THE BLACKROCK INVESTMENT QUALITY MUNICIPAL TRUST INC.
ANNUAL REPORT TO SHAREHOLDERS
REPORT OF INVESTMENT ADVISOR

November 30, 2001

Dear Shareholder:

Economic activity slowed significantly during the annual period ended October 31, 2001, continuing the downturn that began in March 2000. The September 11 attacks on the World Trade Center and the Pentagon accelerated this decline. Inflation adjusted Gross Domestic Product (GDP) fell at a 0.4% annual rate during the third quarter, reaffirming that the economy is officially headed towards recession, which is defined as two consecutive quarters of negative growth as measured by GDP. In response to the dramatic slowdown in the U.S. economy, The Federal Reserve Board aggressively lowered interest rates over the period. In stark contrast to its three interest rate increases in February, March, and May of 2000, the Federal Open Market Committee (FOMC) has cut interest rates ten times in 2001. Year-to-date, the FOMC has reduced interest rates by 4.50%, bringing the current Federal Funds rate to 2.00%, its lowest level since September 1961.

The weakening U.S. economic environment and the accompanying Federal Reserve activity have had a positive effect on the fixed income markets. Virtually all sectors of the fixed income market, with the exception of high yield, posted double-digit returns over the annual period ended October 31, 2001. As short-term interest rates declined faster than long-term interest rates over the period, the yield curve reached historically steep levels, making it a very attractive time for leveraged bond funds. Because these funds borrow at short-term rates and invest in long-term securities, the amount they earn grows as the difference between short-term and long-term rates increases. Furthermore, inflation is anticipated to decline to multi-decade lows, which should support high-quality fixed income securities, especially those with longer maturities.

The rallies in the fixed income markets have barely offset the adverse impact of the deteriorating equity market. For the year ending October 31, 2001, the S&P 500 and Nasdaq fell 25.49% and 49.39%, respectively, and, while we believe that aggressive monetary and fiscal stimulus will help stabilize the economy, we expect growth to remain below potential for a more prolonged period. Consumption is unlikely to pick up significantly in the face of sizable job cuts, the likelihood that flexible compensation (bonus, profit sharing, options) will be sharply lower, and that state and local government spending may be significantly curtailed next year. In this environment, we expect a period of prolonged lower interest rates. Although somewhat discouraging for the American consumer, this low inflation/low interest rate environment should continue to benefit fixed income securities. We expect spread products like high quality corporates and mortgages to perform well relative to U.S. Treasuries.

This annual report contains a summary of market conditions during the annual period and a review of portfolio strategy by your Trust's managers in addition to the Trust's audited financial statements and a listing of the portfolio's holdings at October 31, 2001. Continued thanks for your confidence in BlackRock. We appreciate the opportunity to help you achieve your long-term

Edgar Filing: BLACKROCK INVESTMENT QUALITY MUNICIPAL TRUST INC - Form N-30D

investment goals.

Sincerely,

/s/ LAURENCE D. FINK

November 30, 2001

Dear Shareholder:

We are pleased to present the audited annual report for The BlackRock Investment Quality Municipal Trust Inc. (the "Trust") for the fiscal year ended October 31, 2001. We would like to take this opportunity to review the Trust's stock price and net asset value (NAV) performance, summarize developments in the fixed income markets and discuss recent portfolio management activity.

The Trust is a diversified, actively managed closed-end bond fund whose shares are traded on the New York Stock Exchange under the symbol "BKN". The Trust's investment objective is to provide high current income that is exempt from regular Federal income tax consistent with the preservation of capital. The Trust seeks to achieve this objective by investing in investment grade (rated "AAA" to "BBB" by a major rating agency or of equivalent quality) tax-exempt general obligation and revenue bonds issued by city, county and state municipalities throughout the United States.

The table below summarizes the changes in the Trust's stock price and NAV over the annual period ended October 31, 2001:

	10/31/01	10/31/00	CHANGE	HIGH	LOW
STOCK PRICE	\$13.73	\$12.125	13.24%	\$14.10	\$11.8125
NET ASSET VALUE (NAV)	\$15.19	\$14.30	6.22%	\$15.26	\$14.24

