FORM N-CSR

CERTIFIED SHAREHOLDER REPORT OF REGISTERED MANAGEMENT INVESTMENT COMPANIES

Investment Company Act file number 811-6623

Nuveen California Select Tax-Free Income Portfolio (Exact name of registrant as specified in charter)

Nuveen Investments 333 West Wacker Drive Chicago, IL 60606 (Address of principal executive offices) (Zip code)

> Kevin J. McCarthy Nuveen Investments 333 West Wacker Drive Chicago, IL 60606 (Name and address of agent for service)

Registrant's telephone number, including area code: (312) 917-7700

Date of fiscal year end: March 31

Date of reporting period: September 30, 2013

Form N-CSR is to be used by management investment companies to file reports with the Commission not later than 10 days after the transmission to stockholders of any report that is required to be transmitted to stockholders under Rule 30e-1 under the Investment Company Act of 1940 (17 CFR 270.30e-1). The Commission may use the information provided on Form N-CSR in its regulatory, disclosure review, inspection, and policymaking roles.

A registrant is required to disclose the information specified by Form N-CSR, and the Commission will make this information public. A registrant is not required to respond to the collection of information contained in Form N-CSR unless the Form displays a currently valid Office of Management and Budget ("OMB") control number. Please direct comments concerning the accuracy of the information collection burden estimate and any suggestions for reducing the burden to Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549-0609. The OMB has reviewed this collection of information under the clearance requirements of 44 U.S.C. ss. 3507.

Chairman's Letter to Shareholders

Dear Shareholders,

I am pleased to have this opportunity to introduce myself to you as the new independent chairman of the Nuveen Fund Board, effective July 1, 2013. I am honored to have been selected as chairman, with its primary responsibility to serve the interests of the Nuveen Fund shareholders. My predecessor, Robert Bremner, was the first independent director to serve as chairman of the Board and I, and my fellow Board members, plan to continue his legacy of strong independent oversight of your funds.

The global economy has hit major turning points over the last several months to a year. The developed world is gradually recovering from their financial crisis while the emerging markets appear to be struggling with the downshift of China's growth potential. Japan is entering a new era of growth after decades of economic stagnation and many of the Eurozone nations appear to be exiting their recession. Despite the positive events, there are still potential risks. Middle East tensions, rising oil prices, defaults in Europe and fallout from the financial stress in emerging markets could all reverse the recent progress in the global economy.

On the domestic front, the U.S. economy is experiencing sustainable slow growth. Corporate fundamentals are strong as earnings per share and corporate cash are at the highest level in two decades. Unemployment is trending down and the housing market has experienced a rebound, each assisting the positive economic scenario. However, there are some issues to be watched. Interest rates are expected to increase but significant uncertainty about the timing remains. Partisan politics in Washington D.C. with their troublesome outcome add to the uncertainties that could cause problems for the economy going forward.

In the near term, governments are focused on economic recovery and the growth of their economies, which could lead to an environment of attractive investment opportunities. Over the long term, the uncertainties mentioned earlier could hinder the potential growth. Because of this, Nuveen's investment management teams work hard to balance return and risk with a range of investment strategies. I encourage you to read the following commentary on the management of your fund.

On behalf of the other members of the Nuveen Fund Board, we look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

William J. Schneider Chairman of the Nuveen Fund Board November 22, 2013

Portfolio Managers' Comments

Nuveen Select Tax-Free Income Portfolio (NXP) Nuveen Select Tax-Free Income Portfolio 2 (NXQ) Nuveen Select Tax-Free Income Portfolio 3 (NXR) Nuveen California Select Tax-Free Income Portfolio (NXC) Nuveen New York Select Tax-Free Income Portfolio (NXN)

These Portfolios feature management by Nuveen Asset Management, LLC, an affiliate of Nuveen Investments. Portfolio managers Thomas C. Spalding, CFA, and Scott R. Romans, PhD, review key investment strategies and the six-month performance of the Nuveen Select Portfolios. Tom has managed the three national Portfolios since 1999, while Scott has managed NXC since 2003 and NXN since 2011.

What key strategies were used to manage the Nuveen Select Portfolios during the six-month reporting period ended September 30, 2013?

