PERFORMANCE DATA QUOTED REPRESENTS PAST PERFORMANCE, WHICH IS NO GUARANTEE OF FUTURE RESULTS, AND CURRENT PERFORMANCE MAY BE LOWER OR HIGHER THAN THE FIGURES SHOWN. FOR THE MOST RECENT MONTH-END PERFORMANCE FIGURES, PLEASE VISIT VANKAMPEN.COM OR SPEAK WITH YOUR FINANCIAL ADVISOR. INVESTMENT RETURNS AND PRINCIPAL VALUE WILL FLUCTUATE AND TRUST SHARES, WHEN REDEEMED, MAY BE WORTH MORE OR LESS THAN THEIR ORIGINAL COST.

The NAV per share is determined by dividing the value of the trust's portfolio securities, cash and other assets, less all liabilities and preferred shares, by the total number of common shares outstanding. The common share market price is the price the market is willing to pay for shares of the trust at a given time. Common share market price is influenced by a range of factors, including supply and demand and market conditions. Total return assumes an investment at the beginning of the period, reinvestment of all distributions for the period in accordance with the trust's dividend reinvestment plan, and sale of all shares at the end of the period.

FOR THE SIX-MONTH PERIOD ENDED JANUARY 31, 2006

## MARKET CONDITIONS

During the six-month period ended January 31, 2006, positive economic and corporate trends created a favorable backdrop for the senior loan asset class. The Gulf Coast hurricanes did not dampen the U.S. economy to the extent some had expected, nor did high oil prices and struggles of the auto industry. Inflation remained largely contained. By and large, corporations posted good profits, reflecting on-track business strategies, increasing revenues, strengthening balance sheets and improving credit quality. Despite some well publicized exceptions, corporate debt default rates remained low overall. These influences stoked ongoing demand for senior loans, from institutional and individual investors alike.

Moreover, the adjustable-rate characteristics of senior loans proved particularly beneficial during the period. Because the yields of senior loans adjust in tandem to changes in short-term interest rates, the asset class was well positioned as interest rates rose across the short- and intermediate-term portions of the bond market.

The strong demand for senior loans was met by robust supply in both the primary and secondary markets. Merger-and-acquisition activity, leveraged buyouts (private-to-public transactions), sponsor-driven dividend loans and second lien loans were among the activities spurring issuance. In this environment, yield spreads in the senior loan market held steady.

## PERFORMANCE ANALYSIS

The trust's return can be calculated based upon either the market price or the net asset value (NAV) of its shares. NAV per share is determined by dividing the value of the trust's portfolio securities, cash and other assets, less all liabilities and preferred shares, by the total number of common shares outstanding, while market price reflects the supply and demand for the shares. As a result, the two returns can differ, as they did during the reporting period. For the six months ended January 31, 2006, the trust returned 2.93 percent on a market price basis and 3.45 percent on an NAV basis.

Performance data quoted represents past performance, which is no guarantee of future results, and current performance may be lower or higher than the figures shown. Investment return, net asset value and common share market price will fluctuate and trust shares, when sold, may be worth more or less than their original cost. See Performance Summary for additional performance information.

We believe that the rigor of our approach and our experience in the senior loan market were principal drivers of the trust's performance for the period. We managed the trust according to our research-intensive, time-tested approach,

## Edgar Filing: VAN KAMPEN SENIOR INCOME TRUST - Form N-CSRS

seeking to balance yield with a stable net asset value. Our investment process focused on identifying companies that we believed had strong management, solid and predictable cash flows, and sufficient collateral in the event of default.

Consistent with our dedication to risk management, we diversified the portfolio broadly across the senior loan market. We followed a bottom-up security selection process, with investment decisions driven principally by our analysis of individual company fundamentals. That said, the portfolio construction process also included our comprehensive analysis of larger industry and sector trends. Notably, the trust's positioning reflected a defensive tilt throughout the period. Our criteria led us to favor senior loans in sectors that typically provide stable performance throughout an economic cycle. For example, the trust includes debt issued by food, drug and beverage companies, cable broadcasters, and leisure companies. These companies have historically enjoyed steady day-to-day demand for goods and services. The trust also included holdings in the defense industry; these issuers were well positioned to benefit from long-term demand trends, and held extensive hard assets as loan collateral.

