LYONDELLBASELL INDUSTRIES N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

1. Basis of Presentation

LyondellBasell Industries N.V. is a limited liability company (*Naamloze Vennootschap*) incorporated under Dutch law by deed of incorporation dated October 15, 2009. LyondellBasell Industries N.V. was formed to serve as the parent holding company for certain subsidiaries of LyondellBasell Industries AF S.C.A. (together with its subsidiaries, LyondellBasell AF, the Predecessor Company or the Predecessor) after completion of proceedings under chapter 11 (chapter 11) of title 11 of the United States Bankruptcy Code (the U.S. Bankruptcy Code). LyondellBasell Industries AF S.C.A. and 93 of its subsidiaries were debtors (the Debtors) in jointly administered bankruptcy cases (the Bankruptcy Cases) in the United States Bankruptcy Court in the Southern District of New York (the Bankruptcy Court). As of April 30, 2010 (the Emergence Date), LyondellBasell Industries AF S.C.A.'s equity interests in its indirect subsidiaries terminated and LyondellBasell Industries N.V. now owns and operates, directly and indirectly, substantially the same business as LyondellBasell Industries AF S.C.A. owned and operated prior to emergence from the Bankruptcy Cases, which business includes subsidiaries of LyondellBasell Industries AF S.C.A. that were not involved in the Bankruptcy Cases. LyondellBasell Industries AF S.C.A. is no longer part of the LyondellBasell group. Effective May 1, 2010, we adopted fresh-start accounting pursuant to ASC 852. Accordingly, the basis of the assets and liabilities in LyondellBasell AF's financial statements for periods prior to May 1, 2010 will not be comparable to the basis of the assets and liabilities in the financial statements prepared for LyondellBasell N.V. after emergence from bankruptcy.

LyondellBasell Industries N.V., together with its consolidated subsidiaries (collectively LyondellBasell N.V., the Successor Company or the Successor), is a worldwide manufacturer of chemicals and polymers, a refiner of crude oil, a significant producer of gasoline blending components and a developer and licensor of technologies for production of polymers and other chemicals. When we use the terms LyondellBasell N.V., the Successor Company, the Successor, we, us, our or similar words, unless the context otherwise requires, we are referring to LyondellBasell N.V. after April 30, 2010. References herein to the Company for periods through April 30, 2010 are to the Predecessor Company, LyondellBasell AF, and for periods after the Emergence Date, to the Successor Company, LyondellBasell N.V.

The accompanying consolidated financial statements are unaudited and have been prepared from the books and records of LyondellBasell N.V. after April 30, 2010 and LyondellBasell AF for periods up to and including that date in accordance with the instructions to Form 10-Q and Rule 10-1 of Regulation S-X for interim financial information. Accordingly, they do not include all of the information and notes required by generally accepted accounting principles for complete financial statements. In our opinion, all adjustments, consisting only of normal recurring adjustments, considered necessary for a fair presentation have been included. The results for interim periods are not necessarily indicative of results for the entire year. These consolidated financial statements should be read in conjunction with the LyondellBasell N.V. consolidated financial statements and notes thereto included in the LyondellBasell Industries N.V. Annual Report on Form 10-K for the year ended December 31, 2010.

2. Accounting and Reporting Changes

Business Combinations In December 2010, the FASB issued guidance related to ASC Topic 805, *Business Combinations*, to clarify that if a public entity presents comparative financial statements, the entity should disclose pro-forma revenue and earnings of the combined entity as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. This guidance also expands the supplemental pro forma disclosures to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. This guidance is effective prospectively for business combinations for

LYONDELLBASELL INDUSTRIES N.V.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010. Early adoption is permitted. Adoption of this amendment in January 2011 did not have a material effect on our consolidated financial statements.

Goodwill In December 2010, the FASB issued guidance related to ASC Topic 350, *Intangibles - Goodwill and Other*, to require a company with reporting units having a carrying amount of zero or less to perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. This guidance is effective for fiscal years, and interim periods within those years, beginning on or after December 15, 2010. Adoption of this amendment in January 2011 did not have a material effect on our consolidated financial statements.

Revenue Recognition In October 2009, the FASB ratified the consensus reached by its emerging issues task force to require companies to allocate revenue in multiple-element arrangements based on the estimated selling price of an element if vendor-specific or other third-party evidence of value is not available. The adoption of these changes, in January 2011, did not have a material effect on our consolidated financial statements.

Fair Value Measurement In January 2010, the FASB issued additional guidance on improving disclosures regarding fair value measurements. The guidance requires the disclosure of the amounts of, and the rationale for, significant transfers between Level 1 and Level 2 of the fair value hierarchy, as well as the rationale for transfers in or out of Level 3. In 2010, we adopted all of the amendments regarding fair value measurements except for a requirement to disclose information about purchases, sales, issuances, and settlements in the reconciliation of recurring Level 3 measurements on a gross basis. The requirement to separately disclose purchases, sales, issuances, and settlements of recurring Level 3 measurements adopted in January 2011 did not have a material impact on our consolidated financial statements.

3. Emergence from Chapter 11 Proceedings

On April 23, 2010, the U.S. Bankruptcy Court confirmed LyondellBasell AF's Third Amended and Restated Plan of Reorganization and the Debtors emerged from chapter 11 protection on April 30, 2010. As of March 31, 2011, approximately \$94 million of priority and administrative claims are accrued but have yet to be paid.

The Company's charges (credits) for reorganization items were as follows:

<u>Millions of dollars</u>	For the three months ended Successor March 31, 2011	Predecessor March 31, 2010
Asset write-offs and rejected contracts	\$	\$ 28
Estimated claims		(321)
Professional fees	4	81
Employee severance costs		(8)
Plant closures costs		9
Other	(2)	4
Total	\$ 2	\$ (207)

Estimated claims in the above table include adjustments made to reflect the Debtors' estimated claims to be allowed.

LYONDELLBASELL INDUSTRIES N.V.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****4. Accounts Receivable**

Our allowance for doubtful accounts receivable, which is reflected in the Consolidated Balance Sheets as a reduction of accounts receivable, totaled \$14 million and \$12 million at March 31, 2011 and December 31, 2010, respectively.

5. Inventories

Inventories consisted of the following components:

<u>Millions of dollars</u>	March 31, 2011	December 31, 2010
Finished goods	\$ 3,365	\$ 3,127
Work-in-process	376	230
Raw materials and supplies	1,985	1,467
Total inventories	\$ 5,726	\$ 4,824

6. Property, Plant and Equipment, Goodwill, Intangibles and Other Assets

The components of property, plant and equipment, at cost, and the related accumulated depreciation were as follows:

<u>Millions of dollars</u>	March 31, 2011	December 31, 2010
Land	\$ 297	\$ 286
Manufacturing facilities and equipment	6,991	6,752
Construction in progress	746	569
Total property, plant and equipment	8,034	7,607
Less accumulated depreciation	(594)	(417)
Property, plant and equipment, net	\$ 7,440	\$ 7,190

In the first quarter 2011, we recognized \$5 million of impairment charges related to the carrying value of assets at the Berre refinery. Capital spending required for the operation of the Berre refinery will continue to be impaired until such time as the discounted cash flow projections for the Berre refinery are sufficient to recover the asset's carrying amount. On February 25, 2010, based on the continued impact of global economic conditions on polypropylene demand, LyondellBasell AF announced a project to cease production at, and permanently shut down, its polypropylene plant at Terni, Italy. LyondellBasell AF recognized charges of \$23 million in cost of sales related to plant and other closure costs in the first quarter of 2010. In July 2010 the plant ceased production.

LYONDELLBASELL INDUSTRIES N.V.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Depreciation and amortization expense is summarized as follows:

<u>Millions of dollars</u>	For the three months ended	
	Successor March 31, 2011	Predecessor March 31, 2010
Property, plant and equipment	\$ 167	\$ 378
Investment in PO joint ventures	7	11
Emission allowances	18	
Various contracts	22	
Technology, patent and license costs		19
Software costs	1	9
Other		7
Total depreciation and amortization	\$ 215	\$ 424

Asset Retirement Obligations The liabilities recognized for all asset retirement obligations were \$136 million and \$132 million at March 31, 2011 and December 31, 2010, respectively.

7. Investment in PO Joint Ventures

We, together with Bayer AG and Bayer Corporation (collectively Bayer), share ownership in a U.S. propylene oxide (PO) manufacturing joint venture (the U.S. PO Joint Venture) and a separate joint venture for certain related PO technology. Bayer's ownership interest represents ownership of annual in-kind PO production of the U.S. PO Joint Venture of 1.5 billion pounds in 2010. We take in-kind the remaining PO production and all co-product (styrene monomer (SM) or styrene) and tertiary butyl ether (TBA) production from the U.S. PO Joint Venture. In addition, we and Bayer each have a 50% interest in a separate manufacturing joint venture (the European PO Joint Venture), which includes a world-scale PO/SM plant at Maasvlakte near Rotterdam, The Netherlands. We and Bayer each are entitled to 50% of the PO and SM production at the European PO Joint Venture.

LYONDELLBASELL INDUSTRIES N.V.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Changes in our investment in the U.S. and European PO joint ventures for the three-month periods ended March 31, 2011 and 2010 are summarized as follows:

<u>Millions of dollars</u>		U.S. PO Joint Venture	European PO Joint Venture	Total PO Joint Ventures
Successor				
Investments in PO joint ventures	January 1, 2011	\$ 291	\$ 146	\$ 437
Cash contributions			5	5
Depreciation and amortization		(5)	(2)	(7)
Effect of exchange rate changes			9	9
Investments in PO joint ventures	March 31, 2011	\$ 286	\$ 158	\$ 444
Predecessor				
Investments in PO joint ventures	January 1, 2010	\$ 533	\$ 389	\$ 922
Return of investment			(3)	(3)
Depreciation and amortization		(10)	(5)	(15)
Effect of exchange rate changes			(24)	(24)
Investments in PO joint ventures	March 31, 2010	\$ 523	\$ 357	\$ 880

8. Equity Investments

The changes in equity investments were as follows:

<u>Millions of dollars</u>	For the three months ended	
	Successor	Predecessor
	March	March 31,
	31,	2010
	2011	
Beginning balance	\$ 1,587	\$ 1,085
Income from equity investments	58	55
Dividends received	(103)	(13)
Contributions to joint venture		5
Currency exchange effects	44	(13)
Other		6
Ending balance	\$ 1,586	\$ 1,125

LYONDELLBASELL INDUSTRIES N.V.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Summarized income statement information and our share for the periods for which the respective equity investments were accounted for under the equity method is set forth below:

<u>Millions of dollars</u>	For the three months ended			
	Successor March 31, 2011		Predecessor March 31, 2010	
	100%	Company Share	100%	Company Share
Revenues	\$ 3,587	\$ 1,239	\$ 2,338	\$ 744
Cost of sales	(2,727)	(998)	(2,035)	(653)
Gross profit	860	241	303	91
Net operating expenses	(541)	(143)	(63)	(21)
Operating income	319	98	240	70
Interest income			7	3
Interest expense	(58)	(16)	(37)	(12)
Foreign currency translation	(39)	(10)	22	10
Income from equity investments	10	3	1	
Income before income taxes	232	75	233	71
Provision for income taxes	53	17	51	16
Net income	\$ 179	\$ 58	\$ 182	\$ 55

A joint venture of ours is in default under its financing arrangement due to a delay in the start-up of its assets and as a result of LyondellBasell AF's voluntary filing for relief under chapter 11 of the U.S. Bankruptcy Code on April 24, 2009. The parties are currently negotiating in good faith to resolve the default and at present there is no evidence that such negotiations will not be concluded successfully or that the resolution of this matter will have a material adverse impact on our operations or liquidity.

