## FORWARD-LOOKING STATEMENTS

Statements in this Quarterly Report on Form 10-Q that are not based on historical fact may be "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as "believe", "may", "will", "expect", "estimate", "anticipate", "continue" or similar terms identify forward-looking statements. A wide variety of factors could cause the Company's actual results and experiences to differ materially from the results expressed or implied by the Company's forward-looking statements. Some of the risks and uncertainties that may affect operations, performance, results of the Company's business, the interest rate sensitivity of its assets and liabilities, and the adequacy of its loan loss allowance, include, but are not limited to: (i) deterioration in local, regional, national or global economic conditions which could result, among other things, in an increase in loan delinquencies, a decrease in property values, or a change in the housing turnover rate; (ii) changes in market interest rates or changes in the speed at which market interest rates change; (iii) changes in laws and regulations affecting the financial services industry; (iv) changes in competition; (v) changes in consumer preferences, (vi) changes in banking technology; (vii) ability to maintain key members of management, (viii) possible disruptions in the Company's operations at its banking facilities, and other factors referred to in the sections of this Quarterly Report entitled "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Certain information customarily disclosed by financial institutions, such as estimates of interest rate sensitivity and the adequacy of the loan loss allowance, are inherently forward-looking statements because, by their nature, they represent attempts to estimate what will occur in the future.

The Company cautions readers not to place undue reliance upon any forward-looking statement contained in this Quarterly Report. Forward-looking statements speak only as of the date they were made and the Company assumes no obligation to update or revise any such statements upon any change in applicable circumstances.

BERKSHIRE BANCORP INC. AND SUBSIDIARIES  
Notes to Consolidated Financial Statements  
June 30, 2003 and 2002

NOTE 1. General

Berkshire Bancorp Inc. ("Berkshire" or the "Company"), a Delaware corporation, is a bank holding company registered under the Bank Holding Company Act of 1956. Berkshire's principal activity is the ownership and management of its wholly owned subsidiary, The Berkshire Bank (the "Bank"), a New York State

## Edgar Filing: BERKSHIRE BANCORP INC /DE/ - Form 10-Q

chartered commercial bank.

The accompanying financial statements of Berkshire Bancorp Inc. and Subsidiaries includes the accounts of the parent company, Berkshire Bancorp Inc., and its wholly-owned subsidiaries: The Berkshire Bank and Greater American Finance Group, Inc.

During interim periods, the Company follows the accounting policies set forth in its Annual Report on Form 10-K filed with the Securities and Exchange Commission. Readers are encouraged to refer to the Company's Form 10-K for the fiscal year ended December 31, 2002 when reviewing this Form 10-Q. Quarterly results reported herein are not necessarily indicative of results to be expected for other quarters.

In the opinion of management, the accompanying unaudited consolidated financial statements contain all adjustments (consisting of normal recurring adjustments) considered necessary to present fairly the Company's consolidated financial position as of June 30, 2003 and December 31, 2002 and the consolidated results of its operations for the three and six month periods ended June 30, 2003 and 2002, and its consolidated stockholders' equity for the six month period ended June 30, 2003, and its consolidated cash flows for the six month periods ended June 30, 2003 and 2002.

### NOTE 2. Earnings Per Share

Basic earnings per share is calculated by dividing income available to common stockholders by the weighted average common shares outstanding, excluding stock options from the calculation. In calculating diluted earnings per share, the dilutive effect of stock options is calculated using the average market price for the Company's common stock during the period. The following table presents the calculation of earnings per share for the periods indicated:

	For The Three Months Ended				
	June 30, 2003			June 30, 2002	
	Income (numerator)	Shares (denominator)	Per share amount	Income (numerator)	Shares (denominator)
	(In thousands, except per share data)				
Basic earnings per share					
Net income available to common stockholders	\$1,947	2,208	\$ .88	\$1,187	2,315
Effect of dilutive securities					
Options	--	28	(.01)	--	9
Diluted earnings per share					
Net income available to common stockholders plus assumed conversions	\$1,947	2,236	\$ .87	\$1,187	2,324

Edgar Filing: BERKSHIRE BANCORP INC /DE/ - Form 10-Q

BERKSHIRE BANCORP INC. AND SUBSIDIARIES  
Notes to Consolidated Financial Statements (continued)

Note 2. - (continued)

Options to purchase 40,375 shares of common stock for \$38.00 per share and 119,375 shares of common stock for \$30.00 to \$38.00 per share were outstanding during the three month periods ended June 30, 2003 and 2002, respectively. These options were not included in the computation of diluted earnings per share because the option exercise price was greater than the average market price for the Company's common stock during this period.