THE FIXED INCOME MARKETS

Investors' hopes for a soft landing quickly turned to fears of a recession as the U.S. economy rapidly deteriorated over the year. Prior to the events of September 11, our economic outlook envisioned an extended period of sluggish growth, with the risk of a more severe deterioration if consumer confidence and spending declined by any considerable degree. Economic data prior to the attacks suggests that the scenario of a more severe contraction may have been in the works. Year-over-year industrial production was down, 4.8% in August, the largest yearly decline since 1982. The unemployment rate had drifted up to 4.9% from a low of 3.9% in October of last year, and the four-week average of initial jobless claims rose to its highest level in nearly a decade. Consumer confidence was starting to wane, and consumer credit outstanding had begun to decline. The

events of September 11 undoubtedly further weakened consumer sentiment. The Conference Board's consumer confidence index posted its biggest one-month decline since 1990. According to the minutes of the October 2, 2001, Federal Open Market Committee meeting, "The terrorist attacks have significantly heightened uncertainty in an economy that was already weak. Business and household spending as a consequence are being further damped. Nonetheless, the long-term prospects for productivity growth and the economy remain favorable and should become evident once the unusual forces restraining demand abate." During the fiscal year ended October 31, 2001, the Federal Reserve Board aggressively lowered the Federal Funds rate by a total of 4.00% to bring it to 2.50%. On November 6, 2001, the Federal Reserve Board announced another interest rate cut, bringing the current Federal Funds rate to 2.00%.

Over the course of the year, the U.S. Treasury yield curve steepened significantly as the bond market rallied in response to the slowing U.S. economy and the aggressive interest rate cuts by the Federal Reserve. U.S. Treasury yields on the short-end of the yield curve fell sharply from a 5.91% yield on 2-year U.S. Treasuries as of October 31, 2000, to a 2.42% yield on October 31, 2001, in reaction to the Federal Reserve Board cutting short-term rates by 4%. During the period, the yield on the 10-year U.S. Treasury fell from 5.75% on October 31, 2000, to 4.23% on October 31, 2001. U.S. Treasury yields continue to fall due to further Federal Reserve easing and an anticipation of increased supply in order to raise capital to support programs implemented as a result of the tragic events that occurred on September 11, 2001. On October 31, 2001, the U.S. Treasury announced plans to stop selling 30-year U.S. Treasuries maintaining that the government "does not need the 30-year bond to meet [its] current financing needs." On the news that the U.S. Treasury would discontinue a program that issued a total of \$600 billion in debt since its official inception in 1977, the 30-year bond price increased by more than 5% and yields, which react inversely to changes in price, fell over 36 basis points. As a result, the on-the-run curve, which measures yields on newly issued U.S. Treasuries, flattened 32 basis points.

2

For the annual period ended October 31, 2001, municipal bonds outperformed the taxable domestic bond market on a tax-adjusted basis, returning 17.12% (as measured by the LEHMAN MUNICIPAL INDEX at a tax bracket of 38.6%) versus the LEHMAN AGGREGATE INDEX'S 14.56%. Cash inflows over the period increased significantly from the previous year due to turmoil in the equity markets and diversification into fixed income securities. While municipals performed in line with spread products (i.e. corporates, mortgages, etc.) and U.S. Treasuries throughout the first half of the period, the municipal yield curve steepened over the latter half of the year, and showed significant outperformance versus U.S. Treasuries. Refinancing opportunities, which are expected to reach historic levels due to falling interest rates, continue to drive the pace of new issues in the municipal market.

THE TRUST'S PORTFOLIO AND INVESTMENT STRATEGY

The Trust's portfolio is actively managed to diversify exposure to various sectors, issuers, revenue sources and security types. BlackRock's investment strategy emphasizes a relative value approach, which allows the Trust to capitalize upon changing market conditions by rotating municipal sectors, credits and coupons.

Additionally, the Trust employs leverage via auction rate preferred shares to enhance its income by borrowing at short-term municipal rates and investing the proceeds in longer maturity issues that have higher yields. The degree to which the Trust can benefit from its use of leverage may affect its ability to pay monthly income. At the end of the annual period (October 31, 2001), the

Edgar Filing: BLACKROCK INVESTMENT QUALITY MUNICIPAL TRUST INC - Form N-30D

Trust's leverage amount was approximately 36% of total assets.

Municipals outperformed most spread products on a tax-adjusted basis during the period, except on the short-end of the yield curve. The curve steepened over most of the period and the 5 to 15 year part of the curve remains very steep on a historical basis. We remain overweight in premium coupon securities in an effort to avoid potential market discount problems. Premium coupon securities offer better price performance during periods of falling interest rates, and similar performance to discounts when interest rates rise. Retail demand has been robust throughout the period, with record inflows into municipal bond funds of \$2.92 billion during the month of August 2001, the largest monthly increase since 1994. Year-to-date, net inflows into municipal bond funds is \$7.98 billion.