During this reporting period, uncertainty about the next step for the Federal Reserve's quantitative easing program and the potential impact on the economy and financial markets led to increased market volatility. Ongoing political debate over federal spending and headline credit stories involving Detroit and Puerto Rico also contributed to an unsettled environment and prompted an increase in selling by bondholders across the municipal market. Given this backdrop, municipal bond prices generally declined during this period, while the yield curve steepened. We continued to take a bottom-up approach to discovering sectors that appeared undervalued as well as individual credits that had the potential to perform well over the long term and helped us keep our Portfolios fully invested.

During this reporting period, NXP, NXQ and NXR found value in diversified areas of the market and included adding bonds with competitive yields to help support the Portfolios' income streams. As part of this strategy we participated in the \$2 billion new offering of bonds issued for the Grand Parkway in Houston, Texas, which, when completed will be the longest beltway in the U.S., at 184 miles. The BBB+ rated bonds provided funding for construction of 55 miles of new tollway, with traffic projected to be 90% commuter-based. The new section of tollway, which is expected to be completed in 2016, will provide congestion relief for the Houston area, currently the sixth most congested urban area in the country. All three Portfolios also purchased BB-rated bonds that were part of the \$1.2 billion new issue by the Iowa Finance Authority for the Iowa Fertilizer Company project. These bonds will fund the construction of a nitrogen fertilizer plant located in southeast Iowa with a production capacity of 1.6 million tons per year. With growing demand

Certain statements in this report are forward-looking statements. Discussions of specific investments are for illustration only and are not intended as recommendations of individual investments. The forward-looking statements and other views expressed herein are those of the portfolio managers as of the date of this report. Actual future results or occurrences may differ significantly from those anticipated in any forward-looking statements, and the views expressed herein are subject to change at any time, due to numerous market and other factors. The Funds disclaim any obligation to update publicly or revise any forward-looking statements or views expressed herein.

Ratings shown are the highest rating given by one of the following national rating agencies: Standard & Poor's, Moody's Investors Service, Inc. or Fitch, Inc. Credit ratings are subject to change. AAA, AA, A, and BBB are investment grade ratings; BB, B, CCC, CC, C and D are below investment grade ratings. Certain bonds backed by U.S. government or agency securities are regarded as having an implied rating equal to the rating of such securities. Holdings designated N/R are not rated by these national rating agencies.

Portfolio Managers' Comments (continued)

for nitrogen fertilizer in the U.S., 50% of which is currently supplied by imports, we believe this project is well positioned competitively because it is U.S. based, will offer reduced transportation costs and has access to cheaper sources of natural gas than foreign producers. During this reporting period, these Portfolios also added BBB-rated bonds issued by the Dallas based Love Field Airport Modernization Corporation for the Southwest Airlines project, which fund renovations at Love Field, including a new centralized concourse with 20 gates, a remodeled lobby, expanded baggage claim area and new ticketing wing. Aside from these new issues, our purchases for these Portfolios were largely made in the secondary market.

In NXC and NXN, we primarily focused on three strategies intended to enhance these Portfolios' positioning and potentially increase income distribution. The first of these strategies involved purchasing bonds that we believed had the best prospects for advanced refunding, that is, bonds with higher coupons or slightly shorter calls. Carrying out this strategy did not involve selling bonds from our portfolios; instead we were reinvesting the proceeds from called bonds. The addition of these bonds enhanced the credit quality of our portfolios, provided higher levels of liquidity and reduced interest rate sensitivity. Once interest rates started to rise, our focus shifted to bond swaps. Virtually all of the bonds we added to our portfolios in 2012 and early 2013 were purchased at significant premiums. Because tax laws require that premiums be amortized, this reduces the amount of income available for distribution from the coupon. By executing a bond swap in a rising interest rate environment, the expense of amortization is basically converted into a capital loss, so that more of the income from the coupon can be distributed to shareholders. Most of the bonds we swapped offered similar risk characteristics and often involved the same credit, but with different maturity dates. An additional benefit of this strategy was the tax loss carry-forwards that can be used to offset future capital gains.

The third strategy involved an approach known as "couponing up." Couponing up is the process of working to improve the book yields on the Portfolios' holdings, which enables us to maintain and potentially improve the dividend stream. During this reporting period we sold some of the Portfolios' holdings with 5% coupons in the 20-year maturity range at attractive prices into strong retail demand. We then used the proceeds from these sales to purchase more recent issuance from 2010-2011 with higher coupons (e.g., 5.75% to 6.50%). These bonds ultimately provide a more defensive structure and potentially enable us to increase income distributions. Strong retail bids for redevelopment agency and community facilities district bonds in California and general issuers such as Metropolitan Transportation Authority in New York helped us execute this strategy in NXC and NXN.

