering a steep sell-off across fixed income markets. (Bond prices move in the opposite direction of yields.) Equity prices also suffered as investors feared the implications of a potential end of a program that had greatly supported the markets. Markets rebounded in late June, however, when the Fed s tone turned more dovish, and improving economic indicators and better corporate earnings helped extend gains through most of the summer.

Although autumn brought mixed events, it was a surprisingly positive period for most asset classes. Early on, the Fed defied market expectations with its decision to delay tapering, but higher volatility returned in late September when the US Treasury Department warned that the national debt would soon breach its statutory maximum. The ensuing political brinksmanship led to a partial government shutdown, roiling global financial markets through the first half of October. Equities and other so-called risk assets managed to resume their rally when politicians engineered a compromise to reopen the government and extend the debt ceiling, at least temporarily.

The remainder of 2013 was generally positive for stock markets in the developed world, although investors continued to grapple with uncertainty about when and how much the Fed would scale back on stimulus. When the long-awaited taper announcement ultimately came in mid-December, the Fed reduced the amount of its monthly asset purchases but at the same time reaffirmed its commitment to maintaining low short-term interest rates. Markets reacted positively, as the taper signaled the Fed s perception of real improvement in the economy, and investors were finally relieved from the anxiety that had gripped them for quite some time.

The start of the new year brought another turn in sentiment, as heightened volatility in emerging markets and mixed US economic data caused global equities to weaken in January while bond markets found renewed strength. Although these headwinds persisted, equities were back on the rise in February thanks to positive developments in Washington, DC. For one, Congress extended the nation s debt ceiling through mid-March 2015, thereby reducing some degree of fiscal uncertainty for the next year. Additionally, investors were encouraged by market-friendly comments in new Fed Chair Janet Yellen s Congressional testimony, giving further assurance that short-term rates would remain low for a prolonged period.

While accommodative monetary policy was the main driver behind positive market performance over the period, it was also a key cause of investor uncertainty. Developed market stocks were the strongest performers for the six- and 12-month periods ended February 28. In contrast, emerging markets were weighed down by uneven growth, high levels of debt and severe currency weakness, in addition to the broader concern about reduced global liquidity. The anticipation of Fed tapering during 2013 pressured US Treasury bonds and other high-quality fixed income sectors, including tax-exempt municipals and investment grade corporate bonds. High yield bonds, to the contrary, benefited from income-oriented investors search for yield in the low-rate environment. Short-term interest rates remained near zero, keeping yields on money market securities close to historic lows.

At BlackRock, we believe investors need to think globally, extend their scope across a broad array of asset classes and be prepared to move freely as market conditions change over time. We encourage you to talk with your financial

advisor and visit www.blackrock.com for further insight about investing in today s world.

Sincerely,

**Rob Kapito**

THIS PAGE NOT PART OF YOUR FUND REPORT 3

Fund Summary as of February 28, 2014 **Fund Overview** 

#### **BlackRock Defined Opportunity Credit Trust**

BlackRock Defined Opportunity Credit Trust s (BHL) (the Fund ) primary investment objective is to provide high current income, with a secondary objective of long-term capital appreciation. The Fund seeks to achieve its investment objectives by investing substantially all of its assets in loan and debt instruments and loan-related and debt-related instruments (collectively credit securities ). The Fund invests, under normal market conditions, at least 80% of its assets in any combination of the following credit securities: (i) senior secured floating rate and fixed rate loans; (ii) second lien or other subordinated or unsecured floating rate and fixed rate loans; (ii) negative that are rated below investment grade quality; and (iv) investment grade corporate bonds. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund s investment objectives will be achieved.

**Portfolio Management Commentary** 

#### How did the Fund perform?

For the six-month period ended February 28, 2014, the Fund returned 4.22% based on market price and 3.75% based on NAV. For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of 1.71% based on market price and 4.33% based on NAV. All returns reflect reinvestment of dividends. The Fund s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. What factors influenced performance?

Security selection among higher quality loan instruments, where the Fund maintained a quality bias, had a positive impact on performance. From an industry perspective, holdings within gaming, wirelines and lodging boosted results. The Fund s tactical allocation to high yield bonds generated additional gains as the asset class outperformed bank loans during the period. Exposure to high-quality collateralized loan obligations (CLOS) also enhanced results. Conversely, security selection in the media non-cable and electric industries detracted from results. The Fund s limited exposure to lower-rated loan credits represented a missed opportunity for additional gains as this segment performed well during the period.