The following charts compare the Trust's asset composition and credit quality allocations:

PRIVACY PRINCIPLES OF THE TRUST

The Trust is committed to maintaining the privacy of shareholders and to safeguarding its non-public personal information. The following information is provided to help you understand what personal information the Trust collects, how we protect that information and why, in certain cases, we may share information with select other parties.

Generally, the Trust does not receive any non-public personal information relating to its shareholders, although certain nonpublic personal information of its shareholders may become available to the Trust. The Trust does not disclose any non-public personal information about its shareholders or former shareholders to anyone, except as permitted by law or as is necessary in order to service shareholder accounts (for example, to a transfer agent or third party administrator).

The Trust restricts access to non-public personal information about the shareholders to BlackRock employees with a legitimate business need for the information. The Trust maintains physical, electronic and procedural safeguards designed to protect the non-public personal information of its shareholders.

-
- (1) Effective November 1, 2000, the Trust adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies and began amortizing market discount on debt securities. The effect of this accounting policy change had no impact on the total net assets of the Trust. The reclass of this change for the year ended October 31, 2001 to the net investment income from net realized and unrealized gains and losses per common share were \$0.007 per share. The ratio of net investment income to average net assets on common shares increased from 6.11% to 6.16% and from 8.05% to 8.10% on net investment income before preferred stock dividends. Per share, ratios and supplemental data for prior periods have not been restated to reflect this change in presentation.
 - (2) Net asset value and market value are published in BARRON'S on Saturday and THE WALL STREET JOURNAL on Monday.
 - (3) Total investment return is calculated assuming a purchase of common stock at the current market price on the first day and a sale at the current market price on the last day of the year reported. Dividends and distributions, if any, are assumed for purposes of this calculation to be reinvested at prices obtained under the Trust's dividend reinvestment plan. Total investment return does not reflect brokerage commissions. Past performance is not a guarantee of future results.
 - (4) Ratios are calculated on the basis of income and expenses applicable to both the common and preferred stock relative to the average net assets of common shareholders.

The information above represents the audited operating performance data for a share of common stock outstanding, total investment return, ratios to average net assets and other supplemental data for the years indicated. This information has been determined based upon financial information provided in the financial statements and market value data for the Trust's common shares.

See Notes to Financial Statements.

THE BLACKROCK INVESTMENT
 QUALITY MUNICIPAL TRUST INC.
 NOTES TO FINANCIAL STATEMENTS

NOTE 1. ORGANIZATION
 & ACCOUNTING
 POLICIES

The BlackRock Investment Quality Municipal Trust Inc. (the "Trust") was organized in Maryland on November 19, 1992 as a diversified, closed-end management investment company. The Trust's investment objective is to manage a portfolio of investment quality securities while providing high current income exempt from regular Federal income tax consistent with the preservation of capital. The ability of issuers of debt securities held by the Trust to meet their obligations may be affected by economic developments in a specific

Edgar Filing: BLACKROCK INVESTMENT QUALITY MUNICIPAL TRUST INC - Form N-30D

industry or region. No assurance can be given that the Trust's investment objective will be achieved.

The following is a summary of significant accounting policies followed by the Trust.

SECURITIES VALUATION: Municipal securities (including commitments to purchase such securities on a "when-issued" basis) are valued on the basis of prices provided by dealers or pricing services approved by the Trust's Board of Directors. In determining the value of a particular security, pricing services may use certain information with respect to transactions in such securities, quotations from bond dealers, market transactions in comparable securities and various relationships between securities in determining values. Short-term securities are valued at amortized cost. Any securities or other assets for which such current market quotations are not readily available are valued at fair value as determined in good faith under procedures established by and under the general supervision and responsibility of the Trust's Board of Directors.

SECURITIES TRANSACTIONS AND INVESTMENT INCOME: Securities transactions are recorded on the trade date. Realized and unrealized gains and losses are calculated on the identified cost basis. The Trust also records interest income on the accrual basis and amortizes premium and accretes discount, respectively, to interest income on securities purchased using the interest method.

FEDERAL INCOME TAXES: It is the Trust's intention to continue to meet the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute sufficient net income to shareholders. For this reason and because substantially all of the Trust's gross income consists of tax-exempt interest, no Federal income tax provision is required.

