## CAUTIONARY STATEMENTS REGARDING FORWARD-LOOKING STATEMENTS

Our Securities and Exchange Commission filings and public announcements often include forward-looking statements about future events. Generally, the words believe, expect, intend, estimate, anticipate, project, similar expressions identify forward-looking statements, which generally are not historical in nature. We intend for all such forward-looking statements contained herein, the entire contents of our website, and all subsequent written and oral forward-looking statements attributable to us or persons acting on our behalf, to be covered by the safe harbor provisions for forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and the provisions of Section 27A of the Securities Act of 1933 (which Sections were adopted as part of the Private Securities Litigation Reform Act of 1995). Important assumptions relating to these forward-looking statements include, among others, assumptions regarding demand for our products, expected pricing levels, raw material costs, the timing and cost of planned capital expenditures, expected outcomes of pending litigation and regulatory actions, competitive conditions, general economic conditions and expected synergies in connection with acquisitions and joint ventures. Forward-looking statements reflect our current expectations, based on currently available information, and are not guarantees of performance. Although we believe that the expectations reflected in such forward-looking statements are reasonable, these expectations could prove inaccurate as such statements involve risks and uncertainties, many of which are beyond our ability to control or predict. Should one or more of these risks or uncertainties, or other risks or uncertainties not currently known to us or that we currently deem to be immaterial, materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, estimated or projected. Important factors relating to these risks and uncertainties include, but are not limited to, those described in Part I, Item 1A. Risk Factors contained in our fiscal 2007 Form 10-K, as updated by Part II, Item 1A. Risk Factors in this report and those described from time to time in our future reports filed with the Securities and Exchange Commission.

We caution that one should not place undue reliance on forward-looking statements, which speak only as of the date this report is filed with the Securities and Exchange Commission. We disclaim any intention, obligation or duty to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

## DEFINITIONS

As used in this report, unless the context requires otherwise, our, us and we mean Oxford Industries, Inc. and its consolidated subsidiaries. Also, the terms FASB, SFAS and SEC mean the Financial Accounting Standards Board, Statement of Financial Accounting Standards and the U.S. Securities and Exchange Commission, respectively.

## CHANGE IN FISCAL YEAR

On October 8, 2007, our board of directors approved a change to our fiscal year end. Effective with our fiscal year which commenced on June 2, 2007, our fiscal year shall end at the end of the Saturday closest to January 31 and shall, in each case, begin at the beginning of the day next succeeding the last day of the preceding fiscal year. Accordingly, there will be a transition period from June 2, 2007 through February 2, 2008. We will file a Form 10-Q for the quarter ending August 31, 2007, a Form 10-Q for the quarter ending November 30, 2007 and a Form 10-K for the transition period from June 2, 2007 through February 2, 2008. Additionally, the terms listed below (or words of similar import) reflect the respective period noted:

Transition period 2008
Fiscal 2007
Fiscal 2006
Third quarter of transition period 2008

## Table of Contents

## OXFORD INDUSTRIES, INC. NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS FIRST QUARTER OF TRANSITION PERIOD 2008

1. Basis of Presentation: The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial reporting and the instructions of Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States. We believe the accompanying unaudited condensed consolidated financial statements reflect all normal, recurring adjustments that are necessary for a fair presentation of our financial position and results of operations for the periods presented. Results of operations for the interim periods presented are not necessarily indicative of results to be expected for our fiscal year primarily due to the impact of seasonality on our business. The accounting policies applied during the interim periods presented are consistent with the significant and critical accounting policies as described in our fiscal 2007 Form 10-K. The information included in this Form 10-Q should be read in conjunction with Management s Discussion and Analysis of Financial Condition and Results of Operations and the financial statements and notes thereto included in our fiscal 2007 Form 10-K.
In July 2006, the FASB issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes ( FIN 48 ). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in a company s financial statements in accordance with FASB Statement No. 109 Accounting for Income Taxes. FIN 48 utilizes a two-step approach for evaluating tax positions. Recognition occurs when we conclude that a tax position, based solely on its technical merits, is more-likely-than-not to be sustained upon examination. Measurement is only addressed if step one has been satisfied. The tax benefit recorded is measured as the largest amount of benefit, determined on a cumulative probability basis that is more-likely-than-not to be realized upon ultimate settlement. Those tax positions failing to qualify for initial recognition are recognized in the first subsequent interim period they meet the more-likely-than-not standard, or are resolved through negotiation or litigation with the taxing authority, or upon expiration of the statute of limitations. De-recognition of a tax position that was previously recognized occurs when we subsequently determine that a tax position no longer meets the more-likely-than-not threshold of being sustained. We adopted FIN 48 during the first quarter of transition period 2008 resulting in an immaterial increase in retained earnings. Additionally, the adoption of FIN 48 resulted in the reclassification of certain amounts totaling approximately $\$ 5.3$ million from income taxes payable and non-current deferred income taxes to other non-current liabilities. This reclassification is reflected as a non-cash operating item in our statement of cash flows. FIN 48 also requires expanded disclosure requirements, which are included in Note 5 below.

In September 2006, the FASB issued FASB Statement No. 157 Fair Value Measurements ( FAS 157 ). FAS 157 is applicable in our next fiscal year. FAS 157 provides enhanced guidance for using fair value measurements for assets and liabilities. The standard also requires additional disclosures about the extent to which companies measure assets and liabilities at fair value, the information used to measure fair value and the effect of fair value measurements on earnings. We do not anticipate that the adoption of FAS 157 will have a material impact upon adoption.

In February 2007, the FASB issued FASB Statement No. 159 The Fair Value Option for Financial Assets and Financial Liabilities ( FAS 159 ). FAS 159 is applicable in our next fiscal year. FAS 159 permits entities to choose to measure eligible items in the balance sheet at fair value at specified election dates with the unrealized gains and losses recognized in earnings. We do not anticipate that the adoption of FAS 159 will have a material impact upon adoption.

EITF 06-4 Endorsement Split-Dollar Life Insurance Arrangements ( EITF 06-4 ) was ratified in September 2006. EITF $06-4$ requires that the post-retirement benefit portion of an endorsement-type split-dollar life insurance policy should be recognized as a liability because the obligation is not effectively settled by the purchase of the life insurance policy. The liability for future benefits is recognized based on the substantive agreement with the employee (which provides a future death benefit). We adopted EITF 06-4 during the first quarter of transition period 2008, resulting in the recognition of an immaterial current liability and a reduction to retained earnings to reflect the cumulative-effect adjustment.

## Table of Contents

2. Inventories: The components of inventories as of the dates specified are summarized as follows (in thousands):

|  | August 31, <br> $\mathbf{2 0 0 7}$ | June 1, 2007 | September 1, <br> $\mathbf{2 0 0 6}$ |
| :--- | :---: | :---: | :---: |

|  | First Quarter |  |
| :--- | :---: | ---: |
| Transition |  |  |
| Period |  |  |
| $\mathbf{2 0 0 8}$ |  |  |$)$ Fiscal 2007

4. Operating Group Information: Our business is operated through our four operating groups: Tommy Bahama, Ben Sherman, Lanier Clothes and Oxford Apparel. We identify our operating groups based on the way our management organizes the components of our business for purposes of allocating resources and assessing performance. Corporate and Other is a reconciling category for reporting purposes and includes our corporate offices, substantially all financing activities, LIFO inventory accounting adjustments and other costs that are not allocated to the operating groups. In connection with the close of fiscal 2007 and due to changes in our management reporting structure, we reassessed and changed our operating groups for reporting purposes. All fiscal 2007 amounts below have been restated to reflect the revised operating groups. Leaders of the operating groups report directly to our Chief Executive Officer. For further information on our operating groups, see Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations included in this report and Item 1. Business in our fiscal 2007 Form 10-K.

