OVERVIEW

LETTER TO SHAREHOLDERS
July 20, 2001

Dear Shareholder,

The first few months of 2001 were challenging for everyone. The markets experienced dramatic downshifts which affected many investors, no matter the size of their portfolios. We realize this is unsettling to shareholders--especially those who may be accustomed to positive returns--but it is important to keep in mind that maintaining a long-term investment horizon may

Edgar Filing: VAN KAMPEN BOND FUND - Form N-30D

be your most efficient strategy for coping with uncertain markets.

To help you make sense of recent events and put your fund's performance into perspective, this report examines how your fund's portfolio manager invested your assets. Packed with information and insightful commentary, this report includes an interview with the fund manager, a complete list of the fund's holdings at the end of the reporting period, charts and graphs which summarize interest rate and inflation trends, and other information to help you better understand your investment.

With nearly four generations of investment management experience, we at Van Kampen understand market declines are inevitable--and new opportunities may arise at any time. So, as you strive to craft a successful investment strategy and try to protect yourself against future downturns, consider these time-tested investing principles:

- DIVERSIFY--Owning a portfolio that includes a variety of stock funds and fixed-income funds

may moderate your investment risk and improve your long-term portfolio performance.

- SEEK FINANCIAL ADVICE--Your financial advisor can help you develop a personalized investment strategy based on your age, family status and goals. When comparing asset allocation strategies to your personal financial situation, you should consider your time frame and all of your personal savings and investments, in addition to your retirement assets and risk tolerance level. Your financial advisor can help you assess your individual situation before you make any decisions. Though no portfolio is immune to volatility, your advisor can help you structure a portfolio designed to address your long-term financial goals.

We are grateful for your continued trust in Van Kampen. We appreciate the opportunity to manage your assets while you enjoy true wealth--family, friends, and life's daily pleasures.

Sincerely,

[SIG]

Richard F. Powers, III
President and CEO
Van Kampen Asset Management Inc.

ECONOMIC SNAPSHOT

ECONOMIC GROWTH

THE U.S. ECONOMY CONTINUED TO SHOW SIGNS OF OVERALL WEAKNESS IN JUNE 2001. GROSS DOMESTIC PRODUCT (GDP), THE PRIMARY MEASURE OF ECONOMIC GROWTH, ROSE A DISAPPOINTING 1.2 PERCENT ON AN ANNUALIZED BASIS FOR THE FIRST QUARTER OF 2001--CONSIDERABLY SLOWER THAN THE GOVERNMENT'S INITIAL 2-PERCENT ESTIMATE AND SUBSEQUENT REVISIONS. THIS STAGNATING GROWTH ONLY COMPLICATED THE ECONOMIC OUTLOOK, AS MIXED DATA MADE IT DIFFICULT FOR ANALYSTS AND INVESTORS ALIKE TO DRAW ANY CLEAR CONCLUSIONS.

CONSUMER SPENDING AND EMPLOYMENT

AS REPORTS OF LACKLUSTER GROWTH AND CORPORATE LAYOFFS MOUNTED, THE AMERICAN CONSUMER CONTINUED TO SURPRISE ANALYSTS. SPURRED BY THE FEDERAL RESERVE'S (THE FED) SIXTH INTEREST RATE CUT THIS YEAR, CONSUMER CONFIDENCE IMPROVED SLIGHTLY IN JUNE. THIS RENEWED OPTIMISM WAS SURPRISING TO SOME, GIVEN THE UNEMPLOYMENT RATE

Edgar Filing: VAN KAMPEN BOND FUND - Form N-30D

CLIMBED TO 4.5 PERCENT. WHILE UNEMPLOYMENT HOVERED AT HISTORICALLY LOW LEVELS, SOME ANALYSTS WERE ENCOURAGED BY AN INCREASE IN FACTORY ORDERS--AN INDICATION THE ECONOMY MIGHT BE MOVING TOWARD A RECOVERY.