#### Describe recent portfolio activity.

During the period, the Fund maintained its focus on the higher quality segments of the loan market in terms of loan structure, liquidity and overall credit quality. With the average loan trading recently at or just above par (i.e., with limited or no upside), the Fund has concentrated its investments in strong companies with stable cash flows and high quality collateral, with the ability to meet interest obligations and ultimately return principal. The Fund has been actively participating in the new-issue market, where the more appealing investment opportunities have been emerging. Although we expect modest growth and improving economic conditions, we continue to limit the Fund s exposure to lower-rated segments of the market given less attractive risk-reward profiles in that space. From an asset allocation perspective, we continued to reduce exposure to higher-quality high yield bonds as valuations in that market also moved closer to fair value. In addition, we tactically added risk in high-quality CLOs.

#### Describe portfolio positioning at period end.

At period end, the Fund held 94% of its total portfolio in floating rate loan interests (bank loans), with the remainder in corporate bonds and other interests. The Fund s highest-conviction holdings included La Quinta (lodging), Caesars Entertainment Resort Properties LLC (gaming) and Level 3 Financing, Inc. (wirelines).

Fund Summary as of February 28, 2014 **Fund Overview**  **BlackRock Floating Rate Income Strategies Fund, Inc.** 

BlackRock Floating Rate Income Strategies Fund, Inc. s (FRA) (the Fund) investment objective is to provide shareholders with high current income and such preservation of capital as is consistent with investment in a diversified, leveraged portfolio consisting primarily of floating rate debt securities and instruments. The Fund seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in floating rate debt securities, including floating or variable rate debt securities that pay interest at rates that adjust whenever a specified interest rate changes and/or which reset on predetermined dates (such as the last day of a month or calendar quarter). The Fund invests a substantial portion of its investments in floating rate debt securities consisting of secured or unsecured senior floating rate loans that are rated below investment grade. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund s investment objective will be achieved.

**Portfolio Management Commentary** 

#### How did the Fund perform?

For the six-month period ended February 28, 2014, the Fund returned 1.47% based on market price and 4.27% based on NAV. For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of 1.71% based on market price and 4.33% based on NAV. All returns reflect reinvestment of dividends. The Fund s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. What factors influenced performance?

Security selection among higher quality loan instruments, where the Fund maintained a quality bias, had a positive impact on performance. From an industry perspective, holdings within gaming, wirelines and lodging boosted results. The Fund s tactical allocation to high yield bonds generated additional gains as the asset class outperformed bank loans during the period. Exposure to high-quality collateralized loan obligations (CLOS) also enhanced results. Conversely, security selection in the media non-cable and electric industries detracted from results. The Fund s limited exposure to lower-rated loan credits represented a missed opportunity for additional gains as this segment performed well during the period.

#### Describe recent portfolio activity.

During the period, the Fund maintained its focus on the higher quality segments of the loan market in terms of loan structure, liquidity and overall credit quality. With the average loan trading recently at or just above par (i.e., with limited or no upside), the Fund has concentrated its investments in strong companies with stable cash flows and high quality collateral, with the ability to meet interest obligations and ultimately return principal. The Fund has been actively participating in the new-issue market, where the more appealing investment opportunities have been emerging. Although we expect modest growth and improving economic conditions, we continue to limit the Fund s exposure to lower-rated segments of the market given less attractive risk-reward profiles in that space. From an asset allocation perspective, we continued to reduce exposure to higher-quality high yield bonds as valuations in that market also moved closer to fair value. In addition, we tactically added risk in high-quality CLOs.

#### Describe portfolio positioning at period end.

At period end, the Fund held 93% of its total portfolio in floating rate loan interests (bank loans), with the remainder in corporate bonds and other interests. The Fund s highest-conviction holdings included La Quinta (lodging), Caesars Entertainment Resort Properties LLC (gaming) and Level 3 Financing, Inc. (wirelines).

SEMI-ANNUAL REPORT FEBRUARY 28, 2014 7		

Fund Summary as of February 28, 2014 **Fund Overview** 

#### **BlackRock Limited Duration Income Trust**

BlackRock Limited Duration Income Trust s (BLW) (the Fund ) investment objective is to provide current income and capital appreciation. The Fund seeks to achieve its investment objective by investing primarily in three distinct asset classes:

intermediate duration, investment grade corporate bonds, mortgage-related securities, asset-backed securities and US Government and agency securities;

senior, secured floating rate loans made to corporate and other business entities; and

US dollar-denominated securities of US and non-US issuers rated below investment grade and, to a limited extent, non-US dollar denominated securities of non-US issuers rated below investment grade.

The Fund s portfolio normally has an average portfolio duration of less than five years (including the effect of anticipated leverage), although it may be longer from time to time depending on market conditions. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund s investment objective will be achieved.

