Item 8.01. Other Events

ACC Staff Report on 2005 Palo Verde Outages

As previously reported, on February 2, 2006, Arizona Public Service Company (APS) filed with the Arizona Corporation Commission (the ACC) an application to recover approximately \$45 million through a surcharge over a 12-month period, representing a temporary rate increase of approximately 1.9%, proposed to begin no later than the ACC 's completion of its inquiry regarding 2005 Palo Verde Nuclear Generating Station (Palo Verde) outages. See Power Supply Adjustor PSA Deferrals Related to Unplanned Palo Verde Outages in Note 5 of Notes to Condensed Consolidated Financial Statements in the Pinnacle West Capital Corporation/APS Report on Form 10-Q for the fiscal quarter ended June 30, 2006.

On August 17, 2006, the ACC staff filed a report with the ACC recommending that the ACC disallow approximately \$17.4 million (\$10 million after income taxes) of the \$45 million request. The report alleges that four of the eleven Palo Verde outages in 2005 were avoidable, three of which resulted in the recommended disallowance. The report also finds, among other things, that:

Three of the outages were due to faulty or defective vendor supplied equipment and concludes that APS actions were not imprudent in connection with these outages. The report recommends, however, that the ACC evaluate the degree to which APS has sought appropriate legal or other remedies in connection these outages and that APS be given the opportunity to demonstrate the steps that is has taken in this regard .

Additional investigation will be needed to determine the cause of and responsibility for the Palo Verde Unit 1 outage resulting from vibration levels in one of the Unit 's shutdown cooling lines.

The report also recommends that the ACC (a) establish minimum nuclear performance standards for Palo Verde, with associated penalties if the standards are not met; (b) require APS to provide semi-annual operational reports to the ACC; and (c) require APS to establish programs to manage and evaluate certain Palo Verde plant equipment.

APS disagrees with, and plans to contest, the report 's recommendation that the ACC disallow a portion of the \$45 million of PSA deferrals. Under ACC regulations, prudent investments are those which under ordinary circumstances would be deemed reasonable and not dishonest or obviously wasteful and investments [are] presumed to have been prudently made, and such presumptions may be set aside only by clear and convincing evidence that such investments were imprudent. APS believes the expenses in question were prudently incurred and are therefore recoverable. Also on August 17, 2006, the ACC staff requested the ACC to address the issues described above in APS ' general rate case (currently these issues are being addressed in an ACC docket separate from the general rate case docket). If the ACC grants the staff 's request to consolidate these proceedings, the issues described above would be addressed in the general rate case. Hearings in the general rate case are scheduled to begin on October 10, 2006.