In contrast, we avoided companies we believed to be especially susceptible to cyclical economic downturns or rising fuel prices. We were particularly circumspect in regard to the highly leveraged auto and airline industries. This prudence served the trust well during the period. We were extremely cautious about the health care sector as well, based on concerns that an uncertain

3

regulatory environment and Medicaid reduction initiatives could create ongoing turbulence for the sector.

The trust benefited during the period from our use of leverage. Leverage involves borrowing at a short-term lending rate and reinvesting the proceeds at a higher rate. We used this strategy on an ongoing basis in an effort to enhance the trust's dividend. Unlike with other fixed-income classes, using leverage in conjunction with senior loans does not involve the same degree of risk from rising short-term interest rates, since the income from senior loans adjusts to changes in interest rates, as do the rates which determine the trust's borrowing costs. (Similarly, should short-term rates fall, borrowing costs would also decline.) We might reduce leverage in periods of weaker credit quality conditions to prevent magnifying erosion of the trust's net asset value.

There is no guarantee that any sectors mentioned will continue to perform well or that securities in such sectors will be held by the trust in the future.

### CHANGES TO INVESTMENT POLICIES

At a meeting held on March 1, 2006, the Board of Trustees approved changes to certain of the Trust's investment policies in order to expand the investment options available to the Trust as the Trust seeks to achieve its investment objective of high level of current income, consistent with preservation of capital. The Trust's investment policy of investing at least 80% of its total assets in Senior Loans remains unchanged. The changes to the Trust's investment policies are as follows:

(1) The Trust may, subject to the limits specified below, invest in credit-linked deposits. Credit-linked deposits are deposits by lenders, such as the Trust, to support the issuance of letters of credit to the Senior Loan borrower. The Trust receives from the bank issuing such letters of credit an agreed upon rate of return in exchange for its deposit. There are risks associated with credit-linked deposits, including the credit risk of the bank which maintains the deposit account as well as the credit risk of the borrower. The Trust bears the risk of possible loss of its principal investment, in

## Edgar Filing: VAN KAMPEN SENIOR INCOME TRUST - Form N-CSRS

addition to the periodic interest payments that are expected to be received for the duration of the Trust's investment in the credit-linked deposit. Thus, restating the Trust's investment policies to include this new investment: The Trust may invest up to 20% of its total assets in any combination of (1) warrants and equity securities, in each case the Trust must own or acquire a Senior Loan of the same issuer, (2) junior debt securities or securities with a lien on collateral lower than a senior claim on collateral, (3) high quality short-term debt securities, (4) credit-linked deposits and (5) Treasury Inflation Protected Securities ("U.S. TIPS") and other inflation-indexed bonds issued by the U.S. government, its agencies or instrumentalities.

(2) The Trust's ability to invest in structured products has been increased to 10% of its total assets and expanded to include credit default swaps ("CDS") to enhance the yield on its portfolio or to increase income available for

4

distributions or for other non-hedging purposes. A CDS is an agreement between two parties to exchange the credit risk of a particular issuer or reference entity. In a CDS transaction, a buyer pays periodic fees in return for a payment by the seller which is contingent upon an adverse credit event occurring in the underlying issuer or reference entity. The seller collects periodic fees from the buyer and profits if the credit of the underlying issuer or reference entity remains stable or improves while the swap is outstanding, but the seller in a CDS contract would be required to pay an agreed upon amount to the buyer in the event of an adverse credit event in the reference entity. A buyer of a CDS is said to buy protection whereas a seller of a CDS is said to sell protection. When the Trust buys a CDS, it is utilizing the swap for hedging purposes similar to other hedging strategies described herein. When the Trust sells a CDS, it is utilizing the swap to enhance the yield on its portfolio to increase income available for distribution or for other non-hedging purposes, and the Trust is subject to the 10% limitation described herein on structured products.

to common shares.