INTEREST RATES AND INFLATION

CONSUMERS' RENEWED CONFIDENCE CAME ON THE HEELS OF THE GOVERNMENT'S ATTEMPT TO JUMP-START THE ECONOMY. BETWEEN JANUARY 1 AND JUNE 30, 2001, THE FED CUT INTEREST RATES SIX TIMES BY A TOTAL OF 2.75 PERCENT. THE FED STATED ITS LATEST RATE CUT WAS PROMPTED BY DECLINING CORPORATE PROFITS AND BUSINESS CAPITAL SPENDING, WEAK CONSUMPTION AND A SLOWING GLOBAL ECONOMY--BUT ALSO INDICATED ADDITIONAL RATE CUTS REMAINED A POSSIBILITY. INDUSTRY ANALYSTS AND INVESTORS WELCOMED THE FED'S ACTIONS, VIEWING THEM AS NECESSARY STEPS TO WARD OFF A RECESSION AND RETURN THE GROWTH OF GDP TO A HEALTHY AND SUSTAINABLE RATE.

THE CONSUMER PRICE INDEX, A COMMON MEASURE OF THE INFLATION RATE, ROSE 3.2 PERCENT IN THE 12 MONTHS ENDED JUNE 30. ALTHOUGH INFLATION WAS NOT AN IMMEDIATE THREAT, SOME ANALYSTS CAUTIONED THAT RISING MEDICAL COSTS AND SEASONAL DEMANDS FOR ELECTRICITY AND NATURAL GAS MIGHT DRIVE INFLATION HIGHER.

PERFORMANCE SUMMARY

RETURN HIGHLIGHTS

(as of June 30, 2001)

 NYSE Ticker Symbol - VBF

	MARKET (1)	NAV (2)

One-year total return	23.10%	11.37%

Distribution rate as a % of closing common share price(3)		7.31%

Net asset value		\$19.41

Closing common share price		\$19.15

One-year high common share price (02/12/01)		\$19.65

One-year low common share price (10/18/00)		\$16.25

(1) Total return based on market price assumes an investment at the market price

Edgar Filing: VAN KAMPEN BOND FUND - Form N-30D

at the beginning of the period indicated, reinvestment of all distributions for the period in accordance with the Fund's dividend reinvestment plan, and sale of all shares at the closing common share price at the end of the period indicated.

- (2) Total return based on net asset value (NAV) assumes an investment at the beginning of the period indicated, reinvestment of all distributions for the period, and sale of all shares at the end of the period, all at NAV.
- (3) Distribution rate represents the annualized distributions of the Fund at the end of the period and not the earnings of the Fund.

Past performance is no guarantee of future results. Investment return, share price and net asset value will fluctuate and Fund shares, when sold, may be worth more or less than their original cost. An investment in the Fund is subject to investment risks, and you could lose money on your investment in the Fund. As a result of recent market activity, current performance may vary from the figures shown.

Q&A WITH YOUR PORTFOLIO MANAGER

WE RECENTLY SPOKE WITH THE PORTFOLIO MANAGER OF THE VAN KAMPEN BOND FUND ABOUT THE KEY EVENTS AND ECONOMIC FORCES THAT SHAPED THE MARKETS AND INFLUENCED THE FUND'S RETURN DURING THE PAST TWELVE MONTHS. KELLY GILBERT, PORTFOLIO MANAGER, HAS MANAGED THE FUND SINCE 1999 AND HAS WORKED IN THE INVESTMENT INDUSTRY SINCE 1995. THE FOLLOWING DISCUSSION REFLECTS HER VIEWS ON THE FUND'S PERFORMANCE DURING THE 12-MONTH PERIOD ENDED JUNE 30, 2001.

Q HOW WOULD YOU DESCRIBE THE MARKET ENVIRONMENT IN WHICH THE FUND OPERATED AND HOW DID THE FUND PERFORM IN THAT ENVIRONMENT?

A The first six months of the fiscal year were part of one of the most difficult periods for the corporate bond market. Over the last two quarters of 2000, investors reacted to a slowing economy and deteriorating corporate earnings by shunning lower-rated corporate bonds in favor of higher-quality corporate issues and U.S. Treasury securities. During this period, the Treasury market yield curve inverted (in other words, short-term rates moved higher than long-term rates) and the yield spread between Treasuries and corporates moved toward a 10-year high. In the end, the performance of Treasuries through the last half of 2000 was much stronger than that of corporate bonds.

By the start of 2001, however, it had become clear that the Federal Reserve Board (the "Fed") would need to ease short-term interest rates in order to encourage business and consumer borrowing and trigger spending that could stimulate economic growth. They responded by lowering the target federal funds rate on six separate occasions over the first half of the year, resulting in a

Edgar Filing: VAN KAMPEN BOND FUND - Form N-30D

cumulative reduction of two-and-three-quarter percentage points.

