FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Quarter ended September 30, 2007

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

VULCAN MATERIALS COMPANY

(Exact name of registrant as specified in its charter)

New Jersey

(State or other jurisdiction of incorporation)

1-4033

(Commission file number)

63-0366371

(I.R.S. Employer Identification No.)

1200 Urban Center Drive

Birmingham, Alabama 35242

(Address of principal executive offices) (zip code)

(205) 298-3000

(Registrant's telephone number including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer.

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

APPLICABLE ONLY TO CORPORATE ISSUERS:

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date:

Class	Shares outstanding at September 30, 2007
Common Stock, \$1 Par Value	95,590,554

**VULCAN MATERIALS COMPANY AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

1. Basis of Presentation

Our accompanying condensed consolidated financial statements have been prepared in compliance with Form 10-Q instructions and thus do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of our management, the statements reflect all adjustments, including those of a normal recurring nature, necessary to present fairly the results of the reported interim periods. The statements should be read in conjunction with the summary of accounting policies and notes to financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2006 (Form 10-K) and Current Report on Form 8-K filed on July 12, 2007 updating the historical financial statements included in our Form 10-K for the retrospective application of a change in accounting principle, as described in Note 2 (FSP AUG AIR-1 caption).

Due to the 2005 sale of our Chemicals business, as presented in Note 3, the operating results of the Chemicals business have been presented as discontinued operations in the accompanying Condensed Consolidated Statements of Earnings.

2. Accounting Changes

FIN 48 On January 1, 2007, we adopted the provisions of Financial Accounting Standards Board (FASB) Interpretation No. 48, Accounting for Uncertainty in Income Taxes, an Interpretation of FASB Statement No. 109 (FIN 48). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, Accounting for Income Taxes, by prescribing a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Under FIN 48, the financial statement effects of a tax position should initially be recognized when it is more likely than not, based on the technical merits, that the position will be sustained upon examination. A tax position that meets the more-likely-than-not recognition threshold should initially and subsequently be measured as the largest amount of tax benefit that has a greater than 50% likelihood of being realized upon ultimate settlement with a taxing authority.

As a result of the implementation of FIN 48, we increased the liability for unrecognized tax benefits by \$2,420,000, increased deferred tax assets by \$1,480,000 and reduced retained earnings as of January 1, 2007 by \$940,000. The total liability for unrecognized tax benefits as of January 1, 2007, amounted to \$11,760,000.

We recognized net adjustments to decrease our liability for prior year unrecognized tax benefits by \$2,665,000 during the third quarter of 2007 and \$805,000 during the first nine months of 2007. As of September 30, 2007, our total liability for unrecognized tax benefits amounts to \$10,955,000, of which \$8,727,000 would affect the effective tax rate if recognized.

We classify interest and penalties recognized on the liability for unrecognized tax benefits as income tax expense. Accrued interest and penalties included in our total liability for unrecognized tax benefits were \$2,490,000 as of September 30, 2007 and \$2,060,000 as of January 1, 2007.

The U.S. Federal statute of limitations expired during the third quarter of 2007 for our 2002 and 2003 tax years resulting in a \$5,660,000 decrease in our liability, with no significant decrease in any single tax position. We anticipate no single tax position generating a significant increase or decrease in our liability for unrecognized tax benefits within 12 months of this reporting date.

Table of Contents

We file income tax returns in the U.S. federal and various state jurisdictions and one foreign jurisdiction. Generally, we are not subject to changes in income taxes by any taxing jurisdiction for the years prior to 2002.

FSP AUG AIR-1 On January 1, 2007, we adopted FASB Staff Position (FSP) No. AUG AIR-1, Accounting for Planned Major Maintenance Activities (FSP AUG AIR-1). This FSP amended certain provisions in the American Institute of Certified Public Accountants Industry Audit Guide, Audits of Airlines (Airline Guide). The Airline Guide is the principal source of guidance on the accounting for planned major maintenance activities and permits four alternative methods of accounting for such activities. This guidance principally affects our accounting for periodic overhauls on our oceangoing vessels. Prior to January 1, 2007, we applied the accrue-in-advance method as permitted by the Airline Guide, which allowed for the accrual of estimated costs for the next scheduled overhaul over the period leading up to the overhaul. At the time of the overhaul, the actual cost of the overhaul was charged to the accrual, with any deficiency or excess charged or credited to expense. FSP AUG AIR-1 prohibits the use of the accrue-in-advance method, and was effective for fiscal years beginning after December 15, 2006. Accordingly, we adopted this FSP effective January 1, 2007, and have elected to use the deferral method of accounting for planned major maintenance as permitted by the Airline Guide and allowed by FSP AUG AIR-1. Under the deferral method, the actual cost of each overhaul is capitalized when incurred and amortized over the period until the next overhaul. Additionally, the FSP must be applied retrospectively to the beginning of the earliest period presented in the financial statements. As a result of the retrospective application of this change in accounting principle, we have adjusted our financial statements for all prior periods presented to reflect using the deferral method of accounting for planned major maintenance. The following table reflects the effect of the retrospective application of FSP AUG AIR-1 on our Condensed Consolidated Balance Sheet (in thousands of dollars):

	September 30, 2006

Net cash provided by operating activities	363,618	363,618
---	---------	---------

Table of Contents

During the second quarter of 2006, we determined that the cumulative undistributed earnings at a certain wholly owned foreign subsidiary would be indefinitely reinvested offshore, and accordingly reversed the associated deferred tax liability pursuant to Accounting Principles Board Opinion No. 23, Accounting for Income Taxes Special Areas. One result of the retrospective application of FSP AUG AIR-1 was an increase in the cumulative undistributed earnings at this foreign subsidiary, and an increase in the associated cumulative deferred tax liability. Consistent with our prior determination that the cumulative undistributed earnings would be indefinitely reinvested offshore, the deferred tax liability arising from the retrospective adjustments was reversed, resulting in the net favorable adjustment to the provision for income taxes for the nine months ended September 30, 2006 of \$2,661,000.

3. Discontinued Operations

In June 2005, we sold substantially all the assets of our Chemicals business, known as Vulcan Chemicals, to Basic Chemicals, a subsidiary of Occidental Chemical Corporation. These assets consisted primarily of chloralkali facilities in Wichita, Kansas; Geismar, Louisiana and Port Edwards, Wisconsin; and the facilities of our Chloralkali joint venture located in Geismar. The purchaser also assumed certain liabilities relating to the Chemicals business, including the obligation to monitor and remediate all releases of hazardous materials at or from the Wichita, Geismar and Port Edwards plant facilities. The decision to sell the Chemicals business was based on our desire to focus our resources on the Construction Materials business.

In consideration for the sale of the Chemicals business, Basic Chemicals made an initial cash payment of \$214,000,000. Concurrent with the sale transaction, we acquired the minority partner's 49% interest in the joint venture for an initial cash payment of \$62,701,000, and conveyed such interest to Basic Chemicals. The net initial cash proceeds of \$151,299,000 were subject to adjustments for actual working capital balances at the closing date, transaction costs and income taxes. In September 2006 we received additional cash proceeds of \$10,202,000 related to adjustments for the actual working capital balance at the closing date.

Basic Chemicals has completed payments under one earn-out agreement and is required to make additional payments under a separate earn-out agreement subject to certain conditions. The first earn-out agreement was based on ECU (electrochemical unit) and natural gas prices during the five-year period beginning July 1, 2005, and was capped at \$150,000,000 (ECU earn-out or ECU derivative). During the third quarter of 2007, we received the final payment under the ECU earn-out of \$22,142,000, bringing cumulative cash receipts to the \$150,000,000 cap. The ECU earn-out was accounted for as a derivative instrument; accordingly, it was reported at fair value. Changes to the fair value of the ECU derivative were recorded within continuing operations pursuant to the Securities and Exchange Commission (SEC) Staff Accounting Bulletin Topic 5:Z:5, Classification and Disclosure of Contingencies Relating to Discontinued Operations (SAB Topic 5:Z:5). Proceeds under the second earn-out agreement are determined based on the performance of the hydrochlorocarbon product HCC-240fa (commonly referred to as 5CP) from the closing of the transaction through December 31, 2012 (5CP earn-out). Under this earn-out agreement, cash plant margin for 5CP, as defined in the Asset Purchase Agreement, in excess of an annual threshold amount is shared equally between Vulcan and Basic Chemicals. The primary determinant of the value for this earn-out is the level of growth in 5CP sales volume.

The carrying amounts of the ECU and 5CP earn-outs are reflected in accounts and notes receivable other and other noncurrent assets in the accompanying Condensed Consolidated Balance Sheets. The carrying amount of the ECU earn-out was as follows: September 30, 2007 \$0, December 31, 2006 \$20,213,000 (classified entirely as current) and September 30, 2006 \$19,211,000 (classified entirely as current). During the first nine months of 2007, we received payments of

Table of Contents

\$22,142,000 under the ECU earn-out and recognized gains related to changes in the fair value of the ECU earn-out of \$1,929,000 (reflected as a component of other income, net in our Condensed Consolidated Statements of Earnings). During 2006, we received payments of \$127,858,000 under the ECU earn-out and recognized gains related to changes in its fair value of \$28,721,000 (of which \$27,720,000 was reflected as a component of other income, net in our Condensed Consolidated Statements of Earnings for the nine months ended September 30, 2006).

In March 2007, we received a payment of \$8,418,000 under the 5CP earn-out related to the year ended December 31, 2006. During 2006, we received net payments of \$3,856,000 under the 5CP earn-out related to the period from the closing of the transaction in June 2005 through December 31, 2005. Additionally, the final resolution during 2006 of adjustments for working capital balances at the closing date resulted in an increase to the carrying amount of the 5CP earn-out of \$4,053,000. The carrying amount of the 5CP earn-out was as follows: September 30, 2007 \$20,828,000 (of which \$8,799,000 was current), December 31, 2006 \$29,246,000 (of which \$9,030,000 was current) and September 30, 2006 \$29,246,000 (of which \$9,853,000 was current).