- (a) This Senior Loan interest is non-income producing.
  - (b) A portion of this security is segregated in connection with unfunded commitments.
  - (c) This borrower has filed for protection in federal bankruptcy court.
  - (d) Affiliated company. See Notes to Financial Statements.
  - (e) Non-income producing security as this stock or warrant currently does not declare dividends.
  - (f) Restricted Security. Securities were acquired through the restructuring of senior loans. These securities are restricted as they are not allowed to be deposited via the Depository Trust Company. If at a later point in time, the company wishes to register, the issuer will bear the costs associated with registration. The aggregate value of restricted securities represents 0.04% of the net assets applicable to common shares of the Trust.
  - (g) Payment-in-kind security.
  - (h) Variable rate security. Interest rate shown is that in effect at January 31, 2006.
  - (i) This borrower is currently in liquidation.
  - (j) The borrower is in the process of restructuring or amending the terms of this loan.
- \* Senior Loans in the Trust's portfolio generally are subject to mandatory and/or optional prepayment. Because of these mandatory prepayment conditions and because there may be significant economic incentives for a Borrower to prepay, prepayments of Senior Loans in the Trust's portfolio may occur. As a result, the actual remaining maturity of Senior Loans held in the Trust's portfolio may be

substantially less than the stated maturities shown. Although the Trust is unable to accurately estimate the actual remaining maturity of individual Senior Loans, the Trust estimates that the actual average maturity of the Senior Loans held in its portfolio will be approximately 18-24 months.

- \*\* Senior Loans in which the Trust invests generally pay interest at rates which are periodically redetermined by reference to a base lending rate plus a premium. These base lending rates are generally (i) the lending rate offered by one or more major European banks, such as the London Inter-Bank Offered Rate ("LIBOR"), (ii) the prime rate offered by one or more major United States banks and (iii) the certificate of deposit rate. Senior Loans are generally considered to be restricted in that the Trust ordinarily is contractually obligated to receive approval from the Agent Bank and/or Borrower prior to the disposition of a Senior Loan.

(a) Total return based on common share market price assumes an investment at the common share market price at the beginning of the period indicated, reinvestment of all distributions for the period in accordance with the Trust's dividend reinvestment plan, and sale of all shares at the closing common share market price at the end of the period indicated.

(b) Calculation includes the proceeds from principal repayments and sales of senior loan interests.

(c) Calculated by subtracting the Trust's total liabilities (not including the Borrowings) from the Trust's total assets and dividing by the total number of senior indebtedness units, where one unit equals \$1,000 of senior indebtedness.

(d) As required, effective August 1, 2001, the Trust has adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies and began amortizing premium on fixed income securities. The effect of this change for the year ended July 31, 2002 was to decrease the ratio of net investment income to average net assets applicable to common shares by .01%. Net investment income per share and net realized and unrealized gains and losses per share were unaffected by the adjustments. Per share, ratios and supplemental data for the periods prior to July 31, 2002 have not been restated to reflect this change in presentation.

VAN KAMPEN SENIOR INCOME TRUST

NOTES TO FINANCIAL STATEMENTS -- JANUARY 31, 2006 (UNAUDITED)

## 1. SIGNIFICANT ACCOUNTING POLICIES

Van Kampen Senior Income Trust (the "Trust") is registered as a non-diversified, closed-end management investment company under the Investment Company Act of 1940 (the "1940 Act"), as amended. The Trust's investment objective is to seek to provide a high level of current income, consistent with preservation of capital. The Trust seeks to achieve its objective by investing primarily in a portfolio of interests in floating or variable rate senior loans to corporations, partnerships and other entities which operate in a variety of industries and geographical regions. The Trust borrows money for investment purposes which will create the opportunity for enhanced return, but also should be considered a speculative technique and may increase the Trust's volatility. The Trust commenced investment operations on June 24, 1998.