	For The Six Months Ended				
	June 30, 2003			June 30, 2002	
	Income (numerator)	Shares (denominator)	Per share amount	Income (numerator)	Shares (denominator)
	(In thousands, except per share data)				
Basic earnings per share					
Net income available to common stockholders	\$3,689	2,215	\$1.67	\$2,493	2,338
Effect of dilutive securities					
Options	--	24	(.02)	--	10
Diluted earnings per share					
Net income available to common stockholders plus assumed conversions	\$3,689	2,239	\$1.65	\$2,493	2,348

Options to purchase 40,375 shares of common stock for \$38.00 per share and 45,375 shares of common stock for \$31.75 to \$38.00 per share were outstanding during the six month periods ended June 30, 2003 and 2002, respectively. These options were not included in the computation of diluted earnings per share because the option exercise price was greater than the average market price for the Company's common stock during this period.

NOTE 3. Investment Securities

Unrealized holding gains arising during period	\$2,420	\$ (968)	\$1,452	\$1,873	\$ (727)
Less reclassification adjustment for gains realized in net income	1,486	(594)	892	323	(129)
Other comprehensive income, net	\$ 934	\$ (374)	\$ 560	\$1,550	\$ (598)

NOTE 7. Accounting For Stock Based Compensation

SFAS No. 148 "Accounting for Stock Based Compensation-Transition and Disclosure", which amends the disclosure and certain provisions of SFAS No. 123, was issued in December 2002. SFAS No. 148 requires all entities with stock based employee compensation arrangements to provide additional disclosures in their summary of significant accounting policies note. The Company has one stock-based employee compensation plan. The Company accounts for that plan under the recognition and measurement principles of APB No. 25, "Accounting for Stock Issued to Employees," and related interpretations. Stock-based employee compensation costs are not reflected in net income, as all options granted under the plan had an exercise price equal to the market value of the underlying common stock on the date of the grant. The following table illustrates the effect on net income and earnings per share if the Company had applied the fair value recognition provisions of SFAS No. 123, "Accounting for Stock-Based Compensation," to stock-based employee compensation.

The Company did not grant options during the three and six months ended June 30, 2003 and 2002.

BERKSHIRE BANCORP INC. AND SUBSIDIARIES  
Notes to Consolidated Financial Statements (continued)

NOTE 8. New Accounting Pronouncements

Derivative Instruments and Hedging Activities

The Company adopted Statement of Financial Accounting Standard 149 (SFAS No. 149), Amendment of Statement 133 on Derivative Instruments and Hedging

## Edgar Filing: BERKSHIRE BANCORP INC /DE/ - Form 10-Q

Activities, on July 1, 2003. SFAS No. 149 clarifies and amends SFAS No. 133 for implementation issues raised by constituents or includes the conclusions reached by the FASB on certain FASB Staff Implementation Issues. Statement 149 also amends SFAS No. 133 to require a lender to account for loan commitments related to mortgage loans that will be held for sale as derivatives. SFAS No. 149 is effective for contracts entered into or modified after June 30, 2003. The Company periodically enters into commitments with its customers, which it intends to sell in the future. Management does not anticipate the adoption of SFAS No. 149 to have a material impact on the Company's financial position or results of operations.

### Financial Instruments with Characteristics of both Liabilities and Equity

The FASB issued SFAS No. 150, Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity, on May 15, 2003. SFAS No. 150 changes the classification in the statement of financial position of certain common financial instruments from either equity or mezzanine presentation to liabilities and requires an issuer of those financial statements to recognize changes in fair value or redemption amount, as applicable, in earnings. SFAS No. 150 is effective for public companies for financial instruments entered into or modified after May 31, 2003 and is effective at the beginning of the first interim period beginning after June 15, 2003. Management does not anticipate the adoption of SFAS No. 150 to have a material impact on the Company's financial position or results of operations.

### Off Balance Sheet Guarantees

The Company adopted FASB Interpretation 45 (FIN 45) Guarantor's Accounting and Disclosure Requirements for Guarantees, including Indirect Guarantees of Indebtedness of Others on January 1, 2003. FIN 45 requires a guarantor entity, at the inception of a guarantee covered by the measurement provisions of the interpretation, to record a liability for the fair value of the obligation undertaken in issuing the guarantee. The Company has financial and performance letters of credit. Financial letters of credit require the Company to make payment if the customer's financial condition deteriorates, as defined in the agreements. Performance letters of credit require the Company to make payments if the customer fails to perform certain non-financial contractual obligations. The Company previously did not record an initial liability, other than the fees received for these letters of credit, when guaranteeing obligations unless it became probable that the Company would have to perform under the guarantee. FIN 45 applies prospectively to letters of credit the Company issues or modifies subsequent to December 31, 2002.