During this reporting period, NXP, NXQ and NXR also focused on bonds with longer maturities to take advantage of a steep municipal yield curve. This enabled these Portfolios to add more attractive yields further out on the curve and also supplied some protection for the Portfolios' duration and yield curve positioning. The bond calls also had an impact on the Portfolios' durations, since the bonds called as part of current refundings were priced to short calls and therefore had negligible durations. Although it was not a strategy, reinvesting these call proceeds in anything other than cash had the effect of extending durations. In terms of credit quality, the national Portfolios generally found better opportunities in single-A and BBB-rated bonds and we reinvested much of our call proceeds into these

categories. NXC and NXN also added to lower rated holdings, specifically bonds rated A and BBB and lower in NXC and single-A and BB-rated bonds and lower in NXN.

Activity during this reporting period was driven primarily by the reinvestment of proceeds from called and matured bonds, which was aimed at keeping the Portfolios fully invested and supporting their income streams. During the first part of this reporting period, we experienced an increased number of current bond calls as a result of an increase in refinancings, which provided a meaningful source of cash flow. In the latter months of the reporting period, as interest rates rose, refinancing activity declined. However, we continued to receive cash generated by maturing bonds, which we were able to reinvest at higher yields and lower prices in the rising rate environment. As the supply of new paper associated with the refinancings declined, we focused on the secondary market for the majority of our purchases. Other than the sales involved in NXC's and NXN's execution of the strategies described above, selling was minimal during this reporting period.

As of September 30, 2013, all five of these Portfolios continued to use inverse floating rate securities. We employ inverse floaters for a variety of reasons, including duration management, income enhancement and total return enhancement.

How did the Portfolios perform during the six-month reporting period ended September 30, 2013?

The tables in each Portfolio's Performance Overview and Holding Summaries section of this report provide the Portfolios' returns for the six-month, one-year, five-year and ten-year periods ended September 30, 2013. Each Portfolio's returns are compared with the performance of a corresponding market index and Lipper classification average.

For the six months ended September 30, 2013, the cumulative returns on net asset value (NAV) for the three national Select Portfolios underperformed the return for the national S&P Municipal Bond Index, and NXC and NXN underper-formed the returns on their respective state's S&P Municipal Bond Index. For this same period, NXP, NXQ and NXR trailed the average return for the Lipper General and Insured Unleveraged Municipal Debt Funds Classification Average, while both NXC and NXN exceeded the returns on their respective state Lipper averages. Key management factors that influenced the Portfolios' returns during this reporting period included yield curve and duration positioning, credit exposure and sector allocation.

As interest rates rose and the yield curve steepened, municipal bonds with shorter maturities generally outperformed those with longer maturities. Overall, credits at the shortest end of the municipal yield curve posted the best returns, while bonds at the longest end produced the weakest results. For the reporting period, the durations of all these Portfolios exceeded their duration targets. As a result, duration and yield curve positioning was the major factor detracting from the Portfolios' performance.

Credit exposure also factored into the Portfolios' performance, as events in the municipal market led investors to avoid risk and credit spreads, or the difference in yield spreads between U.S. Treasury securities and comparable investments such as municipal bonds, began to widen. For the reporting period, higher quality bonds generally outperformed lower quality bonds, specifically bonds rated single-A, BBB or lower. In NXC and NXN, allocations of

Portfolio Managers' Comments (continued)

bonds rated B and those rated BB, respectively, had the largest negative impact on performance. Credit exposure was less of a performance factor in the three national Portfolios.

After underperforming for many months, pre-refunded bonds, which are often backed by U.S. Treasury securities, were among the best performing market segments. The outperformance of these bonds can be attributed primarily to their shorter effective maturities and higher credit quality. During this reporting period, the three national Portfolios tended to be overweighted in pre-refunded bonds relative to the market average, which helped their investment performance, while NXC and NXN had smaller allocations of pre-refunded bonds. General obligation credits, housing bonds, and in the California market, redevelopment agency (RDA) and tax increment financing (TIF) district bonds also typically outperformed the general municipal market. NXC's overweight in TIF credits benefited its performance during the reporting period.

