Our focus on the **U.S. Federal market** will continue and there will be no disruption to programs underway today. In fact, together the two organizations can provide a much more comprehensive and scalable portfolio of solutions and services and seamless integration to better meet your needs going forward. We believe that the combination of our complementary strengths will benefit our customers and continue to advance future identity management solutions.

Our Federal customers will be served by U.S. entities and U.S. based management. We also will continue to deliver superior levels of service and local support via U.S. based support centers and personnel.

Our operation will be complemented by greater depth of resources. Safran is a leading international high-technology group with core businesses in Aerospace (propulsion and equipment), Defense and Security. The Safran group has 55,000 employees worldwide and generated 2009 sales exceeding USD \$13.2 billion. The combined teams of L-1 and Safran represent the industry's most qualified experts, with the most comprehensive set of experience, to help solve the toughest identity management challenges.

Safran has deep experience in the U.S. and has served American customers since 1969. Today they maintain operations in 40 locations across 18 States and have more than 4,000 U.S.-based employees. Through its U.S. subsidiary Morpho, Sabre has become a global leader in Homeland Security focused on identification solutions, secured e-documents and detection of explosives and illicit materials.

Safran's experience is highly complementary to our own. Like L-1, they also are a trusted provider to U.S. law enforcement, State, Local and Federal government customers. In fact, the U.S. Federal Bureau of Investigations (FBI) uses Safran biometric ID solutions and the U.S. Department of Defense is the largest single end-user of Safran products and services.

Both organizations have a strong commitment to furthering the standards of quality as well as excellence in engineering innovation. In combination, we expect to continue to develop and deliver the next generation of biometric and ID management solutions.