9. Debt

Long-term loans, notes and other long-term debt consisted of the following:

<u>Millions of dollars</u>	March 31, 2011	December 31, 2010
Bank credit facilities:		
Senior Term Loan Facility due 2016	\$ 5	\$ 5
Senior Secured Notes due 2017, \$2,250 million, 8.0%	2,025	2,025
Senior Secured Notes due 2017, 375 million, 8.0%	480	452
Senior Secured Notes due 2018, \$3,240 million, 11.0%	3,240	3,240
Guaranteed Notes, due 2027	300	300
Other	8	18
Total	6,058	6,040
Less current maturities	(253)	(4)

Long-term debt	\$	5,805	\$	6,036
----------------	----	-------	----	-------

LYONDELLBASELL INDUSTRIES N.V.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Short-term loans, notes and other short-term debt consisted of the following:

<u>Millions of dollars</u>	March 31, 2011	December 31, 2010
\$1,750 million Senior Secured Asset-Based Revolving Credit Agreement	\$	\$
Financial payables to equity investees	11	11
Other	40	31
Total short-term debt	\$ 51	\$ 42

Senior Secured 8% Notes On April 8, 2010, LBI Escrow issued \$2,250 million of 8% senior secured notes due 2017 and 375 million of senior secured notes due 2017, (collectively, the Senior Secured 8% Notes). On April 30, 2010, Lyondell Chemical Company (Lyondell Chemical) was merged with and replaced LBI Escrow as issuer of the Senior Secured 8% Notes.

The Senior Secured 8% Notes are jointly and severally, and fully and unconditionally guaranteed by LyondellBasell N.V. and, subject to certain exceptions, each existing and future wholly owned U.S. restricted subsidiary of LyondellBasell N.V. (other than Lyondell Chemical, as issuer), other than any such subsidiary that is a subsidiary of a non-U.S. subsidiary (the Subsidiary Guarantors and, together with LyondellBasell N.V., the Guarantors).

In December 2010, we redeemed \$225 million of the dollar denominated and 37.5 (\$52 million) million of the Euro denominated senior secured 8% notes at a redemption price of 103% of par. In May 2011, we redeemed an additional \$203 million of 8% senior secured dollar notes and 34 million (\$48 million) of 8% senior secured Euro notes due 2017 at a redemption price of 103% of par. These amounts are classified as current maturities of long-term debt on the Consolidated Balance Sheet for March 31, 2011.

The Senior Secured 8% Notes are redeemable by Lyondell Chemical (i) prior to maturity at specified redemption premium percentages according to the date the notes are redeemed or (ii) from time to time at a redemption price of 100% of such principal amount plus an applicable premium as calculated pursuant to a formula.

In addition, Lyondell Chemical has the option to redeem up to 10% of the outstanding Senior Secured 8% Notes annually prior to May 1, 2013 at a redemption price equal to 103% of such notes principal amount. Also prior to May 1, 2013, Lyondell Chemical has the option to redeem up to 35% of the original aggregate principal amount of the Senior Secured 8% Notes at a redemption price of 108% of such principal amount, with the net proceeds of one or more equity offerings, provided that (i) at least 50% of the original aggregate principal amount remains outstanding immediately after such redemption and (ii) the redemption occurs within 90 days of the closing of the equity offering. The value of this embedded derivative is nominal.

Senior Secured 11% Notes On the Emergence Date, Lyondell Chemical issued \$3,240 million of Senior Secured 11% Notes, replacing the DIP Roll-up Notes that had been issued in January 2009 as part of the Debtors debtor-in-possession financing.

LYONDELLBASELL INDUSTRIES N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The Senior Secured 11% Notes are guaranteed by the same Guarantors that support the Senior Secured 8% Notes, the Senior Term Loan Facility and the U.S. ABL Facility. The Senior Secured 11% Notes are secured by the same security package as the Senior Secured 8% Notes, the Senior Term Loan Facility and the U.S. ABL Facility on a third priority basis and bear interest at a rate equal to 11%.

The Senior Secured 11% Notes are redeemable by Lyondell Chemical (i) at par on or after May 1, 2013 and (ii) from time to time at a redemption price of 100% of such principal amount plus an applicable premium as calculated pursuant to a formula.

In addition, Lyondell Chemical has the option to redeem up to 35% of the original aggregate principal amount of the Senior Secured 11% Notes at a redemption price of 111% of such principal amount, with the net proceeds of one or more equity offerings, provided that (i) at least 50% of the original aggregate principal amount remains outstanding immediately after such redemption and (ii) the redemption occurs within 90 days of the closing of the equity offering. The value of this embedded derivative is nominal.

Registration Rights Agreements In connection with the issuance of the Senior Secured 8% Notes and the Senior Secured 11% Notes (collectively, the Senior Secured Notes), we entered into certain registration rights agreements. The agreements require us to (i) exchange the Senior Secured 8% Notes for notes with substantially identical terms, except that the new notes will be registered with the SEC under the Securities Act of 1933, as amended, and will therefore be free of any transfer restrictions and (ii) register for resale the senior secured 11% notes held by the parties to the agreement related to those notes. The registration rights agreements require registration statements for the exchange or resale, as applicable, to be effective with the SEC by May 3, 2011, which has not occurred. As a result, beginning May 4, 2011, we are subject to penalties in the form of increased interest rates. The interest penalties are 0.25% per annum for each series of notes for the first 90 days that the registration statements are not effective, increasing by an additional 0.25% per annum for each additional 90 days, up to a maximum of 1.00% per annum. We currently cannot estimate the amount of penalties that we will ultimately pay, as we cannot estimate when the registration statements will become effective.

Senior Term Loan Facility On April 8, 2010, LBI Escrow borrowed \$500 million under a new six-year, \$500 million senior term loan facility (the Senior Term Loan Facility) and received proceeds, net of discount, of \$495 million. Borrowings under the Senior Term Loan Facility will bear interest at either (a) a LIBOR rate adjusted for certain additional costs or (b) a base rate determined by reference to the highest of the administrative agent's prime rate, the federal funds effective rate plus 0.5%, or one-month LIBOR plus 1.0% (the Base Rate), in each case plus an applicable margin.

The Senior Term Loan Facility is guaranteed, jointly and severally, and fully and unconditionally, on a senior secured basis, initially by the Guarantors.

In 2010, we made payments under the Senior Term Loan Facility totaling \$495 million, including a \$1 million mandatory quarterly amortization payment in September 2010 and \$494 million in December 2010. The payment in December 2010 satisfied all future amortization payments under the loan.

In March 2011, we amended and restated our Senior Secured Term Loan Agreement to, among other things, change the administrative agent and to modify the term of the agreement and certain restrictive covenants. This amended and restated agreement matures in April 2014.

LYONDELLBASELL INDUSTRIES N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

U.S. ABL Facility On April 8, 2010, Lyondell Chemical completed the financing of a four-year, \$1,750 million U.S. asset-based facility (U.S. ABL Facility), which may be used for advances or to issue up to \$700 million of letters of credit. Borrowings under the U.S. ABL Facility bear interest at the Base Rate or LIBOR, plus an applicable margin, and the lenders are paid a commitment fee on the average daily unused commitments.

At March 31, 2011, and December 31, 2010, there were no borrowings outstanding under the U.S. ABL facility and outstanding letters of credit totaled \$362 million and \$370 million, respectively. Pursuant to the U.S. ABL facility, Lyondell Chemical could, subject to a borrowing base, borrow up to \$1,388 million. The borrowing base is determined using formulae applied to accounts receivable and inventory balances, and is reduced to the extent of outstanding letters of credit and advances under the facility. Advances under this facility are available to our subsidiaries, Lyondell Chemical, Equistar Chemicals LP (Equistar), Houston Refining LP, or LyondellBasell Acetyls LLC.

Obligations under the U.S. ABL Facility are guaranteed jointly and severally, and fully and unconditionally, on a senior secured basis, by the Guarantors (except, in the case of any Guarantor that is a borrower under the facility, to the extent of its own obligations in its capacity as a borrower).

Guaranteed Notes due 2027 We have outstanding fixed interest rate Guaranteed Notes of \$300 million with a maturity date of March 15, 2027. The interest rate is 8.1% and the interest payment dates are September 15 and March 15. The Guaranteed Notes are guaranteed by LyondellBasell Industries Holdings B.V., a subsidiary of LyondellBasell N.V.

Receivables securitization programs In May 2010 we entered into a three-year European securitization facility. Transfers of accounts receivable under this program do not qualify as sales; therefore, the transferred accounts receivable and the proceeds received through such transfers are included in Trade receivables, net, and Short-term debt in the Consolidated Balance Sheets. The lenders receive a commitment fee on unused commitments. There were no outstanding balances under this facility at March 31, 2011 and December 31, 2010.

Other In the three months ended March 31, 2011 and 2010, amortization of debt premiums and debt issuance costs resulted in amortization expense of \$8 million and \$106 million, respectively, that was included in interest expense in the Consolidated Statements of Income.

At March 31 2011 and 2010, our weighted average interest rates on outstanding short-term debt was 3.8% and 8.9%, respectively.

10. Financial Instruments and Derivatives

Cash Concentration Our cash equivalents are placed in high-quality commercial paper, money market funds and time deposits with major international banks and financial institutions.

Market Risks We are exposed to market risks, such as changes in commodity pricing, currency exchange rates and interest rates. To manage the volatility related to these exposures, we selectively enter into derivative transactions pursuant to our policies. Designation of the derivatives as fair-value or cash-flow hedges is performed on a specific exposure basis. Hedge accounting may or may not be elected with respect to certain short-term exposures. The changes in fair value of these hedging instruments are offset in part or in whole by corresponding changes in the fair value or cash flows of the underlying exposures being hedged.

LYONDELLBASELL INDUSTRIES N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Commodity Prices We are exposed to commodity price volatility related to anticipated purchases of natural gas, crude oil and other raw materials and sales of our products. We selectively use commodity swap, option, and futures contracts with various terms to manage the volatility related to these risks. Such contracts are generally limited to durations of one year or less. Cash-flow hedge accounting may be elected for these derivative transactions. In cases, when the duration of a derivative is short, hedge accounting generally would not be elected. When hedge accounting is not elected, the changes in fair value of these instruments will be recorded in earnings. When hedge accounting is elected, gains and losses on these instruments will be deferred in accumulated other comprehensive income (AOCI), to the extent that the hedge remains effective, until the underlying transaction is recognized in earnings.

The Company entered into futures contracts with respect to sales of gasoline and heating oil. These futures transactions were not designated as hedges, and the changes in the fair value of the futures contracts were recognized in earnings. In the three months ended March 31, 2011, we settled futures positions for gasoline and heating oil of 119 million gallons and 157 million gallons, respectively, resulting in net gains of \$1 million and \$5 million, respectively. At March 31, 2011, futures contracts for 9 million gallons of gasoline and heating oil in the notional amount of \$29 million, maturing in May 2011, were outstanding. The fair values, based on quoted market prices, resulted in a net receivable of less than \$1 million at March 31, 2011 and a net payable of \$1 million at December 31, 2010.

We also entered into futures contracts during the three months ended March 31, 2011 with respect to purchases of butane and sales of gasoline. These futures transactions were not designated as hedges. At March 31, 2011, futures contracts for 6 million gallons of butane and 6 million gallons of gasoline in the notional amounts of \$12 million and \$18 million, respectively, maturing in October, November and December 2011, were outstanding. The fair values, based on quoted market prices, resulted in a net payable of less than \$1 million at March 31, 2011.

Foreign Currency Rates We have significant operations in several countries of which functional currencies are primarily the U.S. dollar for U.S. operations and the Euro for operations in Europe. We enter into transactions denominated in other than our functional currency and the functional currencies of our subsidiaries and are, therefore, exposed to foreign currency risk on receivables and payables. We maintain risk management control systems intended to monitor foreign currency risk attributable to both the outstanding foreign currency balances and future commitments. The risk management control systems involve the centralization of foreign currency exposure management, the offsetting of exposures and the estimating of expected impacts of changes in foreign currency rates on our earnings. We enter into foreign currency forward contracts to reduce the effects of our net currency exchange exposures. At March 31, 2011, foreign currency forward contracts in the notional amount of \$179 million, maturing in April 2011, were outstanding. The fair values, based on quoted market exchange rates, resulted in net payables of \$1 million at both March 31, 2011 and December 31, 2010.