RECLASSIFICATION OF CAPITAL ACCOUNTS: The Trust accounts for and reports distributions to shareholders in accordance with the American Institute of Certified Public Accountants' Statement of Position 93-2: Determination, Disclosure and Financial Statement of Income, Capital Gain and Return of Capital Distributions by Investment Companies. For the year ended October 31, 2001, the Trust decreased undistributed net investment income and decrease accumulated net realized loss by \$5,554. Net investment, net realized losses and net assets were not affected by this change.

DIVIDENDS AND DISTRIBUTIONS: The Trust declares and pays dividends and distributions to common shareholders monthly from net investment income, net realized short-term capital gains and other sources, if necessary. Net long-term capital gains, if any, in excess of loss carryforwards may be distributed annually. Dividends and distributions are recorded on the ex-dividend date. Dividends and distributions to preferred shareholders are accrued and determined as described in Note 4.

ESTIMATES: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

DEFERRED COMPENSATION PLAN: Under a deferred compensation plan approved by the Board of Directors on February 24, 2000, non-interested Directors may elect to defer receipt of all or a portion of their annual compensation.

Deferred amounts earn a return for the Directors as though equivalent dollar amounts had been invested in common shares of other BlackRock funds selected by the Directors. This has the same economic effect for the Directors as if the

Edgar Filing: BLACKROCK INVESTMENT QUALITY MUNICIPAL TRUST INC - Form N-30D

Directors had invested the deferred amounts in such other BlackRock funds.

The deferred compensation plan is not funded and obligations thereunder represent general unsecured claims against the general assets of the Trust. The Trust may, however, elect to invest in common shares of those funds selected by the Directors in order to match its deferred compensation obligations.

NEW ACCOUNTING POLICIES: Effective November 1, 2000, the Trust has adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies, as revised, and began accreting market discount on debt securities. Prior to November 1, 2000, the Trust amortized premiums and original issue discount on debt securities. The cumulative effect of this accounting policy change had no impact on the total net assets of the Trust. This resulted in a \$432,905 increase to undistributed net investment income and a corresponding decrease in net unrealized appreciation, based on securities held by the Trust on October 31, 2001. The Statement of Changes in Net Investment Assets and the Financial Highlights of the Trust for prior periods have not been restated to reflect this change.

14

The effect of this change for the year ended October 31, 2001 was to increase net investment income by \$112,511, decrease net unrealized appreciation by \$106,957 and decrease net realized gains by \$5,554.

NOTE 2. AGREEMENTS

The Trust has an Investment Advisory Agreement with BlackRock Advisors, Inc., (the "Advisor"), which is a wholly-owned subsidiary of BlackRock, Inc., which in turn is an indirect, majority-owned subsidiary of PNC Financial Services Group, Inc. The Trust has an Administration Agreement with Princeton Administrators, L.P. (the "Administrator"), an indirect wholly-owned affiliate of Merrill Lynch & Co., Inc.

The investment advisory fee paid to the Advisor is computed weekly and payable monthly at an annual rate of 0.35% Of the Trust's average weekly net investment assets. The administration fee paid to the administrator is also computed weekly and payable monthly at an annual rate of 0.15% Of the Trust's average weekly net investment assets, subject to a minimum monthly fee of \$12,500.

Pursuant to the agreements, the Advisor provides continuous supervision of the investment portfolio and pays the compensation of officers of the Trust who are affiliated persons of the Advisor. The Administrator pays occupancy and certain clerical and accounting costs of the Trust. The Trust bears all other costs and expenses.

NOTE 3. PORTFOLIO SECURITIES

Purchases and sales of investments, other than short-term investments, for the year ended October 31, 2001, aggregated \$18,303,540 and \$16,467,288, respectively.

The Trust may invest in securities which are not readily marketable, including those which are restricted as to disposition under securities law ("restricted securities"). At October 31, 2001, the Trust held 6% of its net assets in securities restricted as to resale.

The Federal income tax basis of the Trust's investments at October 31, 2001

Edgar Filing: BLACKROCK INVESTMENT QUALITY MUNICIPAL TRUST INC - Form N-30D

was \$375,001,373, and accordingly, net unrealized appreciation was \$24,958,973 (gross unrealized appreciation--\$27,577,561, gross unrealized depreciation--\$2,618,588).

For Federal income tax purposes, the Trust had a capital loss carryforward at October 31, 2001 of approximately \$5,514,000 of which \$312,000 will expire in 2007, \$5,068,000 will expire in 2008 and \$134,000 will expire in 2009. Accordingly, no capital gain distribution is expected to be paid to shareholders until net gains have been realized in excess of such amount.