The following is a summary of significant accounting policies consistently followed by the Trust in the preparation of its financial statements. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

A. SECURITY VALUATION The Trust's Senior Loans are valued by the Trust following valuation guidelines established and periodically reviewed by the Trust's Board of Trustees. Under the valuation guidelines, Senior Loans for which reliable market quotes are readily available are valued at the mean of such bid and ask quotes. Where reliable market quotes are not readily available, Senior Loans are valued, where possible, using independent market indicators provided by independent pricing sources approved by the Board of Trustees. Other Senior Loans are valued by independent pricing sources approved by the Board of Trustees based upon pricing models developed, maintained and operated by those pricing sources or valued by Van Kampen Asset Management (the "Adviser") by considering a number of factors including consideration of market indicators, transactions in instruments which the Adviser believes may be comparable (including comparable credit quality, interest rate, interest rate redetermination period and maturity), the credit worthiness of the Borrower, the current interest rate, the period until next interest rate redetermination and the maturity of such Senior Loan. Consideration of comparable instruments may include commercial paper, negotiable certificates of deposit and short-term variable rate securities which have adjustment periods comparable to the Senior Loans in the Trust's portfolio. The fair value of Senior Loans are reviewed and approved by the Trust's Valuation Committee and the Board of Trustees.

Equity securities are valued on the basis of prices furnished by pricing services or as determined in good faith by the Adviser under the direction of the Board of Trustees.

Short-term securities with remaining maturities of 60 days or less are valued at amortized cost, which approximates market value. Short-term loan participations are valued at cost in the absence of any indication of impairment.

The Trust may invest in repurchase agreements, which are short-term investments in which the Trust acquires ownership of a debt security and the seller agrees to repurchase the security at a future time and specified price.

## Edgar Filing: VAN KAMPEN SENIOR INCOME TRUST - Form N-CSRS

Repurchase agreements are fully collateralized by the underlying debt security. The Trust will make payment for such securities only upon

38

VAN KAMPEN SENIOR INCOME TRUST

NOTES TO FINANCIAL STATEMENTS -- JANUARY 31, 2006 (UNAUDITED) continued

physical delivery or evidence of book entry transfer to the account of the custodian bank. The seller is required to maintain the value of the underlying security at not less than the repurchase proceeds due the Trust.

B. SECURITY TRANSACTIONS Investment transactions are recorded on a trade date basis. Realized gains and losses are determined on an identified cost basis. Legal expenditures that are expected to result in the restructuring of or a plan of reorganization for an investment are recorded as realized losses.

C. INVESTMENT INCOME Dividend income is recorded on the ex-dividend date and interest income is recorded on an accrual basis. Facility fees received are treated as market discounts. Market premiums are amortized and discounts are accreted over the stated life of each applicable senior loan, note, or other fixed income security. Other income is comprised primarily of amendment fees which are recorded when received. Amendment fees are earned as compensation for agreeing to changes in loan agreements.

D. FEDERAL INCOME TAXES It is the Trust's policy to comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no provision for federal income taxes is required.

The Trust intends to utilize provisions of the federal income tax laws which allow it to carry a realized capital loss forward for eight years following the year of the loss and offset such losses against any future realized capital gains. At July 31, 2005, the Trust had an accumulated capital loss carryforward for tax purposes of \$211,408,105, which will expire according to the following schedule.

AMOUNT	EXPIRATION
\$4,851,995.....	July 31, 2009
122,716,095.....	July 31, 2010
52,014,750.....	July 31, 2011
29,634,358.....	July 31, 2012
2,190,907.....	July 31, 2013

At January 31, 2006, the cost and related gross unrealized appreciation and depreciation are as follows:

Cost of investments for tax purposes.....	\$2,832,881,939 =====
Gross tax unrealized appreciation.....	\$ 13,662,714
Gross tax unrealized depreciation.....	(20,026,733) -----
Net tax unrealized depreciation on investments.....	\$ (6,364,019) =====

E. DISTRIBUTION OF INCOME AND GAINS The Trust intends to declare and pay monthly dividends from net investment income to common shareholders. Net realized gains, if any, are to be distributed at least annually to common shareholders. Distributions from net realized gains for book purposes may include short term capital gains, which are included as ordinary income for tax purposes.