The Company defines the initial fair value of these letters of credit as the fee received from the customer. The maximum potential undiscounted amount of future payments of these letters of credit as of June 30, 2003 are \$19.94 million and they expire through 2008. Amounts due under these letters of credit would be reduced by any proceeds that the Company would be able to obtain in liquidating the collateral for the loans, which varies depending on the customer.

Note 8. - (continued)

Variable Interest Entities

In January 2003, the FASB issued FASB Interpretation 46 (FIN 46), Consolidation of Variable Interest Entities. FIN 46 clarifies the application of Accounting Research Bulletin 51, Consolidated Financial Statements, for certain entities that do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties or in which equity investors do not have the characteristics of a controlling financial interest ("variable interest entities"). Variable interest entities within the scope of FIN 46 will be required to be consolidated by their primary beneficiary. The primary beneficiary of a variable interest entity is determined to be the party that absorbs a majority of the entity's expected losses, receives a majority of its expected returns, or both. The Company has not acquired any variable interest entities after February 1, 2003 through June 30, 2003. The Company is in process of determining what impact, if any, the adoption of the provisions of FIN 46 will have on entities held prior to the issuance of FIN 46 on its financial condition or results of operations. The Company does not anticipate FIN 46 to have a material impact on the consolidated financial position or results of operations.

Note 9. Critical Accounting Policies, Judgments and Estimates

The accounting and reporting policies of the Company conform with accounting principles generally accepted in the United States of America and general practices within the financial services industry. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and the assumptions that affect the amounts reported in the financial statements and the accompanying notes. Actual results could differ from those estimates.

The Company considers that the determination of the allowance for loan losses involves a higher degree of judgment and complexity than any of its other significant accounting policies. The allowance for loan losses is calculated with the objective of maintaining a reserve level believed by management to be sufficient to absorb estimated credit losses. Management's determination of the adequacy of the allowance is based on periodic evaluations of the loan portfolio and other relevant factors. However, this evaluation is inherently subjective as it requires material estimates, including, among others, expected default probabilities, loss given default, the amounts and timing of expected future cash flows on impaired loans, mortgages, and general amounts for historical loss experience. The process also considers economic conditions, uncertainties in estimating losses and inherent risks in the loan portfolio. All of these factors may be susceptible to significant change. To the extent actual outcomes differ from management estimates, additional provisions for loan losses may be required that would adversely impact earnings in future periods.

With the adoption of SFAS No. 142 on January 1, 2002, the Company discontinued the amortization of goodwill resulting from acquisitions. Goodwill is now subject to impairment testing at least annually to determine whether write-downs of the recorded balances are necessary. The Company tests for impairment based on the goodwill maintained at each defined reporting unit. A fair value is determined for each reporting unit based on at least one of three various market valuation methodologies. If the fair values of the reporting units exceed their book values, no write-down of recorded goodwill is necessary.

Edgar Filing: BERKSHIRE BANCORP INC /DE/ - Form 10-Q

BERKSHIRE BANCORP INC. AND SUBSIDIARIES  
Notes to Consolidated Financial Statements (continued)

Note 9. - (continued)

If the fair value of the reporting unit is less, an expense may be required on the Company's books to write down the related goodwill to the proper carrying value. As of December 31, 2002, the Company completed its transitional testing, which determined that no impairment write-offs were necessary.

The Company recognizes deferred tax assets and liabilities for the future tax effects of temporary differences, net operating loss carryforwards and tax credits. Deferred tax assets are subject to management's judgment based upon available evidence that future realization is more likely than not. If management determines that the Company may be unable to realize all or part of net deferred tax assets in the future, a direct charge to income tax expense may be required to reduce the recorded value of the net deferred tax asset to the expected realizable amount.

ITEM 2 - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following discussion and analysis is intended to provide a better understanding of the consolidated financial condition and results of operations of Berkshire Bancorp Inc., a Delaware corporation ("Berkshire, the "Company", or "we" and similar pronouns). References to the Company herein shall be deemed to refer to the Company and its consolidated subsidiaries unless the context otherwise requires. References to per share amounts refer to diluted shares. References to Notes herein are references to the "Notes to Consolidated Financial Statements" of the Company located in Item 1 herein.

19

#### Results of Operations

Results of Operations for the Three and Six Months Ended June 30, 2003 Compared to the Three and Six Months Ended June 30, 2002.

General. Berkshire Bancorp Inc., a bank holding company registered under the Bank Holding Company Act of 1956, has one wholly-owned banking subsidiary, The Berkshire Bank, a New York State chartered commercial bank (the "Bank"). The Bank is headquartered in Manhattan and has nine branch locations, five branches in New York City and four branches in Orange and Sullivan counties.