With these rate cuts, the yield curve steepened (short-term rates came down more than long-term rates) and investors became more optimistic that an economic recession could be avoided. As the Fed seemed willing to take steps to kick-start the economy, investors appeared more willing to take on investment risk, venturing away from ultra-safe investments in search of additional yield. New corporate bond issuance in the first half of 2001 was well received by the marketplace, and new-issue volume in the first two quarters alone exceeded the volume for all of last year.

The slowing economy continues to cast a shadow on the corporate bond market, as investors fret over its impact on corporate earnings. A seemingly endless parade of negative earnings

7

10

announcements in the first two quarters of 2001 have kept investors on edge, pushing back hopes for an economic recovery.

Also, a number of corporate issuers in the packaging and building materials sectors were hit hard--or even put out of business--by asbestos-related liability claims. These concerns have haunted the market since late last year. Fortunately, many of last year's "fallen angels" (well-known companies that surprised the market with credit problems that led to downgrades) have rebounded this year, a welcome sign that suggests the market may have regained its footing.

The market has improved from the standpoint of technical factors, such as supply/demand dynamics, tightening yield spreads, and a firming equity market, but a number of fundamental factors--such as the economy's continued weakness, poor corporate earnings, rising unemployment and continued layoffs, and signs that consumer spending may be losing steam--are still cause for concern. In this environment, corporate bonds have outperformed all but high-yield bonds in the fixed-income category.

For the twelve months ended June 30, 2001, the fund produced a total return of 23.10 percent based on market price. The fund's return reflects an increase in market price from \$16.75 per share on June 30, 2000, to \$19.15 per share on June 30, 2001. The fund's quarterly dividend of \$.3500 per share translates to a distribution rate of 7.31 percent based on the fund's closing market price on June 30, 2001.

Of course, past performance is no guarantee of future results. As a result of recent market activity, current performance may vary from the figures shown. For more up-to-date information, please visit www.vankampen.com or speak with your financial advisor. By comparison, the Lehman Brothers BBB Corporate Bond Index posted a total return of 11.30 percent for the same period. The Lehman Brothers BBB Corporate Bond Index is a broad-based, unmanaged index which reflects the general performance of corporate bonds. Its returns do not include any sales charges or fees that would be paid by an investor purchasing the securities it represents. Such costs would lower performance. It is not possible to invest directly in an index. For additional performance results, please refer to the chart and footnotes on page 4.

Q WHAT SPECIFIC STRATEGIES DID YOU EMPLOY IN REPOSITIONING THE PORTFOLIO?

A With declining interest rates in the spotlight, we increased our exposure to financial issuers during the period, targeting banks and finance companies. Our focus has been on top names in this

Edgar Filing: VAN KAMPEN BOND FUND - Form N-30D

sector, such as Household, Mellon, and Capital One.

One group that we have moved away from is the utilities sector, which due to the ongoing problems in California has continued to unsettle investors. We will continue to monitor this sector closely.

Otherwise, we have generally maintained a neutral weighting in most sectors (relative to the fund's benchmark, the Lehman Brother BBB Corporate Index).

8

11

We continue to look for opportunities to enhance the portfolio's yield component and to pursue bond issues that we believe exhibit strong relative value.

Q WHAT IS YOUR OUTLOOK FOR
THE MARKET AND THE FUND IN THE MONTHS AHEAD?

A Although the market's technical indicators continue to be strong, we remain cautiously optimistic on the long-term prospects for the investment-grade corporate sector. Since the start of the year, yield spreads have narrowed considerably, suggesting that the market could be vulnerable to spread widening. Expectations are for weak second quarter earnings announcements, and the "summer doldrums" could further dampen trading.

Investors are anticipating perhaps one or two further interest rate cuts by the Fed, but it is widely accepted that we are nearing the end of the Fed's easing cycle. Historically, an interest rate cut has taken about six months to take effect on economic activity, so we hope to see improvement in the economy over the last half of 2001. If the economy turns up, corporate bonds should benefit.