39

VAN KAMPEN SENIOR INCOME TRUST

NOTES TO FINANCIAL STATEMENTS -- JANUARY 31, 2006 (UNAUDITED) continued

The tax character of distributions paid for the year ended July 31, 2005 was as follows:

Distributions paid from:	
Ordinary income.....	\$102,806,311
Long-term capital gain.....	-0-
	-----
	\$102,806,311
	=====

As of July 31, 2005, the components of distributable earnings on a tax basis were as follows:

Undistributed ordinary income.....	\$5,272,503
Long-term capital gain.....	-0-

Net realized gains and losses may differ for financial and tax reporting purposes primarily as a result of the deferral of losses resulting from wash sale transactions and other losses that were recognized for book purposes but not tax purposes at the end of the fiscal year.

2. INVESTMENT ADVISORY AGREEMENT AND OTHER TRANSACTIONS WITH AFFILIATES

Under the terms of the Trust's Investment Advisory Agreement, the Adviser will provide investment advice and facilities to the Trust for an annual fee of .85% of the average daily managed assets. Managed assets are defined as the gross asset value of the Trust minus the sum of accrued liabilities, other than the aggregate amount of borrowings undertaken by the Trust. In addition, the Trust will pay a monthly administrative fee to Van Kampen Investments Inc., the Trust's Administrator, at an annual rate of .20% of the average daily managed assets of the Trust. The administrative services provided by the Administrator include monitoring the provisions of the loan agreements and any agreements with respect to participations and assignments, record keeping responsibilities with respect to interests in Variable Rate Senior Loans in the Trust's portfolio and providing certain services to the holders of the Trust's securities.

For the six months ended January 31, 2006, the Trust recognized expenses of approximately \$77,400 representing legal services provided by Skadden, Arps, Slate, Meagher & Flom LLP, of which a trustee of the Trust is a partner of such firm and he and his law firm provide legal services as legal counsel to the Trust.

## Edgar Filing: VAN KAMPEN SENIOR INCOME TRUST - Form N-CSRS

Under separate Legal Services, and Chief Compliance Officer ("CCO") Employment agreements, the Adviser provides legal services and the CCO provides compliance services to the Trust. The costs of these services are allocated to each trust. For the six months ended January 31, 2006, the Trust recognized expenses of approximately \$81,100, representing Van Kampen Investment Inc.'s or its affiliates' (collectively "Van Kampen") cost of providing legal services to the Trust, as well as, the salary, benefits and related costs of the CCO and related support staff paid by Van Kampen. Services provided pursuant to the Legal Services agreement are reported as part of "Legal" expenses on the Statement of Operations. Services provided pursuant to the CCO Employment agreement are reported as part of "Other" expenses on the Statement of Operations.

Certain officers and trustees of the Trust are also officers and directors of Van Kampen. The Trust does not compensate its officers or trustees who are officers of Van Kampen.

40

### VAN KAMPEN SENIOR INCOME TRUST

#### NOTES TO FINANCIAL STATEMENTS -- JANUARY 31, 2006 (UNAUDITED) continued

The Trust provides deferred compensation and retirement plans for its trustees who are not officers of Van Kampen. Under the deferred compensation plan, trustees may elect to defer all or a portion of their compensation to a later date. Benefits under the retirement plan are payable for a ten-year period and are based upon each trustee's years of service to the Trust. The maximum annual benefit per trustee under the plan is \$2,500.

During the period, the Trust owned shares of the following affiliated companies. Affiliated companies are defined by the 1940 Act, as amended, as those companies in which a fund holds 5% or more of the outstanding voting securities.

