Exhibit 99

Press release issued April 16, 2007 in which the Registrant announced that it expects to initiate a drilling program this month at its 100% owned Noche Buena Project in Sonora, Mexico. The 10,000 meter reverse circulation program has been designed to expand the known resource by testing three targets within and adjacent to the existing deposit. It is anticipated that this drilling campaign will be completed before the end of May under the direction of William Threlkeld, P.Geol, an officer of the Registrant and a Qualified Person as defined by National Instrument 43-101. An aggressive QA/QC procedure will be implemented to insure this new drilling is comparable in quality to previous resource delineation drilling. Results from this program will be incorporated into a revised resource model of the Noche Buena property. An updated resource estimation for the deposit incorporating this new drilling is expected in the third quarter of 2007.