NOTE 4. CAPITAL

There are 200 million shares of \$.01 par value common stock authorized. The Trust may classify or reclassify any unissued shares of common stock into one or more series of preferred stock. Of the 16,707,093 common shares outstanding at October 31, 2001, the Advisor owned 7,205 shares. As of October 31, 2001, there were 5,862 shares of preferred stock outstanding as follows: Series T7--3,262 and Series T28--2,600, which includes 662 shares of series T7 issued on March 10, 2000.

On March 10, 2000, the Trust reclassified 662 shares of common stock and issued an additional 662 shares of Series T7 preferred stock. The additional shares issued have identical rights and features of the existing Series T7 preferred stock. Offering cost of \$145,626 and underwriting discount of \$165,500 have been charged to paid-in capital in excess of par of the common shares.

Dividends on Series T7 are cumulative at a rate which is reset every 7 days based on the results of an auction. Dividends on Series T28 are also cumulative at a rate which is reset every 28 days based on the results of an auction. Dividend rates ranged from 1.65% to 5.10% during the year ended October 31, 2001.

The Trust may not declare dividends or make other distributions on shares of common stock or purchase any such shares if, at the time of the declaration, distribution, or purchase, asset coverage with respect to the outstanding preferred stock would be less than 200%.

The preferred stock is redeemable at the option of the Trust, in whole or in part, on any dividend payment date at \$25,000 per share plus any accumulated or unpaid dividends whether or not declared. The preferred stock is also subject to mandatory redemption at \$25,000 per share plus any accumulated or unpaid dividends, whether or not declared, if certain requirements relating to the composition of the assets and liabilities of the Trust as set forth in the Articles of Incorporation are not satisfied.

The holders of preferred stock have voting rights equal to the holders of common stock (one vote per share) and will vote together with holders of shares of common stock as a single class. However, holders of preferred stock are also entitled to elect two of the Trust's directors. In addition, the Investment Company Act of 1940 requires that along with approval by stockholders that might otherwise be required, the approval of the holders of a majority of any outstanding preferred stock, voting separately as a class would be required to (a) adopt any plan of reorganization that would adversely affect the preferred stock, and (b) take any action requiring a vote of security holders, including, among other things, changes in the Trust's subclassification as a closed-end investment company or changes in its fundamental investment restrictions.

NOTE 5. DIVIDENDS AND DISTRIBUTIONS

Edgar Filing: BLACKROCK INVESTMENT QUALITY MUNICIPAL TRUST INC - Form N-30D

Subsequent to October 31, 2001, the Board of Directors of the Trust declared a dividend from undistributed earnings of \$0.065 per common share payable December 3, 2001, to shareholders of record on November 15, 2001.

For the period November 1, 2001 to November 30, 2001, dividends declared on preferred stock totaled \$199,811 in aggregate for the two outstanding preferred stock series.

15

THE BLACKROCK INVESTMENT QUALITY MUNICIPAL TRUST INC.
REPORT OF INDEPENDENT AUDITORS

To the Shareholders and Board of Directors of
The BlackRock Investment Quality Municipal Trust Inc.

We have audited the accompanying statement of assets and liabilities of The BlackRock Investment Quality Municipal Trust Inc. (the "Trust"), including the portfolio of investments, as of October 31, 2001, and the related statement of operations for the year then ended, the statements of changes in net investments assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of October 31, 2001, by correspondence with the custodian and brokers; where replies were not received from brokers, we performed other auditing procedures. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of The BlackRock Investment Quality Municipal Trust Inc. as of October 31, 2001, the results of its operations for the year then ended, the changes in its net investments assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

/s/ DELOITTE & TOUCHE LLP

Boston, Massachusetts
December 7, 2001

THE BLACKROCK INVESTMENT QUALITY MUNICIPAL TRUST INC.
TAX INFORMATION

We are required by the Internal Revenue Code to advise you within 60 days of the Trust's fiscal year end (October 31, 2001) as to the federal tax status of dividends you received during such fiscal year. Accordingly, during the year the Trust paid Federal tax-exempt dividends of \$0.7800 per share to common shareholders and \$831.49 per share to preferred shareholders.

For purposes of preparing your annual Federal income tax return, you should report the amounts as reflected on the appropriate Form 1099-DIV or substitute 1099-DIV.