For forward contracts that economically hedge recognized monetary assets and liabilities in foreign currencies, no hedge accounting is applied. Changes in the fair value of foreign currency forward contracts are reported in the Consolidated Statements of Income and offset the currency exchange results recognized on the assets and liabilities.

Foreign Currency Gain (Loss) Other income, net, in the Consolidated Statements of Income reflected a gain of \$10 million for the three months ended March 31, 2011 and losses of \$203 million for the three months ended March 31, 2010.

Warrants As of March 31, 2011, we have warrants outstanding to purchase 9,159,586 ordinary shares at an exercise price of \$15.90 per ordinary share. As of December 31, 2010 we had 11,508,104 warrants outstanding. The warrants have anti-dilution protection for in-kind stock dividends, stock splits, stock combinations and similar transactions and may be exercised at any time during the period from April 30, 2010 to the close of business on April 30, 2017. Upon an affiliate change of control, the holders of the warrants may put the warrants to

LYONDELLBASELL INDUSTRIES N.V.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

LyondellBasell N.V. requiring cash settlement at a price equal to, as applicable, the in-the-money value of the warrants or the Black-Scholes value of the warrants. The warrants are classified as a liability and are recorded at fair value at the end of each reporting period.

The fair value of each warrant granted is estimated based on quoted market price as of March 31, 2011. The fair values of the warrants were determined to be \$225 million and \$215 million at March 31, 2011 and December 31, 2010, respectively.

The following table summarizes derivative financial instruments outstanding as of March 31, 2011 and December 31, 2010 that are measured at fair value on a recurring basis and the bases used to determine their fair value in the consolidated balance sheets.

<u>Millions of dollars</u>	Notional Amount	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
March 31, 2011:					
Liabilities at fair value:					
Derivatives:					
Commodities	\$ 59	\$	\$	\$	\$
Warrants	146	225	225		
Foreign currency	179	1		1	
	\$ 384	\$ 226	\$ 225	\$ 1	\$
December 31, 2010:					
Liabilities at fair value:					
Derivatives:					
Gasoline and heating oil	\$ 70	\$ 1	\$	\$ 1	\$
Warrants	183	215	215		
Foreign currency	93	1		1	
	\$ 346	\$ 217	\$ 215	\$ 2	\$

The fair value of all non-derivative financial instruments included in current assets, including cash and cash equivalents and accounts receivable, and accounts payable, approximated the applicable carrying value due to the short maturity of those instruments.

There were no financial instruments measured on a recurring basis using level 3 inputs during the three months ended March 31, 2011 and 2010.

LYONDELLBASELL INDUSTRIES N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following table provides the fair value of derivative instruments and their balance sheet classifications:

LYONDELLBASELL INDUSTRIES N.V.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The carrying value and the estimated fair value of the Company's non-derivative financial instruments are shown in the table below:

<u>Millions of dollars</u>	March 31, 2011		December 31, 2010	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Short and long-term debt, including current maturities	\$ 6,106	\$ 6,766	\$ 6,079	\$ 6,819

The following table summarizes the bases used to measure certain liabilities at fair value on a recurring basis, which are recorded at historical cost or amortized cost, in the consolidated balance sheet:

<u>Millions of dollars</u>	Carrying Value	Fair Value	Fair Value Measurement		
			Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Short term and long-term debt, including current maturities	\$ 6,106	\$ 6,766	\$	\$ 6,721	\$ 45

For liabilities classified as Level 1, the fair value is measured using quoted prices in active markets. The total fair value is either the price of the most recent trade at the time of the market close or the official close price, as defined by the exchange in which the asset is most actively traded on the last trading day of the period, multiplied by the number of units held without consideration of transaction costs. For liabilities classified as Level 2, fair value is based on the price a market participant would pay for the security, adjusted for the terms specific to that asset and liability. Broker quotes were obtained from well established and recognized vendors of market data for debt valuations. The inputs for liabilities classified as Level 3 reflect our assessment of the assumptions that a market participant would use in determining the price of the asset or liability, including our liquidity risk at March 31, 2011.

The fair values of Level 3 instruments are determined using pricing data similar to that used in Level 2 financial instruments described above, and reflect adjustments for less liquid markets or longer contractual terms. For these Level 3 financial instruments, pricing data obtained from third party pricing sources is adjusted for the liquidity of the underlying over the contractual terms to develop an estimated price that market participants would use. Our valuation of these instruments considers specific contractual terms, present value concepts and other internal assumptions related to (i) contract maturities that extend beyond the periods in which quoted market prices are available; (ii) the uniqueness of the contract terms; and (iii) our creditworthiness or that of our counterparties (adjusted for collateral related to our asset positions). Based on our calculations, we expect that a significant portion of other debts will react in a generally proportionate manner to changes in the benchmark interest rate. Accordingly, these financial instruments are fair valued at par and are classified as Level 3.

LYONDELLBASELL INDUSTRIES N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

11. Pension and Other Postretirement Benefits

Net periodic pension benefits included the following cost components for the three months ended March 31:

<u>Millions of dollars</u>	Successor 2011		Predecessor 2010	
	U.S.	Non-U.S.	U.S.	Non-U.S.
Service cost	\$ 11	\$ 9	\$ 11	\$ 9
Interest cost	23	12	23	13
Expected return on plan assets	(26)	(7)	(24)	(7)
Curtailments and settlements loss		2		
Amortization			3	
Net periodic pension benefit costs	\$ 8	\$ 16	\$ 13	\$ 15

Net periodic other postretirement benefits included the following cost components for the three months ended March 31:

<u>Millions of dollars</u>	Successor 2011		Predecessor 2010	
	U.S.	Non-U.S.	U.S.	Non-U.S.
Service cost	\$ 4	\$ 2	\$ 1	\$
Interest cost	4		4	
Amortization			(2)	
Net periodic benefit costs	\$ 8	\$ 2	\$ 3	\$

Employees in the U.S. are eligible to participate in defined contribution plans (Employee Savings Plans) by contributing a portion of their compensation. We match a part of the employees' contribution.

12. Income Taxes

Our effective income tax rate for the first quarter 2011 was 28.5% resulting in tax expense of \$263 million on pretax income of \$923 million. The 2011 effective income tax rate was lower than the statutory 35% rate primarily due to the effect of pretax income in countries with lower statutory tax rates and tax deductible foreign currency losses which were partially offset by the non-deductible accrual of expense related to stock warrants. LyondellBasell AF's effective income tax rate for the first quarter 2010 was 60% resulting in tax expense of \$12 million on pretax income of \$20 million. The 2010 effective income tax rate was higher than the statutory 35% rate primarily due to the effects of non-deductible costs relating to the voluntary filings of petitions for relief under chapter 11 of the U.S. Bankruptcy Code, and to the recognition of valuation allowances established to reduce deferred tax assets not expected to be realized. The higher effective tax rate over statutory rate was partially offset by tax exempt income in jurisdictions other than the U.S.

LYONDELLBASELL INDUSTRIES N.V.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****13. Commitments and Contingencies**

Commitments We have various purchase commitments for materials, supplies and services incident to the ordinary conduct of business, generally for quantities required for its businesses and at prevailing market prices. These commitments are designed to assure sources of supply and are not expected to be in excess of normal requirements. Our capital expenditure commitments at March 31, 2011 were in the normal course of business.

Financial Assurance Instruments We have obtained letters of credit, performance and surety bonds and have issued financial and performance guarantees to support trade payables, potential liabilities and other obligations. Considering the frequency of claims made against the financial instruments we use to support our obligations, and the magnitude of those financial instruments in light of our current financial position, management does not expect that any claims against or draws on these instruments would have a material adverse effect on our consolidated financial statements. We have not experienced any unmanageable difficulty in obtaining the required financial assurance instruments for our current operations.

Environmental Remediation Our accrued liability for future environmental remediation costs at current and former plant sites and other remediation sites totaled \$113 million and \$107 million as of March 31, 2011 and December 31, 2010, respectively. At March 31, 2011, the accrued liabilities for individual sites range from less than \$1 million to \$39 million. The remediation expenditures are expected to occur over a number of years, and not to be concentrated in any single year. In our opinion, it is reasonably possible that losses in excess of the liabilities recorded may have been incurred. However, we cannot estimate any amount or range of such possible additional losses. New information about sites, new technology or future developments such as involvement in investigations by regulatory agencies, could require us to reassess our potential exposure related to environmental matters.

The following table summarizes the activity in the Company's accrued environmental liability included in Accrued liabilities and Other liabilities :

<u>Millions of dollars</u>	For the three months ended	
	Successor March 31, 2011	Predecessor March 31, 2010
Balance at beginning of period	\$ 107	\$ 89
Additional provisions	4	
Amounts paid	(3)	(1)
Foreign exchange effects	5	(4)
Balance at end of period	\$ 113	\$ 84

Litigation and Other Matters On April 12, 2005, BASF Corporation (BASF) filed a lawsuit against Lyondell Chemical in the Superior Court of New Jersey, Morris County, asserting various claims relating to alleged breaches of a propylene oxide toll manufacturing contract and seeking damages in excess of \$100 million. Lyondell Chemical denied breaching the contract and argued that at most it owed BASF \$22.5 million, which it has paid. On August 13, 2007, a jury returned a verdict in favor of BASF in the amount of approximately \$170 million (inclusive of the \$22.5 million refund). On October 3, 2007, the judge in the state court case determined that prejudgment interest on the verdict amounted to \$36 million and issued a final judgment. Lyondell Chemical appealed the judgment and has posted an appeal bond, which is collateralized by a \$200 million letter of credit.

LYONDELLBASELL INDUSTRIES N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

On April 21, 2010, oral arguments in the appeal were held before the Appellate Division and, on December 28, 2010, the judgment was reversed and the case was remanded. The parties have filed motions with the Bankruptcy Court for a determination as to whether the case will proceed in the Bankruptcy Court or New Jersey state court. We do not expect the ultimate resolution of this matter to have a material adverse effect on our consolidated financial position, or liquidity, although any such resolution may have a material adverse effect on our results of operation for any period in which a resolution occurs.

On December 20, 2010, one of our subsidiaries received demand letters from affiliates of Access Industries, a more than five percent shareholder of the Company. We conducted an initial investigation of the facts underlying the demand letters and engaged in discussions with Access. We requested that Access withdraw its demands with prejudice and, on January 17, 2011, Access declined to withdraw the demands, with or without prejudice. Specifically, Access affiliates Nell Limited (Nell) and BI S.á.r.l. (BI) have demanded that LyondellBasell Industries Holdings B.V., a wholly owned subsidiary of the Company (LBIH), indemnify them and their shareholders, members, affiliates, officers, directors, employees and other related parties for all losses, including attorney's fees and expenses, arising out of a pending lawsuit styled *Edward S. Weisfelner, as Litigation Trustee of the LB Litigation Trust v. Leonard Blavatnik, et al.*, Adversary Proceeding No. 09-1375 (REG), in the United States Bankruptcy Court, Southern District of New York.

In the *Weisfelner* lawsuit, the plaintiffs seek to recover damages from numerous parties, including Nell, Access and its affiliates. The damages sought from Nell, Access and its affiliates include, among other things, the return of all amounts earned by them related to their acquisition of shares of Lyondell Chemical prior to its acquisition by Basell AF S.C.A. in December 2007, distributions by Basell AF S.C.A. to its shareholders before it acquired Lyondell Chemical, and management and transaction fees and expenses. We cannot at this time determine the amount of liability, if any, that may be sought from LBIH by way of indemnity if a judgment is rendered or a settlement is paid in the *Weisfelner* lawsuit or other related litigation.

Nell and BI have also demanded that LBIH pay \$50 million in management fees for 2009 and 2010 and that LBIH pay other unspecified amounts relating to advice purportedly given in connection with financing and other strategic transactions.

Nell and BI assert that LBIH's responsibility for indemnity and the claimed fees and expenses arise out of a management agreement entered into on December 11, 2007, between Nell and Basell AF S.C.A. They assert that LBIH, as a former subsidiary of Basell AF S.C.A., is jointly and severally liable for Basell AF S.C.A.'s obligations under the agreement, notwithstanding that LBIH was not a signatory to the agreement and the liabilities of Basell AF S.C.A., which was a signatory, were discharged in the LyondellBasell bankruptcy proceedings.