Net Income. Net income for the three-month period ended June 30, 2003 was \$1.95 million, or \$.87 per share, as compared to \$1.19 million, or \$.51 per share, for the three-month period ended June 30, 2002. Net income for the six-month period ended June 30, 2003 was \$3.69 million, or \$1.65 per share, as compared to \$2.49 million, or \$1.06 per, for the six-month period ended June 30, 2002. Net income is largely dependent on interest rate levels, the demand for the Company's loan and deposit products and the strategies employed to manage the risks inherent in the banking business.

Net Interest Income. The Company's primary source of revenue is net interest income, or the difference between interest income on earning assets such as loans and investment securities, and interest expense on interest-bearing liabilities such as deposits and borrowings.

For the quarter ended June 30, 2003, net interest income increased by approximately \$377,000, or 7.95%, to \$5.12 million from \$4.74 million for the quarter ended June 30, 2002. The quarter over quarter increase in net interest income was the result of the 30.34% growth in average interest-earning assets to \$702.38 million from \$538.89 million, offset by the 35.38% growth in average interest-bearing liabilities to \$601.89 million from \$444.59 million, and the difference between the yield on assets compared to the cost of liabilities. The average yield on interest-earning assets fell to 4.85% in 2003 from 6.01% in 2002, a decline of 116 basis points, or 19.30%, however, the average cost of interest-bearing liabilities fell to 2.26% from 3.02%, a smaller decline of 76 basis points, or 25.17%. The interest-rate spread, the difference between the average yield on interest-earning assets and the average cost of interest bearing liabilities, narrowed by 40 basis points to 2.59% from 2.99%

## Edgar Filing: BERKSHIRE BANCORP INC /DE/ - Form 10-Q

For the six-month period ended June 30, 2003, net interest income increased by approximately \$1.10 million, or 12.23%, to \$10.11 million from \$9.01 million for the six-month period ended June 30, 2002. The period over period increase in net interest income was the result of the 31.97% growth in average interest-earning assets to \$686.67 million from \$520.31 million, partially offset by the 37.43% growth in average interest-bearing liabilities to \$585.22 million from \$425.83 million and the difference between the yield on assets compared to the cost of liabilities. In the 2003 period, the average yield on interest-earning assets fell to 4.92% from 5.92% in 2002, a decline of 100 basis points, or 16.89%, however, the average cost of interest-bearing liabilities fell to 2.32% from 3.01%, a smaller decline of 69 basis points, or 22.92%. The interest-rate spread narrowed by 31 basis points to 2.60% in 2003 from 2.91% in 2002.

Interest rates, as measured by the prime rate, stabilized at 4.75% throughout the first ten months of 2002, easing to 4.25% in November of 2002, and remaining at the 4.25% level until June 25, 2003 when the rate was lowered to 4.00%. With interest rates at historic lows, we expect to see continued downward pressure on the Company's interest-rate spread and net interest income as higher yield investment securities in our portfolio mature, or are called by the issuer, and are replaced with securities carrying lower yields. Rates paid on deposit accounts may continue to decline as well, albeit at a slower pace due to competition for deposits in the market place.

20

Net Interest Margin. Net interest margin, or annualized net interest income as a percentage of average interest-earning assets, declined to 2.91% in the second quarter of 2003 from 3.52% in the second quarter of 2002, and declined to 2.94% in the six-month period of 2003 from 3.46% in the six-month period of 2002. For the three and six months ended June 30, 2003, total average interest-earnings assets were \$702.38 million and \$686.67 million, respectively, compared to \$538.89 million and \$520.31 million for the three and six months ended June 30, 2002. The average yield on such assets was 4.85% and 4.92% for the three and six months of 2003, respectively, compared to 6.01% and 5.92% for the three and six months of 2002, respectively.

The Company makes strategic use of the prevailing interest rate environment to secure and retain deposits, and to borrow funds at what we believe to be attractive rates, and to invest such funds in a prudent mix of loans and investment securities. The average amounts of loans and investment securities increased by \$10.65 million and \$153.96 million, respectively, to \$275.24 million and \$422.48 million, respectively, in the quarter ended June 30, 2003, from \$264.58 million and \$268.52 million, respectively, in the quarter ended June 30, 2002. The average amount of interest bearing deposits and time deposits increased to \$180.67 million and \$321.93 million, respectively, from \$108.99 million and \$268.39, respectively, in the year ago quarter. Borrowed funds increased to \$99.30 million in the 2003 quarter from \$67.21 million in the 2002 quarter.