In contrast, revenue bonds as a whole underperformed the municipal market. Among the revenue sectors that generally lagged municipal market performance by the widest margins for this reporting period were industrial development revenue (IDR), health care (including hospitals), utilities, transportation and water and sewer. Tobacco credits backed by the 1998 master tobacco settlement agreement also were among the poorest performing market sectors, due in part to their longer effective durations, lower credit ratings and the tendency of investors to avoid risk. As of September 30, 2013, NXQ and NXR had the heaviest weightings of lower rated tobacco bonds and NXN held the fewest of these credits.

During this reporting period, two noteworthy credit events weighed on the municipal market. On July 18, 2013, the City of Detroit filed for Chapter 9 in federal bankruptcy court. Detroit, burdened by decades of population loss, changes in the auto manufacturing industry and significant tax base deterioration, has been under severe financial stress for an extended period. Detroit's bankruptcy filing will likely be a lengthy one, given the complexity of its debt portfolio, number of creditors, numerous union contracts, and significant legal questions that must be addressed. It is not yet clear how this bankruptcy will impact the actual creditworthiness, or the market's perception of that creditwor-thiness, of other municipalities in Michigan. None of the Portfolios had any exposure to Detroit general obligation (GO) bonds, while the three national Portfolios have small holdings of Detroit water and sewer credits. NXP, NXQ and NXR also purchased additional Detroit water and sewer bonds during the reporting period. The recently purchased credits are insured, which adds security and liquidity. During this reporting period, the water and sewer holdings had a negligible impact on the Portfolios' investment performance due to the Detroit bankruptcy.

Shareholders also should be aware of issues impacting the Portfolios' Puerto Rico holdings. In 2012, Moody's downgraded Puerto Rico GO bonds to Baa3 from Baa1 and Puerto Rico Sales Tax Financing Corporation (COFINA) senior sales tax revenue bonds to Aa3 from Aa2 and COFINA subordinate sales tax revenue bonds to A3 from A1. (In October 2013, subsequent to the end of this reporting period, Moody's further downgraded the COFINA senior sales tax bonds to A2, while affirming the subordinate bonds at A3.) These downgrades were based on Puerto Rico's ongoing economic problems and, in the case of the COFINA bonds, the impact of these problems on the projected growth of sales tax revenues. However, the COFINA bonds were able to maintain a higher credit rating than the GOs because, unlike the revenue streams supporting some Puerto Rican issues, the sales taxes supporting the COFINA

bonds cannot be diverted and used to support Puerto Rico's GO bonds. For the reporting period ended September 30, 2013, Puerto Rico paper generally underperformed the municipal market as a whole. NXP, NXQ, NXR and NXC have limited exposure to Puerto Rico bonds, the majority of which are the subordinate sales tax bonds issued by COFINA, which we believe are the best of the Puerto Rico issuance. In addition, much of the Portfolios' COFINA exposure is insured, which we believe adds a measure of value. NXQ also holds a small position in Puerto Rico housing bonds, and NXR holds insured highway bonds issued by the commonwealth. NXN does not have any exposure to paper issued by Puerto Rico. No Puerto Rico bonds were purchased or sold in the Portfolios during this reporting period. The small nature of their exposure helped to limit the impact of the Puerto Rico bonds' underperformance on the Portfolios.

Fund Leverage

IMPACT OF THE PORTFOLIOS' LEVERAGE STRATEGIES ON PERFORMANCE

One important factor impacting the returns of NXP, NXQ, NXR, NXC and NXN relative to their benchmarks was the Portfolios' use of leverage. The Portfolios use leverage because their managers believe that, over time, leveraging provides opportunities for additional income and total return for shareholders. However, use of leverage also can expose shareholders to additional volatility. For example, as the prices of securities held by a Portfolio decline, the negative impact of these valuation changes on NAV and shareholder total return is magnified by the use of leverage. Conversely, leverage may enhance share returns during periods when the prices of securities held by a Portfolio generally are rising. Leverage had a negative impact on the performance of the Portfolios over this reporting period.

As of September 30, 2013, the Portfolios' percentages of effective leverage are as shown in the accompanying table.

	NXP	NXQ	NXR	NXC	NXN
Effective Leverage*	1.40%	2.38%	0.57%	1.65%	8.91%

* Effective Leverage is a Fund's effective economic leverage, and includes both regulatory leverage and the leverage effects of certain derivative and other investments in a Fund's portfolio that increase the Fund's investment exposure. Currently, the leverage effects of Tender Option Bond (TOB) inverse floater holdings are included in effective leverage values.