On June 26, 2009, Nell filed a proof of claim in Bankruptcy Court against LyondellBasell AF (successor to Basell AF S.C.A.) seeking no less than \$723 thousand for amounts allegedly owed under the 2007 management agreement. On April 27, 2011, Lyondell Chemical filed an objection to Nell's claim and, together with LyondellBasell N.V. (successor to LyondellBasell AF) and LBIH, brought a declaratory judgment action in the Bankruptcy Court for a determination that Nell and BI's demands are not valid.

We do not believe that the management agreement is in effect or that the Company, LBIH, or any other Company-affiliated entity owes any obligations under the management agreement. We intend to defend vigorously any proceedings, claims or demands that may be asserted.

Indemnification We are parties to various indemnification arrangements, including arrangements entered into in connection with acquisitions, divestitures and the formation of joint ventures. Pursuant to these arrangements, we provide indemnification to and/or receive indemnification from other parties in connection with liabilities that may

LYONDELLBASELL INDUSTRIES N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

arise in connection with the transactions and in connection with activities prior to completion of the transactions. These indemnification arrangements typically include provisions pertaining to third party claims relating to environmental and tax matters and various types of litigation. As of March 31, 2011, we had not accrued any significant amounts for our indemnification obligations, and we are not aware of other circumstances that would likely lead to significant future indemnification obligations. We cannot determine the potential amount of future payments under the indemnification arrangements until events arise that would trigger a liability under the arrangements. In addition, certain third parties entered into agreements with the Predecessor, LyondellBasell AF, to indemnify LyondellBasell AF for a significant portion of the potential obligations that could arise with respect to costs relating to contamination at the Berre site in France and the Ferrara and Brindisi sites in Italy. These indemnity obligations are currently in dispute. We recognized a pretax charge of \$64 million as a change in estimate in the third quarter 2010 related to the dispute, which arose during that period.

As part of our technology licensing contracts, we give indemnifications to our licensees for liabilities arising from possible patent infringement claims with respect to proprietary licensed technology. Such indemnifications have a stated maximum amount and generally cover a period of five to ten years.

Other We have identified an agreement related to a former project in Kazakhstan under which a payment was made that raises compliance concerns under the U.S. Foreign Corrupt Practices Act (the "FCPA"). We have engaged outside counsel to investigate these activities, under the oversight of the Audit Committee of the Supervisory Board, and to evaluate internal controls and compliance policies and procedures. We made a voluntary disclosure of these matters to the U.S. Department of Justice and are cooperating fully with that agency. We cannot predict the ultimate outcome of these matters at this time since our investigations are ongoing. In this respect, we may not have conducted business in compliance with the FCPA and may not have had policies and procedures in place adequate to ensure compliance. Therefore, we cannot reasonably estimate a range of liability for any potential penalty resulting from these matters. Violations of these laws could result in criminal and civil liabilities and other forms of relief that could be material to us.

Certain of our non-U.S. subsidiaries conduct or have conducted business in countries subject to U.S. economic sanctions, including Iran. U.S. and European laws and regulations prohibit certain persons from engaging in business activities, in whole or in part, with sanctioned countries, organizations and individuals. We have made voluntary disclosure of these matters to the U.S. Treasury Department and intend to cooperate fully with that agency. The ultimate outcome of this matter cannot be predicted at this time because our investigations are ongoing. Therefore, we cannot reasonably estimate a range of liability for any potential penalty resulting from these matters. In addition, we have made the decision to cease all business with the government, entities and individuals in Iran, Syria and Sudan. We have notified our counterparties in these countries of our decision and may be subject to legal actions to enforce agreements with the counterparties. These business activities present a potential risk that could subject the Company to civil and criminal penalties as well as private legal proceedings that could be material to us. We cannot predict the ultimate outcome of this matter at this time because our investigations and withdrawal activities are ongoing. We and our joint ventures are, from time to time, defendants in lawsuits and other commercial disputes, some of which are not covered by insurance. Many of these suits make no specific claim for relief. Although final determination of any liability and resulting financial impact with respect to any such matters cannot be ascertained with any degree of certainty, we do not believe that any ultimate uninsured liability resulting from these matters will, individually or in the aggregate, have a material adverse effect on the financial position, liquidity or results of operations of LyondellBasell N.V.

LYONDELLBASELL INDUSTRIES N.V.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

General In our opinion, the matters discussed in this note are not expected to have a material adverse effect on the financial position or liquidity of LyondellBasell N.V. However, the adverse resolution in any reporting period of one or more of these matters could have a material impact on our results of operations for that period, which may be mitigated by contribution or indemnification obligations of others, or by any insurance coverage that may be available.

14. Stockholders Equity and Non-Controlling Interests

Dividend distribution Our credit arrangements include restrictive covenants that limit our ability to pay dividends to the sum of a) the greater of (i) \$50 million per year and (ii) in general, 50 percent of net income for the period, taken as one accounting period, from March 31, 2012 until the end of the most recently completed fiscal quarter for which financial statements are available, and b) dividends not to exceed the greater of \$350MM and 1.75% of consolidated tangible assets at the time the dividend is paid.

Ordinary shares The changes in the outstanding amounts of ordinary shares issued and treasury shares for the three months ended March 31, 2011, were as follows:

Ordinary shares issued:

Balance at January 1, 2011	565,676,222
Share-based compensation	10,508
Warrants exercised	2,327,326
Balance at March 31, 2011	568,014,056

Ordinary shares held as treasury shares:

Balance at January 1, 2011	1,122,651
Warrants exercised	20,453
Share-based compensation	(9,963)
Balance at March 31, 2011	1,133,141

Non-controlling Interests Losses attributable to non-controlling interests consisted of the following components:

<u>Millions of dollars</u>	For the three months ended	
	Successor March 31 2011	Predecessor March 31 2010
Non-controlling interests comprehensive income (loss):		
Net income attributable to non-controlling interests	\$ 2	\$ 4
Fixed operating fees paid to Lyondell Chemical by the PO/SM II partners	(5)	(6)
Comprehensive loss attributable to non-controlling interests	\$ (3)	\$ (2)

LYONDELLBASELL INDUSTRIES N.V.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)****15. Per Share Data**

Basic earnings per share for the periods subsequent to April 30, 2010 are based upon the weighted average number of shares of common stock outstanding during the periods. Diluted earnings per share includes the effect of certain stock options. The Company has unvested restricted stock and restricted stock units that are considered participating securities for earnings per share. Certain outstanding stock options, participating securities and all of the outstanding warrants were anti-dilutive.

Earnings per share data and dividends declared per share of common stock were as follows:

	For the three months ended March 31, 2011
<u>Millions of dollars</u>	
Net income	\$ 660
Less: net loss attributable to non-controlling interests	3
Net income attributable to LyondellBasell N.V.	663
Net income attributable to participating securities	(4)
Net income attributable to common stockholders	\$ 659
<u>Millions of shares</u>	
Basic weighted average common stock outstanding	566
Effect of dilutive securities:	
Stock options	3
Dilutive potential shares	569
Earnings per share:	
Basic	\$ 1.16
Diluted	\$ 1.15
Anti-dilutive stock options, restricted stock, restricted stock units and warrants in millions	13.5
Dividends declared per share of common stock	\$

LYONDELLBASELL INDUSTRIES N.V.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

16. Segment and Related Information

We operate in five segments:

Olefins and Polyolefins Americas, primarily manufacturing and marketing of olefins, including ethylene and its co-products, primarily propylene, butadiene, and aromatics, which include benzene and toluene, as well as ethanol; and polyolefins, including polyethylene, comprising high density polyethylene (HDPE), low density polyethylene (LDPE) and linear low density polyethylene (LLDPE), and polypropylene; and *Catalloy* process resins;

Olefins and Polyolefins Europe, Asia, International (O&P EAI), primarily manufacturing and marketing of olefins, including ethylene and its co-products, primarily propylene and butadiene; polyolefins, including polyethylene, comprising HDPE, LDPE and polypropylene; polypropylene-based compounds, materials and alloys (PP Compounds), *Catalloy* process resins and polybutene-1 polymers;

Intermediates and Derivatives (I&D), primarily manufacturing and marketing of propylene oxide (PO); PO co-products, including styrene and the TBA intermediates tertiary butyl alcohol (TBA), isobutylene and tertiary butyl hydroperoxide; PO derivatives, including propylene glycol, propylene glycol ethers and butanediol; ethylene derivatives, including ethylene glycol, ethylene oxide (EO), and other EO derivatives; acetyls, including vinyl acetate monomer, acetic acid and methanol and fragrance and flavor chemicals;

Refining and Oxyfuels, primarily manufacturing and marketing of refined petroleum products, including gasoline, ultra-low sulfur diesel, jet fuel, lubricants (lube oils), alkylate, and oxygenated fuels, or oxyfuels, such as methyl tertiary butyl ether (MTBE) and ethyl tertiary butyl ether (ETBE); and

Technology, primarily licensing of polyolefin process technologies and supply of polyolefin catalysts and advanced catalysts.

LYONDELLBASELL INDUSTRIES N.V.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Summarized financial information concerning reportable segments is shown in the following table for the periods presented:

Sales and other operating revenues and operating income (loss) in the Other column above include elimination of intersegment transactions.

17. Subsequent Events

We have evaluated subsequent events through the date the financial statements were issued.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

GENERAL

This discussion should be read in conjunction with the information contained in our Consolidated Financial Statements, and the notes thereto contained elsewhere in this report. When we use the terms we, us, our or similar words in this discussion, unless the context otherwise requires, we are referring to LyondellBasell Industries N.V. and its consolidated subsidiaries. We also refer to the Company as LyondellBasell N.V., the Successor Company and the Successor.

In addition to comparisons of current operating results with the same period in the prior year, we have included, as additional disclosure, certain trailing quarter comparisons of first quarter 2011 operating results to fourth quarter 2010 operating results. Our businesses are highly cyclical, in addition to experiencing some less significant seasonal effects. Trailing quarter comparisons may offer important insight into current business direction.

References to industry benchmark prices or costs, including the weighted average cost of ethylene production, are generally to industry prices and costs reported by CMAI, except that references to industry benchmarks for refining and oxyfuels market margins are to industry prices reported by Platts, a reporting service of The McGraw-Hill Companies, and crude oil and natural gas benchmark price references are to Bloomberg.

OVERVIEW

Our performance is driven by, among other things, global economic conditions generally and their impact on demand for our products, raw material and energy prices, and industry-specific issues, such as production capacity. Our businesses are subject to the cyclical and volatility seen in the chemicals and refining industries generally.

Tax Impact of Reorganization The application of the tax provisions of the Internal Revenue Code to the Plan of Reorganization resulted in the reduction or elimination of the majority of our tax attributes that otherwise would have carried forward into 2011 and later years. As a result, we do not expect to retain any U.S. net operating loss carryforwards, alternative minimum tax credits or capital loss carryforwards. In addition, we expect that most, if not all, of our tax basis in depreciable assets will be eliminated. Accordingly, it is expected that our liability for U.S. income taxes in future periods will reflect these adjustments and our estimated cash tax liabilities for the years following 2010 will be significantly higher than in 2009 or 2010. This situation may be somewhat postponed by the temporary bonus depreciation provisions contained in the Job Creation Act of 2010, which allows current year expensing for certain qualified acquisitions. As a result of certain prior year limitations on the deductibility of our interest expense in the U.S. we did retain approximately \$2,500 million of interest carryforwards which are available to offset future taxable income, subject to certain limitations.

LyondellBasell N.V., the successor holding company, owns and operates, directly and indirectly, substantially the same business owned and operated by LyondellBasell AF prior to the Company's emergence from bankruptcy. For accounting purposes, the operations of LyondellBasell AF are deemed to have ceased on April 30, 2010 and LyondellBasell N.V. is deemed to have begun operations on that date. Effective May 1, 2010, we adopted fresh-start accounting. References in the following discussions to the Company for periods prior to April 30, 2010, the Emergence Date, are to the Predecessor Company and, for periods after the Emergence Date, to the Successor Company.

