

GREAT SOUTHERN BANCORP INC
Form 10-Q
November 04, 2010

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES ACT OF 1934

For the Quarterly Period ended September 30, 2010

Commission File Number 0-18082

GREAT SOUTHERN BANCORP, INC.

(Exact name of registrant as specified in its charter)

Maryland
(State of Incorporation)

43-1524856
(IRS Employer Identification Number)

1451 E. Battlefield, Springfield, Missouri
(Address of Principal Executive Offices)

65804
(Zip Code)

(417) 887-4400
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data file required to be submitted and posted pursuant to Rule 405 of regulation S-T (§232.405 of this chapter) during the proceeding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of "accelerated filer," "large accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

(Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes / / No /X/

The number of shares outstanding of each of the registrant's classes of common stock: 13,445,975 shares of common stock, par value \$.01, outstanding at November 2, 2010.

GREAT SOUTHERN BANCORP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1: BASIS OF PRESENTATION

The accompanying unaudited interim consolidated financial statements of Great Southern Bancorp, Inc. (the "Company" or "Great Southern") have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. The financial statements presented herein reflect all adjustments which are, in the opinion of management, necessary to fairly present the financial condition, results of operations and cash flows of the Company for the periods presented. Those adjustments consist only of normal recurring adjustments. Operating results for the three and nine months ended September 30, 2010 and 2009 are not necessarily indicative of the results that may be expected for the full year. The consolidated statement of financial condition of the Company as of December 31, 2009, has been derived from the audited consolidated statement of financial condition of the Company as of that date.

Certain information and note disclosures normally included in the Company's annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for 2009 filed with the Securities and Exchange Commission.

NOTE 2: OPERATING SEGMENTS

The Company's banking operation is its only reportable segment. The banking operation is principally engaged in the business of originating residential and commercial real estate loans, construction loans, commercial business loans and consumer loans and funding these loans through deposits attracted from the general public and correspondent account relationships, brokered deposits and borrowings from the Federal Home Loan Bank ("FHLBank") and others. The operating results of this segment are regularly reviewed by management to make decisions about resource allocations and to assess performance.

Revenue from segments below the reportable segment threshold is attributable to three operating segments of the Company. These segments include insurance services, travel services and investment services. Selected information is not presented separately for the Company's reportable segment, as there is no material difference between that information and the corresponding information in the consolidated financial statements.

NOTE 3: COMPREHENSIVE INCOME

The FASB's Accounting Standards Codification ("FASB ASC") Topic 220 (Statement of Financial Accounting Standards No. 130, Reporting Comprehensive Income) requires the reporting of comprehensive income and its components. Comprehensive income is defined as the change in equity from transactions and other events and circumstances from non-owner sources, and excludes investments by and distributions to owners. Comprehensive income includes net income and other items of comprehensive income meeting the above criteria. The Company's only component of other comprehensive income is the unrealized gains and losses on available-for-sale securities.

Edgar Filing: GREAT SOUTHERN BANCORP INC - Form 10-Q

	Three Months Ended September 30, 2010		2009	
	(In thousands)			
Net unrealized gain on available-for-sale securities	\$	2,301	\$	5,324
Net unrealized gain (loss) on available-for-sale debt securities for which a portion of an other-than-temporary impairment has been recognized		46		(1,074)
Less reclassification adjustment for gain (loss) included in net income		5,441		(2,243)
Other comprehensive income (loss), before tax effect		(3,094)		6,493
Tax expense (benefit)		(1,083)		2,273
Change in unrealized gain (loss) on available-for-sale securities, net of income taxes	\$	(2,011)	\$	4,220

	Nine Months Ended September 30, 2010		2009	
	(In thousands)			
Net unrealized gain on available-for-sale securities	\$	5,903	\$	19,117
Net unrealized loss on available-for-sale debt securities for which a portion of an other-than-temporary impairment has been recognized		(389)		(4,520)
Less reclassification adjustment for gain (loss) included in net income		8,906		(2,553)
Other comprehensive income (loss), before tax effect		(3,392)		17,150
Tax expense (benefit)		(1,187)		6,003
Change in unrealized gain (loss) on available-for-sale securities, net of income taxes	\$	(2,205)	\$	11,147

The components of accumulated other comprehensive income, included in stockholders' equity, are as follows:

At September 30,

Edgar Filing: GREAT SOUTHERN BANCORP INC - Form 10-Q

	14,300	16,939
Tax expense	5,005	5,929
Net-of-tax amount	\$ 9,295	\$ 11,010

7

NOTE 4: RECENT ACCOUNTING PRONOUNCEMENTS

In October 2010, the FASB issued a proposed statement to amend FASB ASC Subtopic 310-40, Receivables – Troubled Debt Restructurings by Creditors. The statement would clarify guidance used by creditors to identify troubled debt restructurings and result in more consistent application of GAAP for debt restructurings. The proposed statement was released for comment through December 13, 2010. If adopted as proposed, the statement is not expected to have a material impact on the Company's financial position or results of operations.

In August 2010, the FASB issued a proposed statement to amend FASB ASC Subtopic 840, Leases. Most significantly, the statement would affect accounting by lessees for leases qualifying as operating leases which are currently reflected only in statements of operations and are not reflected in statements of financial condition. The FASB considers this methodology to inadequately reflect the true debt obligations of lessees on statements of financial condition and is proposing to eliminate the operating lease versus capital lease distinction and implement a right-of-use model for both lessees and lessors. This model would require lessees to recognize assets reflecting rights to use leased properties along with liabilities reflecting commitments to make lease payments. Lessors would likewise recognize assets reflecting their right to receive lease payments and would either recognize liabilities reflecting their related obligations for assets leased or would derecognize their rights to the assets leased. Measurement of the assets and liabilities recognized by lessees and lessors would be based on assumptions of longest possible lease terms and expected lease payments and would be updated as factors contributing to such assumptions change. The proposed statement was released for comment through December 15, 2010. If adopted as proposed, the statement is expected to impact the Company's financial position by increasing its fixed assets and liabilities, while the impact on its results of operations is not expected to be material.

In July 2010, the FASB issued Accounting Standards Update No. (ASU) 2010-20, Receivables (Topic 310): Disclosures about the Credit Quality of Financing Receivables and the Allowances for Credit Losses. This Update requires expanded disclosures to help financial statement users understand the nature of credit risks inherent in a creditor's portfolio of financing receivables; how that risk is analyzed and assessed in arriving at the allowance for credit losses; and the changes, and reasons for those changes, in both the receivables and the allowance for credit losses. The disclosures should be prepared on a disaggregated basis and provide a roll-forward schedule of the allowance for credit losses and detailed information on financing receivables including, among other things, recorded balances, nonaccrual status, impairments, credit quality indicators, details for troubled debt restructurings and an aging of past due financing receivables. Disclosures required as of the end of a reporting period are effective for interim and annual reporting periods ending after December 15, 2010. Disclosures required for activity occurring during a reporting period are effective for interim and annual reporting periods beginning after December 15, 2010. This Update is not expected to have a material impact on the Company's financial position or results of operations.

In June 2010, the FASB issued a proposed statement to amend FASB ASC Subtopic 820, Fair Value Measurements and Disclosures. The purpose of the amendment is to align U.S. generally accepted accounting principles (GAAP) and International Financial Reporting Standards (IFRS) for measuring fair value and disclosing such measurements. This would improve comparability of financial statements prepared in accordance with the different standards. Amendments to clarify or change GAAP would include: 1) limiting the highest and best use valuation premise to non-financial assets and liabilities, 2) an exception to the requirements in Topic 820 for fair value measurements of financial instruments managed within portfolios, 3) guidance for measuring the fair value of an instrument classified as equity, 4) a prohibition of the use of blockage factors when measuring the fair value of instruments classified as level 2 or level 3 within the fair value hierarchy, and 5) additional disclosures of fair value measurements including the effects of changing observable inputs used for level 3 measurements and categorization of

assets and liabilities not reported at fair value in the statement of financial position into the levels of the fair value hierarchy. The proposed statement was released for comment through September 7, 2010, and has not been finalized to date. If adopted as proposed, the statement is not expected to have a material impact on the Company's financial position or results of operations.

In June 2010, the FASB issued a proposed statement on revenue recognition to align GAAP and IFRS and to provide a simplified standard with fewer inconsistencies and more guidance that will improve comparability between entities. Under the proposal, revenue would be recognized based on contracts and allocated to performance obligations for goods and services at transaction prices which take into account factors such as collectability, time value of money, noncash consideration and consideration payable to the customer. The proposed statement was released for comment

through October 22, 2010, and has not been finalized to date. If adopted as proposed, the statement is not expected to have a material impact on the Company's financial position or results of operations.

In May 2010, the FASB issued a proposed statement meant to reduce the complexity of accounting for financial instruments and improve comparability of financial statements between entities. The guidance would require most financial instruments to be accounted for using fair value in the statement of financial condition. To aid users in their analyses of financial statements, both fair value information and amortized cost information would be presented on the face of the statement of financial condition. Most changes to fair value would be recognized in net income and comprehensive income and thresholds for recognizing impairments on financial instruments would be eliminated. The proposal also includes changes to hedging requirements. When determining whether derivative instruments qualify for hedge accounting, qualitative rather than quantitative assessments would be used and the hedge effectiveness threshold would be lowered from "highly effective" to "reasonably effective". To improve consistency in assessing effectiveness, the shortcut and critical terms match methods of hedge accounting would be eliminated. Documentation of hedge effectiveness after the initial assessment would no longer be required. The proposed statement was released for comment through September 30, 2010, and has not been finalized to date. If adopted as proposed, this statement is expected to have a material impact on the Company's financial position and results of operations.

In January 2010, the FASB issued ASU No. 2010-06, Improving Disclosures about Fair Value Measurements (FASB ASU 2010-09), which amends FASB ASC Subtopic 820-10, Fair Value Measurements and Disclosures. This Update requires new disclosures to show significant transfers in and out of Level 1 and Level 2 fair value measurements as well as discussion regarding the reasons for the transfers. It also clarifies existing disclosures requiring fair value measurement disclosures for each class of assets and liabilities. The Update describes a class as being a subset of assets and liabilities within a line item on the statement of financial condition which will require management judgment to designate. Use of the terminology "classes of assets and liabilities" represents an amendment from the previous terminology "major categories of assets and liabilities". Clarification is also provided for disclosures of Level 2 and Level 3 recurring and nonrecurring fair value measurements requiring discussion about the valuation techniques and inputs used. These provisions of the Update were effective for the Company's financial statements as of January 1, 2010 and did not have a material impact on the Company's financial position or results of operations. Another new disclosure requires an expanded reconciliation of activity in Level 3 fair value measurements to present information about purchases, sales, issuances and settlements on a gross basis rather than netting the amounts in one number. This requirement is effective for interim and annual reporting periods beginning after December 15, 2010 and is not expected to have a material impact on the Company's financial position or results of operations.

NOTE 5: STOCKHOLDERS' EQUITY

Previously, the Company's stockholders approved the Company's reincorporation to the State of Maryland. Under Maryland law, there is no concept of "Treasury Shares." Instead, shares purchased by the Company constitute authorized but unissued shares under Maryland law. Accounting principles generally accepted in the United States of America state that accounting for treasury stock shall conform to state law. The cost of shares purchased by the Company has been allocated to Common Stock and Retained Earnings balances.

	\$ 1,125	\$ 1,322

Certain investments in debt and marketable equity securities are reported in the financial statements at an amount less than their historical cost. Total fair value of these investments at September 30, 2010 and December 31, 2009, respectively, was approximately \$152,055,000 and \$139,985,000, which is approximately 21.8% and 17.9% of the Company's available-for-sale and held-to-maturity investment portfolio, respectively.

Based on evaluation of available evidence, including recent changes in market interest rates, credit rating information and information obtained from regulatory filings, management believes the declines in fair value for these debt securities are temporary at September 30, 2010.

The following table shows the Company's gross unrealized losses and fair value, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at September 30, 2010 and December 31, 2009:

Description of Securities	September 30, 2010

Gross gains of \$5.4 million and \$3.3 million and gross losses of \$13,000 and \$1.1 million resulting from sales of available-for-sale securities were realized for the three months ended September 30, 2010 and 2009, respectively. Gross gains of \$8.9 million and \$3.7 million and gross losses of \$13,000 and \$1.2 million resulting from sales of available-for-sale securities were realized for the nine months ended September 30, 2010 and 2009, respectively. Gains and losses on sales of securities are determined on the specific-identification method.

Other-than-temporary Impairment. Upon acquisition of a security, the Company decides whether it is within the scope of the accounting guidance for beneficial interests in securitized financial assets or will be evaluated for impairment under the accounting guidance for investments in debt and equity securities.

The accounting guidance for beneficial interests in securitized financial assets provides incremental impairment guidance for a subset of the debt securities within the scope of the guidance for investments in debt and equity securities. For securities where the security is a beneficial interest in securitized financial assets, the Company uses the beneficial interests in securitized financial asset impairment model. For securities where the security is not a beneficial interest in securitized financial assets, the Company uses debt and equity securities impairment model. The Company does not currently have securities within the scope of this guidance for beneficial interests in securitized financial assets.

The Company routinely conducts periodic reviews to identify and evaluate each investment security to determine whether an other-than-temporary impairment has occurred. The Company considers the length of time a security has been in an unrealized loss position, the relative amount of the unrealized loss compared to the carrying value of the security, the type of security and other factors. If certain criteria are met, the Company performs additional review and evaluation using observable market values or various inputs in economic models to determine if an unrealized loss is other-than-temporary. The Company uses quoted market prices for marketable equity securities and uses broker pricing quotes based on observable inputs for equity investments that are not traded on a stock exchange. For non-agency collateralized mortgage obligations, to determine if the unrealized loss is other-than-temporary, the Company projects total estimated defaults of the underlying assets (mortgages) and multiplies that calculated amount by an estimate of realizable value upon sale in the marketplace (severity) in order to determine the projected collateral loss. The Company also evaluates any current credit enhancement underlying these securities to determine the impact on cash flows. If the Company determines that a given security position will be subject to a write-down or loss, the Company records the expected credit loss as a charge to earnings.

During the three and nine months ended September 30, 2009, other-than-temporary impairment losses of \$277,000 and \$4.3 million, respectively, were recognized in the Company's statement of income. Based on evaluations of investment securities during the nine months ended September 30, 2010, none were determined to be other-than-temporarily impaired.

Credit Losses Recognized on Investments. Certain debt securities have experienced fair value deterioration due to credit losses, as well as due to other market factors, but are not otherwise other-than-temporarily impaired.

The following table provides information about debt securities for which only a credit loss was recognized in income and other losses are recorded in other comprehensive income.

	Accumulated Credit Losses
Credit losses on debt securities held	
July 1, 2010	\$2,983

NOTE 9: LOSS SHARING AGREEMENTS AND FDIC INDEMNIFICATION ASSET

On March 20, 2009, Great Southern Bank entered into a purchase and assumption agreement with loss share with the Federal Deposit Insurance Corporation (FDIC) to assume all of the deposits (excluding brokered deposits) and acquire certain assets of TeamBank, N.A., a full service commercial bank headquartered in Paola, Kansas. A detailed discussion of this transaction is included in the Company's Annual Report on Form 10-K for the year ended December

31, 2009, under the section titled "Item 8. Financial Statements and Supplementary Information."

The loans, commitments and foreclosed assets purchased in the TeamBank transaction are covered by a loss sharing agreement between the FDIC and Great Southern Bank which affords the Bank significant protection. Under the loss sharing agreement, the Bank will share in the losses on assets covered under the agreement (referred to as covered assets). On losses up to \$115.0 million, the FDIC has agreed to reimburse the Bank for 80% of the losses. On losses exceeding \$115.0 million, the FDIC has agreed to reimburse the Bank for 95% of the losses. Realized losses covered by the loss sharing agreement include loan contractual balances (and related unfunded commitments that were acquired), accrued interest on loans for up to 90 days, the book value of foreclosed real estate acquired, and certain

direct costs, less cash or other consideration received by the Bank. This agreement extends for ten years for 1-4 family real estate loans and for five years for other loans. The value of this loss sharing agreement was considered in determining fair values of loans and foreclosed assets acquired. The loss sharing agreement is subject to the Bank following servicing procedures as specified in the agreement with the FDIC. The expected reimbursements under the loss sharing agreement were recorded as an indemnification asset at their preliminary estimated fair value on the acquisition date. A discount was recorded in conjunction with the fair value of the acquired loans and the amount accreted to yield during the three and nine months ended September 30, 2010 was \$909,000 and \$1.6 million, respectively.

On September 4, 2009, Great Southern Bank entered into a purchase and assumption agreement with loss share with the FDIC to assume all of the deposits and acquire certain assets of Vantus Bank, a full service thrift headquartered in Sioux City, Iowa. A detailed discussion of this transaction is included in the Company's Annual Report on Form 10-K for the year ended December 31, 2009, under the section titled "Item 8. Financial Statements and Supplementary Information."