The information below presents certain information about our operating groups (in thousands).

| Corporate and Other | 2,363 | 23,734 | 1,742 |
| Womenswear Group (discontinued) |  |  | 18,132 |
| Total | $\$ 893,642$ | $\$ 908,738$ | $\$ 885,808$ |

5. Income Taxes: We file income tax returns in the United States and various state and foreign jurisdictions. Our federal, state, local and foreign income tax returns filed for years ended on or before May 30, 2003, with limited exceptions, are no longer subject to examination by tax authorities.
As discussed in Note 1 above, we adopted FIN 48 in the first quarter of transition period 2008. Upon adoption, the gross amount of unrecognized tax benefits was approximately $\$ 5.3$ million. Additionally, we have accrued $\$ 0.6$ million of related interest and penalties. If we were to prevail on all unrecognized tax benefits recorded, approximately $\$ 4.7$ million of the reserve for unrecognized tax benefits recorded and the full amount of related interest and penalties would benefit the effective tax rate. The remaining $\$ 0.6$ million of unrecognized tax benefits
would be offset by benefits available in a different taxing jurisdiction.
Interest and penalties associated with unrecognized tax positions are recorded within income tax expense in our consolidated statements of earnings.

It is reasonably possible that the amount of unrecognized benefit with respect to certain of our unrecognized tax positions will increase or decrease within the next twelve months. Events that may cause these changes include the settlement of issues with taxing authorities or expiration of statutes. We do not expect these changes to have a significant effect on our results of operations or our financial position. The amount of unrecognized tax benefits did not change materially during the first quarter of transition period 2008.

## Table of Contents

6. Consolidating Financial Data of Subsidiary Guarantors: Our Senior Unsecured Notes are guaranteed by our wholly owned domestic subsidiaries ( Subsidiary Guarantors ). All guarantees are full and unconditional. Non-guarantors consist of our subsidiaries which are organized outside of the United States and any subsidiaries which are not wholly-owned. We use the equity method with respect to investment in subsidiaries included in other non-current assets in our condensed consolidating financial statements. Set forth below are our unaudited condensed consolidating balance sheets as of August 31, 2007, June 1, 2007, and September 1, 2006, our unaudited condensed consolidating statements of earnings for the first quarter of transition period 2008 and fiscal 2007 and our unaudited condensed consolidating statements of cash flows for the first quarter of transition period 2008 and fiscal 2007 (in thousands).

## ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with our unaudited condensed consolidated financial statements and the notes to the unaudited condensed consolidated financial statements contained in this report and the consolidated financial statements, notes to consolidated financial statements and Management s Discussion and Analysis of Financial Condition and Results of Operations contained in our fiscal 2007 Form 10-K. OVERVIEW

We generate revenues and cash flow through the design, sale, production and distribution of branded and private label consumer apparel and footwear for men, women and children and the licensing of company-owned trademarks. Our principal markets and customers are located in the United States and, to a lesser extent, the United Kingdom. We source substantially all of our products through third party producers in foreign countries. We distribute our products through our wholesale customers, which include chain stores, department stores, specialty stores, specialty catalog retailers, mass merchants and Internet retailers. We also sell certain products of our owned brands through our own retail stores.

We operate in an industry that is highly competitive. We believe our ability to continuously evaluate and respond to changing consumer demands and tastes across multiple market segments, distribution channels and geographic regions is critical to our success. Although our approach is aimed at diversifying our risks, misjudging shifts in consumer preferences could have a negative effect on future operating results. Other key aspects of competition include brand image, quality, distribution method, price, customer service and intellectual property protection. We believe our size and global operating strategies help us to compete successfully by providing opportunities for operating synergies. Our success in the future will depend on our ability to continue to design products that are acceptable to the markets we serve and to source our products on a competitive basis while still earning appropriate margins.

We are executing a strategy to move towards a business model that is more focused on brands owned or controlled by us. Our decision to follow this strategy is driven in part by the continued consolidation in the retail industry and the increasing concentration of apparel manufacturing in a relatively limited number of offshore markets, trends which make the private label business more competitively challenging. Significant steps in our execution of this strategy include our June 2003 acquisition of the Tommy Bahama brand and operations; our July 2004 acquisition of the Ben Sherman brand and operations; the divestiture of our private label Womenswear Group operations in June 2006; the closure of certain of our manufacturing facilities located in Latin America and the associated shifts in our Oxford Apparel and Lanier Clothes operating groups towards package purchases from third party manufacturers in the Far East; and the acquisition of several other trademarks and related operations including Solitude, Arnold Brant and Hathaway. In the future, we will continue to look for opportunities by which we can make further progress with this strategy, including through organic growth in our owned brands, the acquisition of additional brands, and further streamlining or diposition of portions of our private label businesses that do not have the potential to meet our operating income expectations.

The most significant factors impacting our results and contributing to the change in diluted net earnings from continuing operations per common share of $\$ 0.27$ in the first quarter of transition period 2008 from $\$ 0.63$ in the first quarter of fiscal 2007 are discussed by operating group below:

The Tommy Bahama Group experienced a $\$ 3.8$ million, or $22 \%$, decrease in operating income, primarily due to certain wholesale customers deferring the shipment of certain products until the second quarter of transition period 2008 as well as the difficult retail environment in the first quarter of transition period 2008 at our own retail stores and our customers stores, particularly in Florida, California, Nevada and Arizona.

The Ben Sherman Group experienced a $\$ 1.2$ million, or $61 \%$, decrease in operating income, primarily due to a reduction in net sales and operating income in the United States as a result of our continuing efforts to restrict distribution of our Ben Sherman products and the termination of the Evisu denim distribution agreement in the United States.

The Lanier Clothes Group experienced a $\$ 2.2$ million, or $88 \%$, decrease in operating income primarily due to the continuing sluggish demand in the tailored clothing market.

## Table of Contents

The Oxford Apparel Group experienced a $\$ 2.6$ million, or $42 \%$, decrease in operating income primarily due to a decrease in net sales as we exited certain lines of business as well as charges totaling $\$ 1.0$ million that we incurred for asset impairment and operating losses at our Tegucigalpa, Honduras manufacturing facility which we plan to sell during transition period 2008. These items were partially offset by a reduction in selling, general and administrative expenses from lines that we exited during the second half of fiscal 2007 and the benefit of a full quarter of equity income from the unconsolidated entity that owns the Hathaway trademark which was acquired during the first quarter of fiscal 2007.

Our effective tax rate was $22.8 \%$ and $36.3 \%$ in the first quarter of transition period 2008 and the first quarter of fiscal 2007, respectively. The decrease in our effective tax rate was a result of (1) a change in the enacted tax rate in the United Kingdom in the current quarter resulting in a decrease in deferred tax liabilities and income tax expense, (2) the impact of the statute of limitations expiring on certain contingency reserves during the first quarter of transition period 2008 and (3) the change in our assertion regarding our initial investment in a foreign subsidiary in the fourth quarter of fiscal 2007.
On October 8, 2007, our board of directors approved a change to our fiscal year end. Effective with our fiscal year which commenced on June 2, 2007, our fiscal year shall end at the end of the Saturday closest to January 31 and shall, in each case, begin at the beginning of the day next succeeding the last day of the preceding fiscal year. Accordingly, there will be a transition period from June 2, 2007 through February 2, 2008. We will file a Form 10-Q for the quarter ending August 31, 2007, a Form 10-Q for the quarter ending November 30, 2007 and a Form 10-K for the transition period from June 2, 2007 through February 2, 2008.

