PROVIDENT FINANCIAL HOLDINGS, INC. REPORTS RECORD FISCAL YEAR EARNINGS

Record Fiscal Year Net Income of \$20.5 Million, Up 10%.

Preferred Loans Grow to 34% of Loans Held for Investment.

Riverside, Calif. - July 24, 2006 - Provident Financial Holdings, Inc. ("Company"), NASDAQ GSM: PROV, the holding company for Provident Savings Bank, F.S.B. ("Bank"), today announced solid earnings for the fourth quarter and record earnings for the fiscal year ended June 30, 2006.

For the quarter ended June 30, 2006, the Company reported net income of \$3.82 million, or \$0.56 per diluted share (on 6.88 million weighted-average shares outstanding), compared to net income of \$4.83 million, or \$0.68 per diluted share (on 7.08 million weighted-average shares outstanding), in the comparable period a year ago. The decrease in weighted-average shares outstanding primarily reflects the activity in the Company's stock repurchase program.

"It is fitting to report record earnings this year since Provident Bank is celebrating its 50-year anniversary of serving the communities of the Inland Empire," said Craig G. Blunden, Chairman, President and Chief Executive Officer of the Company. "Our longevity and performance, of course, would not have been possible without the commitment and dedication of our talented employees and the loyalty of our customers. We look forward to growing with these communities in the future."

Return on average assets for the fourth quarter of fiscal 2006 was 0.96 percent, compared to 1.22 percent for the same period of fiscal 2005. Return on average stockholders' equity for the fourth quarter of fiscal 2006 was 11.20 percent, compared to 15.93 percent for the comparable period of fiscal 2005.

On a sequential quarter basis, net income for the fourth quarter of fiscal 2006 increased by \$424,000 to \$3.82 million, or 12 percent, from \$3.40 million in the third quarter of fiscal 2006; and diluted earnings per share increased \$0.07 to \$0.56, or 14 percent, from \$0.49 in the third quarter of fiscal 2006. Return on average assets increased seven basis points to 0.96 percent for the fourth quarter of fiscal 2006 from 0.89 percent in the third quarter of fiscal 2006 and return on average equity increased 103 basis points to 11.20 percent for the fourth quarter of fiscal 2006 from 10.17 percent in the third quarter of fiscal 2006.

For the fiscal year ended June 30, 2006, net income was \$20.54 million, an increase of 10 percent from net income of \$18.70 million for the comparable period ended June 30, 2005; and diluted earnings per share for the fiscal year ended June 30, 2006 increased \$0.34, or 13 percent, to \$2.98 from \$2.64 for the comparable period last year. The sale of a commercial office building in the second quarter of fiscal 2006 resulted in a gain on sale of real estate of \$6.28 million (approximately \$3.64 million, net of statutory taxes) which contributed \$0.53 to the diluted earnings per share. Return on average assets for the fiscal year ended June 30, 2006 increased five basis points to 1.30 percent from 1.25 percent for the twelve-month period a year earlier. Return on average stockholders' equity for the fiscal year ended June 30, 2006 was 15.71 percent, compared to 16.10 percent for the twelve-month period a year earlier.

Net interest income before provision for loan losses decreased \$228,000, or two percent, to \$10.93 million in the fourth quarter of fiscal 2006 from \$11.16 million for the same period in fiscal 2005. Non-interest income decreased \$1.83 million, or 28 percent, to \$4.63 million in the fourth quarter of fiscal 2006 from \$6.46 million in the comparable period of fiscal 2005. Non-interest expense increased \$31,000, or less than one percent, to \$8.95 million in the fourth quarter of fiscal 2006 from \$8.92 million in the comparable period in fiscal 2005. The non-interest expense in the fourth quarter of fiscal 2006 includes the Company's contribution of \$500,000 to capitalize the newly established "Provident Savings Bank Charitable Foundation," which decreased diluted earnings per share by approximately \$0.04 (net of statutory taxes).