DIVIDEND REINVESTMENT PLAN

Pursuant to the Trust's Dividend Reinvestment Plan (the "Plan"), shareholders are automatically enrolled to have all distributions of dividends and capital gains reinvested by EquiServe Trust Company, N.A. (the "Plan Agent") in Trust shares pursuant to the Plan. Shareholders who elect not to participate in the Plan will receive all distributions in cash paid by check in United States dollars mailed directly to the shareholders of record (or if the shares are held in street or other nominee name, then to the nominee) by the Transfer Agent, as dividend disbursing agent.

The Plan Agent serves as agent for the shareholders in administering the Plan. After the Trust declares a dividend or determines to make a capital gain distribution, the Plan Agent will, as agent for the participants, receive the cash payment and use it to buy Trust shares in the open market on the New York Stock Exchange or elsewhere, for the participants' accounts. The Trust will not issue any new shares under the Plan.

Participants in the Plan may withdraw from the Plan upon written notice to the Plan Agent and will receive certificates for whole Trust shares and a cash payment for any fraction of a Trust share.

The Plan Agent's fees for the handling of the reinvestment of dividends and distributions will be paid by the Trust. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent's open market purchases in connection with the reinvestment of dividends and distributions. The automatic reinvestment of dividends and distributions will not relieve participants of any Federal income tax that may be payable on such dividends or distributions.

The Trust reserves the right to amend or terminate the Plan as applied to any dividend or distribution paid subsequent to written notice of the change sent to all shareholders of the Trust at least 90 days before the record date

for the dividend or distribution. The Plan also may be amended or terminated by the Plan Agent upon at least 90 days' written notice to all shareholders of the Trust. All correspondence concerning the Plan should be directed to the Plan Agent at (800) 699-1BFM. The address is on the front of this report.

ADDITIONAL INFORMATION

There have been no material changes in the Trust's investment objectives or policies that have not been approved by the shareholders or to its charter or by-laws or in the principal risk factors associated with investment in the Trust. There have been no changes in the persons who are primarily responsible for the day-to-day management of the Trust's portfolio.

Quarterly performance and other information regarding the Trust may be found on BlackRock's website, which can be accessed at <http://www.blackrock.com/funds/cefunds.html>. This reference to BlackRock's website is intended to allow investors public access to quarterly information regarding the Trust and is not intended to incorporate BlackRock's website into this report.

17

THE BLACKROCK INVESTMENT QUALITY MUNICIPAL TRUST INC.
INVESTMENT SUMMARY

THE TRUST'S INVESTMENT OBJECTIVE

The BlackRock Investment Quality Municipal Trust's investment objective is to provide current income exempt from regular Federal income tax consistent with the preservation of capital.

WHO MANAGES THE TRUST?

BlackRock Advisors, Inc. (the "Advisor") manages the Trust. The Advisor is a wholly-owned subsidiary of BlackRock, Inc. ("BlackRock"), which is one of the largest publicly traded investment management firms in the United States with \$226 billion of assets under management as of September 30, 2001. BlackRock manages assets on behalf of more than 3,300 institutions and 200,000 individuals worldwide through a variety of equity, fixed income, liquidity and alternative investment separate accounts and mutual funds, including BLACKROCK FUNDS and BLACKROCK PROVIDENT INSTITUTIONAL FUNDS. In addition, BlackRock provides risk management and investment system services to institutional investors under the BLACKROCK SOLUTIONS name. Clients are served from the Company's headquarters in New York City, as well as offices in Wilmington, DE, San Francisco, Edinburgh, Scotland, Tokyo, Japan and Hong Kong. BlackRock is a member of The PNC Financial Services Group, Inc. (NYSE: PNC), one of the largest diversified financial services organizations in the United States, and is majority-owned by PNC and by BlackRock employees.

WHAT CAN THE TRUST INVEST IN?

Edgar Filing: BLACKROCK INVESTMENT QUALITY MUNICIPAL TRUST INC - Form N-30D

Under normal conditions, the Trust expects to continue to manage its assets so that at least 80% of its investments are rated at least investment grade ("BBB" by Standard & Poor's or "Baa" by Moody's Investor Services) and up to 20% of its assets may instead be deemed to be of equivalent credit quality by the Advisor. Examples of the types of securities that the Trust may invest in include general obligation bonds, which are backed by the full taxing power of the municipality (states, counties and cities), and revenue bonds, which are backed by a revenue source associated with the issuing municipality or by a special tax. Revenue bonds include those that are backed by revenues generated by universities, hospitals, housing developments, utilities, public facilities, toll roads, airports, etc.