## RESULTS OF OPERATIONS

The following table sets forth the line items in our consolidated statements of earnings both in dollars (in thousands) and the percentage change as compared to the comparable period in the prior year. Individual line items of our consolidated statements of earnings may not be directly comparable to those of our competitors, as statement of earnings classification of certain expenses may vary by company.

| Net sales | $\$ 237,947$ | $\$ 284,078$ | $(16.2 \%)$ |

| Earnings (loss) from discontinued operations, net of taxes | $0.0 \%$ | $(0.1 \%)$ |
| Net earnings | $2.0 \%$ | $3.9 \%$ |

## OPERATING GROUP DEFINITION

Our business is operated through our four operating groups: Tommy Bahama, Ben Sherman, Lanier Clothes and Oxford Apparel. We identify our operating groups based on the way our management organizes the components of our business for purposes of allocating resources and assessing performance. In connection with the close of fiscal 2007 and due to changes in our management reporting structure, we reassessed and changed our operating groups for reporting purposes. All fiscal 2007 amounts below have been restated to reflect the revised operating groups. Leaders of the operating groups report directly to our Chief Executive Officer.

In Tommy Bahama, we design, source and market collections of men $s$ and women $s$ sportswear and related products under brands that include Tommy Bahama, Indigo Palms and Island Soft. Tommy Bahama s products can be found in our own retail stores as well as certain department stores and independent specialty stores throughout the United States. The target consumers of Tommy Bahama are affluent 35 and older men and women who embrace a relaxed and casual approach to daily living. We also license the Tommy Bahama name for a wide variety of product categories.

Ben Sherman is a London-based designer, marketer and distributor of branded sportswear and footwear. We also license the Ben Sherman name to third parties for various product categories. Ben Sherman was established in 1963 as an edgy, young men s, Mod -inspired shirt brand and has evolved into a global lifestyle brand of apparel and footwear targeted at youthful-thinking men and women ages 19 to 35 . We offer a full Ben Sherman sportswear collection as well as tailored clothing, footwear and accessories. Our Ben Sherman products can be found in certain department stores and a variety of independent specialty stores, as well as in our own Ben Sherman retail stores.

Lanier Clothes designs and markets branded and private label men s suits, sportcoats, suit separates and dress slacks across a wide range of price points. Our Lanier Clothes branded products include Nautica, Kenneth Cole, Dockers, O Oscar and Geoffrey Beene, all of which are licensed to us by third parties. In fiscal 2006, we acquired the Arnold Brant brand, which is an upscale tailored brand that is intended to blend modern elements of style with affordable luxury. In addition to the branded businesses, we design and source certain private label tailored clothing products. Significant private label brands include Stafford, Alfani, Tasso Elba and Lands End. Our Lanier Clothes products are sold to national chains, department stores, mass merchants, specialty stores, specialty catalog retailers and discount retailers throughout the United States.

## Table of Contents

Oxford Apparel produces branded and private label dress shirts, suited separates, sport shirts, dress slacks, casual slacks, outerwear, sweaters, jeans, swimwear, westernwear and golf apparel. We design and source certain private label programs for several customers including programs for Lands End, LL Bean and Eddie Bauer. Owned brands of Oxford Apparel include Oxford Golf, Solitude, Wedge, Kona Wind, Tranquility Bay, Ely, Cattleman and Cumberland Outfitters. Oxford Apparel also owns a two-thirds interest in the entity that owns the Hathaway trademark in the United States and several other countries. Oxford Apparel also licenses from third parties the right to use the Tommy Hilfiger, Dockers and United States Polo Association trademarks for certain apparel products. Our Oxford Apparel products are sold to a variety of department stores, mass merchants, specialty catalog retailers, discount retailers, specialty retailers, green grass golf merchants and Internet retailers throughout the United States.

Corporate and Other is a reconciling category for reporting purposes and includes our corporate offices, substantially all financing activities, LIFO inventory accounting adjustments and other costs that are not allocated to the operating groups. LIFO inventory calculations are made on a legal entity basis which does not correspond to our operating group definitions as portions of Lanier Clothes and Oxford Apparel are on the LIFO basis of accounting. Therefore, LIFO inventory accounting adjustments are not allocated to operating groups.

The information below presents certain information about our operating groups (in thousands).

|  | First Quarter <br> Transition <br> Period <br> $\mathbf{2 0 0 8}$ | Fiscal <br> $\mathbf{2 0 0 7}$ | Percent <br> Change |

FIRST QUARTER OF TRANSITION PERIOD 2008 COMPARED TO FIRST QUARTER OF FISCAL 2007

## Edgar Filing: OXFORD INDUSTRIES INC - Form 10-Q

The discussion below compares our operating results for the first quarter of transition period 2008 to the first quarter of fiscal 2007. Each percentage change provided below reflects the change between these periods unless indicated otherwise.

Net sales decreased $\$ 46.1$ million, or $16.2 \%$, in the first quarter of transition period 2008 as a result of the changes in sales as discussed below.

## Table of Contents

Tommy Bahama reported a decrease in net sales of $\$ 5.0$ million, or $4.8 \%$. The decrease was primarily due to a decrease in unit sales of $10.3 \%$ resulting from:
some larger wholesale customers deferring the receipt of certain fall shipments until the second quarter of transition period 2008 which we expect to continue in future quarters; and
the difficult retail environment in the first quarter of transition period 2008 at our own retail stores and our customers stores, particularly Florida, California, Nevada, and Arizona.
These factors were partially offset by an increase in sales due to the total number of Tommy Bahama retail stores, excluding licensed stores, increasing to 69 at August 31, 2007 from 62 at September 1, 2006 and an increase in the average selling price per unit of $4.1 \%$. The increase in the average selling price per unit was primarily due to our sales of Tommy Bahama products at retail representing a larger portion of total Tommy Bahama sales in the first quarter of transition period 2008.

Ben Sherman reported a decrease in net sales of $\$ 1.5$ million, or $3.9 \%$. The decrease in net sales was primarily due to a decrease in unit sales of $8.9 \%$ resulting from a unit sales decrease in the Ben Sherman United States business. The decline in the United States Ben Sherman operations was primarily due to our continuing efforts to restrict distribution of Ben Sherman products, decrease inventory levels at retail and the termination of the Evisu denim distribution agreement. The decrease in unit sales was partially offset by an increase in the average selling price per unit of $5.4 \%$, which was primarily due to a $5 \%$ increase in the average exchange rate between the United States dollar and the British pound sterling.

Lanier Clothes reported a decrease in net sales of $\$ 5.1$ million, or $12.5 \%$. The decrease was primarily due to a decline in the average selling price per unit of $11.4 \%$ in addition to a unit sales decrease of $1.3 \%$. The decrease in the average selling price per unit and the unit sales were primarily due to the continued sluggish demand in the tailored clothing market at retail.

Oxford Apparel reported a decrease in net sales of $\$ 33.7$ million, or $34.0 \%$. The decrease was primarily due to a decrease in unit sales of $34.7 \%$ partially offset by an increase in the average selling price per unit of $1.0 \%$. The decrease in net sales and unit sales was anticipated in connection with our strategy in the latter part of fiscal 2007 to exit certain lines of business which we believe lacked the ability to meet our profitability goals.

Gross profit decreased $9.9 \%$ in the first quarter of transition period 2008. The decrease was due to lower sales, as described above, partially offset by higher gross margins. Gross margins increased to $41.0 \%$ during the first quarter of transition period 2008 from $38.1 \%$ during the first quarter of fiscal 2007. The increase was primarily due to the increased proportion of Tommy Bahama retail sales, which have higher gross margins, and decreased sales in our wholesale businesses, including the exit of certain lower margin businesses in our Oxford Apparel Group.

Our gross profit may not be directly comparable to those of our competitors, as income statement classifications of certain expenses may vary by company.

Selling, general and administrative expenses, or $S G \& A$, increased $2.8 \%$ in the first quarter of transition period 2008. SG\&A was $37.3 \%$ of net sales in the first quarter of transition period 2008 compared to $30.4 \%$ in the first quarter of fiscal 2007. The increase in SG\&A was primarily due to the expenses associated with operating additional Tommy Bahama and Ben Sherman retail stores. These increases in SG\&A were partially offset by reductions of SG\&A in our Oxford Apparel Group related to businesses that we exited. The increase as a percentage of net sales was primarily due to the reduction in net sales for the first quarter of transition period 2008 compared to the first quarter of fiscal 2007.