The average balance of loans outstanding increased by \$67.6 million to \$1.32 billion in the fourth quarter of fiscal 2006 from \$1.26 billion in the same quarter of fiscal 2005, and the average yield increased by 41 basis points to 6.22 percent in the fourth quarter of fiscal 2006 from an average yield of 5.81 percent in the same quarter of fiscal 2005. The increase in the average loan yield was primarily attributable to higher rate new loans and the repricing of existing adjustable rate loans in the loans held for investment portfolio, partly offset by loan prepayments with a higher average yield than the weighted-average yield of the loans held for investment portfolio. Total loans held for investment originations (including loans purchased for investment) in the fourth quarter of fiscal 2006 were \$161.5 million, which consisted primarily of single-family, multi-family, construction and commercial real estate loans. This compares to total loans held for investment originations (including loans purchased for investment) of \$169.0 million in the fourth quarter of fiscal 2005. The outstanding balance of "preferred loans" (multi-

Page 3 of 15

<PAGE>

family, commercial real estate, construction and commercial business loans) increased by \$112.0 million, or 35 percent, to \$433.8 million at June 30, 2006 from \$321.8 million at June 30, 2005. The ratio of preferred loans to total loans held for investment increased to 34 percent at June 30, 2006 compared to 28 percent at June 30, 2005. Loan prepayments in the fourth quarter of fiscal 2006 were \$100.8 million, compared to \$126.2 million in the same quarter of fiscal 2005.

Average deposits decreased by \$10.5 million to \$922.9 million and the average cost of deposits increased by 76 basis points to 2.71 percent in the fourth quarter of fiscal 2006, compared to an average balance of \$933.4 million and an average cost of 1.95 percent in the same quarter last year. Transaction account balances (core deposits) decreased by \$93.2 million, or 19 percent, to \$391.1 million at June 30, 2006 from \$484.3 million at June 30, 2005. The decrease is attributable to a decline in money market and savings account balances, partly offset by an increase in checking account balances. Time deposits increased by \$92.2 million, or 21 percent, to \$526.5 million at June 30, 2006 as compared to \$434.3 million at June 30, 2005. The increase is primarily attributable to the Company's successful time deposit marketing campaign and depositors switching from savings deposits to time deposits.

The average balance of borrowings, which primarily consists of FHLB advances, remained unchanged at \$503.6 million, while the average cost of advances increased 47 basis points to 4.41 percent in the fourth quarter of fiscal 2006 from 3.94 percent in the same quarter of fiscal 2005. The increase in the average cost of borrowings was primarily the result of higher interest rates on short-term advances.

Page 4 of 15

<PAGE>

The net interest margin during the fourth quarter of fiscal 2006 decreased eight basis points to 2.82 percent from 2.90 percent during the same quarter last year. On a sequential quarter basis, the net interest margin in the fourth quarter of fiscal 2006 decreased 18 basis points from 3.00 percent in the third quarter of fiscal 2006.

During the fourth quarter of fiscal 2006, the Company recorded a recovery of \$205,000, compared to a loan loss provision of \$335,000 during the same period of fiscal 2005. The recovery was primarily attributable to revisions in the methodology used to calculate the allowance for loan losses (\$357,000) and the decline in classified assets (\$426,000), partly offset by an increase in loans held for investment (\$578,000). In the fourth quarter of fiscal 2006, the Company revised its allowance for loan losses methodology by increasing the factors used to calculate the loan loss provision for single-family and construction loans while decreasing the factors used to calculate the loan loss provision for multi-family and commercial real estate loans. This action was taken as a result of the concentration of single-family loans with an interest-only payment feature, current real estate markets, mortgage interest rates, the general economic environment and our experience and expectations for loan losses by loan product type in the current environment. Total classified assets (including assets designated as special mention) improved by \$2.0 million to \$9.3 million at June 30, 2006 from \$11.3 million at March 31, 2006. Loans held for investment increased \$57.9 million (primarily in preferred loans) to \$1.26 billion at June 30, 2006 from \$1.21 billion at March 31, 2006. The allowance for loan losses is considered sufficient by management to absorb potential losses inherent in loans held for investment.

Page 5 of 15

<PAGE>

Non-performing assets increased to \$2.5 million, or 0.16 percent of total assets, at June 30, 2006, compared to \$590,000, or 0.04 percent of total assets, at June 30, 2005. The allowance for loan losses was \$10.3 million at June 30, 2006, or 0.81 percent of gross loans held for investment, compared to \$9.2 million, or 0.81 percent of gross loans held for investment at June 30, 2005.

