USGG U.S. Generic Government Yield

(a) Includes hybrid securities with characteristics of both equity and debt that trade with, and pay, interest income.

(b) Includes preferred stocks and hybrid securities with characteristics of both equity and debt that pay dividends on a periodic basis.

(l) Non-income producing security.

(M) Term loans are variable rate obligations. The coupon rate shown represents the rate at period end.

(P) Variable rate obligation. The coupon rate shown represents the rate at period end.

(Q) Perpetual bonds have no stated maturity date. Date shown is next call date.

(S) These securities are exempt from registration under Rule 144A of the Securities Act of 1933. Such securities may be resold, normally to qualified institutional buyers, in transactions exempt from registration. Rule 144A securities amounted to \$49,513,217 or 27.6% of the Fund's net assets as of 7-31-12.

(Z) All or a portion of this security is segregated as collateral pursuant to the Committed Facility Agreement. Total collateral value at 7-31-12 was \$172,293,002.

† At 7-31-12, the aggregate cost of investment securities for federal income tax purposes was \$253,087,953. Net unrealized appreciation aggregated \$12,235,569, of which \$18,750,353 related to appreciated investment securities and \$6,514,784 related to depreciated investment securities.

Notes to the Schedule of Investments

Security valuation. Investments are stated at value as of the close of regular trading on the New York Stock Exchange (NYSE), normally at 4:00 P.M., Eastern Time. In order to value the securities, the Fund uses the following valuation techniques: Equity securities held by the Fund are valued at the last sale price or official closing price on the principal securities exchange on which they trade. In the event there were no sales during the day or closing prices are not available, then securities are valued using the last quoted bid or evaluated price. Debt obligations are valued based on the evaluated prices provided by an independent pricing service, which utilizes both dealer-supplied and electronic data processing techniques, taking into account factors such as institutional-size trading in similar groups of securities, yield, quality, coupon rate, maturity, type of issue, trading characteristics and other market data. Swaps are marked-to-market daily based upon values from third party vendors, which may include a registered commodities exchange, or broker quotations. Foreign securities and currencies are valued in U.S. dollars, based on foreign currency exchange rates supplied by an independent pricing service. Certain securities traded only in the over-the-counter market are valued at the last bid price quoted by brokers making markets in the securities at the close of trading. Certain short-term securities are valued at amortized cost.

Other portfolio securities and assets, where market quotations are not readily available, are valued at fair value, as determined in good faith by the Fund's Pricing Committee, following procedures established by the Board of Trustees.

The Fund uses a three-tier hierarchy to prioritize the pricing assumptions, referred to as inputs, used in valuation techniques to measure fair value. Level 1 includes securities valued using quoted prices in active markets for identical securities. Level 2 includes securities valued using significant observable inputs. Observable inputs may include quoted prices for similar securities, interest rates, prepayment speeds and credit risk. Prices for securities valued using these inputs are received from independent pricing vendors and brokers and are based on an evaluation of the inputs described. Level 3 includes securities valued using significant unobservable inputs when market prices are not readily available or reliable, including the Fund's own assumptions in determining the fair value of investments. Factors used in determining value may include market or issuer specific events, changes in interest rates and credit quality. The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities. Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy.

The following is a summary of the values by input classification of the Fund's investments as of July 31, 2012, by major security category or type:

	Total Market		Level 2	Level 3
	Value at	Level 1 Quoted	Significant	Significant
	7-31-12	Price	Observable	Unobservable
			Inputs	Inputs
Corporate Bonds	\$136,618,830	—	\$135,970,712	\$648,118

17

John Hancock Income Securities Trust

As of 7-31-12 (Unaudited)

The following is a reconciliation of Level 3 assets for which significant unobservable inputs were used to determine fair value. Transfers into or out of Level 3 represent the beginning value of any security or instrument where a change in the level has occurred from the beginning to the end of the period and in all cases were transferred into or out of Level 2. Securities were transferred into Level 3 because of a lack of observable market data which resulted from an absence of market activity for these securities. Securities were transferred out of Level 3 since observable market data became available due to increased market activity of these securities.