During the six months ended June 30, 2003, the average amount of loans and investments securities was \$275.09 million and \$406.19 million, respectively, compared to \$260.62 million and \$254.04 million, respectively, during the six months ended June 30, 2002. Interest bearing deposits and time deposits averaged

## Edgar Filing: BERKSHIRE BANCORP INC /DE/ - Form 10-Q

\$162.78 million and \$319.70 million in 2003, respectively, compared to \$108.80 million and \$243.34 million, respectively in 2002. Borrowed funds averaged \$102.74 million and \$73.69 million in 2003 and 2002, respectively.

**Interest Income.** Total interest income for the quarter ended June 30, 2003 increased by approximately \$414,000, or 5.11%, to \$8.51 million from \$8.10 million for the quarter ended June 30, 2002. The increase was due to higher average balances of loans and investments securities, offset by the declining yields on such interest-earning assets. Loans yielded 6.84% and contributed \$4.71 million, or 55.30% of total interest income in the 2003 quarter compared to a yield of 7.05% on loans in the year ago quarter and \$4.67 million, or 57.68% of total interest income in 2002. Investment securities provided \$3.79 million and \$3.33 million of interest income, yielding 3.59% and 4.95% on average balances in 2003 and 2002 quarters, respectively.

Total interest income for the six-month period ended June 30, 2003 increased by approximately \$1.48 million, or 9.58%, to \$16.89 million from \$15.41 million for the six-month period ended June 30, 2002. The increase was due to higher average balances of loans and investments securities, offset by the declining yields on such interest-earning assets. The average amounts of interest-earning assets increased by approximately \$166.35 million, or 31.97%, to \$686.67 million in 2003 from \$520.31 million in 2002 and the average yield on such assets decreased by 16.89%. Average loan balances increased by 5.55% to \$275.09 million in 2003 from \$260.62 million in 2002 and provided \$9.46 million and \$9.21 million of interest income, respectively, in 2003 and 2002. The average amounts of investments securities increased by \$152.16 million, or 59.89%, to \$406.19 million in 2003 from \$254.04 million in 2002 and contributed \$7.40 million and \$6.08 million of interest income in the six months ended June 30, 2003 and 2002, respectively.

21

**Interest Expense.** Total interest expense for the quarter ended June 30, 2003 increased slightly to \$3.40 million from \$3.36 million for the quarter ended June 30, 2002. Interest-bearing liabilities increased by 35.38%, averaging \$601.89 million in the 2003 quarter from \$444.60 million in the 2002 quarter. Average time deposits and other interest-bearing deposits increased in the 2003 quarter to \$321.99 million and \$180.67 million, respectively, from \$268.39 million and \$108.99 million, respectively, in the 2002 quarter. The cost of such deposits, coupled with the cost of borrowed funds, \$99.30 million and \$67.21 million in 2003 and 2002, respectively, decreased to 2.26% in 2003 from 3.02% in 2002.

Total interest expense for the six-month period ended June 30, 2003 increased by \$375,000, to \$6.78 million in the 2003 period from \$6.41 million in the 2002 period. Interest-bearing liabilities increased by 37.43%, averaging \$585.22 million in the 2003 period from \$425.83 million in the 2002 period. Average time deposits and other interest-bearing deposits increased in the 2003 period to \$319.70 million and \$162.78 million, respectively, from \$243.34 million and \$108.80 million, respectively, in the 2002 period. The cost of such deposits, coupled with the cost of borrowed funds, \$102.74 million and \$73.69 million in 2003 and 2002, respectively, decreased to 2.32% in 2003 from 3.01% in 2002.

**Non-Interest Income.** Non-interest income consists primarily of realized gains on

## Edgar Filing: BERKSHIRE BANCORP INC /DE/ - Form 10-Q

sales of marketable securities and service fee income.

For the three and six months ended June 30, 2003, total non-interest income increased by approximately \$1.12 million and \$2.16 million, respectively, compared to \$345,000 and \$814,000, respectively, for the three and six months ended June 30, 2002. The increase is primarily due to the gains realized on the sales and issuer redemptions of investment securities. Such gains, which are not likely to be sustained in future periods, amounted to approximately \$1.49 million in 2003 as compared to \$323,000 in 2002.

**Non-Interest Expense.** Non-interest expense includes salaries and employee benefits, occupancy and equipment expenses, legal and professional fees and other operating expenses associated with the day-to-day operations of the Company. Total non-interest expense for the three and six-month periods ended June 30, 2003 was \$2.73 million and \$5.44 million, respectively, compared to \$2.80 million and \$5.20 million, respectively for the like periods in 2002.