Share Information

DIVIDEND INFORMATION

During the current reporting period ended September 30, 2013, the Funds' monthly dividends to shareholders were as shown in the accompanying table.

	Per Share Amounts							
		NXP		NXQ		NXR	NXC	NXN
April	\$	0.0525	\$	0.0525	\$	0.0525	\$ 0.0570	\$ 0.0525
May		0.0525		0.0525		0.0525	0.0570	0.0525
June		0.0525		0.0525		0.0525	0.0570	0.0525
July		0.0525		0.0525		0.0525	0.0570	0.0525
August		0.0525		0.0525		0.0525	0.0570	0.0525
September		0.0525		0.0525		0.0525	0.0570	0.0525
Market Yield**		4.83%		5.04%		4.91%	5.05%	4.84%
Taxable-Equivalent Yield**		6.71%		7.00%		6.82%	7.73%	7.20%

** Market Yield is based on the Fund's current annualized monthly dividend divided by the Fund's current market price as of the end of the reporting period. Taxable-Equivalent Yield represents the yield that must be earned on a fully taxable investment in order to equal the yield of the Fund on an after-tax basis. It is based on a combined federal and state income tax rate of 28.0%, 34.7%, and 32.8% for National, California and New York Funds, respectively. When comparing a Fund to investments that generate qualified dividend income, the Taxable-Equivalent Yield is lower.

All of these Portfolios seek to pay stable dividends at rates that reflect each Portfolio's past results and projected future performance. During certain periods, each Portfolio may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Portfolio during the period. If a Portfolio has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Portfolio's NAV. Conversely, if a Portfolio has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Portfolio's NAV. Each Portfolio will, over time, pay all of its net investment income as dividends to shareholders. As of September 30, 2013, all of the Portfolios in this report had positive UNII balances, based upon our best estimate, for tax purposes and positive UNII balances for financial reporting purposes.

EQUITY SHELF PROGRAMS

The following Portfolios are authorized to issue additional shares through their ongoing equity shelf program. Under this program, each Portfolio, subject to market conditions, may raise additional capital from time to time in varying amounts and offering methods at a net price at or above the Portfolio's NAV per share.

	NXP	NXQ	NXR
Additional Shares Authorized	1,600,000 1	,700,000 1	,300,000

During the current reporting period NXP, NXQ and NXR did not sell shares through their equity shelf programs.

Share Information (continued)

Refer to Notes to Financial Statements, Note 1 – General Information and Significant Accounting Policies for further details on the Portfolios' Equity Shelf Programs.

SHARE REPURCHASES

Since the inception of the Portfolios' repurchase programs, the Portfolios have not repurchased any of their outstanding shares.

OTHER SHARE INFORMATION

As of September 30, 2013, and during the current reporting period, the share prices of the Portfolios were trading at a premium/(discount) to their NAVs as shown in the accompanying table.

	NXP	NXQ	NXR	NXC	NXN
NAV	\$ 14.02 \$	13.41 \$	13.93 \$	14.62 \$	13.68

6-Month Average	~ /		(,.),	. ,	

Risk Considerations

Fund shares are not guaranteed or endorsed by any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation. Past performance is no guarantee of future results. Fund shares are subject to a variety of risks, including:

Investment, Price and Market Risk. An investment in shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in shares represents an indirect investment in the municipal securities owned by the Fund, which generally trade in the over-the-counter markets. Shares of closed-end investment companies like these Funds frequently trade at a discount to their net asset value (NAV). Your shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

Tax Risk. The tax treatment of Fund distributions may be affected by new IRS interpretations of the Internal Revenue Code and future changes in tax laws and regulations.

Issuer Credit Risk. This is the risk that a security in a Fund's portfolio will fail to make dividend or interest payments when due.

Interest Rate Risk. Fixed-income securities such as bonds, preferred, convertible and other debt securities will decline in value if market interest rates rise.

Reinvestment Risk. If market interest rates decline, income earned from a Fund's portfolio may be reinvested at rates below that of the original bond that generated the income.

Call Risk or Prepayment Risk. Issuers may exercise their option to prepay principal earlier than scheduled, forcing a Fund to reinvest in lower-yielding securities.

Inverse Floater Risk. The Funds may invest in inverse floaters. Due to their leveraged nature, these investments can greatly increase a Fund's exposure to interest rate risk and credit risk. In addition, investments in inverse floaters involve the risk that the Fund could lose more than its original principal investment.