The loans, commitments and foreclosed assets purchased in the Vantus Bank transaction are covered by a loss sharing agreement between the FDIC and Great Southern Bank which affords the Bank significant protection. Under the loss sharing agreement, the Bank will share in the losses on assets covered under the agreement (referred to as covered assets). On losses up to \$102.0 million, the FDIC has agreed to reimburse the Bank for 80% of the losses. On losses exceeding \$102.0 million, the FDIC has agreed to reimburse the Bank for 95% of the losses. Realized losses covered by the loss sharing agreement include loan contractual balances (and related unfunded commitments that were acquired), accrued interest on loans for up to 90 days, the book value of foreclosed real estate acquired, and certain direct costs, less cash or other consideration received by the Bank. This agreement extends for ten years for 1-4 family real estate loans and for five years for other loans. The value of this loss sharing agreement was considered in determining fair values of loans and foreclosed assets acquired. The loss sharing agreement is subject to the Bank following servicing procedures as specified in the agreement with the FDIC. The expected reimbursements under the loss sharing agreement were recorded as an indemnification asset at their preliminary estimated fair value on the acquisition date. A discount was recorded in conjunction with the fair value of the acquired loans and the amount accreted to yield during the three and nine months ended September 30, 2010 was \$336,000 and \$886,000, respectively.

At the time of these acquisitions, the Company determined the fair value of the loan portfolios based on several assumptions. Factors considered in the valuations were projected cash flows for the loans, type of loan and related collateral, classification status, fixed or variable interest rate, term of loan, current discount rates and whether or not the loan was amortizing. Loans were grouped together according to similar characteristics and were treated in the aggregate when applying various valuation techniques. Management also estimated the amount of credit losses that were expected to be realized for the loan portfolios. The discounted cash flow approach was used to value each pool of loans. For non-performing loans, fair value was estimated by calculating the present value of the recoverable cash flows using a discount rate based on comparable corporate bond rates. This valuation of the acquired loans is a significant component leading to the valuation of the loss sharing assets recorded.

The amount of the estimated cash flows expected to be received from the acquired loan pools in excess of the fair values recorded for the loan pools is referred to as the accretable yield. The accretable yield is recognized as interest income over the estimated lives of the loans. The Company continues to evaluate the fair value of the loans including cash flows expected to be collected. Increases in the Company's cash flow expectations are recognized as increases to the accretable yield while decreases are recognized as impairments through the allowance for loan losses. During the quarter ended September 30, 2010, an increase in expected cash flows related to both acquired loan portfolios resulted in a \$14.4 million adjustment to the accretable yield to be spread over the estimated remaining lives of the loans on a level-yield basis. The impact of this adjustment on the three and nine months ended September 30, 2010 was an

increase in interest income of \$4.2 million. The increase in expected cash flows also reduced the amount of expected reimbursements under the loss sharing agreements. This resulted in a corresponding \$12.0 million adjustment to the indemnification assets to be amortized on a level-yield basis over the remainder of the loss sharing agreements or the remaining expected lives of the loan pools, whichever is shorter. The amount of the adjustment impacting the three and nine months ended September 30, 2010 was \$3.6 million of amortization expense recorded in non-interest income as a reduction in income. The net impact of the two adjustments was an increase of \$670,000 to pre-tax income. Because these adjustments will be recognized over the estimated remaining lives of the loan pools, they will impact future periods as well. The majority of the remaining \$10.2 million of accretable yield adjustment affecting interest income and \$8.4 million of adjustment to the indemnification assets affecting non-interest income is expected to be recognized over the next four years, with \$6.4 million of interest income and \$(5.4) million of non-interest income

(expense) expected to be recognized in the next twelve months. Beyond the impact of these adjustments to future periods, additional adjustments are also likely to be recorded in future periods as the Company continues to estimate expected cash flows from the acquired loan pools.

The loss sharing asset is measured separately from the loan portfolio because it is not contractually embedded in the loans and is not transferable with the loans should the Bank choose to dispose of them. Fair value was estimated using projected cash flows available for loss sharing based on the credit adjustments estimated for each loan pool (as discussed above) and the loss sharing percentages outlined in the Purchase and Assumption Agreement with the FDIC. These cash flows were discounted to reflect the uncertainty of the timing and receipt of the loss sharing reimbursement from the FDIC. The loss sharing asset is also separately measured from the related foreclosed real estate.

TeamBank FDIC Indemnification Asset. The following table presents the balance of the FDIC indemnification asset related to the TeamBank transaction at September 30, 2010. Expected cash flows and the present value of future cash flows related to these assets have not changed materially since the analysis performed at acquisition on March 20, 2009. Gross loan balances (due from the borrower) were reduced approximately \$188.9 million since the transaction date through repayments by the borrower, transfers to foreclosed assets or charge-offs to customer loan balances.

NOTE 11: FAIR VALUE MEASUREMENT

ASC Topic 820, Fair Value Measurements, defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Topic 820 also specifies a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

- Quoted prices in active markets for identical assets or liabilities (Level 1): Inputs that are quoted unadjusted prices in active markets for identical assets that the Company has the ability to access at the measurement date. An active market for the asset is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.
- Other observable inputs (Level 2): Inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity including quoted prices for similar assets, quoted prices for securities in inactive markets and inputs derived principally from or corroborated by observable market data by correlation or other means.
- Significant unobservable inputs (Level 3): Inputs that reflect assumptions of a source independent of the reporting entity or the reporting entity's own assumptions that are supported by little or no market activity or observable inputs.

Financial instruments are broken down as follows by recurring or nonrecurring measurement status. Recurring assets are initially measured at fair value and are required to be remeasured at fair value in the financial statements at each reporting date. Assets measured on a nonrecurring basis are assets that, due to an event or circumstance, were required to be remeasured at fair value after initial recognition in the financial statements at some time during the reporting period.

The following is a description of inputs and valuation methodologies used for assets recorded at fair value on a recurring basis and recognized in the accompanying balance sheets at September 30, 2010, as well as the general

classification of such assets pursuant to the valuation hierarchy.

Securities Available for Sale. Investment securities available for sale are recorded at fair value on a recurring basis. The fair values used by the Company are obtained from an independent pricing service, which represent either quoted market prices for the identical asset or fair values determined by pricing models, or other model-based valuation techniques, that consider observable market data, such as interest rate volatilities, LIBOR yield curve, credit spreads and prices from market makers and live trading systems. Recurring Level 1 securities include exchange traded equity securities. Recurring Level 2 securities include U.S. government agency securities, mortgage-backed securities, collateralized mortgage obligations, Small Business Administration (SBA) loan pools, state and municipal bonds, corporate bonds and equity securities. Inputs used for valuing Level 2 securities include observable data that may include dealer quotes, benchmark yields, market spreads, live trading levels and market consensus prepayment speeds,

among other things. Additional inputs include indicative values derived from the independent pricing service's proprietary computerized models. No securities were included in the category of Recurring Level 3 securities at or for the nine months ended September 30, 2010.

Mortgage Servicing Rights. Mortgage servicing rights do not trade in an active, open market with readily observable prices. Accordingly, fair value is estimated using discounted cash flow models. Due to the nature of the valuation inputs, mortgage servicing rights are classified within Level 3 of the hierarchy.

	Fair value measurements at September 30, 2010, using			
	Fair value September 30, 2010	Quoted prices in active markets for identical assets (Level 1)	Other observable inputs (Level 2)	Significant unobservable inputs (Level 3)

The Company considers transfers between the levels of the hierarchy to be recognized at the end of related reporting periods. From December 31, 2009 to September 30, 2010, no assets for which fair value is measured on a recurring basis transferred between any levels of the hierarchy.

The following is a reconciliation of the beginning and ending balances of recurring fair value measurements recognized in the accompanying balance sheet using significant unobservable (Level 3) inputs.

	Mortgage Servicing Rights (In thousands)
Balance, July 1, 2010	\$ 915
Additions, net of amortization	(140)
Balance, September 30, 2010	\$ 775

	Mortgage Servicing Rights (In thousands)
Balance, January 1, 2010	\$ 1,132
Additions, net of amortization	(357)
Balance, September 30, 2010	\$ 775

The following is a description of valuation methodologies used for financial assets and liabilities measured at fair value on a nonrecurring basis at September 30, 2010, as well as the general classification of such assets pursuant to the valuation hierarchy.

Loans Held for Sale. Mortgage loans held for sale are recorded at the lower of carrying value or fair value. The fair value of mortgage loans held for sale is based on what secondary markets are currently offering for portfolios with similar characteristics. As such, the Company classifies mortgage loans held for sale as Nonrecurring Level 2. Write-downs to fair value typically do not occur as the Company generally enters into commitments to sell individual mortgage loans at the time the loan is originated to reduce market risk. The Company typically does not have commercial loans held for sale.

Impaired Loans. A loan is considered to be impaired when it is probable that all of the principal and interest due may not be collected according to its contractual terms. Generally, when a loan is considered impaired, the amount of reserve required under FASB ASC 310, Receivables, (SFAS No. 114) is measured based on the fair value of the underlying collateral. The Company makes such measurements on all material loans deemed impaired using the fair value of the collateral for collateral dependent loans. The fair value of collateral used by the Company is determined by obtaining an observable market price or by obtaining an appraised value from an independent, licensed or certified appraiser, using observable market data. This data includes information such as selling price of similar properties and capitalization rates of similar properties sold within the market, expected future cash flows or earnings of the subject property based on current market expectations, and other relevant factors. In addition, management may apply selling and other discounts to the underlying collateral value to determine the fair value. If an appraised value is not available, the fair value of the impaired loan is determined by an adjusted appraised value including unobservable cash flows.

The Company records impaired loans as Nonrecurring Level 3. If a loan's fair value as estimated by the Company is less than its carrying value, the Company either records a charge-off of the portion of the loan that exceeds the fair value or establishes a reserve within the allowance for loan losses specific to the loan. Loans for which such charge-offs or reserves have been recorded are shown in the table below (net of reserves). In accordance with the provisions of FASB ASC 310 (SFAS No. 114), impaired loans with a carrying value of \$68.7 million, and an associated valuation reserve of \$8.6 million, were recorded at their fair value of \$60.1 million at September 30, 2010. Impaired loans of \$11.7 million at September 30, 2010, had no related allowance for loan losses assigned. Included in impaired loans at September 30, 2010, were loans modified in troubled debt restructurings of \$11.8 million. Of these loans, \$11.2 million were performing in accordance with their modified terms.

Foreclosed Assets Held for Sale. Foreclosed assets held for sale are initially recorded at fair value less estimated cost to sell at the date of foreclosure. Subsequent to foreclosure, valuations are periodically performed by management and the assets are carried at the lower of carrying amount or fair value less estimated cost to sell. Foreclosed assets held for sale are classified within Level 3 of the fair value hierarchy. The foreclosed assets represented in the table below have been re-measured subsequent to their initial transfer to foreclosed assets.

The following table presents the fair value measurements of assets measured at fair value on a nonrecurring basis and the level within the fair value hierarchy in which the fair value measurements fall at September 30, 2010:

	Fair Value Measurements Using			
	Fair Value September 30, 2010	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Loans held for sale	\$ 10,191	\$ ---	\$ 10,191	\$ ---
Impaired loans	48,438	---	---	48,438
Foreclosed assets held for sale	9,588	---	---	9,588

The following methods were used to estimate the fair value of all other financial instruments recognized in the accompanying balance sheet at amounts other than fair value:

Cash and Cash Equivalents and Federal Home Loan Bank Stock. The carrying amount approximates fair value.

Loans and Interest Receivable. The fair value of loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. Loans with similar characteristics are aggregated for purposes of the calculations. The carrying amount of accrued interest receivable approximates its fair value.

Deposits and Accrued Interest Payable. The fair value of demand deposits and savings accounts is the amount payable on demand at the reporting date, i.e., their carrying amounts. The fair value of fixed maturity certificates of deposit is estimated using a discounted cash flow calculation that applies the rates currently offered for deposits of similar remaining maturities. The carrying amount of accrued interest payable approximates its fair value.

Federal Home Loan Bank Advances. Rates currently available to the Company for debt with similar terms and remaining maturities are used to estimate fair value of existing advances.

Short-Term Borrowings. The carrying amount approximates fair value.

Subordinated Debentures Issued to Capital Trusts. The subordinated debentures have floating rates that reset quarterly. The carrying amount of these debentures approximates their fair value.

Structured Repurchase Agreements. Structured repurchase agreements are collateralized borrowings from counterparties. In addition to the principal amount owed, the counterparty also determines an amount that would be owed by either party in the event the agreement is terminated prior to maturity by the Company. The fair values of the structured repurchase agreements are estimated based on the amount the Company would be required to pay to terminate the agreement at the balance sheet date.

Commitments to Originate Loans, Letters of Credit and Lines of Credit. The fair value of commitments is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value of letters of credit is based on fees currently charged for similar agreements or on the estimated cost to terminate them or otherwise settle the obligations with the counterparties at the reporting date.

The following table presents estimated fair values of the Company's financial instruments. The fair values of certain of these instruments were calculated by discounting expected cash flows, which method involves significant judgments by management and uncertainties. Fair value is the estimated amount at which financial assets or liabilities could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. Because no market exists for certain of these financial instruments and because management does not intend to sell these financial instruments, the Company does not know whether the fair values shown below represent values at which the respective financial instruments could be sold individually or in the aggregate.

The following disclosure relates to financial assets for which it is not practicable for the Company to estimate the fair value at September 30, 2010.

FDIC Indemnification Asset: As part of the 2009 Purchase and Assumption Agreements, Great Southern Bank and the FDIC entered into loss sharing agreements. These agreements cover realized losses on loans and foreclosed real estate.

Under the first agreement (TeamBank), the FDIC will reimburse the Bank for 80% of the first \$115 million in realized losses. The FDIC will reimburse the Bank 95% on realized losses that exceed \$115 million. This agreement extends for ten years for 1-4 family real estate loans and for five years for other loans. This loss sharing asset is measured separately from the loan portfolio because it is not contractually embedded in the loans and is not transferable with the loans or foreclosed assets should the Bank choose to dispose of them. Fair value at the acquisition date (March 20, 2009) was estimated using projected cash flows available for loss sharing based on the credit adjustments estimated for each loan pool and the loss sharing percentages. These cash flows were discounted to reflect the uncertainty of the

timing and receipt of the loss sharing reimbursement from the FDIC. This loss sharing asset is also separately measured from the related foreclosed real estate. At September 30, 2010, the carrying value of the FDIC indemnification asset was \$81.7 million, with \$2.3 million of this amount scheduled to be amortized against non-interest income over future periods as a result of the change in expected losses recognized in the quarter ended September 30, 2010. Although this asset is a contractual receivable from the FDIC, there is no effective interest rate. The Bank will collect this asset over the next several years. The amount ultimately collected will depend on the timing and amount of collections and charge-offs on the acquired assets covered by the loss sharing agreement. While this asset was recorded at its estimated fair value at March 20, 2009, it is not practicable to complete a fair value analysis of the entire portfolio of loans and foreclosed assets covered by the loss sharing agreement on a quarterly or annual basis.