The fair value of the consideration received in connection with the sale of the Chemicals business, including past and anticipated future cash flows from the two earn-out agreements, is expected to exceed the net carrying value of the assets and liabilities sold. However, SFAS No. 5, Accounting for Contingencies, precludes the recognition of a contingent gain until realization is assured beyond a reasonable doubt. Accordingly, no gain was recognized on the Chemicals sale and the value recorded at the June 7, 2005 closing date referable to these two earn-outs was limited to \$128,167,000. Since changes in the carrying amount of the ECU earn-out were reported in continuing operations, any gain or loss on disposal of the Chemicals business will ultimately be recognized to the extent future cash receipts under the 5CP earn-out related to the remaining six-year performance period from January 1, 2007 to December 31, 2012 exceed or fall short of its \$20,828,000 carrying amount.

We are potentially liable for a cash transaction bonus payable in the future to certain key former Chemicals employees. This transaction bonus will be payable only if cash receipts realized from the two earn-out agreements described above exceed an established minimum threshold. Based on our evaluation of possible cash receipts from the earn-outs, the likely range for the contingent payments to certain key former Chemicals employees is between \$0 and approximately \$5 million. As of September 30, 2007, the calculated transaction bonus would be \$0 and, as such, no liability for these contingent payments has been recorded.

Under the provisions of SFAS No. 144, Accounting for the Impairment or Disposal of Long-lived Assets (FAS 144), the financial results of the Chemicals business are classified as discontinued operations in the accompanying Condensed Consolidated Statements of Earnings for all periods presented.

There were no net sales or revenues from discontinued operations during the nine month periods ended September 30, 2007 or September 30, 2006. Pretax losses from discontinued operations are as follows (in thousands of dollars):

	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2007	2006	2007	2006
Pretax loss	\$(14,216)	\$(8,753)	\$(17,780)	\$(14,653)

Table of Contents

As described in Note 19, we were named one of several defendants in a claim filed by the city of Modesto, California for alleged contamination from a dry cleaning compound, perchloroethylene, produced by several manufacturers, including our former Chemicals business. During the third quarter of 2007, we settled with the city and recorded an additional \$14.1 million of pretax charges, including legal defense costs, in discontinued operations. The prior year's third quarter includes pretax charges, including legal defense costs, of \$8.4 million related to the same litigation that ultimately resulted in the settlement during the third quarter of 2007. The remaining losses primarily reflect charges related to other general and product liability costs and environmental remediation costs associated with our former Chemicals businesses.

4. Earnings Per Share (EPS)

We report two earnings per share numbers, basic and diluted. These are computed by dividing net earnings by the weighted-average common shares outstanding (basic EPS) or weighted-average common shares outstanding assuming dilution (diluted EPS) as set forth below (in thousands of shares):

	Three Months Ended September 30		Nine Months Ended September 30	
	2007	2006	2007	2006
Weighted-average common shares outstanding	95,763	95,708	95,507	98,546
Dilutive effect of:				
Stock options	1,692	1,510	2,021	1,691
Other	433	461	460	434
Weighted-average common shares outstanding, assuming dilution	97,888	97,679	97,988	100,671

All dilutive common stock equivalents are reflected in our earnings per share calculations. Antidilutive common stock equivalents are not included in our earnings per share calculations. The numbers of antidilutive common stock equivalents are as follows (in thousands of shares):

	Three Months Ended September 30		Nine Months Ended September 30	
	2007	2006	2007	2006
Antidilutive common stock equivalents	407	6	407	6

5. Income Taxes

Our effective tax rate is based on expected income, statutory tax rates and tax planning opportunities available in the various jurisdictions in which we operate. For interim financial reporting, we estimate the annual tax rate based on projected taxable income for the full year and record a quarterly income tax provision in accordance with the anticipated annual rate. As the year progresses, we refine the estimates of the year's taxable income as new information becomes available, including year-to-date financial results. This continual estimation process often results in a change to our expected effective tax rate for the year. When this occurs, we adjust the income tax provision during the quarter in which the change in estimate occurs so that the year-to-date provision reflects the expected annual tax rate.

Significant judgment is required in determining our effective tax rate and in evaluating our tax positions.

See Note 2 (FIN 48 caption) for a discussion of our adoption of FIN 48.

In accordance with FIN 48, we recognize a tax benefit associated with an uncertain tax position when, in our judgment, it is more likely than not that the position will be sustained upon examination by a taxing authority. For a tax position that meets the more-likely-than-not recognition threshold, we initially and subsequently measure the tax benefit as the largest amount that we judge

Table of Contents

to have a greater than 50% likelihood of being realized upon ultimate settlement with a taxing authority. Our liability associated with unrecognized tax benefits is adjusted periodically due to changing circumstances, such as the progress of tax audits, case law developments and new or emerging legislation. Such adjustments are recognized entirely in the period in which they are identified. Our effective tax rate includes the net impact of changes in the liability for unrecognized tax benefits and subsequent adjustments as considered appropriate by management.

The effective tax rate from continuing operations was 30.4% for the three months ended September 30, 2007, down from the 31.0% rate during the same period of 2006. This decrease principally reflects a reduction in estimated income tax liabilities for prior years and the scheduled increase in the deduction for certain domestic production activities arising under the American Jobs Creation Act of 2004 from 3% in 2006 to 6% in 2007. Generally, this deduction, subject to certain limitations, is set to further increase to 9% in 2010 and thereafter.

The effective tax rate from continuing operations for the nine months ended September 30, 2007 was 31.5%, down from the 31.9% rate during the same period of 2006. This decrease principally reflects a reduction in estimated income tax liabilities for prior years and the scheduled increase in the deduction for certain domestic production activities, as described above.

6. Medium-term Investments

We had no medium-term investments as of September 30, 2007, December 31, 2006 or September 30, 2006.

Proceeds, gross realized gains and gross realized losses from sales and maturities of medium-term investments are summarized below (in thousands of dollars):

	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2007	2006	2007	2006
Proceeds	\$	\$	\$	\$ 175,140
Gross realized gains	\$	insignificant	\$	insignificant
Gross realized losses	\$	insignificant	\$	insignificant

There were no transfers from either the available-for-sale or held-to-maturity categories to the trading category during the nine months ended September 30, 2007 and 2006. There were no gross unrealized holding gains related to medium-term investments classified as held-to-maturity as of September 30, 2007 and 2006.

7. Derivative Instruments

We periodically use derivative instruments to reduce our exposure to interest rate risk, currency exchange risk or price fluctuations on commodity energy sources consistent with our risk management policies.

In connection with the sale of our Chemicals business, we entered into an earn-out agreement that required the purchaser, Basic Chemicals, to make payments capped at \$150,000,000 based on ECU (electrochemical unit) and natural gas prices during the five-year period beginning July 1, 2005. We did not designate the ECU earn-out as a hedging instrument and, accordingly, gains and losses resulting from changes in the fair value were recognized in current earnings. Further, pursuant to SAB Topic 5:Z:5, changes in fair value were recognized in continuing operations. During the three and nine month periods ended September 30, 2007, we recorded gains referable to the ECU earn-out of \$0 and \$1,929,000, respectively. During the three and nine month periods ended September 30, 2006, we recorded gains of \$4,734,000 and \$27,720,000, respectively. These gains are reflected in other income, net of other charges, in our accompanying Condensed Consolidated Statements of

Table of Contents

Earnings. During the third quarter of 2007, we received the final payment under the ECU earn-out of \$22,142,000, bringing cumulative cash receipts to the \$150,000,000 cap.

During the second and third quarter of 2007, we entered into thirteen forward starting interest rate swap agreements for a total notional amount of \$1,225.0 million. The objective of these swap agreements is to hedge against the variability of future interest payments attributable to changes in interest rates on a portion of the anticipated fixed-rate debt issuance in 2007 to fund the cash portion of the acquisition of Florida Rock (see Note 20 for details). As of September 30, 2007, we had entered into five 5-year swap agreements with a blended swap rate of 5.27% on an aggregate notional amount of \$500 million, six 10-year swap agreements with a blended swap rate of 5.59% on an aggregate notional amount of \$600 million and two 30-year swap agreements with a blended swap rate of 5.83% on an aggregate notional amount of \$125 million. Our actual interest cost will be based on these blended swap rates and credit spreads to which we are exposed. During the fourth quarter, we extended each of the thirteen outstanding swap agreements from their initial or previously extended termination date to reflect a new termination date of December 14, 2007.

Also during the fourth quarter, we entered into two additional forward starting interest rate swap agreements with termination dates of December 14, 2007 and a combined notional amount of \$275.0 million, bringing the total notional amount for all of our swap agreements to \$1.5 billion. The combined effect of entering into these new swap agreements and extending the remaining swap agreements to reflect a termination date of December 14, 2007, was to increase the blended swap rate on the 5-year swap agreements to 5.29%, increase the aggregate notional amount of the 10-year swap agreements to \$750 million and reduce the related blended swap rate to 5.51%, and increase the aggregate notional amount of the 30-year swap agreements to \$250 million and reduce the related blended swap rate to 5.58%.

