THE GABELLI GLOBAL UTILITY & INCOME TRUST
NOTES TO SCHEDULE OF INVESTMENTS (UNAUDITED)

1. SECURITY VALUATION. Portfolio securities listed or traded on a nationally recognized securities exchange or traded in the U.S. over-the-counter market for which market quotations are readily available are valued at the last quoted sale price or a market's official closing price as of the close of business on the day the securities are being valued. If there were no sales that day, the security is valued at the average of the closing bid and asked prices or, if there were no asked prices quoted on that day, then the security is valued at the closing bid price on that day. If no bid or asked prices are quoted on such day, the security is valued at the most recently available price or, if the Board of Trustees (the "Board") so determines, by such other method as the Board shall determine in good faith to reflect its fair market value. Portfolio securities traded on more than one national securities exchange or market are valued according to the broadest and most representative market, as determined by Gabelli Funds, LLC, the Adviser.

Portfolio securities primarily traded on a foreign market are generally valued at the preceding closing values of such securities on the relevant market, but may be fair valued pursuant to procedures established by the Board if market

Edgar Filing: GABELLI GLOBAL UTILITY & INCOME TRUST - Form N-Q

conditions change significantly after the close of the foreign market but prior to the close of business on the day the securities are being valued. Debt instruments with remaining maturities of 60 days or less that are not credit impaired are valued at amortized cost, unless the Board determines such amount does not reflect the securities' fair value, in which case these securities will be fair valued as determined by the Board. Debt instruments having a maturity greater than 60 days for which market quotations are readily available are valued at the average of the latest bid and asked prices. If there were no asked prices quoted on such day, the security is valued using the closing bid price. Futures contracts are valued at the closing settlement price of the exchange or board of trade on which the applicable contract is traded.

Securities and assets for which market quotations are not readily available are fair valued as determined by the Board.

ADOPTION OF STATEMENT OF FINANCIAL ACCOUNTING STANDARDS NO. 157 "FAIR VALUE MEASUREMENTS" ("SFAS 157")

On January 1, 2008, the Fund adopted SFAS 157 that clarifies the definition of fair value for financial reporting, establishes a framework for measuring fair value, and requires additional disclosures about the use of fair value measurements. The three levels of the fair value hierarchy under SFAS 157 are described below:

- o Level 1 - quoted prices in active markets for identical securities;
- o Level 2 - other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.); and
- o Level 3 - significant unobservable inputs (including the Fund's determinations as to the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The summary of inputs used to value the Fund's net assets as of March 31, 2008 is as follows:

VALUATION INPUTS	INVESTMENTS IN SECURITIES (MARKET VALUE)	OTHER FINANCIAL INSTR (UNREALIZED DEPRECIATION)
Level 1 - Quoted Prices	\$62,889,750	--
Level 2 - Other Significant Observable Inputs	6,392,964	\$(16,727)
Total	\$69,282,714	\$(16,727)

* Other financial instruments are derivative instruments not reflected in the Schedule of Investments, such as futures, forwards and swaps which are valued at the unrealized appreciation/depreciation on the investment.

NOTES TO SCHEDULE OF INVESTMENTS (CONTINUED) (UNAUDITED)

2. SWAP AGREEMENTS. The Fund may enter into equity and contract for difference swap transactions. The use of swaps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio security transactions. In a swap, a set of future cash flows are exchanged between two counterparties. One of these cash flow streams will typically be based on a reference interest rate combined with the performance of a notional value of shares of a stock. The other will be based on the performance of the shares of a stock. There is no assurance that the swap contract counterparties will be able to meet their obligations pursuant to the swap contracts, or that, in the event of default, the Fund will succeed in pursuing contractual remedies. The Fund thus assumes the risk that it may be delayed in or prevented from obtaining payments owed to it pursuant to the swap contracts. The creditworthiness of the swap contract counterparties is closely monitored in order to minimize the risk. Depending on the general state of short-term interest rates and the returns of the Fund's portfolio securities at that point in time, such a default could negatively affect the Fund's ability to make dividend payments. In addition, at the time a swap transaction reaches its scheduled termination date, there is a risk that the Fund will not be able to obtain a replacement transaction or that the terms of the replacement will not be as favorable as on the expiring transaction.

The use of derivative instruments may involve, to varying degrees, elements of market and counterparty risk in excess of the amount recognized below.

The Fund has entered into a contract for difference swap agreement with Bear, Stearns International Limited. Details of the swap at March 31, 2008 is as follows:

NOTIONAL AMOUNT	EQUITY SECURITY RECEIVED	INTEREST RATE/ EQUITY SECURITY PAID	TERMINATION DATE
\$304,233 (36,000 shares)	Market Value Appreciation on: Rolls-Royce Group plc	Overnight LIBOR plus 40 bps plus Market Value Depreciation on: Rolls-Royce Group plc	03/17/09

3. TAX INFORMATION. Under the current tax law, capital and currency losses realized after October 31 and prior to the Fund's fiscal year end may be deferred as occurring on the first day of the following fiscal year. Post October capital losses at the fiscal year ended December 31, 2007 were \$10,785.