Under the second agreement (Vantus Bank), the FDIC will reimburse The Bank for 80% of the first \$102 million in realized losses. The FDIC will reimburse The Bank 95% on realized losses that exceed \$102 million. This agreement

extends for ten years for 1-4 family real estate loans and for five years for other loans. This loss sharing asset is measured separately from the loan portfolio because it is not contractually embedded in the loans and is not transferable with the loans or foreclosed assets should the Bank choose to dispose of them. Fair value at the acquisition date (September 4, 2009) was estimated using projected cash flows available for loss sharing based on the credit adjustments estimated for each loan pool and the loss sharing percentages. These cash flows were discounted to reflect the uncertainty of the timing and receipt of the loss sharing reimbursement from the FDIC. This loss sharing asset is also separately measured from the related foreclosed real estate. At September 30, 2010, the carrying value of the FDIC indemnification asset was \$42.9 million, with \$6.1 million of this amount scheduled to be amortized against non-interest income over future periods as a result of the change in expected losses recognized in the quarter ended September 30, 2010. Although this asset is a contractual receivable from the FDIC, there is no effective interest rate. The Bank will collect this asset over the next several years. The amount ultimately collected will depend on the timing and amount of collections and charge-offs on the acquired assets covered by the loss sharing agreement. While this asset was recorded at its estimated fair value at September 4, 2009, it is not practicable to complete a fair value analysis of the entire portfolio of loans and foreclosed assets covered by the loss sharing agreement on a quarterly or annual basis.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

When used in this Quarterly Report on Form 10-Q and in future filings by the Company with the Securities and Exchange Commission (the "SEC"), in the Company's press releases or other public or shareholder communications, and in oral statements made with the approval of an authorized executive officer, the words or phrases "will likely result," "are expected to," "will continue," "is anticipated," "estimate," "project," "intends" or similar expressions are intended to identify "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements are subject to certain risks and uncertainties including, among other things, (i) expected cost savings, synergies and other benefits from the Company's merger and acquisition activities might not be realized within the anticipated time frames or at all, and costs or difficulties relating to integration matters, including but not limited to customer and employee retention, might be greater than expected; (ii) changes in economic conditions, either nationally or in the Company's market areas; (iii) fluctuations in interest rates; (iv) the risks of lending and investing activities, including changes in the level and direction of loan delinquencies and write-offs and changes in estimates of the adequacy of the allowance for loan losses; (v) the possibility of other-than-temporary impairments of securities held in the Company's securities portfolio; (vi) the Company's ability to access cost-effective funding; (vii) fluctuations in real estate values and both residential and commercial real estate market conditions; (viii) demand for loans and deposits in the Company's market areas; (ix) legislative or regulatory changes that adversely affect the Company's business, including, without limitation, the recently enacted Dodd-Frank Wall Street Reform and Consumer Protection Act and its implementing regulations, and the new overdraft protection regulations and customers' responses thereto; (x) monetary and fiscal policies of the Federal Reserve Board and the U.S. Government and other governmental initiatives affecting the financial services industry; (xi) results of examinations of the Company and the Bank by their regulators, including the possibility that the regulators may, among other things, require the Company to increase its allowance for loan losses or to write-down assets; (xii) the uncertainties arising from the Company's participation in the TARP Capital Purchase Program, including impacts on employee recruitment and retention and other business and practices, and uncertainties concerning the potential redemption by us of the U.S. Treasury's preferred stock investment under the program, including the timing of, regulatory approvals for, and conditions placed upon, any such redemption; (xiii) costs and effects of litigation, including settlements and judgments; and (xiv) competition. The Company wishes to advise readers that the factors listed above could affect the Company's financial performance and could cause the Company's actual results for future periods to differ materially

from any opinions or statements expressed with respect to future periods in any current statements.

The Company does not undertake-and specifically declines any obligation-to publicly release the result of any revisions which may be made to any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events.

Critical Accounting Policies, Judgments and Estimates

The accounting and reporting policies of the Company conform with accounting principles generally accepted in the United States and general practices within the financial services industry. The preparation of financial statements in

conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and the accompanying notes. Actual results could differ from those estimates.

Allowance for Loan Losses and Valuation of Foreclosed Assets

The Company believes that the determination of the allowance for loan losses involves a higher degree of judgment and complexity than its other significant accounting policies. The allowance for loan losses is calculated with the objective of maintaining an allowance level believed by management to be sufficient to absorb estimated loan losses. Management's determination of the adequacy of the allowance is based on periodic evaluations of the loan portfolio and other relevant factors. However, this evaluation is inherently subjective as it requires material estimates of, including, among others, expected default probabilities, loss once loans default, expected commitment usage, the amounts and timing of expected future cash flows on impaired loans, value of collateral, estimated losses, and general amounts for historical loss experience.

The process also considers economic conditions, uncertainties in estimating losses and inherent risks in the loan portfolio. All of these factors may be susceptible to significant change. To the extent actual outcomes differ from management estimates, additional provisions for loan losses may be required that would adversely impact earnings in future periods. In addition, the Bank's regulators could require additional provisions for loan losses as part of their examination process.

Additional discussion of the allowance for loan losses is included in the Company's Annual Report on Form 10-K for the year ended December 31, 2009, under the section titled "Item 1. Business - Allowances for Losses on Loans and Foreclosed Assets." Inherent in this process is the evaluation of individual significant credit relationships. From time to time certain credit relationships may deteriorate due to payment performance, cash flow of the borrower, value of collateral, or other factors. In these instances, management may have to revise its loss estimates and assumptions for these specific credits due to changing circumstances. In some cases, additional losses may be realized; in other instances, the factors that led to the deterioration may improve or the credit may be refinanced elsewhere and allocated allowances may be released from the particular credit. For the periods included in these financial statements, management's overall methodology for evaluating the allowance for loan losses has not changed significantly.

In addition, the Company considers that the determination of the valuations of foreclosed assets held for sale involves a high degree of judgment and complexity. The carrying value of foreclosed assets reflects management's best estimate of the amount to be realized from the sales of the assets. While the estimate is generally based on a valuation by an independent appraiser or recent sales of similar properties, the amount that the Company realizes from the sales of the assets could differ materially from the carrying value reflected in the financial statements, resulting in losses that could adversely impact earnings in future periods.

Carrying Value of FDIC-covered Loans and Indemnification Asset

The Company considers that the determination of the carrying value of loans acquired in the March 20, 2009 and September 4, 2009, FDIC-assisted transactions and the carrying value of the related FDIC indemnification assets involve a high degree of judgment and complexity. The carrying value of the acquired loans and the FDIC indemnification assets reflect management's best ongoing estimates of the amounts to be realized on each of these assets. The Company determined initial fair value accounting estimates of the assumed assets and liabilities in accordance with FASB ASC 805 (SFAS No. 141(R), Business Combinations). However, the amount that the Company realizes on these assets could differ materially from the carrying value reflected in its financial statements, based upon the timing of collections on the acquired loans in future periods. Because of the loss sharing agreements with the FDIC on these assets, the Company should not incur any significant losses. To the extent the actual values

realized for the acquired loans are different from the estimates, the indemnification asset will generally be impacted in an offsetting manner due to the loss sharing support from the FDIC. Subsequent to the initial valuation, the Company continues to monitor identified loan pools and related loss sharing assets for changes in estimated cash flows projected for the loan pools, anticipated credit losses and changes in the accretable yield. Analysis of these variables requires significant estimates and a high degree of judgment. See Note 9 “Loss Sharing Agreements and FDIC Indemnification Assets” included in Item 1 for additional information.

Goodwill and Intangible Assets

Goodwill and intangibles assets that have indefinite useful lives are subject to an impairment test at least annually and more frequently if circumstances indicate their value may not be recoverable. Goodwill is tested for impairment using a process that estimates the fair value of each of the Company's reporting units compared with its carrying value. The Company defines reporting units as a level below each of its operating segments for which there is discrete financial information that is regularly reviewed. As of September 30, 2010, the Company has two reporting units to which goodwill has been allocated – the Bank and the Travel division (which is a division of a subsidiary of the Bank). If the fair value of a reporting unit exceeds its carrying value, then no impairment is recorded. If the carrying value amount exceeds the fair value of a reporting unit, further testing is completed comparing the implied fair value of the reporting unit's goodwill to its carrying value to measure the amount of impairment. Intangible assets that are not amortized will be tested for impairment at least annually by comparing the fair values to those assets to their carrying values. At September 30, 2010, goodwill consisted of \$379,000 at the Bank reporting unit and \$875,000 at the Travel reporting unit. Other identifiable intangible assets that are subject to amortization are amortized on a straight-line basis over periods ranging from three to seven years. At September 30, 2010, the amortizable intangible assets consisted of core deposit intangibles of \$4.3 million at the Bank reporting unit and \$32,000 of non-compete agreements at the Travel reporting unit. These amortizable intangible assets are reviewed for impairment if circumstances indicate their value may not be recoverable based on a comparison of fair value.

While the Company believes no impairment existed at September 30, 2010, different conditions or assumptions used to measure fair value of reporting units, or changes in cash flows or profitability, if significantly negative or unfavorable, could have a material adverse effect on the outcome of the Company's impairment evaluation in the future.

Current Economic Conditions

The current economic environment presents financial institutions with unprecedented circumstances and challenges which in some cases have resulted in large declines in the fair values of investments and other assets, constraints on liquidity and significant credit quality problems, including severe volatility in the valuation of real estate and other collateral supporting loans. The Company's financial statements have been prepared using values and information currently available to the Company.

Given the volatility of current economic conditions, the values of assets and liabilities recorded in the financial statements could change rapidly, resulting in material future adjustments in asset values, the allowance for loan losses, or capital that could negatively impact the Company's ability to meet regulatory capital requirements and maintain sufficient liquidity.

General

The profitability of the Company and, more specifically, the profitability of its primary subsidiary, Great Southern Bank (the "Bank"), depends primarily on its net interest income, as well as provisions for loan losses and the level of non-interest income and non-interest expense. Net interest income is the difference between the interest income the Bank earns on its loans and investment portfolio, and the interest it pays on interest-bearing liabilities, which consists mainly of interest paid on deposits and borrowings. Net interest income is affected by the relative amounts of interest-earning assets and interest-bearing liabilities and the interest rates earned or paid on these balances. When interest-earning assets approximate or exceed interest-bearing liabilities, any positive interest rate spread will generate net interest income.

In the nine months ended September 30, 2010, Great Southern's net loans decreased \$168.9 million, or 8.1%, from \$2.08 billion at December 31, 2009, to \$1.91 billion at September 30, 2010. A portion of the decrease in net loans was due to a \$105.4 million, or 24.8%, decrease in the loan portfolios acquired through the 2009 FDIC-assisted transactions, primarily because of loan repayments. Excluding the reductions in these acquired portfolios, loans decreased by approximately \$63.5 million, primarily due to a decrease in outstanding construction loans (net of the undisbursed portion) of \$56.2 million, or 17.5%, and a decrease in outstanding commercial real estate loans of \$25.8 million, or 4.6%. As loan demand is affected by a variety of factors, including general economic conditions, and because of the competition we face and our focus on pricing discipline and credit quality, we cannot be assured that our loan growth will match or exceed the level of increases achieved in prior years. Based upon the current lending environment and economic conditions, the Company does not expect to grow the overall loan portfolio significantly, if

at all, at this time and the loan portfolio may continue to shrink due to net loan repayments. The Company's strategy continues to be focused on maintaining credit risk and interest rate risk at appropriate levels given the current credit and economic environments.

In addition, the level of non-performing loans and foreclosed assets may affect our net interest income and net income. While we did not have an overall high level of charge-offs on our non-performing loans prior to 2008, we generally do not accrue interest income on these loans and do not recognize interest income until the loans are repaid or interest payments have been made for a period of time sufficient to provide evidence of performance on the loans. Generally, the higher the level of non-performing assets, the greater the negative impact on interest income and net income. We expect the loan loss provision, non-performing assets and foreclosed assets to remain elevated. In addition, expenses related to the credit resolution process could also remain elevated.

In the nine months ended September 30, 2010, Great Southern's available-for-sale securities decreased \$68.0 million, or 8.9%, from \$764.3 million at December 31, 2009, to \$696.3 million at September 30, 2010. During the nine-month period, the Company sold virtually all of the securities acquired through the 2009 FDIC-assisted transactions to eliminate securities with lower yields and blocks of smaller securities and to realize the gain positions of the securities which permanently increased common stockholders' equity. These sales, in addition to other sales of mortgage-backed securities, were the primary cause for the decrease in available-for-sale securities and resulted in gains of \$8.9 million recorded in non-interest income. Due primarily to sales, mortgage-backed securities decreased \$86.4 million, or 13.7%, and collateralized mortgage obligations decreased \$41.2 million, or 79.7%. Partially offsetting the decrease due to sales was the purchase of SBA loan pools totaling \$61.5 million at September 30, 2010.

Great Southern had cash and cash equivalents of \$477.5 million at September 30, 2010 compared to \$444.6 million at December 31, 2009. Cash and cash equivalents increased significantly in 2009 primarily as a result of the FDIC-assisted transactions involving certain TeamBank and Vantus Bank assets and liabilities. During 2010, cash and cash equivalents continued to increase because of net loan repayments and lower overall loan demand.

The Company attracts deposit accounts through its retail branch network, correspondent banking and corporate services areas, and brokered deposits. The Company then utilizes these deposit funds, along with Federal Home Loan Bank (FHLBank) advances and other borrowings, to meet loan demand or otherwise fund its activities. In the nine months ended September 30, 2010, total deposit balances decreased \$136.4 million, or 5.0%. Interest-bearing transaction accounts increased \$162.2 million while non-interest-bearing checking accounts decreased \$7.8 million. Retail certificates of deposit decreased \$47.8 million while total brokered deposits decreased \$81.5 million. Great Southern Bank customer deposits totaling \$197.6 million and \$359.1 million, at September 30, 2010 and December 31, 2009, respectively, were part of the CDARS program which allows bank customers to maintain balances in an insured manner that would otherwise exceed the FDIC deposit insurance limit. The FDIC considers these customer accounts to be brokered deposits due to the fees paid in the CDARS program. The level of competition for deposits in our markets is high. While it is our goal to gain checking account and retail certificate of deposit market share in our branch footprint, we cannot be assured of this in future periods. In the third quarter of 2010, the Company allowed some of its relatively high-cost deposits and borrowings to mature without replacement to reduce interest expense through the use of a portion of its excess cash and cash equivalents.

Total brokered deposits, excluding the CDARS accounts discussed above, were \$187.6 million at September 30, 2010, down from \$269.2 million at December 31, 2009. The decrease was the result of \$92.6 million of reductions in CDARS purchased funds offset in part by an \$11.0 million increase in traditional brokered deposits. During the nine months ended September 31, 2010, \$38.5 million of brokered deposits matured and were replaced by \$27.5 million in new brokered deposits issued by the Company. These new brokered deposits will provide low fixed rates of interest for the next three to four years. No interest rate swaps are associated with these brokered certificates. The majority of the Company's brokered certificates of deposit have fixed rates of interest and mature in 2011 and 2012.

Our ability to fund growth in future periods may also be dependent on our ability to continue to access brokered deposits and FHLBank advances. In times when our loan demand has outpaced our generation of new deposits, we have utilized brokered deposits and FHLBank advances to fund these loans. These funding sources have been attractive to us because we can create variable rate funding, if desired, which more closely matches the variable rate nature of much of our loan portfolio. While we do not currently anticipate that our ability to access these sources will be reduced or eliminated in future periods, if this should happen, the limitation on our ability to fund additional loans would adversely affect our business, financial condition and results of operations.

Our net interest income may be affected positively or negatively by market interest rate changes. A large portion of our loan portfolio is tied to the "prime rate" and adjusts immediately when this rate adjusts (subject to the effect of loan interest rate floors, which are discussed below). We monitor our sensitivity to interest rate changes on an ongoing basis (see "Item III. Quantitative and Qualitative Disclosures About Market Risk"). In addition, our net interest income may be impacted by changes in the cash flows expected to be received from acquired loan pools. As previously described in Note 9, the Company's evaluation of cash flows expected to be received from acquired loan pools is on-going and increases in cash flow expectations are recognized as increases in accretable yield through interest income. Decreases in cash flow expectations are recognized as impairments through the allowance for loan losses.

The current level and shape of the interest rate yield curve poses challenges for interest rate risk management. The FRB last cut interest rates on December 16, 2008. Great Southern has a significant portfolio of loans which are tied to a "prime rate" of interest. Some of these loans are tied to some national index of "prime," while most are indexed to "Great Southern prime." The Company has elected to leave its "Great Southern prime rate" of interest at 5.00%. This does not affect a large number of customers, as a majority of the loans indexed to "Great Southern prime" are already at interest rate floors which are provided for in individual loan documents. But for the interest rate floors, a rate cut by the FRB generally would have an anticipated immediate negative impact on the Company's net interest income due to the large total balance of loans which generally adjust immediately as the Federal Funds rate adjusts. Loans at their floor rates are subject to the risk that borrowers will seek to refinance elsewhere at the lower market rate, however. Because the Federal Funds rate is already very low, there may also be a negative impact on the Company's net interest income due to the Company's inability to lower its funding costs significantly in the current environment. Conversely, interest rate increases would normally result in increased interest rates on our prime-based loans. However, the interest rate floors in effect may limit the immediate increase in interest rates on these loans, until such time as rates rise above the floors.

The potentially negative impact of low loan interest rates since December 2008 was mitigated by the positive effects of the Company's loans which have interest rate floors. At September 30, 2010, the Company had a portfolio (excluding the loans acquired in the FDIC-assisted transactions) of prime-based loans totaling approximately \$758 million with rates that change immediately with changes to the prime rate of interest. Of this total, \$625 million also had interest rate floors. These floors were at varying rates, with \$121 million of these loans having floor rates of 7.0% or greater and another \$460 million of these loans having floor rates between 5.0% and 7.0%. At September 30, 2010, all of these loans were at their floor rates. During 2003 and 2004, the Company's loan portfolio had loans with rate floors that were much lower. However, since market interest rates were also much lower at that time, these loan rate floors went into effect and established a loan rate which was higher than the contractual rate would have otherwise been. This contributed to a loan yield for the entire portfolio which was approximately 139 and 55 basis points higher than the "prime rate of interest" at December 31, 2003 and 2004, respectively. As interest rates rose in the second half of 2004 and throughout 2005 and 2006, these interest rate floors were exceeded and the loans reverted back to their normal contractual interest rate terms. At December 31, 2005, the loan yield for the portfolio was approximately 8 basis points higher than the "prime rate of interest," resulting in lower interest rate margins. At December 31, 2006, the loan portfolio yield was approximately 5 basis points lower than the "prime rate of interest." During the latter portion of 2007 and throughout subsequent periods, as the "prime rate of interest" decreased, the Company's loan portfolio again had loans with rate floors that went into effect and established a loan rate which was higher than the contractual rate would have otherwise been. This contributed to a loan yield for the entire portfolio which was approximately 33 basis points higher than the "prime rate of interest" at December 31, 2007. The loan yield for the portfolio had increased to a level that was approximately 300 and 310 basis points higher than the national "prime rate of interest" at December 31, 2009 and December 31, 2008, respectively. The loan yield for the portfolio declined to a level that was approximately 280 basis points higher than the national "prime rate of interest" at September 30, 2010. While interest rate floors have had an overall positive effect on the Company's results, they do subject the Company to the risk that borrowers will elect to refinance their loans with other lenders. To the extent economic conditions

improve, the risk that borrowers will seek to refinance their loans increases.