We have designated these swap agreements as cash flow hedges pursuant to Statement of Financial Accounting Standards (SFAS) No. 133, Accounting for Derivative Instruments and Hedging Activities (FAS 133). Accordingly, the fair values of the swaps are recorded as an asset or liability in the accompanying September 30, 2007 Condensed Consolidated Balance Sheet. To the extent these cash flow hedges are effective, changes in their fair value are recorded directly in shareholders' equity, net of tax, as other comprehensive income or loss. Any ineffectiveness is recorded as a gain or loss in current earnings. On the date the swaps terminate, either by their terms or earlier if we choose to issue the aforementioned fixed rate debt prior to December 14, 2007, they will be settled in cash for their then fair value. The amounts, if any, accumulated in other comprehensive income when the swaps settle will be amortized into earnings as an adjustment to interest expense over the applicable term of the anticipated debt issuance. At September 30, 2007, we recognized assets totaling \$107,000 (included in other noncurrent assets), liabilities totaling \$33,906,000 (included in other noncurrent liabilities), and an accumulated other comprehensive loss of \$19,114,000, net of tax of \$12,783,000, in the accompanying September 30, 2007 Condensed Consolidated Balance Sheet related to these interest rate swap agreements. During the third quarter of 2007, we recognized a loss of \$25,748,000 in other comprehensive income, net of tax of \$17,220,000.

During the three and nine months ended September 30, 2007, we recognized a loss of \$1,902,000 (included in other expense, net) due to hedge ineffectiveness. There was no impact to earnings due to hedge ineffectiveness during the three or nine months ended September 30, 2006.

Table of Contents**8. Comprehensive Income**

Comprehensive income includes charges and credits to equity from nonowner sources and comprises two subsets: net earnings and other comprehensive income (loss). Total comprehensive income comprises the following (in thousands of dollars):

	Three Months Ended September 30		Nine Months Ended September 30	
	2007	2006 (As Adjusted - See Note 2)	2007	2006 (As Adjusted - See Note 2)
Net earnings	\$ 135,413	\$ 135,687	\$ 366,297	\$ 356,406
Other comprehensive income (loss):				
Fair value adjustments to cash flow hedges, net of tax	(25,606)	(20)	(18,902)	(20)
Amortization of pension and post-retirement plan actuarial loss and prior service cost, net of tax	390		1,452	
Change in postretirement benefit obligation due to plan amendment	4,297		4,409	
Total comprehensive income	\$ 114,494	\$ 135,667	\$ 353,256	\$ 356,386

9. Shareholders' Equity

On February 10, 2006, the Board of Directors increased to 10,000,000 shares the existing authorization to purchase common stock. There were 3,411,416 shares remaining under the purchase authorization as of September 30, 2007. The number and cost of shares purchased during the periods presented and shares held in treasury at period end are shown below:

	Three Months Ended September 30		Nine Months Ended September 30	
	2007	2006	2007	2006
Shares purchased:				
Number		2,238,939	44,123	6,746,261
Total cost (thousands)	\$	\$ 169,039	\$ 4,800	\$ 521,941
Average cost	\$	\$ 75.50	\$ 108.78	\$ 77.37
		Sept. 30 2007	Dec. 31 2006	Sept. 30 2006
Shares in treasury at period end:				
Number		44,114,418	45,098,644	45,281,302
Average cost	\$	\$ 29.29	\$ 28.78	\$ 28.69

All shares purchased in the nine months ended September 30, 2007 were purchased in the first quarter directly from employees to satisfy income tax withholding requirements on shares issued pursuant to incentive compensation plans. The number of shares purchased in the three and nine months ended September 30, 2006 includes 25,845 and 76,567 shares, respectively, purchased directly from employees for the aforementioned withholding requirements. The remaining shares were purchased in the open market.

Table of Contents**10. Benefit Plans**

The following tables set forth the components of net periodic benefit cost (in thousands of dollars):

	Three Months Ended September 30		Nine Months Ended September 30	
	2007	2006	2007	2006
PENSION BENEFITS				
Components of Net Periodic Benefit Cost:				
Service cost	\$ 5,173	\$ 4,581	\$ 15,517	\$ 13,743
Interest cost	8,646	8,031	25,938	24,093
Expected return on plan assets	(11,608)	(10,993)	(34,822)	(32,979)
Amortization of prior service cost	189	267	567	801
Recognized actuarial loss	456	434	1,367	1,302
Net periodic benefit cost	\$ 2,856	\$ 2,320	\$ 8,567	\$ 6,960

	Three Months Ended September 30		Nine Months Ended September 30	
	2007	2006	2007	2006
OTHER POSTRETIREMENT BENEFITS				
Components of Net Periodic Benefit Cost:				
Service cost	\$ 908	\$ 904	\$ 3,175	\$ 2,712
Interest cost	1,354	1,190	4,150	3,570
Amortization of prior service cost	(200)	(42)	(284)	(126)
Recognized actuarial loss	206	119	712	357
Net periodic benefit cost	\$ 2,268	\$ 2,171	\$ 7,753	\$ 6,513

The net periodic benefit costs for pension plans during the three and nine months ended September 30, 2007 include pretax reclassifications from other comprehensive income totaling \$645,000 and \$1,934,000, respectively. The net periodic benefit costs for postretirement plans during the three and nine months ended September 30, 2007 include pretax reclassifications from other comprehensive income totaling \$6,000 and \$428,000, respectively. These reclassifications from other comprehensive income are related to amortization of prior service costs and actuarial losses. During the nine months ended September 30, 2007 and 2006, contributions of \$1,262,000 and \$1,112,000, respectively, were made to our pension plans.

Effective July 15, 2007, we amended our defined benefit pension plans and our defined contribution 401k plans to no longer accept new participants. Existing participants continue to accrue benefits under these plans. Salaried and non-union hourly employees hired on or after July 15, 2007 are eligible for a single defined contribution 401k plan rather than both a defined benefit and a defined contribution plan. This amendment had no effect on our existing pension benefit obligation or 2007 net periodic benefit cost. Additionally, we amended our salaried postretirement healthcare coverage to increase the eligibility age, unless certain grandfathered provisions were met. This change reduced the postretirement plan benefit obligation by \$7,170,000 and results in an estimated reduction to our 2007 net periodic benefit cost of \$1,042,000.

11. Credit Facilities, Short-term Borrowings and Long-term Debt

Short-term borrowings are summarized as follows (in thousands of dollars):

	Sept 30 2007	Dec. 31 2006	Sept 30 2006
Bank borrowings	\$ 11,500	\$ 2,500	\$
Commercial paper	136,275	196,400	236,750

Total short-term borrowings	\$ 147,775	\$ 198,900	\$ 236,750
-----------------------------	------------	------------	------------

Short-term borrowings outstanding as of September 30, 2007 consisted of \$11,500,000 of bank borrowings having maturities ranging from 1 to 29 days and interest rates ranging from 5.35% to

Table of Contents

5.98% and \$136,275,000 of commercial paper having maturities ranging from 1 to 9 days and interest rates ranging from 5.30% to 5.50%. We plan to reissue most, if not all, of these borrowings when they mature. These short-term borrowings are used for general corporate purposes, including working capital requirements.

Our policy is to maintain committed credit facilities at least equal to our outstanding commercial paper. Unsecured bank lines of credit totaling \$570,000,000 were maintained at September 30, 2007, of which \$20,000,000 expires January 30, 2008 and \$550,000,000 expires June 27, 2011. As of September 30, 2007, \$11,500,000 of the lines of credit was drawn. Interest rates are determined at the time of borrowing based on current market conditions.

All our debt obligations, both short-term borrowings and long-term debt, are unsecured as of September 30, 2007.

Long-term debt is summarized as follows (in thousands of dollars):

	Sept. 30 2007	Dec. 31 2006	Sept. 30 2006
6.00% 10-year notes issued 1999	\$ 250,000	\$ 250,000	\$ 250,000
Private placement notes	48,967	49,335	81,554
Medium-term notes	21,000	21,000	21,000
Other notes	1,822	2,359	2,260
Total debt excluding short-term borrowings	\$ 321,789	\$ 322,694	\$ 354,814
Less current maturities of long-term debt	562	630	32,547
Total long-term debt	\$ 321,227	\$ 322,064	\$ 322,267
Estimated fair value of total long-term debt	\$ 330,924	\$ 332,611	\$ 334,047

Our debt agreements do not subject us to contractual restrictions with regard to working capital or the amount we may expend for cash dividends and purchases of our stock. The percentage of consolidated debt to total capitalization, as defined in our bank credit facility agreements, must be less than 60%. Our total debt as a percentage of total capital was 17.0% as of September 30, 2007; 20.6% as of December 31, 2006; and 23.5% as of September 30, 2006 (as adjusted - see Note 2).

The estimated fair value amounts of long-term debt presented in the table above have been determined by discounting expected future cash flows based on interest rates on U.S. Treasury bills, notes or bonds, as appropriate. The fair value estimates are based on information available to us as of the respective balance sheet dates. Although we are not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued since those dates.

12. Asset Retirement Obligations

SFAS No. 143, Accounting for Asset Retirement Obligations (FAS 143) applies to legal obligations associated with the retirement of long-lived assets resulting from the acquisition, construction, development and/or normal use of the underlying assets.

FAS 143 requires recognition of a liability for an asset retirement obligation in the period in which it is incurred at its estimated fair value. The associated asset retirement costs are capitalized as part of the carrying amount of the underlying asset and depreciated over the estimated useful life of the asset. The liability is accreted through charges to operating expenses. If the asset retirement obligation is settled for other than the carrying amount of the liability, we recognize a gain or loss on settlement.

We record all asset retirement obligations for which we have legal obligations for land reclamation at estimated fair value. Essentially all these asset retirement obligations relate to our underlying land

Table of Contents

parcels, including both owned properties and mineral leases. FAS 143 results in ongoing recognition of costs related to the depreciation of the assets and accretion of the liability. For the three and nine month periods ended September 30, we recognized operating costs related to FAS 143 as follows: 2007 \$4,633,000 and \$13,853,000, respectively; and 2006 \$4,253,000 and \$11,526,000, respectively. FAS 143 operating costs for our continuing operations are reported in cost of goods sold. FAS 143 asset retirement obligations are reported within other noncurrent liabilities in our accompanying Condensed Consolidated Balance Sheets.