To ensure a proper analysis of the quarter over quarter results, the effects of fresh-start accounting on the Successor period are specifically addressed throughout this discussion. The primary impacts of our reorganization pursuant to the Plan of Reorganization and the adoption of fresh-start accounting on our results of operations are as follows:

Inventory We adopted the last in, first out (LIFO) method of accounting for inventory upon implementation of fresh-start accounting. Prior to the emergence from bankruptcy, LyondellBasell AF used both the first in, first out (FIFO) and LIFO methods of accounting to determine inventory cost. For purposes of evaluating segment results, management reviewed operating results for LyondellBasell AF determined using current cost, which approximates results using the LIFO method of accounting for inventory. Subsequent to the Emergence Date, our operating results are reviewed using the LIFO method of accounting for inventory. While determining the impact of the adoption of LIFO on predecessor periods is not practicable, we believe that the current cost method used by the Predecessor for segment reporting is similar to LIFO and the current cost method would have resulted in a decrease of cost of sales of \$184 million for the three months ended March 31, 2010.

Depreciation and amortization expense Depreciation and amortization expense is lower in the Successor period as a result of our revaluation of assets for fresh-start accounting. Depreciation and amortization as reported for all periods presented is as follows:

<u>Millions of dollars</u>	Successor Three Months Ended March 31, 2011	Predecessor Three Months Ended March 31, 2010
Cost of sales:		
Depreciation	\$ 160	\$ 348
Amortization	44	56
Research and development expenses:		
Depreciation	5	6
Selling, general and administrative expenses:		
Depreciation	6	14
	\$ 215	\$ 424

Interest expense Lower interest expense in the Successor period was largely driven by the discharge or repayment of debt, upon which interest was accruing during the bankruptcy, through the Company's reorganization on April 30, 2010 pursuant to the Plan of Reorganization, partially offset by interest expense on the new debt incurred as part of the emergence from bankruptcy.

<u>Millions of dollars</u>	Successor Three Months Ended March 31, 2011	Predecessor Three Months Ended March 31, 2010
Interest expense	\$ 163	\$ 411

Overview of Results of Operations

Global market conditions in the first quarter of 2011 improved from those experienced in the first quarter 2010 as general economic activities and demand in the durable goods sector, particularly the automotive markets, were higher. As a result, demand and operating rates were higher in 2011 than in the 2010 period.

Excluding the impacts of fresh-start accounting, operating results in the first quarter 2011 generally reflected higher product margins compared to the same period in 2010. The O&P-Americas business segment benefited from higher product margins driven by lower natural gas liquid prices relative to the price of crude oil. Higher operating results in the O&P-EAI and the I&D businesses were primarily a reflection of higher product margins and higher sales volumes

due to improvement in the global economy and in the durable goods markets. The Refining and Oxyfuels

business segment results reflected the benefit of higher refining margins at the Houston refinery. Revenues associated with licenses granted in prior periods contributed to higher results in the Technology segment. Results of operations for the Successor and Predecessor periods discussed in these Results of Operations are presented in the table below.

	Successor Three Months Ended March 31, 2011	Predecessor Three Months Ended March 31, 2010
<u>Millions of dollars</u>		
Sales and other operating revenues	\$ 12,252	\$ 9,755
Cost of sales	10,943	9,130
Selling, general and administrative expenses	211	217
Research and development expenses	33	41
Operating income	1,065	367
Interest expense	(163)	(411)
Interest income	8	2
Other expense, net	(43)	(200)
Income from equity investments	58	55
Reorganization items	(2)	207
Provision for income taxes	263	12
Net income	\$ 660	\$ 8

RESULTS OF OPERATIONS

Revenues Revenues increased by \$2,497 million in the first quarter 2011 compared to the first quarter 2010 primarily due to higher average product sales prices across most products. Higher sales volumes in several products in the first quarter 2011 also contributed to the increase in revenues.

Cost of Sales The \$1,813 million increase in first quarter 2011 cost of sales was primarily due to higher raw material costs, which reflect the effects of higher prices for crude oil and other hydrocarbons compared to the first quarter 2010. Depreciation and amortization expense was \$209 million lower in the first quarter 2011 compared to the 2010 period, primarily due to the \$7,474 million write-down of Property, plant and equipment associated with the April 2010 revaluation of our assets in fresh-start accounting.

Operating Income The increase in operating income in the first quarter 2011, compared to the first quarter 2010, is primarily due to higher product margins across the majority of our products and the effect of higher sales volumes as demand increased due to improved global market conditions. Operating results in the first quarter 2011 benefited from lower depreciation and amortization expense of \$209 million primarily due to the \$7,474 million write-down of Property, plant, and equipment associated with the revaluation of our assets in fresh-start accounting in April 2010. Operating results for each of our business segments are reviewed further in the Segment Analysis section below.

Interest Expense Interest expense was \$248 million lower in the first quarter 2011 compared to the same period in 2010, primarily due to the repayment or discharge of higher cost debt on the Emergence Date in accordance with the Plan of Reorganization, upon which interest had been accruing during the bankruptcy, and the repayment of \$1,233 million of debt in the fourth quarter 2010. This decrease in interest expense was partially offset by interest expense on the lower cost debt incurred as part of the emergence financing.

Other Expense, net Other expense, net, in the first quarter 2011 included the negative effect of \$59 million for the fair value adjustment of the warrants to purchase our shares, partially offset by \$10 million of foreign exchange gains. Other expense, net, in 2010 included \$202 million of unrealized foreign exchange losses.

Reorganization Items The Company had reorganization items expense totaling \$2 million in the first quarter 2011 and income from reorganization items of \$207 million in the first quarter 2010. Reorganization items in the 2010 period included a \$185 million adjustment primarily related to rejected contracts, a \$136 million reduction of environmental remediation liabilities and a net \$1 million contract settlement, partially offset by \$81 million in professional fees, damages related to the rejection of executory contracts of \$25 million and plant closure costs of \$9 million.

Income Tax Our effective income tax rate for the first quarter 2011 was 28.5% resulting in tax expense of \$263 million on pretax income of \$923 million. The 2011 effective income tax rate was lower than the statutory 35% rate primarily due to the effect of pretax income in countries with lower statutory tax rates and tax deductible foreign currency losses which were partially offset by the non-deductible accrual of expense related to stock warrants. LyondellBasell AF's effective income tax rate for the first quarter 2010 was 60% resulting in tax expense of \$12 million on pretax income of \$20 million. The 2010 effective income tax rate was higher than the statutory 35% rate primarily due to the effects of non-deductible costs relating to the voluntary filings of petitions for relief under chapter 11 of the U.S. Bankruptcy Code, and to the recognition of valuation allowances established to reduce deferred tax assets not expected to be realized. The higher effective tax rate over statutory rate was partially offset by tax exempt income in jurisdictions other than the U.S.

Net Income The following table summarizes the major components contributing to net income:

<u>Millions of dollars</u>	Successor Three Months Ended March 31, 2011	Predecessor Three Months Ended March 31, 2010
Operating income	\$ 1,065	\$ 367
Interest expense, net	(155)	(409)
Other expense, net	(43)	(200)
Income from equity investments	58	55
Reorganization items	(2)	207
Provision for income taxes	263	12
Net income	\$ 660	\$ 8

First Quarter 2011 versus Fourth Quarter 2010 Net income was \$660 million in the first quarter 2011 compared to \$766 million in the fourth quarter 2010. Net income in the fourth quarter 2010 included a benefit from the release of non-U.S. valuation allowances against net deferred tax assets and a \$323 million non-cash credit before tax, related to the recovery of market price associated with lower of cost or market adjustments to our raw materials inventories recorded earlier in 2010. Apart from these fourth quarter benefits, net income in the first quarter 2011 reflects improvements in operating results for our O&P-EAI, Technology and I&D segments; the operations of our joint venture partners; as well as lower interest expense compared to the fourth quarter 2010.

Segment Analysis

Our operations are primarily in five reportable segments: O&P Americas; O&P EAI; I&D; Refining and Oxyfuels; and Technology. These operations comprise substantially the same businesses owned and operated by LyondellBasell AF prior to the Company's emergence from bankruptcy. However, for accounting purposes, the operations of LyondellBasell AF are deemed to have ceased on April 30, 2010 and LyondellBasell N.V. is deemed to have begun operations on that date. The results of operations for the Successor are not comparable to the Predecessor due to adjustments made under fresh-start accounting as described in Overview. The impact of these items is addressed in the discussion of each segment's results below.

The following tables reflect selected financial information for our reportable segments. Operating income (loss) for segment reporting is on a LIFO basis for the Successor and on a current cost basis for the Predecessor.

	Successor Three Months Ended March 31, 2011	Predecessor Three Months Ended March 31, 2010
<u>Millions of dollars</u>		
Sales and other operating revenues:

O&P Americas segment	\$ 3	\$ 4
O&P EAI segment	51	52
I&D segment	4	(1)
Total	\$ 58	\$ 55

Olefins and Polyolefins Americas Segment

Overview In the first quarter 2011, the U.S. ethylene industry benefited from processing natural gas liquids, which yielded lower cost ethylene compared to that produced from crude oil-based liquids, which is the predominant feedstock used in the rest of the world. Ethylene margins remained strong in the first quarter 2011 primarily due to continued advantaged ethane prices and a favorable supply/demand balance. The polyethylene market remained strong while increasing prices for propylene pressured the polypropylene market in the first quarter of 2011.

Ethylene Raw Materials Benchmark crude oil and natural gas prices generally have been indicators of the level and direction of the movement of raw material and energy costs for ethylene and its co-products in the O&P Americas segment. Ethylene and its co-products are produced from two major raw material groups:

crude oil-based liquids (liquids or heavy liquids), including naphtha, condensates, and gas oils, the prices of which are generally related to crude oil prices; and
 natural gas liquids (NGLs, principally ethane and propane, the prices of which are generally affected by natural gas prices.

Although the prices of these raw materials are generally related to crude oil and natural gas prices, during specific periods the relationships among these materials and benchmarks may vary significantly.

In the U.S., we have a significant capability to shift the ratio of raw materials used in the production of ethylene and its co-products to take advantage of the relative costs of heavy liquids and NGLs.

In the first quarter 2011, production economics for the U.S. industry favored NGLs. As a result, we focused on maximizing the use of NGLs at our U.S. plants. A temporary disruption of NGLs supply from one of our suppliers modestly reduced the percent of our ethylene production from NGLs in the first quarter 2011 to approximately 70%, which is comparable to the ethylene production from NGLs in the first quarter 2010. Based on current trends and assuming the price of crude oil remains at a high level, we would expect production economics in the U.S. to continue to favor NGLs.

The following table shows the average U.S. benchmark prices for crude oil and natural gas for the applicable periods, as well as benchmark U.S. sales prices for ethylene and propylene, which we produce and sell or consume internally, and certain polyethylene and polypropylene products. The benchmark weighted average cost of ethylene production, which is reduced by co-product revenues, is based on CMAI 's estimated ratio of heavy liquid raw materials and NGLs used in U.S. ethylene production.

	Average Benchmark Price and Percent Change Versus Prior Year Period		
	Average		
	For the three months ended		
	March 31,		
	2011	2010	Change
Crude oil dollars per barrel	94.60	78.88	20%
Natural gas dollars per million BTUs	4.19	5.36	(22)%
Weighted average cost of ethylene production - cents per pound	32.6	34.2	(5)%
United States cents per pound:			
Ethylene	49.3	52.3	(6)%
Polyethylene (HD)	87.7	83.3	5%
Propylene polymer grade	71.7	61.5	17%
Polypropylene	100.8	87.8	15%

The following table sets forth the O&P Americas segment's sales and other operating revenues, operating income, income from equity investments and selected product sales volumes.