As of July 24, 2001, the fund is managed by the High Yield and High Grade teams of Van Kampen Asset Management Inc. ("The Adviser"). The teams are made up of established investment professionals. Current members of the High Yield Team include Gordon Loery, an Executive Director of the Adviser. Current members of the High Grade team include Angelo Manioudakis, and Executive Director of the Adviser. The composition of each team may change without notice from time to time.

9

12

GLOSSARY OF TERMS

A HELPFUL GUIDE TO SOME OF THE COMMON TERMS YOU'RE LIKELY TO SEE IN THIS REPORT AND OTHER FINANCIAL PUBLICATIONS.

EARNINGS ESTIMATE: A forecast for a company's net income during a given period. An earnings estimate can come from the company's management as well as from independent analysts.

FEDERAL FUNDS RATE: The interest rate charged by one financial institution lending federal funds to another. The Federal Reserve Board adjusts the federal funds rate to affect the direction of interest rates.

FEDERAL RESERVE BOARD (THE FED): The governing body of the Federal Reserve System, which is the central bank of the United States. Its policy-making committee, called the Federal Open Market Committee, meets at least eight times a year to establish monetary policy and monitor the economic pulse of the United States.

Edgar Filing: VAN KAMPEN BOND FUND - Form N-30D

INVESTMENT-GRADE BONDS: Securities rated BBB and above by Standard & Poor's Ratings Group or Baa and above by Moody's Investors Service. Bonds rated below BBB or Baa are noninvestment grade.

YIELD: The annual rate of return on an investment, expressed as a percentage.

YIELD CURVE: The pattern that results from viewing the yields of U.S. Treasury securities maturing in 1, 5, 10, and 30 years. When grouped together and graphed, a pattern of increasing yield is often reflected as the time to maturity extends. This pattern creates an upward sloping "curve." A "flat" yield curve represents little difference between short- and long-term interest rates, while a "negative" yield curve represents decreasing yields as the time to maturity extends.

YIELD SPREAD: The additional yield investors can earn by either investing in bonds with longer maturities or by investing in bonds with lower credit ratings. The spread is the difference in yield between bonds with short versus long maturities or the difference in yield between high-quality bonds and lower-quality bonds.

NOTES TO
FINANCIAL STATEMENTS

June 30, 2001

1. SIGNIFICANT ACCOUNTING POLICIES

Van Kampen Bond Fund (the "Fund") is registered as a diversified, closed-end management investment company under the Investment Company Act of 1940, as amended. The Fund's investment objective is to seek interest income while conserving capital through investing in a diversified portfolio consisting primarily of high-quality debt securities.

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The

Edgar Filing: VAN KAMPEN BOND FUND - Form N-30D

preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

A. SECURITY VALUATION Fixed income investments are stated at value using market quotations or indications of value obtained from an independent pricing service. Investments in securities listed on a securities exchange are valued at their sale price as of the close of such securities exchange. Unlisted securities and listed securities for which the last sales price is not available are valued at the mean of the bid and asked prices. For those securities where quotations or prices are not available as noted above, valuations are determined in accordance with procedures established in good faith by the Board of Trustees. Short-term securities with remaining maturities of 60 days or less are valued at amortized cost, which approximates market value.

B. SECURITY TRANSACTIONS Security transactions are recorded on a trade date basis. Realized gains and losses are determined on an identified cost basis. The Fund may purchase and sell securities on a "when-issued" or "delayed delivery" basis, with settlement to occur at a later date. The value of the security so purchased is subject to market fluctuations during this period. The Fund will maintain, in a segregated account with its custodian, assets having an aggregate value at least equal to the amount of the when-issued or delayed delivery purchase commitments until payment is made.

The Fund may invest in repurchase agreements, which are short-term investments in which the Fund acquires ownership of a debt security and the seller agrees to repurchase the security at a future time and specified price. The Fund may invest independently in repurchase agreements, or transfer uninvested cash balances into a pooled cash account along with other investment companies advised by Van Kampen Asset Management Inc. (the "Adviser") or its affiliates, the

daily aggregate of which is invested in repurchase agreements. Repurchase agreements are fully collateralized by the underlying debt security. The Fund will make payment for such securities only upon physical delivery or evidence of book entry transfer to the account of the custodian bank. The seller is required to maintain the value of the underlying security at not less than the repurchase proceeds due the Fund.

C. INVESTMENT INCOME Interest income is recorded on an accrual basis and dividend income is recorded on the ex-dividend date. Discounts are accreted over the expected life of each applicable security. Premiums on debt securities are not amortized.