	Collateralized					Total
	Corporate Bonds	Mortgage Obligations	Asset Backed Securities	Common Stocks	Preferred Securities	
Balance as of 10-31-11	\$344,203	\$125,276	\$214,000	\$56,075	\$1,094,555	\$1,834,109
Realized gain (loss)	274	—	—	—	—	\$274
Change in unrealized appreciation (depreciation)	63,645	16,186	—	(16,270)	(8,457)	\$55,104
Purchases	260,000	936	1,401,946	—	—	\$1,662,882
Sales	(20,004)	(37,302)	—	—	—	(\$57,306)
Transfers into Level 3	—	150,173	—	—	—	\$150,173
Transfers out of Level 3	—	(43,548)	—	—	—	(\$43,548)
Balance as of 7-31-12	\$648,118	\$211,721	\$1,615,946	\$39,805	\$1,086,098	\$3,601,688
Change in unrealized at period end*	\$51,273	\$16,186	—	—(\$16,270)	(\$8,457)	\$42,732

* Change in unrealized appreciation (depreciation) attributable to Level 3 securities held at the period end.

Repurchase agreements. The Fund may enter into repurchase agreements. When the Fund enters into a repurchase agreement, it receives collateral which is held in a segregated account by the Fund's custodian. The collateral amount is marked-to-market and monitored on a daily basis to ensure that the collateral held is in an amount not less than the principal amount of the repurchase agreement plus any accrued interest. In the event of a default by the counterparty, realization of the collateral proceeds could be delayed, during which time the collateral value may decline.

Stripped securities. Stripped mortgage-backed securities are financial instruments structured to separate principal and interest cash flows so that one class receives only principal payments from the underlying mortgage assets (PO or principal only), while the other class receives the interest cash flows (IO or interest only). Both PO and IO investments represent an interest in the cash flows of an underlying stripped mortgage-backed security. If the underlying mortgage assets experience greater than anticipated prepayments of principal, the Fund may fail to fully recover its initial investment in an IO security. The market value of these securities can be extremely volatile in response to changes in interest rates. In addition, these securities present additional credit risk such that the

Fund may not receive all or part of its principal or interest payments because the borrower or issuer has defaulted on its obligation.

Interest rate swaps. Interest rate swaps represent an agreement between a Fund and counterparty to exchange cash flows based on the difference between two interest rates applied to a notional amount. The payment flows are usually netted against each other, with the difference being paid by one party to the other. The Fund settles accrued net interest receivable or payable under the swap contracts at specified, future intervals. Upfront payments made/received by the Fund are amortized/accreted for financial reporting purposes. Swaps are marked-to-market daily based upon values from third party vendors or broker quotations, and the change in value is recorded as unrealized appreciation/depreciation of swap contracts. A termination payment by the counterparty or the Fund is recorded as realized gain or loss, as well as the net periodic payments received or paid by the Fund.

18

John Hancock Income Securities Trust

As of 7-31-12 (Unaudited)

During the period ended July 31, 2012, the Fund used interest rate swaps in anticipation of rising interest rates. The following table summarizes the interest rate swap contracts held as of July 31, 2012. During the period ended July 31, 2012, the Fund held interest rate swaps with total USD notional amounts ranging from \$22.0 million to \$44.0 million as measured at each quarter end.

Counterparty	USD Notional Amount	Payments Made by Fund	Payments Received by Fund	Maturity Date	Market Value
Morgan Stanley Capital Services	\$22,000,000	Fixed 1.442500%	3 Month LIBOR (a)	Aug 2016	(\$852,856)
Morgan Stanley Capital Services	22,000,000	Fixed 1.09375%	3 Month LIBOR (a)	May 2017	(376,354)
					(\$1,229,210)

(a) At 7-31-12, the 3-month LIBOR rate was 0.44260%.

Fair value of derivative instruments by risk category

The table below summarizes the fair value of derivatives held by the Fund at July 31, 2012 by risk category:

Risk	Financial Instruments Location	Asset Derivatives Fair Value	Liability Derivatives Fair Value
Interest rate contracts	Interest Rate Swaps	-	(\$1,229,210)