A reconciliation of the carrying amount of our asset retirement obligations is as follows (in thousands of dollars):

	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2007	2006	2007	2006
Balance at beginning of period	\$ 112,474	\$ 110,216	\$ 114,829	\$ 105,774
Liabilities incurred	2,061		2,245	1,021
Liabilities (settled)	(2,282)	(5,183)	(8,629)	(12,671)
Accretion expense	1,456	1,411	4,334	4,051
Revisions up (down)	3,214	5,091	4,144	13,360
Balance at end of period	\$ 116,923	\$ 111,535	\$ 116,923	\$ 111,535

13. Standby Letters of Credit

We provide certain third parties with irrevocable standby letters of credit in the normal course of business. We use our commercial banks to issue standby letters of credit to secure our obligations to pay or perform when required to do so pursuant to the requirements of an underlying agreement or the provision of goods and services. The standby letters of credit listed below are cancelable only at the option of the beneficiary who is authorized to draw drafts on the issuing bank up to the face amount of the standby letter of credit in accordance with its terms. Since banks consider letters of credit as contingent extensions of credit, we are required to pay a fee until they expire or are cancelled. Substantially all of our standby letters of credit are renewable annually.

Our standby letters of credit as of September 30, 2007 are summarized in the table below (in thousands of dollars):

	Amount	Term	Maturity
Risk management requirement for insurance claims	\$ 16,189	One year	Renewable annually
Payment surety required by utility	100	One year	Renewable annually
Contractual reclamation/restoration requirements	36,833	One year	Renewable annually
Total standby letters of credit	\$ 53,122		

14. Acquisitions

During the nine months ended September 30, 2007, we acquired the assets of the following facilities for cash payments totaling approximately \$58,861,000 including acquisition costs and net of acquired cash:

an aggregates production facility in Illinois

an aggregates production facility in North Carolina

We have recorded the acquisitions above based on preliminary purchase price allocations which are subject to change.

Table of Contents**15. Goodwill**

Changes in the carrying amount of goodwill for the periods presented below are summarized as follows (in thousands of dollars):

Goodwill as of September 30, 2006	\$ 625,076
Goodwill of acquired businesses	
Purchase price allocation adjustments	(4,887)
Goodwill as of December 31, 2006	\$ 620,189
Goodwill of acquired businesses*	30,016
Purchase price allocation adjustments	
Goodwill as of September 30, 2007	\$ 650,205

* The goodwill of acquired businesses for 2007 relates to the acquisitions listed in Note 14 above. We are currently evaluating the final purchase price allocations; therefore, the goodwill amount is subject to change. When finalized, the goodwill from these 2007 acquisitions is expected to be fully deductible for income tax purposes.

16. New Accounting Standards

See Note 2 for a discussion of the accounting standards adopted in 2007.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements (FAS 157), which defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. FAS 157 applies whenever other accounting standards require or permit assets or liabilities to be measured at fair value; accordingly, it does not expand the use of fair value in any new circumstances. Fair value under FAS 157 is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market

participants at the measurement date. The standard clarifies the principle that fair value should be based on the assumptions market participants would use when pricing an asset or liability. In support of this principle, the standard establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. The fair value hierarchy gives the highest priority to quoted prices in active markets and the lowest priority to unobservable data; for example, a reporting entity's own data. Under the standard, fair value measurements would be separately disclosed by level within the fair value hierarchy. FAS 157 is effective for fiscal years beginning after November 15, 2007; we expect to adopt FAS 157 as of January 1, 2008.

In September 2006, the FASB issued FAS 158. In addition to the recognition provisions (which we adopted December 31, 2006), FAS 158 requires an employer to measure the plan assets and benefit obligations as of the date of its year-end balance sheet. This requirement is effective for fiscal years ending after December 15, 2008. We intend to adopt the measurement date provision effective January 1, 2008 by remeasuring plan assets and benefit obligations as of that date, pursuant to the transition requirements of FAS 158. Net periodic benefit cost for the one-month period between November 30, 2007 and December 31, 2007 will be recognized, net of tax, as a separate adjustment to retained earnings as of January 1, 2008. Additionally, changes in plan assets and benefit obligations between November 30, 2007 and December 31, 2007 not related to net periodic benefit cost will be recognized, net of tax, as an adjustment to other comprehensive income as of January 1, 2008. We are currently evaluating the estimated impact such adoption will have on our financial statements.

17. Enterprise Data - Continuing Operations

Our Construction Materials business is organized in seven regional divisions that produce and sell aggregates and related products and services. All these divisions exhibit similar economic characteristics, production processes, products and services, types and classes of customers, methods of distribution and regulatory environments. Accordingly, they have been aggregated into

Table of Contents

one reporting segment for financial statement purposes. Customers use aggregates primarily in the construction and maintenance of highways, streets and other public works and in the construction of housing and commercial, industrial and other private nonresidential facilities.

The majority of our activities are domestic. We sell a relatively small amount of construction aggregates outside the United States. Due to the sale of our Chemicals business as described in Note 3, we have one reportable segment, Construction Materials, which constitutes continuing operations.

Net sales by product are summarized below (in millions of dollars):

	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2007	2006	2007	2006
NET SALES BY PRODUCT				
Aggregates	\$ 608.9	\$ 580.9	\$ 1,653.8	\$ 1,610.4
Asphalt mix	161.4	155.4	384.2	366.8
Concrete	45.9	69.7	149.5	206.8
Other	28.7	42.3	95.4	114.3
Total	\$ 844.9	\$ 848.3	\$ 2,282.9	\$ 2,298.3

18. Supplemental Cash Flow Information

Supplemental information referable to our Condensed Consolidated Statements of Cash Flows for the nine months ended September 30 is summarized below (in thousands of dollars):

	2007	2006
Cash payments:		
Interest (exclusive of amount capitalized)	\$ 15,664	\$ 19,678
Income taxes	145,013	172,126
Noncash investing and financing activities:		
Accrued liabilities for purchases of property, plant and equipment	26,340	16,540
Debt issued for purchases of property, plant and equipment	15	
Proceeds receivable from exercise of stock options	16	676
Accrued liabilities for purchases of treasury stock		310

19. Other Commitments and Contingencies

We are a defendant in various lawsuits and legal proceedings which were specifically described in our most recent Annual Report on Form 10-K. Legal proceedings for which events have occurred subsequent to the filing of our most recent Annual Report on Form 10-K, which we believe are material to the development of such proceedings, are described below.

In November 1998, we were named one of several defendants in a claim filed by the city of Modesto in state court in San Francisco, California. The plaintiff sought to recover costs to investigate and clean up low levels of soil and groundwater contamination in Modesto, including a small number of municipal water wells, from a dry cleaning compound, perchloroethylene. This product was produced by several manufacturers, including our former Chemicals business, which was divested in June 2005. The defendants named included other chemical and equipment manufacturers, distributors and dry cleaners. Several defendants settled with the plaintiffs prior to the first trial. The first trial began during the first quarter of 2006 and included municipal water well sites. On June 9, 2006, the jury returned a joint and several verdict against six defendants, including Vulcan, for compensatory damages of \$3.1 million, constituting the costs to filter two wells and pay for certain past investigation costs. On June 13, 2006, the jury returned separate punitive damages awards against three defendants, including \$100 million against Vulcan. On August 1, 2006, the trial judge entered an order reducing the punitive damage verdict against Vulcan to \$7.25 million and

Table of Contents

upholding the jury's findings on compensatory damages.

As part of the first trial, the court on February 14, 2007, entered a Final Statement of Decision on the California Polanco Act ruling in favor of the city of Modesto and against Vulcan and other defendants on certain claims not submitted to the jury. The judge awarded additional joint and several damages of \$480,000 against Vulcan and the other five defendants. In addition, the court ordered that the city of Modesto will be allowed to seek reimbursement from the defendants for future remediation costs at one of the four sites at issue, that the defendants must comply with cleanup orders issued by a state regulatory agency for that site, and that the plaintiffs will be entitled to recover attorney fees as a prevailing party.

The next jury trial phase of this lawsuit involves Modesto's claims for soil and groundwater contamination at other locations in Modesto that were not part of the first trial. No municipal water wells are part of the second trial. The second trial has been set for January 28, 2008.

On October 12, 2007, we reached an agreement with the city of Modesto to resolve all claims against Vulcan, including the claims described above, for a sum of \$20 million. The agreement provides for a release and dismissal of all claims against Vulcan. The agreement also expressly states that the settlement paid by Vulcan is for compensatory damages only and not for any punitive damages, and that Vulcan denies any conduct capable of giving rise to an assignment of punitive damages. In order to be effective, the settlement must be approved by the Modesto City Council and by a San Francisco Superior Court judge. While we believe the verdicts rendered and damages awarded during the first phase of the trial are contrary to the evidence presented, we settled the city's claims in order to avoid the costs and uncertainties of protracted litigation. We recognized a pretax charge of \$12.65 million during the third quarter of 2007 to increase our accrued liability, exclusive of legal costs, to \$20 million related to the Modesto litigation as of September 30, 2007. Under the terms of the settlement agreement, the \$20 million will be paid during the fourth quarter of 2007.

Although this agreement settles all claims against Vulcan by the city of Modesto related to this litigation, certain potential ancillary claims related to this matter remain unresolved. At this time, we cannot reasonably estimate a range of loss, if any, resulting from any such claims.

We believe the settlement damages, legal defense costs, and other potential claims are covered by our insurance policies in effect during the applicable periods, and we will pursue insurance recoveries for all losses in excess of deductible amounts.