**Provision for Income Tax.** During the three and six-month periods ended June 30, 2003, the Company recorded income tax expense of \$1.56 million and \$2.98 million, respectively, compared to income tax expense of \$988,000 and \$1.97 million, respectively, for the three and six-month periods ended June 30, 2002. The tax provisions for federal, state and local taxes recorded for the first six month of 2003 and 2002 represent effective tax rates of 44.71% and 44.12%, respectively.

22

### ITEM 3 - QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

**Interest Rate Risk.** Fluctuations in market interest rates can have a material effect on the Company's net interest income because the yields earned on loans and investments may not adjust to market rates of interest with the same frequency, or with the same speed, as the rates paid by the Bank on its deposits.

Most of the Bank's deposits are either interest-bearing demand deposits or short term certificates of deposit and other interest-bearing deposits with interest rates that fluctuate as market rates change. Management of the Bank seeks to reduce the risk of interest rate fluctuations by concentrating on loans and securities investments with either short terms to maturity or with adjustable rates or other features that cause yields to adjust based upon interest rate fluctuations. In addition, to cushion itself against the potential adverse effects of a substantial and sustained increase in market interest rates, the Bank has purchased off balance sheet interest rate cap contracts which generally provide that the Bank will be entitled to receive payments from the other party to the contract if interest rates exceed specified levels. These contracts are entered into with major financial institutions.

The Company seeks to maximize its net interest margin within an acceptable level of interest rate risk. Interest rate risk can be defined as the amount of the forecasted net interest income that may be gained or lost due to favorable or unfavorable movements in interest rates. Interest rate risk, or sensitivity, arises when the maturity or repricing characteristics of assets differ significantly from the maturity or repricing characteristics of liabilities.

Edgar Filing: BERKSHIRE BANCORP INC /DE/ - Form 10-Q

In the banking industry, a traditional measure of interest rate sensitivity is known as "gap" analysis, which measures the cumulative differences between the amounts of assets and liabilities maturing or repricing at various time intervals. The following table sets forth the Company's interest rate repricing gaps for selected maturity periods:

23

		Berkshire Bancorp Inc. Interest Rate Sensitivity Gap at June 30, 2003 (in thousands, except for percentages)				
		3 Months or Less	3 Through 12 Months	1 Through 3 Years	Over 3 Years	T

-----

- (1) Adjustable-rate loans are included in the period in which the interest rates are next scheduled to adjust rather than in the period in which the loans mature. Fixed-rate loans are scheduled according to their maturity dates.
- (2) Includes nonaccrual loans.
- (3) Investments are scheduled according to their respective repricing (variable rate loans) and maturity (fixed rate securities) dates.
- (4) Investments are stated at book value.
- (5) NOW accounts and savings accounts are regarded as readily accessible withdrawal accounts. The balances in such accounts have been allocated amongst maturity/repricing periods based upon the Bank's historical experience. All other time accounts are scheduled according to their respective maturity dates.

24

Provision for Loan Losses. The Company maintains an allowance for loan losses at a level deemed sufficient to absorb losses, which are inherent in the loan portfolio at each balance sheet date. Management reviews the adequacy of the allowance on at least a quarterly basis to ensure that the provision for loan losses has been charged against earnings in an amount necessary to maintain the allowance at a level that is appropriate based on management's assessment of probable estimated losses. The Company's methodology for assessing the appropriateness of the allowance for loan losses consists of several key elements. These elements include a specific allowance for loan watch list classified loans, an allowance based on historical trends, an additional allowance for special circumstances, and an unallocated portion. The Company consistently applies the following comprehensive methodology.

The allowance for loan watch list classified loans addresses those loans maintained on the Company's loan watch list, which are assigned a rating of substandard, doubtful, or loss. Substandard loans are those with a well-defined weakness or a weakness, which jeopardizes the repayment of the debt. A loan may be classified as substandard as a result of impairment of the borrower's financial condition and repayment capacity. Loans for which repayment plans have not been met or collateral equity margins do not protect the Company may also be classified as substandard. Doubtful loans have the characteristics of substandard loans with the added characteristic that collection or liquidation in full, on the basis of presently existing facts and conditions, is highly improbable. Although the possibility of loss is extremely high for doubtful loans, the classification of loss is deferred until pending factors, which might improve the loan, have been determined. Loans rated as doubtful in whole or in part are placed in nonaccrual status. Loans, which are classified as loss, are

## Edgar Filing: BERKSHIRE BANCORP INC /DE/ - Form 10-Q

considered uncollectible and are charged to the allowance for loan losses. There were no loans classified as loss as of June 30, 2003. For the three and six months ended June 30, 2003 and 2002, the Company charged-off loans amounting to \$1,000 and \$2,000, and \$75,000 and \$99,000, respectively.