The decrease in non-interest income in the fourth quarter of fiscal 2006 compared to the same period of fiscal 2005 was primarily the result of a decrease in the gain on sale of loans. The gain on sale of loans decreased \$1.98 million, or 39 percent, to \$3.08 million for the quarter ended June 30, 2006 from \$5.06 million in the comparable quarter last year. The average loan sale margin for mortgage banking was 95 basis points for the quarter ended June 30, 2006, down 45 basis points from 140 basis points in the comparable quarter last year. The decrease in the loan sale margin was primarily attributable to the more competitive mortgage banking environment.

On a sequential quarter basis, the average loan sale margin for mortgage banking in the fourth quarter of fiscal 2006 decreased by six basis points to 95 basis points from 101 basis points in the prior quarter.

The volume of loans originated for sale decreased to \$291.7 million in the fourth quarter of fiscal 2006 from \$342.1 million during the same period last year. Total loan originations (including loans purchased for investment and loans originated for sale) were \$453.2 million in the fourth quarter of fiscal 2006, a decrease of \$57.9 million from \$511.1 million in the same quarter of fiscal 2005. The decline in loan originations was primarily attributable to lower loan demand perpetuated by an increase in interest rates, rising real estate prices and a more competitive environment.

In the fourth quarter of fiscal 2006, the fair-value adjustment of derivative financial instruments pursuant to Statement of Financial Accounting Standards ("SFAS") No. 133 on the consolidated statements of operations was a loss of \$257,000, compared to a loss of \$1,000 in the same period last year. The fair-value adjustment for SFAS No. 133 is derived from changes in the market value of commitments to extend credit on loans to be held for sale, forward loan sale agreements and option contracts. The SFAS No. 133 adjustment is relatively volatile and results in timing differences in the recognition of income, which may have an adverse impact on future earnings.

Non-interest expense for the fourth quarter of fiscal 2006 increased \$31,000, or less than one percent, to \$8.95 million from \$8.92 million in the same quarter in fiscal 2005. The increase in non-interest expense was primarily the result of an increase in other operating expenses (reflecting the contribution to the newly established charitable foundation), equipment expense, and premises and occupancy expense (primarily as a result of the opening of additional Provident Bank Mortgage ("PBM") loan production offices) as well as sales and marketing expenses (primarily in connection with the 50th Anniversary of the Bank). These increases were partly offset by a decrease in compensation expense (the result of workforce reductions at PBM announced during the third quarter of fiscal 2006) and professional expenses. The Company recorded \$110,000 of stock option compensation expense in the fourth quarter of fiscal 2006 as a result of SFAS No. 123R (Share Based Payment) which was adopted on July 1, 2005. No stock option compensation expense was recorded during the same period in fiscal 2005 as a result of SFAS No. 123R. However, the Company recorded \$320,000 of stock option

Page 7 of 15

<PAGE>

compensation expense in the fourth quarter of fiscal 2005 as a result of the accelerated vesting of certain stock options.

The Company's efficiency ratio increased to 58 percent in the fourth quarter of fiscal 2006 from 51 percent in the fourth quarter of fiscal 2005. For the fiscal year ended June 30, 2006 the efficiency ratio improved to 47 percent from 49 percent during the same period in fiscal 2005.

The effective income tax rate for the fourth quarter of fiscal 2006 was 43.8 percent, compared to 42.2 percent for the same quarter last year. The Company believes that the effective income tax rate applied in the fourth quarter of fiscal 2006 reflects its current income tax obligations.

The Company repurchased 148,564 shares of its common stock during the quarter ended June 30, 2006 at an average cost of \$29.65 per share. As of June 30, 2006, the Company has repurchased six percent of the shares authorized by the May 2006 Stock Repurchase Program, leaving 331,229 shares available for future repurchase activity.

The Bank currently operates 12 retail/business banking offices in Riverside County and San Bernardino County (Inland Empire) along with 13 PBM loan production offices located throughout Southern California.

The conference call can be accessed by dialing (800) 553-0349 and requesting the Provident Financial Holdings Earnings Release Conference Call.