In November 2000, the American Institute of Certified Public Accountants (AICPA) issued a revised version of the AICPA Audit and Accounting Guide for Investment Companies (the "Guide"). The revised version of the Guide is effective for annual financial statements issued for fiscal years beginning after December 15, 2000 and will require investment companies to amortize premiums and accrete discounts on fixed income securities. The Fund currently does not amortize premiums on fixed income securities. Upon adoption, the Fund

Edgar Filing: VAN KAMPEN BOND FUND - Form N-30D

will be required to record a cumulative effect adjustment to reflect the amortization of premiums. The adjustment will reduce accumulated undistributed net investment income and increase unrealized appreciation on securities and therefore will not impact total net assets. As of June 30, 2001, the cumulative effect adjustment to reflect the amortization of market premium would be \$588,991.

The revised version of the Guide will also require paydown gains and losses on mortgage- and asset-backed securities to be presented as interest income. Currently, paydown gains and losses on mortgage- and asset-backed securities are shown as a component of realized gain/loss. Had the Trust adopted this policy during the fiscal year ended June 30, 2001, interest income would have decreased and realized gain/loss would have increased by \$395.

D. FEDERAL INCOME TAXES It is the Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no provision for federal income taxes is required.

The Fund intends to utilize provisions of the federal income tax laws which allow it to carry a realized capital loss forward for eight years following the year of the loss and offset these losses against any future realized capital gains. At June 30, 2001, the Fund had an accumulated capital loss carryforward for tax purposes of \$2,737,618, which will expire between June 30, 2008 and June 30, 2009. Net realized gains or losses may differ for financial reporting and tax purposes

25

28

NOTES TO FINANCIAL STATEMENTS

June 30, 2001

primarily as a result of the deferral of losses relating to wash sale transactions and post-October losses which may not be recognized for tax purposes until the first day of the following fiscal year.

At June 30, 2001, for federal income tax purposes, the cost of long- and short-term investments is \$212,276,300, the aggregate gross unrealized appreciation is \$5,643,907 and the aggregate gross unrealized depreciation is \$1,887,033, resulting in net unrealized appreciation on long- and short-term investments of \$3,756,874.

E. DISTRIBUTION OF INCOME AND GAINS The Fund declares and pays quarterly dividends from net investment income. Net realized gains, if any, are distributed annually. Distributions from net realized gains for book purposes may include short-term capital gains. All short-term capital gains are included in ordinary income for tax purposes.

Due to inherent differences in the recognition of income, expenses and realized gain/losses under generally accepted accounting principles and federal income tax purposes, permanent differences between financial and tax basis reporting for the 2001 fiscal year have been identified and appropriately reclassified. Permanent differences relating to expenses which are not deductible for tax purposes totaling \$20,646 were reclassified from accumulated undistributed net investment income to capital, \$9,860 relating to fee income received from tender offers was reclassified from accumulated undistributed net investment income to accumulated net realized loss and \$395 relating to the recognition of net realized gains on paydowns of mortgage pool obligations was reclassified from accumulated undistributed net investment income to accumulated

Edgar Filing: VAN KAMPEN BOND FUND - Form N-30D

net realized loss.

F. EXPENSE REDUCTIONS During the year ended June 30, 2001, the Fund's custody fee was reduced by \$923 as a result of credits earned on cash balances.

2. INVESTMENT ADVISORY AGREEMENT AND OTHER TRANSACTIONS WITH AFFILIATES

Under the terms of the Fund's Investment Advisory Agreement, the Adviser will provide investment advice and facilities to the Fund for an annual fee payable monthly as follows:

AVERAGE DAILY NET ASSETS	% PER ANNUM
First \$150 million.....	0.50%
Next \$100 million.....	0.45%
Next \$100 million.....	0.40%
Over \$350 million.....	0.35%

26

29

NOTES TO FINANCIAL STATEMENTS

June 30, 2001

For the year ended June 30, 2001, the Fund recognized expenses of approximately \$5,500 representing legal services provided by Skadden, Arps, Slate, Meagher, & Flom (Illinois), counsel to the Fund, of which a trustee of the Fund is an affiliated person.