Loans on the loan watch list may also be impaired loans, which are defined as nonaccrual loans or troubled debt restructurings, which are not in compliance with their restructured terms. Each of the classified loans on the loan watch list is individually analyzed to determine the level of the potential loss in the loan under the current circumstances. The specific reserve established for these criticized and impaired loans is based on careful analysis of the loan's performance, the related collateral value, cash flow considerations and the financial capability of any guarantor. The allowance for loan watch list classified loans is equal to the total amount of potential unconfirmed losses for the individual classified loans on the watch list. Loan watch list loans are managed and monitored by assigned Senior Management.

The allowance based on historical trends uses charge-off experience of the Company to estimate potential unconfirmed losses in the balances of the loan and lease portfolios. The historical loss experience percentage is based on the charge-off history. Historical loss experience percentages are applied to all non-classified loans to obtain the portion of the allowance for loan losses which is based on historical trends. Before applying the historical loss experience percentages, loan balances are reduced by the portion of the loan balances, which are subject to guarantee, by a government agency. Loan balances are also adjusted for unearned discount on installment loans.

The Company also maintains an unallocated allowance. The unallocated allowance is used to cover any factors or conditions, which may cause a potential loan loss but are not specifically identifiable. It is prudent to maintain an unallocated portion of the allowance because no matter how detailed an analysis of potential loan losses is performed these estimates by definition lack precision. Management must make estimates using assumptions and information, which is often subjective and changing rapidly.

25

Since all identified losses are immediately charged off, no portion of the allowance for loan losses is restricted to any individual loan or groups of loans, and the entire allowance is available to absorb any and all loan losses.

A loan is placed in a nonaccrual status at the time when ultimate collectibility of principal or interest, wholly or partially, is in doubt. Past due loans are those loans which were contractually past due 90 days or more as to interest or principal payments but are well secured and in the process of collection. Renegotiated loans are those loans which terms have been renegotiated to provide a reduction or deferral of principal or interest as a result of the deteriorating financial position of the borrower.

At June 30, 2003 and 2002, the Company had \$277,000 and \$ -0-, respectively, of non accrual or non performing loans and no loans past due more than 90 days and still accruing interest. Based upon management's evaluations of the overall analysis of the Bank's allowance for loan losses and the year over year increase in total loans to \$272.12 million from \$264.95 million, the provision for the six months ended June 30, 2003 was increased to \$2.47 million

Edgar Filing: BERKSHIRE BANCORP INC /DE/ - Form 10-Q

from \$2.10 million in the year ago period.

Management believes that the allowance for loan losses and nonperforming loans remains safely within acceptable levels.

The following table sets forth information with respect to activity in the Company's allowance for loan losses during the periods indicated (in thousands, except percentages):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2003	2002	2003	2002
Average loans outstanding	\$275,235	\$264,853	\$275,090	\$260,623
Allowance at beginning of period	2,421	2,058	2,315	2,030
Charge-offs:				
Commercial and other loans	1	75	2	99

26

Loan Portfolio.

Loan Portfolio Composition. The Company's loans consist primarily of mortgage loans secured by residential and non-residential properties as well as commercial loans which are either unsecured or secured by personal property

## Edgar Filing: BERKSHIRE BANCORP INC /DE/ - Form 10-Q

collateral. Most of the Company's commercial loans are either made to individuals or personally guaranteed by the principals of the business to which the loan is made. At June 30, 2003, the Company had total gross loans of \$272.81 million and an allowance for loan losses of \$2.47 million. From time to time, the Bank may originate residential mortgage loans and then sell them on the secondary market, normally recognizing fee income in connection with the sale. For the three and six-month periods ended June 30, 2003, the Company sold approximately \$135,000 and \$677,000, respectively, of such loans and recorded in other income, gains of \$5,000 and \$18,000, respectively, on such sales.

The following tables set forth information concerning the Company's loan portfolio by type of loan at the dates indicated:

	June 30, 2003	December 31, 2002
	-----	-----
	Amount	Amount
	-----	-----
	(in thousands)	
Commercial and professional loans	\$ 18,122	\$ 16,704
Secured by real estate		
1-4 family	166,060	180,730

Allowance for loan losses	(2,468)	(2,315)
	-----	-----
Loans, net	\$269,652	\$273,182
	=====	=====

It is the Bank's policy to discontinue accruing interest on a loan when it is 90 days past due or if management believes that continued interest accruals are unjustified. The Bank may continue interest accruals if a loan is more than 90 days past due if the Bank determines that the nature of the delinquency and the collateral are such that collection of the principal and interest on the loan in full is reasonably assured. When the accrual of interest is discontinued, all accrued but unpaid interest is charged against current period income. Once the accrual of interest is discontinued, the Bank records interest as and when received until the loan is restored to accruing status. If the Bank determines that collection of the loan in full is in reasonable doubt, then amounts received are recorded as a reduction of principal until the loan is returned to accruing status. At June 30, 2003 and 2002, the Company did not have any loans past due more than 90 days and still accruing interest.