Amortization of intangible assets decreased $23.1 \%$ in the first quarter of transition period 2008. The change was primarily due to certain intangible assets acquired as part of our previous acquisitions, which generally have a greater amount of amortization in the earlier periods following the acquisition than later periods. We expect that amortization expense will decrease in future years unless we acquire additional intangible assets with definite lives.

Royalties and other operating income increased $30.8 \%$ in the first quarter of transition period 2008. The increase was primarily due to increased royalty income from the Tommy Bahama brand and our share of equity income received from an unconsolidated entity that owns the Hathaway trademark in the United States and several other countries, which we acquired in the first quarter of fiscal 2007.

## Table of Contents

Operating income decreased $51.4 \%$ in the first quarter of transition period 2008 due to the changes discussed below.

Tommy Bahama reported a $\$ 3.8$ million, or $22.4 \%$, decrease in operating income in the first quarter of transition period 2008. The net decrease was primarily due to lower net sales, as discussed above, and higher SG\&A due to the additional Tommy Bahama retail stores which we opened subsequent to September 1, 2006. This was partially offset by a decrease in amortization of intangible assets and an increase in royalty income.

Ben Sherman reported a $\$ 1.2$ million, or $61.4 \%$, decrease in operating income in the first quarter of transition period 2008. The net decrease was primarily due to the decrease in sales in the United States wholesale business, as discussed above, and increased SG\&A due to additional retail stores which we opened subsequent to September 1, 2006.

Lanier Clothes reported a $\$ 2.2$ million, or $87.7 \%$, decrease in operating income in the first quarter of transition period 2008. The net decrease was primarily due to the continuing sluggish demand in the tailored clothing market, as discussed above, that resulted in decreased sales and gross margins.

Oxford Apparel reported a $\$ 2.6$ million, or $41.9 \%$, decrease in operating income in the first quarter of transition period 2008. The net decrease was primarily due to reduced net sales and $\$ 1.0$ million of losses relating to impairment charges and operating losses resulting from our manufacturing facility in Tegucigalpa, Honduras, which we plan to sell during transition period 2008. These items were partially offset by reduced infrastructure costs associated with the lines of business that we exited, as discussed above, and increased equity income from the unconsolidated entity that owns the Hathaway trademark, which we acquired in the first quarter of fiscal 2007.

The Corporate and Other operating loss increased $47.3 \%$ in the first quarter of transition period 2008. The increase in the operating loss was primarily due to the impact of LIFO accounting adjustments in the two periods and the non-recurring reimbursement for corporate administrative services to the purchaser of the assets of the Womenswear Group pursuant to a transition services agreement, which ceased in fiscal 2007.

Interest expense, net decreased $9.0 \%$ in the first quarter of transition period 2008. The decrease in interest expense was primarily due to lower levels of debt during the first quarter of transition period 2008.

Income taxes were at an effective tax rate of $22.8 \%$ for the first quarter of transition period 2008 as compared to $36.3 \%$ for the first quarter of fiscal 2007. The decrease in the effective rate reflects:
the impact on our deferred tax balances as a result of a change in the enacted tax rate in the United Kingdom;
the impact of the statute of limitations expiring for certain contingency reserves during the first quarter of transition period 2008; and
the change, during the fourth quarter of fiscal 2007, in our assertion regarding our initial investment in a foreign subsidiary, which is now considered permanently reinvested.
We believe our annual effective tax rate on current year earnings, before the impact of any discrete events, including but not limited to changes in enacted rates or resolution of contingency reserves during the year is approximately $34.0 \%$ to $34.5 \%$.

Discontinued operations in fiscal 2007 includes incidental items related to the operations of our Womenswear Group, which was disposed of on June 2, 2006.

## FINANCIAL CONDITION, LIQUIDITY AND CAPITAL RESOURCES

Our primary source of revenue and cash flow is our operating activities in the United States and to some extent the United Kingdom. When cash inflows are less than cash outflows, subject to their terms, we also have access to amounts under our U.S. Revolver and U.K. Revolver, each of which are described below. We may seek to finance future capital investment programs through various methods, including, but not limited to, cash flow from operations, borrowings under our current or additional credit facilities and sales of debt or equity securities.

## Edgar Filing: OXFORD INDUSTRIES INC - Form 10-Q

## Table of Contents

Our liquidity requirements arise from the funding of our working capital needs, which include inventory, other operating expenses and accounts receivable, funding of capital expenditures, payment of quarterly dividends, repayment of our indebtedness and acquisitions, if any. Generally, our product purchases are acquired through trade letters of credit which are drawn against our lines of credit at the time of shipment of the products and reduce the amounts available under our lines of credit when issued.

Cash and cash equivalents on hand was $\$ 15.7$ million at August 31, 2007 and $\$ 10.7$ million at September 1, 2006, respectively.

## Operating Activities

During the first quarter of transition period 2008 and the first quarter of fiscal 2007, our continuing operations used $\$ 0.1$ million and $\$ 19.1$ million of cash, respectively. The operating cash flows were primarily the result of earnings from continuing operations for the period adjusted for non-cash activities such as depreciation and amortization and changes in our working capital accounts. In the first quarter of transition period 2008, the significant changes in working capital included higher amounts of inventories and lower current liabilities partially offset by lower receivables, each as discussed below. In the first quarter of fiscal 2007, the significant changes in working capital included significant increases in receivables, inventories and prepaid expenses and reductions in current liabilities.

Our working capital ratio, which is calculated by dividing total current assets by total current liabilities, was 2.95:1, 2.35:1 and 2.52:1 at August 31, 2007, June 1, 2007 and September 1, 2006, respectively. The change in our working capital ratio between August 31, 2007 and September 1, 2006 was due to the $21 \%$ decrease in current liabilities partially offset by the $9 \%$ reduction in current assets, as discussed below.

Receivables, net were $\$ 123.0$ million and $\$ 157.6$ million at August 31, 2007 and September 1, 2006, respectively, representing a decrease of $22 \%$. The decrease was primarily due to the lower wholesale sales in the first quarter of transition period 2008. Days sales outstanding for our wholesale accounts receivable was 50 days and 52 days at August 31, 2007 and September 1, 2006, respectively.

Inventories were $\$ 155.1$ million and $\$ 139.4$ million at August 31, 2007 and September 1, 2006, respectively, an increase of $11 \%$. Inventory for the Tommy Bahama operating group increased to support additional retail stores. Tommy Bahama inventory levels were also impacted by the deferral of certain shipments by some of our larger customers and the difficult retail environment during the first quarter of transition period 2008. Inventory for Lanier Clothes increased due to lower than planned sales during the latter part of fiscal 2007 and the first quarter of transition period 2008 which resulted in higher than optimal levels in our replenishment programs and seasonal inventories at August 31, 2007. We expect the inventory levels in Lanier Clothes to decrease to a more optimal level within the next nine months. Inventory for Ben Sherman remained relatively consistent with the prior year. Inventory levels for Oxford Apparel decreased as we have refocused the operations of Oxford Apparel towards higher-margin products and discontinued certain programs that previously required a significant inventory investment. Our days supply of inventory on hand, using a FIFO basis, was 116 days and 99 days as of August 31, 2007 and September 1, 2006, respectively, due to the changes by operating group discussed above.

Prepaid expenses were $\$ 22.6$ million and $\$ 23.9$ million at August 31, 2007 and September 1, 2006, respectively. The decrease in prepaid expenses was primarily due to a decrease in prepaid advertising as the timing of the payment for certain advertising events was delayed in the first quarter of transition period 2008.