The Company's profitability is also affected by the level of its non-interest income and operating expenses. Non-interest income consists primarily of service charges and ATM fees, commissions earned by our travel, insurance and investment divisions, accretion income (net of amortization) related to the FDIC-assisted acquisitions, late charges and prepayment fees on loans, gains on sales of loans and available-for-sale investments and other general operating income. In 2009, non-interest income was positively affected by the gains recognized on the FDIC-assisted transactions. On July 1, 2010, a federal rule went into effect which prohibits a financial institution from automatically enrolling customers in overdraft protection programs, on ATM and one-time debit card transactions, unless a consumer consents, or opts in, to the overdraft service. This new rule may adversely affect the amount of non-interest

income we generate (see discussion in “Business Initiatives” below). Operating expenses consist primarily of salaries and employee benefits, occupancy-related expenses, expenses related to foreclosed assets, postage, FDIC deposit insurance, advertising and public relations, telephone, professional fees, office expenses and other general operating expenses.

Total non-interest income decreased in the three and nine months ended September 30, 2010 when compared to the three and nine months ended September 30, 2009. The decrease was due primarily to the one-time gains recorded in 2009 from the assets acquired and liabilities assumed in the FDIC-assisted acquisitions of TeamBank and Vantus Bank. During the 2010 period, no such one-time gains were recorded. Other types of non-interest income, such as gains on sales of securities, securities impairments in the 2009 periods, commission income, deposit account charges and a change in estimated cash flows and projected losses related to the FDIC-assisted acquisitions, also contributed to the current period change. Details of the decreases in non-interest income are provided in the “Results of Operations and Comparison for the Three and Nine Months Ended September 30, 2010 and 2009” section of this Quarterly Report on Form 10-Q.

Total non-interest expense in the third quarter of 2010 compared to the same period in 2009 was relatively consistent while total non-interest expense in the first nine months of 2010 compared to the same period in 2009 increased. The increase in the first nine months of 2010 compared to the same period in 2009 was due primarily to the overall increased cost of the Company’s expanded operations. The 2009 FDIC-assisted transactions, along with continued internal growth through new banking centers, contributed to increased salaries and benefits and occupancy and equipment expenses in particular. In 2009, the Company opened banking centers in Creve Coeur, Mo. and Lee’s Summit, Mo., and in 2010, the Company opened a banking center in Rogers, Ark.

Effect of Federal Laws and Regulations

General. Federal legislation and regulation significantly affect the banking operations of the Company and the Bank, and have increased competition among commercial banks, savings institutions, mortgage banking enterprises and other financial institutions. In particular, the capital requirements and operations of regulated depository institutions such as the Company and the Bank have been and will be subject to changes in applicable statutes and regulations from time to time, which changes could, under certain circumstances, adversely affect the Company and/or the Bank.

Recent Legislation Impacting the Financial Services Industry. On July 21, 2010, sweeping financial regulatory reform legislation entitled the “Dodd-Frank Wall Street Reform and Consumer Protection Act” (the “Dodd-Frank Act”) was signed into law. The Dodd-Frank Act implements far-reaching changes across the financial regulatory landscape, including provisions that, among other things, will provide increased consumer financial protection, amend capital requirements for financial institutions, change the assessment base for federal deposit insurance, repeal the federal prohibitions on the payment of interest on demand deposits, amend the account balance limit for federal deposit insurance protection, and increase the authority of the Federal Reserve Board.

Many aspects of the Dodd-Frank Act are subject to rulemaking and will take effect over several years, making it difficult to anticipate the overall financial impact on the Company and the financial services industry more generally. Provisions in the legislation that affect deposit insurance assessments, and payment of interest on demand deposits could increase the costs associated with deposits. Provisions in the legislation that require revisions to the capital requirements of the Company and the Bank could require the Company and the Bank to seek additional sources of capital in the future.

Recent Changes to Capital Requirements. On September 12, 2010, the Group of Governors and Heads of Supervision, the oversight body of the Basel Committee on Banking Supervision, announced significant changes to existing capital requirements for financial institutions. These changes include, among other things, an increase in the

requirement for minimum common equity from 2% to 4.5% and the addition of a capital conservation buffer of 2.5% to bring the total common equity requirements to 7%. The purpose of the conservation buffer is to prepare banks for future periods of stress and it will be available to absorb losses during such periods within certain constraints. A countercyclical buffer ranging from 0% to 2.5% will also be made available for use according to national circumstances as an extension of the conservation buffer to prevent excess credit growth. The Tier 1 capital requirement will be increased from 4% to 6% and certain capital instruments will no longer qualify as Tier 1 common equity. The transition to the new requirements will be phased in on various dates ranging from January 1, 2013 through January 1, 2019.

Business Initiatives

In September 2010, the Company opened its second full-service retail banking center in the St. Louis metropolitan market. Located at 11689 Manchester in Des Peres, Mo., the banking center is approximately seven miles from the Company's Creve Coeur, Mo., office that opened in 2009. A loan production office and two Great Southern Travel offices also operate in the St. Louis market.

One other banking center located in Forsyth, Mo., is expected to open near the end of the fourth quarter 2010 as part of the Company's overall long-term plan to open two to three banking centers per year as market conditions warrant. Located at 15695 Highway 160 and east of Branson, Mo., the banking center will complement the Company's four banking centers operating in this area.

In July 2010, Great Southern Travel acquired Pathfinder Travel and Cruises in Olathe, Kan., marking its first office in the state of Kansas. The Company also operates a banking center in Olathe.

New overdraft regulations on ATM and certain debit card transactions were effective August 13, 2010 for existing customers. At this time, a significant number of affected customers have chosen to continue overdraft coverage and additional customers are regularly notifying the Company as to their preference for these services. Based on our preliminary analysis, we expect the financial impact of this regulation may be a reduction in earnings per diluted common share of approximately \$0.01 to \$0.02 per quarter (based on the number of common shares outstanding at September 30, 2010).

Comparison of Financial Condition at September 30, 2010 and December 31, 2009

During the nine months ended September 30, 2010, the Company decreased total assets by \$238.3 million to \$3.40 billion. Most of the decrease was attributable to decreases in net loans and securities available for sale, partially offset by increases in cash and cash equivalents. Net loans decreased \$168.9 million as compared to December 31, 2009, due in part to a \$105.4 million decrease in the acquired loan portfolios. Excluding loans covered in FDIC-assisted transactions, outstanding construction loans (net of the undisbursed portion) and commercial real estate loans decreased \$56.2 million and \$25.8 million, respectively. The Company's strategy continues to be focused on maintaining credit risk and interest rate risk at appropriate levels given the current credit and economic environments. Aside from any potential future acquisitions, of which none are currently contemplated, the Company does not expect to grow the loan portfolio significantly at this time. Securities available for sale decreased \$68.0 million as compared to December 31, 2009, primarily because virtually all of the securities acquired through the 2009 FDIC-assisted transactions were sold in an effort to eliminate smaller blocks of securities and realize gains on these investments. These sales, in addition to other sales of mortgage-backed securities, resulted in decreases in the mortgage-backed securities and collateralized mortgage obligations of \$86.4 million and \$41.2 million, respectively. Purchases of SBA loan pools partially offset these decreases and the balance of these securities was \$61.5 million at September 30, 2010. SBA loan pools were purchased for their variable interest rate characteristics and guarantee by the federal government, which makes them relatively low-risk investments. While there is no specifically stated goal, the available-for-sale securities portfolio has in recent quarters been approximately 15% to 20% of total assets. The available-for-sale securities portfolio was 20.5% and 21.0% of total assets at September 30, 2010 and December 31, 2009, respectively. These levels are on the high-side of recent averages because of the Company's efforts to maintain excess liquidity during uncertain economic times as discussed below in regard to cash and cash equivalents. Cash and cash equivalents increased \$32.9 million as compared to December 31, 2009 due to repayments of loans and lower overall loan demand. In some instances, the Company invested these excess funds in short-term cash equivalents that caused the Company to earn a small positive or a negative spread relative to the cost of funds. While the Company generally earned a positive spread on securities purchased, it was often much smaller than the Company's overall net interest spread, having the effect of increasing net interest income but negatively affecting net interest margin in 2009

and 2010. The Company expects to maintain a higher level of cash and cash equivalents for the time being as excess liquidity in these uncertain times for the U.S. economy and the banking industry, subject to funding activities which are discussed below, and recognizing that this could potentially have the effect of suppressing net interest margin and net interest income.

Total liabilities decreased \$245.1 million from December 31, 2009 to \$3.10 billion at September 30, 2010. The decrease was primarily attributable to decreases in deposits and securities sold under repurchase agreements with customers. Total deposits decreased \$136.4 million from December 31, 2009. Checking account balances totaled \$1.23 billion at September 30, 2010, up from \$1.08 billion at December 31, 2009. Interest-bearing checking accounts (mainly money market accounts) increased \$162.2 million and non-interest bearing checking accounts decreased \$7.8

million. Total brokered deposits (excluding CDARS customer account balances) were \$187.6 million at September 30, 2010, compared to \$269.1 million at December 31, 2009. CDARS purchased funds decreased \$92.6 million, partially offset by a net increase of \$11.0 million in brokered certificates during the 2010 period. In addition, at September 30, 2010 and December 31, 2009, Great Southern Bank customer deposits totaling \$197.6 million and \$359.1 million, respectively, were part of the CDARS program which allows bank customers to maintain balances in an insured manner that would otherwise exceed the FDIC deposit insurance limit. The FDIC counts these deposits as brokered, but these are deposit accounts that we generate with customers in our local markets. Securities sold under reverse repurchase agreements with customers decreased \$79.8 million from December 31, 2009 as these balances fluctuate over time. FHLBank advances decreased slightly from the December 31, 2009 level. The level of FHLBank advances also fluctuates depending on growth in the Company's loan portfolio and other funding needs and sources available to the Company. Most of the Company's FHLBank advances are fixed-rate advances that cannot be repaid prior to maturity without incurring significant penalties.

Total stockholders' equity increased \$6.7 million from \$298.9 million at December 31, 2009 to \$305.6 million at September 30, 2010. The Company recorded net income of \$17.5 million for the nine months ended September 30, 2010, common and preferred dividends declared were \$9.5 million and accumulated other comprehensive gain decreased \$2.2 million. The decrease in accumulated other comprehensive gain resulted from decreases in the fair value of the Company's available-for-sale investment securities. In addition, total stockholders' equity increased \$524,000 due to stock option exercises.

Our participation in the Capital Purchase Program ("CPP") of the U.S. Department of the Treasury (the "Treasury") currently precludes us from purchasing shares of the Company's stock or redeeming trust preferred securities without the Treasury's consent until the earlier of December 5, 2011, or our repayment of the CPP funds or the transfer by the Treasury to third parties of all of the shares of preferred stock we issued to the Treasury pursuant to the CPP. Management has historically utilized stock buy-back programs from time to time as long as repurchasing the stock contributed to the overall growth of shareholder value. The number of shares of stock repurchased and the price paid is the result of many factors, several of which are outside of the control of the Company. The primary factors, however, are the number of shares available in the market from sellers at any given time and the price of the stock within the market as determined by the market.

Results of Operations and Comparison for the Three and Nine Months Ended September 30, 2010 and 2009

General

Net income was \$6.2 million for the three months ended September 30, 2010 compared to net income of \$27.4 million for the three months ended September 30, 2009. This decrease of \$21.2 million, or 77.4%, was primarily due to a decrease in non-interest income of \$44.5 million, or 78.5%, partially offset by an increase in net interest income of \$6.4 million, or 26.7%, a decrease in provision for loan losses of \$5.7 million, or 34.5%, and a decrease in provision for income taxes of \$11.1 million, or 79.5%. Net income available to common shareholders was \$5.3 million and \$26.6 million for the quarters ended September 30, 2010 and 2009, respectively.

Net income was \$17.5 million for the nine months ended September 30, 2010 compared to net income of \$59.8 million for the nine months ended September 30, 2009. This decrease of \$42.2 million, or 70.7%, was primarily due to a decrease in non-interest income of \$78.3 million, or 68.9%, and an increase in non-interest expense of \$8.2 million, or 14.4%, partially offset by an increase in net interest income of \$21.0 million, or 33.4%, and a decrease in provision for income taxes of \$23.3 million, or 74.7%. Net income available to common shareholders was \$15.0 million and \$57.3 million for the nine months ended September 30, 2010 and 2009, respectively.

Total Interest Income

Total interest income increased \$1.8 million, or 4.5%, during the three months ended September 30, 2010 compared to the three months ended September 30, 2009. The increase was due to a \$3.6 million increase in interest income on loans partially offset by a \$1.8 million decrease in interest income on investments and other interest-earning assets. Interest income on loans increased due to the increase in expected cash flows to be received from the FDIC-acquired loan pools and the resulting adjustment to accretable yield which was previously discussed in Note 9. Interest income from investment securities and other interest-earning assets decreased because of lower average yields on investments. The lower average investment yields were primarily a result of lower yields on mortgage-backed securities as interest rates reset downward. Prepayments on the mortgages underlying these securities resulted in amortization of premiums which also reduced yields. An increase in the amount of SBA loan pools held, which earn lower average rates than the overall securities portfolio, contributed to lower investment yields as well.

Total interest income increased \$6.9 million, or 6.1%, during the nine months ended September 30, 2010 compared to the nine months ended September 30, 2009. The increase was due to a \$10.0 million increase in interest income on loans partially offset by a \$3.1 million decrease in interest income on investments and other interest-earning assets. Interest income on loans increased primarily due to the increase in expected cash flows to be received from the FDIC-acquired loan pools and the resulting adjustment to accretable yield which was previously discussed in Note 9 and also increased due to higher average balances. Interest income on investment securities and other interest-earning assets decreased because of much lower average yields on investments. The lower average investment yields were primarily a result of lower yields on mortgage-backed securities as interest rates reset downward. Prepayments on the mortgages underlying these securities resulted in amortization of premiums which also reduced yields. An increase in the amount of SBA loan pools held, which earn lower average rates than the overall securities portfolio, contributed to lower investment yields as well.

Interest Income – Loans

During the three months ended September 30, 2010 compared to the three months ended September 30, 2009, interest income on loans increased due to higher average interest rates and higher average balances. Interest income increased \$3.1 million as a result of higher average interest rates on loans. The average yield on loans increased from 6.42% during the three months ended September 30, 2009, to 7.05% during the three months ended September 30, 2010. This increase was due to the increase in expected cash flows to be received from the FDIC-acquired loan pools and the resulting \$14.4 million adjustment to accretable yield, previously discussed in Note 9, which is to be spread over the estimated remaining life of the loans. The adjustment increased interest income by \$4.2 million during the three months ended September 30, 2010, and because the adjustment will be recognized over the estimated remaining lives of the loan pools, it will impact future periods as well. The majority of the remaining \$10.2 million of accretable yield adjustment affecting interest income is expected to be recognized over the next four years, with \$6.4 million expected to be recognized over the next twelve months. Average loan rates were very similar in 2009 compared to 2010, as a result of market rates of interest, primarily the "prime rate" of interest, remaining flat during this period. During 2008, the "prime rate" decreased 4.00% to a rate of 3.25% at December 31, 2008, where the prime rate has remained. A large portion of the Bank's loan portfolio adjusts with changes to the "prime rate" of interest. The Company has a portfolio of prime-based loans which have interest rate floors. Beginning in 2008, the declining interest rates put these loan rate floors in effect and established a loan rate which was higher than the contractual rate would have otherwise been. Great Southern has a significant portfolio of loans which are tied to a "prime rate" of interest. Some of these loans are tied to some national index of "prime," while most are indexed to "Great Southern prime." The Company has elected to leave its "prime rate" of interest at 5.00% in light of the current highly competitive funding environment for deposits and wholesale funds. This does not affect a large number of customers, as a majority of the loans indexed to "Great Southern prime" are already at interest rate floors, which are provided for in individual loan documents. In the three months ended September 30, 2010, the average yield on loans was 7.05% versus an average prime rate for the period of 3.25%, or a difference of a positive 380 basis points. In the three months ended September 30, 2009, the average yield on loans was 6.42% versus an average prime rate for the period of 3.25%, or a difference of a positive 317 basis points.