WHAT IS THE ADVISOR'S INVESTMENT STRATEGY?

The Advisor will manage the assets of the Trust in accordance with the Trust's investment objective and policies to seek to achieve its objective by investing in municipal debt securities that are diversified both geographically and according to revenue source. As such, the Advisor actively manages the assets in relation to market conditions and interest rate changes. In seeking the investment objective, the Trust does not expect to invest more than 25% of its total assets in municipals that are issued by the same state. Depending on yield and portfolio allocation considerations, the Advisor may choose to invest a portion of the Trust's assets in securities which pay interest that is subject to AMT (alternative minimum tax).

Under current market conditions the use of leverage increases the income earned by the Trust. The Trust employs leverage primarily through the issuance of preferred stock. Preferred stockholders will receive dividends based on short-term rates in exchange for allowing the Trust to borrow additional assets. These assets will be invested in longer-term assets which typically offer higher interest rates and the difference between the cost of the dividends paid to preferred stockholders and the interest earned on the longer-term securities will provide higher income levels for common stockholders in most interest rate environments. See "Leverage Considerations in the Trust".

HOW ARE THE TRUST'S SHARES PURCHASED AND SOLD? DOES THE TRUST PAY DIVIDENDS REGULARLY?

The Trust's common shares are traded on the New York Stock Exchange which provides investors with liquidity on a daily basis. Orders to buy or sell shares of The Trust must be placed through a registered broker or financial advisor. The Trust pays monthly dividends which are typically paid on the first business day of the month. For shares held in the shareholder's

18

name, dividends may be reinvested in additional shares of the Trust through the Trust's transfer agent, EquiServe Trust Company, N.A. Investors who wish to hold shares in a brokerage account should check with their financial advisor to determine whether their brokerage firm offers dividend reinvestment services.

LEVERAGE CONSIDERATIONS IN THE TRUST

Leverage increases the duration (or price sensitivity of the net assets with respect to changes in interest rates) of the Trust, which can improve the performance of the Trust in a declining rate environment, but can cause net assets to decline faster than the market in a rapidly rising interest rate environment. The Trust may reduce, or unwind, the amount of leverage employed should the Advisor consider that reduction to be in the best interests of the Trust. The Advisor's portfolio managers continuously monitor and regularly

Edgar Filing: BLACKROCK INVESTMENT QUALITY MUNICIPAL TRUST INC - Form N-30D

review the Trust's use of leverage and maintain the ability to unwind the leverage if that course is chosen.

SPECIAL CONSIDERATIONS AND RISK FACTORS RELEVANT TO THE TRUST

THE TRUST IS INTENDED TO BE A LONG-TERM INVESTMENT AND IS NOT A SHORT-TERM TRADING VEHICLE.

INVESTMENT OBJECTIVE. Although the objective of the Trust is to provide current income exempt from regular Federal income tax consistent with the preservation of capital, there can be no assurance that this objective will be achieved.

DIVIDEND CONSIDERATIONS. The income and dividends paid by the Trust are likely to vary over time as fixed income market conditions change. Future dividends may be higher or lower than the dividend the Trust is currently paying.

LEVERAGE. The Trust utilizes leverage through the issuance of preferred stock, which involves special risks. The Trust's net asset value and market value maybe more volatile due to its use of leverage.

MARKET PRICE OF SHARES. The shares of closed-end investment companies such as the Trust trade on the New York Stock Exchange (NYSE symbol: BKN) and as such are subject to supply and demand influences. As a result, shares may trade at a discount or a premium to their net asset value.

INVESTMENT GRADE MUNICIPAL OBLIGATIONS. The value of municipal debt securities generally varies inversely with changes in prevailing market interest rates. Depending on the amount of call protection that the securities in the Trust have, the Trust may be subject to certain reinvestment risks in environments of declining interest rates.

ILLIQUID SECURITIES. The Trust may invest in securities that are illiquid, although under current market conditions the Trust expects to do so to only a limited extent. These securities involve special risks.

ANTITAKEOVER PROVISIONS. Certain antitakeover provisions will make a change in the Trust's business or management more difficult without the approval of the Trust's Board of Directors and may have the effect of depriving shareholders of an opportunity to sell their shares at a premium above the prevailing market price.