Current assets related to discontinued operations and current liabilities related to discontinued operations were $\$ 18.1$ million and $\$ 11.5$ million, respectively at September 1, 2006. The net assets related to discontinued operations at September 1, 2006 were converted to cash during fiscal 2007. Therefore, there were no assets or liabilities related to discontinued operations at August 31, 2007 or June 1, 2007.

Current liabilities, excluding current liabilities related to discontinued operations of $\$ 11.5$ million at September 1, 2006, were $\$ 107.4$ million and $\$ 127.4$ million at August 31, 2007 and September 1, 2006, respectively. The decrease in current liabilities was primarily due to the timing of payments for inventory, accrued compensation and income taxes and the reclassification of approximately $\$ 2.2$ million from income taxes payable upon the adoption of FIN 48 in the first quarter of transition period 2008.

## Table of Contents

Non-current deferred income taxes were $\$ 71.3$ million and $\$ 78.4$ million at August 31, 2007 and September 1, 2006, respectively. The change resulted primarily from the reclassification of approximately $\$ 3.7$ million from non-current deferred income taxes as a result of the adoption of FIN 48 in the first quarter of transition period 2008, the impact of the change in foreign currency exchange rates on deferred income tax balances and changes in property, plant and equipment basis differences.

Other non-current liabilities, which primarily consist of deferred rent and deferred compensation amounts, were $\$ 49.5$ million and $\$ 32.4$ million at August 31, 2007 and September 1, 2006, respectively. The increase was primarily due to the recognition of additional deferred rent and deferred compensation during the twelve months subsequent to September 1, 2006 and the reclassification of approximately $\$ 5.3$ million to other non-current liabilities from income taxes payable and non-current deferred income taxes as a result of the adoption of FIN 48 in the first quarter of transition period 2008.

## Investing Activities

During the first quarter of transition period 2008, investing activities used $\$ 28.5$ million in cash. We paid approximately $\$ 21.7$ million related to acquisitions and investments in an unconsolidated entity, primarily consisting of the final Tommy Bahama earn-out payment. Additionally, we incurred $\$ 6.9$ million of capital expenditures, primarily related to new Tommy Bahama retail stores.

During the first quarter of fiscal 2007, investing activities used $\$ 24.7$ million in cash. We paid approximately $\$ 21.2$ million related to acquisitions, consisting of the fiscal 2006 Tommy Bahama earn-out payment and the acquisition of an ownership interest in an unconsolidated entity that owns the Hathaway trademark in the United States and certain other countries. Additionally, we incurred capital expenditures of $\$ 3.6$ million, primarily related to new Tommy Bahama and Ben Sherman retail stores.

Non-current assets, including property, plant and equipment, goodwill, intangible assets and other non-current assets, increased primarily as a result of the fiscal 2007 earn-out related to the Tommy Bahama acquisition, capital expenditures for our retail stores and the impact of changes in foreign currency exchange rates. These increases were partially offset by depreciation related to our property, plant and equipment and amortization of our intangible assets.

## Financing Activities

During the first quarter of transition period 2008, financing activities provided $\$ 7.2$ million in cash. The cash flow used in our investing activities and to pay dividends on our common shares resulted in the need to borrow additional amounts under our U.S. Revolver during the first quarter of transition period 2008. We also received $\$ 0.6$ million of cash from the exercise of employee stock options. We paid an aggregate of $\$ 3.2$ million during the first quarter of transition period 2008 for dividends on our common shares declared for such period.

During the first quarter of fiscal 2007, financing activities provided $\$ 22.4$ million in cash, primarily from additional borrowings, net of repayments, under our U.S. Revolver to fund our investments and working capital needs during the period. We also received $\$ 0.9$ million of cash from the exercise of employee stock options. These cash proceeds were partially offset by the use of cash to pay $\$ 5.3$ million of dividends on our common shares declared in the fourth quarter of fiscal 2006 and first quarter of fiscal 2007.

On August 31, 2007, we paid a cash dividend of $\$ 0.18$ per share to shareholders of record as of August 15, 2007. That dividend is the 189th consecutive quarterly dividend we have paid since we became a public company in July 1960 . We expect to pay dividends in future quarters. However, we may decide to discontinue or modify the dividend payment at any time if we determine that other uses of our capital, including, but not limited to, payment of debt outstanding, stock repurchases or funding of future acquisitions, may be in our best interest; if our expectations of future cash flows and future cash needs outweigh the ability to pay a dividend; or if the terms of our credit facilities or indentures limit our ability to pay dividends. We may borrow to fund dividends in the short term based on our expectations of operating cash flows in future periods. All cash flow from operations will not necessarily be paid out as dividends in all periods.

## Table of Contents

Debt, including short term debt, was $\$ 209.5$ million and $\$ 227.0$ million as of August 31, 2007 and September 1, 2006, respectively. The decrease resulted primarily from the cash generated by our operating activities and the proceeds from the remaining net assets related to our disposition of substantially all of the assets of our Womenswear Group operations. These amounts less amounts used in our investing activities, discussed above, were used to reduce outstanding debt.

## Cash Flows from Discontinued Operations

Our Womenswear Group generated cash flow of $\$ 21.7$ million during the first quarter of fiscal 2007. The cash flows from discontinued operations for the first quarter of fiscal 2007 reflects the realization and disposition of retained assets and liabilities after the transaction date, June 2, 2006. We do not anticipate significant cash flows from discontinued operations in future periods.

## Liquidity and Capital Resources

The table below provides a description of our significant financing arrangements and the amounts outstanding under these financing arrangements (in thousands) at August 31, 2007, June 1, 2007 and September 1, 2006:

| August 31, | June 1, | September |
| :---: | :---: | :---: |
| 2007 | 2007 | 1,2006 |

$\$ 280$ million U.S. Secured Revolving Credit Facility ( U.S. Revolver ), which accrues interest (8.25\% at August 31, 2007), unused line fees and letter of credit fees based upon a pricing grid which is tied to certain debt ratios, requires interest payments monthly with principal due at maturity (July 2009), and is collateralized by substantially all the assets of Oxford Industries, Inc. and our consolidated domestic subsidiaries
$£ 12$ million Senior Secured Revolving Credit Facility ( U.K. Revolver ), which accrues interest at the bank $s$ base rate plus $1.0 \%$, requires interest payments monthly with principal payable on demand or at maturity (July 2008), and is collateralized by substantially all the United Kingdom assets of Ben Sherman
\$ 9,800
\$
\$ 27,700
$\$ 200$ million Senior Unsecured Notes ( Senior Unsecured Notes ), which accrue interest at $8.875 \%$ (effective interest rate of $9.0 \%$ ) and require interest payments semi-annually on June 1 and December 1 of each year, require payment of principal at maturity (June 2011), are subject to certain prepayment penalties and are guaranteed by our consolidated domestic subsidiaries

Other debt

| 200,000 | 200,000 | 200,000 |
| ---: | ---: | ---: |
| 407 | 403 | 24 |

Total debt 210,207

200,403
227,825
Unamortized discount on Senior Unsecured Notes
(661)
(706)

Short-term debt and current maturities of long-term debt
(407)
(403)

Our U.S. Revolver, U.K. Revolver and Senior Unsecured Notes each include certain debt covenant restrictions that require us or our subsidiaries to maintain certain financial ratios that we believe are customary for similar facilities. As of August 31, 2007, we were compliant with all financial covenants and restricted payment provisions related to our debt agreements.

Our U.S. Revolver also includes limitations on certain restricted payments, including payment of dividends. Pursuant to the U.S. Revolver agreement, we may pay dividends if our Total Debt to EBITDA ratio, as defined in the U.S. Revolver agreement, for the four preceding quarters would have been not more than 3.00:1.00 after giving effect to the dividend payment. Additionally, our Senior Unsecured Notes include limitations on the payment of dividends. Pursuant to the indenture governing our Senior Unsecured Notes, we may make certain Restricted Payments, as defined in the indenture, to the extent that the sum of the Restricted Payments do not exceed the allowable amount. Restricted Payments include the payment of dividends, the repurchase of our common shares, repayment of certain debt, the payment of amounts pursuant to earn-out agreements and certain investments. The allowable amount includes $50 \%$ of GAAP net income, as adjusted, cash proceeds from the issuance of shares of our common stock including stock options and restricted stock awards and certain other items. We were compliant with these limitations as of August 31, 2007 and do not anticipate that our U.S. Revolver or Senior Unsecured Notes will limit our ability to pay dividends during transition period 2008.