Interest income increased \$484,000 as the result of higher average loan balances which increased from \$1.94 billion during the quarter ended September 30, 2009, to \$1.97 billion during the quarter ended September 30, 2010. The higher average balance resulted principally from the loans added at fair market value from the FDIC-assisted transactions, increasing loans overall, with the exception of decreased average balances of construction loans partially offsetting the increases. The Bank's outstanding construction loan balance decreased significantly in recent periods, as many projects were completed in the past 12 to 18 months and demand for new construction loans has declined. As the projects relating to construction loans were completed and the loans moved to permanent financing, commercial real estate loans and multi-family loans increased. The Bank's one- to four-family residential loan portfolio balance

increased in 2009 and 2010 due to increased production by the Bank's mortgage division. The Bank generally sells fixed-rate one- to four-family residential loans in the secondary market and keeps variable-rate one- to four-family residential loans.

During the nine months ended September 30, 2010 compared to the nine months ended September 30, 2009, interest income on loans increased due to higher average interest rates and higher average balances. Interest income increased \$6.2 million as a result of higher average interest rates on loans. The average yield on loans increased from 6.12% during the nine months ended September 30, 2009, to 6.54% during the nine months ended September 30, 2010. The reason for the increase in average loan rates in the comparable nine-month periods is the same as described previously

in the comparable three-month periods. In the nine months ended September 30, 2010, the average yield on loans of 6.54% was 329 basis points higher than the average prime rate for the period of 3.25%. In the nine months ended September 30, 2009, the average yield on loans of 6.12% was 287 basis points higher than the average prime rate for the period of 3.25%.

Interest income increased \$3.8 million as the result of higher average loan balances which increased from \$1.96 billion during the nine months ended September 30, 2009 to \$2.04 billion during the nine months ended September 30, 2010. The reasons for the increase in average loan balances in the comparable nine-month periods are the same as described previously in the comparable three-month periods.

Interest Income – Investments and Other Interest-earning Assets

Interest income on investments and other interest-earning assets decreased in the three months ended September 30, 2010 compared to the three months ended September 30, 2009. Interest income decreased \$1.8 million as a result of a decrease in average interest rates from 3.50% during the three months ended September 30, 2009, to 2.58% during the three months ended September 30, 2010. The majority of the Company's securities in 2009 and 2010 periods were mortgage-backed securities which are backed by hybrid ARMs that have fixed rates of interest for a period of time (generally one to ten years) and then adjust annually. The actual amount of securities that will reprice and the actual interest rate changes on these securities are subject to the level of prepayments on these securities and the changes that actually occur in market interest rates (primarily treasury rates and LIBOR rates). Mortgage-backed securities are also subject to reduced yields due to more rapid prepayments in the underlying mortgages. As a result, premiums on these securities may be amortized against interest income more quickly, thereby reducing the yield recorded. An increase in the amount of SBA loan pools held, which earn lower yields than the overall securities portfolio, contributed to the decrease in average interest rates as well. Interest income increased \$38,000 as a result of an increase in average balances from \$945 million during the three months ended September 30, 2009, to \$1.00 billion during the three months ended September 30, 2010. This increase was primarily in interest-earning deposits as a result of the 2009 FDIC-assisted transactions involving certain TeamBank and Vantus Bank assets and liabilities and because of net loan repayments and lower overall loan demand. Average balances of investment securities were relatively consistent for the comparable three-month periods as the majority of the securities acquired through the 2009 FDIC-assisted transactions were sold during the three months ending September 30, 2010 to eliminate securities with lower yields and blocks of smaller securities and to realize the gain positions of the securities.

Interest income on investments and other interest-earning assets decreased in the nine months ended September 30, 2010 compared to the nine months ended September 30, 2009. Interest income decreased by \$3.3 million as a result of a decrease in average interest rates from 3.64% during the nine months ended September 30, 2009, to 2.82% during the nine months ended September 30, 2010. The reasons for these changes in the comparable nine-month periods are primarily the same as those described previously in the comparable three-month periods. In addition, the Federal Home Loan Mortgage Corporation purchased approximately \$30 million of delinquent loans in mortgage-backed securities pools owned by the Company in March 2010. This reduced the Company's income (through higher premium amortization levels) by \$400,000. Interest income increased \$196,000 as a result of an increase in average balances from \$893 million during the nine months ended September 30, 2009, to \$1.00 billion during the nine months ended September 30, 2010. This increase was primarily in interest-earning deposits as discussed above and available-for-sale SBA loan pools, where securities were needed for liquidity and pledging against deposit accounts under customer repurchase agreements.

In 2009 and 2010, the Company had increased interest-earning deposits and non-interest-earning cash equivalents, as additional liquidity was maintained due to uncertainty in the economy and low loan demand. These deposits and cash equivalents earn very low (or no) yield and therefore negatively impact the Company's net interest margin. At September 30, 2010, the Company had cash and cash equivalents of \$477.5 million compared to \$444.6 million at

December 31, 2009. See "Net Interest Income" for additional information on the impact of this interest activity.

Total Interest Expense

Total interest expense decreased \$4.6 million, or 28.7%, during the three months ended September 30, 2010, when compared with the three months ended September 30, 2009, primarily due to a decrease in interest expense on deposits of \$3.6 million, or 28.5%, a decrease in interest expense on short-term and structured repo borrowings of \$870,000, or 52.8%, a decrease in interest expense on FHLBank advances of \$79,000, or 5.4%, and a decrease in interest expense on subordinated debentures issued to capital trusts of \$17,000, or 10.0%.

Total interest expense decreased \$14.1 million, or 27.6%, during the nine months ended September 30, 2010, when compared with the nine months ended September 30, 2009, primarily due to a decrease in interest expense on deposits of \$11.8 million, or 28.4%, a decrease in interest expense on short-term and structured repo borrowings of \$2.4 million, or 48.2%, and a decrease in interest expense on subordinated debentures issued to capital trusts of \$194,000, or 31.0%, partially offset by an increase in interest expense on FHLBank advances of \$289,000, or 7.4%.

Interest Expense – Deposits

Interest expense on demand deposits increased \$1.0 million due to an increase in average balances from \$584 million during the three months ended September 30, 2009, to \$955 million during the three months ended September 30, 2010. The increase in average balances of demand deposits was primarily a result of the FDIC-assisted transaction completed in September of 2009, as well as organic growth in the Company's deposit base, particularly in interest-bearing checking accounts. Interest expense on demand deposits decreased \$528,000 due to a decrease in average rates from 1.11% during the three months ended September 30, 2009, to 0.89% during the three months ended September 30, 2010. The average interest rates decreased due to lower overall market rates of interest throughout 2009 and the first nine months of 2010. Market rates of interest on checking and money market accounts have been decreasing since late 2007 when the FRB began reducing short-term interest rates.

Interest expense on deposits decreased \$2.3 million as a result of a decrease in average rates of interest on time deposits from 2.60% during the three months ended September 30, 2009, to 1.99% during the three months ended September 30, 2010. A large portion of the Company's certificate of deposit portfolio matures within one year and so reprices fairly quickly; this is consistent with the portfolio over the past several years. Interest expense on deposits decreased \$1.8 million due to a decrease in average balances of time deposits from \$1.68 billion during the three months ended September 30, 2009, to \$1.37 billion during the three months ended September 30, 2010. The decrease in average balances of time deposits was primarily a result of decreases in brokered certificates, CDARS customer deposits and CDARS purchased funds as the Company began redeeming them or replacing them with lower rate deposits in the latter quarters of 2009. In 2010, in some cases, the Company elected not to replace these funds as they matured due to growth in lower-cost demand deposits.

Interest expense on demand deposits increased \$2.3 million due to an increase in average balances from \$579 million during the nine months ended September 30, 2009, to \$901 million during the nine months ended September 30, 2010. Average non-interest-bearing demand balances increased from \$197 million in the nine months ended September 30, 2009, to \$252 million in the nine months ended September 30, 2010. The increase in average balances on both types of demand deposits was primarily a result of the FDIC-assisted transactions completed in March and September of 2009, as well as organic growth in the Company's deposit base, particularly in interest-bearing checking accounts. Interest expense on demand deposits decreased \$619,000 due to a decrease in average rates from 1.07% during the nine months ended September 30, 2009, to 0.94% during the nine months ended September 30, 2010. The average interest rates decreased due to lower overall market rates of interest throughout 2009 and the first nine months of 2010.

Interest expense on deposits decreased \$11.5 million as a result of a decrease in average rates of interest on time deposits from 3.06% during the nine months ended September 30, 2009, to 2.05% during the nine months ended September 30, 2010. Market rates of interest on new certificates have been decreasing since late 2007 when the FRB began reducing short-term interest rates. Interest expense on deposits decreased \$2.0 million due to a decrease in average balances of time deposits from \$1.62 billion during the nine months ended September 30, 2009, to \$1.54 billion during the nine months ended September 30, 2010. The decrease in average balances of time deposits was primarily a result of decreases in brokered certificates and CDARS purchased funds as the Company began redeeming them or replacing them with lower rate deposits in the latter quarters of 2009. In 2010, in some cases, the Company elected not to replace these funds as they matured due to growth in lower-cost demand deposits.

The recently-passed Dodd-Frank Act repealed the federal prohibitions on the payment of interest on demand deposits, thereby permitting depository institutions to pay interest on business transaction and other accounts beginning July 21, 2011. Although the ultimate impact of this legislation on the Company has not yet been determined, the Company expects interest costs associated with demand deposits may increase as a result of competitor responses to this change.

Interest Expense – FHLBank Advances, Short-term Borrowings and Structured Repo Borrowings and Subordinated Debentures Issued to Capital Trusts

During the three months ended September 30, 2010 compared to the three months ended September 30, 2009, interest expense on FHLBank advances decreased due to lower average balances, partially offset by higher average interest rates. Interest expense on FHLBank advances decreased \$693,000 due to a decrease in average balances from \$234 million during the three months ended September 30, 2009, to \$160 million during the three months ended September 30, 2010. Interest expense on FHLBank advances increased \$614,000 due to an increase in average interest rates from 2.47% in the three months ended September 30, 2009, to 3.41% in the three months ended September 30, 2010. Average rates on advances increased because of the addition of advances assumed in the FDIC-assisted transaction completed in March of 2009. Certain of the advances assumed were paid off subsequent to September 30, 2009, causing the decrease in average balances while most of the remaining advances are fixed-rate and are subject to penalty if paid off prior to maturity.

During the nine months ended September 30, 2010 compared to the nine months ended September 30, 2009, interest expense on FHLBank advances increased due to higher average interest rates, partially offset by lower average balances. Interest expense on FHLBank advances increased \$1.0 million due to an increase in average interest rates from 2.62% in the nine months ended September 30, 2009, to 3.38% in the nine months ended September 30, 2010. Interest expense on FHLBank advances decreased \$724,000 due to a decrease in average balances from \$199 million during the nine months ended September 30, 2009, to \$165 million during the nine months ended September 30, 2010. Average rates on advances increased because of the addition of advances assumed in the FDIC-assisted transaction completed in March of 2009. Certain of the advances assumed were paid off subsequent to September 30, 2009, causing the decrease in average balances while most of the remaining advances are fixed-rate and are subject to penalty if paid off prior to maturity.

Interest expense on short-term and structured repo borrowings decreased \$591,000 due to a decrease in average rates on short-term borrowings from 1.62% in the three months ended September 30, 2009, to 0.95% in the three months ended September 30, 2010. The average interest rates decreased due to lower overall market rates of interest in the third quarter of 2010 compared to the same period in 2009. Market rates of interest on short-term borrowings have trended downward since the fourth quarter of 2007 as the FRB decreased short-term interest rates and maintained the rates at historically low levels. Interest expense on short-term and structured repo borrowings decreased \$279,000 due to a decrease in average balances from \$403 million during the three months ended September 30, 2009, to \$324 million during the three months ended September 30, 2010. The decrease in balances of short-term borrowings was primarily due to decreases in securities sold under repurchase agreements with the Company's deposit customers which tend to fluctuate.

Interest expense on short-term and structured repo borrowings decreased \$1.8 million due to a decrease in average rates on short-term borrowings from 1.65% in the nine months ended September 30, 2009, to 0.98% in the nine months ended September 30, 2010. The average interest rates decreased due to lower overall market rates of interest in the first nine months of 2010 compared to the same period in 2009. Interest expense on short-term and structured repo borrowings decreased \$555,000 due to a decrease in average balances from \$401 million during the nine months ended September 30, 2009, to \$352 million during the nine months ended September 30, 2010. The decrease in balances of short-term borrowings was primarily due to decreases in securities sold under repurchase agreements with the Company's deposit customers which tend to fluctuate.

Interest expense on subordinated debentures issued to capital trusts decreased \$17,000 due to decreases in average rates from 2.19% in the three months ended September 30, 2009, to 1.98% in the three months ended September 30, 2010. As LIBOR rates decreased from the same period a year ago, the interest rates on these instruments also adjusted lower. The average rate of interest on these subordinated debentures decreased in 2010 as these liabilities pay a

variable rate of interest that is indexed to LIBOR. These debentures are not subject to an interest rate swap; however, they are variable-rate debentures and bear interest at an average rate of three-month LIBOR plus 1.57%, adjusting quarterly.

Interest expense on subordinated debentures issued to capital trusts decreased \$194,000 due to decreases in average rates from 2.71% in the nine months ended September 30, 2009, to 1.87% in the nine months ended September 30, 2010. As LIBOR rates decreased from the same period a year ago, the interest rates on these instruments also adjusted lower. The average rate of interest on these subordinated debentures decreased in 2010 as these liabilities pay a variable rate of interest that is indexed to LIBOR.

Net Interest Income

Net interest income for the three months ended September 30, 2010 increased \$6.4 million to \$30.2 million compared to \$23.8 million for the three months ended September 30, 2009. Net interest margin was 4.03% in the three months ended September 30, 2010, compared to 3.27% in the three months ended September 30, 2009, an increase of 76 basis points. The Company's margin was positively impacted primarily by the increase in expected cash flows to be received from the FDIC-acquired loan pools and the resulting increase to accretable yield which was previously discussed in Note 9. The impact of this change on the three months ended September 30, 2010 was an increase in interest income of \$4.2 million and an increase in net interest margin of 57 basis points. Also contributing to the increase in net interest income was a change in the deposit mix and the ability to reduce interest rates on maturing time deposits. The addition of the TeamBank and Vantus Bank core deposits during 2009 provided a relatively lower-cost funding source, which allowed the Company to reduce some of its higher-cost funds. In the latter quarters of 2009, the Company redeemed brokered deposits or replaced them with lower rate deposits and as retail certificates of deposit matured they were renewed or replaced with retail certificates of deposit with lower market rates of interest. The transition from time deposits to transaction deposits continued into 2010 as lower-cost checking accounts increased while the Company reduced its higher-cost CDARS accounts. The Company has reduced rates paid on repurchase agreements which also contributed to the decrease in interest expense. Partially offsetting the reduced cost of funds, yields earned on investment securities are down over the last year because the majority of the Company's portfolio is made up of adjustable-rate mortgage-backed securities which have both repriced downward and have experienced higher prepayments resulting in increased amortization of related premiums that offsets interest earned. Excluding the income recorded from the accretable yield adjustment mentioned above, the yield on loans decreased slightly when compared to the quarter ended September 30, 2009, primarily due to decreased balances as customers reduced higher-rate commercial real estate and construction loans.

The Company's overall interest rate spread increased 64 basis points from 3.31% during the three months ended September 30, 2009, to 3.95% during the three months ended September 30, 2010. The gross change was due to a 57 basis point decrease in the weighted average rate paid on interest-bearing liabilities and a seven basis point increase in the weighted average yield on interest-earning assets. In comparing the two periods, the yield on loans increased 63 basis points and the yield on investment securities and other interest-earning assets decreased 92 basis points. The rate paid on deposits decreased 68 basis points, the rate paid on short-term borrowings decreased 67 basis points, the rate paid on subordinated debentures issued to capital trusts decreased 21 basis points and the rate paid on FHLBank advances increased 94 basis points.

Net interest income for the nine months ended September 30, 2010 increased \$21.0 million to \$83.9 million compared to \$62.9 million for the nine months ended September 30, 2009. Net interest margin was 3.69% in the nine months ended September 30, 2010, compared to 2.95% in the nine months ended September 30, 2009, an increase of 74 basis points. The Company's overall interest rate spread increased 73 basis points from 2.93% during the nine months ended September 30, 2009, to 3.66% during the nine months ended September 30, 2010. The gross change was due to a 76 basis point decrease in the weighted average rate paid on interest-bearing liabilities, offset slightly by a three basis point decrease in the weighted average yield on interest-earning assets. In comparing the two periods, the yield on loans increased 42 basis points while the yield on investment securities and other interest-earning assets decreased 82 basis points. The rate paid on deposits decreased 90 basis points, the rate paid on short-term borrowings decreased 67 basis points, the rate paid on subordinated debentures issued to capital trusts decreased 84 basis points and the rate paid on FHLBank advances increased 76 basis points.