THE BLACKROCK INVESTMENT QUALITY MUNICIPAL TRUST INC. GLOSSARY

CLOSED-END FUND:	Investment vehicle which initially offers a fixed number of shares and trades on a stock exchange. The fund invests in a portfolio of securities in accordance with its stated investment objectives and policies.
DISCOUNT:	When a fund's net asset value is greater than its stock price the fund is said to be trading at a discount.
DIVIDEND:	Income generated by securities in a portfolio and distributed to shareholders after the deduction of

Edgar Filing: BLACKROCK INVESTMENT QUALITY MUNICIPAL TRUST INC - Form N-30D

expenses. This Trust declares and pays dividends to common shareholders on a monthly basis.

DIVIDEND REINVESTMENT: Shareholders may have all dividends and distributions of capital gains automatically reinvested into additional shares of a fund.

MARKET PRICE: Price per share of a security trading in the secondary market. For a closed-end fund, this is the price at which one share of the fund trades on the stock exchange. If you were to buy or sell shares, you would pay or receive the market price.

NET ASSET VALUE (NAV): Net asset value is the total market value of all securities and other assets held by the Trust, plus income accrued on its investments, minus any liabilities including accrued expenses, divided by the total number of outstanding common shares. It is the underlying value of a single common share on a given day. Net asset value for the Trust is calculated weekly and published in BARRON'S on Saturday and THE WALL STREET JOURNAL on Monday.

PREMIUM: When a fund's stock price is greater than its net asset value, the fund is said to be trading at a premium.

PREREFUNDED BONDS: These securities are collateralized by U.S. Government securities which are held in escrow and are used to pay principal and interest on the tax-exempt issue and retire the bond in full at the date indicated, typically at a premium to par.

BLACKROCK ADVISORS, INC. AN OVERVIEW

BlackRock Advisors, Inc. (the "Advisor") manages the Trust. The Advisor is a wholly-owned subsidiary of BlackRock, Inc. ("BlackRock"), which is one of the largest publicly traded investment management firms in the United States with \$226 billion of assets under management as of September 30, 2001. BlackRock manages assets on behalf of more than 3,300 institutions and 200,000 individuals worldwide through a variety of equity, fixed income, liquidity and alternative investment separate accounts and mutual funds, including the BLACKROCK FUNDS and BLACKROCK PROVIDENT INSTITUTIONAL FUNDS. In addition, BlackRock provides risk

Edgar Filing: BLACKROCK INVESTMENT QUALITY MUNICIPAL TRUST INC - Form N-30D

management and investment system services to institutional investors under the BLACKROCK SOLUTIONS name. Clients are served from the Company's headquarters in New York City, as well as offices in Wilmington, DE, San Francisco, Edinburgh, Scotland, Tokyo, Japan, and Hong Kong. BlackRock is a member of The PNC Financial Services Group (NYSE: PNC), one of the largest diversified financial services organizations in the United States, and is majority-owned by PNC and by BlackRock employees.

BlackRock's fixed income product was introduced in 1988 by a team of highly seasoned fixed income professionals. These professionals had extensive experience creating, analyzing and trading a variety of fixed income instruments, including the most complex structured securities. In fact, several individuals at BlackRock were responsible for developing many of the major innovations in the mortgage-backed and asset-backed securities markets, including the creation of the first CMO, the floating rate CMO, the senior/subordinated pass-through and the multi-class asset-backed security.

BlackRock is unique among asset management and advisory firms in the emphasis it places on the development of proprietary analytical capabilities. Over one quarter of the firm's professionals is dedicated to the design, maintenance and use of these systems, which are not otherwise available to investors. BlackRock's proprietary analytical tools are used for evaluating, and designing fixed income investment strategies for client portfolios. Securities purchased include mortgages, corporate bonds, municipal bonds and a variety of hedging instruments.

BlackRock has developed investment products that respond to investors' needs and has been responsible for several major innovations in closed-end funds. In fact, BlackRock introduced the first closed-end mortgage fund, the first taxable and tax-exempt closed-end funds to offer a finite term, the first closed-end fund to achieve a AAA rating by Standard & Poor's, and the first closed-end fund to invest primarily in North American Government securities. Currently, BlackRock's closed-end funds have dividend reinvestment plans, which are designed to provide ongoing demand for the stock in the secondary market. BlackRock manages a wide range of investment vehicles, each having specific investment objectives and policies.

In view of our continued desire to provide a high level of service to all our shareholders, BlackRock maintains a toll-free number for your questions. The number is (800) 227-7BFM (7236). We encourage you to call us with any questions that you may have about your BlackRock funds and we thank you for the continued trust that you place in our abilities.