<u>Millions of dollars</u>	Successor For the Three Months Ended March 31, 2011	Predecessor For the Three Months Ended March 31, 2010
Sales and other operating revenues	\$ 3,572	\$ 3,020
Operating income	421	145
Income from equity investments	3	4
 <u>Production Volumes, in millions of pounds</u>		
Ethylene	2,089	2,019
Propylene	769	755
<u>Sales Volumes, in millions of pounds</u>		
Polyethylene	1,415	1,330
Polypropylene	593	615

Revenues O&P Americas revenues in 2011 increased by \$552 million, or 18%, compared to 2010 primarily due to higher average sales prices for polyolefins and ethylene co-products, and higher polyethylene and *Catalloy* sales volumes. An improved supply/demand balance and higher crude-oil based raw material costs contributed to the higher average sales prices in the first quarter 2011. Lower polypropylene sales volumes were primarily due to weaker demand in North America.

Operating Income Operating results for the O&P Americas segment reflected an increase of \$276 million in first quarter 2011 compared to first quarter 2010. The increase was partly due to higher product margins, primarily polyethylene. The higher product margins for polyethylene reflect higher average sales prices combined with slightly lower ethylene prices compared to the first quarter 2010. Relatively unchanged product margins for ethylene reflect higher average co-product sales prices and lower natural gas liquids costs that together offset higher crude oil-based raw material costs. Depreciation and amortization expense was \$61 million lower in the first quarter 2011 compared to the same period in 2010 primarily a result of the write-down of Property, plant and equipment associated with the revaluation of our assets in fresh-start accounting.

First Quarter 2011 versus Fourth Quarter 2010 The O&P Americas segment had operating income of \$421 million in the first quarter 2011 compared to \$446 million in the fourth quarter 2010. Operating results in the fourth quarter 2010 included a non-cash benefit of \$163 million related to inventory market price recovery, which partially offset the charges recorded earlier in 2010 to adjust inventory to market value after the Emergence Date. Apart from this benefit, operating results for the O&P-Americas segment increased by \$138 million. This increase is primarily attributable to higher product margins, particularly ethylene, lower fixed costs and to a lesser extent, the effect of higher sales volumes. Product margins for ethylene and its co-products reflect higher sales prices which outpaced the increase in raw material prices. Fixed costs were lower in the first quarter 2011, compared to the fourth quarter 2010, which reflected higher maintenance costs related to planned and unplanned outages and employee bonus expense.

Olefins and Polyolefins Europe, Asia and International Segment

Overview Ethylene market demand in Europe was generally higher in the first quarter 2011 compared to first quarter 2010. Ethylene industry margins expanded as benchmark average sales prices increased more than the benchmark weighted average cost of ethylene production. Global polyolefin markets also improved in the first quarter of 2011 compared to the same period in 2010.

The O&P EAI segment operating results for the first quarter of 2011 reflected improved economic conditions and higher product margins, particularly for olefins and polypropylene. Sales volumes across all products reflect higher demand in 2011 compared to the first quarter 2010. Operating results for the Successor period also reflected the impacts of fresh-start accounting, including the benefit of lower depreciation and amortization expense related to the write-down of segment assets (see Results of Operations-Cost of Sales).

Ethylene Raw Materials In Europe, heavy liquids are the primary raw materials for our ethylene production. The following table shows the average West Europe benchmark prices for Brent crude oil for the applicable periods, as well as benchmark West Europe prices for ethylene and propylene, which we produce and consume internally or purchase from unrelated suppliers, and certain polyethylene and polypropylene products.

	Average Benchmark Price and Percent Change Versus Prior Year Period		
	Average		
	For the three months ended		
	March 31,		
	2011	2010	Change
Brent crude oil dollars per barrel	105.65	77.79	36%
Western Europe 0.01 per pound			
Weighted average cost of ethylene production	34.7	28.7	21%
Ethylene	52.0	41.6	25%
Polyethylene (high density)	62.1	51.4	21%
Propylene	50.8	38.9	30%
Polypropylene (homopolymer)	66.6	51.3	30%
Average Exchange Rate \$US per	1.3659	1.3849	(1)%

The following table sets forth the O&P EAI segment's sales and other operating revenues, operating income, income from equity investments and selected product production and sales volumes.

	Successor For the Three Months Ended March 31, 2011	Predecessor For the Three Months Ended March 31, 2010

Polyethylene	1,314	1,239
Polypropylene	1,704	1,538

Revenues Revenues increased by \$825 in the first quarter 2011 compared to revenues in the first quarter 2010 primarily due to higher average product sales prices. These sales prices reflect the effects of higher raw material costs and demand, which was particularly weak in the first quarter 2010.

Operating Income The O&P EAI segment had operating income of \$179 million during the first quarter 2011 compared to \$71 million in first quarter 2010. The underlying operating results of our O&P EAI business segment were higher in the first quarter 2011 compared to the same period in 2010, primarily as a result of higher product margins for ethylene, butadiene and polypropylene and the effect of higher sales volumes, partially offset by higher fixed costs. The strength in butadiene margins reflects strong global demand coupled with constrained supply as a result of a global preference for NGL processing. Depreciation and amortization expense was \$24 million lower in the first quarter 2011 compared to the same 2010 period primarily due to the write-down of Property, plant and equipment associated with the revaluation of our assets in fresh-start accounting. Operating results in the first quarter 2010 included a \$23 million charge for plant closure and other costs related to a polypropylene plant in Terni, Italy.

First Quarter 2011 versus Fourth Quarter 2010 The O&P EAI segment had operating income of \$179 million in the first quarter 2011 compared to \$66 million in the fourth quarter 2010. The increase in operating results in the first quarter 2011, compared to the fourth quarter 2010, is primarily attributable to higher olefins margins and fixed costs that were lower than the high spending level related to our maintenance program in the fourth quarter 2010. The higher product margins for olefins reflected a recovery from the lower margins experienced in the fourth quarter 2010, when price increases were outpaced by the increase in raw material costs. Operating results in the fourth quarter 2010 included a \$10 million non-cash credit related to inventory market price recovery, which offsets the charges recorded earlier in 2010 to adjust inventory to market value after the Emergence Date.

Intermediates and Derivatives Segment

Overview Market demand for PO and PO derivatives remained strong in the first quarter 2011.

The I&D segment continued to experience favorable business conditions in the first quarter 2011 as reflected by higher margins for most products. PO and its derivatives sales volumes remained relatively unchanged compared to the first quarter 2010, while margins for certain PO derivatives increased. Operating results reflect higher sales volumes for virtually all intermediate products in the first quarter 2011, and higher margins for EO and derivatives, acetyls and TBA intermediates. Operating results for the first quarter 2011 reflected the impacts of fresh-start accounting, including the benefit of lower depreciation and amortization expense related to the write-down of segment assets. See Results of Operations Cost of Sales.

The following table sets forth the Intermediates & Derivatives segment's sales and other operating revenues, operating income, income from equity investments and selected product sales volumes.

	Successor For the Three Months Ended March 31, 2011	Predecessor For the Three Months Ended March 31, 2010
<u>Millions of dollars</u>		
Sales and other operating revenues	\$ 1,692	\$ 1,316
Operating income	234	123
Income (loss) from equity investments	4	(1)
<u>Sales Volumes, in millions of pounds</u>		
PO and derivatives	838	869
EO and derivatives	288	265
Styrene	852	589
Acetyls	439	379
TBA intermediates	485	472

Revenues Revenues for the first quarter 2011 increased \$376 million, or 29%, compared to the first quarter 2010. The increase in revenue reflects higher average sales prices across all products and higher intermediate and derivative sales volumes, particularly styrene, and EO and derivatives. Higher styrene sales volumes were attributable to higher production rates while strong demand contributed to the higher sales volumes for EO and derivatives. Sales volumes for PO and its derivatives declined slightly.

Operating Income Operating results for the I&D segment in the first quarter 2011 increased \$111 million compared to the first quarter 2010. The increase in operating results reflect the effect of higher sales volumes for most products and higher margins for acetyls and EO and derivatives. The lower costs of ethylene and natural gas as well as improved industry conditions contributed to the higher acetyls and EO and derivative margins, while margins for TBA intermediates benefited by the rising price of gasoline relative to the cost of natural gas-based raw materials. Operating results in the first quarter 2011 also reflect lower depreciation and amortization expense of \$35 million compared to the same period in 2010 primarily due to the write-down of Property, plant and equipment associated with the revaluation of our assets in fresh-start accounting.

First Quarter 2011 versus Fourth Quarter 2010 The I&D segment had operating income of \$234 million in the first quarter 2011 compared to \$196 million in the fourth quarter 2010. Operating results in the first quarter 2011 reflect the effect of higher sales volumes for most products and higher margins for TBA intermediates and EO and derivatives, which were partially offset by lower product margins for PO and derivatives. Margins for EO and derivatives were higher as strong demand supported the pass through of price increases, while margins for TBA intermediates reflect the beneficial effect of the rising price of gasoline relative to the cost of natural-gas based raw materials. Margins for PO and PO derivatives decreased primarily as a result of rising propylene prices and the timing of price increases. Operating results for EO and derivatives were negatively impacted in the fourth quarter 2010 by planned and unplanned maintenance activities. Operating results in the fourth quarter 2010 also included a non-cash benefit of \$17 million related to the partial recovery of inventory market price in the fourth quarter 2010 of a charge recorded earlier in 2010 to adjust inventory to market value after the Emergence Date.

Refining and Oxyfuels Segment

Overview In the first quarter 2011 compared to the first quarter 2010, benchmark heavy crude refining margins were higher as a result of strong product spreads to WTI crude oil. The Maya 211 (heavy to light) crude oil differential, which declined in the first quarter 2011, reflected depressed prices for WTI crude oil relative to other light crude oils, such as Brent and Light Louisiana Sweet crudes. The differential between Maya crude oil and these light crude oils expanded and overall, the Maya 211 benchmark spread increased relative to the first quarter 2010 benchmark spread. The U.S. refining industry benefited from higher refining margins in the first quarter 2011, while the refining industry in Europe continued to be challenged by overcapacity. Seasonally higher margins for oxyfuels benefited from higher gasoline prices relative to the cost of natural gas liquids-based raw material costs.

Segment operating results in the first quarter 2011, compared to the first quarter 2010, primarily reflected higher benchmark refining margins. Crude processing rates were relatively unchanged at the Houston refinery and higher at the Berre refinery. Oxyfuels results were higher in the first quarter 2011 compared to first quarter 2010. Operating results for the first quarter 2011 reflect the impacts of fresh-start accounting, including the benefit of lower depreciation and amortization expense related to the write-down of segment assets. See Results of Operations Cost of Sales.

The following table sets forth the Refining and Oxyfuels segment's sales and other operating revenues, operating income and sales volumes for certain gasoline blending components for the applicable periods. In addition, the table shows market refining margins for the U.S. and Europe and MTBE margins in Northwest Europe (NWE). In the U.S., WTI, or West Texas Intermediate, is a light crude oil, while Maya is a heavy crude oil. In Europe, Urals 4-1-2-1 is a measure of West European refining margins.

	Successor For the Three Months Ended March 31, 2011	Predecessor For the Three Months Ended March 31, 2010
<u>Millions of dollars</u>		
Sales and other operating revenues	\$ 4,720	\$ 3,415
Operating income (loss)	164	(128)
<u>Sales Volumes, in millions</u>		
Gasoline blending components MTBE/ETBE (gallons)	196	189
<u>Crude processing rates (thousands of barrels per day)</u>		
Houston Refining	258	263
Berre Refinery	101	73
<u>Market margins \$ per barrel</u>		
WTI 2-1-1	19.06	6.85
WTI Maya	4.63	8.94
Total	23.69	15.79
Urals 4-1-2-1	7.81	5.91
<u>Market margins cents per gallon</u>		
MTBE NWE	58.0	48.2

Revenues Revenues for the Refining and Oxyfuels segment increased \$1,305 million, or 38%, in the first quarter 2011 compared to first quarter 2010. The increase in revenues is primarily due to higher average sales prices and the effect of higher refining sales volumes, partially offset by lower sales volumes of oxyfuels products. Crude processing rates for the Berre refinery were 38% higher in the first quarter 2011, compared to first quarter 2010, while crude processing rates at the Houston refinery were relatively unchanged. Sale volumes for oxyfuels products were negatively impacted in the first quarter of 2011 due to labor issues at a French manufacturing site.