For additional information on net interest income components, refer to the "Average Balances, Interest Rates and Yields" table in this Quarterly Report on Form 10-Q.

Provision for Loan Losses and Allowance for Loan Losses

The provision for loan losses decreased \$5.7 million, from \$16.5 million during the three months ended September 30, 2009, to \$10.8 million during the three months ended September 30, 2010. The provision for loan losses for each of the nine months ended September 30, 2010 and 2009, was \$28.3 million. At September 30, 2010, the allowance for loan losses was \$40.1 million, an increase of \$37,000 from December 31, 2009. Net charge-offs were \$11.2 million in the three months ended September 30, 2010, versus \$10.5 million in the three months ended September 30, 2009. Net charge-offs were \$28.3 million in the nine months ended September 30, 2010, versus \$18.8 million in the nine months ended September 30, 2009. Nine relationships accounted for \$22.4 million of the net charge-off total for the nine months ended September 30, 2010. General market conditions, and more specifically, housing supply, absorption rates and unique circumstances related to individual borrowers and projects contributed to increased provisions and

charge-offs. As properties were categorized as potential problem loans, non-performing loans or foreclosed assets, evaluations were made of the value of these assets with corresponding charge-offs as appropriate.

Management records a provision for loan losses in an amount it believes sufficient to result in an allowance for loan losses that will cover current net charge-offs as well as risks believed to be inherent in the loan portfolio of the Bank. The amount of provision charged against current income is based on several factors, including, but not limited to, past loss experience, current portfolio mix, actual and potential losses identified in the loan portfolio, economic conditions, regular reviews by internal staff and regulatory examinations.

Weak economic conditions, higher inflation or interest rates, or other factors may lead to increased losses in the portfolio and/or requirements for an increase in loan loss provision expense. Management long ago established various controls in an attempt to limit future losses, such as a watch list of possible problem loans, documented loan administration policies and a loan review staff to review the quality and anticipated collectability of the portfolio. More recently, additional procedures have been implemented to provide for more frequent management review of the loan portfolio based on loan size, loan type and delinquencies. Management determines which loans are potentially uncollectible, or represent a greater risk of loss, and makes additional provisions to expense, if necessary, to maintain the allowance at a satisfactory level.

Loans acquired in the March 20, 2009 and September 4, 2009, FDIC-assisted transactions are covered by loss sharing agreements between the FDIC and Great Southern Bank which afford Great Southern Bank significant protection from losses in the acquired portfolio of loans. The acquired loans were initially recorded at their estimated fair value, which incorporated estimated credit losses at the acquisition date. These loans are systematically reviewed by the Company to determine the risk of losses that may exceed those identified at the time of the acquisition. Techniques used in determining risk of loss are similar to the legacy Great Southern Bank portfolio, with most focus being placed on those loan pools which include the larger loan relationships and those loan pools which exhibit higher risk characteristics. Review of the acquired loan portfolio also includes meetings with customers, review of financial information and collateral valuations to determine if any additional losses are apparent.

The Bank's allowance for loan losses as a percentage of total loans, excluding loans covered by the FDIC loss sharing agreements, was 2.44%, 2.48% and 2.35% at September 30, 2010, June 30, 2010 and December 31, 2009, respectively. Management considers the allowance for loan losses adequate to cover losses inherent in the Company's loan portfolio at September 30, 2010, based on recent reviews of the Company's loan portfolio and current economic conditions. If economic conditions remain weak or deteriorate significantly, it is possible that additional loan loss provisions would be required, thereby adversely affecting future results of operations and financial condition.

Non-performing Assets

Former TeamBank and Vantus Bank non-performing assets, including foreclosed assets, are not included in the totals and in the discussion of non-performing loans, potential problem loans and foreclosed assets below because losses from these assets are substantially covered under loss sharing agreements with the FDIC. In addition, FDIC-covered assets were recorded at their estimated fair values as of March 20, 2009, and September 4, 2009, respectively. The overall performance of the FDIC-covered loan pools has been consistent with, or better than, original expectations as of the acquisition dates. Loans modified in troubled debt restructurings that are performing in accordance with their modified terms (\$11.2 million as of September 30, 2010) are also not included in the totals and in the discussion of non-performing loans and potential problem loans below.

As a result of changes in balances and composition of the loan portfolio, changes in economic and market conditions that occur from time to time, and other factors specific to a borrower's circumstances, the level of non-performing assets will fluctuate.

Non-performing assets, excluding FDIC-covered non-performing assets, at September 30, 2010, were \$75.3 million, an increase of \$10.3 million from \$65.0 million at December 31, 2009. Non-performing assets, excluding FDIC-covered assets, as a percentage of total assets were 2.21% at September 30, 2010, compared to 1.79% at December 31, 2009. Compared to December 31, 2009, non-performing loans increased \$3.7 million to \$30.2 million and foreclosed assets increased \$6.6 million to \$45.1 million. Construction and land development loans comprised \$14.7 million, or 48.8%, of the total \$30.2 million of non-performing loans at September 30, 2010, compared with \$8.7 million or 32.8% of the total \$26.5 million of non-performing loans at December 31, 2009.

Edgar Filing: GREAT SOUTHERN BANCORP INC - Form 10-Q

Activity in the non-performing loans category during the nine months ending September 30, 2010 was as follows:

	Beginning Balance, January 1	Additions to Non- Performing	Removed from Non- Performing	Transfers to Potential Problem Loans	Transfers to Foreclosed Assets	Charge- Offs	Payments	Ending Balance, September 30
One- to four-family construction Subdivision construction and land development	\$ 374	\$ 293	\$ --	\$ --	\$ (124)	\$ (243)	\$ (89)	\$ 211
Commercial construction	2,328	2,502	--	(5)	(1,810)	(1,100)	(100)	1,815
One- to four-family residential	5,982	9,831	--	--	(855)	(1,582)	(665)	12,711
Other residential	6,237	9,592	(692)	(431)	(6,357)	(1,339)	(1,367)	5,643
Commercial real estate	9,072	7,928	(256)	(383)	(3,363)	(2,915)	(3,553)	6,530
Other commercial	479	2,385	(221)	--	(1,960)	(270)	(140)	273
Consumer	743	4,037	--	(26)	(5)	(2,231)	(814)	1,704
	1,275	1,045	--	(97)	(72)	(246)	(623)	1,282
Total	\$ 26,490	\$ 37,613	\$ (1,169)	\$ (942)	\$ (14,546)	\$ (9,926)	\$ (7,351)	\$ 30,169

At September 30, 2010, the commercial construction category of non-performing loans included 17 loans. The largest two loans in this category are \$5.4 million and \$4.0 million, respectively, and make up 74.1% of the total category and 31.2% of total non-performing loans. The properties collateralizing the two loans are in northwest Arkansas. The increase in the category was primarily due to the addition of the \$5.4 million loan.

Activity in the potential problem loans category during the nine months ending September 30, 2010 was as follows:

	Beginning Balance, January 1	Additions to Potential Problem	Removed from Potential Problem	Transfers to Non- Performing	Transfers to Foreclosed Assets	Charge- Offs	Payments	Ending Balance, September 30
One- to four-family construction Subdivision construction and land development	\$ 2,122	\$ 3,327	\$ (958)	\$ (191)	\$ (762)	\$ (318)	\$ (1,772)	\$ 1,448
	4,624	10,342	(195)	(1,245)	(235)	(173)	(7,612)	5,506
	19,768	16,939	--	(7,606)	(9,862)	(4,832)	(540)	13,867

Edgar Filing: GREAT SOUTHERN BANCORP INC - Form 10-Q

Commercial construction									
One- to four-family residential	6,750	6,325	(1,532)	(2,317)	(1,199)	(619)	(212)		7,196
Other residential	11,188	5,733	(5,565)	(539)	(5,167)	(514)	(1,016)		4,120
Commercial real estate	3,652	4,968	--	(2,892)	--	(479)	(1,362)		3,887
Other commercial	2,408	2,941	(93)	(2,191)	(54)	(159)	(685)		2,167
Total	\$ 50,512	\$ 50,575	\$ (8,343)	\$ (16,981)	\$ (17,279)	\$ (7,094)	\$ (13,199)		\$ 38,191

At September 30, 2010, the commercial construction category of potential problem loans included 18 loans, the largest of which is \$3.8 million or 27.5% of the total category and 10.0% of total potential problem loans. The property collateralizing the loan is in southwest Missouri.

Activity in foreclosed assets during the nine months ended September 30, 2010 was as follows:

	Beginning Balance, January 1	Additions to Foreclosed Assets	Proceeds from Sales	Capitalized Costs	ORE Expense Write-Downs	Ending Balance, September 30
One- to four-family construction	\$4,099	\$1,311	\$(1,870)	\$193	\$ (191)	\$3,542
Subdivision construction and land development	19,006	2,141	(1,604)	598	(984)	19,157
Commercial construction	6,853	15,633	(14,399)	301	--	8,388
One- to four-family residential	5,633	7,676	(7,822)	7	(870)	4,624
Other residential	703	7,254	(2,979)	--	--	4,978
Commercial real estate	1,440	3,356	(341)	--	(331)	4,124
Consumer	777	1,018	(1,484)	--	(10)	301
Total	\$38,511	\$38,389	\$(30,499)	\$1,099	\$ (2,386)	\$45,114

At September 30, 2010, the subdivision construction and land development category of foreclosed assets included 55 properties. The largest property in that category is located in the St. Louis, Missouri metropolitan area and had a balance of \$5.5 million or 28.7% of the total category and 12.2% of total foreclosed assets. The increase in the other residential category was due to the addition of \$4.6 million of property located in the Branson, Missouri area that collateralized one borrower relationship. The commercial real estate category increased primarily due to the addition of \$1.7 million of land and commercial buildings located in southwest Missouri that collateralized one borrower relationship.

Non-interest Income

For the three months ended September 30, 2010, non-interest income decreased \$44.5 million, or 78.5%, to \$12.2 million when compared to the three months ended September 30, 2009, primarily as a result of the following items:

Vantus Bank FDIC-assisted acquisition: A one-time gain of \$45.9 million was recorded in the third quarter of 2009 related to the fair value accounting estimate of the Vantus Bank assets acquired and liabilities assumed from the FDIC on September 4, 2009.

Amortization of indemnification asset: As described above under "Net Interest Income", \$3.6 million of amortization (expense) was recorded in the 2010 period relating to a reduction of expected reimbursements under the loss sharing agreements with the FDIC, which are recorded as indemnification assets.

Partially offsetting the above items was a \$3.5 million increase in gains on sales of securities in the third quarter of 2010 compared to the same period in 2009. The Company sold nearly all of the securities acquired through the 2009 FDIC-assisted transactions and other mortgage-backed securities during the current period to eliminate securities with lower yields and blocks of smaller securities and to realize the gain positions of the securities. In addition, gains on sales of single-family loans increased \$426,000 when comparing the two periods as fixed-rate loan originations increased primarily due to customers refinancing into lower rates. The Company generally sells these loans in the secondary market.

New overdraft regulations on ATM and certain debit card transactions were effective July 1, 2010, for new customers and August 13, 2010, for existing customers. The new overdraft regulations were expected to adversely affect overdraft fees during the second half of 2010 and for the quarter ended September 30, 2010. Compared to the quarter ended June 30, 2010, income related to total service charges and ATM fees decreased \$370,000 during the three months ended September 30, 2010. Compared to the year ago quarter, income related to total service charges and ATM fees was relatively consistent.

For the nine months ended September 30, 2010, non-interest income decreased \$78.3 million, or 68.9%, to \$35.4 million when compared to the nine months ended September 30, 2009. The following items contributed to the decrease:

FDIC-assisted acquisitions: A total of \$89.8 million in one-time gains was recorded in the nine months ended September 30, 2009 related to the fair value accounting estimate of the assets acquired and liabilities assumed in the FDIC-assisted transactions involving TeamBank and Vantus Bank.

Amortization of indemnification asset: As previously described, \$3.6 million of amortization (expense) was recorded in the 2010 period relating to a reduction of expected reimbursements under the FDIC loss sharing agreements, which are recorded as indemnifications assets.

Partially offsetting the above decreases in non-interest income were the following items:

Securities impairments: During the first nine months of 2009, a \$4.3 million loss was recorded as a result of an impairment write-down in the value of certain available-for-sale equity investments, investments in bank trust preferred securities and an investment in a non-agency CMO. The Company continues to hold the majority of these securities in the available-for-sale category. Based on analyses of the securities portfolio during the first nine months of 2010, no additional impairment write-downs were necessary.

Gains on securities: Gains of \$8.9 million were recorded during the nine months ended September 30, 2010 due to sales of securities, an increase of \$6.4 million over the first nine months of 2009. The Company sold nearly all of the securities acquired through the 2009 FDIC-assisted transactions and other mortgage-backed securities during the current period as described above.

Deposit account charges and ATM fees: Income from deposit account charges and ATM and debit card usage fees increased \$1.7 million during the first nine months of 2010 compared to the same period in 2009. A large portion of this increase was the result of the customers added in the 2009 FDIC-assisted transactions as well as organic growth in core deposits through the legacy Great Southern footprint.

Gains on sales of single-family loans: An increase of \$630,000 in gains was recorded due to an increased number of fixed-rate loans originated and then sold in the secondary market during the first nine months of 2010 compared to the same period in 2009. Historically low fixed mortgage rates led to increases in loan refinances.

Commissions: Commission income increased \$1.1 million during the nine months ended September 30, 2010, compared to the same period in 2009, primarily due to increased activity for Great Southern Travel. Approximately one-fourth of the increase was a non-recurring incentive commission related to airline ticket sales.

Non-interest Expense

For the three months ended September 30, 2010, non-interest expense was relatively consistent with the three months ended September 30, 2009, decreasing \$55,000 to \$22.6 million. None of the expense categories experienced significant changes when comparing the three months ended September 30, 2010 to the same period in 2009.

For the nine months ended September 30, 2010, non-interest expense increased \$8.2 million to \$65.6 million when compared to the nine months ended September 30, 2009. The following items contributed to the increase in the nine-month period:

Vantus Bank FDIC-assisted acquisition: The Company's increase in non-interest expense in the nine months ended September 30, 2010 compared to the same period in 2009 included expenses related to the September 2009 FDIC-assisted acquisition of the assets and liabilities of Vantus Bank and its ongoing operation. In the nine months ended September 30, 2010, non-interest expense associated with Vantus Bank increased \$3.9 million from the same period in 2009. The largest expense increases were in the areas of salaries and benefits and occupancy and equipment expenses. In addition, other non-interest expenses related to the operation of other areas of the former Vantus Bank, such as lending and certain support functions, were absorbed in other pre-existing areas of the Company, resulting in increased non-interest expense.

New banking centers: The Company's increase in non-interest expense in the first nine months of 2010 compared to the same period in 2009 also related to the continued internal growth of the Company. The Company opened its second banking center in Lee's Summit, Mo., in late September 2009 and its first retail banking center in Rogers, Ark., in May 2010. In the nine months ended September 30, 2010, non-interest expenses associated with the operation of these locations increased \$613,000 over the same period in 2009.

Salaries and benefits: As a result of integrating the operations of TeamBank and Vantus Bank and the administration of the loss sharing portfolios as well as overall growth, the number of associates employed by the Company in

operational and lending areas has increased 22.1% over the last year. This in turn increased salaries and benefits paid by \$3.4 million in the first nine months of 2010 compared to the same period in 2009.

Net occupancy expense: As the Company's operations have expanded in the last year, so have the costs incurred to use and maintain buildings and equipment. Excluding the effects of the FDIC-assisted transactions, net occupancy expenses increased \$447,000 for the first nine months of 2010 compared to the same period in 2009.

Foreclosure-related expenses: Due to the increase in levels of foreclosed assets, foreclosure-related expenses increased \$550,000 in the nine months ended September 30, 2010, compared to the same period in 2009. In the three months ended September 30, 2010, foreclosure expenses were also negatively impacted by write-downs of certain foreclosed assets totaling \$1.4 million due to updated valuations.

Partially offsetting the above increases in non-interest expense was an FDIC-imposed special assessment on all insured depository institutions based on assets minus Tier 1 capital as of June 30, 2009. The Company recorded an expense of \$1.7 million during the first nine months of 2009 related to the special assessment. No special assessment was imposed in the first nine months of 2010.

The Company's efficiency ratio for the quarter ended September 30, 2010, was 53.27% compared to 28.12% for the same quarter in 2009. The difference in the ratios between the current to prior periods was primarily due to the Vantus Bank-related one-time gain recorded in 2009. The Company's ratio of non-interest expense to average assets increased from 2.61% for the quarter ended September 30, 2009 to 2.64% for the quarter ended September 30, 2010, as a result of lower average assets in the 2010 quarter.