**Portfolio Management Commentary** 

#### How did the Fund perform?

For the six-month period ended February 28, 2014, the Fund returned 6.32% based on market price and 7.35% based on NAV. For the same period, the closed-end Lipper High Yield Funds (Leveraged) category posted an average return of 12.50% based on market price and 10.48% based on NAV. All returns reflect reinvestment of dividends. The Fund s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. What factors influenced performance?

Fixed income markets experienced a rally over the six-month period that was only temporarily suspended at the beginning of 2014 due to investors concern over softening US economic data, which appeared to be mostly driven by unusually harsh weather conditions. In addition, certain risk assets, including emerging market debt, were negatively impacted by the tightening of global liquidity as the Fed continued to reduce the size of its asset purchase program. The Fund benefited from the generally positive market environment, with positions in corporate credit being the largest contributors to returns. Exposure to securitized assets, including asset-backed securities ( ABS ) and commercial mortgage-backed securities ( CMBS ) also had a positive impact on performance. In addition, positions in non-agency residential mortgage-backed securities ( MBS ) and high yield credit enhanced results. Based on the view that short-term rates would remain low, the Fund maintained its leverage to augment income generation throughout the period.

As most fixed income sectors performed well during the period, there were no material detractors from the Fund s performance.

#### Describe recent portfolio activity.

The Fund s allocations remained consistent throughout the six-month period, with its largest position in high yield and investment grade corporate credit, followed by allocations to securitized credits, specifically, ABS and CMBS. **Describe portfolio positioning at period end.** 

At period end, the Fund maintained diversified exposure to non-government spread sectors including high yield and investment grade corporate credit, CMBS, ABS and non-agency residential MBS.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT FEBRUARY 28, 2014 9

#### The Benefits and Risks of Leveraging

The Funds may utilize leverage to seek to enhance the yield and net asset value ( NAV ) of their common shares ( Common Shares ). However, these objectives cannot be achieved in all interest rate environments.

In general, the concept of leveraging is based on the premise that the financing cost of leverage, which will be based on short-term interest rates, will normally be lower than the income earned by a Fund on its longer-term portfolio investments purchased with the proceeds from leverage. To the extent that the total assets of the Fund (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, the Fund s shareholders will benefit from the incremental net income. The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV.

To illustrate these concepts, assume a Fund s capitalization is \$100 million and it utilizes leverage for an additional \$30 million, creating a total value of \$130 million available for investment in longer-term income securities. If prevailing short-term interest rates are 3% and longer-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Fund s financing costs on the \$30 million of proceeds obtained from leverage are based on the lower short-term interest rates. At the same time, the securities purchased by the Fund with the proceeds from leverage earn income based on longer-term interest rates. In this case, the Fund s costs of leverage are significantly lower than the income earned on the Fund s longer-term investments acquired from leverage proceeds, and therefore the holders of Common Shares (Common Shareholders) are the beneficiaries of the incremental net income.

However, in order to benefit shareholders, the return on assets purchased with leverage proceeds must exceed the ongoing costs associated with the leverage. If interest or dividends and other costs of leverage exceed the Fund's return on assets purchased with leverage proceeds, income to shareholders will be lower than if the Fund had not used leverage. Furthermore, the value of the Fund's portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the value of the Fund's obligations under its leverage arrangement generally does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Fund's NAVs positively or negatively. Changes in the future direction of interest rates are very difficult to predict accurately, and there is no assurance that a Fund's intended leveraging strategy will be successful.

Leverage also will generally cause greater changes in the Funds NAVs, market prices and dividend rates than comparable portfolios without leverage. In a declining market, leverage is likely to cause a greater decline in the net asset value and market price of a Fund s shares than if the Fund were not leveraged. In addition, the Fund may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause the Fund to incur losses. The use of leverage may limit the Fund s ability to invest in certain types of securities or use certain types of hedging strategies. The Fund will incur expenses in connection with the use of leverage, all of which are borne by shareholders and may reduce income to the shares.

Each Fund may utilize leverage through a credit facility or reverse repurchase agreements as described in the Notes to Financial Statements.

Under the Investment Company Act of 1940, as amended (the 1940 Act ), each Fund is permitted to issue debt up to 33% of its total managed assets. A Fund may voluntarily elect to limit its leverage to less than the maximum amount permitted under the 1940 Act. In addition, a Fund may also be subject to certain asset coverage, leverage or portfolio composition requirements imposed by its credit facility, which may be more stringent than those imposed by the 1940 Act.