Leverage Risk. Each Fund's use of effective leverage creates the possibility of higher volatility for the Fund's per share NAV, market price, distributions and returns. There is no assurance that a Fund's leveraging strategy will be successful.

(1) All percentages shown in the Portfolio of Investments are based on net assets.

(2) Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.

- (3) Ratings: Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.
- (4) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensure the timely payment of principal and interest. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities.
- (5) Investment valued at fair value using methods determined in good faith by, or at the discretion of, the Board of Trustees. For fair value measurement disclosure purposes, investment classified as Level 3. See Notes to Financial Statements, Note 2 Investment Valuation and Fair Value Measurements for more information.
- (6) During January 2010, Las Vegas Monorail Company ("Las Vegas Monorail") filed for federal bankruptcy protection. During March 2012, Las Vegas Monorail emerged from federal bankruptcy with the acceptance of a reorganization plan assigned by the Federal Bankruptcy Court. Under the reorganization plan, the Fund surrendered its Las Vegas Monorail Project Revenue Bonds, First Tier, Series 2000 and in turn received two senior interest corporate bonds: the first with an annual coupon rate of 5.500% maturing on July 15, 2019 and the second with an annual coupon rate of 3.000% (5.500% after December 31, 2015) maturing on July 15, 2055. The Fund's custodian is not accruing income on the Fund's records for either senior interest corporate bond.

WI/DD Investment, or portion of investment, purchased on a when-issued or delayed delivery basis.

(IF) Inverse floating rate investment.

See accompanying notes to financial statements.

(1) All percentages shown in the Portfolio of Investments are based on net assets.

(2) Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.

- (3) Ratings: Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.
- (4) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensure the timely payment of principal and interest. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities.
- (5) Investment valued at fair value using methods determined in good faith by, or at the discretion of, the Board of Trustees. For fair value measurement disclosure purposes, investment classified as Level 3. See Notes to Financial Statements, Note 2 Investment Valuation and Fair Value Measurements for more information.
- (6) During January 2010, Las Vegas Monorail Company ("Las Vegas Monorail") filed for federal bankruptcy protection. During March 2012, Las Vegas Monorail emerged from federal bankruptcy with the acceptance of a reorganization plan assigned by the Federal Bankruptcy Court. Under the reorganization plan, the Fund surrendered its Las Vegas Monorail Project Revenue Bonds, First Tier, Series 2000 and in turn received two senior interest corporate bonds: the first with an annual coupon rate of 5.500% maturing on July 15, 2019 and the second with an annual coupon rate of 3.000% (5.500% after December 31, 2015) maturing on July 15, 2055. The Fund's custodian is not accruing income on the Fund's records for either senior interest corporate bond.
- (ETM) Escrowed to maturity.
- (IF) Inverse floating rate investment.
- (UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction. See Notes to Financial Statements, Note 3 – Portfolio Securities and Investments in Derivatives, Inverse Floating Rate Securities for more information.

See accompanying notes to financial statements.

(3)(4)(5)	Ratings ("Mood Fitch ar national Backed which e agency Investm	 There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns. Ratings: Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies. Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensure the timely payment of principal and interest. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities. Investment valued at fair value using methods determined in good faith by, or at the discretion of, the Board 					
(6)	Financia During protection of a reor surrendor senior in and the	 of Trustees. For fair value measurement disclosure purposes, investment classified as Level 3. See Notes to Financial Statements, Note 2 – Investment Valuation and Fair Value Measurements for more information. During January 2010, Las Vegas Monorail Company ("Las Vegas Monorail") filed for federal bankruptcy protection. During March 2012, Las Vegas Monorail emerged from federal bankruptcy with the acceptance of a reorganization plan assigned by the Federal Bankruptcy Court. Under the reorganization plan, the Fund surrendered its Las Vegas Monorail Project Revenue Bonds, First Tier, Series 2000 and in turn received two senior interest corporate bonds: the first with an annual coupon rate of 5.500% maturing on July 15, 2019 and the second with an annual coupon rate of 3.000% (5.500% after December 31, 2015) maturing on July 15, 2055. The Fund's custodian is not accruing income on the Fund's records for either senior interest corporate bond.) Escrowed to maturity. Inverse floating rate investment.

(1) All percentages shown in the Portfolio of Investments are based on net assets.

(2) Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.

(3) Ratings: Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.