The Company's efficiency ratio for the nine months ended September 30, 2010, was 54.97% compared to 32.47% for the same period in 2009. The difference in the ratios from the current to prior periods was primarily due to the TeamBank and Vantus Bank-related one-time gains recorded in 2009. The Company's ratio of non-interest expense to average assets increased from 2.32% for the nine months ended September 30, 2009, to 2.45% for the nine months ended September 30, 2010, as a result of the increased expenses discussed above and lower average assets in the nine months ended September 30, 2010.

Provision for Income Taxes

The Company's effective tax rate (as compared to the statutory federal tax rate of 35.0%) was 31.7% and 31.0%, respectively, for the three and nine months ended September 30, 2010, due primarily to tax-exempt investments and tax-exempt loans which reduced the Company's effective tax rate. The Company's effective tax rate was 33.8% and 34.2% for the three and nine months ended September 30, 2009, respectively, due to significantly higher taxable income as a result of the gains recorded on the FDIC-assisted transactions in March and September 2009. In future periods, the Company expects its effective tax rate to be in the range of 30-33% of pre-tax income.

Average Balances, Interest Rates and Yields

The following tables present, for the periods indicated, the total dollar amounts of interest income from average interest-earning assets and the resulting yields, as well as the interest expense on average interest-bearing liabilities, expressed both in dollars and rates, and the net interest margin. Average balances of loans receivable include the average balances of non-accrual loans for each period. Interest income on loans includes interest received on non-accrual loans on a cash basis. Interest income on loans includes the amortization of net loan fees, which were deferred in accordance with accounting standards. Fees included in interest income were \$590,000 and \$481,000 for the three months ended September 30, 2010 and 2009, respectively. Fees included in interest income were \$1.5 million and \$1.4 million for the nine months ended September 30, 2010 and 2009, respectively. Tax-exempt income

was not calculated on a tax equivalent basis. The table does not reflect any effect of income taxes.

- (1) Of the total average balances of investment securities, average tax-exempt investment securities were \$65.9 million and \$70.1 million for the nine months ended September 30, 2010 and 2009, respectively. In addition, average tax-exempt loans and industrial revenue bonds were \$46.4 million and \$38.2 million for the nine months ended September 30, 2010 and 2009, respectively. Interest income on tax-exempt assets included in this table was \$3.9 million and \$3.8 million for the nine months ended September 30, 2010 and 2009, respectively. Interest income net of disallowed interest expense related to tax-exempt assets was \$3.4 million and \$3.3 million for the nine months ended September 30, 2010 and 2009, respectively.

Rate/Volume Analysis

The following tables present the dollar amounts of changes in interest income and interest expense for major components of interest-earning assets and interest-bearing liabilities for the periods shown. For each category of interest-earning assets and interest-bearing liabilities, information is provided on changes attributable to (i) changes in rate (i.e., changes in rate multiplied by old volume) and (ii) changes in volume (i.e., changes in volume multiplied by old rate). For purposes of this table, changes attributable to both rate and volume, which cannot be segregated, have been allocated proportionately to volume and rate. Tax-exempt income was not calculated on a tax equivalent basis.

Liquidity and Capital Resources

Liquidity is a measure of the Company's ability to generate sufficient cash to meet present and future financial obligations in a timely manner through either the sale or maturity of existing assets or the acquisition of additional funds through liability management. These obligations include the credit needs of customers, funding deposit withdrawals, and the day-to-day operations of the Company. Liquid assets include cash, interest-bearing deposits with financial institutions and certain investment securities and loans. The Company manages its ability to generate liquidity primarily through liability funding in such a way that it believes it maintains overall liquidity sufficient to satisfy its depositors' requirements and meet its customers' credit needs. At September 30, 2010, the Company had commitments of approximately \$46.1 million to fund loan originations, \$177.4 million of unused lines of credit and unadvanced loans, and \$17.0 million of outstanding letters of credit.

At September 30, 2010, the Company anticipates purchasing the real estate and furniture and fixtures of a majority of the branch locations currently being operated as a result of the FDIC-assisted transactions which took place during 2009 for an estimated \$21.3 million.

At September 30, 2010, the Company had committed to purchase a total of \$3.1 million of federal low income tax credits related to the construction of houses qualifying for IRS Section 42 designation. The Company will invest \$2.4 million to acquire these credits. One of the principal developers of the project is a director of the Company. The Company's investment to acquire these credits is consistent with pricing the Company has paid to acquire other tax credits from non-related parties.

Management continuously reviews the capital position of the Company and the Bank to ensure compliance with minimum regulatory requirements, as well as to explore ways to increase capital either by retained earnings or other means.

At September 30, 2010, the Company's total stockholders' equity was \$305.6 million, or 9.0%, of total assets. At September 30, 2010, common stockholders' equity was \$249.3 million, or 7.3%, of total assets, equivalent to a book value of \$18.54 per common share. Total stockholders' equity at December 31, 2009, was \$298.9 million, or 8.2%, of total assets. At December 31, 2009, common stockholders' equity was \$242.9 million, or 6.7%, of total assets, equivalent to a book value of \$18.12 per common share. Common stockholders' equity increased \$6.4 million, or 2.6%, in the nine months ended September 30, 2010.

At September 30, 2010 and December 31, 2009, the Company's tangible common equity to total assets ratio was 7.2% and 6.5%, respectively. The Company's tangible common equity to total risk-weighted assets ratio was 12.4% at September 30, 2010, compared to 11.4% at December 31, 2009.

Banks are required to maintain minimum risk-based capital ratios. These ratios compare capital, as defined by the risk-based regulations, to assets adjusted for their relative risk as defined by the regulations. Guidelines require banks to have a minimum Tier 1 risk-based capital ratio, as defined, of 4.00%, a minimum total risk-based capital ratio of 8.00%, and a minimum 4.00% Tier 1 leverage ratio. To be considered "well capitalized," banks must have a minimum Tier 1 risk-based capital ratio, as defined, of 6.00%, a minimum total risk-based capital ratio of 10.00%, and a minimum Tier 1 leverage ratio of 5.00%. On September 30, 2010, the Bank's Tier 1 risk-based capital ratio was 14.13%, total risk-based capital ratio was 15.39% and the Tier 1 leverage ratio was 8.14%. As of September 30, 2010, the Bank was "well capitalized" as defined by the Federal banking agencies' capital-related regulations. The Federal Reserve Board has established capital regulations for bank holding companies that generally parallel the capital regulations for banks. On September 30, 2010, the Company's Tier 1 risk-based capital ratio was 16.30%, total risk-based capital ratio was 17.56% and the Tier 1 leverage ratio was 9.39%. As of September 30, 2010, the Company was "well capitalized" as defined by the Federal banking agencies' capital-related regulations.

On December 5, 2008, the Company completed a transaction to participate in the U.S. Treasury's voluntary Capital Purchase Program (CPP). The CPP, a part of the Emergency Economic Stabilization Act of 2009, is designed to provide capital to healthy financial institutions, thereby increasing confidence in the banking industry and increasing the flow of financing to businesses and consumers. At the time the Company was approved to participate in the CPP in December 2008, it exceeded all "well-capitalized" regulatory benchmarks and, as indicated above, it continues to exceed these benchmarks. The Company received \$58.0 million from the U.S. Treasury through the sale of 58,000 shares of the Company's newly authorized Fixed Rate Cumulative Perpetual Preferred Stock, Series A. The Company also issued to the U.S. Treasury a warrant to purchase 909,091 shares of common stock at \$9.57 per share.

The amount of preferred shares sold represents approximately 3% of the Company's risk-weighted assets as of September 30, 2008. Through its preferred stock investment, the Treasury will receive a cumulative dividend of 5% per year for the first five years, or \$2.9 million per year, and 9% per year thereafter. The preferred shares are callable at 100% of the issue price, subject to consultation by the U.S. Treasury with the Company's primary federal regulator. In addition, for a period of the earlier of three years or until these preferred shares have been redeemed by the Company or divested by the Treasury, the Company has certain limitations on dividends that may be declared on its common or preferred stock and is prohibited from repurchasing shares of its common or other capital stock or any trust preferred securities issued by the Company without the Treasury's consent.

At September 30, 2010, the held-to-maturity investment portfolio included \$197,000 of gross unrealized gains and no gross unrealized losses.

The Company's primary sources of funds are customer deposits, FHLBank advances, other borrowings, loan repayments, unpledged securities, proceeds from sales of loans and available-for-sale securities and funds provided from operations. The Company utilizes particular sources of funds based on the comparative costs and availability at the time. The Company has from time to time chosen not to pay rates on deposits as high as the rates paid by certain of its competitors and, when believed to be appropriate, supplements deposits with less expensive alternative sources of funds.

At September 30, 2010, the Company had these available secured lines and on-balance sheet liquidity:

Federal Home Loan Bank line	\$230.6 million
Federal Reserve Bank line	\$274.2 million
Interest-Bearing and Non-Interest-Bearing Deposits	\$477.5 million
Unpledged Securities	\$27.9 million

Statements of Cash Flows. During the nine months ended September 30, 2010 and 2009, respectively, the Company had positive cash flows from operating and investing activities. Cash flows from financing activities were negative for the nine months ended September 30, 2010 and 2009.

Cash flows from operating activities for the periods covered by the Statements of Cash Flows have been primarily related to changes in accrued and deferred assets, credits and other liabilities, the provision for loan losses, depreciation, impairments of investment securities, gains on sales of investment securities, gains on the purchase of additional business units and the amortization of deferred loan origination fees and discounts (premiums) on loans and investments, all of which are non-cash or non-operating adjustments to operating cash flows. Net income adjusted for non-cash and non-operating items and the origination and sale of loans held for sale were the primary source of cash flows from operating activities. Operating activities provided cash flows of \$62.5 million and \$45.1 million during the nine months ended September 30, 2010 and 2009, respectively.

During the nine months ended September 30, 2010, investing activities provided cash of \$209.9 million primarily due to the net decrease in loans and investment securities for the period. During the nine months ended September 30, 2009, investing activities provided cash of \$393.1 million primarily due to the cash received from the purchase of an additional business unit, sales and maturities of investment securities and the net decrease in loans.

Changes in cash flows from financing activities during the periods covered by the Statements of Cash Flows are due to changes in deposits after interest credited, changes in FHLBank advances, changes in short-term borrowings, and changes in structured repurchase agreements, as well as dividend payments to stockholders. Financing activities used

\$239.4 million and \$54.0 million during the nine months ended September 30, 2010 and 2009, respectively. Financing activities in the future are expected to primarily include changes in deposits, changes in FHLBank advances, changes in short-term borrowings and dividend payments to stockholders.

Dividends. During the three months ended September 30, 2010, the Company declared a common stock cash dividend of \$0.18 per share, or 47% of net income per common diluted share for that three month period, and paid a common stock cash dividend of \$0.18 per share (which was declared in June 2010). During the three months ended September 30, 2009, the Company declared a common stock cash dividend of \$0.18 per share (which was paid in October 2009), or 9% of net income per common diluted share for that three month period, and paid a common stock cash dividend of \$0.18 per share (which was declared in June 2009). During the nine months ended September 30, 2010, the Company

declared common stock cash dividends of \$0.54 per share, or 50% of net income per common diluted share for that nine month period, and paid common stock cash dividends of \$0.54 per share. During the nine months ended September 30, 2009, the Company declared common stock cash dividends of \$0.54 per share, or 13% of net income per common diluted share for that nine month period, and paid common stock cash dividends of \$0.54 per share. The Board of Directors meets regularly to consider the level and the timing of dividend payments. The dividend declared but unpaid as of September 30, 2010, was paid to shareholders on October 13, 2010. In addition, the Company paid preferred dividends as described below.

Our participation in the CPP currently precludes us from increasing our common stock cash dividend above \$0.18 per share per quarter without the consent of the Treasury until the earlier of December 5, 2011 or our repayment of the CPP funds or the transfer by the Treasury to third parties of all of the shares of preferred stock we issued to the Treasury pursuant to the CPP. As a result of the issuance of preferred stock to the Treasury pursuant to the CPP in December 2008, during the nine months ended September 30, 2010, the Company paid preferred stock cash dividends of \$725,000 on February 16, 2010, \$725,000 on May 17, 2010 and \$725,000 on August 16, 2010. During the nine months ended September 30, 2009, the Company paid preferred stock cash dividends of \$564,000 on February 17, 2009, \$725,000 on May 15, 2009, and \$725,000 on August 15, 2009. Quarterly payments of \$725,000 will be due through February 15, 2014, as long as the preferred stock is outstanding. Thereafter, for as long as the preferred stock remains outstanding, the preferred stock quarterly dividend payment will increase to \$1.3 million.

Common Stock Repurchases and Issuances. The Company has been in various buy-back programs since May 1990. During the three and nine months ended September 30, 2010 and 2009, respectively, the Company did not repurchase any shares of its common stock. During the three and nine months ended September 30, 2010, the Company issued 10,400 shares of stock at an average price of \$14.43 per share and 37,522 shares of stock at an average price of \$13.97 per share, respectively, to cover stock option exercises. During the three and nine months ended September 30, 2009, the Company issued 12,654 shares of stock at an average price of \$13.27 per share and 17,416 shares of stock at an average price of \$13.38 per share, respectively, to cover stock option exercises.

Our participation in the CPP currently precludes us from purchasing shares of the Company's stock without the Treasury's consent until the earlier of December 5, 2011 or our repayment of the CPP funds or the transfer by the Treasury to third parties of all of the shares of preferred stock we issued to the Treasury pursuant to the CPP. Management has historically utilized stock buy-back programs from time to time as long as repurchasing the stock contributed to the overall growth of shareholder value. The number of shares of stock repurchased and the price paid is the result of many factors, several of which are outside of the control of the Company. The primary factors, however, are the number of shares available in the market from sellers at any given time and the price of the stock within the market as determined by the market.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Asset and Liability Management and Market Risk

A principal operating objective of the Company is to produce stable earnings by achieving a favorable interest rate spread that can be sustained during fluctuations in prevailing interest rates. The Company has sought to reduce its exposure to adverse changes in interest rates by attempting to achieve a closer match between the periods in which its interest-bearing liabilities and interest-earning assets can be expected to reprice through the origination of adjustable-rate mortgages and loans with shorter terms to maturity and the purchase of other shorter term interest-earning assets. Since the Company uses laddered brokered deposits and FHLBank advances to fund a portion of its loan growth, the Company's assets tend to reprice more quickly than its liabilities.

Our Risk When Interest Rates Change

The rates of interest we earn on assets and pay on liabilities generally are established contractually for a period of time. Market interest rates change over time. Accordingly, our results of operations, like those of other financial institutions, are impacted by changes in interest rates and the interest rate sensitivity of our assets and liabilities. The risk associated with changes in interest rates and our ability to adapt to these changes is known as interest rate risk and is our most significant market risk.

How We Measure the Risk to Us Associated with Interest Rate Changes

In an attempt to manage our exposure to changes in interest rates and comply with applicable regulations, we monitor Great Southern's interest rate risk. In monitoring interest rate risk we regularly analyze and manage assets and liabilities based on their payment streams and interest rates, the timing of their maturities and their sensitivity to actual or potential changes in market interest rates.

The ability to maximize net interest income is largely dependent upon the achievement of a positive interest rate spread that can be sustained despite fluctuations in prevailing interest rates. Interest rate sensitivity is a measure of the difference between amounts of interest-earning assets and interest-bearing liabilities which either reprice or mature within a given period of time. The difference, or the interest rate repricing "gap," provides an indication of the extent to which an institution's interest rate spread will be affected by changes in interest rates. A gap is considered positive when the amount of interest-rate sensitive assets exceeds the amount of interest-rate sensitive liabilities repricing during the same period, and is considered negative when the amount of interest-rate sensitive liabilities exceeds the amount of interest-rate sensitive assets during the same period. Generally, during a period of rising interest rates, a negative gap within shorter repricing periods would adversely affect net interest income, while a positive gap within shorter repricing periods would result in an increase in net interest income. During a period of falling interest rates, the opposite would be true. As of September 30, 2010, Great Southern's internal interest rate risk models indicate a one-year interest rate sensitivity gap that is slightly negative. Generally, a rate increase by the FRB would be expected to have an immediate negative impact on Great Southern's net interest income. As the Federal Funds rate is now very low, the Company's interest rate floors have been reached on most of its "prime rate" loans. In addition, Great Southern has elected to leave its "Great Southern Prime Rate" at 5.00% for those loans that are indexed to "Great Southern Prime" rather than "Wall Street Journal Prime." While these interest rate floors and prime rate adjustments have helped keep the rate on our loan portfolio higher in this very low interest rate environment, they will also reduce the positive effect to our loan rates when market interest rates, specifically the "prime rate," begin to increase. The interest rate on these loans will not increase until the loan floors are reached and the "Wall Street Journal Prime" interest rate exceeds 5.00%. The operating environment has not been normal as interest costs for deposits and borrowings have been and continue to be elevated because of abnormal credit, liquidity and competitive pricing pressures; therefore, we expect the net interest margin will continue to be somewhat compressed. However, if rates remain generally unchanged in the short-term, we expect that our cost of funds will continue to decrease as we have redeemed some of our brokered deposits. In addition, a significant portion of our retail certificates of deposit mature in the next few months and we expect that they will be replaced with new certificates of deposit at lower interest rates.

