**Syngenta steps up efforts to combat malaria**

**Basel, Switzerland, 28 January 2004**

Syngenta is stepping up its support for global efforts to combat malaria. At the International Aid & Trade Europe 2004 conference and exhibition in Geneva, Syngenta is presenting a range of its highly effective insect control products. These help to reduce the risk of contracting malaria and other insect-borne human diseases such as Dengue fever. The conference is being held on 28 and 29 January and focuses on the role of the private sector in providing emergency aid and meeting development needs.

At the conference, Syngenta is presenting four products from its Professional Products business: ICON CS®, ICONET®, ICON 10 WP®, and ACTELLIC®. ICON CS® is a state-of-the-art product designed for the treatment of mosquito nets, curtains and tents. It can remain effective for up to a year, withstanding repeated washing. ICONET®, based on the same formulation, is designed for the individual treatment of mosquito nets and curtains. ICON 10WP® is an advanced product designed for indoor residual treatment, active at exceptionally low rates. ACTELLIC® controls a wide range of public health pests.

Syngenta is committing significant resources to the development of novel products for the combat of malaria and other insect-borne diseases. The company is an active participant in global partnerships and programs such as Roll Back Malaria, said Eric Kuhn, Head of Syngenta Professional Products.

Malaria control is an urgent priority for more than 500 million people at risk in Africa and many countries of Asia and Latin America. Malaria kills over one million people per year, mostly African children, many of whom might be saved if mosquito nets, treated with appropriate insecticides, were widely and properly used. Moreover, insect control through indoor house treatment has been proven to be highly effective for reducing malaria transmission. It therefore is an important component for the World Health Organization Global Malaria Strategy as well as anti-malaria programs in many countries.

Syngenta is a world-leading agribusiness committed to sustainable agriculture through innovative research and technology. The company is a leader in crop protection and ranks third in the high-value commercial seeds market. Sales in 2002 were approximately US \$6.2 billion. Syngenta employs some 20,000 people in over 90 countries. Syngenta is listed on the Swiss stock

Edgar Filing: SYNGENTA AG - Form 6-K

exchange (SYNN) and in New York (SYT). Further information is available at [www.syngenta.com](http://www.syngenta.com).