In a related matter, during the second quarter of 2007, we reached an agreement with the city of Modesto to settle all claims that the city might have against us which result from a settlement made by the city with a co-defendant, McHenry Village, in which that defendant assigned its rights against Vulcan and others to the city. This settlement of \$395,000 was paid during the third quarter of 2007.

In addition, on or about September 18, 2007, we were served with a third-party complaint filed in the U.S. District Court for the Eastern District of California (Fresno Division). The underlying action was brought by the United States of America on behalf of the U.S. Environmental Protection Agency against various individuals associated with a dry cleaning facility in Modesto called Halford's, seeking recovery of unreimbursed costs incurred by it for activities undertaken in response to the release or threatened release of hazardous substances at the Modesto Groundwater Superfund Site in Modesto, Stanislaus County, California. The complaint also seeks certain civil penalties against the named defendants. We were not sued by the U.S. Government. We were sued by the original defendants as a third-party defendant in this action. To date we have not yet filed a responsive pleading and have undertaken no discovery in this matter.

Table of Contents

We produced and marketed industrial sand from 1988 to 1994. Since July 1993, we have been sued in numerous suits in a number of states by plaintiffs alleging that they contracted silicosis or incurred personal injuries as a result of exposure to, or use of, industrial sand used for abrasive blasting. As of October 1, 2007, the number of suits totaled 94 involving an aggregate of 560 plaintiffs. There are 51 pending suits with 494 plaintiffs filed in Texas. Those Texas cases are in a State Multidistrict Litigation Court and are stayed until discovery issues are resolved. The balance of the suits have been brought in California, Florida, Louisiana and Mississippi. We are seeking dismissal of all suits on the grounds that plaintiffs were not exposed to our product. To date, we have been successful in getting dismissals from cases involving almost 17,000 plaintiffs, with no payments made in settlement.

It is not possible to predict with certainty the ultimate outcome of these and other legal proceedings in which we are involved. As of September 30, 2007, we had recorded liabilities, including accrued legal costs, of \$22,763,000 related to claims and litigation for which a loss was determined to be probable and reasonably estimable. For claims and litigation for which a loss was determined to be only reasonably possible, no liability was recorded. Furthermore, the potential range of such losses would not be material to our condensed consolidated financial statements. In addition, losses on certain claims and litigation may be subject to limitations on a per occurrence basis by excess insurance, as described in our most recent Annual Report on Form 10-K.

20. Major Pending Acquisition

As noted in our most recent Annual Report on Form 10-K, on February 19, 2007 we signed a definitive agreement to acquire 100% of the stock of Florida Rock Industries, Inc. (Florida Rock), a leading producer of construction aggregates, cement, concrete and concrete products in the Southeast and Mid-Atlantic states, in exchange for cash and stock valued at approximately \$4.6 billion based on the February 16, 2007 closing price of Vulcan common stock. Under the terms of the agreement, Vulcan shareholders will receive one share of common stock in a new holding company (whose subsidiaries will be legacy Vulcan Materials and legacy Florida Rock) for each Vulcan share. Florida Rock shareholders can elect to receive either 0.63 shares of the new holding company or \$67.00 in cash for each Florida Rock share, subject to proration to ensure that in the aggregate 70% of Florida Rock shares will be converted into cash and 30% of Florida Rock shares will be converted into stock. We intend to finance the transaction with approximately \$3.2 billion in debt and approximately \$1.4 billion in stock based on the February 16, 2007 closing price of Vulcan common stock. We have secured a commitment for a \$4.0 billion bridge facility from Bank of America, N.A., Goldman Sachs Credit Partners L.P., JPMorgan Chase Bank, N.A. and Wachovia Bank, National Association. The transaction is intended to be non-taxable for Vulcan shareholders and nontaxable for Florida Rock shareholders to the extent they receive stock. The acquisition was unanimously approved by the Boards of Directors of each company, was approved by a majority of Florida Rock shareholders and is subject to regulatory approvals and customary closing conditions. The transaction is expected to close during the fourth quarter of 2007.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
GENERAL COMMENTS

Overview

Vulcan provides essential infrastructure materials required by the U.S. economy. We are the nation's largest producer of construction aggregates—primarily crushed stone, sand and gravel—and a major producer of asphalt and concrete. We operate primarily in the United States and our principal product—aggregates—is consumed in virtually all types of publicly and privately funded construction. While aggregates are our primary business, we believe vertical integration between aggregates and downstream products, such as asphalt mix and concrete, can be managed effectively in certain markets to generate acceptable financial returns. As such, we evaluate the structural characteristics of individual markets to determine the appropriateness of an aggregates only or vertical integration strategy. Demand for our products is dependent on construction activity. The primary end uses include public construction, such as highways, bridges, airports, schools and prisons, as well as private nonresidential (e.g., manufacturing, retail, offices, industrial and institutional) and private residential construction (e.g., single-family and multifamily). Customers for our products include heavy construction and paving contractors; commercial building contractors; concrete products manufacturers; residential building contractors; state, county and municipal governments; railroads; and electric utilities. Customers are served by truck, rail and water networks from our production facilities and sales yards.

Seasonality of our Business

Virtually all our products are produced and consumed outdoors. Our financial results for any individual quarter are not necessarily indicative of results to be expected for the year, due primarily to the effect that seasonal changes and other weather-related conditions can have on the production and sales volumes of our products. Normally, the highest sales and earnings are attained in the third quarter and the lowest are realized in the first quarter. Our sales and earnings are sensitive to national, regional and local economic conditions and particularly to cyclical swings in construction spending. These cyclical swings are further affected by fluctuations in interest rates, and demographic and population fluctuations.

Forward-looking Statements

Certain matters discussed in this report, including expectations regarding future performance, contain forward-looking statements that are subject to assumptions, risks and uncertainties that could cause actual results to differ materially from those projected. These assumptions, risks and uncertainties include, but are not limited to, those associated with general economic and business conditions; changes in interest rates; the timing and amount of federal, state and local funding for infrastructure; changes in the level of spending for residential and private nonresidential construction; the highly competitive nature of the construction materials industry; pricing; weather and other natural phenomena; energy costs; costs of hydrocarbon-based raw materials; increasing healthcare costs; the timing and amount of any future payments to be received under the 5CP earn-out contained in the agreement for the divestiture of our Chemicals business; our ability to manage and successfully integrate acquisitions; risks and uncertainties related to our proposed transaction with Florida Rock Industries, Inc. including the ability to close the transaction, successfully integrate the operations of Florida Rock and to achieve the anticipated cost savings and operational synergies following the closing of the proposed transaction with Florida Rock; and other assumptions, risks and uncertainties detailed from time to time in our periodic reports. Forward-looking statements speak only as of the date of this Report. We undertake no obligation

Table of Contents

to publicly update any forward-looking statements, as a result of new information, future events or otherwise. You are advised, however, to consult any further disclosures we make on related subjects in our future filings with the Securities and Exchange Commission or in any of our press releases.

Table of Contents

RESULTS OF OPERATIONS

In the discussion that follows, continuing operations consist solely of Construction Materials. Discontinued operations, which consist of our former Chemicals business, are discussed separately. The comparative analysis is based on net sales and cost of goods sold, which exclude delivery revenues and costs, and is consistent with the basis on which management reviews results of operations.

Third Quarter 2007 as Compared with Third Quarter 2006

Third quarter 2007 net earnings were \$135.4 million, or \$1.38 per diluted share, as compared with the prior year's third quarter net earnings of \$135.7 million, or \$1.39 per diluted share. Earnings from continuing operations were \$1.47 per diluted share, as compared with the prior year's \$1.44 per diluted share. The prior year's third quarter earnings include \$0.03 per diluted share resulting from an increase in the carrying value of the ECU earn-out. Discontinued operations (Chemicals) reported a loss of \$0.09 per diluted share for the quarter compared with a loss of \$0.05 per diluted share in the prior year's third quarter.

Continuing Operations:

Net sales in the third quarter of 2007 were \$844.9 million, 0.4% below the prior year's third quarter, as increased pricing in all major product lines substantially offset the effect of lower shipments. Aggregates pricing improved 12% from the prior year's third quarter while asphalt and concrete pricing were up 8% and 4%, respectively. Aggregates volumes were 8% lower than in the prior year while asphalt and concrete volumes were down 5% and 37%, respectively.

Gross profit increased 2% from the prior year and as a percentage of net sales increased to 33% from 32% in the prior year despite lower shipments and production levels in all major product lines. Aggregates earnings increased from the prior year due to the aforementioned higher pricing, which more than offset lower shipments and higher costs.

Aggregates costs were higher due mostly to the effects of lower production levels and increased costs for energy, parts and supplies. In response to lower demand, inventory levels in the current quarter were reduced from the previous quarter by lowering production levels. Asphalt earnings increased significantly from the prior year as higher asphalt pricing more than offset the earnings effect from lower volumes. Third quarter asphalt earnings also benefited from lower unit costs for liquid asphalt. Concrete earnings decreased from the prior year as lower concrete volumes offset the earnings effect of higher pricing.

Selling, administrative and general expenses of \$66.4 million declined \$1.4 million, or 2%, from the prior year's third quarter due mostly to lower employee-related costs. The current quarter includes \$1.2 million of expenses related to the pending acquisition of Florida Rock and a charge of \$4.0 million for the fair value of land contributed to the Vulcan Materials Company Foundation. This contribution also resulted in a pretax gain of \$2.7 million, which is reflected in gain on sale of property, plant and equipment, net.

Operating earnings were \$214.3 million for the current quarter, an increase of \$7.9 million compared with the prior year's third quarter.