Under an Accounting Services agreement, the Adviser provides accounting services to the Fund. The Adviser allocates cost of such services to each fund. For the year ended June 30, 2001, the Fund recognized expenses of approximately \$21,500 representing Van Kampen Investments Inc.'s or its affiliates' (collectively "Van Kampen") cost of providing accounting services to the Fund, which are reported as part of other expenses in the Statement of Operations.

Certain officers and trustees of the Fund are also officers and directors of Van Kampen. The Fund does not compensate its officers or trustees who are officers of Van Kampen.

The Fund provides deferred compensation and retirement plans for its trustees who are not officers of Van Kampen. Under the deferred compensation plan, trustees may elect to defer all or a portion of their compensation to a later date. Benefits under the retirement plan are payable upon retirement for a ten-year period and are based upon each trustee's years of service to the Fund. The maximum annual benefit per trustee under the plan is \$2,500.

3. INVESTMENT TRANSACTIONS

During the period, the cost of purchases and proceeds from sales of investments, excluding short-term investments, were \$188,381,977 and \$188,674,991, respectively.

REPORT OF INDEPENDENT AUDITORS

To the Board of Trustees and Shareholders of Van Kampen Bond Fund

We have audited the accompanying statement of assets and liabilities of Van Kampen Bond Fund (the "Fund"), including the portfolio of investments, as of June 30, 2001, the related statements of operations for the year then ended, and the statements of changes in net assets and the financial highlights for each of the two years in the period then ended. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits. The Fund's financial highlights for the periods ended prior to June 30, 2000, were audited by other auditors whose report, dated July 23, 1999, expressed an unqualified opinion on those financial highlights.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of June 30, 2001, by correspondence with the Fund's custodian and brokers, and through the performance of other auditing procedures. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Van Kampen Bond Fund as of June 30, 2001, the results of its operations for the year then ended, the changes in its net assets and the financial highlights for the respective stated periods, in conformity with accounting principles generally accepted in the United States of America.

DIVIDEND REINVESTMENT PLAN

The Fund pays distributions in cash, but if you own more than 100 shares in your own name, you may elect to participate in the Fund's dividend reinvestment plan (the "Plan"). Under the Plan, shares will be issued by the Fund at net asset value on a date determined by the Board of Trustees between the record and payable dates on each distribution; however, if the market price including brokerage commissions, is less than the net asset value, the amount of the distribution will be paid to the Plan Agent, which will buy such shares as are available at prices below the net asset value. (If the market price is not significantly less than the net asset value, it is possible that open market purchases of shares may increase the market price so that such price plus brokerage commissions would equal or exceed the net asset value of such shares.) If the Plan Agent cannot buy the necessary shares at less than net asset value before the distribution date, the balance of the distribution will be made in authorized but unissued shares of the Fund at net asset value. The cost per share will be the average cost, including brokerage commissions, of all shares purchased. Since all shares purchased from the Fund are at net asset value, there will be no dilution, and no brokerage commissions are charged on such shares.

Edgar Filing: VAN KAMPEN BOND FUND - Form N-30D

You will receive tax information annually for your personal records and to help you prepare your federal income tax return. The automatic reinvestment of dividends and capital gain distributions does not relieve you of any income tax which may be payable (or required to be withheld) on dividends or distributions.

You may begin or discontinue participation in the Plan at any time by written notice to the address below. If you withdraw from the Plan, you may rejoin at any time if you own the required 100 shares. Elections and terminations will be effective for distributions declared after receipt. If you withdraw from the Plan, a certificate for the whole shares and a check for the fractional shares, if any, credited to your Plan account will be sent as soon as practicable after receipt of your election to withdraw. Except for brokerage commissions, if any, which are borne by Plan participants, all costs of the Plan are borne by the Fund. The Fund reserves the right to amend or terminate the Plan on 30 days' written notice prior to the record date of the distribution for which such amendment or termination is effective.

Record stockholders should address all notices, correspondence, questions or other communications about the Plan to:

STATE STREET BANK AND TRUST COMPANY

C/O EQUISERVE LLP

P.O. BOX 8200

BOSTON, MA 02266-8200

1-800-821-1238

If your shares are not held directly in your name, you should contact your brokerage firm, bank or other nominee for more information and to see if your nominee will participate in the Plan on your behalf. If you participate through your broker and choose to move your account to another broker, you will need to re-enroll in the Plan through your new broker.