Operating Income (Loss) Operating results for the first quarter 2011 improved by \$292 million compared to the first quarter 2010. The \$292 million improvement primarily reflects higher refining margins at the Houston refinery as reflected by the increase in Maya 2-1-1 benchmark margin, and higher oxyfuels margins. Product margins for oxyfuels products reflect the effect of higher gasoline prices. Depreciation and amortization expense in the first quarter 2011 was \$93 million lower than in the first quarter 2011 primarily as a result of the write-down of Property, plant and equipment associated with the revaluation of our assets in fresh-start accounting. Operating results in the first quarter 2011 also include a \$34 million insurance recovery associated with the conduct of a former employee who pled guilty, to among other things, conspiracy to commit fraud.

First Quarter 2011 versus Fourth Quarter 2010 The Refining and Oxyfuels segment had operating income of \$164 million in the first quarter 2011 compared to \$144 million in the fourth quarter 2010. The results of underlying operations of the Refining and Oxyfuels segment in the first quarter 2011 primarily reflect higher refining margins at the Houston refinery and higher oxyfuels product margins. Higher margins at the Houston refinery are due to stronger product spreads, partially offset by the effect of the first quarter 2011 turnaround of the fluid catalytic cracking unit. Crude processing rates at the Houston refinery were 10% higher in the first quarter 2011 compared to

the fourth quarter 2010 which was negatively impacted by several unplanned outages. Crude processing rates at the Berre refinery, which were negatively impacted in the fourth quarter 2010 by national labor actions, were 26% higher in the first quarter 2011. Refining margins at the Berre refinery were lower in the first quarter 2011 as naphtha product prices did not keep pace with the increases in crude oil costs. Oxyfuels product margins, which improved in the first quarter 2011 compared to the fourth quarter 2010, reflect the benefit of a higher spread between butane and gasoline. The first quarter 2011 included the \$34 million insurance recovery described above. Operating results in the fourth quarter 2010 reflect the non-cash benefit of \$132 million related to inventory market price recovery, which offset the lower of cost or market charges recorded earlier in 2010.

Technology Segment

Overview The Technology segment first quarter 2011 results improved primarily as a result of higher licensing revenue compared to the first quarter of 2010. The following table sets forth the Technology segment's sales and other operating revenues and operating income.

<u>Millions of dollars</u>	Successor For the Three Months Ended March 31, 2011	Predecessor For the Three Months Ended March 31, 2010
Sales and other operating revenues	\$ 139	\$ 110
Operating income	66	31

Revenues Revenues for the first quarter 2011 increased by \$29 million, or 26% compared to first quarter 2010. The increase was primarily due to higher process license revenue and slightly higher catalyst sales volumes.

Operating Income Operating income in the first quarter 2011 increased \$35 million compared to first quarter 2010 reflecting the effects of higher process license revenue in the first quarter 2011 and to a lesser extent, the effect of slightly higher catalyst sales volumes. Operating income in the first quarter 2010 reflected the impact of a slowdown in polyolefin projects that stemmed from the economic crisis in late 2008.

First Quarter 2011 versus Fourth Quarter 2010 The Technology segment had operating income of \$66 million in the first quarter 2011 compared to \$8 million in the fourth quarter 2010, which included charges of \$17 million and \$8 million related to the sale of higher cost inventory during 2010 and a dispute over an environmental liability, respectively. Excluding the impact of these fourth quarter charges, operating results in the first quarter improved \$33 million primarily due to the effects of higher catalyst sales volumes and higher process license revenue, as well as lower R&D costs.

FINANCIAL CONDITION

Operating, investing and financing activities of continuing operations, which are discussed below, are presented in the following table:

<u>Millions of dollars</u>	Successor Three Months Ended March 31, 2011	Predecessor Three Months Ended March 31, 2010
Source (use) of cash:		
Operating activities	\$ 221	\$ (373)
Investing activities	(216)	(127)
Financing activities	28	490

Operating Activities Cash of \$221 million provided in the first quarter of 2011 primarily reflected an increase in earnings and higher distributions from our joint ventures, partially offset by an increase in cash used by the main components of working capital and company contributions to our pension plans. The \$373 million of cash used in the first quarter of 2010 primarily reflected an increase in the main components of working capital, payments of reorganization items and certain annual payments related to sales rebates, employee bonuses and property taxes, partially offset by higher earnings and lower vendor prepayments in the first quarter 2010.

The main components of working capital used cash of \$432 million in the first quarter of 2011 compared to \$742 million in the first quarter of 2010. The increase in these working capital components during the first quarter 2011 is primarily attributable to a \$799 million increase in inventory. This increase in inventory reflects the effects of higher average prices of crude oil in the first quarter 2011, compared to the fourth quarter 2010, a build in inventory as the Company prepared for maintenance activities and opportunistic purchases of discounted crude oil. A \$1,264 million increase in accounts payable due to higher feedstock volumes and costs and the timing of payments more than offset a \$897 million increase in accounts receivable that reflects the effect of higher average sales prices. In the first quarter of 2010, changes in the main components of working capital used cash of \$742 million. These changes reflected the effects of higher sales volumes and increases in inventory due to the timing and receipts of crude oil shipments and additions to inventory in preparation for maintenance at a U.S. olefins plant, partially offset by increases in accounts payable due to the higher costs of feedstocks.

Investing Activities Cash of \$216 million used in investing activities in the first quarter of 2011 primarily reflects capital expenditures for the period. Investing activities of \$127 million in the first quarter of 2010 reflect capital expenditures that were partially offset by proceeds of \$12 million from a money market fund that had suspended rights to redemption in 2008.

The following table summarizes capital expenditures for the periods presented:

<u>Millions of dollars</u>	Successor Three Months Ended March 31, 2011	Predecessor Three Months Ended March 31, 2010
Capital expenditures by segment:		
O&P Americas	\$ 66	\$ 30
O&P EAI	42	59
I&D	5	4
Refining and Oxyfuels	101	35
Technology	7	10
Other	1	1
Total capital expenditures by segment	222	139
Less:		
Contributions to PO Joint Ventures	(1)	
Consolidated capital expenditures of continuing operations	\$ 221	\$ 139

The capital expenditures in the first quarter 2010 presented in the table above exclude costs of major periodic maintenance and repair activities, including turnarounds and catalyst recharges of \$74 million.

Financing Activities Financing activities provided cash of \$28 million and \$490 million in the first quarter of 2011 and 2010, respectively. Proceeds of \$37 million received upon the conversion of warrants to common stock in the first quarter 2011 were partially offset by \$9 million related to bank overdraft activity.

In the first quarter of 2010, the Predecessor borrowed \$525 million under its DIP revolving credit facility and made payments of \$13 million related to the extension of the DIP financing facilities. In addition, the Predecessor made a \$12 million mandatory quarterly amortization payment of its Dutch Tranche A Dollar Term Loan, \$3 million of which was related to the DIP Roll-Up Loans, and also made payments on the European Securitization Facility and the French Factoring Facility of \$1 million and \$2 million, respectively.

Liquidity and Capital Resources As of March 31, 2011, we had cash on hand of \$4,383 million. In addition, we had total unused availability under our credit facilities of \$1,944 million at March 31, 2011, which included the following:

\$1,388 million under our \$1,750 million U.S. ABL facility, which is subject to a borrowing base, net of outstanding borrowings and outstanding letters of credit provided under the facility. At March 31, 2011, we had \$362 million of outstanding letters of credit and no outstanding borrowings under the facility.

387 million and \$16 million (totaling approximately \$556 million) under our 450 million European receivables securitization facility. Availability under the European receivables securitization facility is subject to a borrowing base comprising 387 million and \$16 million in effect as of March 31, 2011. There were no outstanding borrowings under this facility at March 31, 2011.

We may use cash on hand, cash from operating activities and proceeds from asset divestitures to repay debt, which may include additional purchases of our outstanding bonds in the open market or otherwise. We also plan to finance our ongoing working capital, capital expenditures, debt service and other funding requirements through our future financial and operating performance, which could be affected by general economic, financial, competitive, legislative, regulatory, business and other factors, many of which are beyond our control. We believe that our cash, cash from operating activities and proceeds from our credit facilities provide us with sufficient financial resources to meet our anticipated capital requirements and obligations as they come due.

In May 2011, we repaid \$203 million of our 8% senior secured dollar notes and 34 million (\$48 million) of our 8% senior secured Euro notes due 2017 at a redemption price of 103% of par. These redemptions comprise 10% of the outstanding notes at March 31, 2011.

At March 31, 2011, we had total debt, including current maturities, of \$6,109 million. The \$253 million of current maturities of long-term debt at March 31, 2011 includes the 8% notes that were repaid in May 2011.

In March 2011, we amended and restated our Senior Secured Term Loan Agreement to, among other things, modify the term of the agreement and certain restrictive covenants. This amended and restated agreement matures in April 2014.

We are party to certain registration rights agreements relating to our 8% senior secured notes and our 11% senior secured notes, which obligate us to conduct an exchange offer for the 8% notes and register the resale of the 11% notes with the SEC. The registration rights agreements require the registration statements for the exchange or resale, as applicable, to be effective with the SEC by May 3, 2011, which has not occurred. As a result, beginning May 4, 2011, we are subject to penalties in the form of increased interest rates. The interest penalties are 0.25% per annum for each series of notes for the first 90 days that the registration statements are not effective, increasing by an additional 0.25% per annum for each additional 90 days, up to a maximum of 1.00% per annum. We currently cannot estimate the amount of penalties we will ultimately pay, as we cannot currently estimate when the registration statements will become effective.

On May 5, 2011, our shareholders approved a dividend payment of \$0.10 per share to shareholders of record on May 5, 2011. Management intends to declare additional interim dividends to the extent the Company's cash flows and results of operations support such dividend payments in the future.

ACCOUNTING AND REPORTING CHANGES

For a discussion of the potential impact of new accounting pronouncements on our consolidated financial statements, see Note 2 to the Consolidated Financial Statements.

CAUTIONARY STATEMENT FOR THE PURPOSES OF THE SAFE HARBOR PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

This report includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. You can identify our forward-looking statements by the words anticipate, estimate, believe, continue, could, intend, may, plan, potential, predict, should, will, projection, forecast, goal, guidance, outlook, effort, target and similar expressions.

We based the forward-looking statements on our current expectations, estimates and projections about ourselves and the industries in which we operate in general. We caution you these statements are not guarantees of future performance as they involve assumptions that, while made in good faith, may prove to be incorrect, and involve risks and uncertainties we cannot predict. In addition, we based many of these forward-looking statements on assumptions about future events that may prove to be inaccurate. Accordingly, our actual outcomes and results may differ materially from what we have expressed or forecast in the forward-looking statements. Any differences could result from a variety of factors, including the following:

if we are unable to comply with the terms of our credit facilities and other financing arrangements, those obligations could be accelerated, which we may not be able to repay;

we may be unable to incur additional indebtedness or obtain financing on terms that we deem acceptable, including for refinancing of our current obligations; higher interest rates and costs of financing would increase our expenses;

our ability to implement business strategies may be negatively affected or restricted by, among other things, governmental regulations or policies;

the cost of raw materials represent a substantial portion of our operating expenses, and energy costs generally follow price trends of crude oil and natural gas; price volatility can significantly affect our results of operations and we may be unable to pass raw material and energy cost increases on to our customers;

industry production capacities and operating rates may lead to periods of oversupply and low profitability;

uncertainties associated with worldwide economies create increased counterparty risks, which could reduce liquidity or cause financial losses resulting from counterparty exposure;

the negative outcome of any legal, tax and environmental proceedings may increase our costs;

we may be required to reduce production or idle certain facilities because of the cyclical and volatile nature of the supply-demand balance in the chemical and refining industries, which would negatively affect our operating results;

we may face operating interruptions due to events beyond our control at any of our facilities, which would negatively impact our operating results, and because the Houston refinery is our only North American refining operation, we would not have the ability to increase production elsewhere to mitigate the impact of any outage at that facility;

regulations may negatively impact our business by, among other things, restricting our operations, increasing costs of operations or requiring significant capital expenditures;

we face significant competition due to the commodity nature of many of our products and may not be able to protect our market position or otherwise pass on cost increases to our customers;

we rely on continuing technological innovation, and an inability to protect our technology, or others' technological developments could negatively impact our competitive position; and

we are subject to the risks of doing business at a global level, including fluctuations in exchange rates, wars, terrorist activities, political and economic instability and disruptions and changes in governmental policies, which could cause increased expenses, decreased demand or prices for our products and/or disruptions in operations, all of which could reduce our operating results.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our exposure to market and regulatory risks is described in Item 7A of our Annual Report on Form 10-K for the year ended December 31, 2010. Our exposure to such risks has not changed materially in the three months ended March 31, 2010.