Other (expense) income, net was an expense of \$1.6 million in the current quarter compared with income of \$4.8 million in the prior year's third quarter. The current quarter includes a loss of \$1.9 million related to hedge ineffectiveness from our forward starting interest rate swap agreements (see Note 7 to the condensed consolidated financial statements for details). Other income in the prior year's third quarter included a \$4.7 million gain attributable to the increase in the carrying value of the ECU earn-out. There was no comparable gain in this year's third quarter. During the third quarter of 2007, we received the final payment under the ECU earn-out.

Table of Contents

Our effective tax rate from continuing operations was 30.4% for the third quarter of 2007, down from the 2006 rate of 31.0% for the comparable period. This decrease primarily results from a reduction in estimated income tax liabilities for prior years and the scheduled increase in the deduction for certain domestic production activities arising under the American Jobs Creation Act of 2004 from 3% in 2006 to 6% in 2007.

Earnings from continuing operations were \$143.9 million for the current quarter, as compared with \$140.9 million in the prior year's third quarter.

Discontinued Operations:

We reported pretax losses from discontinued operations of \$14.2 million during the third quarter of 2007 and \$8.8 million during the third quarter of 2006. As described in Note 19 to the condensed consolidated financial statements, we were named one of several defendants in a claim filed by the city of Modesto, California for alleged contamination from a dry cleaning compound, perchloroethylene, produced by several manufacturers, including our former Chemicals business. During the third quarter of 2007, we settled with the city and recorded an additional \$14.1 million of pretax charges, including legal defense costs, in discontinued operations. The prior year's third quarter includes pretax charges, including legal defense costs, of \$8.4 million related to the same litigation that ultimately resulted in the settlement during the third quarter of 2007. The remaining losses primarily reflect charges related to other general and product liability costs and environmental remediation costs associated with our former Chemicals businesses.

Year-to-Date Comparisons as of September 30, 2007 and September 30, 2006

Net earnings were \$366.3 million, or \$3.74 per diluted share, for the first nine months of 2007 compared with \$356.4 million, or \$3.54 per diluted share, in the prior year. Earnings from continuing operations were \$3.85 per diluted share compared with \$3.63 in the prior year. Current year earnings include \$0.25 per diluted share related to an after-tax gain on sale of real estate in California and \$0.01 per diluted share related to an increase in the carrying value of the ECU earn-out. Prior year earnings include \$0.15 per diluted share attributable to the sale of contractual rights to mine the Bellwood quarry, \$0.17 per diluted share attributable to an increase in the carrying value of the ECU earn-out and \$0.03 per diluted share referable to a change in accounting principle retrospectively applied (see Note 2 to the condensed consolidated financial statements under the FSP AUG AIR-1 caption for details). Discontinued operations (Chemicals) reported a loss of \$0.11 per diluted share for the first nine months of 2007 compared with a loss of \$0.09 per diluted share in 2006. The aforementioned product claim settlement contributed \$0.09 to the year-to-date loss on discontinued operations.

Continuing Operations:

Net sales in the first nine months of 2007 were \$2.3 billion, a decrease of less than 1% from the prior year's level. Aggregates and asphalt net sales increased from the prior year. Aggregates pricing improved 14% while volumes were down 10%. Asphalt pricing improved 15% while volumes were down 9%. Concrete net sales decreased from the prior year as the volume decrease of 32% more than offset the 7% increase in pricing. The decreases in volumes were due primarily to the sharp decline in residential construction.

Gross profit in 2007 increased 5% from the prior year level. As a percentage of net sales, gross profit increased to 32% from 30% in the first nine months of 2006. Aggregates earnings increased primarily as a result of higher pricing. Asphalt earnings increased due to both higher pricing and lower cost for liquid asphalt. Concrete earnings declined from the prior year's first nine months as lower volumes and higher

Table of Contents

costs for raw materials offset the earnings benefit from higher prices.

Selling, administrative and general expenses of \$212.1 million increased \$14.1 million, or 7%, from the prior year's first nine months due mostly to higher employee-related costs, expenses associated with the pending acquisition of Florida Rock and the aforementioned charge related to the land contributed to the Vulcan Materials Company Foundation.

Gain on sale of property, plant and equipment of \$56.8 million was \$53.1 million higher than the first nine months of 2006 due mostly to the aforementioned sale of real estate in California during January 2007. The resulting pretax gain for this real estate was \$43.8 million, net of transaction costs.

Other operating expense was \$5.8 million in this year's first nine months compared with other operating income of \$23.1 million in the prior year. This \$28.9 million decline resulted primarily from the \$24.8 million pretax gain in the prior year from the aforementioned sale of contractual rights with no comparable gain in the current year.

Operating earnings were \$568.7 million for the first nine months of 2007 compared with \$523.5 million in the prior year, an increase of 9%.

Other (expense) income, net was an expense of \$0.5 million in the current year's first nine months compared with income of \$27.7 million in the prior year. Gains attributable to increases in the carrying value of the ECU earn-out totaled \$1.9 million in the current year compared with \$27.7 million in the prior year. We expect no future gains from the ECU earn-out.

The effective tax rate from continuing operations was 31.5% for the nine months ended September 30, 2007, down from the 31.9% rate during the same period of 2006. This decrease primarily results from a reduction in estimated income tax liabilities for prior years and the scheduled increase in the deduction for certain domestic production activities arising under the American Jobs Creation Act of 2004 from 3% in 2006 to 6% in 2007.

Earnings from continuing operations of \$376.9 million for the current year's first nine months reflected an increase of \$11.8 million from the prior year.

Discontinued Operations:

We reported pretax losses from discontinued operations of \$17.8 million during the first nine months of 2007 and \$14.7 million during the first nine months of 2006. In addition to the aforementioned litigation and settlement with the city of Modesto, California, these losses primarily reflect charges related to other general and product liability costs and environmental remediation costs associated with our former Chemicals businesses.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

We believe we have sufficient financial resources, including cash provided by operating activities, unused bank lines of credit and ready access to the capital markets, to fund business requirements in the future including debt service obligations, cash contractual obligations, capital expenditures, dividend payments, share purchases and potential future acquisitions.

Cash Flows

Net cash provided by operating activities increased \$57.7 million to \$421.3 million during the nine months ended September 30, 2007 as compared with \$363.6 million during the same period in 2006. Net earnings adjusted for noncash expenses related to depreciation, depletion, accretion and amortization increased \$34.1 million when compared with the prior year. Comparative changes in working capital and other assets and liabilities contributed approximately \$50.7 million to the increase in net cash provided by operating activities. Partially offsetting these favorable changes was a \$28.3 million increase in net gains on sales of property, plant and equipment and contractual rights. While these gains increase net earnings, the associated cash received is appropriately presented as a component of investing activities.

Investing activities used \$315.4 million in cash during the nine months ended September 30, 2007 as compared with \$28.3 million cash provided during the same period in 2006. The \$343.7 million increase in cash used for investing activities is principally due to a decrease in proceeds from sales and maturities of medium-term investments of \$175.1 million, a decrease in proceeds received under the ECU and 5CP earn-out agreements from the sale of our Chemicals business of \$111.4 million, an increase in purchases of property, plant and equipment of \$52.3 million and an increase in payments for business acquisitions of \$38.4 million. These investing cash uses were partially offset by a \$30.4 million increase in the combined proceeds from sales of property, plant and equipment and contractual rights, primarily attributable to the sale of real estate in California during 2007.

Net cash used for financing activities decreased \$468.3 million to \$130.1 million during the nine months ended September 30, 2007 as compared with \$598.4 million during 2006. Cash used to purchase our common stock decreased \$516.8 million while dividends paid increased \$22.5 million. These financing cash uses were partially offset by a \$21.9 million increase in the combination of proceeds and excess tax benefits from the exercise of stock options.

Working Capital

Working capital, the excess of current assets over current liabilities, totaled \$365.8 million at September 30, 2007, an increase of \$122.1 million from December 31, 2006 and an increase of \$103.7 million from September 30, 2006. The increase over the December 31, 2006 balance is primarily due to increases in customer accounts receivable and inventory, and a decrease in short-term borrowings. The increase over the September 30, 2006 balance is primarily due to an increase in inventory and decreases in short-term borrowings and current maturities of long-term debt.

Table of Contents**Short-term Borrowings and Investments**

Net short-term borrowings and investments consisted of the following (in thousands of dollars):

	Sept. 30 2007	Dec. 31 2006	Sept. 30 2006
Short-term investments:			
Cash equivalents	\$ 23,731	\$ 50,374	\$ 54,699
Total short-term investments	\$ 23,731	\$ 50,374	\$ 54,699
Short-term borrowings:			
Bank borrowings	\$ 11,500	\$ 2,500	\$
Commercial paper	136,275	196,400	236,750
Total short-term borrowings	\$ 147,775	\$ 198,900	\$ 236,750
Net short-term borrowings	\$ (124,044)	\$ (148,526)	\$ (182,051)

Short-term borrowings outstanding as of September 30, 2007 of \$147.8 million consisted of \$11.5 million of bank borrowings having maturities ranging from 1 to 29 days and interest rates ranging from 5.35% to 5.98% and \$136.3 million of commercial paper having maturities ranging from 1 to 9 days and interest rates ranging from 5.30% to 5.50%. We plan to reissue most, if not all, of these borrowings when they mature. Periodically, we issue commercial paper for general corporate purposes, including working capital requirements. We plan to continue this practice from time to time as circumstances warrant.

Our policy is to maintain committed credit facilities at least equal to our outstanding commercial paper. Unsecured bank lines of credit totaling \$570.0 million were maintained at September 30, 2007, of which \$20.0 million expires January 30, 2008 and \$550.0 million expires June 27, 2011. As of September 30, 2007, \$11.5 million of the lines of credit was drawn. Interest rates are determined at the time of borrowing based on current market conditions.