- (4) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensure the timely payment of principal and interest. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities.
- (UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction. See Notes to Financial Statements, Note 3 – Portfolio Securities and Investments in Derivatives, Inverse Floating Rate Securities for more information.

See accompanying notes to financial statements.

	Other Assets Less Liabilities – 7.5%			4,010,435
	Net Assets – 100%			\$ 53,694,520

(1) All percentages shown in the Portfolio of Investments are based on net assets.

(2) Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.

- (3) Ratings: Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.
- (4) Investment, or portion of investment, has been pledged to collateralize the net payment obligations for investments in inverse floating rate transactions.
- (5) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensure the timely payment of principal and interest. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities.
- (ETM) Escrowed to maturity.
- (IF) Inverse floating rate investment.
- (UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction. See Notes to Financial Statements, Note 3 – Portfolio Securities and Investments in Derivatives, Inverse Floating Rate Securities for more information.

See accompanying notes to financial statements.

(a) Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Net Asset Value is the combination of changes in net asset value, reinvested dividend income at net asset value and reinvested capital gains distributions at net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.

(a) Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Net Asset Value is the combination of changes in net asset value, reinvested dividend income at net asset value and reinvested capital gains distributions at net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.

Notes to

Financial Statements (Unaudited)

1. General Information and Significant Accounting Policies

General Information

Fund Information

The funds covered in this report and their corresponding New York Stock Exchange ("NYSE") or NYSE MKT symbols are as follows (each a "Fund" and collectively, the "Funds"):

• Nuveen Select Tax-Free Income Portfolio (NXP) ("Select Tax-Free (NXP)")

- Nuveen Select Tax-Free Income Portfolio 2 (NXQ) ("Select Tax-Free 2 (NXQ)")
- Nuveen Select Tax-Free Income Portfolio 3 (NXR) ("Select Tax-Free 3 (NXR)")
- Nuveen California Select Tax-Free Income Portfolio (NXC) ("California Select Tax-Free (NXC)")
- Nuveen New York Select Tax-Free Income Portfolio (NXN) ("New York Select Tax-Free (NXN)")

The Funds are registered under the Investment Company Act of 1940, as amended, as diversified closed-end registered investment companies. Select Tax-Free (NXP), Select Tax-Free 2 (NXQ), Select Tax-Free 3 (NXR), California Select Tax-Free (NXC) and New York Select Tax-Free (NXN) were organized as Massachusetts business trusts on January 29, 1992, March 30, 1992, May 28, 1992, March 30, 1992 and March 30, 1992 respectively.

Each Fund seeks to provide current income and stable dividends, exempt from regular federal and designated state income taxes, where applicable, consistent with the preservation of capital by investing primarily in a portfolio of municipal obligations.

Investment Adviser

The Funds' investment adviser is Nuveen Fund Advisors, LLC (the "Adviser"), a wholly-owned subsidiary of Nuveen Investments, Inc. ("Nuveen"). The Adviser is responsible for each Fund's overall investment strategy and asset allocation decisions. The Adviser has entered into sub-advisory agreements with the Nuveen Asset Management, LLC, (the "Sub-Adviser"), a subsidiary of the Adviser, under which the Sub-Adviser manages the investment portfolios of the Funds.

Significant Accounting Policies

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with U.S. generally accepted accounting principles ("U.S. GAAP").

Investment Transactions

Investment transactions are recorded on a trade date basis. Realized gains and losses from investment transactions are determined on the specific identification method, which is the same basis used for federal income tax purposes. Investments purchased on a when-issued/delayed delivery basis may have extended settlement periods. Any investments so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to earmark securities in the Funds' portfolios with a current value at least equal to the amount of the when-issued/delayed delivery purchase commitments. As of September 30, 2013, outstanding when-issued/delayed delivery purchase commitments were as follow:

Select Tax-Free

	(NXP)
Outstanding when-issued/delayed delivery purchase commitments	\$ 1,456,635

Investment Income

Interest income, which reflects the amortization of premiums and includes accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Investment income also reflects paydown gains and losses, if any.

Professional Fees

Professional fees presented on the Statement of Operations consist of legal fees incurred in the normal course of operations, audit fees, tax consulting fees and, in some cases, workout expenditures. Workout expenditures are incurred in an attempt to protect or enhance an investment, or to pursue

other claims or legal actions on behalf of Fund shareholders. Should a Fund receive a refund of workout expenditures paid in a prior reporting period, such amounts will be recognized as "Legal fee refund" on the Statement of Operations.

