**AgroFresh and Syngenta to form strategic alliance on Invinsa™ crop stress protection**

**Philadelphia, PA, USA and Basel, Switzerland, January 17, 2008**

AgroFresh Inc., a wholly-owned subsidiary of Rohm and Haas (NYSE: ROH) and Syngenta AG (SWX: SYNN, NYSE: SYT) today announced the signing of a letter of intent to enter into an exclusive global strategic alliance to develop and commercialize Invinsa™ technology, a unique product for crop stress protection in field crops.

Invinsa technology, a sprayable formulation of 1-methylcyclopropene (1-MCP), will be the first-ever product introduced into field crop markets to specifically protect crop yield during extended periods of high temperature, mild-to-moderate drought and other crop stresses. The increasing occurrence of drought stress in many regions of the world, coupled with the importance of maximizing crop yields to meet the growing demand for food, animal feed and fuel, creates a significant potential market for Invinsa technology, provisionally estimated to be in excess of \$500 million.

“We’re pleased that Syngenta, a world leading agribusiness company, understands the exciting potential of Invinsa technology and will be our partners in this alliance. It allows us to combine resources and capabilities with Syngenta to achieve the full potential of the technology,” said Pierre Brondeau, Executive Vice President and Business Group Executive, Rohm and Haas Company.

“Invinsa technology complements our market leading range of crop protection products and our growing seeds businesses”, said John Atkin, Chief Operating Officer Syngenta Crop Protection. “Through this strategic alliance with AgroFresh, we will use our expertise in product development and our global market strength to help growers better manage drought conditions with this cutting-edge technology,” said Atkin.

Both companies will contribute research and development resources, while Syngenta will market Invinsa crop stress protection worldwide. The strategic alliance will focus on major field crops including corn, soybean, cotton, wheat, sunflower, rice and canola. Invinsa technology has the potential to create an entirely new market segment, generating significant value for customers and shareholders. The strategic alliance will increase the speed-to-market and the market penetration of Invinsa crop stress protection. The aim is to commercialize the technology within two years.

***Forward Looking Statement - Rohm and Haas***

---

This release includes forward-looking statements. Actual results could vary materially, due to changes in current expectations. The forward-looking statements contained in this announcement concerning demand for products and services and sales forecasts, involve risks and uncertainties and are subject to change based on various factors, including the continued timely development and acceptance of new products and services, the ability to market and sell current products at expected levels, the impact of competitive products and pricing, cost of raw materials, natural gas, and other energy sources, and the ability to achieve price increases to offset such cost increases, and the impact of tax and other legislation and regulation in the jurisdictions in which the company operates. Further information about these risks and others can be found in Rohm and Haas Company's SEC 10-K filing of February 28, 2007.

***Cautionary Statement Regarding Forward-Looking Statements - Syngenta***

---

This document contains forward-looking statements, which can be identified by terminology such as 'expect', 'would', 'will', 'potential', 'plans', 'prospects', 'estimated', 'aiming', 'on track' and similar expressions. Such statements may be subject to risks and uncertainties that could cause the actual results to differ materially from these statements. We refer you to Syngenta's publicly available filings with the U.S. Securities and Exchange Commission for information about these and other risks and uncertainties. Syngenta assumes no obligation to update forward-looking statements to reflect actual results, changed assumptions or other factors. This document does not constitute, or form part of, any offer or invitation to sell or issue, or any solicitation of any offer, to purchase or subscribe for any ordinary shares in Syngenta AG, or Syngenta ADSs, nor shall it form the basis of, or be relied on in connection with, any contract therefor.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

SYNGENTA AG