Closely following the February 19, 2007 announcement of our intention to acquire Florida Rock and the resulting financing requirements, Standard & Poor's (S&P) lowered its credit ratings on our long-term debt and commercial paper and placed the ratings on credit watch with negative implications. On the same day, Moody's Investors Service, Inc. (Moody's) placed its ratings of our long-term debt and commercial paper under review for possible downgrade. As of September 30, 2007, our commercial paper was rated A-2 and P-1 by S&P and Moody's, respectively.

Current Maturities

Current maturities of long-term debt are summarized below (in thousands of dollars):

	Sept. 30 2007	Dec. 31 2006	Sept. 30 2006
Private placement notes	\$	\$	\$ 32,000
Other notes	562	630	547
Total	\$ 562	\$ 630	\$ 32,547

Maturity dates for our \$0.6 million of current maturities as of September 30, 2007 are as follows: March 2008 \$0.3 million and various dates for the remaining \$0.3 million. We expect to retire this debt using available cash or by issuing commercial paper.

Table of Contents**Debt and Capital**

The calculations of our total debt as a percentage of total capital are summarized below (amounts in thousands, except percentages):

	Sept. 30 2007	Dec. 31 2006	Sept. 30 2006
Debt:			
Current maturities of long-term debt	\$ 562	\$ 630	\$ 32,547
Short-term borrowings	147,775	198,900	236,750
Long-term debt	321,227	322,064	322,267
Total debt	\$ 469,564	\$ 521,594	\$ 591,564
Capital:			
Total debt	\$ 469,564	\$ 521,594	\$ 591,564
Shareholders' equity *	2,299,668	2,010,899	1,922,938
Total capital	\$ 2,769,232	\$ 2,532,493	\$ 2,514,502
Total debt as a percentage of total capital	17.0%	20.6%	23.5%

* As adjusted for September 30, 2006. See Note 2 to the condensed consolidated financial statements.

Our debt agreements do not subject us to contractual restrictions with regard to working capital or the amount we may expend for cash dividends and purchases of our stock. The percentage of consolidated debt to total capitalization (total debt as a percentage of total capital), as defined in our bank credit facility agreements, must be less than 60%. In the future, our total debt as a percentage of total capital will depend upon specific investment and financing decisions. Following the close of the transaction to acquire Florida Rock, we anticipate our total debt as a percentage of total capital to increase to approximately 51%. We intend to maintain an investment grade rating and expect our operating cash flows will enable us to reduce our total debt as a percentage of total capital to a target range of 35% to 40% within three years of close, in line with our historic capital structure targets. We have made acquisitions from time to time and will continue to pursue attractive investment opportunities. Such acquisitions could be funded by using internally generated cash or issuing debt or equity securities.

As previously noted, closely following the announcement of our intention to acquire Florida Rock and the resulting financing requirements, S&P lowered its credit ratings on our long-term debt and commercial paper and placed the ratings on credit watch with negative implications. On the same day, Moody's placed its ratings of our long-term debt and commercial paper under review for possible downgrade. As of September 30, 2007, S&P and Moody's rated our public long-term debt at the A- and A1 levels, respectively.

Cash Contractual Obligations

Our obligation to make future payments under contracts is outlined in our most recent Annual Report on Form 10-K. On January 1, 2007, we adopted FIN 48 as described in Note 2 to the condensed consolidated financial statements. As of January 1, 2007 and September 30, 2007, our total liabilities for unrecognized income tax benefits amounted to

\$11.8 million and \$11.0 million, respectively. We do not believe that our adoption of FIN 48 has a material effect on the schedule of cash contractual obligations included in our most recent Annual Report on Form 10-K because we cannot make a reasonably reliable estimate of the amount and period of related future payments of our FIN 48 liabilities.

Table of Contents**Standby Letters of Credit**

We provide certain third parties with irrevocable standby letters of credit in the normal course of business. We use our commercial banks to issue standby letters of credit to secure our obligations to pay or perform when required to do so pursuant to the requirements of an underlying agreement or the provision of goods and services. The standby letters of credit listed below are cancelable only at the option of the beneficiary who is authorized to draw drafts on the issuing bank up to the face amount of the standby letter of credit in accordance with its terms. Since banks consider letters of credit as contingent extensions of credit, we are required to pay a fee until they expire or are cancelled. Substantially all of our standby letters of credit are renewable annually.

Our standby letters of credit as of September 30, 2007 are summarized in the table below (in thousands of dollars):

	Amount	Term	Maturity
Risk management requirement for insurance claims	\$ 16,189	One year	Renewable annually
Payment surety required by utility	100	One year	Renewable annually
Contractual reclamation/restoration requirements	36,833	One year	Renewable annually
Total standby letters of credit	\$ 53,122		

Risks and Uncertainties

Our most recent Annual Report on Form 10-K discusses the risks and uncertainties of our business. We continue to evaluate our exposure to all operating risks on an ongoing basis.

Table of Contents

CRITICAL ACCOUNTING POLICIES

We follow certain significant accounting policies when preparing our consolidated financial statements. A summary of these policies is included in our Annual Report on Form 10-K for the year ended December 31, 2006 (Form 10-K) and Current Report on Form 8-K filed on July 12, 2007 updating the historical financial statements included in our Form 10-K for the retrospective application of a change in accounting principle related to planned major maintenance activities (as described in Note 2 to the condensed consolidated financial statements under the FSP AUG AIR-1 caption). The preparation of these financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and judgments that affect our reported amounts of assets, liabilities, revenues and expenses, and the related disclosures of contingent assets and liabilities at the date of the financial statements. We evaluate these estimates and judgments on an ongoing basis and base our estimates on historical experience, current conditions and various other assumptions that are believed to be reasonable under the circumstances. The results of these estimates form the basis for making judgments about the carrying values of assets and liabilities as well as identifying and assessing the accounting treatment with respect to commitments and contingencies. Our actual results may differ from these estimates.

We believe that the estimates, assumptions and judgments involved in the accounting policies described in the Management's Discussion and Analysis of Financial Condition and Results of Operations section of our most recent Annual Report on Form 10-K and the aforementioned Current Report on Form 8-K have the greatest potential impact on our financial statements, so we consider these to be our critical accounting policies.

Additionally, due to the adoption of FIN 48 (as described in Note 2 to the condensed consolidated financial statements), we have revised our policy on income taxes with respect to accounting for uncertain tax positions. We consider our policy on income taxes to be a critical accounting policy due to the significant level of estimates, assumptions and judgments and its potential impact on our consolidated financial statements. We have included below a description of our accounting policy for income taxes, which reflects changes to our accounting policy for uncertain tax positions.

Income Taxes

Our effective tax rate is based on expected income, statutory tax rates and tax planning opportunities available in the various jurisdictions in which we operate. For interim financial reporting, we estimate the annual tax rate based on projected taxable income for the full year and record a quarterly income tax provision in accordance with the anticipated annual rate. As the year progresses, we refine the estimates of the year's taxable income as new information becomes available, including year-to-date financial results. This continual estimation process often results in a change to our expected effective tax rate for the year. When this occurs, we adjust the income tax provision during the quarter in which the change in estimate occurs so that the year-to-date provision reflects the expected annual tax rate.

Significant judgment is required in determining our effective tax rate and in evaluating our tax positions.

In accordance with SFAS No. 109, Accounting for Income Taxes, we recognize deferred tax assets and liabilities based on the differences between the financial statement carrying amounts and the tax basis of assets and liabilities. Deferred tax assets represent items to be used as a tax deduction or credit in future tax returns for which we have already properly recorded the tax benefit in the income statement. At least quarterly, we assess the likelihood that the deferred tax asset balance will be recovered from future taxable income. We take into account such factors as prior earnings history, expected future earnings, carryback and carryforward periods, and tax strategies that could potentially enhance the likelihood of a realization of a deferred tax asset. To the extent recovery is unlikely, a valuation allowance is established against the deferred tax asset, increasing our income tax expense in the year such determination is made.

APB Opinion No. 23, Accounting for Income Taxes, Special Areas, does not require U.S. income taxes

Table of Contents

to be provided on foreign earnings when such earnings are indefinitely reinvested offshore. We periodically evaluate our investment strategies with respect to each foreign tax jurisdiction in which we operate to determine whether foreign earnings will be indefinitely reinvested offshore and, accordingly, whether U.S. income taxes should be provided when such earnings are recorded.

We adopted FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes, an Interpretation of FASB Statement No. 109 (FIN 48) effective January 1, 2007. In accordance with FIN 48, we recognize a tax benefit associated with an uncertain tax position when, in our judgment, it is more likely than not that the position will be sustained upon examination by a taxing authority. For a tax position that meets the more-likely-than-not recognition threshold, we initially and subsequently measure the tax benefit as the largest amount that we judge to have a greater than 50% likelihood of being realized upon ultimate settlement with a taxing authority. Our liability associated with unrecognized tax benefits is adjusted periodically due to changing circumstances, such as the progress of tax audits, case law developments and new or emerging legislation. Such adjustments are recognized entirely in the period in which they are identified. Our effective tax rate includes the net impact of changes in the liability for unrecognized tax benefits and subsequent adjustments as considered appropriate by management.

A number of years may elapse before a particular matter for which we have recorded a liability related to an unrecognized tax benefit is audited and finally resolved. The number of years with open tax audits varies by jurisdiction. While it is often difficult to predict the final outcome or the timing of resolution of any particular tax matter, we believe our liability for unrecognized tax benefits is adequate. Favorable resolution of an unrecognized tax benefit could be recognized as a reduction in our effective tax rate in the period of resolution. Unfavorable settlement of an unrecognized tax benefit could increase the effective tax rate and may require the use of cash in the period of resolution. Our liability for unrecognized tax benefits is generally presented as noncurrent. However, if we anticipate paying cash within one year to settle an uncertain tax position, the liability is presented as current.