## Table of Contents

Our U.S. Revolver and U.K. Revolver are used to finance trade letters of credit and standby letters of credit, as well as provide funding for other operating activities and acquisitions. As of August 31, 2007, approximately $\$ 60.8$ million of trade letters of credit and other limitations on availability were outstanding against our U.S. Revolver and the U.K. Revolver. The aggregate net availability under our U.S. Revolver and U.K. Revolver agreements was approximately $\$ 243.4$ million as of August 31, 2007.

The Senior Unsecured Notes are subject to redemption at any time after June 1, 2007, at our option, in whole or in part, on not less than 30 nor more than 60 days prior notice. During the period from June 1, 2007 through May 31, 2008, the amount paid at redemption would be equal to $104.438 \%$ of the aggregate principal amount of the Senior Unsecured Notes to be redeemed together with accrued and unpaid interest, if any, to the date of redemption. During the period from June 1, 2008 through May 31, 2009, the amount paid at redemption would be equal to $102.219 \%$ of the aggregate principal amount of the Senior Unsecured Notes to be redeemed together with accrued and unpaid interest, if any, to the date of redemption. Subsequent to June 1, 2009, the amount paid at redemption would be equal to $100.000 \%$ of the aggregate principal amount of the Senior Unsecured Notes to be redeemed together with accrued and unpaid interest, if any, to the date of redemption.

Our debt to total capitalization ratio was $31 \%, 31 \%$ and $36 \%$ at August 31, 2007, June 1, 2007 and September 1, 2006, respectively. The change in this ratio from September 1, 2006 was primarily a result of the reduction in our debt levels and the increase in retained earnings during the periods subsequent to September 1, 2006. Our debt level, as well as the ratio of debt to total capitalization, in future years may not be comparable to historical amounts as we continuously assess and periodically make changes to our capital structure and may make additional acquisitions or investments in the future.

We anticipate that we will be able to satisfy our ongoing cash requirements, which generally consist of working capital needs, capital expenditures (primarily for the opening of retail stores) and interest payments on our debt during transition period 2008, primarily from cash on hand and cash flow from operations supplemented by borrowings under our lines of credit, as necessary. Our need for working capital is typically seasonal with greatest requirements generally existing from October through March as we build inventory for the spring/summer season. Our capital needs will depend on many factors, including our growth rate, the need to finance increased inventory levels and the success of our various products.

If appropriate investment opportunities arise that exceed the availability under our existing credit facilities, we believe that we will be able to fund such acquisitions through additional or refinanced debt facilities or the issuance of additional equity. However, our ability to obtain additional borrowings or refinance our credit facilities will depend on many factors, including the prevailing market conditions, our financial condition and our ability to negotiate favorable terms and conditions. There is no assurance that financing would be available on terms that are acceptable or favorable to us, if at all. At maturity of our U.K. Revolver, U.S. Revolver and Senior Unsecured Notes, we anticipate that we will be able to refinance the facilities and debt with terms available in the market at that time.

Our contractual obligations as of August 31, 2007 have not changed significantly from the contractual obligations outstanding at June 1, 2007 other than changes in the amounts outstanding under the U.S. Revolver and U.K. Revolver, amounts outstanding pursuant to letters of credit (both as discussed above) and new leases for our recently opened retail stores, none of which occurred outside the ordinary course of business.

Our anticipated capital expenditures for the eight months of transition period 2008 are expected to approximate $\$ 25$ million, including $\$ 6.9$ million incurred during the first quarter of transition period 2008. These expenditures primarily relate to the continued expansion of our Tommy Bahama and Ben Sherman retail operations.

## Off Balance Sheet Arrangements

We have not entered into agreements which meet the Securities and Exchange Commission s definition of an off balance sheet financing arrangement, other than operating leases, and have made no financial commitments to or guarantees with respect to any unconsolidated subsidiaries or special purpose entities.

## Table of Contents

## CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The discussion and analysis of our financial condition and results of operations are based upon our unaudited condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosures. On a periodic basis, we evaluate our estimates, including those related to receivables, inventories, goodwill, intangible assets, income taxes, contingencies and other accrued expenses. We base our estimates on historical experience and on various other assumptions. Actual results may differ from these estimates under different assumptions or conditions. We believe that we have appropriately applied our critical accounting policies. However, in the event that inappropriate assumptions or methods were used relating to the critical accounting policies below, our consolidated statements of earnings could be misstated.

The detailed summary of significant accounting policies is included in Note 1 to our consolidated financial statements contained in our fiscal 2007 Form 10-K. The following is a brief discussion of the more significant accounting policies, estimates and methods we use.

## Revenue Recognition and Accounts Receivable

Our revenue consists of wholesale, retail store and restaurant sales. We consider revenue realized or realizable and earned when the following criteria are met: (1) persuasive evidence of an agreement exists, (2) delivery has occurred, (3) our price to the buyer is fixed and determinable, and (4) collectibility is reasonably assured.

In the normal course of business we offer certain discounts or allowances to our wholesale customers. Wholesale operations sales are recorded net of such discounts, allowances, advertising support not specifically relating to the reimbursement for actual advertising expenses by our customers and provisions for estimated returns. As certain allowances and other deductions are not finalized until the end of a season, program or other event which may not have occurred yet, we estimate such discounts and allowances on an ongoing basis. Significant considerations in determining our estimates for discounts and allowances to wholesale customers include historical and current trends, projected seasonal results, an evaluation of current economic conditions and retailer performance. Actual discounts and allowances to our wholesale customers have not differed materially from our estimates in prior periods. As of August 31, 2007 our total reserves for discounts and allowances were approximately $\$ 15.6$ million, thus a hypothetical change in our allowances of $10 \%$ would have a pre-tax impact of $\$ 1.6$ million on net earnings.

In circumstances where we become aware of a specific customer $s$ inability to meet its financial obligations, a specific reserve for bad debts is taken as a reduction to accounts receivable to reduce the net recognized receivable to the amount reasonably expected to be collected. For all other customers, we recognize estimated reserves for bad debts and uncollectible chargebacks based on our historical collection experience, the financial condition of our customers, an evaluation of current economic conditions and anticipated trends, each of which are subjective and require certain assumptions. Actual charges for uncollectible amounts have not differed materially from our estimates in prior periods. As of August 31, 2007 our allowance for doubtful accounts was approximately $\$ 1.6$ million, thus a change in our reserves of $10 \%$ would have a minimal impact on our consolidated statement of net earnings.

## Inventories

We continually evaluate the composition of our inventories for identification of distressed inventory. In performing this evaluation we consider slow-turning products, prior seasons fashion products and current levels of replenishment program products as compared to future sales estimates. For wholesale inventory, we estimate the amount of goods that we will not be able to sell in the normal course of business and write down the value of these goods as necessary. For retail inventory, we provide an allowance for shrinkage and goods expected to be sold below cost. As the amount to be ultimately realized for the goods is not necessarily known at period end, we must utilize certain assumptions considering historical experience, the age of the inventory, inventory quantity, quality and mix, historical sales trends, future sales projections, consumer and retailer preferences, market trends and general economic conditions.

