Director Compensation

Director Options. In September 1999, our Board of Directors adopted the 1999 Director Stock Option Plan, which we refer to as the 1999 Plan. Under the 1999 Plan, on January 2 of each year, (i) each non-employee director is granted a stock option to purchase 15,000 shares of our common stock; and (ii) each of the Chairmen of the Audit Committee and the Organization and Compensation Committee is granted additional stock options to purchase 15,000 and 10,000 shares of our common stock, respectively. Additionally, under the 1999 Plan, each newly elected director will receive a stock option grant to purchase 15,000 shares of our common stock at the time of his or her election. All of such options will be granted at an exercise price equal to the closing price of our common stock on the NYSE:MKT on the date of grant. All options granted under the 1999 Plan become 100% vested 12 months after the date of grant.

Director Fees. During 2009, the directors unanimously adopted a non-employee director compensation program which provides for equity grants to our non-employee directors under, pursuant to and in the amounts that were provided for in the original 1999 Plan as set forth above. The board of directors also approved the payment of an annual cash retainer of \$25,000, payable quarterly, to each non-employee director and a one-time grant of an option to purchase an additional 15,000 shares of our common stock to a non-employee director when he or she joins the Board of Directors (in addition to the similar 15,000 share grant pursuant to the 1999 Plan) pursuant to such program. This one-time award is granted to non-employee directors who join the Board of Directors after April 7, 2010. Ms. Erony and Mr. Gale have indicated that they will voluntarily defer any cash compensation otherwise due to them on account of director fees unless, until and only in the event that we return to profitability. We issued the options in this column at an exercise price equal to the closing price of our common stock on the date of the grant. We valued these options using a Black-Scholes model. In the model, we used an expected life of 3.2 years to value the ten (10) year options that we issued. We used an interest rate equal to the yield on treasury bonds that have approximately 3.2 years remaining until maturity and uses the volatility of our stock price over a period that is approximately 3.2 years prior to the grant date.