#### **Derivative Financial Instruments**

The Funds may invest in various derivative financial instruments, including financial futures contracts, foreign currency exchange contracts, options and swaps, as specified in Note 4 of the Notes to Financial Statements, which may constitute forms of economic leverage. Such derivative financial instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market, equity, credit, interest rate and/or foreign currency exchange rate risks. Derivative financial instruments and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative financial instrument. The Funds ability to use a derivative financial instrument successfully depends on the investment advisor s ability to predict pertinent market movements accurately, which cannot be assured. The use of derivative financial instruments may result in losses greater than if they had not been used, may require a Fund to sell or purchase portfolio investments at inopportune times or for distressed values, may limit the amount of appreciation a Fund can realize on an investment, may result in lower dividends paid to shareholders and/or may cause a Fund to hold an investment that it might otherwise sell. The Funds investments in these instruments are discussed in detail in the Notes to Financial Statements.

<sup>1</sup>Using S&P s rating of the issuer.

<sup>2</sup> The maximum potential amount the Fund may pay should a negative credit event take place as defined under the <sup>2</sup> terms of agreement.

For Fund compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by the investment advisor. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

See Notes to Financial Statements.

# Edgar Filing: BLACKROCK FLOATING RATE INCOME STRATEGIES FUND, INC. - Form N-CSRS 18 SEMI-ANNUAL REPORT FEBRUARY 28, 2014

#### BlackRock Defined Opportunity Credit Trust (BHL)

Schedule of Investments (continued)

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets or liabilities that the Fund has the ability to access

Level 2 other observable inputs (including, but not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund s own assumptions used in determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the fair value hierarchy classification is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Fund s policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instruments and is not necessarily an indication of the risks associated with investing in those securities. For information about the Fund s policy regarding valuation of investments, please refer to Note 2 of the Notes to Financial Statements.

	Level 1	Level 2	Level 3	Total
Assets:				
Investments:				
Long-Term Investments:				
Asset-Backed Securities		\$4,084,514		\$4,084,514
Common Stocks		994,598		994,598
Corporate Bonds		4,929,841		4,929,841
Floating Rate Loan Interests		160,957,420	\$12,935,673	173,893,093

There were no transfers between Level 1 and Level 2 during the six months ended February 28, 2014. See Notes to Financial Statements.

SEMI-ANNUAL REPORT FEBRUARY 28, 2014 19

## BlackRock Defined Opportunity Credit Trust (BHL)

### Schedule of Investments (concluded)

A reconciliation of Level 3 investments is presented when the Fund had a significant amount of Level 3 investments at the beginning and/or end of the period in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Asset-Backed Securities	Floating Rate Loan Interests	Total
Assets:			
Opening Balance, as of August 31,			
2013	\$ 4,422,403	\$ 21,940,408	\$ 26,362,811
Transfers into Level 3 <sup>1</sup>		3,663,924	3,663,924
Transfers out of Level 3 <sup>2</sup>	(3,316,503)	(12,127,990)	(15,444,493)
Accrued discounts/premiums	398	19,789	20,187
Net realized gain	39,182	34,456	73,638
Net change in unrealized appreciation/			
depreciation <sup>3,4</sup>	(38,010)	74,198	36,188
Purchases		4,014,657	4,014,657
Sales	(1,107,470)	(4,683,769)	(5,791,239)
Closing Balance, as of February 28,			
2014		\$ 12,935,673	\$ 12,935,673
Net change in unrealized			
appreciation/depreciation on			
investments			
still held at February 28, 2014 <sup>4</sup>		\$ 89,436	\$ 89,436

<sup>1</sup> As of August 31, 2013, the Fund used observable inputs in determining the value of certain investments. As of February 28, 2014, the Fund used significant unobservable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$3,663,924 transferred from Level 2 to Level 3 in the disclosure hierarchy.

- <sup>2</sup> As of August 31, 2013, the Fund used significant unobservable inputs in determining the value of certain investments. As of February 28, 2014, the Fund used observable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$15,444,493 transferred from Level 3 to Level 2 in the disclosure hierarchy.
- <sup>3</sup> Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations.
- <sup>4</sup> Any difference between Net change in unrealized appreciation/depreciation and Net change in unrealized appreciation/depreciation on investments still held at February 28, 2014 is generally due to investments no longer held or categorized as Level 3 at period end.

The Fund s investments that are categorized as Level 3 were valued utilizing third party pricing information without adjustment. Such valuations are based on unobservable inputs. A significant change in third party information inputs could result in a significantly lower or higher value of such Level 3 investments.

See Notes to Financial Statements.
