For Immediate Release
FEDERAL CREOSOTE OU III UPDATE

Oakville, Ontario, October 19th, 2004 Bennett Environmental Inc. is providing this press release in response to certain media reports with respect to a proposed 95% engineering design from the US Environmental Protection Agency (US EPA) for the Federal Creosote Operable Unit III (OU III)

The media reports have indicated that the US EPA has estimated, under its current proposal for OU III, approximately 100,000 tons for disposal with 25% to 30% requiring thermal treatment. Reports indicate that, under the current US EPA proposal, the footprint of the Rustic Mall retail buildings would not be excavated. However, the Manville, New Jersey Borough Council is considering a mixed use redevelopment plan and if the plan is approved by the Council the US EPA would be compelled to excavate an additional volume of soil.

The final determination of soil requiring excavation and thermal treatment is still pending.

Bennett Environmental is listed on the Toronto Stock Exchange (Trading Symbol BEV) and the American Stock Exchange (Trading Symbol BEL). For information, please visit the Bennett Environmental website at www.bennettenv.com, or contact Al Bulckaert or Andy Boulanger at the Oakville office (905) 339-1540.

Notes regarding forward-looking information

This news release includes statements about expected future events and/or financial results that are forward looking in nature and subject to risks and uncertainties. For those statements, we claim the protection of the safe harbour for forward-looking statements provisions contained in the Private Litigation Reform Act of 1995. The Company cautions that actual performance will be affected by a number of various factors, many of which are beyond the Company's control. Discussions of the various factors that may affect future results are contained in the Company's filings with the Securities and Exchange Commission and Ontario Securities Commission.