## Edgar Filing: OXFORD INDUSTRIES INC - Form 10-Q

## Table of Contents

For operating group reporting all inventory is carried at the lower of FIFO cost or market. However, for consolidated financial reporting, approximately $60 \%$ of our inventories are valued at the lower of LIFO cost or market. LIFO inventory calculations are made on a legal entity basis which does not correspond to our operating group definitions. Therefore, LIFO inventory accounting adjustments are not allocated to the respective operating groups. LIFO reserves are based on the Producer Price Index as published by the United States Department of Labor. As part of LIFO accounting, markdowns for inventory valued at LIFO cost are deferred until the period in which the goods are sold to the extent that the markdowns are less than the LIFO reserve. Markdowns greater than the allocated LIFO reserve are taken immediately and are not deferred. Both the LIFO reserve and the markdown deferral are reflected in Corporate and Other for operating group reporting purposes included in Note 4 to our consolidated financial statements and in the results of operations in our Management s Discussion and Analysis of Financial Condition and Results of Operations included in this report.

A change in the markdowns of our inventory valued at the lower of LIFO cost or market method would not be expected to have a material impact on our consolidated financial statements due to the existence of our LIFO reserve of $\$ 39.3$ million. A hypothetical $10 \%$ change in the amount of markdowns for inventory valued on the lower of FIFO cost or market method would have a pre-tax impact of approximately $\$ 0.2$ million on net earnings.

## Goodwill, net

Goodwill is recognized as the amount by which the cost to acquire a company or group of assets exceeds the fair value of assets acquired less any liabilities assumed at acquisition. Such goodwill is allocated to the respective reporting unit at the time of acquisition. Goodwill is not amortized but instead evaluated for impairment annually or more frequently if events or circumstances indicate that the goodwill might be impaired. The evaluation of the recoverability of goodwill includes valuations of each applicable underlying business using fair value techniques and market comparables which may include a discounted cash flow analysis or an independent appraisal.

Significant estimates included in such a valuation include future cash flow projections of the business, which are based on our future expectations for the business. Additionally, the discount rate used in this analysis is an estimate of the risk adjusted market-based cost of capital. If this analysis indicates an impairment of goodwill balances, the impairment is recognized in the consolidated financial statements. Such estimates of future operating results and discount rates involve significant uncertainty, and if our plans or anticipated results change, the impact on our financial statements could be significant.

## Intangible Assets, net

At acquisition, we estimate and record the fair value of purchased intangible assets, which primarily consist of trademarks and trade names, license agreements and customer relationships. The fair values and useful lives of these intangible assets are estimated based on management s assessment as well as independent third party appraisals in some cases. Such valuation may include a discounted cash flow analysis of anticipated revenues or cost savings resulting from the acquired intangible asset using an estimate of a risk-adjusted market-based cost of capital as the discount rate.

Amortization of intangible assets with finite lives, which consist of license agreements, certain trademarks, customer relationships and covenants not to compete, is recognized over their estimated useful lives using a method of amortization that reflects the pattern in which the economic benefits of the intangible assets are consumed or otherwise realized. We amortize our intangible assets with finite lives for periods of up to 20 years. The determination of an appropriate useful life for amortization is based on our plans for the intangible asset as well as factors outside of our control. Intangible assets with finite lives are reviewed for impairment periodically if events or changes in circumstances indicate that the carrying amount may not be recoverable. If expected future undiscounted cash flows from operations are less than their carrying amounts, an asset is determined to be impaired and a loss is recorded for the amount by which the carrying value of the asset exceeds its fair value. During fiscal 2007, we recognized approximately $\$ 6.4$ million of expense for the amortization of intangible assets. If the useful lives assigned to these intangible assets with finite lives had been reduced by $10 \%$ at acquisition, the amount of additional amortization expense would have been approximately $\$ 0.6$ million during fiscal 2007.

## Table of Contents

Trademarks with indefinite lives are not amortized but instead evaluated for impairment annually or more frequently if events or circumstances indicate that the intangible asset might be impaired. The evaluation of the recoverability of trademarks with indefinite lives includes valuations based on a discounted cash flow analysis utilizing the relief from royalty method. This approach is dependent upon a number of uncertain factors including estimates of future net sales, growth rates, royalty rates for the trademarks and discount rates. Such estimates involve significant uncertainty, and if our plans or anticipated results change, the impact on our financial statements could be significant. If this analysis indicates an impairment of a trademark with an indefinite useful life, the amount of the impairment is recognized in the consolidated financial statements based on the amount that the carrying value exceeds the estimated fair value of the asset.

## Income Taxes

Significant judgment is required in determining the provision for income taxes for a company with global operations. The ultimate tax outcome may be uncertain for many transactions. Our provisions are based on federal and projected state statutory rates and take into account our quarterly assessment of permanent book/tax differences, income tax credits and uncertain tax positions. We estimate the effective tax rate for the full fiscal year and record a quarterly income tax provision in accordance with the anticipated annual rate. As the fiscal year progresses the estimate is refined based upon actual events and earnings by jurisdiction and to reflect changes in our judgment of the likely outcome of uncertain tax positions. This estimation process periodically results in a change to the expected effective tax rate for the fiscal year. When this occurs, we adjust the income tax provision during the quarter in which the change in estimate occurs so that the year-to-date provision reflects the expected annual rate. Income tax expense may also be adjusted for discrete events occurring during the year, such as the enactment of tax rate changes or changes in reserves for uncertain tax positions, which are reflected in the quarter that the changes occur. In fiscal 2007, a $1 \%$ increase in the effective tax rate percentage would have impacted net earnings by less than $\$ 1.0$ million SEASONALITY

Although our various product lines are sold on a year-round basis, the demand for specific products or styles may be highly seasonal. For example, the demand for golf and Tommy Bahama products is higher in the spring and summer seasons. Products are sold prior to each of the retail selling seasons, including spring, summer, fall and holiday. As the timing of product shipments and other events affecting the retail business may vary, results for any particular quarter may not be indicative of results for the full year. The percentage of our net sales by quarter for fiscal 2007 was $25 \%, 26 \%, 24 \%$ and $25 \%$, respectively, and the percentage of our operating income by quarter for fiscal 2007 was $23 \%, 25 \%, 19 \%$ and $33 \%$, respectively, which may not be indicative of the distribution in future years.

## ITEM 3. OUANTITATIVE AND OUALITATIVE DISCLOSURES ABOUT MARKET RISK

## Trade Policy Risk

Pursuant to the 1994 Agreement on Textiles and Clothing, quotas among World Trade Organization, or WTO, member countries, including the United States, were eliminated on January 1, 2005. As a result, the international textile and apparel trade is undergoing a significant realignment which is changing our sourcing patterns, could disrupt our supply chain and could put us at a disadvantage to our competitors.

## Edgar Filing: OXFORD INDUSTRIES INC - Form 10-Q

## Table of Contents

In addition, notwithstanding quota elimination, under the terms of China s WTO accession agreement, the United States and other WTO members may re-impose quotas on specific categories of products in the event it is determined that imports from China have surged or may surge and are threatening to create a market disruption for such categories of products (so called safeguard quota ). Pursuant to this authority, both the United States and the European Union re-imposed quotas on several important product categories from China during calendar 2005. Subsequent to the imposition of safeguard quotas, both the United States and China negotiated bilateral quota agreements that cover a number of important product categories and will remain in place until December 31, 2008 in the case of the U.S.-China bilateral agreement and until December 31, 2007 in the case of the European Union-China bilateral agreement. The establishment of these quotas could cause disruption in our supply chain. Also, until December 2013, the EU and any other WTO country, can invoke a product specific safeguard mechanism on any such products, including textile and apparel products, that are being imported from China in such increased quantities and under such conditions as to cause or threaten to cause market disruption to the domestic producers as a whole of like or directly competitive products. Relief may come in the form of additional duties or a quota and may remain in place for either two years or three years depending on whether the increase in imports is absolute, or relative, compared to world imports. Any such additional duties or quota could cause disruption in our supply chain as well. During fiscal 2007, we sourced approximately $40 \%$ of our product purchases from China. We believe that alternative supply sources at comparable prices would be readily available if quotas were to limit our supply from China.