Edgar Filing: BERKSHIRE BANCORP INC /DE/ - Form 10-Q

Capital Adequacy

Quantitative measures established by regulation to ensure capital adequacy require the Company and The Berkshire Bank to maintain minimum amounts and ratios of total and Tier I capital (as defined in the regulations) to risk-weighted assets (as defined), and Tier I capital (as defined) to average assets (as defined). As of June 30, 2003, the most recent notification from the FDIC categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain certain Total risk-based, Tier I risk-based, and Tier I leverage ratios. There are no conditions or events since the notification that management believes have changed the Bank's category.

The following tables set forth the actual and required regulatory capital amounts and ratios of the Company and The Berkshire Bank as of June 30, 2003 and December 31, 2002 (dollars in thousands):

	Actual		For capital adequacy purposes		To be well capitalized under prompt corrective action provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio

#### Liquidity

The management of the Company's liquidity focuses on ensuring that sufficient funds are available to meet loan funding commitments, withdrawals from deposit accounts, the repayment of borrowed funds, and ensuring that the Bank and the Company comply with regulatory liquidity requirements. Liquidity needs of The Berkshire Bank have historically been met by deposits, investments in federal funds sold, principal and interest payments on loans, and maturities of investment securities.

For Berkshire, liquidity means having cash available to fund operating expenses and to pay shareholder dividends, when and if declared by Berkshire's Board of Directors. The ability of Berkshire to fund its operations and to pay dividends is not dependent upon the receipt of dividends from The Berkshire Bank. At June 30, 2003, Berkshire had cash and cash equivalents of \$14.64 million and investment securities available for sale of \$2.91 million.

The Company maintains financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and stand-by letters of credit.

At June 30, 2003, the Company had outstanding commitments of approximately \$49.94 million. These commitments include \$10.06 million that mature or renew within one year, \$17.20 million that mature or renew after one year and within three years, \$20.24 that mature or renew after three years and within five years and \$2.43 million that mature or renew after five years.

The Company currently does not have any unconsolidated subsidiaries or special purpose entities.

#### Impact of Inflation and Changing Prices

The Company's financial statements measure financial position and operating results in terms of historical dollars without considering the changes in the relative purchasing power of money over time due to inflation. The impact of inflation is reflected in the increasing cost of the Company's operations. The assets and liabilities of the Company are largely monetary. As a result, interest rates have a greater impact on the Company's performance than do the effects of general levels of inflation. In addition, interest rates do not necessarily move in the direction, or to the same extent as the price of goods and services. However, in general, high inflation rates are accompanied by higher interest rates, and vice versa.

#### ITEM 4 - CONTROLS AND PROCEDURES

An evaluation was carried out under the supervision and with the participation of the Company's management, including the Chief Executive Officer ("CEO"), who is also the Chief Financial Officer ("CFO"), of the effectiveness of our disclosure controls and procedures as of the end of the quarter ended June 30, 2003. Based on that evaluation, the CEO/CFO has concluded that the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Securities Exchange Act of 1934 is recorded,

Edgar Filing: BERKSHIRE BANCORP INC /DE/ - Form 10-Q

processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms. In addition, during the quarter ended June 30, 2003, there were no significant changes in the Company's internal controls or in other factors that could significantly affect the internal controls, including any corrective actions with regard to significant deficiencies and material weaknesses.

29

PART II. OTHER INFORMATION

Item 4. Submission of Matters to a Vote of Security Holders

The 2003 Annual Meeting of Stockholders was held on May 15, 2003. Each of the five individuals nominated to serve as directors of the Company was elected:

Director -----	Shares For -----	Shares Withheld -----
William L. Cohen	2,124,956	8,912
Thomas V. Guarino	2,124,935	8,933
Moses Marx	2,124,172	8,696
Steven Rosenberg	2,124,177	8,691
Randolph B. Stockwell	2,124,944	8,294

Item 6. Exhibits and Reports on Form 8-K

a. Exhibits

Exhibit Number -----	Description -----
10.8	Amendment No. 2 to Employment Agreement, dated August 1, 2001, by and between The Berkshire Bank and Moses Krausz.