Dividends and Distributions to Shareholders

Dividends from net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders at least annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to shareholders of net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. GAAP.

Equity Shelf Programs and Offering Costs

During the prior reporting period, the following Funds each filed initial registration statements with the Securities and Exchange Commission ("SEC") authorizing the Funds to issue additional shares through equity shelf programs ("Shelf Offerings"), which became effective with the SEC during the current fiscal period.

Under these Shelf Offerings, the Funds, subject to market conditions, may raise additional equity capital from time to time in varying amounts and offering methods at a net price at or above each Fund's net asset value ("NAV") per share.

Authorized shares, shares issued and offering proceeds, net of offering costs under each Fund's shelf offering during the six months ended September 30, 2013, were as follows:

	Select	Select	Select
	Tax-Free	Tax-Free 2	Tax-Free 3
	(NXP)	(NXQ)	(NXR)
Authorized shares	1,600,000	1,700,000	1,300,000
Shares issued			
Offering proceeds, net of offering costs			

Costs incurred by the Funds in connection with their initial Shelf Offerings are recorded as a deferred charge, which are amortized over the period such additional shares are sold not to exceed the one-year life of the Shelf Offering period and are recognized as a component of "Deferred offering costs" on the Statement of Assets and Liabilities. Ongoing Shelf Offering costs, and any additional costs the Funds may incur in connection with the Shelf Offerings, are expensed as incurred and recorded as a component of "Proceeds from shelf offering, net of offering costs" on the Statement of Changes in Net Assets.

Indemnifications

Under the Funds' organizational documents, their officers and trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

Netting Agreements

In the ordinary course of business, the Funds may enter into transactions subject to enforceable International Swaps and Derivative Association, Inc. ("ISDA") master agreements or other similar arrangements ("netting agreements"). Generally, the right to offset in netting agreements allows each Fund to offset any exposure to a specific counterparty

with any collateral received or delivered to that counterparty based on the terms of the agreements. Generally, a Fund manages its cash collateral and securities collateral on a counterparty basis. As of September 30, 2013, the Funds were not invested in any portfolio securities or derivative instruments that are subject to netting agreements.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results may differ from those estimates.

2. Investment Valuation and Fair Value Measurements

Investment Valuation

Prices of municipal bonds and other fixed income securities are provided by a pricing service approved by the Funds' Board of Trustees. These securities are generally classified as Level 2 for fair value measurement purposes. The pricing service establishes a security's fair value using methods that may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant. In pricing certain securities, particularly less liquid and lower quality securities, the pricing service may consider information about a security, its issuer or market activity, provided by the Adviser. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs.

Notes to Financial Statements (Unaudited) (continued)

Certain securities may not be able to be priced by the pre-established pricing methods as described above. Such securities may be valued by the Funds' Board of Trustees or its designee at fair value. These securities generally include, but are not limited to, restricted securities (securities which may not be publicly sold without registration under the Securities Act of 1933, as amended) for which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; debt securities that have gone into default and for which there is no current market quotation; a security whose market price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of a Fund's net asset value (as may be the case in non-U.S. markets on which the security is primarily traded) or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, is not deemed to reflect the security's fair value. As a general principle, the fair value of a security would appear to be the amount that the owner might reasonably expect to receive for it in a current sale. A variety of factors may be considered in determining the fair value of such securities, which may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs. Regardless of the method employed to value a particular security, all valuations are subject to review by the Funds' Board of Trustees or its designee.

Fair Value Measurements

Fair value is defined as the price that the Funds would receive upon selling an investment or transferring a liability in an orderly transaction to an independent buyer in the principal or most advantageous market for the investment. A three-tier hierarchy is used to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability. Observable inputs are based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability. Unobservable inputs are based on the best information available in the circumstances. The following is a summary of the three-tiered hierarchy of valuation input levels.

- Level 1 Inputs are unadjusted and prices are determined using quoted prices in active markets for identical securities.
- Level 2 Prices are determined using other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).
- Level 3 Prices are determined using significant unobservable inputs (including management's assumptions in determining the fair value of investments).

The inputs or methodologies used for valuing securities are not an indication of the risks associated with investing in those securities. The following is a summary of each Fund's fair value measurements as of the end of the reporting period:

Select Tax-Free (NXP)

Level 1 Level 2