We classify interest and penalties recognized on the liability for unrecognized tax benefits as income tax expense. Our largest permanent item in computing both our effective tax rate and taxable income is the deduction allowed for percentage depletion. The deduction for percentage depletion does not necessarily change proportionately to changes in pretax earnings. Due to the magnitude of the impact of percentage depletion on our effective tax rate and taxable income, a significant portion of the financial reporting risk is related to this estimate.

The American Jobs Creation Act of 2004 created a new deduction for certain domestic production activities as described in Section 199 of the Internal Revenue Code. Generally, this deduction, subject to certain limitations, was set at 3% for 2005 and 2006, increased to 6% in 2007 through 2009 and reaches 9% in 2010 and thereafter.

Table of Contents**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

We are exposed to certain market risks arising from transactions that are entered into in the normal course of business. In order to manage or reduce this market risk, we may utilize derivative financial instruments.

We are exposed to interest rate risk due to our various long-term debt instruments. Substantially all of this debt is at fixed rates; therefore, a decline in interest rates would result in an increase in the fair market value of the liability. At times, we use interest rate swap agreements to manage this risk. We had no interest rate swap agreements outstanding on existing long-term debt as of September 30, 2007, December 31, 2006 and September 30, 2006. During the second and third quarter of 2007, we entered into thirteen forward starting interest rate swap agreements for a total notional amount of \$1,225.0 million. The objective of these swap agreements is to hedge against the variability of future interest payments attributable to changes in interest rates on a portion of the anticipated fixed-rate debt issuance in 2007 to fund the cash portion of the Florida Rock acquisition. As of September 30, 2007, we had entered into five 5-year swap agreements with a blended swap rate of 5.27% on an aggregate notional amount of \$500 million, six 10-year swap agreements with a blended swap rate of 5.59% on an aggregate notional amount of \$600 million and two 30-year swap agreements with a blended swap rate of 5.83% on an aggregate notional amount of \$125 million. Our actual interest cost will be based on these blended swap rates and credit spreads to which we are exposed. Each swap agreement has been extended from its initial termination date to reflect a termination date of December 14, 2007. On the date the swaps terminate, either by their terms or earlier if we choose to issue the aforementioned fixed rate debt prior to December 14, 2007, they will be settled in cash for their then fair value.

In accordance with SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities (FAS 133), at September 30, 2007, we recognized assets totaling \$0.1 million (included in other noncurrent assets), liabilities totaling \$33.9 million (included in other noncurrent liabilities), and an accumulated other comprehensive loss of \$19.1 million, net of tax of \$12.8 million, in the accompanying September 30, 2007 Condensed Consolidated Balance Sheet related to these interest rate swap agreements. During the third quarter of 2007, we recognized a loss of \$25.7 million in other comprehensive income, net of tax of \$17.2 million. We are exposed to market risk for decreases in the LIBOR rate as a result of these swap agreements. A hypothetical decline in interest rates of 0.75% would result in a charge to other comprehensive income or loss, net of tax, of approximately \$68.3 million. A hypothetical increase in interest rates of 0.75% would result in a credit to other comprehensive income or loss, net of tax, of approximately \$61.8 million.

We do not enter into derivative financial instruments for speculative or trading purposes.

At September 30, 2007, the estimated fair market value of our long-term debt instruments including current maturities was \$331.5 million as compared with a book value of \$321.8 million. The effect of a hypothetical decline in interest rates of 1% would increase the fair market value of our liability by approximately \$6.2 million.

We are exposed to certain economic risks related to the costs of our pension and other postretirement benefit plans. These economic risks include changes in the discount rate for high-quality bonds, the expected return on plan assets, the rate of compensation increase for salaried employees and the rate of increase in the per capita cost of covered healthcare benefits. The impact of a change in these assumptions on our annual pension and other postretirement benefits costs is discussed in our most recent Annual Report on Form 10-K.

Table of Contents

Item 4. Controls and Procedures

We maintain a system of controls and procedures designed to ensure that information required to be disclosed in reports we file with the Securities and Exchange Commission (SEC) is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms. These disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure. Our Chief Executive Officer and Chief Financial Officer, with the participation of other management officials, evaluated the effectiveness of the design and operation of the disclosure controls and procedures as of September 30, 2007. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective. No changes were made to our internal controls over financial reporting or other factors that could affect these controls during the third quarter of 2007.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Certain legal proceedings in which we are involved are discussed in Note 12 to the consolidated financial statements and Part I, Item 3 of our Annual Report on Form 10-K for the year ended December 31, 2006, and in Notes 19 to the condensed consolidated financial statements of our Quarterly Reports on Form 10-Q for the quarters ended June 30, 2007 and March 31, 2007. The following discussion is limited to certain recent developments concerning our legal proceedings and should be read in conjunction with these earlier disclosures. Unless otherwise indicated, all proceedings discussed in those earlier disclosures remain outstanding.

In November 1998, we were named one of several defendants in a claim filed by the city of Modesto in state court in San Francisco, California. The plaintiff sought to recover costs to investigate and clean up low levels of soil and groundwater contamination in Modesto, including a small number of municipal water wells, from a dry cleaning compound, perchloroethylene. This product was produced by several manufacturers, including our former Chemicals business, which was divested in June 2005. The defendants named included other chemical and equipment manufacturers, distributors and dry cleaners. Several defendants settled with the plaintiffs prior to the first trial. The first trial began during the first quarter of 2006 and included municipal water well sites. On June 9, 2006, the jury returned a joint and several verdict against six defendants, including Vulcan, for compensatory damages of \$3.1 million, constituting the costs to filter two wells and pay for certain past investigation costs. On June 13, 2006, the jury returned separate punitive damages awards against three defendants, including \$100 million against Vulcan. On August 1, 2006, the trial judge entered an order reducing the punitive damage verdict against Vulcan to \$7.25 million and upholding the jury's findings on compensatory damages.

As part of the first trial, the court on February 14, 2007, entered a Final Statement of Decision on the California Polanco Act ruling in favor of the city of Modesto and against Vulcan and other defendants on certain claims not submitted to the jury. The judge awarded additional joint and several damages of \$480,000 against Vulcan and the other five defendants. In addition, the court ordered that the city of Modesto will be allowed to seek reimbursement from the defendants for future remediation costs at one of the four sites at issue, that the defendants must comply with cleanup orders issued by a state regulatory agency for that site, and that the plaintiffs will be entitled to recover attorney fees as a prevailing party.

The next jury trial phase of this lawsuit involves Modesto's claims for soil and groundwater contamination at other locations in Modesto that were not part of the first trial. No municipal water wells are part of the second trial. The second trial has been set for January 28, 2008.

On October 12, 2007, we reached an agreement with the city of Modesto to resolve all claims against Vulcan, including the claims described above, for a sum of \$20 million. The agreement provides for a release and dismissal of all claims against Vulcan. The agreement also expressly states that the settlement paid by Vulcan is for compensatory damages only and not for any punitive damages, and that Vulcan denies any conduct capable of giving rise to an assignment of punitive damages. In order to be effective, the settlement must be approved by the Modesto City Council and by a San Francisco

Table of Contents

Superior Court judge. While we believe the verdicts rendered and damages awarded during the first phase of the trial are contrary to the evidence presented, we settled the city's claims in order to avoid the costs and uncertainties of protracted litigation. Under the terms of the settlement agreement, the \$20 million will be paid during the fourth quarter of 2007. We believe the settlement damages, legal defense costs, and other potential claims are covered by our insurance policies in effect during the applicable periods, and we will pursue insurance recoveries for all losses in excess of deductible amounts.

Although this agreement settles all claims against Vulcan by the city of Modesto related to this litigation, certain potential ancillary claims related to this matter remain unresolved. At this time, we cannot reasonably estimate a range of loss, if any, resulting from any such claims.

In addition, on or about September 18, 2007, we were served with a third-party complaint filed in the U.S. District Court for the Eastern District of California (Fresno Division). The underlying action was brought by the United States of America on behalf of the U.S. Environmental Protection Agency against various individuals associated with a dry cleaning facility in Modesto called Halford's, seeking recovery of unreimbursed costs incurred by it for activities undertaken in response to the release or threatened release of hazardous substances at the Modesto Groundwater Superfund Site in Modesto, Stanislaus County, California. The complaint also seeks certain civil penalties against the named defendants. We were not sued by the U.S. Government. We were sued by the original defendants as a third-party defendant in this action. To date we have not yet filed a responsive pleading and have undertaken no discovery in this matter.

We produced and marketed industrial sand from 1988 to 1994. Since July 1993, we have been sued in numerous suits in a number of states by plaintiffs alleging that they contracted silicosis or incurred personal injuries as a result of exposure to, or use of, industrial sand used for abrasive blasting. As of October 1, 2007, the number of suits totaled 94 involving an aggregate of 560 plaintiffs. There are 51 pending suits with 494 plaintiffs filed in Texas. Those Texas cases are in a State MDL Court and are stayed until discovery issues are resolved. The balance of the suits have been brought in California, Florida, Louisiana and Mississippi. We are seeking dismissal of all suits on the grounds that plaintiffs were not exposed to our product. To date, we have been successful in getting dismissals from cases involving almost 17,000 plaintiffs, with no payments made in settlement.

Although the ultimate outcome of these matters is uncertain, it is our opinion that the disposition of these described lawsuits will not have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Item 1A. Risk Factors

There have been no material changes to the risk factors disclosed in Item 1A of Part 1 in our Form 10-K for the year ended December 31, 2006 (Form 10-K).