NAME	PAR/ SHARES *	DIVIDEND/INTEREST INCOME	MARKET VALUE 1/31/06	COST

## 3. INVESTMENT TRANSACTIONS

During the period, the costs of purchases and proceeds from investments sold and repaid, excluding short-term investments, were \$1,072,922,357 and \$1,070,577,444, respectively.

## 4. COMMITMENTS

Pursuant to the terms of certain Senior Loan agreements, the Trust had unfunded loan commitments of approximately \$156,876,500 as of January 31, 2006. The Trust intends to reserve against such contingent obligations by designating cash, liquid securities and liquid Senior Loans as a reserve. The unrealized depreciation on these commitments of \$2,504,560 as of January 31, 2006 is reported as "Unfunded Commitments" on the Statement of Assets and Liabilities.

## 5. SENIOR LOAN PARTICIPATION COMMITMENTS

The Trust invests primarily in participations, assignments, or acts as a party to the primary lending syndicate of a Variable Rate Senior Loan interest to United States and foreign corporations, partnerships, and other entities. When the Trust purchases a participation of a Senior Loan interest, the Trust typically enters into a contractual agreement with the lender or other third party selling the participation, but not with the borrower directly. As such, the Trust assumes the credit risk of the borrower, selling participant or other persons interpositioned between the Trust and the borrower.

41

## VAN KAMPEN SENIOR INCOME TRUST

### NOTES TO FINANCIAL STATEMENTS -- JANUARY 31, 2006 (UNAUDITED) continued

At January 31, 2006, the following sets forth the selling participants with respect to interests in Senior Loans purchased by the Trust on a participation basis.

SELLING PARTICIPANT	PRINCIPAL	
	AMOUNT	VALUE
	(000)	(000)
GE Capital.....	\$9,800	\$9,834

## 6. BORROWINGS

The Trust may utilize financial leverage to the maximum extent allowable under the 1940 Act, as amended. Under the 1940 Act, as amended, a fund generally may not (i) borrow money greater than 33 1/3% of the fund's total assets or (ii) issue preferred shares greater than 50% of the fund's total assets. In using a combination of borrowing money and issuing preferred shares, the maximum allowable leverage is somewhere between 33 1/3% and 50% (but in no event more than 50%) of the Fund's total assets based on the relative amounts borrowed or preferred shares issued.

The Trust has entered into a \$700 million revolving credit and security agreement. Annual commitment fees of .13% are charged on the unused portion of the credit line. This revolving credit agreement is secured by the assets of the Trust. For the six months ended January 31, 2006, the average daily balance of

## Edgar Filing: VAN KAMPEN SENIOR INCOME TRUST - Form N-CSRS

borrowings under the revolving credit agreement was \$562,005,435 with a weighted average interest rate of 3.84%.

### 7. PREFERRED SHARES ISSUANCE

As of February 20, 2004, the Trust issued 5,600 shares each of Series M, Series T, Series W, Series TH and Series F Auction Preferred Shares ("APS"), \$.01 Par Value, \$25,000 liquidation preference, for a total issuance of \$700 million. Dividends are cumulative and the dividend rates are generally reset every seven days through an auction process. The average rate in effect on January 31, 2006 was 4.198%. During the six months ended January 31, 2006, the rates ranged from 3.200% to 4.500%.

The Trust pays annual fees equivalent to .25% of the preferred share liquidation value for the remarketing efforts associated with the preferred auctions. These fees are included as a component of the "Preferred Share Maintenance" expense in the Statement of Operations.

The APS are redeemable at the option of the Trust in whole or in part at the liquidation value of \$25,000 per share plus accumulated and unpaid dividends. The Trust is subject to certain asset coverage tests and the APS are subject to mandatory redemption if the tests are not met.

### 8. IDEMNIFICATIONS

The Trust enters into contracts that contain a variety of indemnifications. The Trust's maximum exposure under these arrangements is unknown. However, the Trust has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.