We benefit from duty-free treatment under international trade agreements and regulations such as the North American Free Trade Agreement and the Andean Trade Preference and Drug Eradication Act. The elimination of such treatment or our inability to qualify for such benefits would adversely impact our business and by increasing our cost of goods sold.

Furthermore, under long-standing statutory authority applicable to imported goods in general, the United States may unilaterally impose additional duties: (i) when imported merchandise is sold at less than fair value and causes material injury, or threatens to cause material injury, to the domestic industry producing a comparable product (generally known as anti-dumping duties); or (ii) when foreign producers receive certain types of governmental subsidies, and when the importation of their subsidized goods causes material injury, or threatens to cause material injury, to the domestic industry producing a comparable product (generally known as countervailing duties). The imposition of anti-dumping or countervailing duties on products we import would increase the cost of those products to us. We may not be able to pass on any such cost increase to our customers.

## Interest Rate Risk

We are exposed to market risk from changes in interest rates on our indebtedness, which could impact our financial condition and results of operations in future periods. Our objective is to limit the impact of interest rate changes on earnings and cash flow, primarily through a mix of fixed and variable rate debt. This assessment also considers our need for flexibility in our borrowing arrangements resulting from the seasonality of our business, among other factors. We continuously monitor interest rates to consider the sources and terms of our borrowing facilities in order to determine whether we have achieved our interest rate management objectives.

As of August 31, 2007, we did not have any debt outstanding subject to variable interest rates. Our average variable rate borrowings for fiscal 2007 were $\$ 8.1$ million, with an average interest rate of $8.1 \%$ during the period. Our lines of credit are based on variable interest rates in order to provide the necessary borrowing flexibility we require. To the extent that the amounts outstanding under our variable rate lines of credit change, our exposure to changes in interest rates would also change. If our average interest rate for fiscal 2007 increased by 100 basis points, our interest expense would have been approximately $\$ 0.1$ million higher during the fiscal year. Interest expense in fiscal 2007 may not be indicative of interest expense in future years, particularly if we acquire additional businesses or change our capital structure.

As of August 31, 2007, we had approximately $\$ 199.3$ million of fixed rate debt and capital lease obligations outstanding with substantially all the debt, consisting of our Senior Unsecured Notes, having an effective interest rate of $9.0 \%$ and maturing in June 2011. Such agreements may result in higher interest expense than could be obtained under variable interest rate arrangements in certain periods, but are primarily intended to provide long-term financing of our capital structure and minimize our exposure to increases in interest rates. A change in the market interest rate
impacts the fair value of our fixed rate debt but has no impact on interest incurred or cash flows.

## Edgar Filing: OXFORD INDUSTRIES INC - Form 10-Q

## Table of Contents

None of our debt was entered into for speculative purposes. We generally do not engage in hedging activities with respect to our interest rate risk and do not enter into such transactions on a speculative basis.

## Foreign Currency Risk

To the extent that we have assets and liabilities, as well as operations, denominated in foreign currencies that are not hedged, we are subject to foreign currency transaction and translation gains and losses. We view our foreign investments as long-term and as a result we generally do not hedge such foreign investments. We do not hold or issue any derivative financial instruments related to foreign currency exposure for speculative purposes.

We receive United States dollars for most of our product sales. Less than $15 \%$ of our net sales during fiscal 2007 were denominated in currencies other than the United States dollar. These sales primarily relate to Ben Sherman sales in the United Kingdom and Europe. With the United States dollar trading at a weaker position than it has historically traded versus the pound sterling and the Canadian dollar, a strengthening United States dollar could result in lower levels of sales and earnings in our consolidated statements of earnings in future periods, although the sales in foreign currencies could be equal to or greater than amounts as previously reported. Based on our fiscal 2007 sales denominated in foreign currencies, if the dollar had strengthened by $5 \%$ in fiscal 2007, we would have experienced a decrease in sales of approximately $\$ 6.0$ million.

Substantially all of our inventory purchases from contract manufacturers throughout the world are denominated in United States dollars. Purchase prices for our products may be impacted by fluctuations in the exchange rate between the United States dollar and the local currencies of the contract manufacturers, which may have the effect of increasing our cost of goods sold in the future. Due to the number of currencies involved and the fact that not all foreign currencies react in the same manner against the United States dollar, we cannot quantify in any meaningful way the potential effect of such fluctuations on future costs. However, we do not believe that exchange rate fluctuations will have a material impact on our inventory costs in future periods.

We may from time to time purchase short-term foreign currency forward exchange contracts to hedge against changes in foreign currency exchange rates. During fiscal 2007, foreign currency forward exchange contracts outstanding did not exceed $\$ 30$ million at any time. When such contracts are outstanding, the contracts are marked to market with the offset being recognized in our consolidated statement of earnings or other comprehensive income if the transaction does not or does, respectively, qualify as a hedge in accordance with accounting principles generally accepted in the United States. As of August 31, 2007, we had entered into such contracts which have not been settled totaling approximately $\$ 7.0$ million, all with settlement dates within the next twelve months. The impact of these contracts on our consolidated financial statements was not material as of August 31, 2007.

## Commodity and Inflation Risk

We are affected by inflation and changing prices primarily through the purchase of raw materials and finished goods and increased operating costs to the extent that any such fluctuations are not reflected by adjustments in the selling prices of our products. Also, in recent years, there has been deflationary pressure on selling prices, particularly in our private label businesses. While we have been successful to some extent in offsetting such deflationary pressures through product improvements and lower costs, if deflationary price trends outpace our ability to obtain further price reductions, our profitability may be adversely affected. Inflation/deflation risks are managed by each operating group through selective price increases when possible, productivity improvements and cost containment initiatives. We do not enter into significant long-term sales or purchase contracts and we do not engage in hedging activities with respect to such risk.

## ITEM 4. CONTROLS AND PROCEDURES

Disclosure controls are procedures that are designed to ensure that information required to be disclosed in our reports under the Securities Exchange Act of 1934, such as this quarterly report on Form 10-Q, is reported in accordance with the rules of the SEC. Disclosure controls are also designed to ensure that such information is accumulated and communicated to management, including our Principal Executive Officer and Principal Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

## Table of Contents

Our Principal Executive Officer and Principal Financial Officer have evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act) as of the end of the period covered by this report. Based upon that evaluation, our Principal Executive Officer and Principal Financial Officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective in ensuring that information required to be disclosed by us in our Securities Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC s rules and forms, and that such information is accumulated and communicated to our management, including our Principal Executive Officer and Principal Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

There have not been any changes in our internal control over financial reporting (as such term is defined in Rule 13a-15(f) and 15d-15(f) under the Securities Exchange Act) during the first quarter of transition period 2008 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

## PART II. OTHER INFORMATION

## ITEM 1. LEGAL PROCEEDINGS

In the ordinary course of business, we may become subject to litigation or claims. We are not currently a party to any litigation or regulatory actions that we believe could reasonably be expected to have a material adverse effect on our financial position, results of operations or cash flows.

## ITEM 1A. RISK FACTORS

We believe that an investor should carefully consider the factors discussed in Part I. Item 1A. Risk Factors in our fiscal 2007 Form 10-K, which are not the only risks facing our company. There have been no material changes to the risk factors described in our fiscal 2007 Form 10-K. If any of the risks described in our Form 10-K, or other risks or uncertainties not currently known to us or that we currently deem to be immaterial, actually occur, our business, financial condition or operating results could suffer.

## ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The table below summarizes our stock repurchases during the first quarter of transition period 2008.

(1) Represents shares
purchased from
employees to pay taxes related to the vesting of restricted shares.
(2) On August 3,

2006, our board of directors approved a stock repurchase authorization for up to one million shares of our common stock. As of August 31, 2007, no shares have been
repurchased by us pursuant to this
authorization.

## ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None