Interest rate risk exposure estimates (the sensitivity gap) are not exact measures of an institution's actual interest rate risk. They are only indicators of interest rate risk exposure produced in a simplified modeling environment designed to allow management to gauge the Bank's sensitivity to changes in interest rates. They do not necessarily indicate the impact of general interest rate movements on the Bank's net interest income because the repricing of certain categories of assets and liabilities is subject to competitive and other factors beyond the Bank's control. As a result, certain assets and liabilities indicated as maturing or otherwise repricing within a stated period may in fact mature or reprice at different times and in different amounts and cause a change, which potentially could be material, in the Bank's interest rate risk.

In order to minimize the potential for adverse effects of material and prolonged increases and decreases in interest rates on Great Southern's results of operations, Great Southern has adopted asset and liability management policies to better match the maturities and repricing terms of Great Southern's interest-earning assets and interest-bearing liabilities. Management recommends and the Board of Directors sets the asset and liability policies of Great Southern which are implemented by the asset and liability committee. The asset and liability committee is chaired by the Chief Financial Officer and is comprised of members of Great Southern's senior management. The purpose of the asset and liability committee is to communicate, coordinate and control asset/liability management consistent with Great

Southern's business plan and board-approved policies. The asset and liability committee establishes and monitors the volume and mix of assets and funding sources taking into account relative costs and spreads, interest rate sensitivity and liquidity needs. The objectives are to manage assets and funding sources to produce results that are consistent with liquidity, capital adequacy, growth, risk and profitability goals. The asset and liability committee meets on a monthly basis to review, among other things, economic conditions and interest rate outlook, current and projected liquidity needs and capital positions and anticipated changes in the volume and mix of assets and liabilities. At each meeting, the asset and liability committee recommends appropriate strategy changes based on this review. The Chief Financial Officer or his designee is responsible for reviewing and reporting on the effects of the policy implementations and strategies to the Board of Directors at their monthly meetings.

In order to manage its assets and liabilities and achieve the desired liquidity, credit quality, interest rate risk, profitability and capital targets, Great Southern has focused its strategies on originating adjustable rate loans, and managing its deposits and borrowings to establish stable relationships with both retail customers and wholesale funding sources.

At times, depending on the level of general interest rates, the relationship between long- and short-term interest rates, market conditions and competitive factors, we may determine to increase our interest rate risk position somewhat in order to maintain or increase our net interest margin.

The asset and liability committee regularly reviews interest rate risk by forecasting the impact of alternative interest rate environments on net interest income and market value of portfolio equity, which is defined as the net present value of an institution's existing assets, liabilities and off-balance sheet instruments, and evaluating such impacts against the maximum potential changes in net interest income and market value of portfolio equity that are authorized by the Board of Directors of Great Southern.

ITEM 4. CONTROLS AND PROCEDURES

We maintain a system of disclosure controls and procedures (as defined in Rule 13(a)-15(e) under the Securities Exchange Act (the "Exchange Act")) that is designed to provide reasonable assurance that information required to be disclosed by us in the reports that we file under the Exchange Act is recorded, processed, summarized and reported accurately and within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate. An evaluation of our disclosure controls and procedures was carried out as of September 30, 2010, under the supervision and with the participation of our principal executive officer, principal financial officer and several other members of our senior management. Our principal executive officer and principal financial officer concluded that, as of September 30, 2010, our disclosure controls and procedures were effective in ensuring that the information we are required to disclose in the reports we file or submit under the Act is (i) accumulated and communicated to our management (including the principal executive officer and principal financial officer) to allow timely decisions regarding required disclosure, and (ii) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

There were no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Act) that occurred during the quarter ended September 30, 2010, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

We do not expect that our internal control over financial reporting will prevent all errors and all fraud. A control procedure, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control procedure are met. Because of the inherent limitations in all control procedures, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns in controls or procedures can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any control procedure also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control procedure, misstatements due to error or fraud may occur and not be detected.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

In the normal course of business, the Company and its subsidiaries are subject to pending and threatened legal actions, some for which the relief or damages sought are substantial. After reviewing pending and threatened litigation with counsel, management believes at this time that the outcome of such litigation will not have a material adverse effect on the results of operations or stockholders' equity. We are not able to predict at this time whether the outcome of such actions may or may not have a material adverse effect on the results of operations in a particular future period as the timing and amount of any resolution of such actions and its relationship to the future results of operations are not known.

Item 1A. Risk Factors

Recently enacted financial reform legislation will, among other things, tighten capital standards, create a new Consumer Financial Protection Bureau and result in new regulations that are expected to increase our costs of operations.

On July 21, 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") was signed into law. This new law will significantly change the current bank regulatory structure and affect the lending, deposit, investment, trading and operating activities of financial institutions and their holding companies. The Dodd-Frank Act requires various federal agencies to adopt a broad range of new implementing rules and regulations, and to prepare numerous studies and reports for Congress. The federal agencies are given significant discretion in drafting the implementing rules and regulations, and consequently, many of the details and much of the impact of the Dodd-Frank Act may not be known for many months or years.

Among the many requirements in the Dodd-Frank Act for new banking regulations is a requirement for new capital regulations to be adopted within 18 months. These regulations must be at least as stringent as, and may call for higher levels of capital than, current regulations. Generally, trust preferred securities will no longer be eligible as Tier 1 capital, but the Company's currently outstanding trust preferred securities will be grandfathered and its currently outstanding TARP preferred securities will continue to qualify as Tier 1 capital.

Certain provisions of the Dodd-Frank Act are expected to have a near term impact on us. For example, one year after the date of its enactment, the Dodd-Frank Act eliminates the federal prohibitions on paying interest on demand deposits, thus allowing businesses to have interest bearing checking accounts. Depending on competitive responses, this significant change to existing law could have an adverse impact on our interest expense. The Dodd-Frank Act also permanently increases the maximum amount of deposit insurance for banks to \$250,000 per depositor, retroactive to January 1, 2008, and non-interest bearing transaction accounts have unlimited deposit insurance through December 31, 2013.

The Dodd-Frank Act will require publicly traded companies to give stockholders a non-binding vote on executive compensation and so-called "golden parachute" payments, and authorize the Securities and Exchange Commission to promulgate rules that would allow stockholders to nominate their own candidates using a company's proxy materials. The legislation also directs the federal banking regulators to issue rules prohibiting incentive compensation that encourages inappropriate risks.

The Dodd-Frank Act creates a new Bureau of Consumer Financial Protection with broad powers to supervise and enforce consumer protection laws. The Bureau will have broad rule-making authority for a wide range of consumer protection laws that apply to all banks, including the authority to prohibit "unfair, deceptive or abusive acts and

practices.

Additional provisions of the Dodd-Frank Act are described in this report under “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Effect of Federal Laws and Regulations-Recent Legislation Impacting the Financial Services Industry.”

Many aspects of the Dodd-Frank Act are subject to rulemaking and will take effect over several years, making it difficult to anticipate the overall financial impact on the Company. However, compliance with this new law and its

implementing regulations will result in additional operating costs that could have a material adverse effect on our financial condition and results of operations.

Our strategy of pursuing acquisitions exposes us to financial, execution and operational risks that could adversely affect us.

We pursue a strategy of supplementing internal growth by acquiring other financial institutions that we believe will help us fulfill our strategic objectives and enhance our earnings. There are risks associated with this strategy, however, including the following:

- We may be exposed to potential asset quality issues or unknown or contingent liabilities of the banks, businesses, assets and liabilities we acquire. If these issues or liabilities exceed our estimates, our results of operations and financial condition may be materially negatively affected;
- Prices at which acquisitions can be made fluctuate with market conditions. We have experienced times during which acquisitions could not be made in specific markets at prices we considered acceptable and expect that we will experience this condition in the future;
- The acquisition of other entities generally requires integration of systems, procedures and personnel of the acquired entity into our company to make the transaction economically successful. This integration process is complicated and time consuming and can also be disruptive to the customers of the acquired business. If the integration process is not conducted successfully and with minimal effect on the acquired business and its customers, we may not realize the anticipated economic benefits of particular acquisitions within the expected time frame, and we may lose customers or employees of the acquired business. We may also experience greater than anticipated customer losses even if the integration process is successful;
- Great Southern Bank entered into loss sharing agreements with the FDIC as part of the TeamBank, N.A. and Vantus Bank transactions. These loss sharing agreements require that Great Southern Bank follow certain servicing procedures as specified in the agreement. A failure to follow these procedures or any other breach of the agreement by Great Southern Bank could result in the loss of FDIC reimbursement of losses on covered loans and other real estate owned, which could have a material negative affect on our financial condition and results of operations;
 - To finance an acquisition, we may borrow funds, thereby increasing our leverage and diminishing our liquidity, or raise additional capital, which could dilute the interests of our existing stockholders; and
- We completed two significant acquisitions during 2009 and have opened additional banking offices in recent years that enhanced our rate of growth. We may not be able to continue to sustain our past rate of growth or to grow at all in the future.

Other than as set forth above, there have been no material changes to the risk factors set forth in Part I, Item 1A of the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On November 15, 2006, the Company's Board of Directors authorized management to repurchase up to 700,000 shares of the Company's outstanding common stock, under a program of open market purchases or privately negotiated transactions. The plan does not have an expiration date. However, our participation in the CPP precludes us from purchasing shares of the Company's stock without the prior consent of the Treasury until the earlier of December 5, 2011 or our repayment of the CPP funds or the transfer by the Treasury to third parties of all of the shares of preferred stock we issued to the Treasury pursuant to the CPP. As indicated below, no shares were purchased during the third quarter of 2010.

	Total Number of Shares Purchased	Average Price Per Share	Total Number of Shares Purchased As Part of Publicly Announced Plan	Maximum Number of Shares that May Yet Be Purchased Under the Plan(1)
July 1, 2010 – July 31, 2010	---	\$ ----	---	396,562
August 1, 2010 – August 31, 2010	---	\$ ----	---	396,562
September 1, 2010 – September 30, 2010	---	\$ ----	---	396,562

(1) Amount represents the number of shares available to be repurchased under the plan as of the last calendar day of the month shown.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Reserved

Item 5. Other Information

None.

EXHIBIT INDEX

Exhibit No.	Description
(2)	Plan of acquisition, reorganization, arrangement, liquidation, or succession
(i)	The Purchase and Assumption Agreement, dated as of March 20, 2009, among Federal Deposit Insurance Corporation, Receiver of TeamBank, N.A., Paola, Kansas, Federal Deposit Insurance Corporation and Great Southern Bank, previously filed with the Commission (File no. 000-18082) as Exhibit 2.1 to the Registrant's Current Report on Form 8-K filed on March 26, 2009 is incorporated herein by reference as Exhibit 2.1.
(ii)	The Purchase and Assumption Agreement, dated as of September 4, 2009, among Federal Deposit Insurance Corporation, Receiver of Vantus Bank, Sioux City, Iowa, Federal Deposit Insurance Corporation and Great Southern Bank, previously filed with the Commission (File no. 000-18082) as Exhibit 2.1 to the Registrant's Current Report on Form 8-K filed on September 11, 2009 is incorporated herein by reference as Exhibit 2.1.
(3)	Articles of incorporation and Bylaws
(i)	The Registrant's Charter previously filed with the Commission as Appendix D to the Registrant's Definitive Proxy Statement on Schedule 14A filed on March 31, 2004 (File No. 000-18082), is incorporated herein by reference as Exhibit 3.1.
(iA)	The Articles Supplementary to the Registrant's Charter setting forth the terms of the Registrant's Fixed Rated Cumulative Perpetual Preferred Stock, Series A, previously filed with the Commission (File no. 000-18082) as Exhibit 3.1 to the Registrant's Current Report on Form 8-K filed on December 9, 2008, are incorporated herein by reference as Exhibit 3(i).
(ii)	The Registrant's Bylaws, previously filed with the Commission (File no. 000-18082) as Exhibit 3(ii) to the Registrant's Current Report on Form 8-K filed on October 23, 2007, is incorporated herein by reference as Exhibit 3.2.
(4)	Instruments defining the rights of security holders, including indentures
	The Company hereby agrees to furnish the SEC upon request, copies of the instruments defining the rights of the holders of each issue of the Registrant's long-term debt.
	The warrant to purchase shares of the Registrant's common stock dated December 5, 2008, previously filed with the Commission (File no. 000-18082) as Exhibit 4.2 to the Registrant's Current Report on Form 8-K filed on December 9, 2008, is incorporated herein by reference as Exhibit 4(i).
(9)	Voting trust agreement

Inapplicable.

(10) Material contracts

The Registrant's 1989 Stock Option and Incentive Plan previously filed with the Commission (File no. 000-18082) as Exhibit 10.2 to the Registrant's Annual Report on Form 10-K for the fiscal year ended September 30, 1990, is incorporated herein by reference as Exhibit 10.1.

53

The Registrant's 1997 Stock Option and Incentive Plan previously filed with the Commission (File no. 000-18082) as Annex A to the Registrant's Definitive Proxy Statement on Schedule 14A filed on September 18, 1997 is incorporated herein by reference as Exhibit 10.2.

The Registrant's 2003 Stock Option and Incentive Plan previously filed with the Commission (File No. 000-18082) as Annex A to the Registrant's Definitive Proxy Statement on Schedule 14A filed on April 14, 2003, is incorporated herein by reference as Exhibit 10.3.

The employment agreement dated September 18, 2002 between the Registrant and William V. Turner previously filed with the Commission (File no. 000-18082) as Exhibit 10.2 to the Registrant's Annual Report on Form 10-K for the fiscal year ended December 31, 2003, is incorporated herein by reference as Exhibit 10.4.

The employment agreement dated September 18, 2002 between the Registrant and Joseph W. Turner previously filed with the Commission (File no. 000-18082) as Exhibit 10.4 to the Registrant's Annual Report on Form 10-K for the fiscal year ended December 31, 2003, is incorporated herein by reference as Exhibit 10.5.

The form of incentive stock option agreement under the Registrant's 2003 Stock Option and Incentive Plan previously filed with the Commission as Exhibit 10.1 to the Registrant's Current Report on Form 8-K (File no. 000-18082) filed on February 24, 2005 is incorporated herein by reference as Exhibit 10.6.

The form of non-qualified stock option agreement under the Registrant's 2003 Stock Option and Incentive Plan previously filed with the Commission as Exhibit 10.2 to the Registrant's Current Report on Form 8-K (File no. 000-18082) filed on February 24, 2005 is incorporated herein by reference as Exhibit 10.7.

A description of the current salary and bonus arrangements for 2010 for the Registrant's named executive officers previously filed with the Commission as Exhibit 10.8 to the Registrant's Annual Report on Form 10-K for the fiscal year ended December 31, 2009 is incorporated herein by reference as Exhibit 10.8.

A description of the current fee arrangements for the Registrant's directors previously filed with the Commission as Exhibit 10.9 to the Registrant's Annual Report on Form 10-K for the fiscal year ended December 31, 2009 is incorporated herein by reference as Exhibit 10.9.

The Letter Agreement, including Schedule A, and Securities Purchase Agreement, dated December 5, 2008, between the Registrant and the United States Department of the Treasury, previously filed with the Commission (File no. 000-18082) as Exhibit 10.1 to the Registrant's Current Report on Form 8-K filed on December 8, 2008, is incorporated herein by reference as Exhibit 10.10.

The form of Compensation Modification Agreement and Waiver, executed by each of William V. Turner, Joseph W. Turner, Rex A. Copeland, Steven G. Mitchem, Douglas W. Marrs and Linton J. Thomason, previously filed with the Commission (File no. 000-18082) as Exhibit 10.2 to the Registrant's Current Report on Form 8-K filed on December 8, 2008, is incorporated herein by reference as Exhibit 10.11.

(11) Statement re computation of per share earnings

Included in Note 6 to the Consolidated Financial Statements.

(15) Letter re unaudited interim financial information

Inapplicable.

54

(18) Letter re change in accounting principles

Inapplicable.

(19) Report furnished to securityholders.

Inapplicable.

(22) Published report regarding matters submitted to vote of security holders

Inapplicable.

(23) Consents of experts and counsel

Inapplicable.

(24) Power of attorney

None.

(31.1) Rule 13a-14(a) Certification of Chief Executive Officer

Attached as Exhibit 31.1

(31.2) Rule 13a-14(a) Certification of Treasurer

Attached as Exhibit 31.2

(32) Certification pursuant to Section 906 of Sarbanes-Oxley Act of 2002 (18 U.S.C. Section 1350)

Attached as Exhibit 32.

(99) Additional Exhibits

None.