Item 4. CONTROLS AND PROCEDURES

As of March 31, 2011, with the participation of our management, our Chief Executive Officer (principal executive officer) and our Chief Financial Officer (principal financial officer) carried out an evaluation, pursuant to Rule 13a-15(b) of the Securities Exchange Act of 1934, as amended (the Act), of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) of the Act). Based upon that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures were not effective to provide reasonable assurance that information required to be disclosed in reports we file with the SEC is processed, summarized and reported accurately as of March 31, 2011. This ineffectiveness was caused by the material weakness previously disclosed in Item 9A of our Form 10-K for the year ended December 31, 2010.

Nevertheless, based on a number of factors, including the performance of additional procedures by management designed to ensure the correctness of our tax provision and reliability of our financial reporting, we believe that the consolidated financial statements in this quarterly report fairly present, in all material respects, our financial position, results of operations, and cash flows as of the dates, and for the periods, presented, in conformity with U.S. GAAP. In the first quarter of 2011, the Company implemented measures to improve its internal controls in order to remediate the material weakness as disclosed in Item 9A. of its Form 10-K for the year ended December 31, 2010. Specifically, the Company implemented improved reporting processes designed to provide clarity of presentation and supporting documentation of its tax provision. The Company believes these changes have materially affected its internal control over financial reporting by enhancing controls related to the material weakness previously identified. However, the material weakness cannot be remediated until the enhanced procedures have been operating for a reasonable period of time.

PART II. OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

On January 6, 2009, certain of LyondellBasell AF S.C.A.'s indirect U.S. subsidiaries, including Lyondell Chemical, and its German indirect subsidiary, Basell Germany Holdings GmbH, voluntarily filed for protection under Chapter 11 in the Bankruptcy Court. In April and May of 2009, LyondellBasell AF and certain other subsidiaries filed voluntary petitions for relief under Chapter 11 in the Bankruptcy Court. The Bankruptcy Cases were filed in response to a sudden loss of liquidity in the last quarter of 2008. The debtors operated their businesses and managed their properties as debtors in possession during the Bankruptcy Cases. In general, this means that the Debtors operated in the ordinary course without Bankruptcy Court intervention. Bankruptcy Court approval was required, however, where the debtors sought authorization to engage in certain transactions not in the ordinary course of business.

We emerged from bankruptcy on April 30, 2010. As of that date, all assets of the debtor entities vested in the reorganized debtor entities free and clear of all claims, liens, encumbrances, charges, and other interests, except as provided in the Plan of Reorganization or the confirmation order entered on April 23, 2010 (the Confirmation Order). Except as otherwise expressly provided in the Plan of Reorganization or in the Confirmation Order, on April 30, 2010, each holder of a claim or equity interest is deemed to have forever waived, released, and discharged the debtor entities and the reorganized debtor entities, to the fullest extent permitted by law, of and from any and all claims, equity interests, rights, and liabilities that arose prior to the confirmation date.

BASF Lawsuit

On April 12, 2005, BASF filed a lawsuit against Lyondell Chemical in the Superior Court of New Jersey, Morris County, asserting various claims relating to alleged breaches of a propylene oxide toll manufacturing contract and seeking damages in excess of \$100 million. Lyondell Chemical denied breaching the contract and argued that at most it owed BASF \$22.5 million, which it has paid. On August 13, 2007, a jury returned a verdict in favor of BASF in the amount of approximately \$170 million (inclusive of the \$22.5 million refund). On October 3, 2007, the judge in the state court case determined that prejudgment interest on the verdict amounted to \$36 million and issued a final judgment. Lyondell Chemical appealed the judgment and has posted an appeal bond, which is collateralized by a \$200 million letter of credit.

On April 21, 2010, oral arguments in the appeal were held before the Appellate Division and, on December 28, 2010, the judgment was reversed and the case remanded. The parties have filed motions with the Bankruptcy Court for a determination as to whether the case will proceed in the Bankruptcy Court or New Jersey state court. We do not expect the ultimate resolution of this matter to have a material adverse effect on our consolidated financial position, or liquidity, although any such resolution may have a material adverse effect on our results of operation for any period in which a resolution occurs.

Access Indemnity Demand

On December 20, 2010, one of our subsidiaries received demand letters from affiliates of Access Industries (collectively, Access), a more than five percent shareholder of the Company. We conducted an initial investigation of the facts underlying the demand letters and engaged in discussions with Access. We requested that Access withdraw its demands with prejudice and, on January 17, 2011, Access declined to withdraw the demands, with or without prejudice.

Specifically, Access affiliates Nell Limited (Nell) and BI S.á.r.l. (BI) have demanded that LyondellBasell Industries Holdings B.V., a wholly-owned subsidiary of the Company (LBIH), indemnify them and their shareholders, members, affiliates, officers, directors, employees and other related parties for all losses, including attorney's fees and expenses, arising out of a pending lawsuit styled *Edward S. Weisfelner, as Litigation Trustee of the LB Litigation Trust v. Leonard Blavatnik, et al.*, Adversary Proceeding No. 09-1375 (REG), in the United States Bankruptcy Court, Southern District of New York.

In the *Weisfelner* lawsuit, the plaintiffs seek to recover damages from numerous parties, including Nell, Access and its affiliates. The damages sought from Nell, Access and its affiliates include, among other things, the return of all amounts earned by them related to their acquisition of shares of Lyondell Chemical prior to its acquisition by Basell AF S.C.A. in December 2007, distributions by Basell AF S.C.A. to its shareholders before it acquired Lyondell Chemical, and management and transaction fees and expenses. We cannot at this time determine the amount of liability, if any, that may be sought from LBIH by way of indemnity if a judgment is rendered or a settlement is paid in the *Weisfelner* lawsuit or other related litigation.

Nell and BI have also demanded that LBIH pay \$50 million in management fees for the years 2009 and 2010 and that LBIH pay other unspecified amounts relating to advice purportedly given in connection with financing and other strategic transactions.

Nell and BI assert that LBIH's responsibility for indemnity and the claimed fees and expenses arises out of a management agreement entered into on December 11, 2007, between Nell and Basell AF S.C.A. They assert that LBIH, as a former subsidiary of Basell AF S.C.A., is jointly and severally liable for Basell AF S.C.A.'s obligations under the agreement, notwithstanding that LBIH was not a signatory to the agreement and the liabilities of Basell AF S.C.A., which was a signatory, were discharged in the LyondellBasell bankruptcy proceedings.

On June 26, 2009, Nell filed a proof of claim in Bankruptcy Court against LyondellBasell AF (successor to Basell AF S.C.A.) seeking no less than \$723 thousand for amounts allegedly owed under the 2007 management agreement. On April 27, 2011, Lyondell Chemical filed an objection to Nell's claim and, together with LyondellBasell N.V. (successor to LyondellBasell AF) and LBIH, brought a declaratory judgment action in the Bankruptcy Court for a determination that Nell and BI's demands are not valid.

We do not believe that the management agreement is in effect or that the Company, LBIH, or any other Company-affiliated entity owes any obligations under the management agreement. We intend to defend vigorously any proceedings, claims or demands that may be asserted.

Environmental Matters

From time to time we and our joint ventures receive notices or inquiries from federal, state or local governmental entities regarding alleged violations of environmental laws and regulations pertaining to, among other things, the disposal, emission and storage of chemical and petroleum substances, including hazardous wastes. Item 103 of the SEC's Regulation S-K requires disclosure of certain environmental matters when a governmental authority is a party to the proceedings and the proceedings involve potential monetary sanctions that we reasonably believe could exceed \$100,000. The following matters pending as of March 31, 2011 are disclosed in accordance with that requirement:

As part of the government settlement in the chapter 11 proceedings, the U.S., on behalf of EPA, was allowed a general unsecured claim of \$499,000 against Millennium Specialty Chemicals Inc. and \$480,000 against Houston Refining LP. These allowed claims settled the penalty amounts for alleged noncompliance based upon pre-petition activities. In the case of the Houston refinery, the allegations arise from a 2007 EPA Clean Air Act inspection. In the case of Millennium Specialty Chemicals Inc., EPA conducted an inspection in 2008 at the Colonels Island, Georgia facility and questions were raised concerning handling of contaminated wastewater. Final resolution regarding these issues and any post-petition penalties is still subject to further negotiations with the government.

Item 1A. RISK FACTORS

There have been no material changes from the risk factors disclosed in Item 1A of our Form 10-K filed with the Securities and Exchange Commission on March 18, 2011.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

On April 30, 2010, the date of the emergence from bankruptcy proceedings, we:

issued 300,000,000 shares to eligible holders of certain claims against LyondellBasell AF and its subsidiaries;

issued 263,901,979 shares in connection with a rights offering that gave certain claim holders the right to subscribe for shares at a price of \$10.61 per share; and

issued warrants to purchase 11,508,204 shares with an exercise price of \$15.90 per share.

On April 23, 2010, the Bankruptcy Court entered a final order that the offering, issuance, and distribution of any securities contemplated by the Plan of Reorganization, including the issuances described above and the issuance of shares upon exercise of the warrants, shall be exempt from the registration requirements of Section 5 of the Securities Act and any other applicable law requiring registration or qualification prior to the offering, issuance, distribution, or sale of securities. An aggregate of 2,348,618 shares have been issued upon exercise of warrants.

Additionally, up to 22,000,000 shares are authorized for issuance to employees and directors of LyondellBasell Industries N.V. and its subsidiaries pursuant to our incentive plan. Pursuant to LyondellBasell Industries N.V.'s 2010 Long-Term Incentive Plan, and effective as of April 30, 2010, we issued Mr. Gallogly 1,771,794 shares of restricted stock. The restricted shares vest on the fifth anniversary of the date of Mr. Gallogly's employment agreement of May 14, 2009. We have issued an additional 2,038,110 restricted stock units to certain senior level employees and members of the Supervisory Board. The employee restricted stock units vest, subject to earlier forfeiture, on the fifth anniversary of the date of grant. Each of the directors' restricted stock unit awards vest on June 30 in the year of the expiration of his term as a director, which is 2011, 2012 or 2013. All of these issuances were compensatory in nature and made without cost to the employees or directors.

Effective April 30, 2010, we issued Mr. Gallogly options to purchase 5,639,020 shares at an exercise price of \$17.61 per share. The options vest in equal increments over the five year period beginning May 14, 2009. We have issued additional options to purchase up to 3,090,939 shares to certain senior level employees at exercise prices ranging from \$16.45 to \$42.49 per share. These stock options vest in three equal annual increments, beginning on the second anniversary of the date of grant. The grants of the stock options were compensatory in nature and made without cost to the employees.

The grants of the restricted stock units and the stock options were made from time to time between April 30 and December 31, 2010.

These grants were made in reliance on Section 4(2) and Rule 701 of the Securities Act related to securities issued not involving a public offering and pursuant to certain compensatory benefit plans and contracts or are deemed to not be sales of securities under Section 2 of the Securities Act.

Item 6. EXHIBITS

- 31.1 Certification of Chief Executive Officer pursuant to Rule 13a-14(a) under the Securities Exchange Act of 1934.
- 31.2 Certification of Chief Financial Officer pursuant to Rule 13a-14(a) under the Securities Exchange Act of 1934.
- 32 Certifications pursuant to 18 U.S.C. Section 1350.
